miss the important e-mails among the clutter.

Each time a debate springs up through mass e-mail, a mass reminder is sent by CNS not to use this tool for personal opinions. Instead, we are asked to use the campus discussion forums at http://forums.juniata.edu – a pull technology in which users willingly participate.

However, Fusco admits that the campus forums are used "very rarely." In fact, prior to the Bush/chimp debate, the forums were not used since 2002.

CNS also comes under fire for the Public Folders, message boards in Outlook for posting items like lost and found. Public Folders are also rarely used, though not to the extent of the forums.

Fusco said of the forums' limited use, "It is a product of our culture, an environment we have allowed to happen." Fusco agreed that, as a student, he would risk the mild reprimand from a mass e-mail to retrieve lost keys, rather than rely on the unused Public Folders.

The staff of the Technology Solutions Center is investigating ways to make the forums more popular. Another possible aid is The Arch, an online portal that is currently in development. The Arch will bring together Juniata information in one source through the EagleNet login. For example, an announcement could be sent to the freshman class through The Arch, and only freshmen who log in will be able to read that announcement.

Yet the use of mass e-mails will change only when we change our own habits. Simply removing the distribution lists will not work, as that would eliminate the Global Address List, a valuable tool for looking up e-mail addresses.

"I can't stress enough that this is not a tech problem," said Fusco. "It is a culture problem, and we can't fix a culture problem with technology."

Nate Drenner is the Juniatian's tech columnist and a TLT lab assistant. He just sent a mass e-mail announcing this issue of the Juniatian.

Eagles continue hotstreak

Tommy McConnell
sports editor

Photo: Hannah Rauterkus

Will Russell (3) is just one of Juniata's super sophomore sluggers. Shown here swinging around on a opponent's fastball, Russell is one of six Juniata players currently hitting over .300 this season.

It seems the only thing that can stop Juniata lately is the weather. The Eagles are riding a seven game win streak, but its last four games have been cancelled due to rain.

JC's hot play of late has earned it a sixth place ranking in the Mid Atlantic region. They are currently 12-6 overall and 6-1 in the MAC. "I think we are playing well together and everyone is working hard right now," said Juniata ace Jayme Fye of the winning streak. "Hopefully we can continue playing well and winning the close games the rest of the way to a championship."

In its last outing before Mother Nature decided to put a damper on the Eagles, Juniata's offense absolutely exploded. The Eagles rang up 16 runs on 12 hits to demolish Pitt-Greensburg 16-4 last Monday, March 29.

The game was tied at three in the fifth until the Juniata bats came alive. The team scored five runs in the inning, capitalizing on three UPG errors. RBI's from Will Russell, Walk Goedkoop, and Jesse Leonard broke open the game.

Starting pitcher Darius Reed did an excellent job keeping the UPG hitters at bay, scattering three runs over five innings to pick up his second win of the season.

Prior to that, Juniata swept a three game series with conference opponent Elizabethtown. Game one was marked by two Juniata trends: a huge offensive inning and a one run win. The difference making inning this game would be the sixth. Down 5-1 heading into the inning, Juniata's offense went off, racking up six runs to take a lead it would not relinquish. JC loaded the bases with no outs. Back to back fielder's choices would cut the lead to 5-3. Then, with two outs, Goedkoop smacked a 2-run single to tie the game. David Saintz followed Goedkoop's single with a clutch hit of his own. His triple would give the Eagles the lead. Juniata would then hang on with some crucial pitching down the stretch from Ryan O'Donnell and Jayme Fye to get the 8-7 win.

In a double-header two days prior, Juniata was able to beat E-town by one run in each game. In the first, the hot-hitting Will Russell sliced a walk off, bases loaded single to give Juniata a huge 4-3 win.

Russell's late game heroics were made possible by Jayme Fye. The junior pitched a complete game to get the win. He is now 3-0 on the season. In game two, Juniata would again win in heroic style. After a back and forth game, Marc Frailey, who was 2-2 on the day with a pair of RBIs, gave JC the win with a solo homer to lead off the sixth inning. Juniata would win 5-4.

In another double-header on March 25, Juniata dispatched of Penn State-Altoona, again by only one run in each game. In game one, with the score tied, the solid hitting Goedkoop doubled. Up next, Saintz, who had a pair of hits on the day, singled to score Goedkoop, and then stole second. Troy Beaver singled in Saintz for an insurance run with a single to right field.

In game two, Juniata found itself down by one in the final inning. But the calm and cool David Saintz delivered for Juniata, putting the winning run on second with his double. Then, with two outs, Adam Camberg sent the game into extra innings with a single that scored Saintz. In the extra frame, Saintz again came up huge. His based loaded single scored the winning run and set PSU-Altoona home winless on the day.

Said Saintz of the teams late game attitude, "Last year we 'hoped' that we'd win the game and hope not to lose it, where this year we expect to win the game and believe we can."

Barring any unfavorable weather conditions, Juniata will have series with conference foe Albright on April 8 and 9. But with the way Juniata has been playing of late, opponents should be hoping for a little more rain.

Men's tennis comes out swinging

Ryan Genova
staff writer

The winter weather finally eased up enough for the men's tennis program to make its spring debut. The scheduled March 18 season-opener at Frostburg State was postponed due to snow and may have been a blessing in disguise for Juniata tennis.

With a few more practice sessions under its belt, the Eagles came out of the gates ahead of the competition at Widener. Senior Scott Noerr and sophomore Neil Eicher teamed up for an 8-3 win in the number one doubles match. The number two doubles match saw Junior Dave Bullock and senior Osman Homurlu record another lop-sided victory, 8-2.

"We took the [weather] situation in stride and made sure we were ready to play," said head coach Klaus Jaeger.

Juniata was also a dominant force on the singles' courts. Number one seed Eicher served up a 6-2, 6-4 win, and Noerr won a hard-fought 7-5, 6-0 match as the number four seed. Sophomore Tom Nelson came up big in the clutch as he defeated Widener's number six seed to give the Eagles a 4-3 win.

The following day Juniata pulled off a huge upset against Moravian, another MAC opponent. Eicher remained unbeaten as a tandem player when he paired up with senior Satoshi Kimura to win 8-6 in number one doubles. Freshman Brandon Long and Noerr made Juniata doubles 4-0 on the year with their 9-7 win at the number three seed.

At number one singles, Long took a 6-2, 1-6, 6-2 win to the Eagles' side, complimented by Homurlu and Noerr, who also recorded singles victories.

"The key basically has been holding our own in doubles. It has been and will continue to be our strong suit," said Jaeger. "The doubles point is very crucial and we were able to get it in our wins. Full credit to the team for playing remarkably. They played hard, and with gusto, and with spunk."

Moravian, a habitual powerhouse MAC team, slid to 3-3 on the season with the loss.

At Lebanon Valley, Juniata was not able to maintain its winning ways on the doubles courts as they fell in all three seedings. But the Eagles bounced back and took the top two singles matches against very respectable opponents.

Sophomore Neil Eicher won in three sets, 3-6, 6-4, 6-3. Senior Satoshi Kimura swept the first set 6-0, and went on to win the third 6-2 after dropping the second set 2-6.

The team's bad weather plague struck again over the weekend, forcing cancellations on both Friday's and Saturday's matches. If the weather holds, Juniata will finally look to shake off its first loss of the season when they travel to Penn State-Altoona on April 5.

Strong competition, tough losses

Danielle Hart
staff writer

Two weeks of tough EIVA Tait competition for the men's volleyball team ended on April 3. The Eagles completed their regular season with a win against George Mason. Juniata closes the regular season with an overall mark of 13-6 and a record of 7-5 in the Tait Division.

Tough serving gave the Eagles the edge as they took the match 30-28, 30-21, and 30-28. The Juniata offense for the night was led by three of the squad's seniors. Ryan Genova hammered 13 kills, Brian Dinning knocked out 12, and Kenny Eiser finished with 10.

On the other hand, serving proved to be an issue for not only Juniata, but also Springfield on April 3. Unfortunately, Springfield was able to overcome the flurry of service errors and win the match 30-24, 30-27, 25-30, and 30-28. The loss was Juniata's first of the season to a Division III foe.

The night was also senior night. Each of the four seniors were honored and played their respective positions for game one.

Throughout the entire match, strong attacking in the front and back row from Dinning fronted Juniata's offense, while remarkable digs from sophomore Tim Cole led the defense.

Overcoming a two game deficit on March 28, the Eagles claimed their sixth win in the EIVA Tait Division against Princeton. Juniata dropped the first two games 31-29 and 30-26. But JC woke up halfway through the third game and claimed the next three games 30-28, 30-24, and 15-13.

Solid attacking from Eiser led the Eagles to the five-game win. Eiser finished the night with 23 kills and four blocks, while Genova added 21 kills and three aces. Junior Ricky Ziegler directed the offense with 76 assists on the match.

"Without a question, Eiser has been one of our most consistent performers in games all season," commented coach Ken Shibuya. "But I think that our actual success comes from having so many players making significant contributions. It seems like someone always steps up to help us win games."

Another tough match with Rutgers-Newark on March 27 dropped the Eagles record to 5-4 in the EIVA Tait Division. Juniata took game one 31-29, but could not hold on to the intensity and fell in the next three games 30-24, 30-28, and 30-28.

Freshman Glenn DeHaven and Eiser led the offense with 14 kills apiece. Genova added 12 kills, while sophomore Cordt Withum notched five blocks.

Noisy fans and intense volleyball filled the gym on March 23 when the Juniata men's volleyball team competed against rival Penn State in the most exciting game of this two week stretch. The Eagles came out fighting, but the Nittany Lions walked away with a tight, five-game win. This match marks the closest Juniata has ever come to beating Penn State.

Juniata and Penn State battled back and forth in the first game. The Lions held the lead until an ace from Ziegler tied the game at 23. A block from Withum and Genova then terminated game one 32-30.

Strong blocking and hitting from Withum kept Juniata on top early in game two. Consistent attacking from senior Brian Dinning extended the Eagles lead to 21-17. But the Lions fought back tying the game at 27. A Penn State ball handling error would give Juniata the game 32-30.

Bouncing back, Penn State snagged a six-point lead in game three. The Eagles refused to give up and chipped away at the Lions' lead with kills from Withum and Dinning. The Lions answered back, taking game three 30-26.

In game four, Juniata again grabbed an early lead off kills from

Freshman outside hitter Glenn DeHaven blasts through a block against Springfield College on April 2 in the Kennedy Sports and Rec Center as senior Kenny Eiser and junior Ricky Ziegler look on.

Track and Field: Running for records, throwing for titles

Colleen Hughes
staff writer

Saturday, March 27 Juniata's men and women track teams competed in the Susquehanna Invitational at Selinsgrove, PA. It was a solid competition that resulted in a qualification for nationals and the breaking of two school records.

First off, junior Kira Troutman earned an amazing first place finish in the javelin a throw of 141' 06", ranking among the five best in the nation this season. Troutman said, "It was one of my goals by the end of the season to reach 140'. I couldn't believe it when they read off the distance. I was excited." She also said, "It was also a big personal record and now I am focusing on the National title. I have a really good chance of being first place."

Also on the field, junior Betsey Kusniez finished eighth in the hammer throw.

Then on the track, senior Stefanie Rynkewitz placed first in 400-meter dash with a time of 59.08 seconds, while sophomore Meredith Troutman placed first in the 400-meter hurdle at a mark of 1:06:69. And sophomore Nancy Hayes placed 8th in the 5,000-meter run.

Although finishing 15th in the 3,000-meter steeplechase, Sophomore Katey Glunt broke the Juniata record in the event by more than three minutes with a time of 12:23.03.

For the men, sophomore Justin Fritzius placed 10th in the steeplechase and broke a Juniata record time of 10:04.07 down from the old mark of 10:34.24 set in 2001. Fritzius said, "This was one of my goals coming into this season and I'm going to keep breaking it."

Still on the track, sophomores Chris Sheaffer and Mike Vella placed a strong 7th and 9th in the 1,500 meter.

On the field, the top finish was earned by senior Jeremy Weber with second place in the long jump. Shawn Miller placed 9th in the pole vault clearing 12 feet.

Coach Jon Cutright said, "It was a good start, but I expected the records to be broken, it wasn't much of a surprise." He added that his expectations for the next meet are to improve even more, move some people around, and try to qualify more people for the conference championship.

Juniata's women's track and field team hosted a meet yesterday. Results from that competition were not available as of press time. They will appear in the next issue.

Both men's and women's track and field will travel to the Bison Distance Carnival on Friday April 9 for their next meet.

Softball conquered the Mount then dropped to the Valley

Colleen Hughes
staff writer

On Wednesday, March 23, a very cohesive and confident women's softball team stepped out onto the Juniata field for a doubleheader. The team knew that its game that day would be quick, due to the inexperience of the opponent, Mount Aloysius. The Eagles won the first game 12-0 and the second 10-1, playing only five innings.

Although the Mount was not much competition, the Eagles did not let anything slip. The innings went quick as Juniata undoubtedly dominated. The softball team had an impressive first outing. JC batters were hot at the plate as they hit in eleven of their twenty-five at bats. They spread around their offensive attack as eight of ten players scored runs. Four of those players crossed home plate twice. Senior infielder Cassandra Dutzer epitomized JC's offensive efficiency , scoring twice on two home runs.

Equally impressive was the team's defense. They held the Lady Mounties to only fourteen at bats with no hits and no runs. Sophomore pitcher Renae Hobbs was solid on the mound as she struck out ten of the opponent's fourteen batters.

In the second game of the double header the Eagles gave the Mounties more of the same. The team again was efficient, scoring ten runs off nine hits. Defensively they held the Mounties to one run. Sophomore Pitcher Lizzie Bartosik led the defensive attack striking out six in five innings.

Then on a beautiful Saturday, March 27 the Eagles played a conference opening doubleheader against Lebanon Valley. Both games were close but the Eagles lost by scores of 2-1 and 6-5.

The Eagles had a harder time with their first conference opponent than they did with Mount Aloysius. The first game hits were hard to come by, but defense was solid. Only one bad inning on defense lost it for the Eagles.

Sophomore Julie Hatfield said, "It's hard coming off a game like [Mt. Aloysius] and then playing a team like Lebanon Valley." She added that the doubleheader against the Mounties was hardly even good practice for the conference opener.

Leb Valley had two runs on nine hits, as Hobbs did not strike out anyone. Juniata faced a tough pitcher who stuck out eleven of its twenty-five batters. The Eagles left four on base, scoring one run on five hits.

In game two JC again gave up nine hits, but Lebanon Valley capitalized more often in the game scoring six runs on those hits. The Eagles did get the bats moving with eleven hits, five runs, and only three strikeouts but could not match Leb Valley's offensive potency.

The Eagles current season record is 11-4 and the Commonwealth Conference record is 3-3.

Their next games will be home against Moravian on April 9 at 2:30 and Elizabethtown on April 12 at 3:00.

You can find the softball diamond behind the baseball and football fields.

UCONN Ends Madness: Defeats G.T.

Robb Patty
staff writer

This year's NCAA Men's Basketball tournament was no different than past years. You saw the usual twelve vs. five upset in the first round as the Manhattan Jaspers took down Florida and the Tigers of Pacific stunned Providence. You also had the tenth seeded Western Athletic Conference Champion Nevada Wolf Pack beat second seed Gonzaga and advance to the round of sixteen.

The team everyone was looking at however, was from a small campus in Philadelphia--St. Joes to be exact. The feel good story of the year in college basketball was the undefeated season of the Hawks as they went 29-0 during the regular season to earn a number #1 seed in the tournament.

Critics were saying that St. Joes was not worthy of a number one seed and that they would lose to Texas Tech and legendary coach Bob Knight in the schools' second round match-up. They did not and in fact proved to the entire country that they were for real.

Their dream season and hopes of reaching the Final Four were shattered though in the Elite 8 as they were dealt a heart breaking loss at the hands of Oklahoma State and point guard John Lucas.

Lucas hit a three pointer with 6.9 seconds left to give the Cowboys a 64-62 win over St. Joes and player of the year, guard Jameer Nelson.

That does not take away from their remarkable season and you have to feel good for the little schools and what they accomplished this season.

In the end, however, you were still left with two powerhouse teams playing for the National Championship.

In the Final Four, the University of Connecticut beat Duke 79-78 to advance to the final game. Their opponent would be the Yellow Jackets of Georgia Tech who beat Oklahoma St. in a thrilling 67-65 game that came down to the wire.

Many people said that the championship game could not live up to that of the semifinals, and they were right. The preseason #1 ranked team from the Big East took it to the Yellow Jackets of the ACC early and often taking a 41-26 lead into the half. They would never relinquish that lead as they got 24 points from All-American center Emeka Okafor and 21 from guard Ben Gordon.

This was coach Jim Calhoun's second championship in six seasons as his Huskies won convinc-

continued on back page

Athlete off the field

Ryan Genova
staff writer

The 2003 Juniata softball team threw, hit, ran, and bunted its way to a new school record of 19 total wins last year. With their early season success on the diamond, the 2004 squad is one win closer to raising that bar even higher as they improved to 11-4 overall.

For any successful team, leadership is always a key ingredient. Senior catcher Sarah Patterson is a frontrunner in leading the softball team to all their accomplishments, past and present. She was voted team MVP as only a freshman and captained the squad as a sophomore, junior, and senior. But her influence on the team doesn't end with her great plays on the field. A true leader brings the whole package in all parts of life, and Sarah certainly does just that.

Her list of achievements and activities is long and diverse. She does it all, from coaching softball at camps and 16 & under teams, to showing visitors the Juniata campus as a tour guide, to working in a children's hospital as a nurse's assistant.

And she still leaves herself enough time to keep up an outstanding GPA. Sarah has made Dean's List three times, as well as

Photo: Hannah Rauterkus
Senior Sarah Patterson

the MAC Academic Honor Roll each year. In addition, she has participated in the Drug/Alcohol Awareness for Athletes Program and is a member of the Juniata Instructors of the Future (JIF).

Maybe even more importantly is Sarah's ability to influence those around her to do the same. Head coach John Houck said, "She's definitely a team leader. She inspires teammates to do more on their own."

An Early Childhood & Elementary Education POE, Sarah spends much of her time during the day student teaching first grade at Southside Elementary School. And just like her first graders, her teammates look for her mentorship and advice on just about anything you can think of.

"A lot of the girls go to her for problems," said Houck. "She's very approachable and personable off the field. And she babysits for me!" There may be few symbols of trust out there bigger than your coach letting his one-year-old daughter alone in your hands. "She loves to do it. She's very responsible."

Sarah shows what it's like to be more than just a student-athlete. She's a role model to those on her team and everyone around her.

Be sure to show the softball team support at a remaining home game and see what the 3rd ranked team in the conference is about.

THE RANDOM ELEVEN

Matt Russell, layout editor

Bored plumbers: Up on the third floor of South, there's an interesting phenomenon. At every sink, the hot and cold knobs turn in a different combination of directions. Maybe the plumber had a sense of humor… or a really bad memory.

Color printing, in 3 easy steps: *Step one:* Print off a dozen pictures of your dog Fluffy on the TLT color printer, pretending that counts as an academic use. Then print some PowerPoint presentations one-slide-per-page while you're at it. *Step two:* The next day, wonder why the TLT has no more color ink when your color presentation is due in 12 hours. Get angry about it. *Step three:* Watch as free printing disappears on campus. Act confused about why it happened.

Class act: The rugby team set up not one, but two checkpoints on the way out from Pigroast to make sure drivers were all right to get home. Props for going the extra mile to bring everyone home safely.

Throw a party, in 3 easy steps: *Step one:* Announce a SPEAK party. *Step two:* Ask if anyone in SPEAK actually wants to help organize it. *Step three:* Cancel said party.

Habitat e-mails: I got two mass e-mails five minutes apart. One had blue and red text, the second had black and red text – they were otherwise completely identical. I can imagine their conversation: "Wow, those colors, like, totally clashed." "Yeah, that's, like, a **total** do-over."

Sonic stealth: The TLT had at least a dozen pairs of headphones at the beginning of the year and now it has less than half as many. Students must relinquish their ID to borrow a pair, so how did that happen? I suspect headphone ninjas.

Pigroast DDs get shafted? I may not have received the Sheetz coupon promised in a mass e-mail from The House, but I got another present instead. Someone sat a beer on top of my car as we stopped to turn over our tickets, and when I drove away it spilled onto the lap of one of my passengers. Nice.

Family Guy: Two years after its initial cancellation, it went back into production at the end of March. Catch reruns on Cartoon Network if you haven't seen it yet. It's possibly the funniest show on television.

Hurricane Isabel, revisited: There were helicopter rides scheduled last week. The event was summarily cancelled, including the rain date, due to weather. Two problems here. First, there wasn't a dark cloud in the sky on either date. Second… what the hell is the point of a **rain** date if you cancel **both** dates at once when it looks like rain??

Frozen wieners for everyone: It was hard not to notice the frozen flying hotdogs that ended Pigroast – it seemed everyone got hit at least once. Vegetarians were no exception, apparently. One said, "They were already ruined so I might as well throw one in protest." Sure, or maybe you were wasted.

March Madness

continued from page 15

ingly 82-73. The Huskies became the first team since the 1996 Kentucky Wildcats to win the title after being ranked first in the preseason.

In the two semifinal games you could not have asked for more drama as both games came down to the final 30 seconds and were decided by less then 3 points.

In the first game Tech guard Will Bynum shook loose for a lay-up with 1.5 seconds left to play in the game to give Georgia Tech the thrilling win and send them to the title game. Big man Luke Schenscher dominated inside scoring 19 points and pulling down 12 boards, while Bynum finished with 11 points.

Then it was time for the game everyone wanted to see two storied programs, Connecticut led by head coach Jim Calhoun and Duke by Hall of Fame coach Mike Krzyzewski.

Just four minutes into the contest Okafor picked up his second foul and was sent to the bench. He had 0 points and 1 rebound until the second half.

Think UCONN was out of it? Think again.

Duke let a double digit lead slip away early in the second half as the Huskies rallied to take a 76-75 lead with 26 second left to play. On the play Okafor ripped the ball from Duke's Luol Deng's hands for an easy bucket. After a turnover by Duke at the other end and a few free throws later UCONN came out victorious 79-78 and punched its card to the championship final.

The 2004 NCAA men's basketball tournament gave college fans everything they could ask for and more. There were upsets, Cinderella teams (like Xavier and UAB), last second shots (but no real buzzer beaters), and a nail biting finish to many games (ask Kentucky and OK State).

In the end the most talented team in college basketball prevailed in the end and was the only thing someone might have expected.

CORRECTION

March 25, 2004 – front page, "Racial conflict goes to J Board." The Juniatian incorrectly reported the date of the racial incident. It occurred on the night of Wednesday, March 17.

National event

continued from page 1

ceremonies to, packet stuffing. By registering early to volunteer, there is a greater possibility of matching a volunteer's interests with the events needs.

"With your help we can make this event an enjoyable and memorable experience for everyone involved," says Groff.

For more information or to volunteer, visit Juniata's National Science Olympiad website at http://projects.juniata.edu/scioly/national/ .

Making the grade

continued from page 5

try and biology.

In addition, the College is exploring how students can find a variety of study abroad opportunities without making the commitment of leaving for an entire year or a semester.

The College already offers more summer-based opportunities and many faculty are creating brief-but-intense study-abroad trips.

Celia Cook-Huffman associate professor of conflict resolution, for example, accompanied a group of students to Ireland from Feb. 27 to March 5 to study the peace process in Northern Ireland.

Although Juniata continues to fine-tune its educational approach, the College never strays far from its core values. The Middle States report says it best: "Juniata is a powerful symbol – indeed a landmark – to this interwoven sense of learning. It has never deviated from this commitment and represents… 'education at its best.'"

Ivy League

continued from page 3

student in 1981.

Does Juniata even want to join the Ivy league? "We don't want to become that large," says Clarkson, "and I, like many students, prefer Juniata's environment. It's a very genuine atmosphere, and we have a very cooperative faculty."

Although the answer to the question of whether or not we will join the Ivy League is "no," Juniata remains one of the best undergraduate institutions in the nation. No, we are not on the same level as the Ivies, but we are becoming more selective, and our campus is as attractive as ever.

Volleyball

continued from page 14

DeHaven. But Penn State took the lead at 16-15 and did not look back. The Lions won game four 30-25.

In the fifth and decisive game, the Eagles started behind, but fought back and tied the game at 8 with a kill from Eiser. A Penn State serving run gave the Lions a four-point lead. Juniata answered with two more kills from Eiser, but it was not enough as the Lions prevailed with the score 15-10.

"Even though we lost, it showed us that we can play with Penn State and Rutgers-Newark and beat them," says Dinning. "We want the chance to beat Penn State in the EIVA Division I Final when it really counts."

With play-offs right around the corner, the Eagles have the chance to avenge their earlier losses. First, Juniata hosts the EIVA Division III play-offs on April 9 and 10. A win will send the Eagles to Molten Division III National Championship. Then EIVA Division I play-offs will occur the weekend of April 24.

JUNIATIAN

HUNTINGDON, PENNSYLVANIA

APRIL 22, 2004 | JUNIATA COLLEGE | VOLUME 85, ISSUE 12

"Aging cabin" or useful property?

Nate Thompson
staff writer

President Kepple announced the planned sale of Patrick Lodge at a recent faculty meeting, sparking a firestorm of protest. Dr. Henry Thurston-Griswold and the Laughing Bush outdoors club both created petitions to stop a possible sale. The Laughing Bush petition received over 500 signatures less than three days.

The Patrick Lodge is a beautiful property containing several wooded acres. It is located at Camp Blue Diamond in Alexandria. A diverse array of teams, student organizations, classes, and faculty use its facilities every year for retreats and other types of meetings.

Kepple guessed that Patrick Lodge would sell for around $100,000 in an auction or bid.

Dean of Students Kris Clarkson explained why this money is suddenly needed. The College wants to build a residence hall at the Field Station. New building codes would require sprinklers in the hall. This safety feature would cost the college extra money.

Despite this push for a new dorm, even the director of the Field Station signed the faculty petition to save the lodge.

When interviewed, Kepple claimed the lodge "isn't used as often as it should be."

Thurston-Griswold, a professor in the World Languages Department stated, "Dr. Kepple has had no kind of consultation on the sale. I don't think that he is fully aware of the interest in the lodge."

Photo: Nate Thompson

An uncommon learning environment. Professor Grace Fala's Storytelling class used Patrick Lodge facilities in April.

Interest *is* high and diverse. Clarkson explained that a previous study showed that the lodge was used an average of 200 days per year. This year, the lodge was used about 120 days.

From April 16 to 26, the lodge was requested by eight different groups such as the United Spiritual Council, Caving Club, and Habitat for Humanity.

The lodge is used academically as well. Professor Grace Fala recently used Patrick Lodge facilities for her Storytelling class.

Beyond these one time events, some groups use it more often. The Concert Choir and the World Languages Department typically plan Patrick Lodge retreats several times per year.

While recognizing that "you can't do all the things at Raystown Lake that you can do at Patrick Lodge," Kepple explained that he hoped groups would use the old Field Station instead. He would rather not hold onto "two aging log cabins."

Another problem stated by Kepple is that Patrick Lodge "is not next door."

Professor Jason Delo wondered, "Well, isn't that the point?"

Professor Jack Troy explained the injustice being done to Patrick Lodge. "The lodge came to Juniata in good faith that we would use and appreciate the property as well as the gift. It should not be sold on a whim. We did not acquire the property on a whim."

Sophomore Katie Hagarman summed up the student reaction by stating, "Go figure. Juniata always gets rid of the good stuff."

Sale of the lodge must be approved by the College's Trustees. President Kepple will present his proposal to them this Friday.

Record number to go abroad

Caitlan Zlatos
staff writer

"Juniata extends the student's academic experience into the world and encourages the free and open exchange of thought among peoples from distinct cultures and nations." This excerpt from Juniata's mission statement could not be more appropriate for the upcoming academic year. A record number of students have applied for some type of study abroad program.

Juniata has been sending students abroad for over forty years, and those chosen to study abroad are among the College's best. Eagles Abroad prospects must have a GPA of 2.6 or above (3.0 or above for Honors Programs), several recommendation letters, an essay, and other qualifications (depending on the program).

According to Jarmila Polte, director of study abroad, there are currently 141 applicants for summer, fall, spring, and year-long programs combined.

An increase of up to 50% is expected.

The only applicants who have not yet been approved are those for the spring 2005 programs. These will be approved next semester, and there are several slots still open for qualified second semester sophomores and juniors.

If all who have applied are approved, the number of students going abroad will be up about fifty percent from last year's 94 students. This is a large increase, but it is part of a continuing trend. What might explain the trend?

"This generation of students realizes that they have to know how the world works and how to get along with people of other cultures," said Polte.

Also – besides being fun – studying abroad gives students important qualities that employers seek, such as being adaptive and knowledgeable about the world.

By going abroad, Juniata students truly become world citizens. Senior Kari Calaway said of her semester experience in Lille, France, "I remember the excitement of being on the doorstep of a new world. It wasn't just the language that brought new experiences, but the whole culture that ran according to a different clock than mine, a different rhythm."

Additionally, the quality and support associated with Juniata's study abroad opportunities make them attractive to Eagles Abroad prospects.

An important factor is that financial aid from Juniata is applicable to the offered programs. Students do have to buy plane

Drunk with tradition

Michelle Calka
staff writer

Another Pig Roast has come and gone, with beer in hand and feet (and hot dogs) in air. Springfest, the last celebration before finals, is just around the corner. Madrigal completed our fall semester with a night of dinner, dancing, and for many students, drinking. What do all of these Juniata traditions have in common? Arguably, they are centered on alcohol consumption.

Juniata is a college rich in tradition. From Storming to Springfest, Mountain Day to Madrigal, students look forward to the opportunities afforded by Juniata to relax, celebrate, and escape from work for a while.

These traditions, however, often involve the consumption of alcohol by students. Dan Cook-Huffman, Assistant Dean of Students, noted that students do drink to relax and relieve stress.

"While alcohol is certainly not necessary to have a good time, we're not so naïve to think that many students don't consume…we certainly do not condone or encourage drinking, but we're realistic," he said.

This year, Pig Roast gathered the usual large crowd of several hundred, in spite of cold, muddy conditions.

According to Men's Rugby President Dan Healy, Strickler's Beverage sold about 45 kegs for the event. It is not known how many kegs were sold by Raystown Beverages. Forty-five kegs is roughly the equivalent of 7,200 12-ounce cups of beer. This does not include those students who brought cases or hard liquor.

While Pig Roast also has food, non-alcoholic beverages, live bands, and a rugby game, no one is fooled. "People don't go to Pig Roast to roast a pig…they go to roast themselves and baste their livers in alcohol," said junior Norm Krumenacker.

Springfest, coming up this weekend, typically includes Cloister's Beer Garden and nightly parties.

> **"[People go to Pig Roast] to baste their livers in alcohol."**
> **–Norm Krumenacker, junior**

The Madrigal Dinner in late December is another Juniata tradition that often includes drinking. Between the dinner and the dance, students have approximately two hours of free time, which some treat as scheduled drinking time.

Cook-Huffman said that there is a common misconception that everyone on campus drinks, when in reality "there's a small group that overdoes it on a regular basis and colors the tone for everyone else." But since some Juniata traditions are focused on drinking, students that do not wish to drink often feel alienated socially and left out.

One group on campus who is actively working to change this is the Alternatives to Alcohol House. The eight students of 1731 Mifflin offer alcohol-free events and parties on weekends and during Juniata events that are typically alcohol-heavy. During Madrigal, The House offered an alcohol-free Christmas party for all students who wished to attend.

The administration also takes steps to ensure that students who choose to drink do so responsibly. Cook-Huffman said, "We don't expect people to be perfect, but we do expect them to use good judgment."

He also stressed that student safety is a top priority of the administration. Dan Cook-Huffman and Kris Clarkson monitor the students entering the dance at Madrigal, and refuse admittance to anyone who is clearly intoxicated. Also, Campus Nurse Connie Peters is present at the Health and Wellness Center during Madrigal for emergencies.

While many traditions at Juniata may have become another excuse to imbibe, Juniata students can use these occasions to learn and become responsible about their choices. Many colleges are "dry" campuses, where alcohol is not permitted on campus at all, regardless of age.

"We're not a dry campus because we believe students should be afforded the opportunity to express their responsibility. Students will do what they want no matter what, so we want to help keep them safe. We don't want to lose anyone," said Cook-Huffman.

Graduation Announcement

Juniata's Class of 2004 will participate in its commencement ceremony on Sunday, May 9, at 2:00 on Oller Lawn.

Over the past two years, co-editor in chief Pamela Bodziock's dedication to the Juniatian has helped it develop into the quality publication it is today. The Juniatian staff and Professor Amy Mathur wish all the best to Pam as she departs to graduate school. They also look forward to the large alumni donations the Juniatian will receive in her name.

New Halbritter Center

Mary Gardiner
staff writer

Recent issues of the Juniatian have catalogued changes to Good and Ellis Halls scheduled for this summer. Yet another big renovation and addition will come over the next year, with the Halbritter Performing Arts Center.

Groundbreaking will take place this weekend at Springfest, and the first changes to Oller will start next year.

There are two parts to the Center. First, the Rosenberger Auditorium inside Oller Hall will get a substantial renovation. "We'll be repainting, and we will even add air conditioning to the venue," said Provost Jim Lakso.

Despite the changes, no new chairs will be added to Oller. Said Lakso, "We are worried about the wonderful acoustics in the theatre. If we added soft chairs instead of the hard ones we have now, those new chairs would suck up the sound."

Since Rosenberger will serve primarily for music department performances, it would be ideal to retain the acoustics in the building.

The biggest changes, however, will occur *outside* of Oller. An addition will be built onto Oller's East side, facing Kennedy Recreational Center. It will house offices for music and theatre professors. The lobby of Oller will be extended into the new addition.

At the center of this project is a new theatre in the new addition. There will be a black box theatre in the front of the addition that will seat about 100 people.

The black box style theatre is different from any other type of theatre because it makes it possible for actors to have audiences on several sides of the stage, creating more opportunities for practice in theatre in the round.

"This black box theatre will be a home for most of the theatre performances," says Lakso. "The way it is now, the music department can't really practice in Oller if any theatre groups are in there." The goal of Halbritter is to make room for both the music and theatre departments. Lakso hopes that the renovation and addition will help Juniata to house summer shows as well.

Unfortunately, while these

Reporting and photos by Rachelle Luther

What is your best memory from your four years at Juniata College?

Senior Mike Stevens (left) "This year's Pig Roast. It was my last Pig Roast and I was finally 21. It was special."

Senior Glenn Orleski (right) "I would have to say all the random Sunday afternoons with my roommates, cleaning our East Hall dorm after Saturday night parties during my sophomore year."

Senior Amanda Rushnock (left)
"My favorite time here at Juniata is anything that wasn't school related. Mostly it was the Pig Roast of 2003 when I single-handedly kicked a handle of rum in a 24 hour period. Also the fun-filled, whisky flowing nights."

Seniors Beth Superka and Erin Kiessling (right)
"All the nights we would stay up late when we should have been doing the work due the next day, but instead we just hung out creating memories of the important things."

Curriculum forum: Distribution needs definition

Rachelle Luther
staff writer

FISHN, CW, CS, QM, QS: these are the letters Juniatians live by during scheduling season. F is for fine arts, I is for international studies, S is for social science, H is for humanities, and N is for natural science. The C stands for college, with W as writing and S for speech-based. Q is for quantitative, M is mathematical, and S is for statistical.

No, this is not a way to get children to remember their alphabet, but a way to remind advisors and students of course distributions for a liberal arts education. On April 5, faculty members met to discuss the future of the acronyms at the final faculty curriculum forum.

While the distribution acronyms are used regularly, it is difficult to truly define each area. "We don't really know what FISHN means," said Professor James Roney. Definitions for each area of the distribution turned out to be the central complaint.

Photo: Rachelle Luther

Professors Henry Thurston-Griswold , Jamie White, and Ruth Reed listen intently to the faculty forum.

Professor and Curriculum Committee Head Jay Hosler questioned everyone on what the definitions should be. "For example," said Hosler, "what exactly is a fine art?"

Professor Robert Reilly expressed his concerns, saying that "There's never going to be a good definition. We can update the language and make it a little more precise, but with the level of precision needed for a definition, I can't imagine we could do it."

FISHN was the first acronym to be attacked. Among suggestions were to corral students into foreign language studies as I requirements, allowing courses to fill more than one requirement, and decreasing the acronym.

The suggestion to require foreign language was met with heavy disapproval. While Professor Ruth Reed offered the suggestion that fewer I designated courses would encourage students to take a language, Provost James Lakso was worried. More staff would have to be hired to make it possible for all students to study language. Also, enrollment might suffer.

Allowing students to count courses that cover two areas of the distribution as both was suggested as well. However, this would defeat the point of FISHN by cutting down the span of what students study. This would raise the question whether students were getting their liberal arts education.

It was also suggested the acronym be cut down. When Professor David Gliem questioned whether Juniata really needed five distinctions, Professor David Widman quipped, "Don't hurt the acronym."

However, Gliem's ideas were reinforced by Deb Kirchof-Glazier. "We say they have to go out in five areas, but really they only have to stretch into four because the fifth is their POE. Really students can stretch in just three beyond their POE," said Glazier.

The topic of discussion switched to briefly cover the Q distribution. Lakso informed the faculty that students expressed their dislike for Q courses, citing computer programs as their main complaint.

Q courses serve as a way to

Scholarship sweep

Nate Drenner
co-editor in chief

Many people receive scholarships. Lots of students study abroad. But few ever win two scholarships plus the opportunity to study abroad in the country of their dreams...in one week.

Sophomore Caitlan Zlatos did just that this spring, winning two prestigious scholarships and a chance to study abroad next year. Zlatos, an Environmental Science/ Geology major, will spend her junior year at St. Andrew's University in Scotland.

President Kepple said of the feat, "It is a rare sweep." He also commented that it proves how competitive Juniata students are nationally for prestigious awards.

The Goldwater and St. Andrew's Society Scholarships, respectively, are awarded for research and study abroad interest.

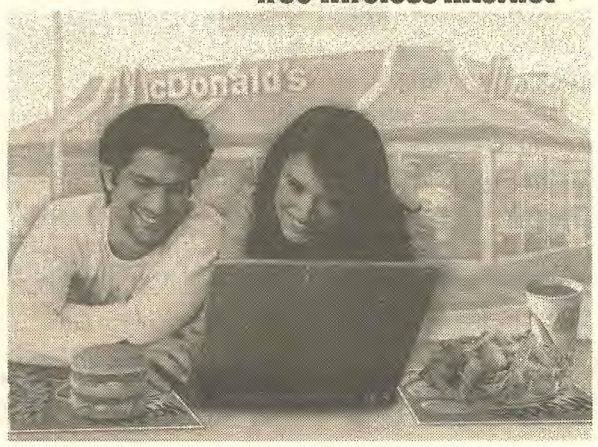
The Goldwater Scholarship honors students studying mathematics, natural sciences, and engineering. The Goldwater Foundation awarded 310 scholarships for the 2004-05 academic year. A maximum of $7,500 per year is applied to the students' tuition costs for one or two undergraduate years.

Photo: Nate Drenner

Sophomore Caitlan Zlatos recently received not one but two prestigious scholarships.

Junior Leslie Vogt, another Juniata student, was also awarded the Goldwater.

The application process began last fall when geology professor Dave Lehmann recommended Zlatos. A committee of Juniata faculty then selected four students of the 16 who indicated interest in the Goldwater. These four students worked with the committee to refine their application essays and resumes, which were sent to the Goldwater Foundation in January for consideration.



Zlatos received notice of her award on March 29 – the day before her interview for the St. Andrew's Scholarship. "I was really shocked," said Zlatos. "I [knew I had] put a lot of work into the Goldwater, but [at the time] I was focused on St. Andrew's."

The Goldwater notice was a good omen for St. Andrew's, but at first that did not seem to be so.

One Juniata sophomore is selected by the International Education Committee based on class rank, an autobiographical essay, a resume, and an interview in front of a selection committee at Juniata. The finalist is then

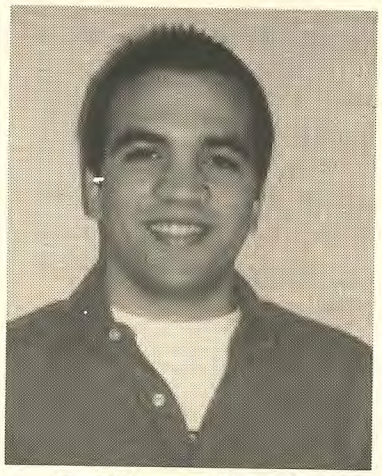
Student Government: who cares?

Michelle Calka
staff writer

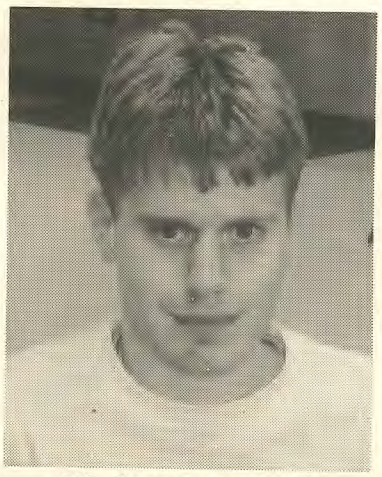


According to its mission statement, "The Student Government is an organization of students dedicated to the communication of student needs and desires to other constituencies of Juniata College." However, student interest in the organization is minimal.

In fact, most students asked did not know or care about many of the functions of Student Government. Student Government officers though, highlight the importance of the organization to campus life.

Senior John Damin, vice president of the Executive Board, emphasized that Student Government is much more involved in campus life than many students realize. Activities this year included organizing a food drive, pushing for the Sodexho Employee of the Month program, and planning the transport system to Pig Roast affectionately known among students as the "Drunk Bus."

However, students were aware of one major function of Student Government. Club funding allocation was a major issue among club officers and members.



"It's amazing how most clubs seem so desperate for funds, but other clubs who have officers in Student Government get enough money to do everything without any cost to their members. It just makes me wonder," said one club president, who wished to remain anonymous because of the fear of losing club funding. "I guess corruption goes with anything that has the word 'government' in it."

Carl Kihm, president-elect

Daysha Burkhart, secretary-elect

Mike Best, treasurer-elect

Vice president-elect Kelie Cummins was not available for a photograph.

Photos: Hannah Rauterkus

When asked about this claim, one Student Government officer admitted, "Well, you do [get more money for your clubs if you are in Student Government]. If you really care about your club, get involved in Student Government to ensure your funding." The students that are most vocal and show up at Student Government forums are more likely to get funding for their clubs.

Other club officers felt that the organization pandered to the desires of the administration, particularly where club funding was concerned. Many club officers who were interviewed struggled with the funding problem, observing that funding received from Student Government is not enough to do the activities they wished to do.

> **"I guess corruption goes with anything that has the word 'government' in it."**
> **- Anonymous Club President**

The Emergency Services and Safety Club (ESSC) was one group that felt the burn from lack of funding in the 2003-04 academic year. In fact, the club had to re-appeal to student government for funding just to stay functioning. Even after renegotiation, ESSC received only $1,400 of the $13,680 they requested. As a consequence, many of their services and activities needed to be cut, according to senior and ESSC member Matt Henry.

The club did not have enough funding to send members to a conference, while other clubs, such as Chemistry Club, received funding to attend several conferences during the year.

While no club received all of their requested funding, some received significantly more than others. Model UN, for example, received $7,000, and Chemistry Club received $2,500. Both clubs have officers in Student Government.

Damin contended that Student Government is more generous to academic clubs for one good reason. "After all, this is an academic institution."

With total club budget requests last year totaling about $270,000, the executive board must whittle down the requests to the allowed $75,000.

Damin stated, "In an ideal world, we would be able to give all clubs their requested allocations. However, we only have about $75,000 to distribute among over 75 clubs…we cannot fund every idea or proposal from every club, so we need to evaluate each idea presented before us to determine if the idea and requested amount is reasonable."

Senior John Hruska, current executive board president, said that "obviously each club does not get exactly what it wants or deserves."

Junior Carl Kihm, elected president of Student Government for 2004-05, has no plans for changing the way funds are allocated to clubs. "The process is set up to allocate the funds as needed. I think it is a good process," Kihm commented.

Hruska and Damin both expressed that Student Government is really intended as a voice for the students, and all students are invited to attend Student Government senate meetings to give their input.

Avon Walk for Breast Cancer

Cara Yancey
staff writer

Each year, thousands of men and women gather in six different cities nationwide to participate in the Avon Walk for Breast Cancer. This Avon Foundation project supports breast cancer awareness, screening and diagnosis, treatment, support service, and scientific research.

While each participant must provide an $1,800 minimum donation, one hundred percent of the net proceeds are awarded back to the breast cancer cause. In 2003, over 26 million dollars were raised and donated.

Juniata freshman Sierra Dickman has participated in this walk twice. She explained her motivation saying, "My best friend's mom died from breast cancer. I also attended an all girls' school, where many of the faculty's relatives have the disease. This was just something that I refused to be lazy about and decided to help."

The participants are given two distance options to walk in a weekend. One consists of a "marathon," which is equal to 26.2 miles. The other option is a "marathon and a half" totaling 39.3 miles.

This event is quite elaborate with such support systems as rest stops, quick stops, sweeps, medical stations, "walker buddies," a wellness village, and tons of encouragement from well-wishers along the way.

Freshman Sierra Dickman
Photo: Cara Yancey

Rest stops and quick stops consist of food, beverages, portable restrooms, and medical services for the walkers.

Sweeps are patrolling cars, which pick up walkers that need medical support or a quicker way to help finish the race before dark.

Walker buddies serve as personal contacts for each participant. These walker buddies encourage, provide care, and even carry bags for you.

The wellness village is a destination for walkers after the first day. Sleeping tents, food, entertainment, showers, medical care, breast cancer information and other services are given here.

In the end many memories are taken with these men and women, especially the Pink Mile. The Pink Mile occurs during the last part of the race. All the participants are given pink shirts to wear while they walk together to the finish.

"I remember holding hands with complete strangers and walking the last bit of the race with our pink shirts on. Those who had survived wore bandanas as well," said Dickman.

Following the Pink Mile, a pink ribbon is placed around someone's neck every three minutes. This symbolizes how often a new diagnosis of breast cancer takes place.

"After that, I went up to my friend, whose mom died from breast cancer, and just hugged her. I just stood there hugging her for a good five minutes. It really makes you begin to think of others instead of yourself," stated Dickman.

More information is found on the organization's website at www.avonwalk.org. Visit the site to register or make a donation.

JAB to sponsor May Day Awards

Holly Brown
staff writer

What's the one reason to crawl out of bed before noon on Reading Day? May Day Brunch.

Since May 1 falls on a Saturday this year, the Juniata Activities Board and Student Government will host the annual May Day brunch on April 28 at 10 a.m. The event will feature a brunch of croissant sandwiches, fruit, and hash browns followed by the awards ceremony.

Outstanding men and women from each class will be recognized, as well as an Unsung Hero, and faculty and staff. Nominees receive certificates while award winners receive a gift.

Juniatians are nominated by staff and students in leadership positions. The Unsung Hero and faculty/staff awards are selected by a committee of faculty, staff, and students. All students could vote for the outstanding students in each class from the top four nominees.

This year's theme is "Paving the Way," and road-themed decorations will adorn Baker. Street signs will act as centerpieces, and all students attending receive a gift that follows the theme.

The May Day tradition stretches back to 1916, when Juniata students danced around the Maypole and crowned a May Day Queen. The event was changed in the 1970's to recognize women's contributions. In 2002 the program was made an awards ceremony for all students.

New QRS equipment

Michael Vella
staff writer

The Office of Safety and Security recently purchased $400 worth of emergency medical equipment for the college's Quick Response Service (QRS).

The equipment included automated external defibrillator (AED) pads and software for it. The AED, originally donated by the Altoona Hospital, is a device used to shock a person's heart back into a normal rhythm following sudden cardiac arrest.

The pads, which connect directly to the patient, will provide the QRS with extra resources in the event of a sudden cardiac arrest. Software enables incident data stored in the AED (such as the number of shocks delivered to a patient) to be transferred to a computer, facilitating more accurate documentation.

If used within five to seven minutes of sudden cardiac arrest, AED's have been shown to increase survival rates from about 1-2% to 49%.

According to American Heart Association estimates, only about 30% of EMS systems in the United States have AED systems in place. "Security has a close working relationship with the QRS, which has grown stronger over the years," said security assistant Carla Panosetti. "We recently put QRS decals on our vehicles, and we continue to carry extra EMS equipment on board. It's important that everyone works together in the event of an emergency of campus," she said.

Although the QRS is very grateful for this generous donation, never having to use the new equipment would be the best gift of all.

Record number abroad

continued from page 1

tickets, but the study abroad office provides aid for them by giving students an international student discount card.

One thing that makes Juniata's programs unique is the expectation placed on students to make progress in their POEs while abroad. Though some students use the time to fulfill FISHN requirements, many take courses directly related and relevant to their POEs.

Studying abroad is even required for some POEs. For example, sophomore Jay Trovato must complete one year in a Spanish-speaking country for his POE in Spanish and Secondary Education. Trovato said, "It makes a lot of sense to be around the language for so long if you're going to teach Spanish. We spend all this time learning the language, but it's totally different when you get it first-hand."

In fact, a major element of many of the programs is being completely immersed in a non-native language. Senior Ryan Krischer, who studied in Sevilla, Spain, commented on the benefits of learning in another language: "If you can give a 20-minute presentation in Spanish, then these little 15-minute talks in front of your friends at Juniata aren't so bad."

There are many such benefits of studying abroad, and Juniata's study abroad office makes it easy to go.

For more information, check out the Eagles Abroad folder on the P Drive, the website at http://departments.juniata.edu/international/ea/index.html, or contact Jarmila Polte's office.

Scholarship sweep

continued from page 3

coached by professors Barlow and Richardson.

The final round consists of nine students from several colleges. Each is interviewed by the St. Andrew's Society, and five of the nine receive an acceptance phone call on the night of the interviews.

"I wasn't picked originally," said Zlatos. However, one of the five selected students turned down the scholarship, and Zlatos was chosen to fill the extra spot.

"It was a big letdown when I was originally declined," admitted Zlatos, "and when I [got another phone call] and they said, 'How would you like to play lacrosse for St. Andrew's next year?' I was just like, 'What?!'"

The St. Andrew's Scholarship funds a study abroad experience for five students to each of the universities in Scotland. Two of the five will visit Edinburgh. Of the other three students, one will go to Aberdeen, one to St. Andrew's, and one to Glasgow.

"When [Juniata sends] a student, they tend to win," said Jarmila Polte, director of study abroad, of the St. Andrew's Scholarship. However, Zlatos is the first Juniata student to study at St. Andrew's University, the same university attended by Prince William.

The St. Andrew's Society of Philadelphia was established in 1747 and began offering Scotland study abroad scholarships in 1957.

Zlatos acknowledges the help she received from the two committees for both scholarships, as well as assistance from professors Ryan and Amy Mathur.

Said Ryan Mathur, "Caitlan's great. She's a very strong student, and involved in a lot of different things. She works very hard at what she does, and has a real passion for her work."

Added Zlatos, "I have Scottish ancestry, and it's always been a dream of mine to go to Scotland. I have been preparing my scholarship essay since last spring."

Expect the uncommon ... theatre

Pamela Bodziock
co-editor in chief

What is an artist's ultimate responsibility? Is it to create art that will be enjoyed by the popular culture, by the mainstream of society? Or is it to create a work that has personal meaning, to the artist if no one else, that will be seen by few people and be appreciated by even less? Or is it somewhere in between the two extremes?

These are questions worth exploring, particularly at a liberal arts college – and particularly at a liberal arts college where the theatre program is anything but "mainstream."

The last several productions put on by the Juniata Theatre – "The Body of Mystery," "He," "Hoopl," and "Nine Gates" – have all dealt primarily with movement, improvisation, and even poetry ... nothing mainstream or "commercial" about them.

This isn't necessarily a criticism on my part (hey, I happen to like poetry); I'm not saying it's a bad thing. But it is a *thing*; that is, it's how the Juniata Theatre program operates. I talked to Andrew Belser, professor of Juniata's theatre program, and he pointed out, fairly enough, that he is the *sole* theatre professor of the college. And his area of interest and study is the "newer," the "non-traditional" theatre. Said Belser, "I said to them from the beginning, 'You hired me – this [type of theatre] is what I do.'"

Andy Belser, from my brief interactions with him, strikes me as an intelligent professor, passionate about his work, who creates genuinely moving theatre pieces.

Belser points out that, in America at least, the push is for artists to create works that will be accepted by popular culture – not things that the artist generally cares about. Said Belser, "It's not a necessity that art answer questions with clear and succinct answers – but [maybe] that opens mystery."

The issue that seems to arise from all of this, however, is not a question of popular culture – but of the students of the college. I did some asking around, and quickly found that I am not the only person who wouldn't mind seeing a ... well, a *variety* of styles in the theatre pieces performed at our campus.

I liked "The Body of Mystery" very much, and I did enjoy the poetry aspect of "Nine Gates." But they were virtually identical to my untrained theatre eye, in style if not in substance – and I wanted something different. I am not, I know, the only person who feels this way.

But understand what I'm criticizing here. Belser's comments about the theatre program as it currently stands – that he is the only professor here, that "non-traditional" theatre is his area of interest, that he only directs a single play a year – are all fair points. I don't think Belser should be *required* to put on a different style of play for a change; instead, I feel it's time for Juniata to take a serious look at the theatre program.

We need more theatre professors in the department. Asking Professor Belser to incorporate, oh, movements plays, *and* realistic-theatre plays, *and* musicals, *and* the rest of the myriad theatre styles that exist out there would be like asking any one history professor to cover the last five thousand years of history, over the six major continents (not counting Antarctica), in extreme detail, all at once.

Or, for you science majors out there, that would be like asking one of the science professors to cover biology, chemistry, physics, environmental science, geology, and perhaps all the math and computer classes as well. You get the idea.

So if we want a variety in style and form in our Theatre Department – and, to All Those In Charge, we students do want variety – we need to get more than one professor to handle the entire department. This is a *liberal arts* campus. It wouldn't hurt us to get a bit more emphasis and diversity (yes, diversity!) on the *art* end of things. It's time.

The Theatre Department is about to undergo some major changes. Oller is about to be essentially re-worked into the Halbritter Performing Arts Center.

But it's time for Juniata to start expanding their theatre program in more ways than physical space. We need *diversity* in our theatre program. That is, after all, what liberal arts are supposed to be all about. A variety of styles and opinions, to make us look at things in a new light. And that requires ... well, variety.

Admittedly, a professional theatre company will come in next year – two to three artists at a time will be brought in for a period of several weeks, work with the students to "create pieces," and then take those out and tour them professionally. The theatre program is not being ignored.

But despite the coming changes, the question of diversity in style still exists – namely, is there going to *be* any diversity of style?

As a graduating senior, I won't be here next year to see how these new changes will affect the theatre program of Juniata overall – but I somehow doubt that any emphasis will be put on adding something besides movement, improv, and the avant-garde style of theatre that currently exists.

If an artist has any "responsibility" to the public at large, it is to create meaningful art. Public reaction to that art should be of secondary concern – it's impossible to judge how the masses will react to a painting, a novel, or a play, anyway. Artists should create what has personal meaning to them – but their goals often include getting their piece to be recognized by as wide an audience as possible. Since different styles appeal to different people, it's foolish – and, really, impossible – to try and have one style or format of artwork to satisfy the needs of an entire group of people.

If Juniata is hoping, in the coming semesters, to create a meaningful theatre program, it must be one that reaches more of its students. So it's time to broaden the theatre's "horizons" – and truly start getting some diversity into our campus of liberal *arts*.

Ask President Kepple

"Do you have any advice for outgoing seniors?"

Go out and make a positive difference in all that you do! I'm confident you will.

"What, in your opinion, were the high and low points for Juniata College this school year?"

Having a real student newspaper is certainly one high point!

Another high point has to be an undefeated regular season by the Women's Volleyball team. We have come to expect this at Juniata but it is a remarkable feat! Let's hope we will also bring back the National Championship in Men's Volleyball (if we do add it as a high point). And Coach Larry Bock's induction into the Volleyball Hall of Fame is another high for our athletics program.

Another very impressive high was the awarding of the Carnegie Pennsylvania Professor of the Year Award to Andy Belser. It is one thing to win this award in Idaho competing with only a few faculty members across the state vs. winning it in Pennsylvania with the third highest number of faculty of any state! It is a big deal – and having two winners in four years is really special.

The opening of Shuster Hall at Raystown was the first building of a whole new campus!

The ground breaking for the Halbritter Center for the Performing Arts on April 24 will be a high point (yes we do care about the Arts!). Once it is completed in the fall of '05 it will have just as much an impact on the performing arts here as the von Liebig Center has had on science.

Having a record number of students (perhaps the most of any college or university) attending the NCUR student research presentations in Indianapolis is pretty special.

The clear downside is the racial incident on campus, but even here Juniata showed its best side. The community approached the issue as an important learning experience and the judicial process worked. Hopefully we have all learned from it, and the students directly involved will be welcomed back into this community at the appropriate time.

LETTERS TO THE EDITOR

"Overworked departments" clarification

Once again, I feel compelled to clarify some facts in an article appearing in your paper. In the [April 8] edition, an article entitled "Which departments really are overworked" brought up some interesting issues with regard to the disparity between science and humanities courses and the way in which these courses are taught.

Your article reports that the department currently has eight faculty members. We actually have six full-time faculty, plus one half-time professor and around three adjunct professors, each teaching one course.

Although there are in fact four sections of freshman organic chemistry, there are only two lectures. Between the two lectures, there are approximately 225 students. The demands on our two professors – Dr. Hark and Prof. Lewis – are extraordinary. In addition to the lectures, Dr. Hark and Prof. Lewis also teach discussion sections. They do not have graders for tests. They grade the organic exams themselves, and often are in their offices late into the night so that they can return the exams in a reasonable amount of time.

According to your article, the Chemistry Department offers ten courses for chemistry majors. As a chemistry major, I can tell you that some of those courses are not intended for chemistry majors. Dr. Ochiai's Physical Inorganic class is geared specifically towards geology and ESS majors, while Quantum Mechanics is usually predominantly comprised of physics majors. In fact, there are six only courses specifically designed solely for chemistry majors.

One final issue that was not addressed in your article was labs. Chemistry, biology, and physics all have four hour long labs. Four days a week, the chemistry faculty are occupied with these labs, often holding five separate classes simultaneously. With the professor unable to teach a lecture during this time, that severely limits the amount of time a professor can allocate to teaching another course. The American Chemical Society (the organization that grants accreditation to the department) also limits the amount of time any one professor can teach. Usually, there are at least two faculty members who exceed the limit set by the ACS.

No matter how you look at it, chemistry is just as overworked as any other department, including philosophy or English. We have already cut upper level courses so that we will have enough faculty hours to cover general education like CA, as well as classes for freshmen and sophomores, many of whom will not graduate as chemistry or biology majors.

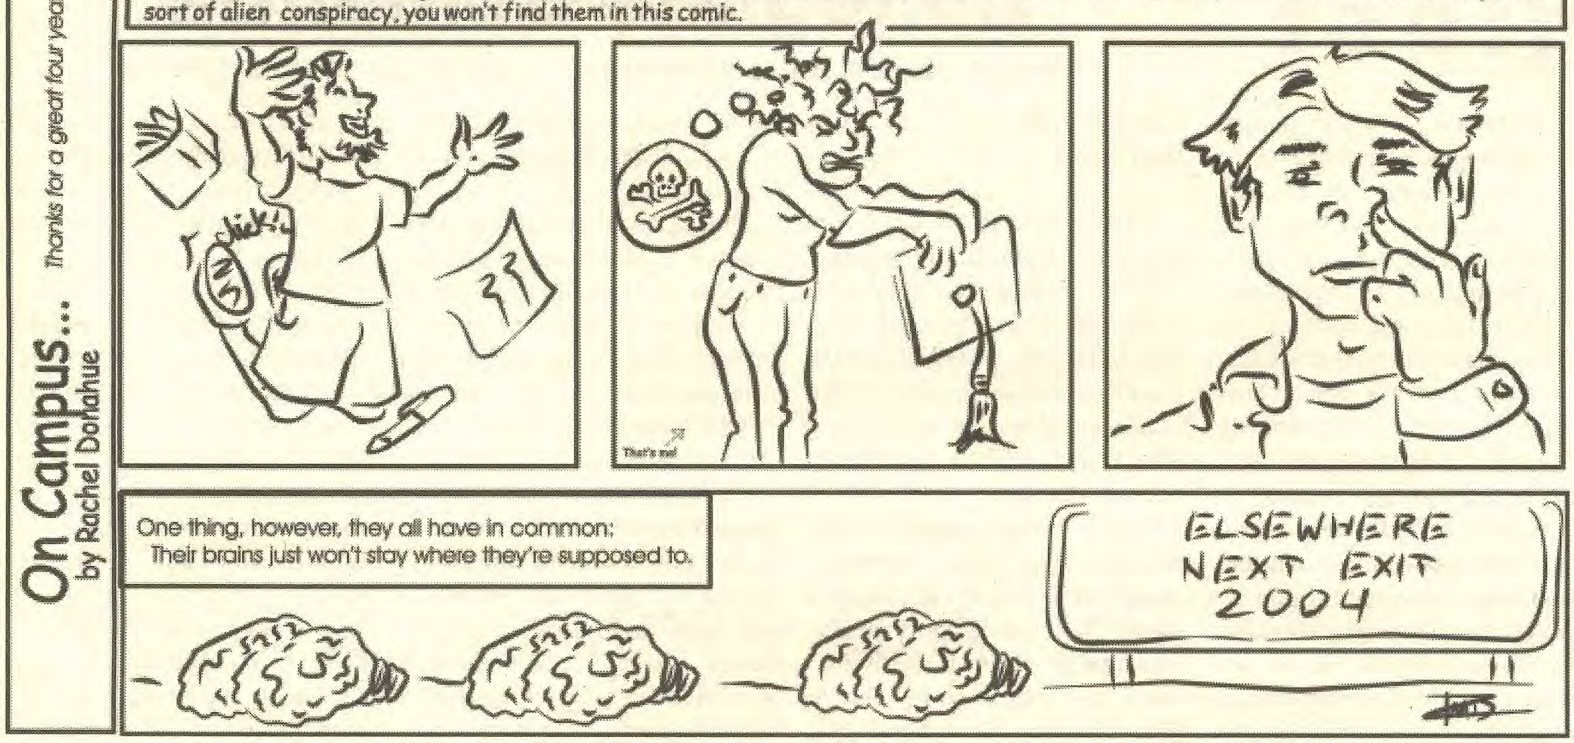
Class of '04

"Bull crap" detection

There were several items in the latest issue of the Juniatian that set off my bull crap detector. In no particular order:

1. New ID cards are ten dollars because "having someone around to do the work" is that expensive. That is crap because ID cards take less than five minutes to make. If the pay for making ID cards is that good, I am changing my POE to Identification Card Science and Technology with an emphasis in Mass Production. Also, I'm sure no one's sole purpose here at Juniata is to sit around and make ID cards. Please.
2. I have no doubt that several departments at Juniata are overworked, and I have no problem with an article raising this issue. However, it could have been done without bashing the science department. Really, the humanities vs. the sciences thing is getting old.
3. Editors, your response to Michelle Schoonmaker's letter was a cop out.
4. I don't expect you to have an answer for this one, but I'm still going to ask. The Juniatian currently shares an office with Habitat and Circle K (two very active campus organizations). What is going to happen to them when the Juniatian and food services change places?

Mike Chirdon
Class of '07



1. E-mail your advisor and the Registrar - we dare you.

2. The humanities vs. sciences debate is one of the oldest and still most popular debates in academia. While we may dream of a day when everyone gets along, the conflict is not going away any time soon. Embrace it.

3. Our response was most certainly not a cop out. The errors that Schoonmaker referred to still elude us – even after review by our advisor, English professor Amy Mathur. EN181, The Writing Practicum, has not closed. All grammar masters are welcome to pick up the course and help us out.

4. Habitat and Circle K will move into the offices formerly occupied by the catering service, adjacent to the Ellis lobby. The Juniatian and Alfarata will occupy the office outside of Baker. This was decided at a meeting between college officials and club representatives.

The Tall Tales of Morrison's Cove

Nate Thompson
staff writer

On Thursday, April 8, Dr. Grace Fala's Storytelling class provided a delightful evening of storytelling for residents of Morrison's Cove, a community for independent- and dependent-living retired citizens.

Overall, the residents were fond of the stories. This was shown by the constant smiles on their faces. When asked to fill out an evaluation, they told Fala that they would not recommend changing anything about the performances.

Before the student performances began, several residents were eager to share their own stories. Jack Claycomb and Don Omsby were two such residents.

Claycomb served in the Marines, and Ormsby had served in the Navy. Claycomb had said that stories were often a way that the troops would provide each other with a glimpse of home while they served abroad.

Each of the eleven students has been working diligently to create and prepare an original story. The diversity was amazing. Junior Crystal Trineer provided an enjoyable explanation of sentence punctuation. Senior Tony de Rubis told a rhyming fairy tale of a mean goblin in "The Kingdom of Rigamaru." Other stories included pirates, sand castles, and leprechauns.

Each original story was thoroughly practiced over the past month. The students, as a group, also critiqued each other at least twice.

On the Tuesday before they went to Morrison's Cove, the class spent the night at Patrick Lodge. There, they shared ghost stories and worked on their original stories.

Claycomb saw the talent within the stories. "I believe they could all really go somewhere," he stated.

"It was all really great," Ormsby agreed.

The class seems to have developed its own dynamics as well. "We're a dirty dozen," commented Fala, as she identified herself as part of the group. She concluded the evening with a story of her own.

There was a large push by the residents at Morrison's Cove to have the Storytelling class come every year. Unfortunately for the residents, Storytelling is a special topics course. As of right now, Fala can only offer the class once every three years.

Based on the enjoyment of the residents, the students, and Fala herself, the demand for a yearly class seems to be all-inclusive.

Photo: Nathan Thompson

Jack Claycomb (right) and Don Ormsby (left) listen intently to stories created by the storytelling class.

Fala also mused about the possibilities of an advanced storytelling class.

Perhaps the most intriguing thing about the Morrison's Cove performance was that it was an excellent example of how storytelling bridges generations. Both students and residents were able to share their stories. Many of these stories will be remembered for years to come.

Springfest

Meredith Pink
staff writer

Before Springfest was born, there was the annual Juniata Raft Regatta. This was a festive and highly anticipated event. Students rode down the Juniata River on rafts, while enjoying some nice cold beverages (kegs of root beer, I suspect).

In 1986, this tradition capsized and was discontinued. The liabilities involved, including alcohol and safety, were too much for Juniata College to take on.

When the Raft Regatta was canceled, there was an outrage from the student body. To assuage the angry students a "Regatta Alternative Weekend" was created. This event was not well attended, to say the least.

Overtime, the events of "Regatta Alternative Weekend" grew and evolved into Springfest. This weekend has become one of the biggest events on campus. This year there are approximately 27 different clubs involved in one way or another, and the budget is over $10,000.

There is one theme every year. This year's is Las Vegas. Sophomore Megan Allison, Chair for the JAB Springfest/Mountain Day committee, said, "We had a few themes picked out, but we ended up choosing the Las Vegas theme because there are tons of fun games and activities that are easily linked to it. We plan on having our own little casino tent with slot machines, roulette, card tables, and a money machine!"

In addition to the casino tent, JAB orchestrated the movie and food items to incorporate into the theme. Allison added, "We chose the movie 'Ocean's Eleven' because it revolved around the Las Vegas casino idea – and George Clooney is in it!"

The food menu was more difficult to relate to the theme, but the decision was made to have hors d'oeuvres and appetizers.

The club booths will cover a wide range of activities. For example, the Chinese Club booth will play Chinese blackjack. The Japanese Club will have its annual sumo tournament, and the Psychology Club will hold highly anticipated Jell-O wrestling.

Collegiate Dementia

Here a demon, there a demon, everywhere a demon-demon

Carolyn Keller
staff writer

Technology is the Devil. Or that's what you think. It's the close of the semester, and now I know where I stand with the Big Guy In The Sky. (B.G.I.T.S.). Call Him/Her/It what you will, but recently—and not so recently—That Dude Up There and I have had our disputes.

B.G.I.T.S. chose to enlighten me the other night, when I was working on my fiction writing assignment. Oh, it was *great*! I finally had time to sit down and write, and I was boppin' to my David Gray-Spouting-Headphones (ignore that David Gray can't really be bopped to), and I had just finished a fabulous paragraph. I mean it was the stuff that dreams are made of. I loved it so much that I thought, "Well, this must be saved immediately, just in case my computer does something crazy and crashes.

Obviously, the computer gods will appreciate my cautiousness and care as sign of my homage to them as all-powerful beings, and honor me accordingly." Thus I moved the mouse deliberately to File. Click! Scroll down, to Save As. Click!

And I watched as my computer viciously and gleefully dismantled my existence as a writer. It crashed. Fantastically. It crashed with all the glory of a slow-motion money shot: "NOOOOOOooooooooo!!!!!" Cut. Fade to Black.

I did the only logical thing. I jammed the restart button with my thumb and shrieked approximately 42.5 obscenities per second until the demon-machine slowly rebooted, thus breaking up a Crusades-scale religious debate between Roomie Becky and Honorary Roomie Haley, I believe it was along the lines of: Which makes more sense: Catholicism or Protestantism? (C'mon, like *that* will ever get sorted out this lifetime.)

So right when Haley said something particularly snide (albeit in jest) about what happens to be my particular religion, I unwittingly staged my outburst. Naturally, when I called my computer the R-rated equivalent of an out-of-wedlock-born-eternally-damned-by-God cretin (which nonetheless acts on an Oedipal complex!), Haley thought I was talking about her.

Pause.

"Uh, what?"

"What?"

And directly came the decision that even the Almighty Baby Jesus enjoys killing two birds with one stone, and to prove it, took it upon himself to smite petty religious debate and his favorite heathen's short story all in one shot.

A week later, wits more-or-less-intact, I strolled into Muddy Run, and copied and saved my supposedly long-lost and un-importable manuscript from temporary files to a new document. But that just goes to prove my point. We must unite (!!!) and not sweat the small stuff, and forget petty differences like the significance of eternal damnation and whether or not Microsoft Word is the Spawn of Satan.

After all, exams are coming up, and we best save our karma for that. To do anything else would *really* be demented, if you ask me. Happy summer!

Students strut stuff on stage

Rachel Donahue
staff writer

Tonight at 9:00 p.m. in Baker Refectory, students will get on stage to compete in the Musical Theater Club's annual Talent Show.

Dr. Bogardt will be the emcee, and contestants will be judged by professors John Bukowski, Carol Peters, and Jim Tuten. There will be plenty of singing, guitar playing, and piano, and one dance act.

The show will have a 10 minute intermission, and both halves will start with performances by a full band playing an original song.

It will open at nine with the group "Care Who We Are," formed by Alison Earnhard, Steve Kendall, and Tyler Hazui, and intermission will be followed by Pete Patitsas, Neil Eicher, Mark Stalczynski, and Dane Fischer.

The rest of the performances are a mix of original and cover songs including Everclear, Joni Mitchell, and Queen.

The performers will be competing for first through third prizes of $200, $100, and $50, respectively.

All contestants will get a certificate of participation and some donations from community businesses for being a part of the show.

The Musical Theater Club, started in 2001, decided to start the Talent Show in the fall of 2002 so that they would have something to run in the semesters they weren't putting on a musical.

Be sure to come to the show to see your classmates perform and take a break from the end of the semester crunch.

Last Oller performance

Nate Drenner
co-editor in chief

Juniata's theatre program will host its annual Original Student Pieces from April 23 to 24. The shows will begin at 7:30 p.m. each night in Oller Hall. Admission is free.

This will be the last performance by Juniata Theatre in Oller Hall, as renovations will make the building mostly unusable until its rededication as the Halbritter Performing Arts Center.

This year, seniors Tony de Rubis and Raina Miller, and sophomore Ellie Pfeuffer, are each directing a twenty minute to half hour performance.

"These are completely student run. I have only had one meeting with the students," said theatre professor Andrew Belser.

De Rubis wrote and directed "Alice is Dead." He describes it as "a modern-day retelling of 'Alice in Wonderland,'" adding that it is "a compilation of poetry, much like 'Nine Gates,' [the previous Juniata Theatre performance]."

The play includes familiar characters, such as the Mad Hatter, Queen of Hearts, and Cheshire Cat. However, de Rubis cautions theatre-goers that "Alice is Dead" contains mature themes and is not recommended for a young audience.

De Rubis directed a show last year when he studied abroad in Lincoln, England. He also performed in Belser's production "Exit the King" in the fall of 2000. He has hoped to direct a show at Juniata since his freshman year.

Pfeuffer came to Juniata this semester as a sophomore transfer student. She formerly attended Point Park University in Pittsburgh, where she majored in theatre. She also directed two shows while in high school.

"I want the audience to come in not knowing what to expect," said Pfeuffer of her play, "Us and Them," by David Campton. "Maybe people have seen me carrying all the props across campus," Pfeuffer continued. But audiences will have to wait until Friday night to see how a unicorn on a stick fits into the show.

"Us and Them" is also not intended for a young audience.

Miller will perform a one-person show titled "Reveal." This is her senior thesis, with her POE in Theatre, Literature, and Philosophy. She will present "Reveal" twice each day, once at 5:00 p.m. and again at 8:30 p.m, following de Rubis's and Pfeuffer's pieces.

For the show, Miller compiled a series of monologues written by William Shakespeare, Arthur Miller, Ntozake Shange, Sharman Macdonald, and herself.

Miller explained, "The show

The Bookmarkables

Nate Thompson
staff writer

Your roommate can't stop coughing. Your best friend's arm just fell off. Should your toe *really* be turning green?!?

You left Dr. Mom and Dr. Dad at home. Out of sheer stubbornness (and aversion to talking to your parents unless it involves them sending you money), you refuse to call home. However, there are still medical questions you desperately need answered.

Your hypochondriacally important questions can be answered online, for free. Just visit WebMD.com. Dr. Mom can't compete with this site.

The Ratings
webmd.com

Addiction	1, Nope.
Humor	2, Not really.
Navigation	4.5, Great.
Politically correct	5, Not a problem.
Usefulness	5, Medical stuff.

You can do a regular search for just about anything medical-related. You can also break down your search results. Categories include drug information, news, features, medical reference, and tools.

But they have a better search engine. Chances are, you're going to use this site when you've come down with symptoms. Therefore, try your symptoms on the "Check Symptoms" search feature. It lets you pinpoint the area you are having problems with.

When you run through the symptom checker, it will ultimately give you color-coded options. If you answer yes to questions in the red box, you need to call a doctor immediately. If you answer yes to the yellow box, you should call within 24 hours. The green box symptoms can wait for a day. Black box issues should be resolved in two weeks.

When I clicked "Yes, there is a bone sticking out of my arm," WebMD kindly suggested that I call my doctor immediately. It also informed me that problems might worsen if I don't call. I found this much less frantic than watching my mom run around and scream until someone called an ambulance.

Another great feature of WebMD is its drug information. Pick up your favorite bottle of pills. Type its name into the site. You'll get its active ingredient and the other brand names available. It tells you how the drug works. Most importantly, it gives you all the cautionary statements about the drug. These cautions answer the first question I ask when getting a new prescription – namely, "Can I go to the bar tonight if I'm taking this?"

Now that you know about WebMD, tell your roommate to see Connie Peters. Rush your best friend and his favorite arm to the hospital. While you're there, have them check out your toe. Dr. Mom would be so proud of you! You should call home and tell her. Who knows - she might even send you money.

Record Review – Live from Huntingdon...

Matt Soniak
Staff writer

I like Minor Threat, a lot. I think they were a really great band that inspired the D.C. scene, as well as the entire hardcore genre, not only musically but by their DIY work ethic and lifestyle. Most importantly, Ian Makaye and his band became something of figureheads for the burgeoning straightedge movement, and even did their part to try and slay the beast they had created when various idiots drove it violently out of control.

I have the utmost respect for straightedge kids and anyone else helping to support and promote the lifestyle and its surrounding culture. That being said, though, I also believe that, in most situations, rock and roll and wild debauchery go together like Lennon and McCartney, and thusly I'm glad we had some cool bands at Pig Roast.

The Daddario Quartet, who went on as soon as the party started, needs no introduction or explanation. They did what they always do, and they did it very well. My only complaint: for all the awesome jazz covers and cool jamming they do, I never hear any Mahavishnu Orchestra songs from them. Let's go guys, the people demand "Birds of Fire!" By people, of course, I mean me, but that doesn't change anything.

The poor souls who got stuck performing just as everyone's umpteenth beer began to take effect were Felix Sarco. Felix Sarco is not only a cool band, but get bonus points for being from Wilkes Barre, PA.

Until now, the only notable things to come from that wasteland I was born in are myself and Lion's Head beer, which is almost as bad as the swill (sorry, Keystone Light) that most people around here seem to favor, but I digress.

As I said, I'm sure a lot of people weren't paying attention to Felix Sarco, which is a shame because they're the most interesting thing I've seen in a while. A Coltrane-loving drummer and guitar player with the guts to do some Eddie Van Halen moves (get those lighters in the air, kids) would be enough to satisfy me.

Felix Sarco, however, went the extra mile by way of their vocalist. From the combat helmet/socks-on-hands fashion statement, to a liberal use of vocal effects processors, the man behind the microphone is in-the-flesh proof of a sense of adventure alive somewhere in the world of music. These guys play quite a few shows, so if you're from eastern PA, check them out. The rest

A story in photos

The Ahn Trio

Rosenberger Auditorium hosted the Ahn Trio, the last Artist Series of the semester, on April 18. The Ahn Trio (top) is made up of sisters Lucia Ahn (piano), Angella Ahn (violin), and Maria Ahn (cello). On the piano Lucia and her twin Maria played old favorites like the Doors' "Riders On the Storm" as well as pieces created just for them like "Swing Shift" by Kenji Bunch (bottom). The trio played feisty pieces like "Mr. Twitty's Chair" by Katrina Wreede along with "sad, beautiful" pieces like Oblivion by Astor Piazzolla. The trio played a tango piece by Piazolla called "Primavera Portena" that had many concert-goers toe-tapping in their seats.

"Hellboy"

Rachelle Luther
Holly Brown
staff writers

Summary: During WWII, Nazis open a portal into another world. Fortunately for the Allies, American forces stop them and a scientist adopts Hellboy, a demon who came out of the portal. Now grown up, Hellboy uses his powers for good and helps the FBI's secret paranormal task force. Along with a fish guy (David Hyde-Pierce), a pyro (Selma Blair), and a new agent (Rupert Evens), Hellboy must stop the impending apocalypse in this comic book adaptation.

Rachelle: Multiply "League of Extraordinary Gentlemen" by "X-Men," subtract all big name actors, add a Russian historical figure and the Terminator, then divide by "X-Files" and "Ghostbusters," and you get "Hellboy."

If you are like me, you saw the trailers and thought "gee, that looks stupid." In that case, you, like me, are wrong. I went in thinking "Hellboy" was going to be horrible but came out pleasantly surprised.

The trailers botched two things.

First of all, they did not do the computer graphics justice. Although the CGI is sometimes unconvincing and obvious, it is decent. Lack of quality is a disease that plagues many movies, but "Hellboy" manages not to make it an epidemic.

Secondly, Hellboy himself looked lame in the trailer. What I thought was going to be an emotionally unappealing film about a muscle-bound freak who cracks lame jokes constantly and kills everything – was not.

Okay, actually I was partly right. Hellboy is a muscle-bound freak who kills all the scary bad guys. I was wrong about emotional appeal and lame comedy, though.

While it may not be a typical comedy per se, "Hellboy" is amusing. Surprisingly, the flick has a little heart as well. Hellboy has a dad, friends, a girlfriend, and a strange interest in cats. Yet the heart is not overwhelming and is in all the right places.

There are some plot holes and unanswered questions, as well as a piece of crap that they called an ending. There is also an issue with lighting in some scenes - there simply is not enough. Not to mention the entire film is completely predictable.

However, by averaging in the bad with the good, "Hellboy" manages to break considerably above even. It is worth your time and money. Best of all, you will enjoy yourself.

Grade: B-

Holly: Those darn Nazis are at it again. Using "science and black magic" along with a supposedly dead early 20th century magician, they bring in Hellboy to destroy the world.

I feel like I don't even have to write a review. The summary should be enough to have you rolling in the aisles. But movie buffs, please don't be disappointed in me … I really *liked* this movie. A lot.

Honestly, I went into this movie wanting to hate it and was prepared to make Mike, Tom, and Crow T. Robot proud.

Certainly, I laughed through much of the movie. But the movie wants you to laugh. When you have Nazis and Rasputin and fishmen and giant squids, you can only keep a straight face for so long. The producers know that and put in lots of humor to keep the audience from trying to take anything too seriously.

For example, Hellboy himself is *hilarious*. He's the sarcastic, straight-faced tough guy with a heart. I know that's a very typical hero portrayal, but I came to like the scary beast from hell. He eats nachos and has tender, romantic moments!

And come on, how many superheroes do *you* know that can fight scary tentacled beasts of the apocalypse *while* saving a box of kittens?

On a practical level, the story is decent. The last twenty minutes are very rushed, and the ending is far too abrupt. I never find Selma Blair to be very watch-able, and she is just mediocre in this. I was mad that Abe Sapien (the fish guy) was out of the second half of the film, because I really liked him.

The writing is decent, with great one-liners and gags. Special effects and costuming get an A+. But for me, this movie was about the ridiculousness mixed with action.

In the end, it's good to know that the vehicle of the apocalypse will be giant, angry squids – we can die laughing before we are eaten with those evil beaks. And it's also good to know that the apocalypse can be postponed by a lot of grenades.

I, for one, am not ashamed to share my initials with this big, lovable devil from the pit of suffering. Thanks Hellboy, for being surprisingly enjoyable.

Grade: A-

Best Part: The nine-year-old giving the 60-year-old advice on love and proving that everything can be fixed with cookies and milk.

Worst Part: The guy without the eyelids or lips. Yeah, that was kind of gross. Okay, that was really gross.

Last Oller show

continued from page 9

focuses on […] characters who reveal things about themselves, underlying feelings, and it is my hope that the audience will come away asking themselves what they hide from the world. That isn't to say this show is all drama – it's funny, sexy, and a bit sad at times."

As plans are underway for the Halbritter Center, so are plans to augment Juniata's theatre program.

Belser hopes to create a professional acting company and training institute. He will also introduce a theatre POE when Halbritter officially opens in the fall of 2005.

For now, these students will enjoy their performances in Oller Hall.

Said Miller, "You will get to see three very different plays all in an hour and a half, which is a rare opportunity and an experience not to be missed!"

Contrivances Amok: *Share! Share! Share!*

Nate Drenner
co-editor in chief

For the last technology column of the semester, I decided to go to the root of all technology literature: a "how-to" guide.

But on what topic, dear readers, shall I guide you? The first that came to mind was double-sided printing, after observing someone print over 100 single-sided copies in a public lab. (Yes, 100; I checked the print queue.) But this column is for technology, not common sense.

So instead I will tackle file sharing - not the illegal, RIAA-lawsuit-inducing kind of file sharing but the useful, class-project-collaborating type.

(Which, if you read into it a bit, *this* file sharing can be used as *that* file sharing. But you can figure that out on your own.)

Before we get to the "how," let's consider "why." Nearly every class I have taken at Juniata involved a group project of some sort, even if all we were creating together was a Word document. Instead of e-mailing drafts back and forth, or hoping that we all have write access to the same folder on the P Drive, I usually end up creating a shared folder on my own computer.

Beyond academics, you can also use file sharing to let your friends browse through digital photos or drop their files onto your system.

It's a simple procedure in Windows XP Professional. First, simply create a folder somewhere on your hard drive. Then right-click on the folder and choose "Sharing and Security."

The box that appears controls file sharing. Choose the "share this folder" option and supply a name for the folder.

Next, you'll need to tell the computer who can view and write to the folder. Click on the "Permissions" button.

Now, Windows XP automatically gives everyone read access to any new shared folders. **Delete the entry called "Everyone."** On purpose or by accident, something objectionable could make its way into the folder… and everyone on campus could see it.

Click "Add" to start making a list of people who *should* have access to the folder. Simply type in a username, a last name, or a series of names separated by semicolons. The click OK, and you can control specific types of access (read, write, etc.) from the permissions box. Remember to add yourself and give yourself full control.

Click "OK" to close the Permissions box. Now go to the "Security" tab at the top of the box and repeat the "Add" process you used to give people access under Permissions.

Finally, tell your group members how to find the shared files. Go to the Start Menu and choose "Run." Type **\\computername \sharename**, substituting in your computer's name (usually the same as your username) and the share name (whatever you named it in the "Sharing and Security" box). So if I made a share called "Contrivances, " I would access it at \\drennnd2\Contrivances.

File sharing can be set up from other versions of Windows, not just XP. Windows 2000 uses a similar procedure as the one outlined in this column.

Windows 95 and 98 use a different type of file sharing that requires the user to enter a different password (separate from their Juniata account). If you own 95 or 98, don't bother trying to figure it out. Instead, upgrade. Whether you're sharing files or not, you'd be doing yourself a favor anyway.

Keep in mind that this file sharing isn't limited to group projects. Share photos with friends or use it to access videos and PowerPoint files for presentations that won't fit on your U Drive. This is simply another, convenient way to get to your files.

Nate Drenner is the Juniatian's tech columnist and a TLT lab assistant. He currently has several file shares set up on his computer for his own documents, and he won't give you permission to any of them, even if you ask nicely.

Springfest

continued from page 8

There will also be live music preformed by Velveeta, an 80's band from State College, and Shift, a finalist from Battle of the Bands out of Altoona.

The schedule for this weekend, April 23 and 24, is as follows:

Friday: 3:00 p.m. Mud volleyball, 9:30 p.m. Outdoor movie on Oller lawn (Ocean's Eleven)

Saturday: 12:00 p.m. – 6:30 p.m. Springfest activities.

Make sure you come out and experience Springfest weekend. It is sure to be a good time.

Division III Champions

Danielle Hart
staff writer

For the second year in a row, the Juniata men's volleyball team competed in the Molten National Championship match on April 17. But this year, the Eagles came out on top, claiming the program's second Division III National Championship.

To earn the title, the Eagles crushed Medaille in three quick games 30-16, 30-16, and 30-27. Senior Kenny Eiser was named tournament most valuable player, while senior Ryan Genova, junior Ricky Ziegler, and freshman Glenn DeHaven were named to the all-tournament team.

Juniata continued to serve bombs in play-off competition. For the match, the Eagles combined for eight aces. Consistent attacking from all sides of the court also kept Juniata in front the entire match. Eiser led the offense with 13 kills and Genova added nine.

To gain a spot in the championship match, the Eagles first battled host Eastern Mennonite University on April 16. Playing true to its number one ranking, Juniata stomped EMU in three games 30-20, 30-24, and 30-21.

The Eagles dominated the entire match with tough serving, including 12 aces. EMU fought to stay alive in game one, but senior Brian Dinning blasted a series of strong serves to end the game. Much like game one, games two and three ended with serving runs in Juniata's favor.

A week earlier on April 10, after a big win against Springfield College, the Juniata men's volleyball team earned a standing ovation and a berth into the EIVA Division III finals. To claim the title, the Eagles defeated New York University in four games 30-18, 30-18, 26-30, and 30-25.

Consistent playing from Dinning earned him the recognition as the tournament most valuable player. For the weekend's two matches, Dinning tallied 27 kills and 7 aces.

In both games one and two the Eagles gained control early over visiting NYU. Strong attacking and serving gave Juniata the edge over the Violets. The Eagles terminated both games 30-18.

Game three was more of a struggle for Juniata as NYU battled back from the two game deficit. The Violets jumped ahead early with the score 7-5 and the Eagles would not regain the lead even once as NYU seized the game.

Bouncing back, the Eagles defense tightened. Juniata combined for nine blocks in this game alone, holding the Violets to a .047 hitting percentage.

That defense was coupled with a strong offense from Dinning in game four. Dinning finished the match with a kill to send the Eagles to the Molten Championships.

On April 9, Juniata opened the first round of EIVA Division III play-offs against rival Springfield College. It was a rematch of last year's Molten Division III National Championship. Last year the Eagles fell in a rough five game match with the Pride of Springfield College. But this year the Eagles defeated the Pride in a tight five-game match.

The beginning of game one was tight. The score bounced back and forth as each team exchanged ace for ace, kill for kill, and block for block. Springfield grabbed the first real two-point lead with an ace at 26-24. Dinning answered with a few hits to tie the score at 27 and an ace from senior Ryan Genova gave the Eagles the lead. Freshman Glenn DeHaven pounded a kill to close the game 30-28.

Game two was all about serving and blocking for the Eagles. The game started with an ace from sophomore Cordt Withum and ended with an ace from DeHaven. In between the aces, Withum combined for blocks with Ziegler and Dinning. Dinning then added two aces to snag a ten-point lead. The Eagles finished 30-21.

The Pride came alive in game three, jumping to an early three-point lead. The Eagles fought to regain control with kills from Dinning and Genova. Springfield kept its lead and Juniata fell 23-30.

Game four started much like game one. One team would gain a lead, while the other chipped away to tie the score. The last six points were especially intense as each team failed to gain the two points needed to end the game. Juniata would side-out continuously with kills from freshman Jeremy Barndt, sophomore Matt Springer, senior Kenny Eiser, and Genova. But Springfield ended the final rally with a block to win the game 32-30.

Early in game five, the Eagles struggled to find their A-game. Hitting errors and Pride blocks gave Springfield a three-point lead. Dinning banged a kill for the side-out and went on a five-point serving run, which included two aces. Huge attacks from Eiser and Genova maintained Juniata's lead. JC terminated the match 15-13.

Looking to make a little history, the Eagles close out the season by competing in the NCAA Division I tournament. Juniata will host the first round on April 24 against Springfield College.

Juniata exploring possible conference change

Michael Vella
staff writer

When word got out that Juniata expressed interest in switching athletic conferences, the Middle Atlantic Conference (MAC) Internet chat rooms quickly filled with opinions. Some members of our current conference were angry, and others were indifferent.

What conference has caught the eye of Juniata's administration? No, it is not the Ivy League. That myth was dispelled two weeks ago. This time it is the Centennial Conference, and Juniata may eventually find itself nestled alongside Dickinson, Gettysburg, and Franklin and Marshall.

The Centennial Conference was founded in 1981, and has since acquired 11 members. Juniata's administration heard unofficially that the conference was looking to add another football team. Juniata head football coach Kevin Burke speculates the need for a team arose after member Swarthmore dropped its football program.

"The [Centennial] conference currently has seven football teams, which is the minimum number required to receive an automatic NCAA playoff bid," he said. "They probably want to get that number back up to eight."

Dean Clarkson said a letter expressing Juniata's interest in football was sent to conference officials during the first week of March. "The letter we sent explained that, if our football program was granted membership into the conference, we would expect a full membership for all sports teams within two years," he said.

Centennial Conference officials have yet to respond to Juniata's letter, leaving administrators unable to provide many details about this prospective change. However, Athletic Director Larry Bock said, "We felt the need to tell our student-athletes about this issue when word got out in the chat rooms."

Why is Juniata attracted to such a move? Bock says it would provide sports teams with a greater variety of competition. "Right now our non-conference games are very important, and we would like the opportunity to play more western teams."

Burke adds, "The Centennial Conference schedule allows each team to play four non-conference games a season, compared to only one in the MAC. Playing teams outside the conference becomes important when the playoffs roll around."

Coach Burke also emphasized that this is not an athletic department initiative. "Moving to the Centennial Conference has little to do with the competitive nature of the teams involved," he said. "The MAC has outstanding competition and so does the Centennial. The move, however, might make sense for Juniata College, as we are more academically aligned with the Centennial schools."

Clarkson also finds Juniata more akin to the standards and philosophies of the Centennial Conference. According to its website, the Centennial Conference "encourages athletic competition among national liberal arts colleges and universities that share similar academic aspirations and a commitment to the importance of the total educational experience of [student athletes]."

Like the Centennial schools, Juniata supports undergraduate research and studying abroad. The SAT scores and GPAs of Juniata's incoming freshmen are also very similar to those of the Centennials.

In addition to academic standards, the Centennial Conference requires its member schools to be at least a century old and have comparable student populations. Juniata was founded in 1876, and its current student body places it somewhere in the middle with respect to the sizes of the Centennial schools.

Despite the benefits of such a move, Clarkson is worried that Juniata will be perceived in a negative light. "The other MAC schools may view us as dissatisfied with the conference or somehow less committed, but this is certainly not the case," he said. "We just feel this [move would] make the most sense for our school."

Bock said, "We value our MAC membership. It is an excellent conference, and we have developed a strong relationship with the other MAC schools."

Many athletic teams would not be affected by a move to the Centennial Conference. The cross-country and track and field teams see Centennial schools regularly

Eagles focused on the finish line

Colleen Hughes
staff writer

Starting on April 3, both the men and women's track and field teams had an action packed week. The Eagles had strong showings and record-breaking performances in everything from the Western PA Championships at Carnegie Mellon to the women's only home meet of the season.

Starting off the week at the Western PA Championships, the women took home three first place finishes while breaking a pair of school records. Sophomore Nancy Hayes broke the school record in the 10,000 meters with a time of 40:52.60, winning first place. Sophomore Katey Glunt followed by winning the 3,000-meter steeplechase while breaking her own school record in a time of 12:05.00.

Photo: Hannah Rauterkus
Juniata track and field--soaring to new heights.

Claiming another victory for the women, junior Kira Troutman threw the javelin 42.32 meters on her final throw.

One the men's side, Sophomore Justin Fritzius finished third in the steeplechase with a time of 10:07.44. Sophomore Mike Vella claimed a top ten finish, finishing tenth in the 5,000 meter.

In the field, freshman Randy Anderson finished eighth in the long jump and tenth in the triple jump while senior Jeremy Weber placed fourth in the long jump. Junior Adam Loser added a ninth place in the high jump to wrap up the Eagles' success in the championships.

Next on April 7, the women competed in the only home meet of the season, claiming an 83-79 victory over the University of Pittsburgh-Johnstown. The Lady Eagles posted a solid eight first-place finishes along with seven runner-up finishes.

On the track, sophomore Meredith Troutman placed first in both the 200 and 400-meter dashes and senior Stefanie Rynkewitz placed first in the 100 meter sprint. Nancy Hayes placed first in the 3000 meter, breaking her own school record with a time of 11:10.60. The women also claimed victory in the 4x100 meter relay.

In the field, Kira Troutman took first in the shot put. Senior Andrea Denkovich won in the discus and junior Sephanie Wasylyk took first in the pole vault.

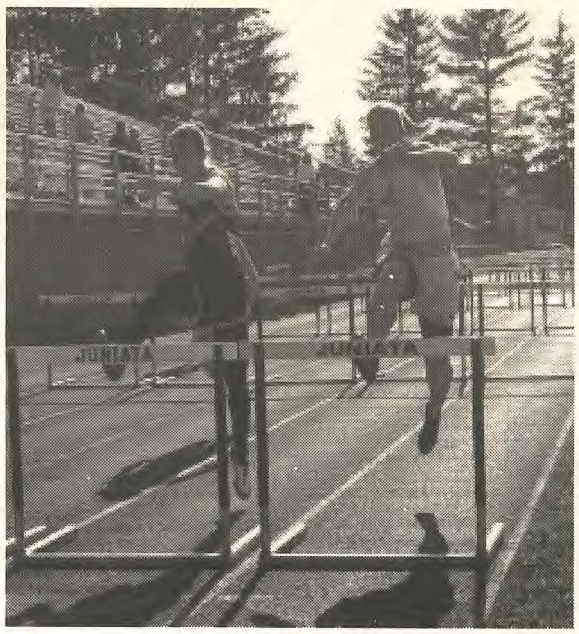

Photo: Hannah Rauterkus
No hurdle is too high for Kira Troutman to clear.

Most recently, the men and women's teams competed in the Bucknell Outdoor Classics Distance Carnival in Lewisburg. During the two-day event, the Eagles performed exceptionally, breaking records left and right.

On day one, Nancy Hayes placed ninth in the 5,000 meter with at time of 18:35.80, topping the 1983 school record by more then 14 seconds. Katey Glunt came in right behind Hayes, finishing tenth with a time of 18:36.00.

Hayes said, "I was most excited about breaking the 5,000 meter record because that is the race that I have trained the hardest for and improved the most in."

For the men, Justin Fritzius broke the 5,000-meter school record with a time of 16:09.98.

Fritzius said, " I wasn't even supposed to break the record. I was just supposed to be pacing Vella and ended up just going out and doing it."

Day two was packed full of strong and impressive performances as Juniata competed in the remaining events.

For the women, the Eagles finished second in the 4x400-meter relay with a time of 4:03.12 setting a new program standard. Sophomore Meredith Troutman tied the current school record in the 400-meter hurdles with a time of 1:05.56. Stephanie Rynkewitz placed fourth in the 400 meters with a time of 58.59.

In the field, Kira Troutman went on to capture first in the javelin with a throw of 131'2".

For the men, Chris Sheaffer placed fourth in the 800 while Adam Loser placed fourth with a jump of 6'2". Shawn Miller earned eighth clearing the pole vault at 13'.

Photo: Hannah Rauterkus
Senior Andrea Denkovich makes her approach on her first javelin toss.

Hayes said, "I would love to have Katey Glunt and I break into the top three places at the upcoming MAC meet in the 5,000 and score some points together for our team."

Fritzius added, "The women are definitely dominating. They have a really good chance of winning the MAC."

The Eagles will go on to the MAC Championships at Messiah, which runs from April 30 to May 1, where they will put all of their time and energy to work.

Conference change

continued from page 12

and have few home meets. Centennial schools are also currently on a variety of JC team schedules.

Coach Burke says he does not care what conference his team is in. "Put any team on the field and we'll play them," he said. "We just want to do whatever is in the best interest of the school."

Although Juniata is exploring the possibility of switching to the Centennial Conference, it is important to keep in mind that this initiative is in its beginning stages. "This is a major deal," says Bock, "and we are at step one in about 25."

The Juniatian will publish more information as it becomes available.

Tennis here and there: Japanese culture examined

Ryan Genova
staff writer

Sports are a universal language. Few things bring the world together the way sports can. Athletes from completely different backgrounds, speaking completely different languages, can step onto a court together and find a common bond. Though cultural differences do not completely disappear, a connection is still made through playing the game.

While the rules and regulations remain the same in any given country, different cultures place different values and importance on the sports themselves, especially at the collegiate level.

Satoshi Kimura, a senior at Juniata, has had the unique opportunity to experience competitive tennis in two completely different cultures: Japan and the United States. A member of Juniata men's tennis since its reinstatement in 2002, Kimura's biggest surprise when he came to Juniata in 2000 was the vast amount of schools that offer Varsity programs.

"I was amazed at how important sports are to Americans," said Kimura.

It's true: we live in a country where a football game is the most televised event of the year. Michael Jordan, Barry Bonds, and Wayne Gretzky are more popular than the President. ESPN became so popular that ESPN2 had to be put on the air to satisfy the nation's cravings for sports entertainment. This is because, as a culture, we are constantly spoon-fed sports, day in and day out.

College students in the U.S. take for granted that every weekend there will be multiple sporting events taking place all over campus. Imagine what college life would be like without the games, matches, and meets. Saturday nights might be spent in a library or a laboratory instead of a crowded, noisy gym. The "student-athletes" that make up roughly one third of Juniata's student body would no longer exist. The possible result would be a much more academic environment focused solely on education, which is exactly what Japan represents.

According to Kimura, it is nearly impossible to compete in a Japanese Varsity sport and receive a good education. "State schools in Japan do not offer Varsity programs such as tennis. If you want to play after high school, you must be recruited by a funded, private university," he said. And if a student should be talented enough to be recruited by one of these private universities, the "student-athlete" situation remains very unbalanced. Those student-athletes aren't really there to learn, they are there to play the sport for which they were recruited. "[Japanese student-athletes] receive a degree, but they basically just play tennis, and do not receive a 'real' education."

On the whole, college athletics in Japan are more for recreation, and the intense competition found in U.S. universities just doesn't exist. Kimura said, "There are club teams, but it's not really supported by the school. There is no funding. You pay for things yourself: rackets, balls, strings, everything."

Student-athletes in the United States are accustomed to having these expenses covered, especially if a college is sponsored by a name brand. It's no big hooplah for top-ranked Division I schools to be handed free shoes, socks, warm-ups, uniforms, and equipment, just for being top-ranked.

American students may take the freedoms that go along with Varsity programs for granted as well. If, for whatever reason, we want our playing days to be over during our college careers, we simply discontinue playing. We are able to step out of the athletic side of our lives and continue our education without a problem.

Student-athletes in Japanese universities do not have this freedom. A Japanese student-athlete must remain involved in a Varsity program throughout his or her education. "If you decide not to play tennis for them anymore, you get kicked out of the college," said Kimura.

In Kimura's opinion, the reason for all of this is due to a very

Men's Tennis finishes season

Colleen Hughes
staff writer

Photo: Hannah Rauterkus
Neil Eicher spends practice time preparing for his upcoming matches at the MAC Individual Championships.

On Friday April 9 the Juniata men's tennis team dropped its match to visiting conference foe Albright. Even though JC won two doubles matches it was not enough as Albright won, 5-2.

The home match started off with the ball in Juniata's court. Despite an 8-0 loss in the first doubles match the men went on to win the next two. Junior Dave Bullock and Senior Osman Homurlu captured a 9-8 victory, winning the tiebreaker 8-6. Freshman Brandon Long and senior Scott Noerr followed with an 8-4 win.

Fairing better in doubles play than in singles matches, Osman Homurlu said, "I think we have one of the tougher doubles lineups in the conference."

The Eagles dropped five of six matches on the singles courts. Noerr earned the sole singles win with a 6-4, 6-1 straight sets victory.

Bullock split the first two sets of his match, losing the first set 3-6 but claiming a 6-3 win in the second. He then dropped the final set 1-6. The rest of the Eagles' singles players fell in straight sets.

Head Coach Klaus Jaeger commented on the season, saying, "It was a very short eight matches abbreviated by unkind weather. Obviously, [our final record] is a mild disappointment for the players, but the team was competitive. Some matches were very close which does signal that we are edging up to our competitors."

He added, "What was difficult was that everyone could not participate in every match so we needed to juggle quite a bit. I want to give the team a high praise for their attitudes, competitiveness, time, and energy."

The Eagles' final conference record is 2-6. Both Neil Eicher and Satoshi Kimura have been nominated to attend the MAC Individual Championships on April 24 and 25 at Moravian and Desales at 1:00 pm.

Softball reaching for playoff spot

Robb Patty
staff writer

On April 9, the Juniata softball team fought hard, but fell to Moravian, the top ranked team in the country. The Eagles lost both games of a double header against their conference foe by scores of 3-1 and 4-2. This Eagles now sit at 12-7 overall and 3-5 in the Commonwealth Conference.

Head Coach John Houck said, "We played well but didn't get a few breaks that would have put us in a better position to win the game."

The Eagles got solid pitching in both games. In game one, sophomore Renae Hobbs held the Greyhounds to three runs, allowing seven hits.

Though the Eagles were able to hold the high powered Greyhound offense to just three runs JC could not generate anything offensively. The Eagles managed just four hits and could only score one run in the game.

In the seventh Juniata had a chance to tie as they brought the tying run to the plate, but couldn't punch through and suffered the tough 3-1 game one defeat.

In game two, sophomore pitcher Jessica Darrow allowed two runs on three hits in the first inning as Moravian struck early to jump out to an early 2-0 lead.

The Eagles would trade runs in the third and fourth innings but could not close the two run gap.

In the game, senior Amy Gable was 1-for-4 with an RBI. Sophomore Lizzie Bartosik, who pitched the final four innings, came through for a solid relief outing allowing just one run and one hit in her four innings of work.

With the losses it will now take some very good end of the season play for the Eagles to grab a playoff spot, but Coach Houck remains optimistic.

Photo: Hannah Rauterkus
Softball sluggers aim for the fences...and maybe the playoffs.

"We have to win five out of the last six games we play to have no doubt that we make the playoffs and that's good because The Eagles finish up the regular season with big conference games on the road against Lycoming on the 22 and end with Susquehanna on the 24.

Baseball continues solid play

Tommy McConnell
sports editor

On April 5, Juniata hosted conference opponent Lebanon Valley. Juniata's offense played well, scoring seven runs on the day. Unfortunately for the Eagles, Lebanon Valley's offense played better. The Eagles lost the high scoring affair, 13-7.

The loss snapped a seven game overall winning streak, as well as a five game conference win streak for the Eagles.

Junior Jayme Fye, who had been undefeated prior to the game, suffered his first loss. He is now 3-1 on the year.

Juniata got off to a solid start in the first inning. Sophomore Darren Hake singled in the second run of the inning, giving the Eagles a quick 2-0 lead.

JC would hold that lead until the third inning. There the Flying Dutchmen would get on the scoreboard win a run, then take the lead for good with an explosive fourth inning.

The visitors scored five runs in the fourth, grabbing a 6-2 lead. Lebanon Valley continually found holes in Juniata's outfield, scattering seven hits, six of which were singles, in the game-breaking inning.

Typical of the season, Juniata answered right back. The Eagles responded with three runs in the bottom half of the inning. Sophomore Walt Goodkoep started the rally, singling home senior Matt Garner, who had doubled. Sophomore Troy Beaver kept the rally going with a two run RBI.

Despite Juniata's valiant effort, Lebanon Valley would prove to be too much. They would score twice in both the fifth and the sixth, and cap the offensive showcase with a three run ninth inning.

Juniata tried to answer in the final frame. Doubles from Garner and sophomore Zach Sternberg each scored runs. It would be too little, too late, however, as Lebanon Valley hung on for the 13-7 win.

Juniata then traveled out of conference to play a double header with La Roche College. The Eagles drew a split with the Redhawks on April 16.

Juniata lost another high scoring game, 11-10, in game one of the double header. Its ten runs were highlighted by a home run from senior Kodi Hockenberry. Juniata would lose the game, however, when La Roche scored two runs in the final inning.

The Eagles would bounce back in game two to earn a split on the day. Drew Michanowicz picked up his first win of the season as Juniata won, 7-2. Goedkoop and senior Adam Camberg led the offense with a home run apiece.

Back in MAC play against Lebanon Valley on April 18, Juniata would earn another split. Juniata stole game one on the road, but were unable to complete the sweep, losing game two.

In game one, Juniata senior pitcher Ryan O'Donnell turned in a spectacular performance. The hurler got the complete-game win, while allowing only one run on just five hits.

O'Donnell got all the offensive help he would need in the first inning. With the bases loaded Sternberg drew a walk, putting Juniata up, 1-0. Jesse Leonard followed with a two run single to put his team up 3-0.

Troy Beaver led off the second inning by reaching first on an error. A stolen base, another error, and an Adam Camberg sacrifice fly later, Juniata had its fourth run of the game. O'Donnell took care of the rest as Juniata won, 4-1.

In game two, Lebanon Valley would give Juniata some of its own medicine. Flying Dutchmen pitcher Craig Denlinger three hit the Eagles and allowed only one run. The home team won game

THE RANDOM ELEVEN

Matt Russell, layout editor

Failed euphemism: "If your plans have changed and you are not returning for the fall 2004 semester, please contact the Dean of Students office." Sounds like a nice euphemism for "let me know if you flunk out during finals week."

Bjork, Blair, and the Spice Girls (collectively): I absolutely must congratulate the recent sender of one of the most voluminous poopfingers to ever enter my Inbox. The subtle wit was a refreshing change to the overused poopfinger messages that were berated in the same e-mail.

Posters, part 1: Hmm, do you think someone is trying to save Patrick Lodge? I signed the petition, but the Ellis stairwells might as well just have Patrick Lodge wallpaper. Kill a sapling to save the lodge, hooray!

Kill Bill: The second volume was distinctly different from the first volume, yet as a whole they create a masterful work. I can't wait to own them both on DVD and watch them as a double feature.

Posters, part 2: For every issue this year, I've put up posters in Ellis announcing its distribution. And, every issue, someone decides to take down all but two of them by the following day. One day, I'll catch them. The Blue Army is probably behind it.

The Blue Army: I've learned this a term used to refer to the college Facilities staff, derived from the color of their uniforms. Personally, I think the term is very amusing and highly underused.

Press conference: Bush decided to call a press conference when one of my favorite shows (24) was supposed to be airing a new episode on Fox. If he'd had anything new or interesting to say I would've taken interest, but all he did was reiterate everything I'd been reading in the paper for the last two weeks. Can he at least use a game clock so I know if I have time to do my laundry while he campaigns?

New classes! Class registration ends, and suddenly five professors have a new course they'd like us to all consider. It's a conspiracy for the freshman, I tell you.

Low of the Year: Dragging my belongings up to the third floor of South Hall on one of the hottest days of the summer before anyone had bothered to ventilate the building. It was brutal. (I was tempted to say the lack of a kitchen in South, but I've killed that one, haven't I?)

High of the Year: Putting this final issue to rest and realizing I had laid out an entire year of newspapers and written 132 items for this column. That's a lot of randomness, even for me.

A closing nod: My goals were simple: to point out the foibles of this great institute, invite self-depreciating laughter, and have a little fun. I appreciate every one of you who has chuckled at this column even once in the past year. Thanks for reading; more randomness to follow.

Faculty forum

continued from page 3

teach students how to interpret mathematical and statistical information in their real world applications. These courses are designed to help students understand graphs and charts in magazines and statistical information accompanying news.

In an interview, Professor Sue Esch highlighted the importance of Q courses. Speaking to the student body, Esch said, "you guys are going into the world to be leaders…People are going to trust what you say and you should have a way to understand data without having others tell [you] what is right or wrong."

Esch explained that statistical and mathematical data is often distorted to support the argument being made. "Numbers aren't always absolute," Esch warned.

The forum recommended that Q courses should remain as they are.

The next acronyms to fall under the scrutiny of the forum were CW and CS.

According to Professor Amy Mathur, there are too many CW courses. This means that students are not doing the kind of writing they should be. For CW, students should be doing a specific style of writing with rewrites involved in the process. This is not the case.

Another problem cited was that there are no ties between CW courses and CWS. A workshop was requested to teach CW professors about CWS in order to develop a parallel between the two courses.

As for CS, no change was requested. In fact, Lakso suggested that Juniata needs more CS courses. There is a demand in the professional world for those who know how to present themselves and their companies. CS courses would give students the edge in the job market.

In the end, Roney suggested that an easily administered review of courses be administered every five years. These reviews would assess every course with a distribution letter to see if it still fits the definition.

Music review

continued from page 9

of you could at least add some hits to their website (www.felixsarco.com).

The last band of the day was Foxy Moon Baby, who managed to cram something like nine musicians under the pavilion. I'm stuck on what to think of these guys – their live show was awesome, they sounded great, were tight and in the groove, and were obviously having a lot of fun.

The Foxy Moon Baby CD I have, on the other hand, leaves a little to be desired. While energetic and funky live, the band sounds somewhat subdued on record.

They remind me of the kind of generic smooth jazz that they play in department stores and at cruise ship buffets. It could be the atmosphere or my mood, but they definitely strike me as much better live. Being as such, you should go see them, as I'm sure you you may have been too roasted to even know there was a third band. For concert dates, see www.FoxyMoonBaby.com.

I feel compelled to remind you all that if you've enjoyed all the live music events that have happened this year, the Huntingdon County Arts Festival will be June 11 and 12 and promises plenty of exciting musical entertainment (insert subliminal message about the coolness of my band, Trephine, here).

Japan and tennis

continued from page 14

competitive Japanese job market. "The only way to get a decent job in Japan is to receive an exceptional education. The job market is much more competitive than in the U.S.," commented Kimura.

There are few physical labor jobs to fall back on if your college education doesn't work out. "Blue-collar" job opportunities are much less prevalent than in the United States. "The Japanese have to use their heads, not their bodies, to make a living," said Kimura. Thus, students are more focused on their education, and less on extra-curricular activity.

Despite all of the cultural variations, what still shines through is a common love for sports. Though tennis may not be a top priority to most Japanese, the interest in the game will always be there. Students will continue to pursue their hobbies despite collegiate policies less focused on athletics and more on academics. Whether playing with your ten year old nephew, against a rival college, or competing in the French Open, one thing always stays constant: the joy of sports.

Baseball

continued from page 15

two the same way the visitors won game one, 4-1.

Said Beaver about his teams play of late, "Our defense and pitching is doing a great job. Once we put that together with our hitting things will be unbelieveable."

The split brings Juniata's record to 14-9 overall and 7-3 in the conference. Next on deck for Juniata is conference opponent Messiah as they continue to make their playoff push.

Beaver said on the team's future. "We got plenty of games left but if we can win every series from here on out, we will have a lot of confidence going into the playoffs. And thats when baseball is at its best."

Halbritter Center

continued from page 2

changes will be useful for the arts programs, Oller Hall will be unavailable for most of next year in order to renovate and construct. Said Lakso, "We'll work around some things, but All Class Night and Mr. Juniata will have to be housed somewhere else next year."

Halbritter, however, will be a wonderful—and necessary—addition to Juniata's facilities. Said Lakso, "We want to show that we do care about the arts on campus."

JUNIATIAN

HUNTINGDON, PENNSYLVANIA

SEPTEMBER 16, 2004 | JUNIATA COLLEGE | VOLUME 86, ISSUE 1

The brewing storm

A popular Juniata College tradition in turmoil

Colleen Hughes

Tradition is something that we as a tight-knit community hold dear. The unique traditions of Juniata stood out to us during our fall overnights, campus tours, and orientations. So if one of our favorite traditions were to slip away, should we save it with all of our might? Or would it even be worth reviving?

It has come to nearly everyone's attention that Juniata's long-standing tradition, Storming of the Arch, had been put in jeopardy this year. Due to the construction of the new Halbritter Performing Arts Center, the time-honored route of the stormers is closed in by fencing.

As of press time, Storming was listed on the events calendar for September 15. However, according to Dean of Students Kris Clarkson, "I think [rugby officers] understand that we hope to allow the Storming event, but [safety concerns] need to be addressed before it will be 'officially' approved."

However, something much bigger is in question. What is Storming of the Arch? Is it an essential piece of what makes Juniata, well, Juniata? Without it, will our tight knit community become unraveled?

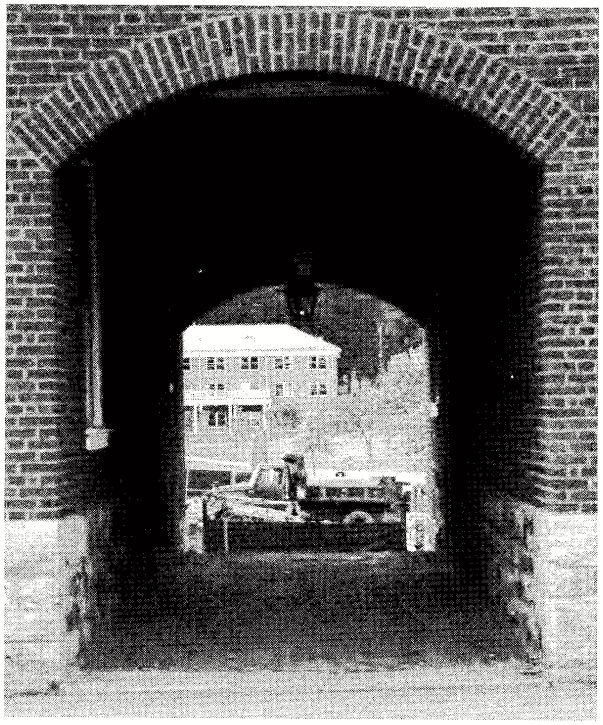
In the past week, the men's rugby team presented a proposal to the administration to keep Storming alive.

Senior Rugby Club President Corey Duvall, along with his fellow ruggers, designed a new plan of attack. They proposed that the stormers charge from the opposite side of the Cloister Arch. Starting from Founders Hall across Oller Lawn, the brave newcomers would sprint into a narrowing funnel of demise facing both the men's and women's rugby players.

Duvall seemed confident that even without the infamous steps, the Arch would be secure.

Duvall said," We are going to funnel the path. They don't even usually make it to the steps anyway."

Duvall also explained the deeper meaning of the annual event other than brute upperclassmen intimidation. He said, "For us, it is one thing we can do to contribute to community. It is a huge tradition, and we're going to keep it going."



"It is a right of passage for the freshmen. It initiates them, as a class, into the Juniata community," said sophomore Courtney Kosanovich, an avid attendee.

But it seems that not everyone feels so strongly about this community-building custom. Although very willing to listen to the Rugby club's proposal, Dean of Student, Kris Clarkson admitted it was not high on his agenda.

"We [administration] want to work with them [rugby] to make it happen in a safe and well-organized fashion," he said. "Worse case scenario, Storming would have to take a two year hiatus."

Clarkson went on to compare Storming of the Arch to hazing in a fraternity. He said, "It all seems silly, duct taping your

A dump truck parked within the new Halbritter Center consturction zone outside Cloister may just be the greatest Arch defender ever.

Death of the Poopfinger?

Richard Pulliam

Your roommate is nowhere to be seen and has conveniently left his computer logged on to his Microsoft Outlook account. This could be your chance to send out the first poopfinger of the year. So you sit at his computer desk and type out what you think to be an uproarious poopfinger, plus maybe a shout out or two and of course the word "poop" in it somewhere. Then you address the e-mail to the Students distribution list and hit the send button. But what's this? "Microsoft Outlook does not recognize 'Students?!'"

That's right, "the almighty," "big stinky," "nice and fat" – or whatever adjective you added to it – poopfinger is supposedly history.

For three or four years now, the Dean of Students, Human Resources and Campus Technology Services (CTS) have been considering whether or not to take away the mass distribution lists from the students.

Dean of Students Kris Clarkson stated, "[The poopfinger] got to a point where it was really stupid." What had started as unplanned, innocent e-mails turned into malicious attacks with not only just words but also pictures of students.

This situation grew to a point where Clarkson would need to spend time with victims of a poopfinger who were upset and offended or those who became fearful in the Juniata community after a harrassing poopfinger incident.

This year, only certain offices on campus – such as the Registrar or the Office of Student Activities – have permission to send e-mails to the Students distribution list.

But apparently someone

New face leads Student Activities

Reorganized office focuses on students and leadership development

Sarah Wharton

You may have noticed the many physical changes to campus that began over the summer and will continue into the coming semesters. There have been personnel changes as well.

One campus adjustment happened within the Office of Campus Activities. There is no OCA any more. And Dawn Scialabba, former head of that office has moved to a new post in Campus Ministries.

The new Office of Student Activities, "illustrates the focus is on the students," said Staci Weber, the new director of student activities.

Weber and her staff will advise Student Government and work with student clubs and organizations. OSA will support and assist the students to help them become more involved with campus goings-on.

Most importantly to Weber, though, is the OSA's call to make and mold better student leaders.

"You should always be growing and challenging yourself as a leader," said Weber.

Her belief has led her to broaden leadership opportunities for students. There will be learning series, workshops, and even a Leadership Lounge in the old TLT space in Ellis, where student leaders will be able to sit and hang out with coffee or tea, as well as read books and brochures pertinent to leadership.

The new OSA is also working to make Ellis more student-centered. Student-run offices now have rooms on the first and second floors, making them more accessible to students. New first-floor offices include the Juniatian and Alfarata, which are located along the entrance to Baker.

Weber and her team will eventually move to TLT with the Leadership Lounge.

Weber holds a bachelor's degree in psychology a concentration in Business Administration, from Franklin and Marshall. She also has a master's degree from the University of Delaware called "College Counseling and Student Affairs Practice in Higher Education."

The position of Director of Student Activities at Juniata was exactly what Weber was looking for in a job.

She heard about the opening from Brian McGrath, Resident Director of Cloister and swim coach, and applied with fingers crossed.

"It seemed like an excellent position," said Weber. "When I received the offer, I was very excited, to say the least. It was exactly what I wanted to be doing."

Outside of the Juniata sphere, Weber runs, goes to the gym, hikes, and explores modern art.

Hannah Rauterkus / Juniatian

New student activities director Staci Weber (right) talks to junior Kelie Cummins about upcoming events.

But her main focus is the Office of Student Activities and how it can aid JC students in whatever they want to do.

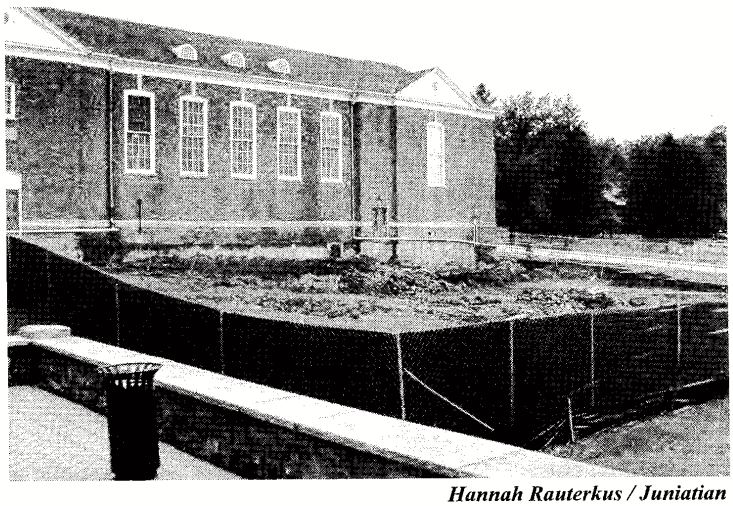
"I want students to know the OSA is open to new ideas from everyone," Weber said. "Not all the ideas are coming out of my head – if a student wants to make something happen, we'll do it."

Campus restructuring

Changes made to the college over the summer

Jeremy Simmons

Over the summer Juniata went through a few dramatic changes on campus.



The larger of these included the relocation of many offices. The Teaching Learning Technology Center (TLT), Sodexho offices and the Accounting, Business and Economics Department (ABE) all changed venues.

Other changes include the closing of Oller Hall for renovations and the addition of beds to the basement of Sherwood.

A big move was connected to campus technology. Provost James Lakso said, "We are trying to bring together the technical departments on campus."

The relocation of TLT from Ellis Hall to C-103 through C-107 of the newly renamed Brumbaugh Academic Center was an important step in that process.

The computer help desk also moved to the first floor of Brumbaugh. Combined with the former TLT, the area is now called The Solutions Center.

Hannah Rauterkus / Juniatian

Those who live in Cloister wake up every morning to the sights and sounds of the ongoing construction that has taken over Oller Hall.

The digital video portion of the TLT is being set up in A-101 and A-102 of the BAC and is presently being called the Digital Media Zone or DMZ.

Another big move was that of the Sodexho offices from the main floor to the basement of Ellis Hall. Hal McLaughlin, Sodexho manager, said, "We had outgrown our former residence, and they were dated."

McLaughlin also said that currently "we have no real problems to speak of. I see no moves for us in the near future."

ABE offices moved from Good Hall to the C wing of the Brumbaugh Academic Center. According to professor and department chair James Donaldson, the move went well. Besides many boxes to unpack and organize, all the major hurdles have been passed.

Newly renovated classrooms were also added on the second floor of the C wing of BAC.

Besides the moves, other campus upgrades are in the works or have been completed.

Oller Hall has been shut down for major renovations to be transformed into the Marlene and Barry Halbritter Performing Arts Center. Oller Hall will see limited use this year during construction.

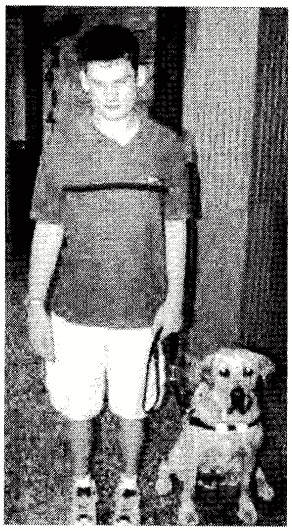
Lakso said, "The newly renovated arts center should open around this time next year [fall 2005]."

An unpgrade already finished is the renovation of Sherwood Hall. 17 beds have been added to the basement of Sherwood eliminating yet another lounge area to make room for incoming freshmen.

For the future, Lakso said that work is being done on the new field station. Beds are being moved into the Raystown station as plans come together for students to take a more permanent residence there.

While the Sill Incubator been completed the decision has yet to be made on exactly what will happen to the rest of the Alfarata building at 419 14th Street.

Extra challenges for new student



Maria Piazza

Everyone at Juniata knows just how hard it is to adjust to things as a new college student. The professors seem strange. The work is harder than high school. And getting lost during the first weeks is as common as the sun coming up.

Now imagine confronting all of that with your eyes shut. Think about getting to class on time, crossing Moore Street, and doing your homework all without sight. Chris Westbrook does that every day; he's blind. Yet he doesn't let his physical changes stop him.

Westbrook enrolled this fall with POE in Information Technology. "I live on the web. Don't mail me, e-mail me," Westbrook said when asked how committed he was to his POE.

Westbrook transferred from Pennsylvania College of Technology (PCT) in order to get more of a feeling of a college campus and its life.

Hannah Rauterkus / Juniatian

Chris Westbrook and his guide dog Atlas came early to see the comedian at Friday Night Live.

He likes Juniata already. He finds that the people are friendly, the professors are helpful – not patronizing – and the food is better than PCT's. Westbrook enjoys his classes, and said, "In relation to high school the only harder thing about my class work is reading."

Many students find reading textbooks difficult. But for Westbrook this presents a significant challenge. To overcome it, he has some amazing gadgets and technology. His Braille note machine is hooked up to a computer. As it goes through a line of the text – say on a web page or an e-mail – the machine pushes up Braille letters for Westbrook to feel in order to read. He also uses the Braille machine to take notes while in class.

Another gadget that he owns is a printer that scans his books into the computer so that he can read them.

Westbrook does need assistance negotiating campus. He usually gets help from Atlas, his Seeing Eye dog. Atlas goes everywhere that Chris feels confident about going. Atlas often sits quietly at Westbrook's left while in class or any other public place where he is working.

Although Atlas is a nice dog, it doesn't mean that others can play with him as you would a pet. Atlas is a working dog. Petting him or talking to him while Chris has him in his harness could be distracting and potentially harmful to the team.

Westbrook shares many of the same thoughts and aspirations as others who don't have his physical challenges. He likes sports (especially football), playing the violin, and country music. He wants to be involved in Campus Ministries and other service groups.

Westbrook doesn't mind if people approach him to talk about Atlas or about his blindness. He mentioned several times that "I'm always willing to talk about my differences."

So don't be timid about speaking to him. Just go up and say hello.

Fresh wisdom

A few nuggets of wisdom from sophmores to freshmen

Mary Gardiner

College is a crazy time. There are lots of new things to learn, like how to deal with professors and who to make friends with. You, the freshmen, get to learn all of these communal rules, and hopefully you'll learn them very quickly.

You'll learn how to maintain—or, more likely, lose—long distance relationships. You'll love or hate your CWS profs (don't worry, they probably love or hate you, too). And you'll figure out how to squeeze in half an hour between classes and lunch for naps on Monday morning after a long night of cramming. To help you adjust more quickly, here are a few pieces of advice from the class of 2007.

1. Keep an eye on your studies. Many students come to Juniata expecting to do nothing, just like they did in high school, and still pass. College is different.

"First semester, I didn't realize you had to study in school, and I got really bad grades," said John Vargo. "Beer and fun is important, but it's not the only thing that's important."

Lisa Detweiler said, "Yeah. Get in the habit of studying early. When I first came, I didn't [study] for the first month, and then it hit me. [And by that point] I couldn't get back into studying."

2. Follow your heart...especially if you're enrolled in chemistry or biology.

"A lot of kids that start out in O-Chem don't stick with it," said Clay Diehl, a sophomore who started out as a biology major but now is studying history.

It's all right if you find out that it's not your thing. It's quite common for freshmen to face the realization that what they started out with just doesn't work for them.

Don't stay in your major because your parents think you should be a dentist or because you like the salary of a lawyer.

"If you don't feel right with what you're doing, don't do it. Four years and $120,000 isn't worth it for something you don't want to do," said Kendra Dacey, who transferred here last January from Cedar Crest. "Plus, you'll be less stressed when you know that what you're studying is meant for you."

But if you do feel that the sciences are for you, don't let O-Chem intimidate. Get a tutor, form a study group – be proactive to get the grade.

3. Be bold! Try every different way of meeting people that you can think of.

Enjoy club activities. They're a great way to meet people who are interested in the same things you are. Or go out for a club activity you'd never try otherwise. Juniata offers some wonderful opportunities for extreme sports, for intercollegiate contests, and most anything else you can think of.

4. Enjoy yourself! "Go out, have fun," said Detweiler. "Ladies, don't get too primped up, and guys, don't try too hard."

5. "And most of all, don't knock on a suite door at East," said Clay Diehl. "Feel welcome, just walk in!

So, to our rookie Juniatians: good luck, relax, and have fun as you find yourself here at Juniata.

Spyware, viruses infecting student computers

Many students arrived on campus with unwanted stowaways: viruses, worms, and spyware on their computer systems. Or, once attached to the network, they have caught these malicious pieces of software from other students' infected computers.

The Technology Solutions Center in Brumbaugh C103 provides removal tools for damaging software. These are available at the help desk on CD and may be borrowed during regular business hours. Antivirus software is a free download available for students at services.juniata.edu/cts.

According to network policies, an active network connection is guaranteed. The help desk will assist with virus removal as it is able. However, it is each student's responsibility to protect and care for his or her own personal computer.

Death of the Poopfinger

continued from page 1

has figured out a way around the system. So far this semester, there were two incidents of poopfingers sent to all the students. According to David Fusco, Director of Computer & Network Services, the perpetrators did not just simply send the poopfinger to the Students distribution list. Instead they used the global address list and individually selected every single student address.

Reacting to the persistent pranksters, CNS has since limited the maximum number of recipients for any one e-mail to avoid future incidents.

What do the students think about administration's attempt to stop the pranks? Will this nine year tradition be missed by students?

Senior Carli Dale said, "I have noticed a lot less junk e-mail in my inbox." This is one definite plus from many students' perspectives.

However, senior Brad Lingle seems to think that the poopfinger restrictions hurt students in other ways.

He said, "When you take away the bad stuff [that goes along with the mass distribution lists] you are going to be taking away the good stuff as well."

With the distribution lists blocked, Lingle wonders how club and other legitimate e-mails are supposed to be sent out to the whole student community.

David Fusco, Director of Computer & Network Services (CNS) stated that there are four ways that any student or faculty member can inform the Juniata community of anything that they may need to know.

•The Arch is located at arch.juniata.edu. The Arch is an information source on everything from academics and activities to personal events on which any student can announce. The online directory search, Baker menu, pizza delivery numbers, Webcat library search, and even access to class schedules and grade reports are all available through the Arch.

•Juniata forums (forums.juniata.edu) are improved from last year thanks to Joel Pheasant, Director of Web Technology, and student assistants. The Juniata Forum is a place where students can make announcements, have discussions, talk to clubs, find students, and ask questions.

•Students and faculty can also send an announcement to announcements@juniata.edu. The messages are compiled and sent in one daily e-mail newsletter to the whole JC community.

•On services.juniata.edu/cts, anyone can submit an announcement to be placed on television channel 98.

"This is not necessarily the answer to the poopfinger problem, but it's what we are going to try," said Ray Chambers, CIO and VP of Campus Technology Services. "[CTS is] a service provider, with the student body of Juniata College being our primary responsibility."

Chambers is asking the Juniata community for feedback especially with the Juniata Forums.

So, is the elimination of student and faculty access to the mass distribution list really hindering communication in the Juniata community? According to Fusco, this doesn't seem to be the case.

Campaign viewpoints

Issue one: Energy sources and the environment

Welcome to Election Season 2004: Juniata College edition. At this point, even judging from the online discussion forums, it will be a semester filled with political opinions, facts, and the fine line where the two meet. The Juniatian will be in the midst of it, running articles on voter registration, campus political events, and student activism.

And until the election, on the opinion page two Juniatian writers will present the Bush and Kerry positions on a campaign topic important to college students or general Juniata philosophies like peace studies or science and technology.

The first issue in the series: energy sources and the environment. Juniata's environmental science program is growing. Shuster Hall was recently constructed as the first building of an environmental studies campus at Raystown. And, frankly, how many of us drive to Weis or to class from just a few blocks away? (East residents, this means you). Think about the national policies that could filter down to your studies (or peers' studies) or your daily life, depending on who inhabits the White House for the next four years.

But space in an article is limited. Don't let the debate end here. Post political discussions – more political discussions – on the online forums. Write letters to the editor. Attend lectures. Engage yourself with your privilege to cast a ballot.

Read. Think. Vote.

Nate Drenner
editor in chief

Kerry: Invent our way out

Jacob S. Warner

As voters, it can be hard at times to wade through the issues of a presidential race. We find ourselves attempting to make sense of them without falling in the political waters and getting soaked. One issue that we cannot ignore this year is America's energy consumption and production. As a nation, we have become increasingly dependent on foreign energy sources. Gas prices are on the rise, and sons are coming home in boxes from oil-rich nations.

We do not have the domestic oil to support ourselves, but Bush sure was willing to give it his best shot by drilling in the heart of the Alaskan Wildlife Refuge. Is this the President that we want to elect?

We need alternative energy sources, and we need them fast. Kerry has said that we can't drill ourselves out of this dependence on foreign energy, but instead, we must invent our way out.

The hydrogen fuel cell is one such invention, a clean, simple energy source that uses hydrogen and oxygen from the air to produce electricity. Only small amounts of water and heat are produced, much better than the thick black fog that comes from many cars and trucks on the roads today.

President Bush has committed $1.7 billion to develop hydrogen fuel cell technologies. The sad part is, the money is spread over five years. The 2005 budget also includes $7.2 billion over ten years in energy tax incentives for alternative and renewable fuels, energy conservation and efficiency, and emissions-free energy. And yet, Bush dug through the couch and came up with enough coins to give the military over $400 billion - in one year! It is time we stopped fighting for fuel.

Hydrogen is not the only alternative energy source available. The possibilities abound. Renewable fuels can come from corn, soybeans, agricultural residues and other biomass. The question is: which man will be willing to devote enough money and research into developing cleaner, more efficient, environmentally friendly fuels? At the time of his State of the Union address in January, President Bush had attempted to downgrade or weaken 200 public health and environmental laws. Is this really a man who cares about the natural world? Do you really think he is willing to make substantial policy changes to enable a cleaner future?

It can't be said how Kerry's budget will look if elected in November. But we can look at the current President's budget. We need a president who understands that it is imperative to make an energy shift, and that we need to do it quick. We need a president who cares about the environment and is willing to initiate strong changes. These transitions won't happen in the next five years and maybe not even in the next 10. We do have to be realistic. But if you vote George W. Bush in November, an energy shift may be farther away than we ever dreamed.

Bush: Realistic conservation

Mike Chirdon

Contrary to what many of his opponents may say, President Bush has made the energy policy a top priority in his administration. In his first term as president, he took many steps towards finding new and more efficient sources of energy, and the energy policy will continue to be a top priority for the Bush administration in his second term.

President Bush has already committed $1.7 billion to develop the hydrogen fuel cell. It produces little if any pollution and can be used as a power source in vehicles, homes, and businesses. Individual consumers and companies who buy products such as the hybrid gasoline-electric car and other fuel efficient vehicles are being rewarded with tax credit.

Legislation is now in the works that will require ethanol or biodiesel to be included in motor fuel by the year 2012.

The President recognizes the need to find renewable resources to serve as fuel sources, but he realizes that it will not be possible to make these changes overnight. That is why the President is committed to finding ways to use current fossil fuels in environmentally safe and efficient ways.

His plan focuses on the use of clean burning coal and other new technology as well as "old fashioned" methods such as conservation. Two billion dollars are being used to help develop new clean coal technology, and the initiative for the first zero-emissions coal based power plant, known as the FutureGen Initiative, is being led by President Bush.

The President also hopes to improve the efficiency and reliability of the electrical system by modernizing power grids and finding better technology for the storage and transmission of electricity. At the same time, the President is encouraging research into alternative power sources such as solar power, wind generated power, hydroelectricity, and even nuclear power.

George W. Bush's plan for the future of America's energy supply is realistic and comprehensive. We must find a way to use the sources of energy we have available to us now in the most efficient way possible, and at the same time search for energy sources that will be reliable for our future.

Presidential perspective

Q&A with President Kepple

"Why are classes held on Labor Day when most campus offices are closed?"

It is a tradition at Juniata to give the staff Labor Day off to celebrate their contributions to the College throughout the year. At the same time in order to finish the academic term before Christmas we need to have the day for classes.

"Given new large event spaces on campus (for example, the Sill Board Room and the upcoming Halbritter Center), would you support renovation of the Ellis Ballroom into a Student Union? (See the discussion 'Huntingdon Hangouts' at forums.juniata.edu for more information.)"

We do hope over time to free the Ballroom for more social opportunities as we gain spaces in other locations. The move of TLT to Brumbaugh has provided the space to move various offices into better locations within the building. This process will continue throughout the fall. Also there will be additional gathering space in the new Chaplain/Diversity and Inclusion house on Moore Street when it opens later this year.

Students and faculty can submit questions for the Ask President Kepple column by e-mailing juniatian@juniata.edu. Questions are selected by Juniatian editors and forwarded anonymously to President Kepple.

Cast a (blank) vote

Emily Eller

The rapid approach of the November 2 presidential election has brought voting to the forefront of the public mind. While political parties are rallying for you to vote for their candidate, remember that there are other reasons for you to vote.

Presidential elections gain much publicity. Kerry and Bush stickers already dot the town and the highways. And as students move back into the dorms, those too are becoming backdrops for political advocacy.

But most elections do not get this much attention and, even in presidential elections, many people don't vote.

If you ask a person why she or he does not vote, the answers vary only slightly. Most people will tell you some variety of "I don't know enough about it" or "I don't like either candidate."

In an ideal democracy, we would all be better informed. We would feel like our options at the polls provided the candidates and issues that speak to us. We would recognize an opportunity to make a difference. For many reasons this doesn't happen. But your vote means far more than just who or what you vote for.

No one can know exactly how you vote. We enjoy privacy at the polls or through absentee ballot. However, political parties and special interest groups take great pains to try to predict who votes for whom in order to determine what they can do to get more votes. (For example, in July the Washington Post reported that Latinos are much more likely to vote for Kerry than white non-Latinos.) Then parties and candidates cater to the interests of those demographic groups who actually go to the polls on election days.

If you feel like your interests are being ignored by major candidates, you are probably right. In 2000, only 37 percent of young people aged 18 to 25 voted, according to the Center for Information and Research on Civic Learning and Engagement. Candidates don't speak to you because if they think you won't vote, it doesn't matter to them what you think.

And thus I present the blank ballot theory. If 100% of people aged 18 to 25 voted, politics would look very different. Parties would run candidates with interest and appeal to students and, during their time in office, they would try to ensure your continued support for their re-election.

So, if come November 2, you still have not decided who you support, still go to the polls. Walk in, get your name checked off that you voted and don't vote for anyone. Drop your blank ballot in the box and walk away knowing that you made a difference in politics; you proved that you do vote, and that candidates should ask you what you care about... then maybe next time you will vote for them.

You must register 30 days before an election. To register to vote, go to www.rockthevote.org or contact the courthouse at (814) 641-3091. The campus clubs Voter Coalition or Students for Change can also help you register. These groups can also help you obtain absentee ballots or help out-of-state registered voters change their registration to Huntingdon, PA, which is a good idea since Pennsylvania is a swing state and, let's face it, you live here now.

Did something in the Juniatian pages pique your interest? Agree? Disagree? Think something was missed? Write a letter to the editor! We invite students, faculty, staff, administration and alumni to write on any issue of concern to the Juniata community. Free exchange and thought are important parts of a liberal arts education. Please note, though, that due to available space, we ask for letters to be limited to 300 words. Editors reserve the right to publish excerpts from letters to fit within space constraints. Please send your letter to juniatian@juniata.edu.

Views expressed in the opinion pages are not necessarily those of the Juniatian staff.

Get out and get downtown

What is there to do in little old Huntingdon?

Morgan W. Sample

It's normal for the new students here at Juniata to be baffled with what to do around Huntingdon, a tiny place where they will be stuck for the next chunk of their lives. The basic provisions are simple and spare, but still important for those unfamiliar with this small but quaint central Pennsylvania town. So to help in your adventures, here are some places to check out.

Everyone knows that pizza is how the average college student survives. There are four main places in Huntingdon where you can quell this basic need: Pizza Hut, OIP, All American Pizza and Subs, and of course, Dominoes. Pizza Hut is located on Rt. 22. All American and OIP are both on Washington St. Dominoes is on Moore St., just a couple of blocks down from Sheetz. Unfortunately, neither Pizza Hut nor the OIP on Washington St. offer delivery, but luckily, OIP has another location on Rt. 22, across from Sheetz, that does deliver.

Other great places to eat downtown include Billi's Brica-Brac and Boxer's on Penn St.

Billi's is a homey little coffee shop with a great atmosphere and delicious bagel sandwiches.

Boxer's is a small bar that serves excellent meals at a fair price, perfect for the underage crowd.

For those who have access to a car, a great place to check out is the Main St. Café, located outside of town. Wednesday night is their wing night and well worth the trip. To find Main St. take a ten-minute drive west on Rt. 22. Make a right at Valley Car Care. On this road, go over a bridge and come to a stop sign. Make a right and Main St. Café is the first building on the right.

Besides going out to eat, students like to get out and see a movie every once and while. The Huntingdon Clifton 5 Theatre is also located on Washington St., right across from the Medicine Shop. Tickets are 6 dollars, but on Tuesdays Juniata College students receive a price break. When showing a Juniata ID a ticket costs only four dollars.

For students who enjoy nature, there are also calm places nearby to get away and relax. One favorite area of interest for Juniata students is the cliffs. To get there, walk straight up Moore St. and make a left at Prospect St. At the end of the street, continue onto the a gravel path. From there, follow the trail to the cliffs.

This list should help you eat well and relax. Huntingdon may be little, but it has much to offer.

Kyle Cease performs at Friday Night Live

Show ends in a standing ovation from students

Hannah Rauterkus / Juniatian

Kyle Cease, FNL comedian, was kind enough to pose for this humble photographer a few minutes before the show. He performed on Sept. 10 to a packed cafeteria.

Morgan W. Sample

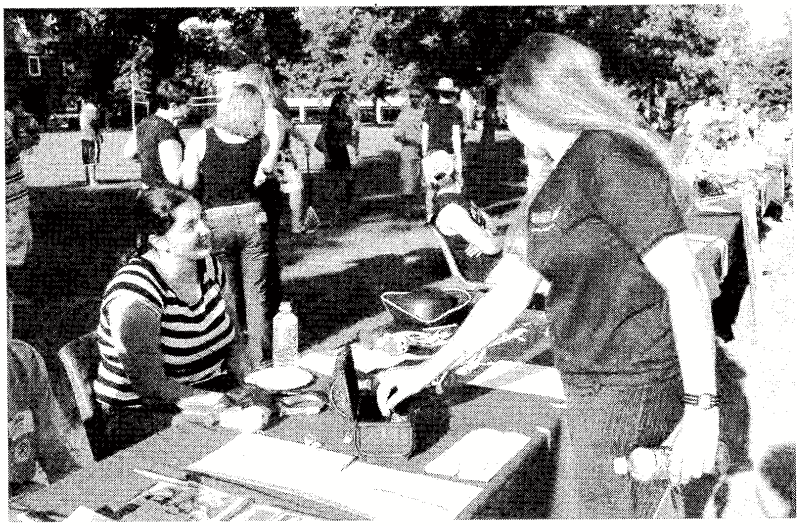
Juniata students recently enjoyed the comic styling of a great comedian and actor. Kyle Cease has appeared in Not Another Teen Movie, 10 Things I Hate About You, and some Comedy Central programs. He is currently on a 68-college tour and Juniata was one of his most recent stops.

Cease has been doing comedy since he was in second grade. His teacher would give him time at the end of the week to do stand up if he behaved throughout the week.

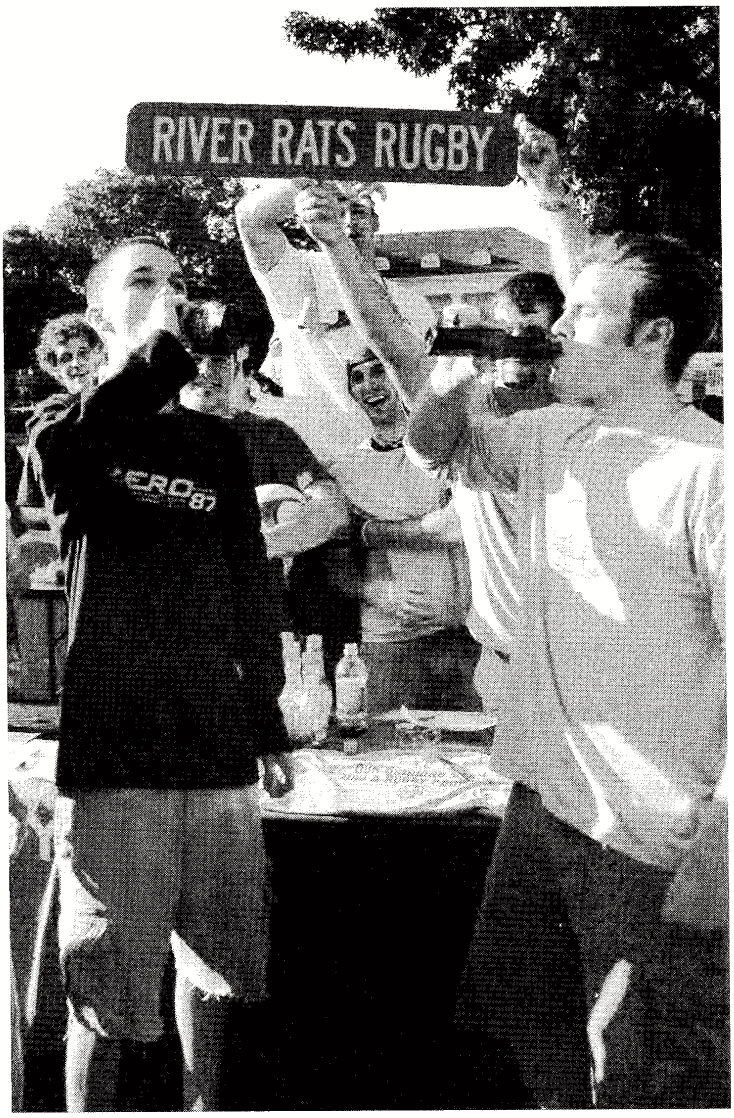
Now a paid performer, he is currently doing a documentary for Comedy Central. He said that this documentary is a two-part deal he has with the channel. It will also be a bonus DVD with his next CD.

The host for the television show Insomniac is leaving the program and Cease is up for the job.

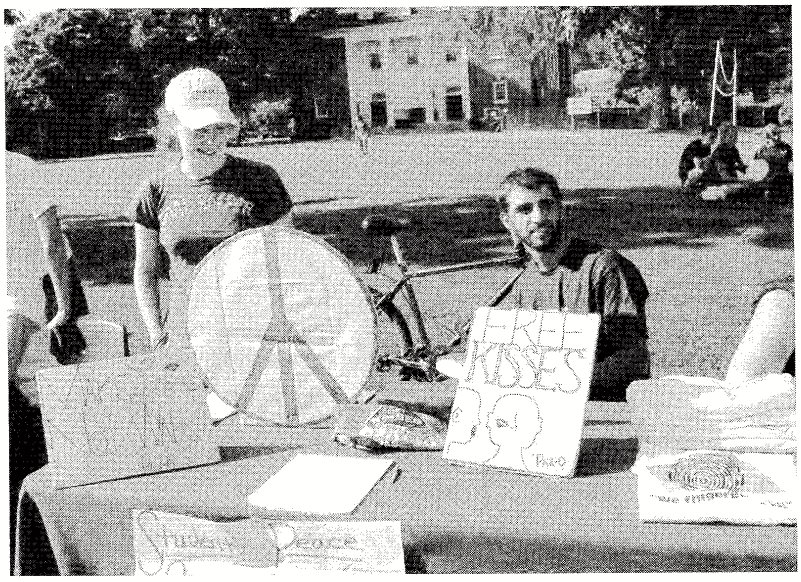
When asked how he felt about the town of Huntingdon, Cease said that it was small and he was given bad directions but that it was a great town. When asked about his Juniata audience he enthusiastically replied, "I really loved it!" He thought that the audience "really rocked."



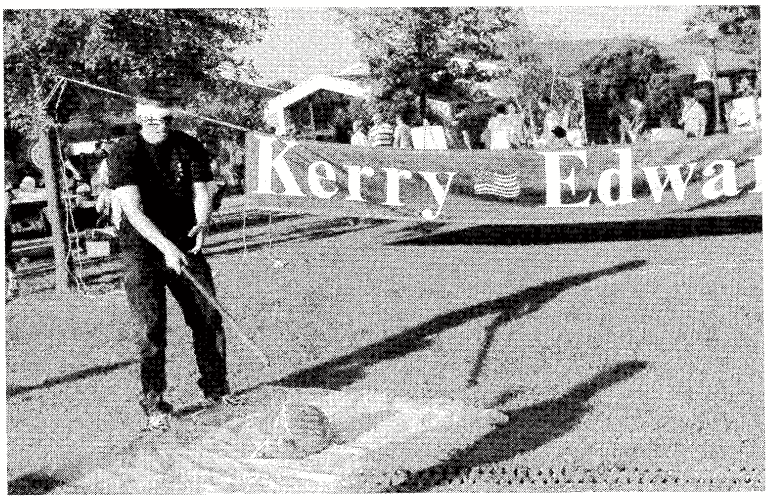
Those who attended the show will have noticed that Cease seemed to make mistakes, but turned them into something to laugh at. He also really got the audience involved. A word of advice: don't ever go to the bathroom at one of this man's shows.



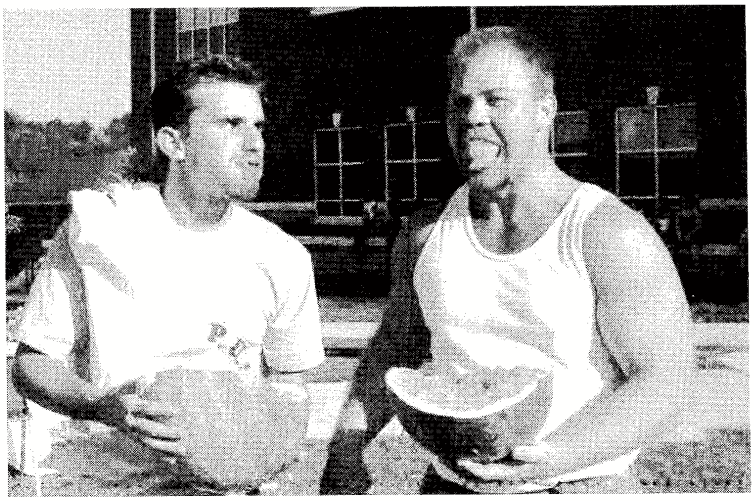
When asked how much of his show was spontaneous, he said that one of the tricks of comedy is to give the illusion of accidents. He has his whole show planned. The only thing that may change is the order in which he tells his jokes, which depends on the sequence of events at the show.



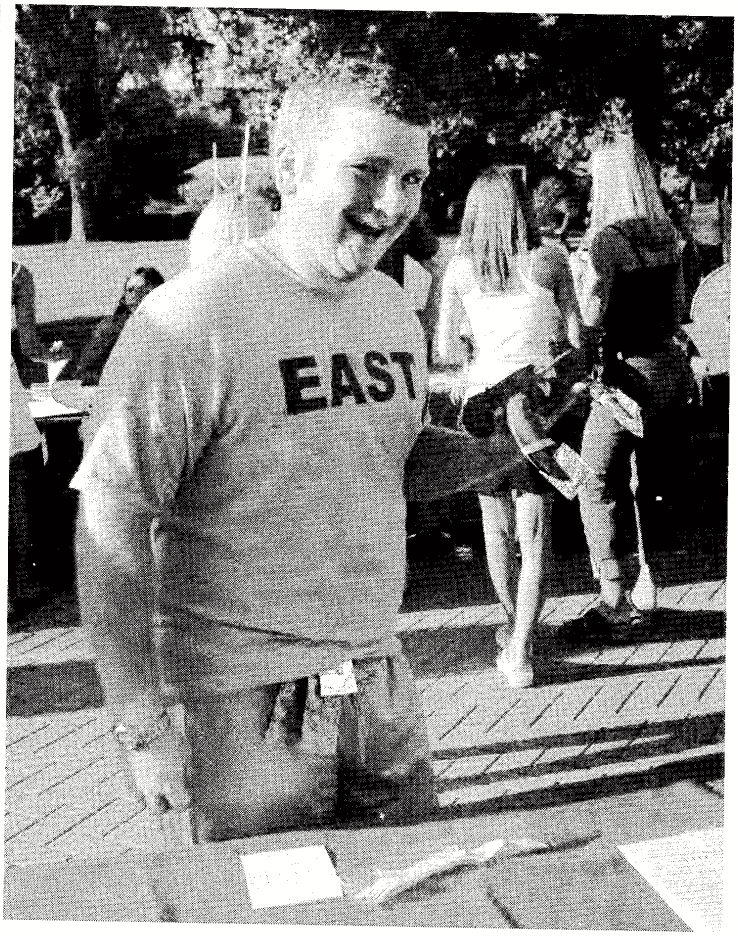
Cease's show was definitely a hit among the Juniata audience. Wesley Wertz, a visiting student, called it "Comedy with a twist, side-splitting laughter!" Cease's show definitely entertained. Watch for Kyle on Comedy Central soon, or visit him at www.kylecease.com.



Lobsterfest



A Juniatian story in photos by Hannah Rauterkus, photo editor



Lobsterfest, held on Saturday, September 4, played host to clubs interested in advertising what they have to offer the new freshmen class and returning students. Among the few hundred students to visit various tables, freshman Liz Cushman tried her luck at Circle K's treasure chest (page 8, top left), where you could win anything from a pirate keychain to a parrot squirt gun. Every organization had something to offer. Juniors Shannon Callahan and Joe Viscomi (page 8, middle left) offered free kisses at the PAX-O table—Hershey kisses, that is. Freshman Wes Schwartz was one of the many winners of the Japanese club's watermelon smashing contest (page 8, bottom left). Two winners who decided to feast on their prizes were Ben Hoopes and Jon Hoey (page 8, bottom right). The River Rats Rugby team attracted the largest crowd when bold classmates chugged syrup as fast as they could to win a t-shirt. Among the hopefuls were freshman Mike Motley and junior Steve Beck (page 8, top right). The excellent weather lured students out of their dorms. Many ate their meals on the lawn (above). Unconventional but hilarious junior Shane Fuhrman showed off his lobster's wares and made an impressive case for living off-campus in East, as well as for using condoms (right).

The final frontier

Jay Trovato

Sorry, fellow Star Trek fans, this time I'm not talking about outer space. Instead, this column is devoted to its equivalent right here on planet Earth. It's the Final Frontier, as least as far as your education at Juniata is concerned: Study Abroad! This is your chance to explore strange new worlds, to seek out new ways of life in new civilizations, and to boldly go where only a few brave Juniatians have gone before!

Your conclusions? Well, you get to fill in that blank. But don't be surprised if you find that the people you meet in other countries are not all that different from you...even though they might do everything from going to class to going to the bathroom in a different way.

First, let me assure you that studying abroad is a big decision. In my case, I didn't have much choice about going, since a very practical requirement for my Spanish Education POE is to spend a year in a Spanish-speaking country. My decision was made more difficult, however, by the many excellent Spanish-based programs Juniata has to offer.

As Jarmila Polte, Juniata's study abroad director, can tell you, I agonized over my options for months before finally choosing the program in Xalapa, Mexico – and I'm loving it!

If you didn't have a chance to check out the Study Abroad Fair last week, you can still find out about the Final Frontier. Seek out Jarmila in the Oller Center, located behind Enrollment, and talk to her individually about your international interests. Answering your questions is her job! Once you have information

Dancing to a different tune

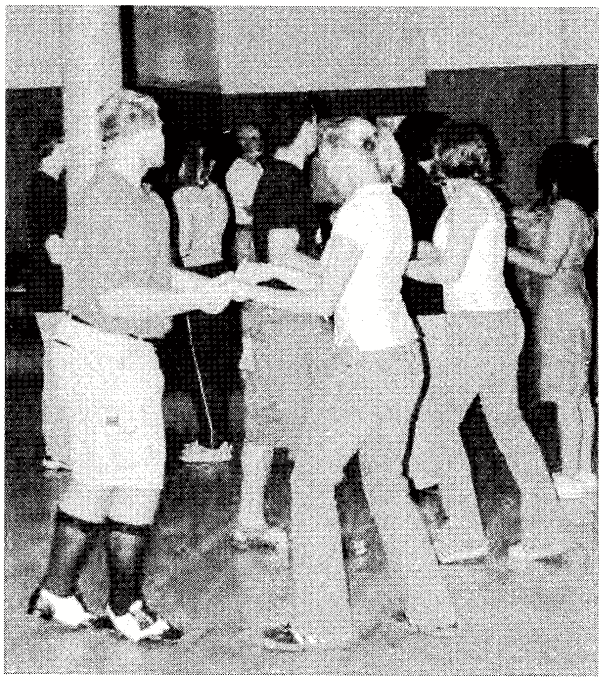
Students, faculty, and townsfolk come together to swing in Ellis Ballroom

Richard Pulliam

Huntingdon may not seem like the place for the ambitious to jump up and do windmills on top of cars. But then again, they haven't yet been informed that they can. What the town doesn't know is that Professor James Laughner is teaching swing dancing lessons this fall, and all are welcome to attend.

Students, faculty, and townsfolk alike can gather every Monday at 9:30pm in Ellis Ballroom to learn this very fun and energetic type of dancing.

Professor Laughner teaches two main types of swing dancing. The first and easiest is the East Coast style, also known as the jitterbug. Beginners can learn the basics to "East Coast" in one lesson. "Lindy," the other, more difficult type of dance, originated in Harlem in the 1920's and 30's, and takes much longer to learn.



The swing dancing sessions have already shown their popularity. In the first week of classes over 70 people crammed into the ballroom to take their turns around the dance floor.

"People over seventy and as young as twelve years old have taken swing dancing lessons at the Ballroom," said Professor Laughner.

About half of the students are complete amateurs, and the other half has had previous swing dancing lessons or experience. The swing dance group gives introductory lessons once a month for complete amateurs, to encourage those with no previous experience to come out and give swing a try.

Professor Laughner also said that it might be possible to bring a swing band to Juniata, to provide live music for the dancers. He also intends to dance with the Juniata Jazz Band, and go to Penn State once a month to dance to their Jazz Band.

All are encouraged to get in touch with their inner flapper and take a swing at this lively dancing style.

Hannah Rauterkus / Juniatian

The JC Swing Dance Club saw their largest turn out since their creation last year. Close to 70 students showed up to take instruction from Dr. Laughner.

Collegiate dementia

A slightly slanted view of world dominators-to-be

Carolyn Keller

Greetings, fellow Juniatians! I hope the summer found you well, because we're in for quite a fall!

I'm sure that, unless you hail from a different side of the solar system, you know there's an election coming up, and we here at the Juniatian are prepared to milk it for all its worth. We've been instructed, whether through dazzling wit or political ineptness, to somehow incite the masses. I'll just wink and let all of you decide which method I endorse.

It's hard though, this business of electing a new president, someone who overeager patriots like to dub the dict—I mean leader—of the free world. And this year the race is closer than ever: George Bush and John Kerry. Who knew?

Between such dilemmas as who's best at giving CPR to a drowning rodent versus who can say "compassionate conservative" with a straighter face –READYSETGOCHOOSE!— we're supposed to pick a *gasp* direction for our country. My God, anything but that!

At least they have their backup boys, right? Yes. They may seem like Tweedledee and Tweedledum (Can I say that about Dick Cheney? Really? Ok), but I assure you, they are not. Each time John Edwards adopts his carefully calculated Mad Hatter grin and sets his gravity-fighting thumbs in motion, Cheney glowers just a bit more. It's like a Mastercard commercial. Seeing one Vice Presidential Candidate give the other a stroke? Priceless.

But forget MasterCard. I'm here to talk to you about ELECTING someone, and I shake my fist at those who shriek that America is going to pot! This could be true, especially if referring to herbal recreation, but I don't know what they expect Bush or Kerry to do about it. They're still trying to get their stories straight from three decades ago, and remember which way the economy is going. Must be tough, all those numbers and things, the stock market and what-have-you. Presidents, what do they know? Up? Down? Are Edwards' thumbs a good indication? Bush seems to think so, yes.

I don't pretend to be an economist though; I just look for the punch line. I do enjoy John Kerry, and in the interest of fair-

The Bookmarkables

Nate Thompson

Welcome to another semester of the "Bookmarkables." In this column, I scour the back roads and shortcuts of the information superhighway in search of a webpage that might be worth a bookmark.

Surprisingly, this edition has driven me close to home. In fact, I am going to tell you about part of the college website.

Recently, I've found the Juniata Forums to be incredibly interesting. There are numerous fun little threads on these forums. For instance, check out the forum where college students and faculty alike express their annoyance at the "Juniata Leaf."

You see, when I was a freshman, we had the now-outdated style of the Juniata website. We didn't have the Arch. We had Stalkernet, the Baker menu (for what it was worth), and sometimes a few campus events.

If students needed to vent their opinions to everyone who didn't care, they sent a "Poopfinger." Of course, the mass e-mails have all but died out since this summer. This left the students in search of a new method of complaining.

The Ratings
forums.juniata.edu

Addiction	3.5, Rant forever.
Humor	3, Witty remarks.
Navigation	4.5, Quick & easy.
Pol. correctness	2, It's college.
Usefulness	3, Lots of good stuff.

Welcome to the Juniata Forums. You can complain, praise, or even offer comic relief about issues ranging from parking to the lack of places to go at night.

I have so far attempted to reserve my opinion on the overhauled college website. However, it is slowly winning me over, one feature at a time. As a website, it is well done, and it also seems to be well moderated.

The forums have definitely come into their own. Last year "take it to the forums" meant "shut up, we really don't care." This year, it means, "we still don't care, but somebody might respond."

The forums also offer many other features. The "lost and found" and "for sale" folders have found their way onto the main page. This means more people might actually find the folders this year.

If you are in a club, your meetings could be handled almost entirely online with your own private forum, although I would recommend actually meeting the club members occasionally.

When you have technology issues, you can post your problems here rather than trying to find the new TLT location. Major campus events are also posted. This is handy when you accidentally delete that announcements e-mail.

Lastly, the forums are very easy to navigate. Despite my personal preference for sidebars, I have no complaints with the navigational links at the top. It only takes a few clicks to find anything that has been posted. A search engine and links to recent posts ensure even faster navigation.

I would like to extend "kudos" to the Juniata technology staff that put this together. It is by far one of the best applicable website ideas I have viewed in a while.

If you have an idea for a future "Bookmarkables" column, feel free to email your idea to the Juniatian@juniata.edu.

Final frontier

continued from page 9

to work with, ask yourself: which programs capture my imagination...and which ones might fit my particular POE? Also, try to get in touch with Juniatians who have spent time abroad. They're always another good source of information!

For my part, in future columns I will tackle some of the thorny issues related to studying abroad, while trying to give you an idea of what I am experiencing here in Mexico.

I'll also try to help you to do something Mexican right in Huntingdon!: Next time you're in Baker, try mixing two parts apple juice (if the juice machine is working) and one part Sprite in your cup. That will give you a rough approximation of Manzana Lift, a popular soft drink here in Mexico. Mexico has the highest per capita consumption of soft drinks in the world!

For now, enjoy Mountain Day (whenever it might be), and until next time, ¡nos vidrios!

Women's Volleyball starts strong

Team wins latest game against Gettysburg 3-0

Brit Tew

Coach Larry Bock's women's volleyball team pushed through the early season with a 7-1 mark. The Eagles scored wins against Edinboro, Wesleyan, Shippensburg and Walsh on the road. In its first home tournament JC defeated Gettysburg, Waynesburg and Frostburg.

In its game against Gettysburg, JC won 3-0. Throughout the three games, the two teams stayed neck and neck, with Juniata finally breaking away in the end. According to Coach Bock, this game was a good chance to give the freshman players some game experience.

Earlier that day, the Eagles earned a victory against Waynesburg without dropping a game.

The difference in that match-up according to Bock was his team's ability to win long rallies.

In what he called, "a good response to the Wittenberg loss" Bock cited several players as standouts during the game, including freshmen Tara McMinn and Kelly Popernik.

In a match-up on Sept. 3 Juniata and Wittenberg played possibly the best game of the early season and perhaps a preview of a post-season showdown.

Finding themselves in an unfamiliar position, the Eagles lost the first two matches. The women quickly answered with two wins to force a fifth game. Wittenberg prevailed in the fifth, putting together a scoring run that the young JC team could not overcome.

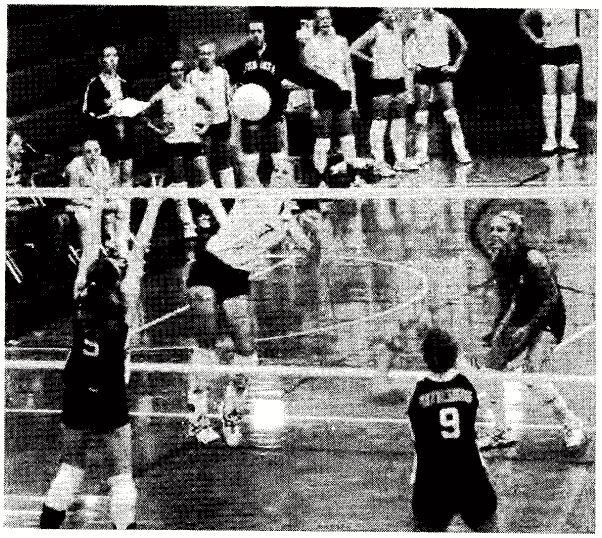
The loss was JC's first of the year. It was also the first home loss for the Eagles in two years.

"We did not pass well," said senior Erin Wisor.

Errant passes made JC fans wish for another year of Johanna Holtan in the back row. The team will have to step up to fill the hole left by their standout defender.

"Everything is so contingent on the first contact. Holtan was obviously a key component with first contacts," Bock said.

He added," We are going through a transitional period, we will get there."



The team's associate coach, Heather Pavlik, said the team is trying to find the right fit.

Both coaches noted that the team needs to step up its defensive game and block more balls. Bock also stated that the team needs to work on ball control.

"If we can control passing and digging, we could be very good," he said.

Bock cites senior Carli Dale as a big part of on and off court leadership. Other players, including Lindsey Habel, Wisor and Leonard were also noted for showing leadership on the court.

Bock is cautious but confident. He said, "If we can control passing and digging, we could be very good. On paper they are a truly great team. They could win everything. They have the ability."

Hannah Rauterkus / Juniatian

Junior Katie Laucks (7) hits past the block to score. The Eagles won 3-0 putting another win on Coach Larry Bock's tally.

Look for coverage of Coach Bock's historic 1000th win in the next issue of the Juniatian.

Field Hockey looks toward MAC Championship

Sarah Svigals

One advantage that Juniata has over the rest of the field hockey teams in the Commonwealth Conference is excitement. Coming off a huge season, making it to the conference championship and surpassing program records in wins, Juniata is a team to beat this season.

Ranked third in preseason polls, the Eagles look forward to a strong season. Graduating only five seniors and bringing in 10 freshmen have stacked Juniata's roster.

"This year's team is definitely feeding off the energy of last year's team," said Caroline Gillich, the team's coach since 1998. "They've been there and they want to be the ones to lead a team to that level."

The seniors have proved during the preseason to be the leaders of the team.

"Grace McClusky and Billie Rickenbaugh have been at the top of our scoring for the last couple of years and they'll probably do it again," said Gillich. "They'll be taking a lot of shots and assisting each other and assisting other players. They will really set up a lot of our attacks but so will Janine Hartmen and Betsy Kucsiak. They are two back who are very attacking."

Hannah Rauterkus / Juniatian

Senior Billie Rickenbaugh (20) provided 2 of the goals that sent Juniata to a 3-1 win over Philadelphia Biblical.

An important player to the team is four-year starter Melissa Sappe.

"She saved our butts [September 1] in our home opener," Gillich said. "They got a couple of shots on us in transition and she saved us. So she'll just keep doing her job and as long as everyone does what they can we're going to look good."

However, it is not just the seniors leading the team. The freshmen are bringing a lot as well. Three freshmen started in the Eagles' first game.

"[The freshman] are very fast. They made our seniors keep up with them during preseason,.They really helped push this team to a higher level with their speed alone and skill on top of that," Gillich said.

Every game is essential for the Eagles, but conference games are especially significant.

"Conference games are just huge for us," Gillich said. "The way they have it set up, you have to get into your tournament to have a chance almost of getting into NCAA. The winner gets to go automatically. So everybody is just gunning for that. Everyone just wants a chance to win a conference championship."

Sophomore forward Sierra Dickman says that the team's openness to communication is one of the biggest strengths to this year's team but the road to a championship will not be easy.

"We have a very strong team right now, especially with all of the new freshmen," Dickman said. "I think that we will have our challenging games, but hopefully we will make it to the MAC championship game again."

Eagles still looking for right fit

Tommy McConnell

Entering the 2004 season, the Juniata faces some major changes. The loss of eight seniors and, most notably, its head coach, have Juniata in a unique situation.

The team is built around an experienced group of upperclassmen, but a shift in coaching philosophies will still take time to completely develop.

When long-time head coach Kevin Burke resigned, assistant coach Darrell Alt was named interim head coach for the 2004 campaign.

"I am very fortunate to be the head coach," Alt said. "It was not the way that I envisioned becoming a head coach, but when opportunity comes, you have to take advantage of it."

Alt plans to build on the foundation laid in previous seasons, but his stamp will clearly be on this team.

"My stance when [I was named head coach] was that we want to be respectful of the past but mindful of the future," Alt said.

Alt, who coached special teams before his promotion, plans to continue those responsibilities. The rest of the coaching staff remains virtually intact, so the transition between regimes should be eased by the familiarity.

On the field, Alt wants a selfless team that will come to play every day.

"I'd like for us to be known as a group of players that are thinking about their teammates before they think about themselves," Alt said. "I'd like to be known for a physical brand of football – clean – we don't want to be a team that takes cheap shots. We want teams to know that they've had a very tough game after they played us."

To instill that attitude, Alt will rely on his "biggest asset" – the four senior captains. Matt Garner, PJ Brown, Paul Evans and Greg Troutman will be looked to all season to provide leadership.

"[They] are invested in their senior year and they are invested in the tradition of Juniata football," Alt said.

Obviously, the goal every season is to win each game. But, in his first season, Alt has goals for the team beyond wins and losses.

"I hope [the players] look back on it ultimately as a positive experience," Alt said. "That's pretty big in athletics today and that's pretty big at this college is developing a positive experience. I wish that more than anything."

That positive experience is still within reach, but the first two weeks have made that goal more difficult than planned. Juniata opened the season with a 49-6 loss at Dickinson, then dropped its home-opener against conference opponent Moravian, 34-0.

Hannah Rauterkus / Juniatian

Senior D.J. Dunmire (5) pushed a Moravian receiver out of bounds on the third down. Juniata's defense got a lot of field time that day.

"The last two weeks have been rough," Garner said. "We're still trying to get a feel for how things are going to go."

In the opener, the Juniata defense played about as well as a defense can and still give up 49 points. Most of Dickinson's scores were a result of excellent field position or Juniata turnovers. Juniata held their opponents to a respectable 313 total

continued back page

Runners have high expectations

Corinne Barabas

As another preseason bites the dust, the cross country team finds itself battling extreme heat, intense speed drills, long mileage and grueling hill repeats in an effort to prepare for a challenging, yet successful season.

Demonstrating their potential, talent, and enthusiasm to thrive, both teams are off to an excellent start: a start that will have them training hard at practices, racing fast at meets, and getting ready for the MAC Championship in November.

Many runners return for the Lady Eagles this year. Some top performers to keep an eye on are juniors Katey Glunt and Nancy Hayes.

"Everyone is looking really strong. Many of our key runners are returning, and we seem to be working great together as a team. Simply getting along is also an important part to a good season," said sophomore Lia Bella.

On September 11, the cross country team ran in the Spiked Shoe Invitational at State College. Both the men and the women had an exceptional showing, and continue to demonstrate improvement as the season progresses. Chris Sheaffer finished first on the men's team, and Katey Glunt took first for the women.

Running a total of two and a half miles in their first tri-meet on September 3, the women gave their Division 1 opponent, St. Francis a scare it did not anticipate. Finishing a close second out of the three teams, Juniata is off to a positive start.

In a tight sprint to the finish, Katey Glunt narrowly missed out on taking first place, finishing with a time of 16:25. Trailing not far behind her was Nancy Hayes. The next three women to complete the race, sophomores Elena Amato and Lauren Gates, and junior Sarah Bay, ran in a tight group, giving JC a strong overall showing.

"Most of our women looked fresh at two miles, they raced hard," said Coach Jon Cutright. "The purpose of this meet was to see where we stand; now we know what we need to do."

With some more training they will be well on their way to a winning season.

Bringing back many of the runners from last year, the men's team displays a lot of potential for an exceptional season. The top four runners, Justin Fritzius, Mike Vella, Chris Sheaffer and Shawn Rumery will keep the team on their toes in preparation

Women's soccer driven by seniors

Team ready to challenge Commonwealth Conference top teams

Dave Shalkey

Head coach Scott McKenzie, who holds a 15-34-4 career record entering his fourth season, believes that senior leadership is what is going to drive the Juniata women's soccer team to the postseason. He is excited about the upcoming season and about both teams' chances to make it into the playoffs.

Coach McKenzie thinks that the women have an excellent chance this year to be a top team in the Commonwealth Conference. The women's conference is poised for a change up in the top teams.

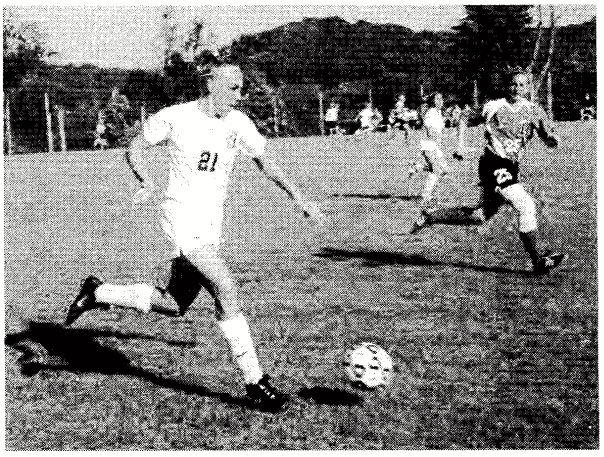
"The top teams are showing that they are human," McKenzie said.

McKenzie believes that the women have a solid team, led by seniors Lindsey Treon, Emily Endres, Sarah Lester, Emily Miller, and Rebecca Shoaf. Junior Nikki McLellan returns as the teams leading goal and assist scorer from last season.

September 1 was the team's home opener against Mansfield University. Mansfield out played the Eagles in the first half, outscoring Juniata three goals to none, holding Juniata to one shot on goal.

JC came out with more intensity in the second half but could not put any scoring plays together.

Mansfield scored one more goal to make the final 4-0.



Coach McKenzie is still optimistic. "We made a lot of mistakes, but they are mistakes that can be fixed." So he thinks this loss was a good learning experience.

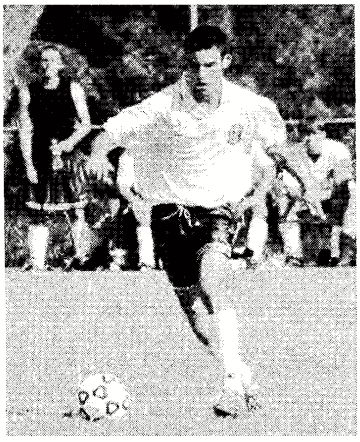
The women played Buffalo St. to a 1-1 tie at their first match of the LaRoche Tournament. They could not ride that momentum to a win against LaRoche. Juniata went down 3-0, bringing its record to 0-2-1.

Marietta dealt the women their third loss, 4-0, at the Penn State-Altoona Tournament on September 11.

"I think we can turn it around once conference play comes around" said Nikki McLellan.

Juniata's first conference game is September 18 at home against Widener.

Hannah Rauterkus / Juniatian



Senior Rebecca Shoaf (21) was one of the team's leaders against Mansfield State. She was often assisted by senior Sarah Lester (background).

Injuries plague Men's Soccer defense

Dave Shalkey

The Juniata men's soccer team came into camp "not in good conditioning" said Coach McKenzie. Injuries plagued the defense. William Spigler may be out for the rest of the season with a leg injury. Robert Bowser is expected back for the Penn-State Altoona tournament on the 11th. Will Marshall is out with a hamstring injury. Three year starter Mike Alianiello has yet to play in the first three games.

"The team should be solid when we get the rest of our defense back" said Mike Gwiazdowski.

Hannah Rauterkus / Juniatian

Juniata struggled last year with a 2-14-1 record. The men only have three seniors this year in Chris Kearney, William Spigler, and Mike Alianiello.

Ken Wiles is an up and coming freshman to watch. Coach McKenzie has high hopes for his midfielder.

Juniata played its first home game against 15th ranked Carnegie Mellon. Juniata was sluggish in the first half allowing CMU to take a commanding 3-0 lead. Starting goalie Nathan Pugh was replaced in the second half by Mark Guthridge. Guthridge held Carnegie Mellon to one goal in the second half. Juniata did not have a shot on goal until halfway through the second half. The game ended in a 4-0 loss.

The men's game was eerily similar to the women's loss. Coach McKenzie thinks that this game was a good learning experience as well, and that many mistakes were made but they are all fixable.

The men went to the LaRoche Tournament on the weekend of September 4. In the game against Bethany Juniata played to a 2-2 tie in regulation. Bethany tallied a goal in overtime to take the win.

The Sunday game ended in a 3-0 loss to LaRoche.

Juniata soccer went to Penn State-Altoona the next weekend looking to end a three game losing streak.

They played Marietta even for most of the game, but ended losing up 1-0.

Come support Juniata soccer on September 18 as they try to defeat Widener and begin to turn the season around.

Tennis looks for third time charm

Stephanie Shaver

The Juniata College women's tennis team has endured three head coaching changes within the past four seasons.

Anne Houck coached the Lady Eagles through their last winning season in 2000. Houck left Juniata in 2002 and was replaced by Gala Baker. Baker led the team for two consecutive seasons and was recently replaced by new head coach Bobby Pennington. Pennington has relocated from Clarion University where he was the assistant coach of the women's tennis team.

Considering the team's shaky coaching background, many are wondering if Pennington has what it takes to make the grade. Pennington suggests he has no apprehensions coming into this season.

"I think I have more experience and knowledge than previous coaches," Pennington said.

As for the surviving team members, they agree that Pennington has what it takes to turn the tennis program around.

Ranked number two in singles and number one in doubles, Molly Coursey said, "It hasn't been hard adjusting because our last coach didn't have as much knowledge of the game."

Coursey added that Pennington's tips have raised the level of her game. "There's a more serious tone towards the team, which has definitely benefited us."

Lindsay DiPaola also survived two head coaching changes. Maintaining her seat at number one singles and doubles this season, DiPaola agreed with Coursey. "It has been an adjustment for the better."

The improvement has more than likely derived from Pennington's implementation of specified stroke drills, as well as a mixture of match play.

It sounds like this season has potential. However, the Lady Eagles fell to Mid-Atlantic Conference foe Lebanon Valley in its first match on September 3.

"We have a very young team and with that comes a lack of experience, and I think nerves got in the way. We just didn't play the way that we can, and there's really no excuse for that," Coursey said.

DiPaola agreed, suggesting that "a big part of it is the experience. I think we were prepared, but I think people are still a little tentative."

Coach Pennington's long term goals include the formation of a more solid program, which "requires getting better recruits."

According to Coursey, Pennington is on the right track. "He seems really committed and really excited about building a better program. He is really knowledgeable of the game and is a good instructor."

Athlete off the field: Rebecca Shoaf

Katie Laucks

We often take notice of an athlete's hard work and performance in the game, but what is rarely noticed is an athlete's dedication outside the sports world.

In honor of every athlete here at Juniata College, the Juniatian would like to recognize what these individuals do when the uniform is off. This week the spotlight is turned on senior soccer player Rebecca Shoaf.

Shoaf is not only a stellar soccer player for Juniata but a busy, successful student as well.

After school Rebecca hopes to use her degree in Youth Studies and Spanish to work with troubled teens and homeless families. She had a glimpse of what she could do in the world when she decided to study abroad in Mexico las semester.

While in Mexico Rebecca, kept herself very busy. While taking the required classes she also had an internship in a Mexican orphanage.

When Rebecca reflected on the experience she ecstatically said, "It was a great experience. It is something that you don't see everyday. It is a third world country, so I couldn't have imagined what I saw if I didn't have the opportunity to go."

Back on campus Shoaf is just as busy. This semester she is a CWS lab assistant. Her help, as well as that of the other CWS Lab Assistants, greatly benefits the freshmen on campus and make their first semester of college more comfortable.

Hannah Rauterkus / Juniatian

Rebecca is also a member of AWOL, which stands for All Ways of Loving. She held the position of Co- President in the past, but turned it over when she had the opportunity to go abroad.

In AWOL Shoaf is active with the different fundraisers the club does. In the past they have raised enough money to bring the widely known AIDS quilt to campus. It raised awareness of Juniata students as well as the Huntingdon community about the devastating realities of the disease.

This hard work that spills over into the classroom and extra curricular activities doesn't surprise her soccer coach at all. Coach McKenzie describes "Becca" as, "having one gear, she wakes up at 110% and that's what you will get out of her on the soccer field, in the classroom and at everything she does."

With all this going on it is surprising that she even has time to fit in another sport into her schedule. But Rebecca is a member of the Juniata track team as well. In track she competes in the 100m hurdles, the 400m hurdles, 4x400m relay and the 4x100m relay.

As the 2004 soccer season begins Rebecca has a positive outlook on this year's team.

continued back page

Runners

continued from page 13

for a successful year.

On September 3, running three miles around a golf course, the men's team was able to hold its own at St. Francis. Leading the Eagles, junior Justin Fritzius finished in ninth with a time of 17:55, followed closely by junior Michael Vella.

Chris Sheaffer and freshman Shawn Rumery also placed well, claiming eleventh and twelfth places. Like the women, the Juniata men also captured second place at the Invitational.

"Our team is looking a lot better than we have in the past," said Fritzius. "In addition to picking up a handful of freshmen to contribute, the top runners have also improved immensely from last season."

Experience is important to team success, but Coach Cutright explains that "motivated experience" is crucial.

"We will get a better feel of who we are, and what we are capable of doing," Cutright said.

The spikes will get them up the hills. The Gatorade will give them energy for the sprint to the finish line. The clock will be their friend or foe, but what it all comes down to in the end is the competitive attitudes and determination to succeed which will compel this Juniata team to do great things.

THE RANDOM ELEVEN

The return of randomness

Matt Russell

Kung Fu Exterminator: I was at my computer for about an hour one night last week. When I turned around, a silver-dollar-size spider had manifested a four-square-foot web in the center of my room, anchored floor to ceiling. I soon determined the best method to both efficiently dislodge it from the web and end its existence. I dubbed it "Flying Phone Book, Swinging Nightstick."

Phones, Part 1: Have you realized your phone mail system password needs to be six digits, while your bank PIN usually only needs to be four? I'm glad my messages are so safe.

A divided eatery: The vegan line was a decent idea, but now I hear people are calling for a low-carb line? We already have that: it's called the salad bar. We'll soon have higher diversity in the food lines than the student body.

JCPD: Watcha gonna do?

Stereotypical fun: A Mexican, a Catholic priest, a Jewish rabbi, and a Polish man walk into a bar. The bartender looks up and says, "Is this a joke?"

Phones, Part 2: Needing to listen to an entire message in voicemail before deleting it is a great annoyance. This most especially applies to the jerk(s) who repeatedly leave messages in Puerto Rican on my cell phone. You'd think that my English-language greeting might be a clue that they have the wrong number.

Auto-erotic asphyxiation: Can you believe that warning students about this is an official part of the Extended Orientation curriculum? You mean suffocation is dangerous? Next they'll be saying that bleeding myself to feel light-headed is bad too.

Was it really a Boeing? Check out "The Pentagon attack" thread on the Juniata forums for yet another fun conspiracy theory.

Phones, Part 3: At dinner, there was a table of freshman girls. Four out of six of them were talking on their cell phone at once. Then, I saw another freshman manage to collect her tray, food, drink, and dessert without interrupting her cell phone conversation. If I need to tell you what's wrong with this picture, you need a beating with the social-ineptitude stick.

Substantial specifics: The contract for the Wellness Floors specifies that residents cannot posses or use illegal substances... as opposed to the rest of the campus where they can?

Wet basement: A little excessive rain and the next thing you know we've got people living in the gym. This is just a little shoutout to the Sherwood refugees. I hope everything dried out ok.

Collegiate Dementia

continued from page 10

ness, I admit that I find George Bush has his moments. Lack of Bushisms after November would be a blow to political satirists everywhere. Then again, if Kerry wins, no doubt cartoonists worldwide will rejoice.

And believe it or not, there actually are real issues to be discussed, such as whether or not Dick Cheney has a soul, and where it went, and other things too, like war and education and health care. They're worth investigation, just to be able to join the ranks of those who like looking at the other side of the political spectrum and jumping and pointing, all the while screaming "Lunatic! Lunatic!"

If any of you are from a different side of the solar system, please, let me know. I might put in for a transfer.

But I salute the fall, and the insanity it will gleefully yield. Welcome back!

Athlete off field

continued from page 15

"Even though the numbers are low this year, the caliber of players we have makes up for that. We have a lot of good freshmen who came in as well as returning players. We should be pretty good this year as we continue to come together."

As Rebecca continues to give 110% on the soccer field, she is giving just the same off it to pursue her goals and make her POE matter.

If you have a chance this season, make the trip up to the soccer field and catch Rebecca Shoaf and the Juniata women's soccer team in action this fall.

Eagles still looking

continued from page 13

yards, only 113 on the ground. Steve Parsons led the defense with eight tackles and also forced a fumble.

On the offensive side of the ball, backup quarterback Jeffrey Hayes came in when starter Greg Troutman went down with an injury. Hayes played solidly in his first action, going nine-for-24 and hitting John Boyer for Juniata's lone score.

The Moravian game was much of the same for Juniata. Turnovers and field position gave Moravian easier scoring opportunities than the home team. Peter Thomas and Garner led the defense with 14 and 13 tackles, respectively.

John Boyer and Jason Koch led the offense, with 58 and 45 receiving yards, respectively; both making tremendous catches.

The team is still trying to find the right mix on both sides of the ball.

"We've been aggressive," Garner said. "We have been playing a lot of people, which is going to help down the road."

Juniata will travel to Delaware Valley next Saturday in search of its first win of the season.

Storming of the Arch

continued from page 1

clothes on and greasing yourself up. But they [rugby] are determined." However, Clarkson did say, "I might feel differently if I went to Juniata."

Is this response to tradition acceptable? Is tradition still tradition if you pause it or change it?

These questions might be answered better with knowledge of how Storming was born and how it has survived past decades. Both Bub Parker, Assistant of Alumni Relations and Chad Herzog, Director of Alumni Relations retold the legendary beginnings and shed some light on the issue.

Storming of the Arch began in the 1940s when one brave freshman decided to pass through the forbidden ground of the Cloister Arch. During this time, this passage was a right reserved only for upperclassmen. The fearless freshman never made it through the heavily guarded archway, nor has any freshman stormer to this day.

As the years progressed the tradition "fizzled out in the 1950s," explained Parker. Then it came back full force in the '60s but with dangerous and sometimes disgusting incidents.

The tradition was even banned in the early '90s. Herzog said, "There were no rules. It was dangerous."

The excessively violent conditions such as hurling fruits, vegetables, and even urine at the stormers ultimately gave way to the tradition's termination.

Then in 1995, two officers of the men's rugby club, Steven M.Van Mater and Michael Streicker were determined not to let this tradition die. They, also, presented proposals to the administration complete with safety rules and made the event a charitable one by donating all profits to Huntingdon Habitat for Humanity.

In the end we see that Storming of the Arch has undoubtedly evolved throughout the years, just like many of our other time honored traditions. With that in mind, is tradition a tradition if it changes or "fizzles out" for a bit? Is it the sport or the spirit of the event that really needs the saving? You decide.

Tennis team

continued from page 14

DiPaolo agrees, stating that, "He is definitely a positive influence. He likes to win, so I think he is going to make sure we have practices that are beneficial to us. By giving us constructive criticism, he tells us what we're doing wrong and works with us to improve it."

Pennington says he is guaranteeing nothing this season because rebuilding and a tough schedule are involved.

On Sept. 11, the ladies challenged Moravian for their first home match at Juniata. The strokes were there, and the Eagles played hard, but Moravian seemed to hit the right shots. Juniata fell 9-0.

"I don't like losing", said Pennington, "but at the same time I'm going to be patient. Anything is possible."

Coach Pennington had no comment following the September 11 match.

JUNIATIAN

HUNTINGDON, PENNSYLVANIA

SEPTEMBER 30, 2004 | JUNIATA COLLEGE | VOLUME 86, ISSUE 2

Intolerable behavior

Hannah Rauterkus / Juniatian

The Juniata Police Department (formerly Safety & Security) coordinates with Borough Police when infractions occur in town.

Freshman arrest, verbal assault greet Juniata's new police force

Stephanie Shaver

The Juniata College student body was recently informed of several behaviors termed "intolerable" by Dean Clarkson, which occurred within the Huntingdon Community. The acts were reported by members of the surrounding community. Both the Huntingdon Borough and Juniata College Campus Police Departments were involved.

When asked to comment on what he phrased "an embarrassment...and shameful behaviors," Clarkson went into great detail. One incident occurred in the parking lot of Weis Markets on 15th Street.

According to Dean Clarkson, a woman claimed she was "verbally assaulted." When the lady called to file the report, "she was very kind and said that she really likes Juniata," according to Clarkson. She also reported that "they were definitely Juniata College students driving a brown sport utility vehicle with Ohio plates."

Concerned because you drive an SUV with Ohio plates? Don't fret. Juniata College Police Department's database returned no matches to the alleged license plate number.

Yes, that's right; they are no longer the Security Department. The JCPD can cuff and stuff you now.

Rocco Panosetti, director of the Juniata Police Department,

Voting away from home

Morgan Sample

You might be asking yourself, "Where do I go to vote now that I'm away from home?" If you're not, you should be. Though the 2004 presidential election is still a month away, absentee ballots must be requested by October 4. Huntingdon residents must also be sure that they are registered to vote.

For those students away from home, there are a few extra steps you need to take to vote. If you wish to register in your hometown you can visit your local courthouse there. Or go to www.justvote.org. There you can register, request your absentee ballot form, or locate a place to vote.

After registering in your district it is necessary to obtain an absentee ballot. To get a ballot form online go to http://clubs.juniata.edu/juniatian for the links to government web pages. This form needs to be filled out and mailed to the address on the request form.

Student Gov. looks to increase school pride, club cooperation

Sarah Wharton

Changes on campus are happening everywhere this semester.

Just ask the fresh, new group of Student Government Executive Board members, and you will understand exactly what this means.

This year's high-energy board includes President Carl Kihm, VP Kelie Cummins, Secretary Daysha Burkhart, Treasurer Mike Best and Officer of Technology Kristofer Youtz. The five will be working with the other members of Student Government and its new advisor, Staci Weber (also the new Director of Student Activities), to reorganize traditional activities and implement new ones.

Within Student Government there is one big change from previous years: not all its executive members are seniors. The diversity of classes will give a new dynamic to its activities, which its members think is a great idea.

"People aren't forced to have new members every year," said Burkhart, a sophomore.

Cummins, a junior, agreed. "It keeps a handle on things and allows us to bring in individual class issues and information," she said.

One of the first things on the Student Government agenda is a non-alcoholic tailgating event planned for Homecoming Weekend. Everyone – including current students, alumni, faculty, family and friends of the College – is invited to hang out be-

Ordinary people, extraordinary peace

Irwin Abrams lectures on Nobel Peace Prize recipients and their role in society

Sarah Svigals

"Ordinary people can win this award; Ordinary people can work for peace, and ordinary people can change the world."

The above quote from Dr. Irwin Abrams's lecture on September 16 rings true at Juniata. After all, we've always been taught to expect the uncommon from everyone here.

Abrams is best known for his work documenting the history of the Nobel Peace Prize laureates and for his recent book about the Iraq war. However, these are not his only accomplishments. He's a Distinguished University Professor Emeritus at Antioch College for more than three decades, a Fulbright scholar, and was a relief and reconstruction worker during the Second World War.

According to an article from the Yellow Springs News, Abrams's hometown newspaper, when he was approached 20 years ago by a publishing company to write a history of the Nobel laureates, he had another project in mind. But he reconsidered the project, influenced by a survey he encountered at that time listing young people's heroes.

Those heroes, mainly rock stars and actors, left Abrams, a longtime Quaker, longing to provide young people with more substantial role models. So he agreed and set about his long-term project of writing biographies of each Nobel Peace Prize winner.

Some of the notable people Abrams outlined in his lecture were Betty Williams and Maried Corrigan, Linus Carl Pauling, Rigoberta Manchu and Jimmy Carter.

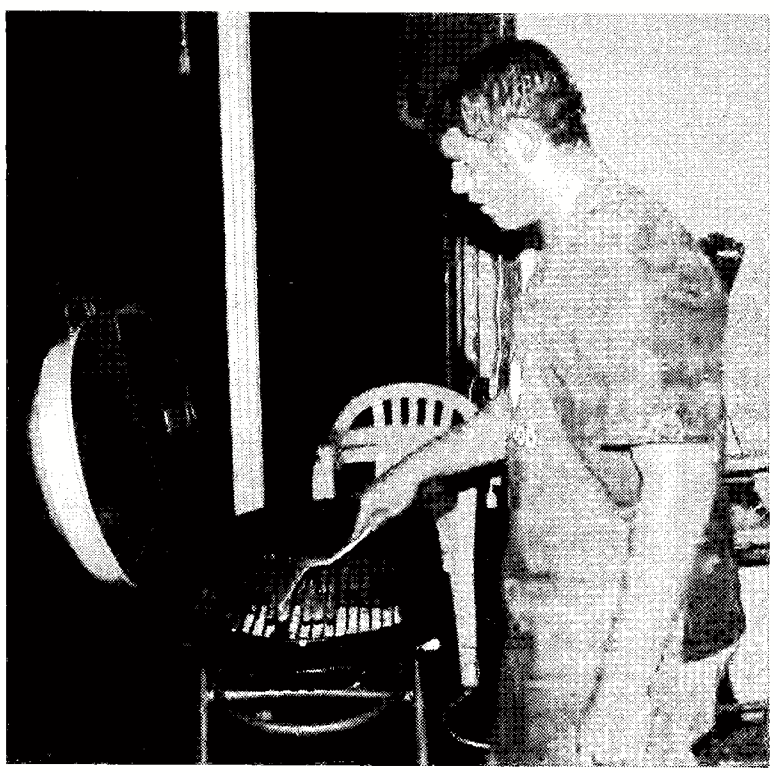
Betty Williams and Marired Corrigan were founders of the Irish Peace movement after Corrigan's sister was killed by a car driven by a dead IRA soldier. They are the basis of the opening quote of this article.

"The funny thing is that everybody is ordinary," said Abrams. "But they all have the potential to do extraordinary things."

Linus Carl Pauling won not only the Nobel Peace Prize, but the prize in chemistry as well, and campaigned for an end to nuclear weapons tests. According to Abrams, Pauling said that he could only spend "one third of his time in the lab and the other two thirds were spent with humanity and peace."

Another notable woman that Abrams mentioned was Rigoberta Menchu, a Guatemalan who worked for the rights of indigenous people in her country, who eloquently stated "Peace is more than a little white dove, Peace is you and me."

Hannah Rauterkus / Juniatian



Irwin Abrams, writer of the Nobel Peace Prize biographies, shared stories and photos of the inspirational winners.

Of all the Nobel Peace Prize winners Jimmy Carter is among Abrams most celebrated. After Abrams nominated him for 11 years, Carter finally won the award in 2002.

"Since he left office, Carter has done more than any other former president in the field of human rights," Abrams said.

But for Abrams peace is not just a global issue. According to his driver, Joan Horn, "it occurred to me that during his many years at Antioch College, in the history department, that maybe some things had come up in the faculty that his years of dedication to peace, nonviolence and conflict resolution, [had helped resolve]."

The House plans events despite debt

Hannah Rauterkus / Juniatian

Neither rain nor hurricane could keep Adam Messner from grilling hotdogs for the dry crowd inside the House on September 18.

Richard Pulliam

To those who aren't aware, the Alternatives to Alcohol House – or just "The House" – is located behind Good Hall at 1731 Mifflin Street. The first floor of the house is open to all Juniata students any time of the day. The House also serves as a residence for 10 Juniata students. The residents agree that The House and the activities it sponsors are substance-free.

Rumors have spread that The House will not hold any activities this year. However, this is not the case. The rumor started because The House incurred a debt of $85 last year due to an activity the seniors held. This year, residents of The House said that they are going to keep the cost of activities down to a minimum.

The House was in fact able to hold a cookout on September 18, even though last year's debt had not yet been paid off. This was possible thanks to the financial support from Seth Custer. Custer is a resident of The House and will be reimbursed by the Health & Wellness Center. Beth Williams, a counselor at Health & Wellness, is the advisor for The House.

Senior Katie O'Donnell said, "I'm excited to be at the cookout with fun guys and free food. It's something different to do on a very quiet campus."

This year The House will be organizing many activities for students to participate in. They have a regular movie night planned. Come January they will hold a Super Bowl party as well. They are also planning Capture the Flag and Ultimate Frisbee events. A list of upcoming events can be seen at The House's website, http://clubs.juniata.edu/thehouse/www.

The House normally cooperates with other groups on campus to help raise money for these activities. Last year they had worked with the Women's Group, Community Services and Campus Ministry. The house is planning on asking Residential Life and the Community Board for help with activities this year.

Some students may hesitate to go to a house where they don't know the residents. But freshman Mark Steficek's words should encourage the wary.

He said, "Most of the guys here are part of my Cross Country team and they're a group of good guys."

Many students come to these activities. So don't be shy about just showing up at one even if you are going by yourself. Food is free at many of these events, which is just one more reason to go. Or you could just chill out at The House and watch TV in between classes.

New Sodexho Café opens in Brumbaugh

Corinne Barabas

Too tired to wake up for breakfast before an eight o'clock class? Well, now it is possible to sleep in or study over lunch and still have time to eat. Just stop by Café a la Cart, located at the top of the main entrance's steps in Brumbaugh Academic Center.

The recently opened café, "was established due to the extra students and the belief that there should be some kind of accessible food on the west side of campus," said Hal McLaughlin, the general manager of Sodexho Food Services at Juniata.

Open from 7:45 a.m. until 2:00 p.m., the café has plenty of great snacks and drinks available at reasonable prices.

They sell fruit, chips, cereal, Pop-Tarts, bagels, cookies and candy. Sophomore Elena Amato declared that "the giant cookies are delicious."

For lunch, sandwiches and salads are delivered from Baker.

There is also a wide assortment of drinks ranging from Gatorade and chocolate milk, including many varieties of juice and soda.

Presently, the café only accepts cash, until the malfunctioning debit card machine returns from being repaired. In response to dismay over this issue, McLaughlin commented, "The company fixing it promised they'd get it back here as soon as possible."

Once the machine is fixed, students will be able to pay with their Gold Cards, and money spent will deduct from DCB accounts. Meal exchanges will not be permitted because the food sold at the café is priced higher than at Baker and Muddy Run.

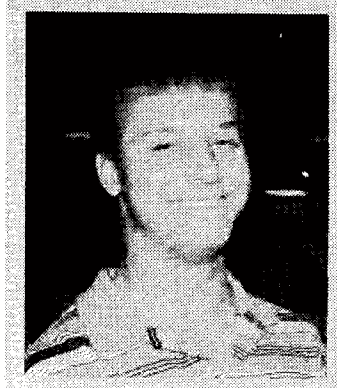
McLaughlin said he would be willing to keep the café open after 2:00, if "the sales justified the extra hours." Not many classes are in session later in the afternoon though; therefore it would not see as much business as it does during morning hours.

Many students and faculty agree that Café a la Cart is a beneficial addition to Brumbaugh and that it has been nice to be able to stop by to pick something up on the way to or after class. "It [the café] is convenient for people who spend a lot of time in the building," said junior Lindsay Garvey.

Professor Sunderland, whose office is in Brumbaugh, also thinks it's a very convenient place to go when he "doesn't have any time for breakfast in the morning at his house, or he is unable to leave the building for lunch."

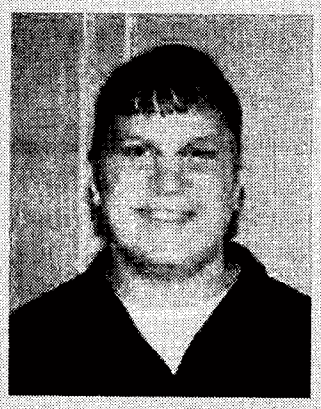
Whether sipping a Starbucks coffee, spending a relaxing afternoon reading the Juniatian, or hurrying off to a class that started fifteen minutes ago, quieting a growling stomach, Café a la Cart is a place to check out.

Voting away from home



The Roving Reporter

Hannah Rauterkus



What issue is the most important to you in this election? Why?

Brandy Dressler, JR: *Environmental Policy. Bush supports a number of policies that if made into law would disrupt forests and the livelihood of many animals in several states.*

Adam Boyd, SO: *Foreign Policy. It is important to our safety. Nothing is important if we aren't alive.*

Kevin Warner, SO: *The role of the US in international affairs and whether we work with or against the international community. Regarding Iraq we need a multilateral approach. Animosity against the US will not help fight terror.*

Marsha Loth, JR: *Education. The state of schools today is terrible because of No Child Left Behind. My parents are both teachers; my father's school went down on the achievement test by 0.1% on a sub group with statistics that don't exist there. His school is now on the blacklist and was formerly the best school in the country for achievement per dollar spent.*

continued from page 1

If you wish to register in Huntingdon, you can go to the courthouse downtown to do so.

In Huntingdon the closest place to vote is Stone Church of the Brethren. It is located on the corner of Moore and 17th Streets, across the street from the Health and Wellness Center.

The upcoming election is tight and now is the time to get involved. We have the opportunity to influence how our country is run. We need to exercise that right.

Matt Holtry, a founder of the JC Voter Coalition, says, "The decisions that are made by our administrators today will impact the rest of our lives."

He went on to say, "Statistically, college students are among the lowest percentage of voters." The collegiate vote is crucial because we are the ones directly affected by future policy.

The Coalition can help, in an objective way, to inform students of the importance of voting. The different members can help to explain each of the parties and their positions, helping you to figure out how you want to vote.

With the information provided, in this issue and the last, there is no excuse not to vote.

Holtry leaves some good advice for those who do not see the point: "America was founded on the idea that one should have the right to express [his or her] viewpoints. To not vote is to [...] alienate oneself from his or her own country."

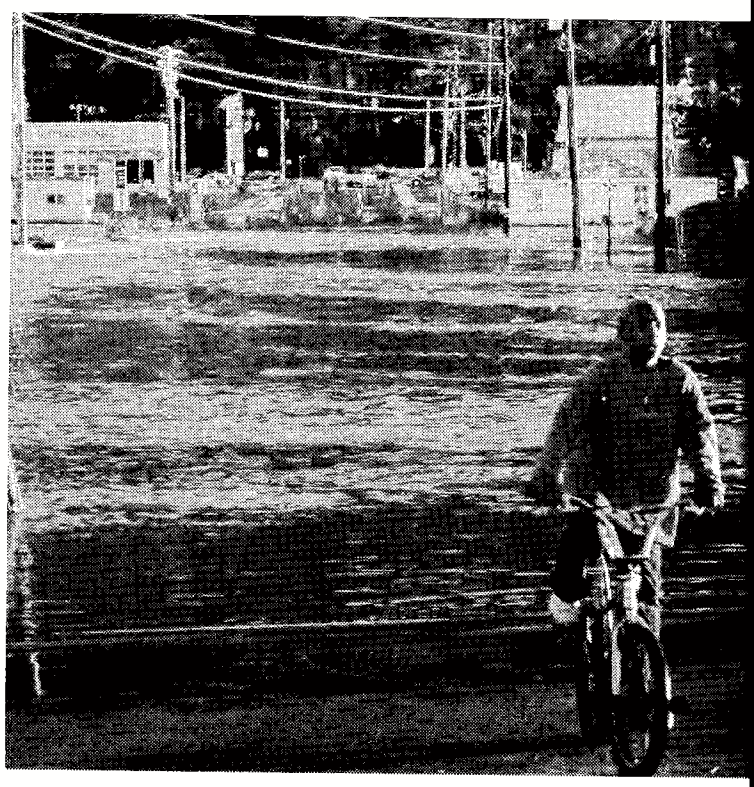
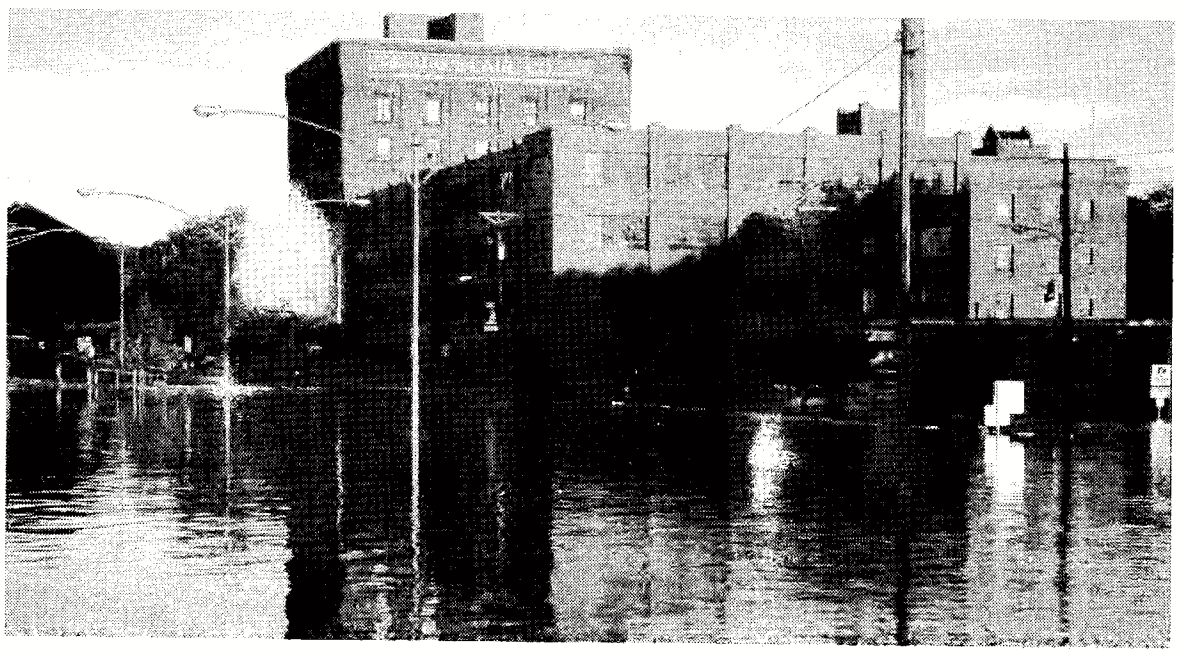
Story in Photos: The Huntingdon Flood of 2004

Hannah Rauterkus



Hurricane Ivan left a great impression with Huntingdon on September 17. The streets were littered with citizens that made a day of staring at the out-of-place water (top left) . Everyone was out with their cameras to capture what will hopefully never happen again (middle).

The deep waters made Huntingdon look like a port city from the distance (bottom).



Students had to survive a night without MTOs and junk food. Sheetz, Giant, and other places were blocked off from town (top right). Guests of the Comfort Inn found themselves trapped on a small island.

Check the Juniata Announc ments for ways you can help wi flood cleanup downtown.

Homecoming highlights

Juniata's annual Homecoming & Family weekend starts tomorrow, October 1. Following are highlights of the weekend for current students.

Friday, October 1

Internship Poster Display: 1-10:00 p.m., von Liebig
Math & Computer Sci. Panels: 3-5:00 p.m., Brumbaugh IT Wing
Apple Butter Making: 6-9:00 p.m., Raystown Field Station
Friday Night Live with mentalist Craig Karges, 9:00 p.m., Baker Refectory

Saturday, October 2

Apple Butter Making: 7-6:00 p.m., Raystown Field Station
Internship Poster Display: 8:00 a.m. - 10:00 p.m., von Liebig
5K Run/Walk: 9:00 a.m., Ellis porch – *registration required*
Music by WKVR: 11-2:00 p.m., Oller Lawn
"Graffiti the Plaza" Chalk Art: 11:30-2:30 p.m., Fluck Plaza
Henna Tattoos: 11:30-2:30 p.m., Oller Lawn
Build Your Own Pennant: 11:30 a.m.-Noon, Oller Lawn
Homecoming Parade:11:30 a.m.-Noon, starts at 18th and Penn Streets down the brick walkway
Picnic Lunch: Noon-2:00 p.m., Oller Lawn
Artist Series: Universes... Slanguage: 8:15 p.m., Oller Hall
Coffeehouse: 10:30 p.m., Tussey-Terrace Lounge

Sunday, October 3

Internship Poster Display: 8:00 a.m. - Noon, von Liebig
Worship Service: 10:00 a.m., Ellis Ballroom
Lake Raystown Field Station Open House: 1- 4:00 p.m.
Will Judy Lecture: Rep. John Lewis: 8:15 p.m., Oller Hall
See related article on page 8.

Please see the sports section on page 15 for athletic events this weekend.

Intolerable behavior

continued from page 1

commented in the official press release that the recognition as a private police force "allows the college's police officers to exercise full police powers..."

"This new designation will improve our service to the campus community, and it gives us better tools to serve the surrounding community as well," continued Panosetti in the press release.

However, the JCPD was not responsible for the arrest of a Juniata College freshman that took place earlier this semester. According to Clarkson, the student was intoxicated and shouted profane language at a Huntingdon Borough Police Officer. The two departments have worked together in the past and will continue to do so now and in the future.

Members of the Juniata College Police Department do not want students to feel that their relationship with the students has changed. The JCPD believes that they have always had a good relationship with the students and want to maintain it.

So, was the Juniata College Security Department merely getting tired of busting East parties and being unable to lay down the law—police style? No. According to the JCPD, one of the main reasons for the transition is an increase in opportunity to apply for and receive grants.

The press release supports this stance, stating that "the re-designation as a police department allows Juniata's police force to apply for various state and federal grants [...] The designation also allows police officers working for the College to participate in professional development training."

The press release continued with Panosetti saying, "Improved training is really a plus for our students who rely on us for police services....It really allows us to provide better police services to a campus and a community that deserves our best service.'"

But who cares if a drunken student gets arrested in town? Who cares if some lady gets mad because students are rude to her at the local grocery store? Who cares if you set an empty beer can on some random windowsill? Who cares if you awaken a three-year old at two in the morning on your way back from the bar?

Having been arrested, the freshman now cares. The offended lady cares. The owner of the home who has to clear litter from the windowsill cares. The parents of the three year-old who have to get up to put their child back to sleep care. And, according to Dean Clarkson, members of the Juniata College community should care, too.

So, what is the proposed solution? How does the student body avoid run-ins with the Huntingdon Borough and Juniata College Police Departments? The answer, according to Clarkson, is "...we need to help one another out."

College is often considered the best four years of someone's life. With that, however, comes the added responsibility of remaining an active member of the college student body. This, of course, does not mean do not have fun. Just remember that it is possible to be responsible and have fun at the same time.

Student Government

continued from page 1

fore the football game to support the team.

Student Government is throwing around ideas of selling megaphone cups full of popcorn, Eagles hats, and/or other snacks and props adorned with Juniata's blue-and-gold logo.

The main reason for the new-to-JC event is a hope to increase school pride.

"School pride is lacking in some areas," said Kihm.

The idea is to see more support given to the JC teams who don't usually have as many followers as others. Student Government thinks tailgating might lure more fans to the less-followed sporting events. So, players who are not on the women's volleyball team will rejoice at the newfound crowds in their bleachers.

Eagles football coach Darrell Alt thinks that the event will do wonders for team morale. "I fully support any activity that enriches the college experience," he said. "Our players love to see as many people at our games as possible."

Like increasing school pride, another big Student Government issue this year is the cooperation of clubs and organizations. In a press release, Student Government said that it has "aspirations of working closely with the clubs on campus and encourag-

Beyond ethnicity: Sexual diversity at J.C.

Emily Eller

This article is the first in a series of articles which seek to highlight the issue of diversity at Juniata College.

Anyone who has ever been a minority knows that one seeks more than just acceptance. One looks to grow, to be encouraged and develop as a person who can embrace that part of him/herself that makes him/her different from the mainstream.

"The major problem is that there's no community, [for minorities]" explained Elliot Stillwater, a senior PAR student. "And for a young person that's very hard."

When asked about minority students, Terri Bollman-Dalansky, Director of Admissions, sympathized with this sentiment when it comes to recruitment, but initially thought of racial minorities.

"It's hard when you walk around campus and don't see other faces that look like you," she said.

To help deal with the isolation that racial minorities at Juniata College face, admissions has recently invested time and resources into what it calls "diversity." Many students, however, feel that this commitment is only skin-deep.

While Juniata's literature promotes and displays ethnic minorities, there is little to no mention of sexual minorities. What is Juniata doing to ensure a sense of security and community for sexual minorities?

Juniata often publishes its growing domestic minority numbers. However, when it comes to statistics about sexual minorities, "We don't keep track of those numbers," said Bollman-Dalansky.

Juniata College works hard to smooth the transition for students into college life. The school provides an orientation session, as well as the CWS Lab to ensure that there is a structure to help freshmen adjust. There is also a separate orientation for international students. Also, for the first time this summer, Juniata even held a special orientation for domestic minorities. But sexual minorities are a different story.

Although sexual orientation is only a part of a person's identity, being a sexual minority can be an isolating experience. Here at Juniata, gay and lesbian students live in a predominantly heterosexual community.

"They rely mostly on the fact that there's a GLBTA group on campus," said senior Paul Blore, referring to efforts by the administration to make GLBTA (gay, lesbian, bisexual, transgendered and asexual) students make the transition to college life. He added, "I wouldn't say that it's part of

Campaign Viewpoints on Foreign Policy

Bush: Consistency for progress

Morgan W. Sample

Foreign policy is a major issue in this year's election. Unfortunately, presidential candidate John Kerry has done little to distinguish himself and his policies from those of the incumbent, George W. Bush.

Kerry doesn't seem to realize that his proposals have already been covered by Bush. Kerry's campaign is making 33 proposals. Of these 33 proposals, Bush has already put 31 of them into effect. These include everything from training the National Guard to serve in evacuations, to creating a civil defense program, and simplifying and coordinating the terrorist watch lists.

Bush has been leading the war on terror throughout his term. He knows what's going on and how to handle it. He has provided states and local funds for the development of emergency operation centers, created anti-counterfeit safeguards, expanded Americorps, and harnessed resources of science to our technological advantage.

President Bush started a homeland security grant program in July 2002. It consists of competing grants that go to 43 nonprofit and public organizations in 26 different states. He also has a version of Kerry's "Community Defense Service" proposal. It is called "Citizen Corps." Established in 2002, this group organizes emergency help in disasters such as terrorist attacks.

In an address in the Rose Garden, Bush stated, "We've created a new unified Department of Homeland Security and gave it resources and the authority to defend America. We're employing the latest equipment and know-how to secure our borders, air and seaports, and infrastructure. We're bringing the best technologies to bear against the threat of chemical and biological warfare."

He said that one program, "Project Bioshield," "will fund cutting-edge drugs and other defenses against a biological, chemical or radiological attack."

There is also one defining difference between Bush's and Kerry's policies. Kerry has argued that he would involve the United Nations in his decision-making in regard to foreign policy. Kerry suggests that he would be able to build a stronger and larger coalition to help support the United States.

However, Bush has argued that the U.N. has not been strong in enforcing its own resolutions, let alone the interests of the United States. Bush fiercely defends his decision to remove Saddam Hussein by arguing that Iraq and the United States are both safer today because of that decision.

The hallmark of Bush's foreign policy is to fight terror overseas instead of in our homeland. His success rings true by the fact that we have not had another attack on our homeland since the attack on September 11, 2001.

Kerry's position on the war is ever-changing; One day he is against it, the next day he's for it and then once again against it. We need a leader who is strong in his resolve, and strong in his position.

The public doesn't know how successful John Kerry would be in a time of war. Who is willing to take that risk?

Bush knows what the people want, and he's giving it to us. He knows how to make people feel safe and is doing whatever he can to fulfill that need for the American people.

Kerry: Assertive multilateralism

Mary Gardiner

"We need partners," said Democratic presidential candidate John Kerry in the magazine *Foreign Policy*.

If Kerry's foreign policy campaign could be squeezed into three words, these would be the most suitable. Kerry is not talking about international dependence, but is certainly tired of the isolationist America that Bush is promoting—and developing.

According to Kerry, we have been truly inconsiderate to the opinions of the international community. Such an attitude is not only tactless, but also harmful to both other nations and to ourselves.

"The current administration has pursued the most arrogant, inept, reckless, and ideological foreign policy in modern history," said Kerry in his speech before the Council on Foreign Relations. Bush's moral "clarity," haphazard military strikes, and arrogant nationalism are much worse than wrong. They are dangerous.

Without the help of our allies, nothing can really be accomplished. "The war on terrorism will never be won through unilateral American action," said John Edwards, the Democratic Vice Presidential candidate, "The US cannot be everywhere and learn everything without cooperation from our friends and allies."

The current administration views the world and foreign affairs in black and white, and encourages American citizens to do the same. Bush's "unilateralist dogma," says Kerry, is doing nothing but robbing Americans of true understanding about the world around us. If we don't agree with how a nation operates, Bush adds it to the "Axis of Evil." There are only good guys and bad guys in Bush's campaign. This may work for elections, but it will not work in the path to peace nor in the path to national security.

Specifically, there is Iraq. After the demolition—and complete lack of clean-up—in Afghanistan, the U.S. engaged in operations in Iraq for a variety of reasons. Bush cited reasons like, "Weapons of Mass Destruction," Saddam Hussein, oil, and, not surprisingly, "bringing democracy to the Middle East." Instead of democracy, we brought further hatred and turmoil to a nation of pain. Now it just looks like their pain is due to our presence.

Iraq, however, is not all that is wrong with Bush's policy. Instead, it serves as a clear example of all that is amiss in his campaign. We spit in our allies' faces with terms like "Freedom Fries," disregarding the wise advice of our friends and partners.

The US now seems like a whiny bully, always ready to pick a fight, never caring about anyone else. *I don't need anyone's help*, the Bush administration seems to say, *I can do it on my own*. If there are noble motivations to our involvement in Iraq, we should be seeking help, not offending those who would come to our aid.

Kerry realizes this fact. "We must work with the international community to define a global strategy that is collective, not imperial," said Kerry in his speech before the Council on Foreign Relations. He pushes for stronger ties and relations, noting that isolation is impractical in a world of globalization. We do not live in the Dark Ages. Cooperation is the key.

continued page 7

When apathy becomes lethal

Mary Gardiner

Imagine your friends being slaughtered or brutally raped. Imagine the U.S. government funding it all.

Here on the Juniata Campus, it can be quite easy to feel isolated from the outside world. In our tiny community, we have everything we need.

But the borough limits of Huntingdon are not the ends of the world. It's quite important to get in touch with reality every once in a while. Unfortunately, reality isn't always all that pretty.

For instance, right now, in Darfur, the Western region of Sudan, life is quite different. In Sudan, the largest country in Africa, there are no MCATs, and there are no Atkins diets. In fact, the widest crisis the Sudanese are enduring right now is starvation. But this is no poor kid on the *Save the Children* kind of starving. This is malicious starving.

Since its independence in 1956, Sudan has been home to relentless civil war. The conflict is largely between the Northern Arab population and the Southern "non-Arab" population. Northern Sudan is politically and economically dominant.

In February of 2003, property disputes set a conflict in motion that has not yet ended. As fighting snowballed, the Northern government dropped bombs and began to fund a militia that the Sudanese call the Jinjaweed, roughly translated to "armed horsemen."

The Jinjaweed have targeted the dark-skinned non-Arabs in their killing sprees, but do more harm in property damage and food destruction.

By far, however, the worst damage has been done through rape. Amnesty International estimates that 80% of the war's casualties have been women.

"If we go outside to fetch firewood, we are attacked...About half of the women around here have been attacked at one time or another," said Khadia Abdullah Kabir, a Sudanese refugee.

One woman reported that a member of the Jinjaweed raped her, saying, "The government told me to do this to you." Another woman explained that as she was raped, her attacker said that he hoped she would have a baby as a result of the rape—a better, light skinned baby.

You might think: *we ought to do something about this troubling violence*. As a matter of fact, we are obligated to do so.

In 1948, the U.N. drafted the Convention on Genocide. This document defined genocide as any action intending or committing the systematic destruction of an ethnic group. It also said that those who commit genocide would be punished by the nations who signed the document.

This is why Colin Powell's use of the term "genocide" with regard to Sudan on September 9 is so significant. Now the U.S. is obligated to take action.

And it couldn't be needed more. In a year and a half and some 35,000 people have died. Women can't leave their homes for fear of rape or murder, and cannot find food, water, or firewood.

Sudan is now entering its rainy season, making it impossible to send out food aid in the coming months. This is particularly dangerous for the 1.2 *million* people without homes or food access. As starvation spreads, so do cholera, meningitis, and polio.

This is no simple matter—and it cannot be overlooked. President Bush said, "We must turn the eyes of the world upon the atrocities in Sudan." They are humans, and they need our help.

You can do something about this. Write to your congressional representatives and tell them you are shocked by the events in Sudan. Letters are great; phone calls are better. You can find your representatives and their phone numbers, as well as a form to send to your representatives at a link on the Juniatian website: www.clubs.juniata.edu/Juniatian.

Gay at Juniata College

continued from page 6

their diversity initiative."

Rosalie Rodriguez is the sole occupant of the Office of Diversity and Inclusion and was unavailable for comment. However, in an interview for another article she mentioned that the Plexus Orientation, a separate orientation for minority students, was intended to, "kind of ease them into the predominantly white, Christian, heterosexual society - we have found this transition to be a concern for both majority and minority folks who are just not used to being in such a homogeneous society."

However, since GLBTA students are not even identified, there were none invited to the Plexus Orientation based on their sexual orientation.

Representatives from All Ways of Loving (AWOL) all mentioned that Juniata is a place that fosters tolerance and where there seems to be space for everyone. However, Juniata does not have a GLBTA dating community and while people are generally tolerant, GLBTA students often feel left out.

Most straight students take for granted that dating will be a part of their college experience. At orientation President Kepple often tells the parents of new students to look around, because they might see the faces of future in-laws. For GLBTA students, this is simply untrue.

"It's easy to find a supportive group of friends, but the things that most straight students take for granted are non-existent for gay students," said Stillwater.

AWOL has done a great job providing a place for students interested in the awareness and rights of sexual minorities. But, it is worth pointing out that most of the group's activities are targeted at the straight community. It is not a support group or community for gay students. It is a club that mostly promotes tolerance and awareness within the straight community rather than being a place where GLBTA students talk about feelings such as isolation and loneliness.

"My tour guide mentioned AWOL on my tour," recalled freshman Nora Wainright.

Bollman-Dalansky later confirmed that AWOL is mentioned on the tour. "In 17 years of working here, I've never had a student ask me about it [opportunities for GLBTA students or the climate around issues of sexuality]. The sad thing is that if I were asked I wouldn't even have the information to offer them," she said.

As a community it would be reasonable to ask, why not? Why doesn't admission take sexual orientation into account for entering—and current—students?

How could we change the demographics for GLBTA students at Juniata College? "How do we get Christian students or athletes to come to Juniata?" explained Stillwater, "they actively recruit them. If they recruited gay students, the campus would look a lot different."

"We have no plans to recruit gay students," Bollman-Dalansky said.

Kerry's policy

continued from page 6

"A leader who has to go it alone is no longer leading anybody," said Edwards.

According to Kerry, American leadership "means we must work harder to build coalitions."

We've done a poor job at that so far. We must strengthen our support and, if nothing else, regain respect from our international friends. We have betrayed their trust, and another four years of George Bush will do nothing but drive us deeper into that hole.

Presidential perspective

Q&A with President Kepple

"Juniata has publicly stressed its desire to attract more diverse students to campus. Mostly that diversity has been designated as domestic minorities, such as African American or Latino students. Is Juniata doing anything to recruit students who identify themselves with sexual minorities, such as gay, lesbian, bisexual, trans-gendered youth on campus?"

This is an interesting dilemma. It is not appropriate to ask a prospective student or employee about his or her sexual orientation. For those individuals who do self identify we can discuss our support services and AWOL. For potential employees we can let them know that we offer domestic partner benefits.

"What will be done to ensure that residence halls (especially Sherwood) will no longer experience the type of flooding that they have in recent weeks?"

With roughly 700,000 square feet of space on campus occasionally some of it leaks in a major storm. In the case of Sherwood the culprit was a plugged drain. We have reworked the drain and believe that there will not be a problem in the future – in fact we made it through Ivan without a leak at Sherwood.

Students and faculty can submit questions for the Ask President Kepple column by e-mailing juniatian@juniata.edu. Questions are selected by Juniatian editors and forwarded anonymously to President Kepple.

Despite renovation, Oller hosts productions

Jeremy Simmons

Students on campus this year will find it impossible to miss Juniata's newest plan for the future: the complete renovation of Oller Hall. Today the sounds of heavy machinery fill the air as construction workers update Oller and give it a sizeable addition. The finished product will be the Marlene and Barry Halbritter Performing Arts Center which Provost Lakso says will be open in the fall of 2005.

The new addition onto Oller Hall will be a state of the art flexible space theatre. Similar to a black box theatre, the flexible space theatre can be used for many different types of presentations. This theatre will be used for smaller performances and will seat 175.

The Halbritter Center will also be home to a new studio with a "sprung" hardwood floor. This special floor gives a little bit when pressure is applied to it and will be used for dance and movement instruction as well as for performances.

Oller Hall will also be updated to bring it up to standards with a modern theatre. Some of the renovations include air conditioning and new bathrooms—two things everyone can appreciate. A grand lobby will also be built to serve both Oller and the new flexible space theatre.

New offices for the music and theatre departments are being put into the new building as well. Head of the Theatre department Professor Andrew Belser said, "I'm very excited about the move into the new building." Professor Belser also said that "things are moving along and unless something major happens the center should open on time."

Even though Oller Hall is under construction, it will see limited use throughout the year. The construction is being scheduled around the performance dates to allow time to pack up the construction equipment.

The Juniata Artist Series will include slightly fewer performances this year due to the renovation. The first of these shows to be held in Oller is "Universes Slanguage" on Saturday, October 2. Slanguage will be a mix of theatre, poetry and different musical styles including jazz, hip-hop and blues. Other Juniata Artist Series acts are scheduled to take place in Oller through March.

Oller Hall will also be opening its doors for student performances. The Mr. Juniata Pageant will still be held in Oller on Friday, October 8. Other student events are also planned to be held in Oller Hall throughout the year. But many smaller student productions will take place at various locations across campus.

Juniata's newest plan for the Marlene and Barry Halbritter Performing Arts Center is no small task. However even with all the construction happening to Oller Hall it will still see use as the year progresses. All in all, this new state of the art facility will be ready next fall. Until then, Oller Hall will remain the primary facility to host all artistic performances.

Civil Rights activist visits JC

Mike Chirdon

John Lewis' speech on Sunday, October 3 will mark a first in Juniata history. It will be the first time the author of the community summer reading book will give a speech on campus.

While it is not necessary to read his novel *Walking with the Wind* to appreciate what Lewis will talk about during his speech, the book is still worth a look. Though it may seem rather large, it is well worth the effort to read it. Size should not scare one away from this powerful and uplifting tale of the fight for civil rights in the United States. Many Juniata students, faculty members, and alumni have read and enjoyed it.

Anne Gaynor, of the class of 2004, said it is one of the best books she has read, and she has been recommending it to her friends.

"John Lewis' accounts of the movement were thoughtful, profound, and moving. I found I could not put the book down," she said.

Freshman Ryan Conrad also enjoyed the book. "It started out slow, but once you get into it, it really picks up," he said.

However, even those who have not read the book will benefit from attending Lewis' lecture. Lewis is an important historical figure who played a key role in the civil rights movement. Lewis, previously a peaceful protester, student—and lifelong—activist, and a current congressman from Georgia, has helped to change history, and his story is an inspiration to students everywhere.

Sarah Clarkson, chairwoman of the summer reading selection committee, says she hopes Lewis will inspire Juniata students to make a difference in the world. She says that Lewis' humble background is not very different from many Juniata students. His story proves that a person doesn't have to be born into wealth and power to make a difference. All that is necessary is a goal and the will to persevere. Though

¿Qué dijiste?

Jay Trovato

Perhaps the biggest challenge of studying abroad is communicating in another language. Knowledge of your host country's language is the most important thing you can pack in your mental suitcase before leaving, and will be one of the primary souvenirs you bring back home.

Even those of you who pick English-based programs will have work to do. The nuts and bolts of the language will be the same, but you will still have to learn regional words, slang, which words have double meanings and possibly new grammar constructions.

Even Juniata College was a linguistic education for me, having had no exposure to the Western Pennsylvania dialect, and I had to learn what *dippy eggs*, *gobs*, and *sweepers* were. But Mexico has definitely taken me on an adventure as far as language goes.

I have encountered many new words that I thought I already knew. In high school, I learned Spanish words and phrases taken from a mix of Latin American, Caribbean, and Iberian dialects. Therefore, I didn't know many words that are uniquely Mexican, especially relating to food.

Your fluency and the slang you pick up will depend on how much time you spend with natives. One of my fellow group members arrived knowing little Spanish, but spent her free time hanging out with Mexican friends. In a matter of weeks, she was three times as

Collegiate Dementia

Adventures in bartending, part 1: rarities amongst vegetables

Carolyn Keller

There comes a time in every girl's life when she must face the inevitable, and reach one long-awaited milestone: a summer job…behind a bar.

You didn't think I was going to rant about politics all semester, did you?

Yes folks, it's time for "What I Did During My Summer Vacation," otherwise known as Adventures in Bartending…at the Williamsport Olive Garden. Though it wasn't quite an episode of Girls Gone Wild…or even Wild & Crazy Kids, it was definitely, shall we say, a learning experience. After applying at the Italian eatery, I was safely planning my career as a host. Then Fate, voiced by Manager Steve, interjected with a phone call, "Yeah, Carolyn, so we're gonna put you behind the bar instead..."

The bar…same wages, plus tips, *and* learning how to make all the crazy drinks? The word 'no-brainer' came to mind. I accepted. And so I became your friendly neighborhood bartender, thus inheriting all the craziness that comes with it, and sometimes that involves serving people food.

Take, for example, lettuce. An innocent vegetable; abundant, and mostly water, it's enjoyed both as Big Mac filler and rabbit food. Everyone enjoys some good lettuce at some point in their lives. At least, I *thought* so. But then one day the Woman-of-Atlanta waltzed in and wrecked my happy little vegetable utopia.

"I'll have the manicotti," she said, looking at me benignly.

"All right," I said, launching into my line, "Would you like soup or salad with that?"

"Oh. Hmm…I'll have to go with the soup, how about…the pasta…fagioli? You know, I've never actually had salad before."

Erm…I blanched. Her face was absolutely straight. "Really?" I asked, slightly losing my standard "Sure-I'll-be-right-back-with-whatever-your-little—occasionally-cracked-out—heart-desires" composure.

She sat there, nodding away, as the grazer in me wondered if there was some kind of scientific research for this kind of phenomenon.

continued page 10

The Bookmarkables

Nate Thompson

It's Thursday evening. You're thinking about what you want to eat, but there's a problem. You are sick of the three Juniata College food groups: Baker, Dominos, and Sheetz. Face it, you're stuck. Besides, it's not like cooking is easy, right?

Wrong! If you take half an hour out of your budgeted video game time, you can cook a meal and eat it too. In this issue, I have decided to highlight yumyum.com's student section at yumyum.com/student.

This portion of the main website has been intended entirely for the student. What exactly makes a bunch of recipes student-centered? Unlike that 400 level class you're taking, it doesn't use fancy curriculums to create a student-centered approach. This site uses minimal ingredients, minimal cookware, and minimal directions to make great meals. In other words, you have a low budget meal that is quite easy to prepare and cook.

If you are looking for a recipe from a ritzy restaurant, look elsewhere. However, if you want a cheap knockoff of a gourmet meal, this is your website.

Yumyum.com's student portion of its website boasts 80 recipes covering every meal, snack or dressing you will ever need. The recipes range from staples like hamburgers to more exotic meals like shrimp jambalaya.

I was a little hesitant about the small number of ingredients on many of the recipes. Therefore, I felt the need to try several of them myself. While the ingredients and directions remain sparse, I assure you that the taste remains great.

The Ratings
Yumyum.com/student

Addiction	5, FOOD!
Humor	3, Witty remarks.
Navigation	2.5, Weak.
Political correct.	4, No complaints.
Usefulness	5, FOOD!

The most annoying problem is with the navigation of the webpages. The table of contents for student recipes is at the bottom. If you change your mind about a chicken recipe, you have to scroll to the bottom to pick a new category. Do not click the links in the frame on the left. If you do, you'll be sent away from the student portion of the website, and finding a link back is impossible.

Also, while you can see most of the directions on the pages, you actually have to click the link to see the full recipe. A site with better navigation would have had a quick summary of each meal rather than the beginning of its directions. Of course, once you find what you are looking for, it all tastes the same.

You may eventually get tired of eating at Baker three times a day. Perhaps you don't want to gain the "freshman fifteen" a second time by eating a steady diet of pizza. Perhaps you want to really impress your significant other by convincing him or her that you know how to cook. Whatever your motive is to try your hand at cooking, this is your website. With the cookbook at www.yumyum.com/student, you can wet your feet while whetting your appetite.

If you have an idea for a future "Bookmarkables" column, feel free to email your idea to the Juniatian@juniata.edu.

Music: The high note

Jacob S Warner

I'm not going to bore you with inane, un-inspiring, alliterative introductions intended as an invitation to a journalistic jubilee, persuasively penned, by yours truly. Not this writer. I'll stick to the music.

And I'd invite you to do the same. Indulge in your favorite recreational chemistry, and let music wash over you. That's what I'll be doing. And every two weeks I'll let you know how I made out, with reviews of the latest albums that have crossed my path, tales of live music, and who knows what else. I surely don't.

This week I offer you a double disk of musical enchantment: a live show review and a CD review. Remember, take everything with a grain of salt, but don't deny yourself a listen.

First up: Live Concert. The date: Friday, September 17. The location: Merriweather Post Pavilion, Columbia, Maryland. The bands: Jack Johnson, with special guests Donavon Frankenreiter, and G.Love and Special Sauce. Thousands of musically motivated and chemically cleansed individuals gathered to see three groups as musically varied as the tie-dye at a Grateful Dead show. Throw in some of hurricane Ivan's remaining wrath and you've got yourself one muddy musical menagerie.

Due to having confused beer consumption with time management, we missed most of Donavon Frankenreiter's set, but were blessed later in the show when he came out to perform a few songs with Jack Johnson. His gutsy guitar riffs and country crispness only served to elevate the already melodic musicianship of Johnson and his band.

G.Love and Special Sauce took the stage and proceeded to heat up the cold, rain soaked amphitheater with their funky fusion of rock, country, rap, and rhythm and blues. Imagine George Clinton, Eminem, and Blues Traveler cosmically coalescing to play a few numbers in a smoky, neon-lit honky-tonk bar.

Jack Johnson delivered a gem of a show. Crowd pleasers, rare songs and covers from Cat Stevens, Sublime, Jimmy Buffet and Bob Marley intermingled in chemically altering primordial perfection. Johnson is a sonically solid performer who uses words like a brain surgeon uses sutures: to save the mind. He backs his thought-provoking, cleverly constructed lyrics with soothing yet masterful melodies, as intricately layered as your mother's best lasagna.

Final words on this: Check out any of these groups, if you haven't already. Whatever your musical pallet may crave, I'm sure that you'll find something to satisfy your tastes.

Next: New Group/Album. The group is Woodbox Gang, the album is *Born with a Tail*. These six guys hailing from southern Illinois are perhaps one of the best displays of true American music to emerge in a while. It is music of the people, about the people, for the people. This is down-home, boot-stompin', girl-swinging, beer-guzzling, chemical-ingesting, feel-good American roots music.

The album's 17 tracks run well over an hour and take the listener on a wild ride, one in which you meet a man born with a tail, talk with a drifter's ghost, spend time in a debtor's prison, and party in New Orleans with Iggy Pop and Jesus.

Woodbox Gang's sound is unrivaled and their clever lyricism is as contemporary as it comes. They are able to combine witty word play, eerie wild-west imagery, and folksy storytelling with the best sounds of Charlie Daniels, Johnny Cash and the Allman Brothers Band.

All said, Woodbox Gang is as true to the underground American spirit as it gets. This is not candy-coated pop jingle lyricism backed by meaningless sound. These are true musicians translating the essence of America into gritty, evocative songs. Highly recommended regardless of where your musical North may be. These boys send the needle of the compass spinning.

Summer reading author John Lewis

continued from page 8

the civil rights movement might seem like ancient history to students born in the 80's, there is a lesson to be learned from it. Students *can* make a difference.

Clarkson points out that, similar to the importance of civil rights, there are many evils in today's society and causes worth fighting for. She cited the Patriot Act as an example of one of these great threats to our rights and freedoms today. In regards to issues such as these, Clarkson believes John Lewis and the people of his generation had the advantage over people in today's generation.

She said, "The world Juniata students are graduating into is a scary place; it has many unknown evils. John Lewis knew what he was fighting against, but today the discrimination is more subtle."

Remember to mark your calendars for Lewis' speech on October 3. It will take place at 7:30 p.m. in Rosenberger Auditorium, Oller Hall.

fluent as before, and knew more slang than the rest of us, some of whom had been studying Spanish for much longer.

Be ready to laugh at your own language blunders. I visited an English class, and a student asked me whether I liked Mexican food. Answering in Spanish, I told him that I did, and one of the reasons was that they don't put many preservatives in their food. Well, in Spanish, *preservativos* means "birth control," *not* food preservatives. The roomful of teenagers was extremely amused at my mistake, and once I understood what I had said, I joined them in laughing at me.

It can be an exhausting and frustrating process, but you will learn a lot – with some good laughs along the way.

Do something Mexican!: Once in a while, dress up for no particular reason. On average, Mexicans dress nicer than their U.S. counterparts for everyday activities. Even some taxi drivers wear dress pants and ironed shirts for their 10-12 hour shifts behind the wheel.

Artist Series: Slanguage

Poetry meets theatre! Slanguage, the first Artist Series event of the fall, will occur at Homecoming this weekend. Oller Hall will host the event at 8:15 p.m. on Saturday. A five-person ensemble named Universes presents the unique blend of communal poetry, jazz, and hip-hop. Tickets are free for students and can be picked up at the information desk in Ellis Hall.

Movies: Not the oil & petrochemical state after all...

Carolyn Keller

Garden State, the little indie charmer that could, wins you over early. There's the moment when Zach Braff's character leaves his L.A. actor's life—and cabinet full of lithium—behind to attend his mother's funeral in New Jersey. Then there's the point at which he falls in love with Natalie Portman in a Neurology waiting room. Somewhere in between, *you'll* fall in love. Dialogue like this is why:

"Hey, I recognize you."

"Oh, did you go to Columbia High?"

"No, from TV. Didn't you play that retarded quarterback?"

"Yeah."

"Are you really retarded?"

Of course, like any love, the good feeling doesn't last all the way until the end. But it comes awfully close.

You know you have something good when even the previews, a.k.a. "If you like the film you're about to see, you might like these" coming attractions, roll out bearing new titles from directors Mike Nichols, Wes Andersen (not to be confused with also-brilliant P.T.) and David O. Russell. If you don't know these gentlemen's work, stop reading—right NOW—and trot yourself over to the Internet Movie Database—www.imdb.com—to find out what you've been missing.

Needless to say, when it comes to the entire filmgoing experience, *Garden State* does not disappoint. It's Braff's writing and directorial debut, and the *Scrubs* actor sets a somewhat miraculous comedic tone both in front of and behind the camera. Though the plot hinges on a tragedy set in the main character's past, comedy, mixed with bittersweet reality, still rules the movie's roost.

Central character Andrew Largeman anchors the movie, and Braff writes and plays him to sweet, conflicted, yet surprisingly confident perfection. Roaming around town in his grandfather's old army-style motorcycle—complete with sidecar—Largeman visits old friends and avoids his controlling psychiatrist father. Dr. Largeman is an exercise in repression, and in the understated hands of Ian Holm—Bilbo Baggins himself to all film neophytes—he also adds necessary dramatic weight to this whimsical film.

Portman (*Star Wars, Cold Mountain*) also aids Largeman's endeavor to make sense of the last fifteen years of his prescription-numbed life. Her Sam is a character with the potential to be either endearing or grating. Thanks to the actress's appeal and Braff's quirky wordsmithing, 'grating' has no ground to gain. She and Braff both deftly jump into their characters' skins. The love story is the best part of the movie, not because it's gross or gooey, but rather because it's real.

Offbeat, original, and very, very funny, *Garden State* is not flawless. Its unconventional romance and ability to find real emotion in odd situations is slightly compromised by occasional talkiness and a sometimes poky plot. Most unfortunately, it is undermined by its ultimate lapse into conventionality: five minutes before the end credits, it tries to draw its happily-left-untied strings into a neat little bow.

At the same time, *Garden State's* lovely performances, engaging characters, and hilarious storytelling make it a must-see indie treat. Top that off with its terrific soundtrack, and you have no excuse not to get yourself to State College or Altoona ASAP to see what this little movie is made of.

And if you blink-and-it's-gone from theatres, hang in there for DVD. *Garden State* is not to be missed.

May all filmmaking debuts be as good as this one. Three happy stars from yours truly.

"I don't actually even know what lettuce tastes like," she admitted.

Erm. Right. Is there a Save the Salad Greens movement I don't know about? Omigod. Is *that* what the Green Party is all about?

"Well, you know...we have plenty," I said, trying to pry my eyebrows away from my hairline and remember: "Hospitaliano!" [Our signature slogan still frightens me to this day.] "Would you like to try it?"

"Um," she paused, obviously thinking very hard. "You know, I don't think so, I'll just go with the soup."

"Oh. All right," I said, slightly disappointed. It would have

"the business of changing lives"

Think YOUR dorm is bad?

from the Juniatian, March 28, 1969

Dorm life fatal to pigeons...
Former majestic dorm crumbles

by Peggy Haines

Freshman girls spend $800 a year for the dubious privilege of living and eating in Juniata's Brumbaugh and Oneida Halls. At the time of its completion in 1890, Brumbaugh, then called Ladies Hall, was hailed as being a majestic and modern building. Now, over 75 years later, all evidence of former majesty is gone.

Remaining are huge vertical cracks in the walls, running from ceiling to floor; irregularly shaped spots, some as much as a foot in diameter, where the paint as peeled, exposing a brown cardboard-like wall beneath; and egg-sized holes in the plaster. In the beginning of the fall semester, one frustrated freshman girl kept waking up in the morning with plaster on her bed which had fallen from the ceiling above until she finally put contact paper on all four walls to hold the plaster in.

Some doors, warped beyond belief, can't be closed without a struggle each time. Others have cracks in the wood which prevent all privacy of its occupants. This is nothing to say of old-fashioned steam radiators which refuse to turn off, even in the recent week of 60 and 70 degree temperatures and which, from time to time, emit with an annoying hiss a putrid odor in letting off excess steam.

While animals are strictly forbidden, cockroaches, rats, and mice have all made themselves at home in the building. They have even found their way up to the fourth floor, and it was with fright that two freshman girls woke in the middle of the night once to hear what turned out to be a rat rummaging about in their wastepaper basket.

The general attitude of the administration in that the building is not worth fixing up, as the new dorm is scheduled for completion by January of 1970. And yet, it will be used for at least six more months. While its appearance may not be so terribly crucial, all those living in the building have the right to demand that all possible precautions be taken so that it will be safe. In particular, it is extremely susceptible to fire, as the building has an all wood frame.

Fire escapes are "tested" twice a year, but as was explained, the conditions under which they would be used should a fire occur are not duplicated in the testing. Could it truly support fifty flee-

been kind of fun, to see what she thought of that innocuous green veggie she had avoided for so long.

Then again, perhaps it'd be better if someone else comes along someday to deflower the lettuce virgin. Someone more special than I, the Hospitalianoing Alcohol Provider in the black button-down shirt. Maybe she's saving her lettuce-eating self for marriage, and on her wedding day they can have little lettuce garnishes, like romaine rosebuds and iceberg sculptures.

Or maybe she's just a red-meat kind of girl.

The woman later went on to reveal that, in her thirty-five-or-so years of existence, she had also never voted. But somehow, that didn't strike me as quite so bizarre.

But I reserve judgment. She was a very nice lady, after all, and gave me the two things I crave most in life: terrific story fodder and a good tip. Besides, Williamsport's a long way from Atlanta, so perhaps she was world-worn and travel-weary and just had lettuce mixed up with...tuna fish, or mozzarella or something. It really doesn't matter, for no matter what, Meatitarian-Woman-of-Atlanta, your friendly neighborhood bartender salutes you.

Bock reaches new milestone

Tommy McConnell

On September 10, the Juniata women's volleyball team defeated Shippensburg in straight sets. Juniata has only lost twice this season, so the win wasn't that remarkable. What *was* remarkable was the man who orchestrated it.

The Shippensburg win gave Juniata head coach Larry Bock his 1,000 career victory, an unprecedented number in NCAA volleyball. Already the winningest coach in NCAA history, Bock merely added to his already unparalleled resume.

Maybe even more remarkable than the milestone is the fact that it almost never happened.

Bock was a banker in Huntingdon, involved with some club teams, when he received a phone call from then-athletic director Bill Berrier.

"I did it just as a community service kind of thing," Bock said. "Sort of a neat thing to go back and tell the guys at the bank, 'Hey, you can't believe what I'm doing.' I'll do this as long as I'm having a good time with it, that was it. I had no kind of long-term aspirations at all."

Some emotional encounters with his players changed Bock's perspective dramatically.

"I got completely taken by surprise by how much the kids were willing to invest and how much they cared," he said. "We got into some emotional stuff at the end of the first and second seasons and it just sort of grabbed me - this is for real. This is something that I could invest myself in."

Twenty-eight years later, Bock is now the measuring stick for NCAA volleyball coaches. His stat line is almost unbelievable. Consider:

- Bock's all-time record is 1,010-168. That's a career winning percentage of a little over 85%. The win total alone places him first in any division in the NCAA.
- He has been named Coach of the Year by various sources five times, in 1984, 1988, 1989, 1991 and 1993. He has been named regional coach of the year an additional eight times, most recently in 2003.
- He was a member of the inaugural class in the American Volleyball Coaches Hall of Fame.
- He has guided Juniata to an NCAA tournament berth every year since the tournament's inception - 23 straight seasons.
- He has coached a record 28 All-Americans during his tenure at Juniata.
- Juniata has not lost a conference match since 1981. That is a perfect conference record – 264 straight wins - for 23 straight seasons.

Any one of those statistics alone is jaw dropping, but the cumulative effect is staggering. With all those accomplishments, what number means the most to him?

"Actually, van driving miles, that's what I do the best," Bock jokes before revealing the number he is most proud of.

"The most telling [stat] is that we have graduated everybody but one player through the years," Bock said. "The women and men who have played are out there successful, I think generally very happy, good family people. I know that maybe I had a small part in introducing them to their teammates. The teams are still very close, even the ones from 28, 27 years ago; those people all are still teammates. So, if there's anything I and all the coaches I have worked with are pleased with its that we have had good teams and they are tight and remain tight."

Of those 28 seasons, four in particular stand out as particularly memorable. Bock was lucky enough to coach his daughter from 1994 to 1998.

"If I miss anything, it is to walk into the gym every night during those four years when I got to coach Anne. Those were pretty neat."

Bock's success has brought with it numerous chances to leave Juniata – the most recent an attractive offer from Yale – but the Juniata community has kept Bock in Huntingdon.

"Ultimately, the support and the people in the administration and faculty [kept me here]," Bock said. "The students I think here are the best. It's the people here that I wanted to stay close to. It seemed like a tough decision at the time but in retrospect it was not a hard decision. But, over the years I had a number of opportunities to move and eventually just thought I work for a better place now than those other schools and I had a better program and I liked my kids."

After so many achievements, Bock still has the desire to continue coaching. A national championship has somehow eluded him over the years, and it is something that still drives him. But clearly, the relationships he has forged over the years mean more to him than anything else.

"[An NCAA title] would be a nice thing," he said. "It would be kind of a neat thing for the kids to have. The school's never had an NCAA team championship here. I know the kids would and I would like to do that, too, but if someone were to say 'hey, we'll give you an NCAA championship if you trade one of your teams for some other team,' I would never trade any of my teams for that."

Hannah Rauterkus / Juniatian

When Coach Larry Bock gives his team instructions in the huddle, they know that they have over 1,000 reasons to listen.

Field Hockey - Moving up the National Ranks

Maria Piazza

To open the season the field hockey team won five games in a row. In the fifth, against Washington and Jefferson, JC notched three goals from Kim Wagner, one from Sarah Bender, one more from Michelle Campbell and several assists. With a current mark of 6-1, the team has moved up the national rankings.

As of September 28 the team held the #12 spot in the STX/NFHCA Division III National Field Hockey Poll.

To reach that level the team has been working diligently. The freshmen are busy trying to outdo the upperclassmen, which keeps all the players on their toes. Everyone else knows what they need to do and they do it.

"The team seems to be working like a well oiled train," head coach Gillich said, "Everyone is working extremely well together."

To keep the team occupied at practice, Gillich gives them games that hone certain areas of control. Their newest game is field hockey volleyball. Unlike volleyball though, the ball doesn't leave the ground. To score a point, one of the sides must get the ball past the other women.

Kim Wagner said, "It was a great game, though I still like field hockey better."

"If the team keeps working as well as they have," Gillich said, "I have no doubt that we'll make it to the MAC Championships."

Lofty postseason ambitions add pressure, but the coach is controlling it. Gillich's goal is to keep everyone focused on enjoying themselves and on taking the games one at a time.

She also hopes that captains Betsy Kusniez, Grace McCluskey and Billie Rickenbaugh will keep encouraging and guiding the younger players.

"These three girls really seem to have stepped it up as a leadership group," she said of her captains.

The rest of the team has followed. On the defensive side, goalkeeper Melanie Sappe's solid play in net earned her Commonwealth Conference Goalkeeper/Defender of the week for the second time this season.

Sappe's play stood out particularly in JC's only loss to top-ranked Messiah. Along with her defenders, she held Messiah's high-powered offense to just one goal.

The team bounced back from the conference loss, defeating Widener easily, 3-0.

Gillich says "the only way this team could work better is if they had more fans."

Make them work harder at home on October 6 when they play Elizabethtown at 4 p.m.

Women's Soccer takes form

Katie Laucks

The Juniata College woman's soccer team is beginning to take form and strong form it is. The steady strides the women have taken are great steps to a successful soccer season.

Junior Lauren Welsh feels the season is going well for many reasons.

Welsh said, "The team has been working really hard together. Although it has been tiring from the back to back tournaments, we have been able to work through them and it will only pay off in the long run."

The Juniata women hold a record of 4-4-1 overall and are looking to improve as the season rolls on.

"The team always goes into a game positive and looking to win," Welsh said. This has been a key to the Eagle's great play in their last two wins.

Juniata has been paced by many players in the last weeks. Leading the women have been senior stand-outs Sarah Lester and Rebecca Shoaf. Their strong play and leadership has been a key factor for the Eagles' offense. Both played well in a lop-sided win over Mt. Aloysius on September 16. The two combined for 9 JC goals in the team's 13-0 victory.

On September 19, Juniata finally played its first conference match up. They hosted Widener University, looking for another win.

Hannah Rauterkus / Juniatian

Freshman Heather McMinn works to give Juniata possession of the ball while under double coverage from Widener.

The Eagles looked strong from the start. But the Pioneers got out to an early start, leading 2-0 in the first half. The Eagles came back to tie the score, 2-2, with both goals coming from junior Nikki McLellan. Garvey also tallied an assist.

Unfortunately, the Eagles couldn't hold off the strong offensive play from the visiting Pioneers, losing 6-2. The loss puts the Eagles at 0-1 in the conference. But Juniata has time to polish its schedule before another conference game.

This past Wednesday at home the women took on Lycoming, posting a 1-0 victory. Junior Nikki McLellan scored the game winning goal with less than 10 minutes remaining.

The Eagles also worked hard for a 1-0 victory last Saturday against Villa Julie on a second half goal by Shoaf.

The team's next home game is set for Saturday at 1 p.m. when they face a non-conference opponent, Lincoln.

Volleyball takes a hit

Colleen Hughes

On September 17, during the second annual Terri Clemons Invitational in St. Louis, the Juniata women's volleyball team met serious competition. The Eagles captured wins against Trinity and defending national champions Washington University. But Juniata fell to Wittenberg, 3-0, the team that beat Juniata twice this season.

The Terri Clemons Invitational is a tournament designed to bring together four of the top teams in the nation. Juniata is currently ranked fourth in the CSTV/AVCA Division III Top 25 poll.

The win against Washington marked the second time in three years that the Eagles dominated their long time rival.

In game one, the Eagles trailed Washington, 25-23. That is until they brought Katie Charles off the bench. With many of her nine kills, she helped lead Juniata to victory, 30-28.

The ladies took game two with ease, wining 30-20, with some strong serving.

In game three, the teams battled it out, staying neck and neck throughout the game. Strong offense from seniors Charles and Erin Wisor late in the game won it, 30-28.

The Juniata women then went on to conquer Trinity but suffered the painful loss to Wittenberg. Wittenberg is the only team Juniata has been unable to defeat this season.

Sophomore OH Rachael Shatz commented on the loss.

"I think it was deserved for how we played. We were a completely different team, the loss before affected us. There were definite communication lapses and that's where being a young team hurts us."

Freshman libero Tara McMinn added, "You lose and you take things from that game into practice to make them better. Later in the season we'll be that much more ready for [Wittenberg]."

The Eagles are riled about the losses to Wittenberg and are eagerly looking for revenge later in the season.

During one of the few home games of the season, students, faculty, and alumni all came together to honor Head Coach Larry Bock's 1000th win. Juniata celebrated with an easy win against conference foe Albright, 3-0.

In game one, Juniata showed its strength, pounding with 18 aces, nine of which came from junior Abby Leonard. The Eagles claimed the victory with ease, 30-12.

continued back page

Juniata's quick feet are hard to beat

Corinne Barabas

Hills and pain may slow them down, but water will not stop them. Flippers, rather than sneakers, would have been more appropriate footwear for the men and women's cross country team on September 18. Stranded in Huntingdon, the team was unable to race at the Messiah/Gettysburg Invitational. Investigating the flooded town during their warm up run, they came back to do an intense, yet "fun," workout on the track.

On September 25, Juniata ran in the Penn State Altoona Invitational at Fort Roberdeau. Both teams dominated the course, running through fields and muddy woods. The women finished first out of six teams with a total score of 37 points. The Juniata men took second, only two points behind Division I Bucknell. Both the women's and men's teams for Juniata had the top individual finisher for each race.

For the women, junior Katey Glunt, captured first in the three mile race with a time of 20:34.

Nancy Hayes finished third overall and second for the team with a time of 20:59.

"It was a decent race for the most part," number one runner Katey Glunt said. "The conditions were good. The ground was slightly soggy, however, the weather was favorable."

Two more JC women placed in the top ten. Junior Sarah Bay placed sixth and sophomore Lauren Gates finished tenth.

Coach Cutright was satisfied with the performance of the women's team and is looking to place well at the MAC Championship in late October. The team has shown that they are capable of running hard and will be a fierce opponent.

For the second year in a row junior Chris Sheaffer ran a strong 5.2 mile race for the men at the PSU-Altoona Invitational, claiming first with a time of 26:17. Freshman Shawn Rumery also ran hard, placing second on the team and fifth overall.

Junior Justin Fritzius ran a good race picking up eighth place. Teammate Michael Vella finished tenth.

Rumery commented, "the team ran respectably, although it seemed like we were rusty, having not raced in two weeks. Regardless, everyone pretty much stayed in the race and battled to the end."

"It was disappointing that we lost to Bucknell by such a small margin," freshman Ryan Conrad said. Conrad also ran well, finishing fifteenth overall.

The Juniata team members will gain a better idea of their competition for MAC's at the La Salle meet next week where they will race many schools in Juniata's division.

"Penn State Altoona was a 'tune up' for the La Salle Invitational next week, where we can take out our frustrations" Rumery said.

After the La Salle meet, the JCXC team runs one more race at the Carnegie Mellon Invitational in Pittsburgh before its only home meet of the season on October 15.

With only a few more weeks until the most important meet of the season, the MAC Championships, this is what the training is all about--running their hearts out for a first place finish.

Men end four game losing streak

Soccer, or Yellow Card Collection Task Force?

Dave Shalkey

Juniata halted a four game losing streak with a 5-2 win over Thiel in the last game of the Penn-State Altoona tournament on Sept. 12.

The game could have been the turning point for the Eagles's season. The injury problem was a thing of the past. They had their first win and had yet to start conference play.

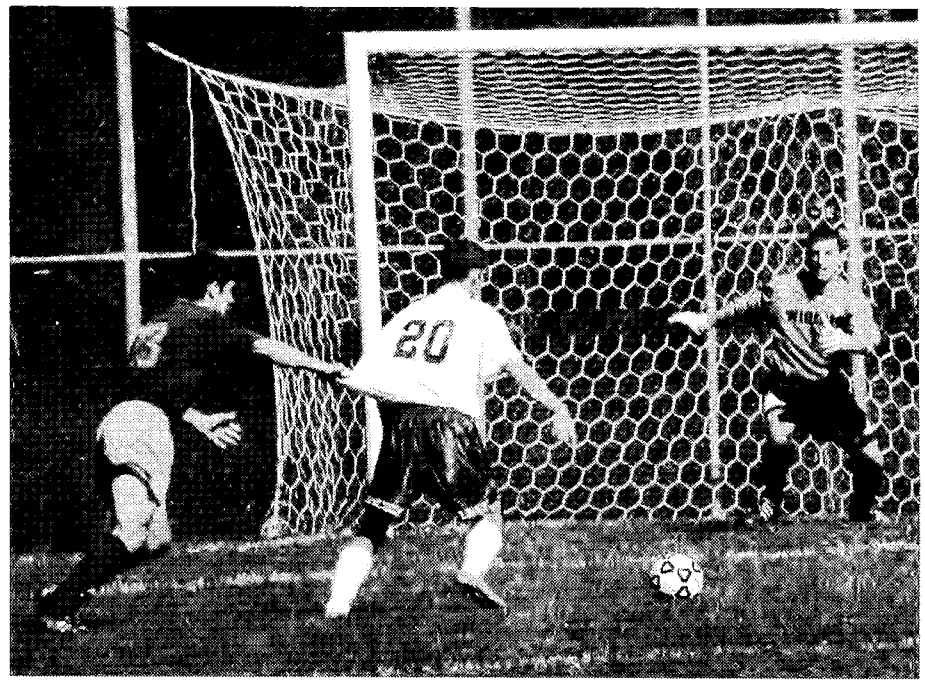
But a new problem has arisen. The team is now missing players because of suspensions.

In three games, starting with the win over Thiel, Juniata has been wracked by a flurry of yellow and red cards.

A yellow card is given to a player when he breaks the rules of the game severely. The first yellow card is a warning. The second card means ejection from the match. A player can earn two yellow cards immediately in the form of a red card. Getting a red card is a big mistake. The team must play with one less player for the rest of the game and that player is suspended for one game.

Ricky McLellan earned a red card against Thiel. "I think I got the card because the ref thought that our whole team was trying to take out the other team's best player. I don't think I should have got a red card for what I did," McLellan said.

Will Spigler was given a yellow card in that game as well.



The next game against Lycoming was like a yellow card free giveaway. Referees handed out 11 yellow cards in the game. Eight went to Juniata. Jeff Gehring and Landon Lose both received two yellow cards and were ejected.

William Spigler received two yellow cards, yet somehow was not ejected. The ref must have had too many names in his book to keep track. Those cards were Spigler's third and fourth of the season.

Josh Cady and Mark Jackson also had one yellow card each.

The match ended in a tie, 1-1. Josh Cady scored the only JC goal.

The Widener game was the first conference game for the Eagles. They had to play without the help of All-Conference forward Jeff Gehring and also without Landon Lose. Mark Jackson received the only yellow card of the game, his fourth for the season. The yellow cards starts to become a problem because after five, a player will be suspended for one game.

Hannah Rauterkus / Juniatian

Referees can see yellow and red cards...but not shirt grabbing? The refs swallowed their whistles on this play where Widener clearly grabs JC's Dave Mease (20) to stop an almost certain game winner. Widener scored soon after to take the win.

Josh Cady scored late in the game to bring the game to a 1-1 tie and send the match to overtime. Widener scored the winning goal early in sudden death.

Juniata blew out Mount Aloysius, 10-2. The Eagles scored seven straight before Mount Aloysius could put one in. Josh Cady had a hat trick. Kyle Dunn scored two. Ricky McLellan, Robert Bowser, Mike Alianiello, Jeff Gehring, and Dave Mease each scored once.

Juniata still managed to grab a yellow card. Will Marshall must have really wanted to get his hands on one. Mount Aloysius was his first game of the season. He was out all year with injury.

Juniata football awaits homecoming

Brit Tew

Headed by coach Darrell Alt, the Juniata football team is currently 0-3. The squad hopes to improve that record against Susquehanna October 2 during homecoming weekend.

In its most recent game, Juniata lost to Delaware Valley, 12-7. Jeffery Hayes scored the only Eagles touchdown on a seven-yard run in the first half. Dan Hineline added the extra point to give Juniata a 7-0 lead.

In the second half, Delaware Valley's David Carmon caught an 18 yard touchdown pass, answering the Eagles' score. Delaware Valley added another 18 yard touchdown reception by Don Marshall to give them the win.

Overall the defense played well, holding the normally high-powered Del Val offense to 271 total yards. Juniata's offense though, couldn't generate much of an attack and gained only 72 yards.

Still reeling from the loss of three-year starting QB, Greg Troutman, the team is working to find its strengths and identity.

Head Coach Alt plans a "shift in program philosophy." The team seeks to improve on defense, special plays and a solid run offense.

According to Coach Alt, the team works to improve their passing and blocking as well as their overall game by working on fundamentals and creating a competitive atmosphere at every practice. The team does a great job pulling for each other, according to Coach Alt. "We are an integrity based program," he said.

According to Alt, the team has greatly improved its run defense from last year. He also stressed the importance of play-

Women's Tennis continues to struggle

Coach sees improvement despite losses

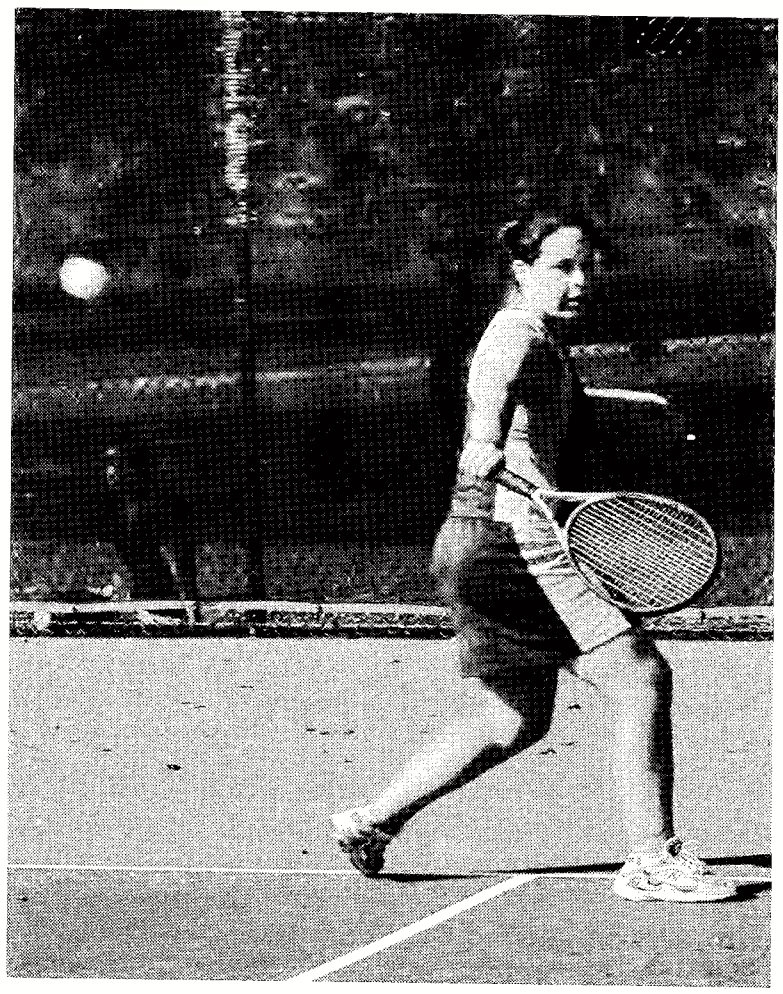
Katie Laucks

The tennis team has not been very successful in recent years. However, with a new coach, the young talent, and a positive outlook on this season, one would hope that everything would be in place for a good year. The team is finding out that patience is a key to the turn-around.

The loss of a few key players not coming out this season has hurt Juniata. Unfortunately, four losses later, things have yet to pick up. But, you have to consider the losses came from "three undefeated MAC powerhouse teams" according to new head coach Bobby Pennington.

"Anytime you lose not only your number one player but two other players in the top five who didn't come out for the team, it will be tough," Pennington said.

The team's spirits are high considering the numerous marks in the loss column. Much of that has to do with the encouragement the players receive from their coach.



"There are winnable matches in the second half of the season," Pennington said. "I continue to tell the girls to play their games and not to get discouraged."

On September 23, the team dropped its match to Elizabethtown. The Eagles were fueled by sophomore Molly Coursey. Coursey fought hard to give Juniata points in both the doubles and singles brackets. Unfortunately, the young Eagle couldn't pull out a win for her team. But, with "productive practices there will be improvement seen very soon," Pennington said.

The team took on Clarion University on September 24 a day after losing the tough match against Elizabethtown. The team once again fought hard to gain points trying to pull out a win. Strong efforts came from Coursey and Megan Carpenter in doubles as well as Anita Desai and Jenny Liu. Still, Juniata dropped the match.

The team heads back to practice with a standing record of 0-6. The Eagles still have time for "productive practices" and to put wins on the board before the season is over.

The women will play two home matches during Homecoming weekend. They face PSU-Altoona on Friday at 3:30 p.m. and Albright on Saturday at noon.

THE RANDOM ELEVEN

Matt Russell

We're feeling happy: My friend recently observed a girl wearing two mood rings, one on each hand... and each was a different color. Maybe take the average?

Return to sender: If the people on campus this weekend look a little too young to be alumni, here's why. The company we contracted to mail invitations for Homecoming sent them all to prospective students! You'd think one of their employees might have said, "Gee, why would we do this?" at some point.

Nate Drenner / Juniatian

Even authorized personnel need a little hint sometimes I guess...

Not cool: The House recently lost its air conditioner to a Residential Life crackdown, I've heard. I'm totally at a loss to justify that one. If it's going to be that strict, the Res. Life staff should all need notes from their doctors to keep AC in their office.

Ultimate toilet humor? (Skip this one if you're eating!) People were actually calling their friends down to see a colossal, anonymous deposit in the first floor women's bathroom in South last week - and taking pictures! The Facilities staff person practically yelped in surprise. I'd usually make a quip about this now, but I'm just speechless.

Diversity flags are back! It's prime campus tour season, and so the national flags have been appearing randomly around campus again. Do we have students from all the countries they represent? No, no... they just look pretty.

Dead giveaway: Now I get to walk around campus and watch people turn the paper upside down to read this. I think that's going to amuse me.

HELP! The Help Desk gives assistance with computing issues, but sometimes, it seems, people think it means 'help' for just about anything. Last week, someone requested help with their air conditioner. Uh, maybe scan for viruses?

And now, Jack Handey: "If you want to be the most popular person in your class, whenever the professor pauses in his lecture, just let out a big snort and say 'How do you figger that!' real loud. Then lean back and sort of smirk."

The pot and the kettle: Following a recent rainstorm, someone on the forums griped, "Now there's a lovely water spot right above the sinks. We shouldn't have to deal with that." Of course I have my complaints, but a discolored ceiling tile? That you need to 'deal' with? Oh, the burden.

Editorial mayhem: I was thinking the other night that maybe I could really confuse everyone if

continued page 17

Student Government

continued from page 5

ing them to work together." This means merging interests.

Having clubs with similar interests mingle – like the outdoorsy groups Laughing Bush, the Caving Club and Rock Climbing Club – will give students the chance to mix and match and create better events that appeal to more people. It's all about coordination.

Outdoors clubs first began to mingle last year at the Outdoor Activities Forum encouraged by Laughing Bush. Club leaders met to discuss activities and sharing resources.

"We just want clubs to work together," Kihm said.

Also new this year, clubs will be asked to redo their websites. "There will be 'Clubs of the Month' featured, a club bio page separate from the mission statement, and even sound bytes," said Youtz.

So is that all that's new from Student Government? No way!

Beginning at Lobsterfest, they began a semester-long book raffle. Students can buy $1 tickets and the chance to take a handout from Juniata's wallet. The student's name drawn from the pot will receive all his or her following semester books for free, paid for by JC.

Even with all its changes, Student Government will provide its same support and help to the JC community.

"Our purpose is not to start new traditions and groups, but to be there to help the existing ones," said Kihm. "We want to help what we have and make it better."

They are open to suggestions from you, the Juniata community. All are welcome to attend the first Senate meeting in the Neff Lecture Hall of von Liebig Center for Science today, Thursday, September 30.

Volleyball

continued from page 13

Game two was another big win for the Eagles as junior Katie Laucks led the team with 11 kills. Juniata won, 30-14.

Eagle sophomores Allie Phillips and Amy Ressler and freshman Aly Pompeani totaled three kills each, helping Juniata win game three, 30-16.

Undoubtedly, the Juniata women's volleyball team meets many teams such as Albright who are no match.

"There is no challenge there," Shatz said. "You have to remain focused and provide your own energy. Those games are good learning experiences."

Most recently, the Eagles defeated both Lebanon Valley and and Richard Stockton, 3-0 and Frostburg State, 3-1.

There seems to be no slowing the momentum these women have built up. The most recent season record stands at 13-2, spoiled only by Wittenberg.

Eagles fans can see the team in action in two upcoming home contests. JC faces Springfield on October 1 and Messiah on October 6.

Dorms: classic Juniatian from 1969

continued from page 11

ing girls after 75 years? This is doubtful.

However, the most dangerous aspect of the entire building is its attic, which, located at the end of the fourth floor of Brumbaugh Hall, is literally a firetrap. Those few girls who got the chance to see this forbidden garret were shocked at its hazardous condition. It is, for the most part, the storage room for all that old dry furniture not in use. Chairs stand on bureaus near an old gramophone and organ, and pictures and picture frames stand against the walls, all in disarray. The floor is littered by broken glass, and a dead pigeon lies in the corner. In the other corner is a pile of dirty, oily rags, and the wires from a single lightbulb are surrounded by a wad of crumpled newspapers.

The question that instantly came to the observers' minds was how Brumbaugh had, up to this point, escaped a fire. Even though the building is expected to be occupied only until January, doesn't the college owe the students the right to live in a safe dorm for those remaining months?

The new dorm will be built to hold 208 students, approximately 75% of which will be women. This means that Brumbaugh and Oneida Halls will no longer be needed. The Administration has not yet decided what will be done with the old dorm. But in its present condition, it would take no trouble at all to have it razed within two hours.

Football waiting

continued from page 14

ing a good defense and thinking as a group.

Evans was named player of the week for the week of the September 20 by the Juniata athletics department. Evans grabbed his first interception of the season and the 13th in his career against Delaware Valley.

The Eagles are looking forward to October 2, when they will be playing their homecoming game against archrival Susquehanna. The two teams play the homecoming game each year for a goal post trophy.

Susquehanna currently holds the trophy.

"We are looking forward to this game; we are going to be ready," Alt said.

He cites it as Juniata's biggest game to date. Susquehanna is currently 2-2 and also lost to Delaware Valley, 46-39.

Freshman wide receiver Luke Ferster feels confident that the team will do well against Susquehanna.

That game kicks off in Knox Stadium at 1:30 p.m.

Return of the Native

Planned statue would commemorate Iroquois nation - and evoke Juniata's former mascot

Nate Drenner
Morgan Sample

Until 1994, Juniata students identified themselves as the Indians. To some this mascot was a tradition that identified Juniata graduates for 70 years.

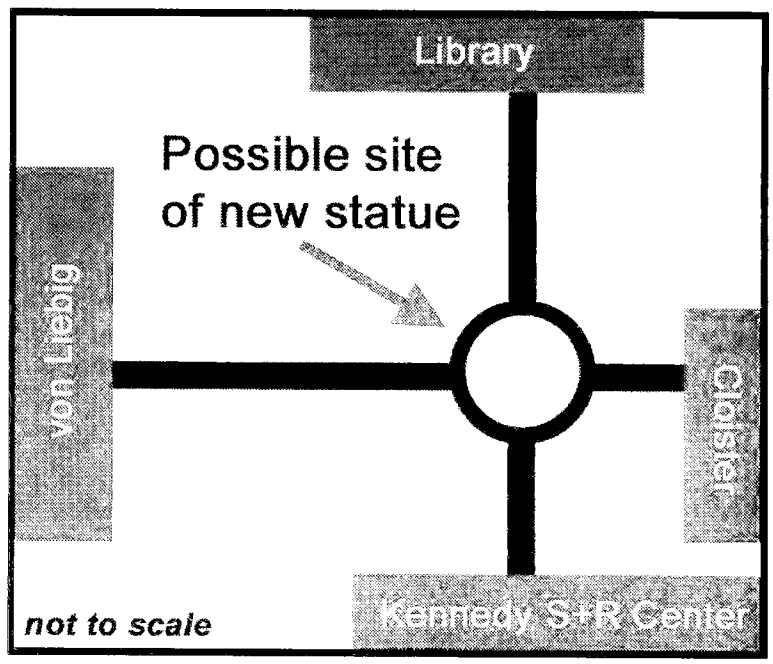
To many the mascot was disrespectful of Native American heritage. Because of that disrespect, Juniatians are now known as the Eagles.

But soon the Indian may return. Today plans are underway to raise an eleven-foot statue in the middle of campus. The statue will depict three Iroquois Native Americans surrounding a white pine tree from which an eagle is lifting off.

First among goals for the statue is a respectful treatment of the Iroquois.

John Hille, vice president for advancement and marketing, has coordinated the project to this point. He stated that the statue will commemorate the joining of the five Iroquois nations. The Iroquois occupied land around Huntingdon before the inception of the town and the College.

According to Chad Herzog, director of alumni relations, "Most of our alumni will appreciate the statue as it recognizes the Indian beyond a 'mascot' and rather for the Native American heritage."



However, Herzog recognized that the classes that graduated before the mascot change will always identify with the Juniata Indian.

In 1994, a 70% majority of faculty voted to remove the Indian mascot. Alumni and then-current students were asked to vote on one of five options for the new mascot.

Herzog said, "Many of our alums were outraged. They did not feel that Juniata needed to drop the Indian [mascot]."

During the mascot changeover, some alumni reduced their support of Juniata's annual fund, and others threatened to stop giving completely.

Student published at twenty

Sarah Wharton

At the age of 9, Rae Walensky wrote a short story.

Sure, it was just a little cutesy tale about talking animals, but it started the ballpoint pen tip rolling.

She fell completely in love with writing. Helped along by encouragement from a fifth grade teacher, she pursued her elementary school passion.

Then she came to college to study psychology and writing.

At the age of nineteen, and right at the beginning of her sophomore year here at Juniata, Rae Walensky decided to pen a novel.

Candice Hersh / Marketing

In September of last year, she began scribbling away in a three hundred page journal. By this past June – only nine short months later – her book, "Terranova," was finished, edited, published, and out for the masses to enjoy.

"It was basically like a pregnancy term," said Walensky about completing the writing and publication process. "It felt like one and was just as painful and just as rewarding."

Walensky published the book independently using the iUniverse company, a self-publisher's dream. Unlike most first-time authors, she bought her own copyright and published print on demand, reducing personal costs.

"I'm a little bit of a control freak when it comes to my work," she said. "The self-publishing process was a better idea. I approved basically everything from the cover to editing."

"Terranova," which means "new earth" in Latin, is an unconventional fantasy novel about the spiritual journeys of the main characters as they try to bring peace to their world and save it from destruction. Their inner conflicts mirrored Walensky's own as she struggled to work out religious beliefs and issues she had as she was writing the book.

"I wrote through a lot of the bigger questions I had, but the book doesn't answer them," Walensky said. "I realized that people have to find the answers on their own."

The initial idea for her book came spontaneously. Ideas rattled around a little, and then, one day while Walensky was running up at the Peace Chapel, she thought, "I have to get this down on paper." So, she began writing non-stop. During the day, she would go to classes, do a little work, and then write until 3:00 or 4:00 a.m.

But because she was getting to

Diversity rising in student body

Under representation continues, though, and some feel misled

Sarah Svigals

According to a report put out in 2000 by the U.S. Census bureau the non-white population was roughly 25 percent of the total. However at Juniata College our current non-white population is a mere 9.1%.

Yet Juniata's rate is similar to many other rural Pennsylvania institutions. Allegheny College is a mere 10% non-white and Lebanon Valley is even less with 4% non-white students.

But Juniata's retention rate is actually improving. The class that entered in 2000 started with 12 students of color and ended its tenure with only four. Last year's entering class had 16 students of color and retained 14 this year. This year's entering class comes in with a record number of 26 students.

According to Rosalie Rodriguez, special assistant to the President for Diversity and Inclusion, "'People of color' refers specifically to ethnic minorities. The term minority is currently coming under scrutiny because it in ways infers that people who are not in the majority are somehow less or sub-par. So 'people of color' is the term that has become very popular for identifying people who are not Caucasian."

Rodriguez, a graduate of Juniata, said that these statistics are not uncommon for what was seen at Juniata in previous years.

"When I entered Juniata College in 1997, there were probably 5 African Americans in my incoming class, and I don't know how many Hispanics," said Rodriguez. "By the end of our four years there was only one African American student and one Hispanic student: me. That was not uncommon for the classes that came after me as well. We would get students in the door, and they would have bad experiences and would leave."

In the past the Juniata administration did not always do enough to reveal the true state of diversity on campus. Some students only truly saw the minority situation after enrolling. Rodriguez said, "Some students felt misled and lied to, even though the staff had never said that there were a lot of minority students. They were never told up front what they would be getting into."

"I didn't feel misled," said current sophomore Tyler Hazui. "But I can see how people might. In middle school I was always the kid they called to do the photos [for diversity] so I was aware that it happened. I think that it's a pretty well-known fact that they use the same people for the photos."

Conversely, sophomore Collin Thompson felt a bit misled. Thompson said, "When I visited and saw all the flags and all the publications I felt there would be more diversity. I was shocked to have learned that there was only something like 12 African Americans last year."

Rodriguez continues to say that at the time the administration was focusing on recruiting minorities from large urban populations who would have a "huge culture shock and much more difficult transition."

Said Hazui, "I come from a small town, though bigger than Huntingdon, so I kind of knew what to expect. My background is multi-racial so I'm not uncomfortable around a lot white kids. There are stereotypes here and people always ask me about Japan, but people will always assume stuff before they talk to you based on what you wear or who you hang out with. Race is no different."

Thompson, who grew up in Altoona, didn't feel a culture shock coming to JC. But he thinks the main reason he actually stays at Juniata in that he made so many friends on his athletic team.

There was also no Office of Diversity a few years ago nor any faculty and staff of minority backgrounds who students could turn to for support.

"There were a lot of people [at that time] who were willing to help, but nobody that students could turn to and say that this is someone who understands my experiences and knows what I'm going through," said Rodriguez.

While numbers are up from the past few years it is far from other small rural colleges nationwide. Grinnell College in Iowa has 1450 students from all 50 states and over 50 countries. Grinnell is also 17% non-white. Oberlin College, though slightly larger with roughly 2,800 students is 28% nonwhite and 90% of their students are out of state.

Rodriguez hypothesizes that perhaps part of Juniata's problem with drawing students is our excellence in science.

"Science is the field where the least number of minority students go into. However, if you look at Juniata's minority students over the last 8 or so years all the students coming in more or less have been science majors,"

Graduate classes at Juniata

Temple offers Masters of Social Work here

Stephanie Shaver

Since the end of August, Temple University has been using Juniata College's facilities to provide a Masters in Social Work graduate program.

According to Provost James Lakso, this program provides two benefits for the Juniata College community and Central Pennsylvania. "This is a degree that a lot of people pursue," said Lakso. Therefore, this can be seen as an opportunity for Juniata College students who would like to pursue a Masters in Social Work (MSW) while remaining in the area.

Secondly, "We live in a part of the world where social work is an important part of the structure," said Lakso. By offering this service to people in the surrounding areas, Juniata College, along with Temple University, is helping to provide community service.

Professor Susan Radis, chair of the Sociology, Anthropology & Social Work Department at Juniata, agreed that this program provides a benefit to people in Central Pennsylvania. "We don't have a whole lot of MSWs [in the surrounding areas]," said Radis. This program will allow "individuals and agencies to improve their education and skills and [in turn] provide better service."

According to Radis, the Juniata-based Temple program provides another benefit to Juniata College students. "If there are journals or library resources that we don't have, Temple would have to provide them," said Radis. Therefore, students may have additional resources at their fingertips.

Juniata students do not have to worry about the MSW graduate students interfering with their use of facilities. Classes for the MSW program are held twice a month on Saturdays. "It is a part-time program [...] I don't think those students would be competing [for the use of facilities]," said Radis.

Some may be wondering if this could be the beginning of a graduate sector at Juniata College. When asked this very question, Lakso said, "We've talked about this. The truth is graduate school is very expensive." Funding is an issue; therefore, Juniata is going to continue to "focus on the undergraduate [sector]."

Radis agreed, stating that, "We are an undergraduate college. I don't think there will ever be a graduate program at Juniata College."

This can be reassuring to some within the Juniata College community. The focus will continue

Election Timeline

Oct. 26: Pennsylvania absentee ballot applications due

Registered Pennsylvania voters can request an absentee ballot by sending a form or signed letter to their local county courthouse. The request must be *received* by 5:00 p.m. For more information, see "How to Vote" at www.votespa.com.

Oct. 27: Mock debate at Juniata College
7:30 p.m., Neff Lecture Hall

Peter Miraldi's Political Communications course is sponsoring a mock debate. Juniata professors Don Braxton (Bush) and Dennis Plane (Kerry) will argue the viewpoints of each campaign.

"It is going to be strictly informative; there will be no 'mud-slinging' involved," said senior Christy Stubler. Stubler is among those organizing the student-run event.

The debate will present the most popular campaign issues from a recent campus poll.

Oct. 29: Absentee ballots due

Completed absentee ballots must be *received* at the local county board of elections by 5:00 p.m.

Nov. 2: Election date

Polls open at 7:00 a.m. and close at 8:00 p.m. Students registered in Huntingdon can vote at Stone Church of the Brethren.

Nov. 5: Juniatian published

Juniatian writers will cover student reactions on the night of the election. The next issue will be published the afternoon of November 5.

Mountain Day at the last minute

Candice Hersh / Marketing

Try as they might, the faculty was unable to overcome the senior class in the annual Mountain Day tug-of-war competition.

Nate Drenner
Carolyn Keller

Early last week, anxious Juniata students debated every night whether or not to do their homework. But by Wednesday evening, there was little question – Mountain Day was literally on the horizon.

Thursday, October 7 was Mountain Day, perhaps the most-beloved Juniata tradition. Organized by the Juniata Activities Board (JAB), classes are spontaneously cancelled one day every fall. The college community is invited to a picnic at a local park. Mountain Day 2004 was held at Greenwood Furnace State Park between Huntingdon and State College.

Part of the traditional Mountain Day fun is simply guessing when it will take place. Indeed, for the past few weeks whispers of Mountain Day have been carried on the ever-cooling fall breeze. October 7 was one of the last days that the event could have been held this semester. With fall break a week away and good weather waning, the Mountain Day countdown was nearing critical.

"I was hoping that it would be on Thursday, but I was still nervous; there's always that 'what if [it's not]," said junior Ashley Hughes.

Others were disappointed by the lack of surprise. "I just wish that we didn't always know exactly when it was going to be," said senior Rebecca Compton.

Stephanie Hodgdon, also a senior, agreed. "They should try to trick people," she said, "It's getting ridiculous. There has to be something they can do to throw people off...everyone knew it was going to be Thursday."

According to Staci Weber, director of student activities, "The calendar usually dictates which day Mountain Day occurs." Mountain Day cannot interfere with other major campus events.

Weber continued, "It would be hard for JAB to know it was going to be a beautiful [weather] day and cancel Mountain Day just because everyone expected it."

Indeed, the weather report of 75 degree temperature and plenty of sun came true. Students even had incentive to get there while the day was young. "I liked the free t-shirts...I thought it was a creative way to get people to come early," said senior Amara Camp.

Senior Chris Brookhart, general manager for WKVR, was the DJ for Mountain Day. "It was fun, a nice day," Brookhart said, "but I knew it was on Thursday because my DJ equipment was removed from the station Wednesday night."

According to Weber, the Matt Nathanson concert, also scheduled by JAB for the night of October 7, was another major factor in the Mountain Day decision. The two events complemented each other. (See related article, page 10).

The day had the typical Mountain Day flavor. Sodexho provided a picnic lunch, and students relaxed by the lake. The always-anticipated senior class vs. faculty tug-of-war and flag football contests drew spectators, and the seniors dominated the day. They easily defeated the faculty in tug-of-war before avenging the seniors' loss in the football game last year.

"It's not every day you get to drag faculty several feet with a

continued page 5

Roving Reporter

Many students and faculty knew that Mountain Day would happen on Thursday, October 7. What effect do you think that had on the event?

"I still had a great time and I thought it was a lot of fun...it was in a great location."
Meredith Killian, senior

"I think it was funny, great and a nice time outside the classrooms and a good time with the professors."
Jocelyn Garibay-Sobreya, international student

"Everyone was burnt out by then and it was just a needed break, so everyone pretty much stopped working on Wednesday night...[the rumor getting out] was a good thing."
Brent Calaway, sophomore

"They waited so long this year that everyone suspected it...but it didn't take anything away from it."
Nate Freitag, senior

Student Government activity digest

Corinne Barabas

Tailgating

On October 2 during Homecoming Weekend, faculty, family, friends, alumni, and students came out to Knox Stadium and participated in a Student Government and JAB sponsored tailgating event.

"Tailgating went really well; there was a nice turnout of people," remarked President Carl Kihm.

The foam fingers, bleacher cushions, key chains, and mini footballs that they had for sale were hot items. By the end of the day, everything had sold out.

Freshman Brian Sykes said, "Tailgating was a lot of fun; it was a great opportunity to visit with family and friends and just have a good time. I commend the Student Government and JAB for doing such an exceptional job."

Student Government plans on continuing this new tradition of tailgating at upcoming football, volleyball and rugby games. They also hope to support the spring sports as well. "Next time we will also be selling food," said secretary Kelie Cummins. They decided to hold off on that this time since food was available through Sodexho.

New Shirt Policy

According to Student Government, a new policy banning inappropriate phrases and sexual innuendos on college-affiliated shirts is coming down from the Board of Trustees and the Administration. Student Government did not initiate this new rule.

The Juniatian will investigate the new policy and its rationale for the next issue (Nov. 5). Until the Juniatian can uncover the entire story, students are encouraged to take their concerns and grievances to Student Government, who will then express those sentiments to the Administration.

Steering Committee

Recently elected by their peers, the Freshman Steering Committee is up and running. It is comprised of a group of freshmen dedicated to their class. Ryan Conrad, Shawn Rumery, Shiloe Mokay, Joshua Scacco, and Timothy Gill make up the group.

"We are working very well together and have already met to talk about many issues. We are planning on meeting weekly," said Rumery.

Conrad added, "We are excited to bring about more class pride. Some possible activities and ideas we have considered are a lock-in at Kennedy, a dance, and a class t-shirt. We want everyone to get to know each other better, so we can all make our four years at Juniata both enjoyable and memorable."

Hannah Rauterkus / Juniatian

Student Government officers, Kelie Cummins, Carl Kihm, and Chris Youtz, sold foam fingers and stadium cushions to increase school spirit at Homecoming.

Meetings

At its first meeting held on September 30, the Student Government resolved some important Constitutional details. A debate also occurred as to whether or not JAB and other organizations and clubs should have representation in the Senate. A decision was deferred to their next meeting on October 28, which will be open to students.

Focusing on their overall goal this year of becoming more involved in spreading Juniata pride and class spirit, Student Government is working to get everyone on campus to have a "pride pin."

Holding meetings every Tuesday night at nine, the officers want to represent the students and encourage everyone to bring their problems to them. "Bring your complaints and voice your opinions to us," said Cummins, "that's what we're here for, to serve you."

Diversity rising in the student body, but underrepresentation continues

continued from page 2

said Rodriguez. "Other schools would probably kill to have our numbers of students in terms of sciences, but the problem is that we don't have them in many other areas."

This is not to say that students don't end up in fields outside the sciences, but these students originally enrolled for biology, chemistry, or another science field.

Freshman Tiffany Fortson is one of the students who entered for science.

"I knew coming in the ratio [of diverse students] but I came for the academics. The sciences here are great and I want to be an OB in the future and this is the place to do that." Fortson, who is originally from New York City, continued, "It hasn't been hard to adjust because I adjust to people really easily and enjoy meeting new and different people anyways. I deal with people of all different backgrounds in New York City and these are just another type of different people."

Rodriguez said, "As Juniata becomes more well known in the social science arena, we will probably broaden our prospectives for students of color [...] Oberlin is a much bigger name than Juniata; if you say 'Oberlin' in California they know who you're talking about."

Juniata is trying to draw students of color into the applying in a variety of ways; starting with some summer programs.

These programs would bring prospective students to campus and increase our notoriety. The problem with the programs though, according to Rodriguez, is the high cost of running them. Juniata is currently seeking funding to continue them.

One of the new programs that is being implemented this year is Think Evolve Act Mentoring (TEAM).

"While this program is not focused on the sciences," explains Rodriguez, "it is more of a one on one peer mentoring program. Throughout their four years Juniata students would visit [high school students] and they would visit Juniata. Also during the summer they would be invited to Juniata to participate in a number of the camps we offer here. Even if they don't come [to Juniata in the end] at least our name will be out."

Managing mid-term stress

Mike Chirdon

Stress is a natural reaction to pressure or challenging situations. It is a heightened sense of awareness that allows the body to react quickly and function at its highest level. In other words, stress is not always a bad thing. People often thrive under moderate amounts of stress in certain situations. For example, athletes thrive under stress during competition.

However, when the body is under stress for extended periods of time, there are many negative side effects. Irritability, sleeplessness, neck and back pain, headaches, and indigestion are some of the body's more common reactions to prolonged stress.

With midterms and finals fast approaching, these symptoms are about to become more common at Juniata and campuses all around the world. It is important to remember that it is possible to manage stress and limit its negative effects.

First, it is important to remember to get enough rest. Most doctors agree that around eight hours of sleep per night is sufficient. Getting enough sleep, and the right kind of sleep, helps you concentrate, stay focused, and adds to emotional well-being. REM (rapid eye movement) sleep is the most important part of the sleep cycle. A sleep cycle lasts ninety minutes, and REM sleep occurs at the end. Eight hours of sleep per night ensures that you get three full REM cycles. This ensures that the body has enough time for cell growth and repair and for fighting off infection.

Exercising is another way to reduce stress. Cardiovascular exercise, such as running, walking, swimming or biking, is the best form of exercise to reduce stress. Thirty to forty minutes of exercise, three to four times a week is ideal.

Healthy eating is important to overall health, and to stress management. Knowing what to eat and what not to eat is crucial. Well-balanced meals include whole grains, fruits and vegetables. Things to limit or avoid include alcohol, caffeine and refined sugars. These substances can aggravate anxiety, sleeplessness and nerves. Refined sugars can cause blood sugar levels to spike and bottom out, adding stress to the body.

Mixing work and play can also be beneficial. Taking breaks during long study sessions can help release tension. For every hour spent studying, it is not unreasonable to spend ten to fifteen minutes taking a break.

There are several simple relaxation techniques that can be used in the middle of studying. The first one is to clear the mind and take several deep breaths. Another technique is to flex your muscles groups (for example, your shoulders) for five to ten seconds, and then relax them. The simplest technique is to daydream or meditate for a few moments. This will ensure that time spent on studying is quality time, and that the information being studied is being absorbed.

Stress tends to build up over time. If it becomes a problem, it is best to deal with it right away. If stress is interfering with everyday functioning by causing appetite loss, exhaustion, depression or heart palpitations, it has become a serious problem.

The Health and Wellness Center (located at 1622 Moore Street) provides Juniata students with ten free counseling sessions per year. Students can take advantage of them if they notice that any combinations of the symptoms are becoming a daily occurrence. All services are confidential and are not included on student records.

Student published at twenty - goes through independent publisher

continued from page 1

sleep so late, dragging herself out of bed in the mornings for class became a real problem.

"I just stopped going to class," Walensky said, laughing. "I got into a little trouble with QM, and my GPA dropped."

But she couldn't change her manic writing schedule.

"The story unfolded as I kept writing," she said. "Words would just spill on the page . . . They *vomited* on the page."

And then in April, it was finished – her first book completed by the age of twenty. The next step, publishing, didn't come as naturally as birthing her book.

"The publication process was terrifying," said Walensky. "The editor would send me literally twenty pages of changes to make."

Walensky also chose to use a pseudonym.

"I'm a pretty private person and really didn't want to be identified," she said. Plus, she wanted emphasis placed on the book and not on her, the author. And so, the penname Raleigh Sky was born.

But attaching a penname to her book backfired. According to Walensky, Juniata's marketing department pressured her to reveal her identity by saying that "Raleigh Sky" was not registered here as a student. And so her pseudonym became a synonym.

In spite of the few complications, though, Rae Walensky is now a published author (go ahead, look up "Terranova" on Amazon.com and other online bookstores, or buy it at the bookstore in Ellis). She completed a 230-page book while many JC students her age are still trying to cope with writing ten-page essays for CA and juggling the rest of college life.

"It's been so surreal," Walensky said of her experience. "It's almost like – 'where do I go from here?'"

Part of where Walensky plans to go is back to class – regularly – so that she can become a family counselor. She also intends to keep writing, but is going to try to branch out from the fantasy genre.

"Most people write about what they know," she said. "I romanticized and fictionalized a lot of my life. It's easy to break a lot of rules in fantasy-writing."

But now the shock waves resulting from the labor of her first book are quieting down some. And Walensky has come out of the delivery room a stronger, more confident woman.

"I feel safer in my own skin because I've proven to myself I can do this," Walensky said. "I accomplished something I didn't think I was going to. [...] This was my dream, and now my dream is real."

Mountain Day

continued from page 3

rope," senior Nate Freitag said.

The oldest Juniata tradition, Mountain Day commemorates an evacuation of Huntingdon in the late 1800s due to an epidemic. Several Juniata students took refuge in the surrounding mountains until the threat dissipated.

Corrections

The Juniatian regrets two misprints in the September 30 issue:

Voting away from home, page one: The Juniatian incorrectly reported the deadline for absentee ballot applications. Absentee ballots must be requested by October 26 in Pennsylvania. The voter registration deadline was October 4.

Oller Hall renovations, page eight: Music Department offices will remain in Swigart Hall, but theatre offices will move from Quinter House to the new Halbritter Center.

Don't discount the undecided

Emily Eller

Pennsylvania registration is over and registration drives are winding down nationwide. Political activists are switching gears and beginning the campaign process. It's game time.

Right here on campus, politically active students are forming clubs for their candidates. On the left is "Students for Change" while on the right stands "True Patriots." But for the undecided voters, the choice is hardly easy, and they are hardly spectators.

Many undecided voters feel ignored and are surprised to hear that there are Kerry and Bush clubs on campus. "I haven't heard of Students for Change," said junior Jim Serfass when asked what political groups could do to reach out to swing voters. "So, that'd be a good start. If they want to contact swing voters they just need to make themselves more visible."

But visibility isn't the only problem. Many students, especially conservative students, are sometimes hesitant to express their political views on campus and in the classroom, but it's also difficult for those who don't know where to start. Few recognize how daunted the undecided voters feel.

"Around here I think there aren't too many [undecided voters]" said Serfass at first. Then he reconsidered, "I think there are more who don't want to admit it."

The sheer wealth and complexity of the issues can drive people away. "I think that people are intimidated by politics and [that it is] something that politicians do, professors too," said sophomore Ben Waxman, president of Students for Change. He feels that people are intentionally kept out of the political system. "People think that you need to know everything about everything to have an opinion and that's just not true."

The quantity of information isn't the only problem for undecided voters—quality matters too. While they appreciate that political groups provide information, they also feel somewhat trapped by the inherent bias.

"Sometimes they quote the same statistics but draw different conclusions," said senior Amara Camp. "You can make [statistics] say anything you want them to say."

Intimidation by information is a real problem for those still making up their minds. Undecided voters may feel somewhat attacked or coerced by students who are clear on their political positions, when they themselves are not.

"There are definitely some pro-Kerry students that think if you're not pro-Kerry that you're stupid, behind the times, or not progressive," Camp said.

Liberal students understand that they sometimes come across as a little overbearing. "From a certain perspective I can see why students feel liberals are in-your-face," said J.P. Melle, a sophomore member of Students for Change. "If I didn't care about issues then I can see how you might get annoyed always being told about issues and what to think. But I think a lot of students appreciate it. They want the information but don't have the time to find it."

But the quest to find the right candidate is not always as complicated as it may seem. For some students, finding a political home is a very simple process. Some just know where they stand. Their political leanings are a part of their identity.

"If I were a Bush supporter, I'd be a different person," said Melle.

Others may find a political party by default if they are not welcome in one party or another. "Plain and simple, if you're a homosexual you don't join the Republican Party," said Steve Rensi, president of True Patriots.

And differences do not always breed the hostility that so often permeates political campaigns.Though their personal viewpoints may divide them, political club leaders expressed the utmost respect for one another. In separate interviews, Waxman and Rensi were clear that they disagreed on political matters. Yet they also expressed feelings bordering on camaraderie for one another, because they do fight for a common cause: getting students to make their voices heard.

"I don't agree with them," said Waxman. "I don't want people to vote for Bush but [political diversity on campus] helps break through the apathy."

Yet the so-called apathetic may simply be undecided. For them, these two political clubs are sources of information on each party's stance. The candidates themselves will also be news staples from now through November 2.

Kerry: Practical solutions

Mike Chirdon

John Kerry believes that the government has a responsibility to its citizens. It needs to provide people with the resources they need to receive the proper education in elementary school throughout higher education.

In recent years, funding for the No Child Left Behind Act has fallen short of its promised levels by twenty-seven billion dollars. The same, rigid standards that seem to ensure failure are being enforced. This pattern simply cannot continue.

The first order of business is to ensure that adequate funds are available for education. Currently, funds for education are allocated at the discretion of the Congress. Kerry plans to establish the National Education Trust Fund which will set aside mandatory funds for educational purposes. Kerry hopes to add an average of ten billion dollars a year to the trust fund. It will be used to hire more teachers to lower class sizes, create more preschool opportunities and to create after school programs.

Kerry is convinced that the No Child Left Behind Act can work for schools. Schools should be held to a high standard, but not an impossible one.

Good teachers are an important part of what makes good schools. Yet, in Kerry's opinion, they are not treated like professionals. He plans to offer teachers better training, better salaries and more opportunities for career development. In return, he expects teachers to do their jobs well. He expects them to push for student achievement. If they do not perform their jobs well, there will be fast and fair methods to remove them from the classroom.

Today, students are split into categories such as blacks, Asians, whites and students with disabilities. Not only must schools meet an overall standard, but each of those categories must also meet a standard. That means if there are only three students in a category, and they do poorly on the standardized test, the whole school is labeled as a failing school. It will continue to be labeled as such until it can show improvement over two straight years.

Beyond high school, Kerry is also committed to making sure No Child Left Behind works for schools and students alike. One way to do this is to make sure the standardized test accurately reflect a student's ability level. This would require a variety of testing procedures to be implemented, instead of constantly relying on fill-in-the-bubble forms.

Kerry is dedicated to making sure all students who work hard can afford a college education. First of all, he plans to simplify the financial aid application process. The current application for a five thousand dollar student loan has more questions on

continued page 7

Bush: Education for everyone

Richard Pulliam

Education is an important issue this election season that may be the swing factor for many undecided—and already decided—voters.

President Bush is focusing on expanding and improving education programs not only for current students, but also for teachers, upcoming students and even graduates.

One product of this focus is the No Child Left Behind Act. Bush implemented this act to make sure our schools would improve by holding them accountable for the success of their students.

Targeted schools have already shown gains in reading and math. If Bush is re-elected president, he will use this act to make sure that every student is skilled in reading and math by 2014.

President Bush will continue to fund research to develop programs to teach children literacy and math skills at an early age. Strengthening programs such as Reach Out and Read, Healthy Smart/Grow Smart and Head Start will accomplish this, and Bush is committed to doing so. He will also make funding these types of pre-kindergarten and children services programs a priority.

Bush will also improve the National Assessment of Educational Progress. Over $250 million will be provided to states annually in order to improve high school assessments. This funding will be used by the states to help design and administer two tests, and for the first time, graduating high school seniors will be included in the process.

Bush will also increase student financial aid. This will not only help more students pay for college, but it will also increase the number of students who enroll in college by making it more affordable. When meeting the requirements by the State Scholar programs, low income students will be able to receive up to $1,000 in additional Pell Grant funding beyond the current limit. Many other grants Bush will support include AmeriCorps Education Awards, for members of the AmeriCorps, in the hopes that this will encourage acts of service. Bush will also create an increase in student loans for first year students.

The president believes that workers as well as students, need educational opportunities to stay competitive. To do this the President will annually invest $25 million for community based job training grants. He will also eliminate restrictions that prevent adult or part time students from receiving federal student aid.

George W. Bush's ideas of strengthening all education from pre-kindergarten to post-secondary education are real and straightforward. By elaborating on

Apathy is Lethal: The IMF and Neo-Colonialism

Mary Gardiner

"Hunger is actually the worst weapon of mass destruction. It claims millions of victims each year," said the Brazilian president, Luiz Inacio Lula de Silva.

Here at Juniata, we live on approximately $130 a day. That's just food, education and housing. That doesn't count the costs of car expenses, buying clothing, moviegoing, or eating out.

But half of the world—2.8 billion people—lives on *less than $2 a day*.

Poverty is much more substantial than we give it credit for, and it's growing. It's a monster of incredible proportions, and it's even been called a "threat to world peace" by the African and Asian leaders at the most recent World Bank meeting.

As Americans, we are cut off from the reality of the world's rampant poverty and by what we do to exacerbate the problem. We criticize America's history of slavery and pseudo-colonialism, but we overlook the exploitation we take part in everyday.

In 1944, at a conference in New Hampshire, two financial organizations were created, the World Bank and the International Monetary Fund (IMF). These establishments were meant to stop exploitation and stabilize economies and democracies. The logic is, of course, that where there is financial stability, democracy will thrive.

But in the 1980's, after the drop off of prices of goods like cocoa and coffee, the economies of poor countries plummeted. Most of them were poorly managed by their governments and recklessly borrowed money from the World Bank. They ended up acquiring debts of millions and billions of dollars.

Today, those countries still carry that debt. They continue to borrow, pouring salt in the wound, as they try to set up more stable and democratic governments. Instead of aiding in the process, the IMF and World Bank have incurred heavy burdens on the nations that need the most help.

The statistics are incredible. On average, for every $1 a country borrows, they pay back $13. Mexico has paid the principle on its loan more than ten times over, but they are still paying interest today.

How can we do this to countries that already struggle with poor economies, preventable diseases, and immense hunger? You'd think that our benevolent America would do better than that.

Think again. The U.S. Treasury Department calculates that for every $1 the U.S. contributes to banks like the World Bank and the IMF, they win $2 in repayment and exports. And the US, which donates 17% of the funds, (to an organization where the system is "one dollar, one vote") determines how much is spent where. And if it's in our interest to exploit, we'll do it.

Even the World Bank itself admits its failure. In 1992, a review found that more than a third of all of World Bank loans fell short of helping to achieve international development.

But worst of all are the conditionalities that the World Bank and IMF require of their borrowers. They institute structural adjustment policies (SAPs) to guarantee debt repayment.

These SAPs require countries to cut spending on education, health, and food and transportation subsidies. These policies ensure dependence on Western exports and prevent borrowers from building stable domestic economies.

Under the SAPs of the IMF in 1995, for instance, the number of Mexicans living in poverty increased by more than 50% and the minimum wage fell 20%. By the end of 1997, the SAPs imposed upon Haiti made the Haitian minimum wage fall to only $2.40 *per day*.

This exploitation is rarely heard of, much less talked about by the American public. It is a modern day colonialism. It's time we stopped kidding ourselves, and took action.

So what can you do? Find more resources about the World Bank & IMF at the Juniatian website. Inform yourself and others. And don't forget to write letters. Check out the website for a link to e-mail the World Bank Group.

You can also join the *50 Years is Enough* network, on a link from the Juniata website. You can't imagine what half an hour of your time can do for other people around the world.

Kerry: Practical

continued from page 6

it than the application for a two million dollar small business loan. Kerry plans to simplify this process by making the application form no larger than a postcard, and he plans to start to process sooner.

He also plans to create a College Opportunity Tax Credit. Families and students who are having trouble affording tuition will be eligible for up to four thousand dollars of tax credit for four years of tuition. The last part of Kerry's plan is to offer national service opportunities that will allow people to work in schools, heath centers or in the military for two years to pay for their college education.

Kerry will make sure his educational programs are fair and properly funded, that there are good teachers in every classroom, and that everyone who is willing to work hard is able to go to college.

Bush: Everyone

continued from page 6

educational programs and systems, we as a nation can expect a higher standard in our children and our own education if Bush wins in November.

Did something in the Juniatian pages pique your interest? Agree? Disagree? Think something was missed? Write a letter to the editor! We invite students, faculty, and alumni to write on any issue of concern to the Juniata community. Free exchange and thought are important parts of a liberal arts education. Due to available space, we ask for letters to be limited to 300 words. Send your letter to juniatian@juniata.edu.

Opinions expressed in the commentary pages are not necessarily those of the Juniatian staff.

Presidential perspective

Q&A with President Kepple

"Why do we schedule Homecoming and Parents' Weekend at the same time? Is there any truth to the rumor that the concurrent scheduling of Parents' Weekend is to curb student drinking during Homecoming?"

Actually, we have only been combining the two for a relatively short period of time - three years. The first impetus for combining the two was the dedication of the von Liebig Center for Science - wanting everyone to partake in the celebration of this impressive new addition to our campus. The weekend was a huge success, and we quickly recognized the benefits of consolidating resources (student activities and alumni affairs) to provide a first-rate event - Friday night live, homecoming parade, all-college picnic, tailgate parties, lots of home athletic events, artist series event, campus ministries coffeehouse, etc. JAB and the Alumni Office agree that it serves both events well and we have continued the practice.

You may also want to note that selecting dates for Family Weekend and Reunion gets additionally complicated by the PSU home football schedule. Hotels and motels in Huntingdon are all booked (well in advance) for PSU home games. We like to have our own home football game for Family Weekend and Reunion Weekend - having two separate occasions that don't conflict with PSU home games and don't overlap with fall break is difficult to schedule.

As far as I can determine, there is absolutely NO CORRELATION between Family Weekend and "curbing" student drinking.

"A student recently observed a facilities worker asked by his supervisor to remove a pin supporting a presidential candidate because 'it isn't part of the uniform.' What is the college policy on public political support? Does Juniata have the right to keep its members or its employees from publicly displaying their political affiliations or support?"

The College does have non-solicitation policies that prohibit employees from using College time or facilities for personal or non College-related purposes. Much as we have the right to require an employee to wear a uniform, we also have the right to determine the appearance of that uniform and/or enforce a dress code.

However, the incident cited below was the result of a misunderstanding. Once it came to Tristan DelGiudice's attention (he is the Director of Facilities Services), he quickly addressed the issue, and in this case the employee was allowed to continue wearing the political button on his cap.

LETTER TO THE EDITOR

Responses to sexual diversity article

I would like to make a couple of statements regarding the article on sexual diversity at Juniata. First a correction, Plexus orientation was not an orientation for students of color it was open to all incoming freshman who had concerns about diversity and was advertised in the summer newsletter that went to all freshman. Specific letters were sent to ethnic and religious minorities who identified themselves on the application. There is no box for LGBT and I hardly think it would be appropriate to have one.

Most high school students who are Gay and Lesbian are not likely to disclose the information even if it was appropriate to ask them. The fact is that high school is an especially trying time for LGBTQ students and very few are comfortable enough in their sexual orientation to share it with a college admission counselor. However, I assure you when a student is comfortable and asks about LGBT services we certainly do go into depth about what the community has to offer. Also, in general sessions whenever diversity is discussed LGBT groups and activities are always included. In fact, AWOL has been one of the most active organizations for enrollment events. Also if you take a look at the Multicultural enrollment brochure you will see that LGBT events and organizations get just as much space as the others.

The office of diversity and Inclusion is committed to supporting diversity in all its forms not just ethnic minorities, but LGBT, religious, physically handicapped and non-traditional student issues. If one has ever visited the office or its events this would be quite clear.

Secondly, the only reason the college has stats on ethnic minorities is because the government requires us to report them. Until the Office of Diversity opened we did not track numbers of religious minorities either. Religion is now the easiest to get info on because it is on the application for admission. However, a majority of students do not fill it in so our stats are horribly inaccurate and skewed.

There is no formalized effort to attract more LGBTQ students, yes this is true. However, the same is true for non-Christian, non-traditional and physically disabled students. Simply put there is not a venue for this type of recruitment. There are hundreds of organizations out there making efforts to get students of color into colleges. This makes admission professional's jobs much easier and simply put people of color are generally easier to identify. I don't think you are insinuating that we begin to ask every student if they are Gay or Lesbian. If anyone does know of college fairs that target LGBTQ high school students I would welcome the opportunity for Juniata to recruit at them as well.

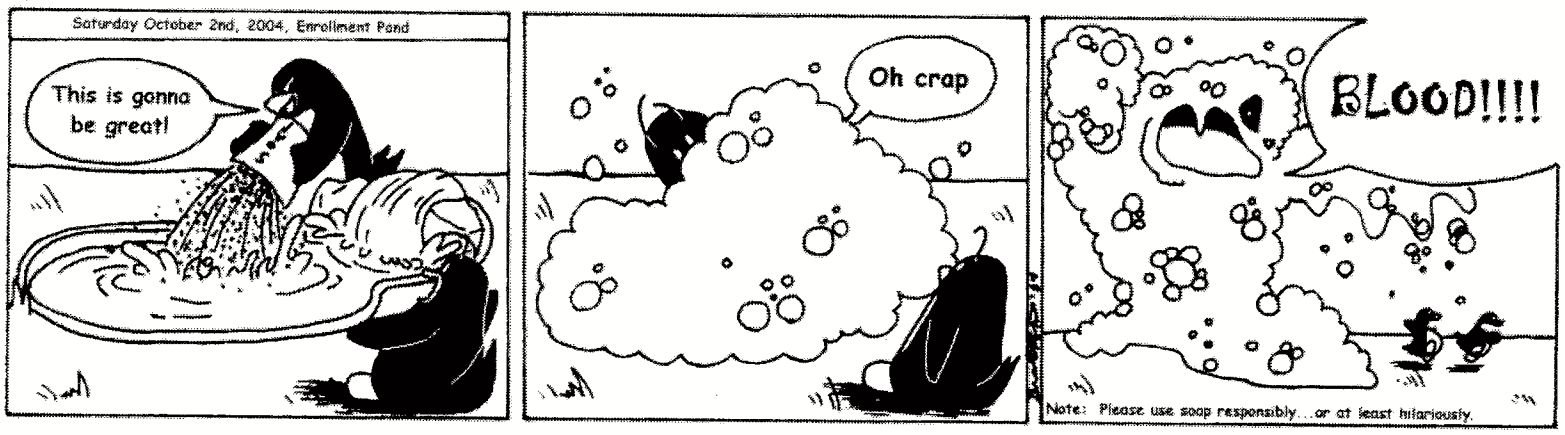
I am well aware of the amount of work that needs to be done in relation to diversity on this campus. We are no where near where we can be yet I fee this article horribly underplays the years of efforts from people like Grace Fala, Dan Cook-Huffman and Cy Merriwether-deVries, who have worked tirelessly for years to make sure that the needs of LGBT students are heard and met. I am sorry but this article does a terrible injustice to our local civil rights leaders. I would hope you could recognize the progress Juniata has made, under the auspices of these individuals.

Ps. For the record I was never contacted to be interviewed for this article, so I am not sure how one can say I was unavailable for comment. [sic]

Rosalie Rodriguez
Special Assistant to the President for Diversity & Inclusion

Ms. Rodriguez was out of the office during the article's production time; therefore, she was unavailable for comment. The Administration was represented by Enrollment staff and a question in the Presidential Perspectives column.

It is well known that there are spaces for ethic and religious minorities to identify themselves on admission applications. Why, then, is it inappropriate to have a space for potential students to *optionally* identify themselves as gay, lesbian, questioning, etc.? It is great for admissions staff to be open for discussion if a student initiates it. But perhaps there are ways to *invite* that discussion as well, despite whatever trends exist in college recruitment.



Thanks to the efforts of faculty, administration, and students, *acceptance* and *awareness* for many types of diversity has grown considerably – an achievement that no one should overlook. However, members of AWOL were asked for input and quoted in the article. According to them, there is no real community for gay students at Juniata or opportunities to have the same kind of social life that straight students do.

It is also not clear that Diversity & Inclusion is committed to *all* types of diversity, as Ms. Rodriguez states. In searching through the online calendar for events sponsored by D&I or UCJC since fall 2003, they are overwhelmingly about ethnic diversity. The only one that was not was the Eid Dinner, which is religious. AWOL isn't even listed on the D&I website as a resource.

The fact is that the student body itself remains almost completely straight and white. The Juniatian stands by its original report.

Mr. Juniata '04 packs Oller

Jeremy Simmons

On Friday October 8 Oller Hall again opened its doors to host one of campus's favorite traditions: the Mr. Juniata pageant. The best of the best JC men gathered for one night to compete for the coveted title of Mr. Juniata.

This year's contestants consisted of three members of each class. Oller Hall was packed to standing room only, and the crowd was ready for an unforgettable night.

Juniata vocal group, Those Guys, opened the show with a stunning display of vocal talent to usher in the show's comical co-hosts Coach Scott McKenzie and Professor Amy Mathur.

Next came the moment every one was waiting for: the famous Mr. Juniata opening dance. The crowd went wild as the guys broke it down both on stage and in the aisles.

The talent portion was next, and each performance strived to top the next. Michael Meadows who would have made Marvin Gaye proud with his rendition of 'Lets Get It On.' In one of the night's best unscripted moments MC Mathur took his song seriously and danced her way across the stage and "grooved" Meadows to screaming cheers of jealous ladies through the room.

The next act was memorable for a different reason: it had everyone's stomach turning. Jared Goss convinced Rebecca Shoaf to come on stage and drink shots of blended earthworms, anchovies, strawberry milk, and Holstein testicles.

John Hoey wowed the crowd as he and girlfriend, Sylvia, performed a swing dance routine with plenty of fancy footwork.

Dave Bullock brought laughter with the famous "cowbell skit" from Saturday Night Live. Dave admitted he had a great time doing his skit, saying "we all lived it up. Good times."

Brandon Long brought down the house with what started out as a piano solo of "Twinkle Twinkle Little Star." The solo turned into "Senorita" by Justin Timberlake, with a full band accompaniment which received a standing ovation.

Singing, dancing and comedy routines from Paul Kozick, Paul Dunklebarger, Justin Schultz, Jeremy Weeden, Kevin Kasun, Brad Kissell and Matt Adair rounded out the night.

The contestants then came out in their formal attire to meet with their escorts. The men impressed in their tuxedos. Their escorts brought oohs from the crowd. But Matt Adair's escort made the crowd of over 600 go wild. As Adair strutted on stage, he carried a mysterious "lady" on his arm. But just as MC Mathur made a comical reference to a certain Aerosmith song, the spectators erupted as they realized that dude really was a lady. Adair's buxom blonde was none other than Juniata President, Tom Kepple, dressed in full, barefoot and pregnant drag.

When asked about the romantic encounter, Adair said, "I had a lot of fun and I was very happy to be able to help the Make a Wish program."

The judges narrowed the contestants down the final five, and each contestant was asked a question before the final decision.

In the end Michael Meadows was crowned Mr. Juniata. Jon Hoey was named first runner-up and Brandon Long won second runner up.

"I had no idea I was going to win, I thought it was going to be Brandon," said Meadows. When asked how it felt to be in Mr. Juniata two years running, he replied, "I felt that the guys this year were more tightly knit and we all had a lot of fun."

All around campus students called Mr. Juniata was a huge success.

Senior Jon Oris proclaimed the show, "the bomb diggity" and also said, "it was the best Mr. Juniata I have seen since I have been here."

Freshman Jenna Weigher said, "The show was a lot of fun and I'm definitely going to go again next year."

Charlie Foster / Alfarata

2004's Mr. Juniata, Michael Meadows, was the most popular dance partner of the evening.

Circle K ran the show and all the proceeds will go to the Make a Wish foundation. The show sold out 600 seats to bring in at least $2400 which more than covers the cost of an average wish ($2000).

The Pageant has made at least $2000 for the last 5 years in a row and Circle K hopes to be able to keep on granting wishes in the future.

No one can say that this year's Mr. Juniata was not a huge success, and next year's contestants have some serious work to do if they plan to top this year's show.

Gravity Project adds weight to Juniata theatre

Maria Piazza

An amazing opportunity for both current theater students and the Juniata community exists with the creation of a new theatre group, called Gravity Project. This company is separate from Juniata College, but will work with the college to strengthen its theatre arts program.

Gravity Project will be a professional theatre group housed on campus that presents classic works as well as pieces designed by JC theatre students and the theatre group itself.

This project will lead to a curriculum that combines the liberal arts and conservatory approaches for those interested in working with the theatre.

The Gravity Project group will bring their performances to different places around the world...and of course to Huntingdon. This project will give several performances in the new Halbritter Arts Center, marking Juniata in the community's eyes as more than just a science school.

The members of this group will each teach intensive two or three week long sessions, on each of their specialties, to up-and-coming theatre students. The members will range from vocal magician Catherine Fitzmaurice, and man of improvisation K.J. Holmes, to a recent graduate Raina Miller. This use of renowned professionals in teaching the performing arts will draw students from out of state and out of country.

Staying true to the Juniata spirit, this project is breaking new ground. There are not many small colleges in which a prospective theatre students gain the chance to work and learn with professionals like they will be able to with the Gravity Project.

The creation of the Gravity Project has led to the formation of two new POEs for next fall, one in performance art, and one in performing arts management. The performing arts managment will work closely with the Gravity Project organizing performances, flights, and schedules of each individual. Those in a performance art POE will be involved in the sessions that the professionals may teach.

Many current theatre students here at Juniata can't wait for the Gravity Project to be fully underway. The chance to work with people they have only heard about or seen act from afar, and the chance to perhaps have their own written pieces performed by professionals, is more than was available to students before.

"I just want the word to get out on the Gravity Project," said senior Paul Blore.

This new project has not yet started publicly performing, but Professor Belser, Chair of the Theatre Department and Head of the Gravity Project, says, "that it will bring in so many new ideas and things to Juniata." If it works, the community can hope to see art festivals and a new assortment of innovative plays.

Professor Belser initiated the project because he feels that the performing arts need to be a vital part of a liberal arts education. With the installation of the Gravity Project, Professor Belser will be able to finally see the results of a project that he has been working to build ever since he arrived at Juniata eight years ago.

Sitting down with Matt Nathanson

Sarah Svigals

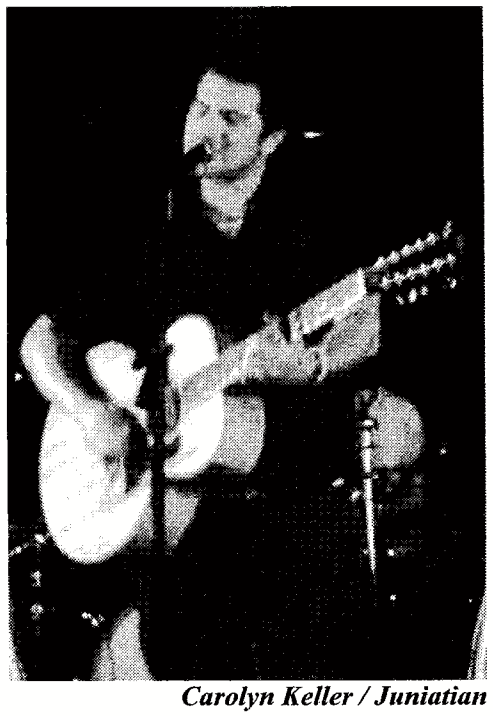
Humble, funny, and as entertaining in person as on stage, Matt Nathanson makes fans and press alike feel honored to share a room with him. Touring the country promoting his new CD "Beneath These Fireworks," Nathanson made a stop in Huntingdon on Oct. 7.

Nathanson chose Huntingdon and other small towns because, "my career and my trajectory are all still very much built on word of mouth. There is no place better to do it than college campuses. College and high school folk are kind of the most passionate and most connected to their gut. They are much more open to receive things."

With no formal training in music, Nathanson has made a name for himself in the music scene with a discography spotted with soundtrack appearances and seven CDs.

"I've always had the need to be the center of attention ever since I was a young kid—surprisingly enough as the youngest child," said Nathanson. "For me music was the most potent form of art; a vehicle for creating stuff. Music always hit me the hardest and the fastest and in the most substantial way."

Like B.B. King, Nathanson cannot read music. "I don't even know what I'm playing or what key my songs are in. I'm very much unschooled, perhaps even to a fault," he said. "I've never taken any kind of lessons." He paused and reconsidered, "Wait. Actually I took guitar lessons back in the day to learn Poison songs."



Early in his musical years Nathanson had the desire to be a heavy metal rocker, but it took the new folk movement to really turn him into the singer/songwriter he is today.

"The thing that really changed my life was the Indigo Girls," said Nathanson, whose first concert was the J. Giles Band and Jon Butcher Axis. "I know that sounds pretty uncool but I'm a huge fan. It was the moment I saw them live and they were playing their acoustic guitars and it connected to me—without drums, without bass."

Another influence on Nathanson's life was that of his teachers at the boarding school he attended. According to Nathanson, "my teachers were like, 'you like music, but you listen to Poison. Why don't you listen to Elvis Costello?'"

His influences drive him when the going gets tough. Touring can be hectic for even the most seasoned musicians and makes writing hard.

"On this tour, I'm trying to be more diligent, sit down and give myself a half an hour to write, but that never works," said Nathanson. "Mostly it's just me at home just hanging out at my kitchen table with my Dat player just playing around for a couple of hours every day. It's hard to get into at first, but then it's just like exercising."

Carolyn Keller / Juniatian

Mountain Day stopped classes, but not the Matt Nathanson concert in Baker.

Nathanson draws his inspiration from almost everything.

"I get inspired if I see something that's amazing and rad whether it is something as cheesy as a great Buffy the Vampire Slayer episode or something great like a Dylan song," said Nathanson. "Like on the way here "Desolation Road" came on the radio and I was just f***ing blown away by it."

In the end Nathanson said, "the key is not to block yourself and to just start writing or playing and keep the inspiration going."

When asked what advice he would give to aspiring musicians he laughed and replied, "Don't listen to anyone. Listen to them enough to guide your

Collegiate dementia

Beware the "Skitchy!"

Carolyn Keller

So I thought I was being funny and original when I told my inquiring friends, "No, thank you, I don't want a boy, I'd just rather buy a dog."

When pressed, I stated the obvious. "Well, it's the same concept," I said, thinking of the two mammals with equal shrewdness. "Boys are a lot of trouble. You have to feed them, clean them, take care of them…Really, why *wouldn't* you just buy a dog? A dog, that's your best friend, and cuddly, and always loyal and there for you, all at the same time?"

They laughed. It was funny enough, it turned out…it just wasn't original.

Imagine my surprise then, while reading the play "The Country Wife" for my Brit Lit class, that William Wycherley beat me to the punch…in 1675.

1675? I thought people were supposed to be all prim and proper back then. When really, they're just as bad as the rest of us!

I send a "Wah-psssssh!" to anyone who longs for a long-ago, simpler time.

Proving that the sexes can be equally, gloriously evil, Wycherley's character Sir Jaspar says, "What, avoid the sweet society of womankind? That sweet, soft, gentle, tame, noble creature, woman, made for man's companion—"

Sir Jaspar's friend Horner replies, "So is that soft, gentle, tame and more noble creature a spaniel, and has all their tricks…And all the difference is, the spaniel's the more faithful animal and fawns but upon one master."

Like…WHOA.

I got nuthin,' folks. I am reduced to the slang of the teenybopper generation.

I know that good writers borrow and great writers steal, but there doesn't seem to be a loophole for the evil writer who accidentally swipes.

Face it, this isn't sexism, cuz-there's no way you're telling me you don't know what I'm talking about. Which is…boys and girls are Skitchy.

My friends abroad, who are currently dealing not only with the prospect of hot foreign boys, but also crazy foreign STALKERS, will confirm this.

Seriously, their stalker could give my Mexico experience with a guy who asked if my friend Tina and I wanted to "go kill a cat" a run for its money. This brings me to wonder all sorts of things, such as what on earth is wrong with people, and if they understand the serial killerishness of their behavior, and also how it is they feel ritual animal slaughter could *possibly* be attractive.

To appease any preoccupied members of the International Office, my friends have also met

continued page 11

Gastronomía mexicana

Jay Trovato

Unless you plan to go on an extended starvation diet while studying abroad, you will need to eat lots of food in your host country. Fear not – chowing down abroad can be one of the most enjoyable aspects of your exchange.

First, you should find out if there are any foods that aren't safe to eat. In Mexico, some fruits and vegetables, especially strawberries and lettuce, have to be eaten with caution. For example, they have salad here, but the lettuce needs to be soaked in an anti-microbial solution for twenty minutes, which adds an unnaturally sweet taste and all but removes its crunchiness. A big, crunchy salad would taste so good right now! I also got at least fifteen warnings about the water in Mexico. But it really isn't a big deal: bottled water, soft drinks, and purified ice have quenched my thirst just fine.

After you know what's safe, try all the unfamiliar food you possibly can, no matter how weird it sounds. I've had everything from tortillas and beans to *huitlacoche* (black corncob fungus) and toasted grasshoppers, and most of what I've tasted so far has been very good!

There are even ways to avoid your worries and still dine deliciously. One of my biggest fears about coming to Mexico was having to face spicy food. I have absolutely no tolerance for spicy stuff – even the mildest of salsas tempts me to look for a fire extinguisher! Fortunately, hot sauces here are always served on the side, and unpleasant *picante* surprises can be avoided by checking with the waiter before ordering in restaurants.

Don't forget, depending on where you go, the eating schedule might be different than what you're used to in the United States. Here, the main meal is served between 2 and 4 PM, and it's such an important daily event that many businesses close at lunchtime. Breakfast and dinner are light, and desserts are rare.

Inevitably, you will also start craving food from home before too long. It may be available abroad, but don't raise your expectations too high. It might be of inferior quality. I ordered apple pie once in a café – quite a disappointment. Buying U.S. food may also be considerably more expensive. My friends studying in Ecuador have told me that McDonald's hamburgers there cost $3.30 each! In contrast, I can buy five delicious tacos in Xalapa for eighty-one cents.

Another solution to missing home cooking is bringing your favorite recipes along with you. I have made s'mores and chocolate chip cookies for my host family and fellow foreigners to rave reviews...although I screwed up the cookies on my first attempt by mistaking the salt for sugar! ¡*Guácala*!

Be safe, adventurous, and flexible when dining abroad and you could very well be in for the most delicious experience of your life.

Do something Mexican!: When you need a break from Baker, grab some friends, buy fresh ingredients at the store, and make dinner from scratch. Here in Mexico, they buy almost everything fresh, and invest several hours in cooking the main meal. I have never seen any Mexican open a can!

Matt Nathanson - *continued from page 10*

way through. For example, if someone says, 'Don't light your hair on fire' those kind of things are words of wisdom. But if they say in the next breath that this song sucks, you got to get to the root of what you dig. That's the most crucial part of art."

His advice applies to more than just music. "You've got to be able to dial in to what you are about without people's flack getting in the way," he said. "A lot of that stuff can get you off course and make it hard for you to find who you are. It took me a long time to figure out who I am and I still don't know. It's all about closing the door to doubt and being true to what you want."

Nathanson wanted to leave the campus with his own words of wisdom.

"Vote," he said. "Educate yourself on the issues. I think that people need to be aware in this election and they need to be conscious of the issues. Make a real effort to get out, get off their butts and vote."

"I'm down with liberal; I'm down with politically active," he continued. "We're all very much not into Bush, but if someone wants to educate themselves and they read stuff and they dig what Bush is all about and they can really relate to it then go for it. But it can't just be about money or party lines. It's got to be about the issues."

Dedicated, down-to-earth, witty and gracious, Matt Nathanson is a testament to making the most of life by drawing inspiration from the little--yet important—things and doing what he loves.

Collegiate Dementia - *continued from page 10*

"SUPER HOT FRENCH GUY who we can't remember/pronounce the name of." So their world is still more or less intact.

Still, having a good grasp of the Skitchiness Factor is obviously important. It applies to everyone, in every kind of situation.

It's even possible to elect your President by gauging what other people think of his or her Skitchy-Date-Potential: My favorite quote of all comes not from a dear and trusted friend, but from writer Maureen Dowd who says, "George Bush is the guy who in high school reserved a hotel room and asked you to the prom."

I don't know who John Kerry would be, but I'd still take the Democratic basset hound over Bush's constipated monkey look any day of the week. After all, he must have *something* going for him, if Teresa loves him so.

Right?

The moral of the story? Skitchiness is bad, folks, and you should just say NO to it. When in doubt, just listen to my best friends in the world when they say, "If all else fails, get a cat," or "a dog and a horse will often make up for the lack of a man."

You can substitute "woman" if you'd like. After all, it is a timeless theme.

The Bookmarkables

Nate Thompson

Remember the days of your youth when you could get online and surf the Internet freely? You only had to worry about the occasional virus, which only found its way onto your computer if you were stupid enough to help it get there. Those were the days when cookies only damaged your waistline.

Unfortunately, Internet Paradise has long since been lost. Remember those virus writers? While some still write viruses, others have gone commercial, and now get paid to write malware.

Malware is a term used generally for any type of malicious code or software. It includes spyware, adware, and trojan horses that slip past your antivirus software and install plenty of other malware.

These days, it is often not your fault if such malware gets installed. The most ingenious malware now exists in the webpages themselves. Of course, using file-sharing programs never helps the matter. Nor does downloading many add-ins that are out there, like free toolbars.

Recently, I wandered across mozilla.org and Mozilla Firefox. Here, I learned how to both cut back on the chances of malware and take a small stand against Microsoft. Since then, I only use Microsoft Internet Explorer (IE) for Windows Updates.

Forbes recently said that Mozilla Firefox is "better than Internet Explorer by leaps and bounds." I highly agree.

If security is one of your priorities, Firefox is your browser. For starters, most malware is designed specifically for IE, so using a different program helps. On top of this, the security of Mozilla Firefox makes the Windows Service Pack 2 look like the open door that it still is.

Of course, if you are looking for a better surfing experience, Firefox has an even better claim to being your browser. If you type your search query into the browser, it immediately gives you the best search result found by the engine of your choice. The default engine is Google. If you want more than one result, simply type your search into the smaller bar to the right of the browser bar. With Firefox, you no longer have to go to a website to start your search.

Tired of having too many browser windows open? Firefox fixes this problem, too. Instead of opening a new window, you can open any link in a new tab. You can also create a blank tab by hitting CTRL+T. If you are searching for information on a project, you no longer have to keep hitting the back button or switching between windows. While there is no real limit to this, I found that I could no longer read the tabs when there were twenty open in one window.

Sometimes you need to find a specific word in a webpage. If you don't want to be searching for the rest of the day, you hit CTRL+F to find a word or part of a word. In IE, you have that annoying popup screen.

In Firefox, typing this command brings up a small toolbar at the bottom of the page. As soon as you begin typing, it jumps to the first appearance of this word and highlights all other appearances in the document. If it isn't found anywhere, the toolbar turns red.

Occasionally, you may feel the need to download files directly off websites. With IE, you are limited to downloading only two files at any given time. On top of this, you're always trying to figure out where you saved them. Firefox comes with a built-in download manager that allows you unlimited simultaneous downloads. When the download is done, it remains stored in the manager until you clear it out of there. Instead of hunting for the files on your computer, you can simply use the download manager to open them.

Movie review:

"Sky Captain" doesn't quite soar

Carolyn Keller

Think 1930s horror movie meets 21st century special effects. A mad scientist wants to take over and destroy the world, and we have only two amicably feuding ex-lovers, Jude Law's Sky Captain and Gwyneth Paltrow's Polly Perkins, to save the day!

If you weren't already praying to a particular deity, now might be the time to start.

A purely conceptual movie, and Kerry Conran's innovative writing/directing debut, "Sky Captain and the World of Tomorrow" is the first film to be shot entirely in front of a blue screen, meaning that when viewers see actors reacting to a big scary monster, the actors are in fact reacting to a big fat blue nothing. On that purely conceptual level, the movie mostly works. There's just one problem: It's nearly impossible to forget that it's an exercise in style.

Actors Law, Paltrow, Giovanni Ribisi, and a woefully underused Angelina Jolie are all game and capable, but the movie's technical demands mean flexing a different set of acting muscles, as they work without even a background setting to support them. Sometimes this works, sometimes it doesn't, and the actors bear the brunt of the responsibility.

This is not always a bad thing, for Law is come to save the day! Anyone who perchance read my column last semester knows The Jude Law Meltability Meter doesn't have to rise very high before I turn into a puddle of goo. Lucky for both me and "Sky Captain," however, the "Cold Mountain" man can also act...or in this case, at least skate by on boyish charm. He may not be up to his usual scene-stealing, movie-buoying par, but in his finer moments he is almost magnetic and always confident...and "Sky Captain" needs every ounce of magnetism and confidence that it can get.

Paltrow's Perkins is alternately independent and flighty, though the actress portrays both extremes effectively...despite some horrifically banal dialogue:

Polly: "We're underwater."

Your first clue was...?

Ribisi, also of *Cold Mountain*, does a fine job playing technical whiz Dex, though it can be said in relative seriousness that perhaps Polly should be worrying about her Sky Captain being in love with *him*, as opposed to Jolie's fabulously spunky Franky Cook.

In fact, the only true scene stealer is Jolie, who, as confident Amphibious Squadron leader, adds the necessary jolt to suck the audience into the film, as opposed to merely sitting back and watching the special effects.

Unfortunately, she's not in the film enough to make a big difference, and Law's usual buoyancy can't float the film alone.

The movie starts out promising, but the effects quickly commandeer the story.

The effects run the gamut from being uniquely stylistic in the beginning, to later ripping off every Lucas or Spielberg film of the past two decades. One could say it's homage. But the difference between that and cheap deja-vu should be obvious, not questionable. The 1930s rendition of New York City is beautiful and original ...but the battle scenes resemble everything from video games to "Star Wars" to "Independence Day" and back again.

This is not to say the film doesn't have its moments. Law does sink his teeth into his part enough to utter the movie's best line, to his ex-love, with extra relish: "You look like a woolly mammoth [in that coat]."

Regardless of the end product, the actors are clearing having a good time.

"Sky Captain" is worth a peek, if only for its novelty and place in cinematic history. Gorgeous to look at, new in notion, and incredibly produced, it gets two and a half stars...but nothing changes that fact that under its stylish surface, when "Sky Captain" is bad, it is really pretty bad...and when it is good, it's mediocre.

Music: The High Note

Jacob S Warner

Seventeen silver sea monkeys served scrumptious seaweed soufflé to seventy starving sailors. Do I have your attention? Now to the music:

Live show. Location: The Crowbar, State College. Date: Monday September 27. Bands: Addison Groove Project and co-headliners Jennifer Hartswick Band.

These two bands were absolutely incredible. Both groups are predominantly brass, and through their musical mastery were able to offer an insanely intoxicating brew of sound.

Jennifer Hartswick Band took the stage first and proceeded to blow the roof off...and I mean blow. They guys put every ounce of energy and inspiration into the music they were channeling through the brass configurations put to their lips. Jennifer Hartswick wielded her trumpet like a tribesman stalking the jungle with a blowgun, shooting notes through the smoky room with absolute precision and perfection.

And the rest of the band was no different. The sounds they were able to produce are the things of dreams, highly layered and intricate, so much so that you are almost incapable of realizing exactly what is happening until later, when you wake up from the trance, and utter merely: wow!

But the band is not all brass. There was the high-strung, boisterous bassist who was the aorta of the group, pumping out fat bass-lines that kept the band alive and jumping all night. The drummer kept impeccable time and the keyboardist delivered delicate but entrancing melodic munchies for the ravenous crowd.

Especially impressive to me was the guitarist, whose fingers moved across the frets of his guitar like baby octopi squirming over rocks in a tide pool, seemingly chaotic yet undeniably beautiful. Those were special guitar fingers, and the sounds he produced were reminiscent of the best to spring from Jerry Garcia's strings. Now that's high praise...especially from me.

This smorgasbord of masterful musicianship was magnificently inlayed with the soulful sounds of Hartswick's voice. It was as if modern science discovered a procedure to combine the genetic makeup of Grace Slick, Mama Cass, Janis Joplin and Aretha Franklin. It was positively chilling, like a swift January breeze down an unbuttoned collar.

All said, Jennifer Hartswick Band is an ultra-talented group that radiates sounds the brain didn't even know existed. They teased and tickled brain cells I thought I'd already lost. Perhaps the highlight of the set was their remarkably reworked jazz-funk version of Beyonce's *Crazy in Love,* a blistering barrage of pop-cultural plasticity.

I would have been satisfied after JHB, but we were treated to the second half of the bill, Addison Groove Project, an ensemble similar yet very different from JHB. These guys poured out long and extended improvisational jams that wriggled around in the very depths of the mind, producing continuous concentric circles of color coagulations as only good music can. These guys jammed and jammed and jammed and the crowd loved it, undulating and swirling as one enlightened entity.

The show came to a close with both bands jamming together for nearly fifteen minutes, eventually sliding into Bill Withers' *Use Me* to end the spectacle on one funky plain of consciousness. But it's never really over. This is the kind of music that sticks with you, like a hearty breakfast from a greasy diner.

What more can I say? Check out both bands. They will not disappoint.

Volleyball focused on the Win

Colleen Hughes

The women's volleyball team improved its season record to 18-3 with a solid win against conference foe Messiah. This is the third time the Eagles responded with a 3-0 win after a frustrating loss, in this case after losing to Division I Princeton.

During a home game on October 6, the Eagles swooped down on the Messiah Falcons to earn a 3-0 victory. In game one, the Eagles pulled away from the Falcons mid-game, with Katie Laucks and Abby Leonard pounding out aces. Erin Wisor ended the game with a kill, giving Juniata a 30-17 win.

In game two, the teams were tied at 12 until Juniata flew away with six unanswered points. Lindsey Habel had two kills to get the 30-19 win.

In game three, Juniata took a 16-10 lead thanks to several kills from Rachael Schatz. Then Stephanie Kines sealed the deal with a kill, 30-17.

Prior to that match, Juniata suffered a tough loss to Division I Princeton in a five game match on October 2. What was little competition in the beginning turned into a grueling struggle to keep up the momentum. Juniata eventually fell, 3-2.

The Eagles took charge of the match early, winning the first two games, 30-26 and 30-24. Princeton captured the next two games and took game five, 16-14.

Erin Wisor and Katie Laucks led the team to its first two victories in the match with some solid hitting. The Eagles' defense held strong with a 21-9 lead at one point in game two.

In game three and four, Princeton took early leads, winning both 30-26 and 30-23.

In the deciding match, Juniata trailed 11-7. The Eagles rallied to tie at 13 and 14 but lost it in the end. Princeton claimed the final two points to capture the win.

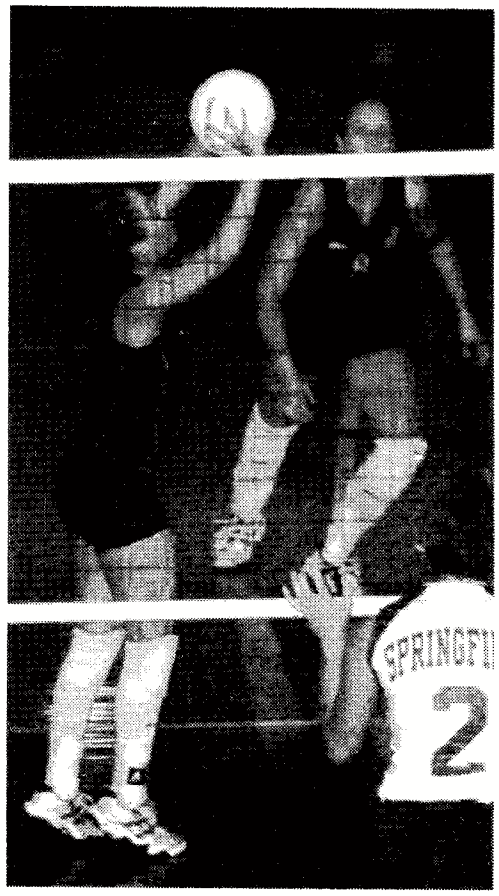
Head Coach Larry Bock said, "We let that one get away. It was very disappointing. We never entirely got momentum back after the second game. There were a lot of focus errors, things you don't expect to see from a veteran team."

Senior co-captain Erin Wisor added, "We didn't bring our A game, and they were a good team."

Juniata saw strong showings from Wisor and Laucks as they led the team with 18 kills apiece. Rachael Shatz and Stephanie Kines contributed with 15 and 14 kills each. Setter Carli Dale recorded a season high 71 assists and 29 digs.

The Eagles defense should not go unnoticed. Laucks had eight blocks and Kines added six. Libero Tara McMinn collected 26 digs and Wisor had a pair of aces and 18 digs.

"This team is very talented," Bock said, "we just see a tendency to be a little safe. The Princeton loss boiled down to serving and passing."



"Whenever we pass and serve well we are really good," Wisor added.

The day before the Princeton lost, the Eagles saw a score they were more accustomed to. Juniata dominated Springfield at home, 3-0.

The Eagles controlled game one, jumping out to a 16-10 lead. Katie Laucks led the team to a 30-20 victory with some heavy hitting.

Springfield took charge early in games two and three, only to have the Eagles bounce back, 30-26 and 30-25. Consistent kills and a block from Wisor along with a block from Laucks won it for the Eagles in game two. Wisor then helped lead Juniata in game three with six service points, including two aces. Setter Carli Dale closed the match with a kill to win it for Juniata.

Juniata travels to Indiana University of Pennsylvania away October 16. Fans can see the team in action when they return home to play on October 20, 22 and 23.

Hannah Rauterkus / Juniatian

Senior setter Carli Dale continutes to run the Eagles' offensive attack with precision.

Juniata looking for titles at MAC's

Corinne Barabas

Parachute Hill is one hill that definitely lives up to its name. Anyone who has made it to the top will say that a person, in all likelihood, could parachute off it. Boasting a rocky, uneven terrain and an incline that appears to be practically perpendicular to the sky, the hill was a challenge, but no match for the Juniata cross country team.

On October 2, the team was able to get a firsthand look at this Philadelphia course that they will run again in the most important meet of the season – the MAC Championships. A mere three weeks away, the top teams and individuals will be determined at the meet.

The men ran a stronger overall race than the women at Parachute Hill. Coach Cutright explains, "We did not really know what to expect, and I felt we went into the race without much energy. It is a lot easier when I can tell people what [times] they should be aiming to run on a course. The early departure and three hour bus ride didn't help our running, and some of us were shot before we even got there."

Chris Sheaffer and Justin Fritzius, who finished 38th and 39th, respectively, ran strong for the men and helped the team place ninth overall. Fritzius, with a time of 27:33, was only two seconds behind the Eagle's first place finisher Sheaffer.

Freshman Shawn Rumery was the next Juniata runner to finish with a time of 27:59, earning him 51st place. Michael Vella, taking 62nd overall, ran the 5.2 mile course in 28:46. Ryan Conrad was fifth for the team with a time of 29:03.

For the women, Katey Glunt just missed breaking twenty minutes, finishing with a time of 20:08 and placing 24th overall.

continued back page

Field Hockey record builds

Richard Pulliam

After winning games against the Lebanon Valley College Flying Dutchman on Oct. 2 and Elizabethtown on Oct. 8 the field hockey team is now 9-1. The Eagles are currently 5-1 in the Commonwealth Conference. The only game JC has dropped was a 1-0 loss to Messiah.

The field hockey team is on the move straight up the national polls. As of October 11 the Lady Eagles were ranked 9th in the nation. With only six games left this season, the team is looking to build on exceptional conditioning and chemistry to vault into a second straight playoff appearance.

The Eagles beat Lebanon Valley twice last year, once in the playoffs. So the Flying Dutchmen came out looking for revenge. Thanks to the Eagles' training and hard work, their opponents failed to find retribution.

The team feels it is definitely going to make it to the NCAA Tournament. This is a new standard for the team in general. This is at least partially due to the fact that coach Caroline Gillich is building "one heck of a program," Janine Hartman said.

Their coach has also been very positive with the players this year. This positive attitude has filtered down from both coaches all the way down to the newly recruited freshmen.

Gillich says the team chemistry is great. A large group of seniors allows for a very big freshman group to be integrated into the team well. "They are a good team to pull those freshmen in [to games] right away, Gillich said.

According to the team, there are a variety of factors that define how well they play on the field that help our game.

Goalie Melonie Sappe' states that "communication really helps our team, every one just feeds off each other."

Forward and Middle Rachel Taylor says that it's their positive attitude and having confidence that makes a difference on the field.

For JC, that difference is most evident in the play of Melonie Sappe'. Named Commonwealth Conference Goalkeeper/Defender of the Week for the fourth time this season, Sappe' played 354 straight minutes over five months without allowing a goal.

The number one asset, however that the entire team feels is driving the Eagles towards victory is team speed and passing. The team feels this way so much, in fact, that they have made their motto "speed and passing = kill." This has been proven in that its killing other teams chances at beating the Eagles.

The Eagles will play an away game on Saturday at Moravian, which is its last conference game. After this game the team will know whether or not they are going to the NCAA's according to whether or not they are at the top of the Commonwealth Conference.

continued back page

Race for the playoffs

Dave Shalkey

The soccer season is coming to a close and Juniata still needs some conference wins to get into the playoffs. As of Oct. 6, the team had six conference games left when it faced Susquehanna.

Robert Bowser scored the first goal of the game. He was assisted by Jeff Gehring and Josh Cady. The goal cost JC more than its opponent, though. Bowser's right leg got kicked while scoring the goal. Trainers had to help him off the field. Bowser has a sprained MCL and will be out for several games.

"It's unfortunate, but I'll be back for the end of the season. The team is strong and will do just fine without me. It will be good to get back on the field with the seniors again, though," Bowser said.

Senior Ricky McLellan will see more minutes in Bowser's absence. He came in for Bowser after the injury. McLellan will have to step in and take the place of an all-conference player. "I'm going to work twice as hard while Bowser is out," McLellan said. He has started once this season and has one goal on the year.

Susquehanna scored three goals unanswered after Bowser left to send Juniata home with a loss.

Jeff Gehring suffered a concussion in the game but continued to play. He was checked after the game by doctors. Jeff was not cleared to play in the next game against Palm Beach Atlantic on October 10. But he should be cleared to play against Messiah.

Mark Guthridge had nine saves in the 3-1 loss. Last week, he was named Goalkeeper/ Defender of the Week for the Commonwealth Conference. He has a 1.58 goals against average this season. The Eagles are 3-4-1 with Guthridge in the net.

The Eagles played well against Lincoln on Oct. 2, winning 1-0. The defense shut down Lincoln's offense. Mark Guthridge stopped all five shots on goal. Jeff Gehring scored the lone goal in the game on an amazing shot from outside the box. It hit the crossbar and bounced in, giving Gehring his third goal of the season.

Will Marshall entered the game late in the first half and immediately received a red card. Will said, "The refs need to be more consistent with their calls." He left the game and Juniata had to play a man down. Oluwafemi Badejo, from Lincoln, evened the sides when he got a red card minutes later.

Mike Alianiello, Will Spigler, and Kyle Dunn added to the yellow card tally. Assistant coach Dan Dubois said, "We have had some card crazy refs. Most of the time we get them because we are playing hard."

After the Susquehanna and Lincoln games, Juniata had only five conference games left this season. Even with the few opportunities, Assistant Coach Dubois thinks that Juniata can make the playoffs.

"We only need four conference wins to get in," Dubois said. "Everyone (in the conference) is together. Messiah is the only team running over people."

Messiah has one loss and has held its opponents to one goal or less in every game. They will present a tough test for the Eagles who travel to Messiah to play the best team in the conference on the October 13.

One at a time

Katie Laucks

The Juniata women's soccer team has picked up the pace in the last week. The women recorded a physical homecoming win against non-conference opponent Lincoln.

The women were paced by Nikki McLellan who had a hat trick in the game. McLellan is second on the team in goals. "The game was fairly physical because Lincoln is a physical team but we all worked well together and pulled out the win," McLellan said.

The Juniata women have been playing more consistently since the midpoint of the season. They recently held a record of 5-5-1 overall, 0-2 in the conference. With the strong play the team is showing against non-conference opponents, the wins should come soon in the MAC.

The team took on Susquehanna University on October 7. "We knew going into the match that they would be out to get us, because of the game last year. But we were really pumped," said Nikki McLellan.

The women last year took the conference game from the Crusaders in a thrilling double-overtime game. The women went into the match looking to pull out another big win as they did last year. Unfortunately, they dropped the game to the Crusaders, 4-0. The Eagles fell to 0-3 in the MAC and 5-6-1 overall.

This past Saturday the team took on Wilkes University in a tough non-conference match. The team's chances looked positive as sophomore Alicia Walsh netted the first goal early in the game. But Wilkes answered back with two goals. Juniata responded with a goal from Rebecca Shoaf, late in the first half to tie the game at 2-2.

Wilkes came out strong and scored two more goals in the second half. The Eagles continued to battle it out as they would again get another goal from Alicia Walsh. One goal was not enough. The Crusaders would go on to win the game, 4-3. Juniata dropped to 5-7-1 overall.

"We take one game at a time," McLellan said.

That is just what this team will do this Saturday when they host Albright College at 11:00.

Tennis team finally sees a conference win

Brit Tew

It took until the last match of the season, but the Juniata women's tennis team finally earned a conference win. The Eagles toppled host Widener University, 5-4, to claim its first MAC victory of the season. Juniata finishes the season with an overall mark of 1-9 and 1-6 in the Commonwealth Conference.

With the match tied at 4-4, sophomore Megan Carpenter came through in the clutch. Her win at the number six spot in singles gave Juniata the victory. Earlier in the day, Carpenter teamed with Molly Coursey to earn a win in doubles as well.

Anita Desai helped Juniata's cause with her win at the five spot in singles play. Desai led the Eagles with three wins on the season.

Earlier in the week, the team lost to Albright, 8-1. "Saturday was just bad luck," head coach Bobby Pennington said. He attributes part the loss to the absence of number two player, senior Libbie Coonie. Coonie was busy taking her LSATs.

According to Pennington, Coonie is a strong leader during matches and in practice. "She sets a good example for the entire freshman squad, definitely a strong player," Pennington said.

On Oct. 1 the Eagles lost a close game to Penn State Altoona, 5-4. Desai and Jenny Liu won both of their singles matches. "Skill wise, we were just as good. We just weren't there mentally," Pennington said.

According to Liu, the match was pretty tight. "We could have pulled it through. We worked really hard."

Pennington blames the team's struggles on its positions, not effort. "They are all playing out of position. They are being forced to play over their heads."

According to Pennington, the team is playing in a very tough

Still waiting for a win

Tommy McConnell

The Juniata College football team is still winless. Still, things are slowly starting to look up.

In its first three games, the Eagles offense failed to post double-digits. The past two weeks have been a different story. Juniata scored 21 against Susquehanna and then followed that up with another solid effort, scoring 20 against Lebanon Valley.

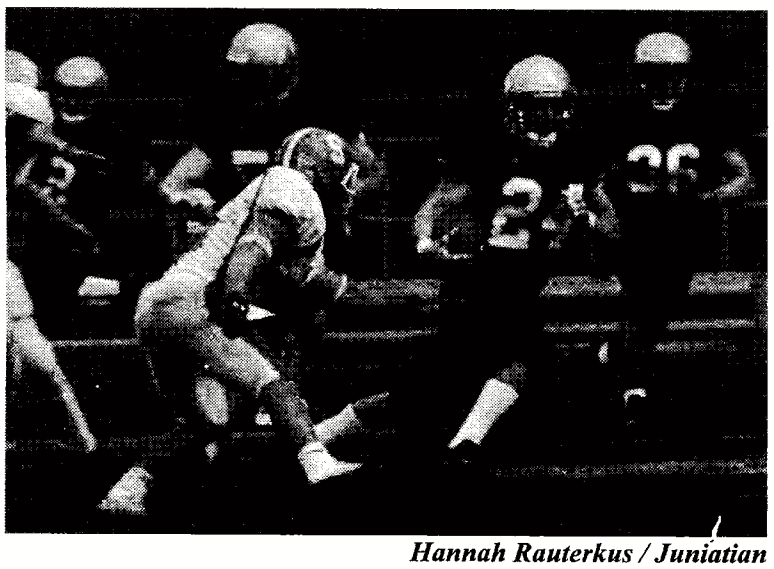
Juniata fell to Lebanon Valley this past Saturday, 27-20, in easily its closest game of the season.

The Eagles' running game finally got off the ground. Duane Ehredt followed up a two touchdown performance against Susquehanna with another solid game Saturday. He rushed for 115 yards and a touchdown. Strong practice habits as the season wears on are starting to pay dividends.

"We're gaining confidence with the run game more each week," Ehredt said. "We are perfecting our assignments during practice."

Maybe more importantly, the Juniata defense had a big day. It forced three turnovers – one for a score – and allowed its second-lowest point total of the season.

Still, some fourth quarter miscues cost Juniata the game.



Juniata jumped out to a 10-point lead on a Dan Heinlein field goal and a fumble recovery in the end zone by Bryon Latterner.

But Lebanon Valley would rally, eventually tying the game at 20 heading into the fourth quarter. After forcing a Juniata fumble, Lebanon Valley returned it to the Juniata two yard line. Two plays later, Dan Kelly found John Smith in the end zone, giving Lebanon Valley a 27-20 lead.

The Eagles had two chances to force overtime, but both drives ended when Jeffrey Hayes was picked off by Jimmy Holzmann. Juniata fell, 27-20.

Prior to the Lebanon Valley game, Juniata hosted Susquehanna. Despite a season-high point total, the Eagles couldn't get a win, losing 57-21.

The Susquehanna offense was just too much for the Eagles, scoring on six of its first nine possessions. The visitors took a 38-7 lead into halftime, then salted the game away in the second half.

Hannah Rauterkus / Juniatian

There were some bright spots on the offensive side of the ball for Juniata. At the start of the fourth quarter, Hayes hooked up with wide receiver John Boyer for a 64-yard strike, down to the Juniata one-yard line. Ehredt scored on the ensuing play for his second touchdown of the game.

Boyer finished the game with a team-high 96 receiving yards. He has been Hayes' most consistent threat through the air this season, averaging 12.4 yards per catch and scoring once. Boyer also sees the strides Juniata is making.

"I think we have more confidence," Boyer said. "We have had some good practices and good game plans."

Despite the improvement, Juniata still needs to crack the win column. The Eagles came close last week, but some late-game errors cost them their chance.

"We need to play 60 minutes with no let-ups," Boyer said.

Ehredt agrees.

"We want to win each week," he said. "We need to work as a team on the small stuff, which will lead to greater positives."

Tennis team - *continued from page 14*

conference. Next season, he plans to change the schedule to pit the Eagles against competition of equal skill.

Pennington is still pleased with the team's performance. He sees sophomores Andrea Hull, Jennifer Irving and Megan Carpenter as having taking great strides. "These girls have improved dramatically," Pennington said.

According to Pennington the team is improving a lot and will be strong next season. "They are a fun team to coach, positive and always up-beat," Pennington said.

Athlete off the field

Katie Laucks

Being busy isn't what it used to be. If someone said they were busy, they would often mention just one sport or club that they participate in. That isn't the case anymore, at least not for Justin Fritzius, this issues Athlete Off the Field.

Justin is a well-known cross country stand out. He holds the school record in the 5,000 meter run, as well as the steeple chase in track and field. What most don't realize, however, is that he may just well be the busiest person on campus.

During the week, Justin participates in several clubs, not to mention he is part of the special interest house on campus. Add the long and tough cross country practices and one can get tired just talking about how involved this junior is.

On Monday nights Justin can be found at the Men's Bible Study. There Justin gathers with other men interested in the bible and similar readings. They go over the weekly readings and discuss what the readings were about.

Another of Justin's involvement is F.C.A., which is held Thursday evenings at 9:00. This was usually a laid back time for Justin, but not this year. This year he decided to be a leader in F.C.A., so instead of sitting and listening to discussions of the bible, he leads them.

The toughest club and toughest task has to come from the "house," also known as the alternative alcohol house. Here on campus most students wouldn't jump to be first in line for this opportunity. But, Justin decided it was something he wanted to do. "It's not that I hate to drink, it is just something I wanted to challenge myself with," Justin said.

Being in the house means finding alternatives to going out and drinking, whether you like to drink or not. There is even a contract that is signed. You are aloud to go out, but your choice of beverage is limited. "It is definitely hard on some weekends, especially when the opportunity is right in front of you," Justin said, "but I'm doing well so far."

The toughness Justin portrays outside of his sport doesn't surprise his coach at all. Coach Jon Cutright has described his junior as a disciplined athlete. That discipline has spilled over into other areas of his life. There is no surprise that Justin is able to pull off this balancing act. When Justin succeeds in the future, it won't come as a surprise, either. Justin's POE is General Business and after school he plans on doing human resource management.

This cross country season Justin will be working to break possibly another record and possibly even his own. "Justin has decided he wants to be the top runner on the team and has learned to train that way," Cutright said. "Justin

"the business of changing lives"

THE RANDOM ELEVEN

...or is it twelve?

Matt Russell

Cell phones, part 4: This past week a friend knocked on my door to go to dinner, so I opened it for him – and proceeded to watch him finish a cell phone conversation in the doorway. Then he got a call in Muddy and actually asked us to pause our conversation until he finished. That social ineptitude stick leaves a mark, let me tell you.

Day 1: New fountain outside Enrollment is turned on. **Day 2:** Detergent added. **Day 3:** Water fountain disassembled to clean it. **Nice.**

Mt. Day portents, part 1: The announcer in the park twice repeated a welcome to "Mountain Day 2005." I think someone was sucking a little too much mountain air.

Habitat for Humanity: The Student Alumni Association recently had a rare treat: we were actually locked **into** the field station by the gated entrance for half an hour. Another club (totally unrelated to this item's title) had entered after us and decided it made sense to lock us all inside. I'm glad we were all so safe.

Mt. Day portents, part 2: The local fortune-tellers were in rare form last week. A significant chunk of the population missed class on Tuesday due to (what they thought were) pre-Mountain Day festivities. **Hint:** "It's GOT to be Tuesday" translates to "I haven't got a damn clue."

I swear he stole my keys! Bumper sticker seen in a Wendy's parking lot: "Friends don't let friends eat meat".

One chapter per good grade: I just finished saving a professor's books-in-progress from a failed computer system. Think that's a good trade? (I jest!)

A tech guy's worst mistake: Wait... I mean... I have no idea how computers work. I can't help you.

Mt. Day portents, part 3: Don't you love how everyone suddenly has an inside source as Mountain Day approaches? "No, seriously, look at the athletic calendar, the weather forecast, and that mound of mold in the shower stall. It's going to be tomorrow." The best part is people just keep guessing until they're right. "See? Told ya..."

Hands off my overused phrases! (Innuendo, part 1) The administration and trustees recently decreed that all t-shirts bearing the Juniata College name must be approved. Let's see, remove innuendos from Juniata club t-shirts and you've got... oh, that's right, a lot of blank t-shirts. I swear, if one more sport tells me how many positions they can do it in...

No, I mean it! (Innuendo, part 2) But really, what do they think they're trying to pull? Innuendos go on almost every t-shirt from high school onward and clubs have used them here for decades.

Where are we again? (Innuendo, part 3) I'm glad they found time to play fashion police though. I definitely think we should ban sweat pants and hats while we're at it too. And tank tops, skirts that aren't long enough, muscle shirts, and slippers. Oh wait, that's right, we left those ridiculous policies in high school. Thanks.

Cross country

continued from page 13

Teammate Nancy Hayes ran a 20:34 to finish 32nd.

Sophomore, Elena Amato, who has been coping with a minor leg injury, flew through her first mile and continued to set a quick pace, running the three mile course in a time of 21:13 to earn 54th place.

Lauren Gates finishing only four places behind Amato ran the meet in 21:24. Sarah Bay, finishing fifth for the team, had a time of 21:30, and was 64th overall.

On October 9, the team headed west to Pittsburgh to run in the Carnegie Mellon Invitational. The women came in fifth of 12 teams.

Leading the women's team, Katey Glunt and Nancy Hayes both finished with a time a 19:55, capturing 12th and 13th places. Coming in third on the team was junior Sarah Bay, who ran the three mile course in 20:40 to finish 31st overall.

Lauren Gates followed only ten seconds behind, coming in 32nd. Sophomores Lia Bella, Christina Jones, and Meghan Fahy rounded out the top seven for the Eagles.

Juniors Nancy Hayes and Katey Glunt are fully capable of qualifying in the top ten at the MAC Championship. "They need to take turns pushing each other," Cutright said. "When one slows down, the other one needs to take control of the pace [and visa versa]."

The men's team, running an exceptional race in Pittsburgh, took third out of 14 teams.

Coming in first for the men with an overall finish of 11th place was junior Justin Fritzius, who ran the five mile course in a time of 27:28. Placing second on the team, Chris Sheaffer captured 14th place with a time of 27:37. Junior runner, Michael Vella took 20th with a time of 27:57.

The fabulous freshmen foursome, composed of Shawn Rumery, Ryan Conrad, and Jason and Eric Hoover, finished the race respectively.

The Eagle's next meet will be held on October 23 at the Juniata Invitational. The women run at 10:00 a.m., followed by the men at 11:00. The Invitational is the only home meet this season for both teams.

Athlete off the field

continued from page 15

put a lot of time in over the summer and you can see that."

But according to Justin, he won't have a problem if one of his teammates breaks his record. "If anyone of the guys' breaks my record that means only one thing, we are getting better as a team. Finishing higher in the MAC is more important to me," Justin said.

This athlete has it all wrapped up when running and when in the classroom. Justin has his balancing act down. If you need a lesson on how to balance sports, several campus clubs and school work, take a lesson from Justin Fritzius.

Return of the Native - statue planned on campus

continued from page 1

However, today "most of our alums realize that Juniata is more than just a mascot and have begun giving again," according to Herzog.

Hille said, "I suspect that some of the alumni may give to the statue because of their feelings to the [Eagle] mascot, but that is not our motivation."

Construction is expected to begin in two to three years, after fundraising is complete. The statue is estimated to cost between $350 to $400 thousand.

Funding will primarily come from an anonymous donor couple. Though their names are unavailable, they are Juniata graduates and are not of Native American heritage.

At this time, the statue's location is officially undetermined. However, initial plans place it at an intersection of two paths, one between von Liebig and Cloister and the other from Kennedy to the Beeghly Library.

The three figures depicted in the statue will be those instrumental in bringing the Iroquois nation together. First is Deganawida, the mother of the nations who was the first to accept the notion of peace. Other figures are Jigonsaseh, known as the peacemaker, and chief Ayowenta, commonly known as Hiawatha.

The figures will each be seven feet tall with a two-foot pediment. That height plus a stone wall base give the statue its full eleven feet.

Judd Hartman of Maine, will likely be the artist, though no contract has yet been approved.

Hille said, "The artist believes that through his ties to the Iroquois nation, he is confident that [the Iroquois] will want to be present and participate in the project."

Another goal of the statue project is to promote public art on campus. This open space could serve as a gathering spot for students.

Hille said, "I don't think there is any question that we would benefit from more artwork [on campus]." He went on to say that the campus art committee will be involved at the appropriate time as plans for the statue progress.

Nancy Siegel is the director of the Juniata College Museum of Art and an assistant professor of art history. She looks forward to the public artwork.

"I hope the community will have the opportunity to discuss the plans for art in public spaces," Siegel said. "We need to be sensitive to the aesthetic and cultural identity of the campus as outdoor sculpture has the potential to create an iconic message."

Field Hockey

continued from page 13

If the Eagles are not at the top of the conference then they still have a shot of getting in to the NCAA's if the committee grants Juniata an at-large bid into the postseason.

The field hockey team's 400th game is going to be on October 15 against Bridgewater. Then, after four straight road contests, Juniata's final home game is scheduled for October 30 at 1:00

Graduate Class

continued from page 2

to be the liberal arts education that the College provides to its undergraduate students.

"We're not in it for the money," said Lakso. "We live in a part of the country where we have needs. If we [Juniata College] can do a small part to increase the education and professionalism for the people of Central Pennsylvania, we made the right choice."

Election 2004: Bush victory

High turnout in Huntingdon - Juniata responds to Wednesday's uncertainty

Emily Eller
Mary Gardiner

Tuesday night

A cool breeze skipped across campus on an unexpectedly sunny day. All day the mood was cautious and calm as voters filed quietly in through the side of the nearest polling place, Stone Church, in record numbers.

Poll workers at the Stone Church estimated that more people voted by noon this past Tuesday than the total turnout in the 2000. By the time the polls closed at 8:00 p.m., over 500 people had cast their votes compared to 300 in the 2000 election.

Poll watcher Kathy Secrest said that poll workers were excited by the turnout and had never seen anything like it.

"There were so many young people and people that haven't voted in years," said Secrest.

With the campaigning over, save a spattering of stickers and t-shirts, there was nothing left to do but wait. Night fell and polls closed across the country.

People didn't know what to expect. There were Y2K-like fears of power outages, terrorist attacks, contested ballots, tampered-with voting machines, and a slew of other nightmares. But, like Y2K, there was little excitement.

Although still and composed, voters from both camps quietly admitted to fear.

"I'm nervous because I know it'll be really close. The country's so divided and I honestly don't know who will win," said senior Samantha Hubbard.

At 9:00 p.m., political enthusiasts of all stripes gathered in Neff to watch the talking heads think out loud. JC's Voter Coalition sponsored the election night party with cookies and apple cider. Wolf Blitzer of CNN was even projected on Neff's screen to three times his home-TV size. Armed with laptops, students waited and speculated with voters all across the country.

Ohio kept many up into the

continued back page

Hannah Rauterkus / Juniatian

Student Gov. proposes new funding process

Will come to vote at Senate meeting on November 11

Nate Drenner

At its open meeting on October 28, 2004, Student Government proposed changes to the current funds allocation process for Registered Student Organizations (RSO). The proposal remains open for discussion and will come to a vote at the next Senate meeting on November 11.

The proposal centers on the creation of Common Interest Subcommittees (CIS). A subcommittee includes the president and treasurer from similar student organizations. For example, the president and treasurer for both Laughing Bush and the Caving Club would sit on the Outdoors CIS.

Two representatives would be elected from each CIS to have full voting rights to the Senate.

As proposed, a new Allocations Board will also form. This board would consist of a representative from each CIS and be chaired by the Student Government Executive Board Treasurer.

"The Allocations Board would be about a one hour time commitment per week," said Staci Weber, Director of Student Activities. However, the Executive Board noted that budget allocation work would be spread out among many people, reducing the commitment needed from any individual.

The process for requesting funds would first involve each CIS creating a combined budget from requests by each organization it represents. The CIS would request that combined budget amount from the Allocations Board. The Allocations Board would then seek approval from the Senate for a final total budget for all CIS committees.

Each CIS would divide its received allocation among its member organizations. The number of organizations in each CIS group as proposed is not equal. However, the Executive Board stated that this would not affect the funds granted to each organization. Student Government will post the proposed CIS breakdown on its website, http://clubs.juniata.edu/studgov.

"This proposal actually mirrors the College's budget process," said Executive Board Treasurer Michael Best. College departments and offices request funding from a budget team, which then proposes a whole college budget to President Kepple and the Trustees.

Carl Kihm, president of the Executive Board, also said that he hopes to procure an increase in student organization funds from the total College budget.

Several discussion points were raised as the proposal was presented.

Under the proposal, students would not be able to serve as a president or treasurer in more than one organization within the

Innuendo policy leaves many unsatisfied

Thrust of rule is that clubs must abstain from gratuitous remarks

Corinne Barabas

Everyone has seen them. Certainly much of the student body owns at least one. Notorious yet-oh-so-amusing t-shirt slogans are causing concern in our college community.

There have been many ambiguous rumors going around campus regarding the new "what is appropriate for a shirt" policy. Here is the official word: Each RSO (Registered Student Organization) or varsity team has the responsibility of deciding whether or not a design/phrase for a shirt is appropriate.

Student organizations and sports teams are not required to have prior approval for shirt slogans in order to be printed or sold. However, if there is the slightest uncertainty, by the club or team, that a slogan is not suitable for a shirt or does not meet the guidelines, clubs should see Staci Weber, Director of Student Activities, and varsity sports should contact Kelly Casperson, Athletics Development and Marketing Coordinator.

Weber explained, "Everything is taken from the Standards Manual which is established by the College. Every member of the Juniata community, including faculty, students and administration, is to follow that manual and the guidelines in it." The official College logos and images are located on the P: Drive under the Print Publications folder.

Contrary to recent reports, students can use the "Juniata College" logo on a shirt with innuendos or comical sayings. The administration is trusting that students will make the most sensible, responsible choices when deciding on a slogans. Shirts should also be of highest quality. They should be refined yet affordable, but should not appear to be see-through or shredded after one wash.

Michelle Corby, Assistant Vice President of Marketing, said, "How we use the Juniata College logo reflects on how the College is perceived. We need to respect it and the meaning behind it. We should all be proud of Juniata."

How will a club know if it has crossed the line when it comes to appropriateness? "They should ask themselves this question: would I wear this shirt in front of people whom I respect and who I wish to respect me, such as grandparents, co-workers and impressionable children," explained Weber.

Weber continued, "We want students to avoid using racist, sexist, hetero-sexist, [. . .] expressions on shirts that could possibly be degrading or offensive towards an individual or group on campus."

By trusting the students' judgment on the decency of a phrase, the administration is trying to cut back the number of racy shirts on campus without interfering. If clubs and teams do seek approval, Weber or Casperson will give suggestions on how shirts can be improved to read in a more appropriate manner.

"Since we are giving them the freedom to have these phrases on their shirts, we only hope that they will take the initiative to do what is right," said Weber.

If a club decides to print or sell a shirt with an inappropriate expression and there are complaints from anyone regarding that shirt, Weber will meet with that organization's president to discuss future shirt designs.

One student, who admitted to easily being offended by things, said that she has never once taken offense to any shirt on campus. Many students agreed.

Junior Lindsay Garvey said, "This is a point in our lives where we are encouraged to express our individuality. We are doing this by making these creative shirts, and at the same time we are not hurting anyone, damaging property, or breaking the law. [Inappropriate phrases on shirts] happens at a lot of colleges, not just Juniata."

Many students agreed that as long as a slogan is not derogatory or profane and it clearly identifies with the club or sport, it should be acceptable. However, if it is insulting or distasteful, then it should not be allowed.

In general, students feel that the guidelines are too vague and the policy is subjective. One anonymous student commented, "The student body is not a professional institution; we should be allowed to wear whatever we want. We will be entering the working world of suits and ties soon enough, let us enjoy our college humor."

Students thought that clubs may not be able to sell many t-shirts if they aren't witty and appealing. Many students still respect the fact that College officials are trying to protect the campus' level of prestige, but they may not agree with how officials are executing it.

"It's a policy with a lack of policy," remarked one sophomore who asked to remain anonymous.

"It seems goofy that they aren't enforcing it. They should either establish a rule banning them completely or leave the status quo," said senior Pat Cain.

"They have much bigger problems [on campus] than these shirts," pointed out sophomore Brandon Long.

Weber said, "We realize it is one of the favorite traditions on campus, and clubs and teams rely on these shirt sales to raise money. [...] We are not going to censor every shirt that has bee

Class gift confusion cleared up

Sarah Svigals

Recently there have been rumors flying around campus about the nature of the new fountain in front of the Enrollment Center. Some saw it as a cheap alternative to the class of 1999's proposed gift of a penny fountain in front of Founders. Others were concerned that another class's gift was removed for the pond's installation.

"The Class of 1999 wants to get a fountain somewhere in front of Founders," said President Tom Kepple. He continued, "The assumption when they decided on that was that we would be renovating Founders fairly soon; however we have not raised enough money as of yet, so the plan is moving fairly slowly."

"So last year I proposed to the class officers to switch it up to a water feature in front of Enrollment," said Kepple. "However, they did not touch base with enough of their classmates to feel comfortable with that. But we wanted it anyway so we went ahead with it with other funds."

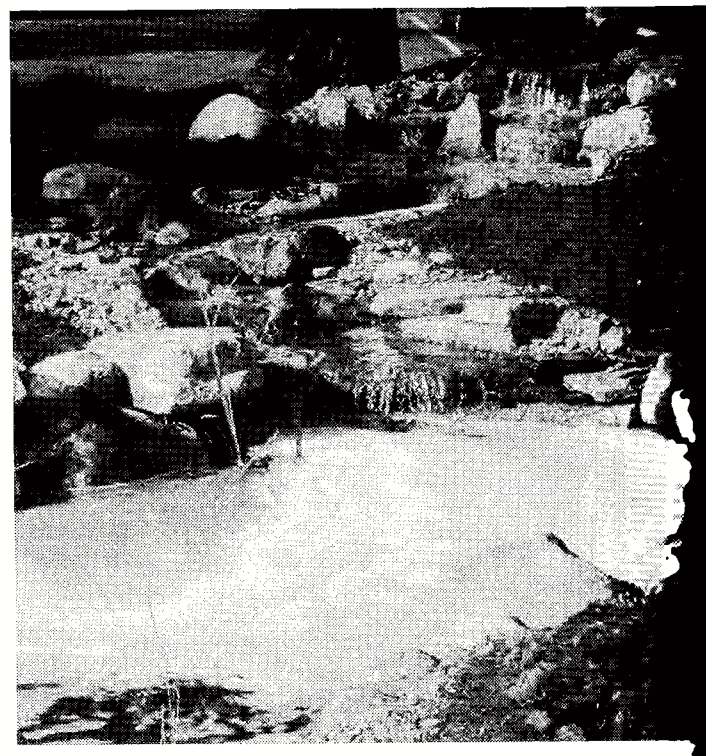
Kepple continued, "The class of 1999 has enough money for their fountain. It's just a matter of when and where now."

At the location of the new water feature – the front of Enrollment – there used to be a campus map given by the Class of 1939 for its 50th anniversary.

"It was ugly and not very well done," said Kepple. "What we are going to do is put their plaque back on the water feature."

According to Kepple there was input by the remaining members of the Class of 1939 and they were supportive of the idea because many of them agreed that the map was not very well done.

The removal of a class gift leads one to wonder what exactly the College's responsibilities toward such gifts are.



"Generally we hope that every project will be one that remains," said Kepple. "Class gifts are for a variety of reasons. In some cases classes gave money to endow a scholarship so that money is still there. In other cases they give money for specific things on campus. I can only think of two cases where [gifts] have been removed."

The only other class gift that has been removed was a circle of rocks located where von Liebig stands today. However, a commemoration plaque will be placed near the gift's original location.

There is an extensive process that a class goes through before its gift is decided upon. According to Loni Fultz, Director of Annual Giving, the class officers propose at least three ideas for gifts to their class to vote on at Senior Salute. The one with the most votes is the class's gift.

"The money for the class gift comes from your matriculation

Yolanda King to deliver commencement address

Mike Chirdon

Yolanda King, daughter of famed civil rights leader Martin Luther King Jr., will deliver Juniata's commencement address this May. According to President Kepple, after other candidates were considered, King was selected because she fits in so well with this year's theme of civil rights.

Many students and faculty members were surprised to find out that Yolanda King would deliver the commencement address. Speakers in the past have been of good quality, but usually not such recognizable names. In the case of Ms. King, President Kepple said that the College has had a relationship with her over the past seven or eight years. She was simply contacted through her office, and she agreed to speak.

Besides being the daughter of one of America's most honored figures, King is very accomplished in her own right. She majored in African American Studies at Smith College before obtaining her masters degree in theater at NYU.

She is currently the CEO of Higher Ground Productions, which most recently produced the play "Achieving the Dream." This is a one woman show featuring King playing the roles of several key figures in the civil rights movement.

King sees the arts as a powerful tool for social change. On her website (www.yolanda-king.com), she said, "While it is imperative to actively challenge the forces that deny human beings their right to a decent life, one must also stimulate and alter the hearts and minds of both the privileged as well as those who have been too long denied. Within the arts lies this power."

King travels around the world speaking to audiences about such topics as "The Business of Caring: A Good, Old-Fashioned Remedy for Success" and "Nonviolence as a Way of Life." She has addressed the United Nations in Moscow and Munich and crowds in forty-nine states about the importance of embracing diversity.

Critics across the country praise King's ability to inspire and motivate a crowd. The Central Square Times from Portland, Maine said the following of her keynote address during Black History Month: "Yolanda King's vibrant energy permeated every inch of the large gymnasium on the Portland campus of the University of Southern Maine. She inspired students and public alike with her dedication, and eloquent choice of words and poems, in her sweeping presentation as keynote speaker for Black History Month. It was an evening no one will ever forget."

King has become both a respected actress and director. Her film credits include her portrayal of Rosa Parks in "King" and Medgar Evers' daughter, Reena, in "Ghosts of Mississippi."

Aside from being very active in many charitable organizations dedicated to her father's legacy, King is involved in various other philanthropic groups. She serves on the Partnership Council of Habitat for Humanity. King is also a sponsor of the Women's International League for Peace and Freedom, and she holds a lifetime membership in the NAACP.

"Open My Eyes, Open My Soul: Celebrating Our Common Humanity," a book King co-authored with Elodia Tate, is in bookstores now.

Braxton as Bush?

Students informed at mock debate

Sarah Wharton

The Juniata students who attended last Wednesday's mock-presidential debate can say that they are informed voters.

Held in Neff Lecture Hall, decorated all in red, white and blue for the occasion, professor Peter Miraldi's Political Communications class engineered the mock debate for a large group project.

"The Political Communications students expressed their disenchantment with the political spin-doctors on both sides of the presidential campaign," said Miraldi.

So, for their class project, the members agreed that an objective mock presidential debate would be both entertaining and informative for the college community in light of the upcoming election.

With American flags and majestic bald eagles displayed behind them, religion professor Don Braxton canvassed for Bush and the Republicans – not his true affiliation – while politics professor Dennis Plane represented Kerry and the Democrats.

Moderators Ryan Conrad and Josh Scacco began the debate with a question on judicial appointments. Other topics included same sex marriage, abortion, the environment, stem-cell research, and, most importantly to students, education and its costs.

For all its hope for objectivity, the debate did get a little dirty from some good-natured mudslinging.

Of the No Child Left Behind Act, Plane said, "It should really be called the '*Some* Child Left Behind Act.'" He also said sarcastically that the Bush administration would like voters to believe that "a vote for Kerry puts you at risk for hurricanes and forest fires."

Braxton also had his fair share of quips. A Nader supporter at heart, he teased the Kerry record throughout the debate.

He called Kerry's placing blame on Bush for the shortage of flu vaccines "the farmer slapping the rooster for the sun coming up in the morning." The Massachusetts senator then became a "wolf in sheep's clothing" with regard to tax issues.

All in all, though, the mock debate came off very well.

"I thought the mock debate was well done," said Chris Russell, a student attendee. "It certainly informed me more about the current issues facing the candidates and our nation, and I found it very useful in aiding me in my decision for this Tuesday."

This spreading of ideas was a triumph for the class.

The students put over a month of work into the debate, beginning their project within the first days of the semester. Each of the class members had a unique roll in the process, working on anything from advertising to staging and question writing. After researching candidate stances, the class polled students on what issues incite them and included those topics in the debate.

"Hopefully, everyone realizes the presidential race involves more than just the economy and the War on Terror," said Jon Cohen, a member of the Political Communications class.

They then found the two professors to represent for the donkeys and the elephants.

Plane, as a Kerry supporter and a professor of American politics, was a natural choice for the Democratic campaigner. Braxton, though not a Bush supporter, decided to stand in as Republican because no one else would.

"None of the faculty was willing to speak on behalf of Bush," said Braxton. "But, at this college, the value of ideas is important. An open and fair exchange of ideas is necessary," he added, explaining why he shocked Ju-

Come out and speak out

National Coming Out Day celebrated

Stephanie Shaver

Rainbow colors and an assortment of faces speckled the front steps of Ellis Hall on Monday, October 11, 2004. Students, faculty, staff, and members of the Huntingdon community gathered in recognition of National Coming Out Day.

To Americans, National Coming Out Day is "a commemorative day of recognition where we celebrate all the people of the rainbow who are out already, and [we] recognize the needs and wants of those who have not come out," according to Grace Fala, Professor of Communication and Chair of the English, Communication and Theatre Arts Department.

Fala is the advisor for All Ways of Loving (AWOL). According to its mission statement, AWOL is an organization that serves as "a social and activist student club for bisexuals, lesbians, gay people, queer people, transgender people, heterosexual allies, and anyone questioning their sexuality."

The gay, lesbian, bisexual, transgender and ally community (GLBTA) has just recently gained its name. The GLBTA "is more integrated than they used to be," according to Fala. She continued, "Lesbian was too bad of a word, so it was just gay."

Thus, National Coming Out Day also recognizes "the struggles of those who have blazed the trails [...] and to remember the people of the past who have struggled," according to Fala. These past struggles, in combination with the current efforts of groups such as AWOL, aid in the creation of a safe, open, more aware and more accepting environment.

Nick Hartman, a senior and co-president of AWOL, believes that National Coming Out Day is "a chance for people to hear other peoples' opinions." The day also aided in "making people aware that the college and administration is working towards creating more awareness," said Hartman.

At Juniata College, the celebration and recognition of National Coming Out Day consisted of a variety of readings and speak-outs by a vast number of people, including students, professors and staff. Members of the audience were graced with poetry by authors such as Oscar Wilde and Dorothy Parker. Some speakers even presented their own personal accounts and poetry.

Others spoke in honor and recognition of GLBTA individuals who could not be there to speak for themselves. Jessica Shenker, an ally and a senior at Juniata College, read a poem by Walt Whitman to honor friends that she made while studying abroad in England.

Besides providing a safe environment for individuals to openly express themselves, what else is Juniata College doing for GLBTA students on this campus? According to Hartman, "AWOL is looking to see where it can be most effective and productive to better the needs of the college community."

In response to the diversity article in the September 30 Juniatian, Fala commented that "it would be wonderful to have more colorful, multidimensional queer students on campus." However, at the same time, "it's not about competition; it's about inclusion," said Fala.

By including all groups at Juniata College, the diversification "is what is going to make Juniata College an enriching, enhancing place for the whole person. When we learn to diversify people, we learn to diversify thoughts," Fala concluded.

Campus access

Improvements made, but many problems remain

Sarah Svigals

Imagine having to make your way around campus without seeing, without hearing, or being unable to walk. How would you make it to your class on the third floor of Good Hall or meet a group of friends for lunch at Muddy? How would you meet with your advisor when his or her office is in the Quinter House? These questions and more face students on campus who have disabilities connected to seeing, hearing or walking.

A committee is in place with the goal to identify and seek funding to repair the various barriers around campus. Chaired by Chad Herzog, Director of Alumni Relations, who is hearing impaired himself, the committee has made a number of changes in the past few years.

"We now have an accessible entrance into Good Hall as well as an accessible bathroom," said Herzog. He continued, "We also have an accessible entrance into Ellis as well as a new lift, new doors and accessible men's and women's bathrooms. We have made various curb cuts around campus. I think around nine."

Herzog continued, "Von Liebig and Good now have Braille signage, as will [Halbritter] and any new campus building signage. We have also put in strobe lights to the fire alarm system to aid those with hearing impairments. We are also looking into signage that would identify accessible entrances."

These improvements have not come easily. All improvements to existing buildings and campus structures must be funded through special funding, which is not a stable way to get income. This past year, special funding was slashed in order to fund residential hall expansion. Though a well-needed expense, it put other accessibility additions at a standstill for this year. However, sometimes federal funding is available through the Americans with Disabilities Act (ADA).

"Assisted listening, which are headphones that amplify sound in any area, were approved through special funding last year," said Herzog. "However, since funding was cut they'll be back on the list for next year. That being said, the new Halbritter Center will have them, and we are looking into a portable system that can be plugged into any room occupied by 40 or more people in fixed seats, as the ADA handbook suggests."

The (ADA) puts forth recommendations to public buildings in order to make them more accessible. The ADA law only requires that public accommodations remove architectural barriers in existing facilities when it is "readily achievable" and it can be done "without much difficulty or expense." According to the ADA handbook, some inexpensive, easy steps to take can include ramping, installing a bathroom grab bar, lowering a paper towel dispenser, rearranging furniture, installing offset hinges to widen a doorway, or painting new lines to create an accessible parking space.

Accessible doors are one of the most obvious changes around campus but also one of the more costly additions.

"It costs a lot of money to put doors in, believe it or not, about $25,000 for one of these doors," said Herzog. "Though it never ceases to amazes me that when you hit the door in von Liebig and sometimes it opens, sometimes it doesn't. That always baffles me because any time you go to the Weis store the door is going to open and you know it's going to open. Why can't we get that here?"

Another obstacle that disabled students face is everyday dorm life. There are accessible rooms in most residence halls with the exception of Lesher. South is accessible only on the first floor but does not have an accessible bathroom.

"I don't really have any problems getting around campus," said Elicia Frye a freshman from Williamsburg, PA, who uses a wheelchair. "Surprisingly, I get around really well. I meet with my advisor almost every week. I can get to all of my classes, and I can shower every day. I honestly have no problems. The people here are so accommodating and nice."

Faculty and staff have made it more convenient for Frye to get to her classes by putting

Innuendo policy: unsatisfying

continued from page 2

or will be made by teams and organizations. We are flexible and certainly this is not meant to hurt the clubs or their fundraisers. We simply want to represent Juniata College in a classy, appropriate manner."

With no mandatory approval and no implemented punishment, this policy is under student discretion and is to be policed by individual organizations and teams. Such a policy gives students the responsibility of protecting Juniata's reputation.

According to Weber, "This policy is to better Juniata College. Making our name and image stronger will only benefit the students. We are trusting that [clubs and sports teams] will be mindful in their decision as to whether a shirt is morally and ethically supporting the values of their organization and Juniata College."

Appropriate or not? It's up to your good judgment, virtuous, responsible friends: The Juniatian, serving students since 1924. We uncover, so you can read our spread.

Class gifts

continued from page 2

deposit you place when you decide to come to Juniata," said Fultz. "Barring no major issues, like damaging your dorm, you get half of that deposit back. At Senior Salute you can choose to give a portion of that money or even all of it back for your senior gift."

That money is then placed into an account which can only be used for the class gift. According to Fultz, if not enough money is raised in the initial collection the money remains in the account until enough money is raised

Braxton as Bush: mock debate informs

continued from page 3

niata by representing Bush.

The mock debate definitely met the goal of spreading objective information to its watchers.

"Attending an event like this and informing yourself about all of the issues is essential for making the right choice," said Miraldi. "I am extremely proud of the Political Communications students for bringing their vision to life."

"Students will be casting a more-informed ballot on Tuesday," said Plane.

Braxton agreed. "Leave better informed and participate," he said.

Student Gov. funding process

continued from page 1

same CIS.

"I would not want [the proposal] to be a hindrance to those who want to be involved in several clubs to a high degree," said senior Leslie Vogt at the meeting. Vogt is a member of Chemistry Club, Recycling Committee, Society of Physics Students, and the Environmental Science Society.

Executive Board officers said that a student could remain active in as many organizations as he or she wants by taking offices other than president or treasurer. The stipulation is proposed to avoid one person having multiple votes in the budget process.

Weber stated that she could create a list of students who hold multiple offices to see how many officers this point would affect.

Discussion also pointed out that the proposal is not clear on what happens if the Senate does not approve of the final budget proposed by the Allocations Board. Several people who attended the meeting suggested that another step should be added to the allocation process. This step would allow the Senate to make suggestions to the Allocations Board in case of a disagreement on the final budget.

Additionally, a rubric "will clearly state a maximum allocation for different commonly budgeted expenses, [such as van rentals]" according to the proposal. The proposal also states that various aspects of each organization will be reviewed, including but not limited to "the number of members, the number [of] events, previous spending habits, and involvement in the school community."

A separate pool of money would also be available for clubs to petition for special funding for a one-time purchase or project.

The proposal was created to address complaints raised over the past few years regarding the current allocation process, which is entirely run by the Executive Board and approved by the Senate without club representation. The senate currently consists of class officers and specially appointed representatives.

"We want to get clubs involved in their own budget process," said Kelie Cummins, vice president of the Executive Board.

Senior Chris Brookhart, general manager of WKVR, attended the meeting. Afterward, he said, "It's good that [Student Government is] trying to get clubs more involved in the budget process. That way, clubs can explain why they have certain expenses rather than letting Student Government decide for them."

If approved, the CIS committees will be formed this fall, and allocations will be discussed in the spring for the 2005-06 fiscal year.

Discussion will continue before a vote at the next Senate meeting on November 11 at 8:30 p.m. in Alumni Hall. The next meeting will again be open to the public. The Executive Board encourages club members to read the full proposal online at http://clubs.juniata.edu/studgov.

Campus working for accessibility

continued from page 4

them into areas of campus that are convenient and accessible to her. However, the College has no control over where Frye's new friends will be located. Visiting friends who live on floors that are not accessible to her wheelchair is difficult, but she makes the best of it.

"Friday I dragged myself up four flights of stairs to help decorate the hallway of a friend a few floors up from me," said Frye, who lives on the first floor of Terrace. "It may have taken me 30 minutes to do it, but it was a great workout and totally worth it. In fact, I'm doing it again this weekend."

Frye has found that Juniata community members are helpful with accessibility.

She continued, "I have two wheelchairs on campus, the electric one I use to get around campus and my manual chair for the room," said Frye. "However, one day my electric chair's battery died between classes so I had to use my manual chair. It is not an easy task to go up the hill from Ellis to Good. About halfway up I thought I was going to die, but some nice guy I don't even know offered to push me up the hill. It just proved to me this campus was great."

Herzog said, "Accessibility is not just for those in wheelchairs, it's for those with seeing and hearing needs as well as you and I who are able bodied. It's a lot easier for someone to carry a box down a ramp than down seven

CORRECTION

The Juniatian strongly regrets the following error in the October 14 issue:

"Diversity rising in student body," page 2 – Sophomore Collin Thompson was quoted in the article and referred to several times by the masculine pronoun "he." Thompson is female. The Juniatian profusely apologizes for this mistake, which was made in the editing process. In the future, the Juniatian will take extra care in the editing of articles with quoted material.

We are all Palestinian

Emily Eller

When asked what he wished more Americans knew about Palestine, Juniata student Mahmoud Al-Dabbour said, "The truth. And I would like them not to trust the news as much."

Over the past few years, clubs and groups at Juniata have worked to increase awareness of the situation in the Middle East. But this year, whether due to increased violence in Palestine, the wars in Afghanistan and Iraq, or the presence of a Palestinian student on campus, there seems to be an especially large effort to educate the public about Palestine.

The fall play and Student Peace Organization both focus their attention on the reason for this movement. In addition, a new club formed on campus called the Palestinian Solidarity Circle. On top of that, two students, one American who just returned from an internship in Palestine,and one Palestinian, are providing perspectives from invaluable firsthand experience.

Al-Dabbour is Juniata's first Palestinian student. When home, he lives in Khan-Younis which is just south of the West Bank. He is here with a program called Partnership of Learning and Undergraduate Study (PLUS), which is a new program funded by the US State Department to foster US/Arab understanding.

Others are trying to promote understanding as well. "I think if you ask most people about Palestine they won't know very much," said senior Rebecca Shoaf. She is working with the international play reading series this semester. The international play reading series will serve in place of the fall play. It will consist of three readings focusing on three distinct regions of the world: France, Latin America and Palestine. The Palestinian reading will be held on December 2.

Along with Al-Dabbour and the Palestinian play, senior Joseph Viscomi is bringing his own unique perspective from Palestine to Juniata. Last semester Viscomi left the Juniata campus and spent four months in Jordan studying Arabic, followed by a three month internship in the Palestinian West Bank.

He is currently trying to educate the Juniata community about Palestine while simultaneously helping the people he worked with this summer, by setting up a co-op with a group of Palestinian women who make embroidered goods. He is hoping to sell the items to Juniata students through the Student Peace Organization.

"The money then goes back to the village," explained Viscomi, "which is important because many of the men have lost their jobs due to the occupation and now even more because of the [Palestinian separation] wall."

The Palestinian Solidarity Circle is trying to provide the campus community with a Palestinian voice. "Basically, we're doing education, because there isn't a dialogue" explained senior Alexis Donkin. The group is hoping to bring speakers and awareness about the region to Juniata.

All the groups mentioned the importance of education and the hazards of misrepresentation of the area by the media. "I think if people see the numbers, they'll see that it's not one-sided and it's not just a matter of terrorism," said Viscomi.

The numbers are staggering. According to an October 22, 2004 release from the Associated Press, there have been 979 Israeli deaths compared to 3,839 Palestinian deaths since the September 2000 Palestinian uprising. These numbers demonstrate a sharp contrast to the perception many Americans have of the conflict.

"People always see it as 'Palestinians bomb, so Israelis have to protect themselves,'" commented Viscomi. "They don't see the structural violence against Palestinians."

Al-Dabbour hopes that his experiences here will help him heal his country. "I hope I can apply what I've learned here to serve my people back home." What he may not know is how affected Juniata is by the Palestinian experience.

"I've learned a lot about Palestine and Islam," said Donkin. "We've created a space for dialogue and humanity where before there was none."

Apathy is Lethal: Dey took err jobs!

Migrant workers in the Southwest

Mary Gardiner

Almost every day, patrolmen in the Arizona desert find another dead body, decaying in the stagnant heat. Some are identified, others remain unnamed, but all have families they left behind with hopes for the future.

Most feel like they don't have a choice. Millions of Mexicans and other Latinos are working in cheap labor factories called *maquiladoras*, making less than $40 for a 48-hour work week. Fathers can't even feed or clothe their families. Worse yet, they know that the Nike jerseys they are manufacturing are often sold for $200 a piece.

Some make a very bold decision: they travel to "El Norte." The risks are many, but the payoff is great. They hope to make more money to send to their families.

There are two ways that migrants come into the US: first, through *coyotes*, or smugglers. The U.S. government speculates that approximately 17,000 people arrive through smugglers each year. The price is high. Very often, a *coyote* will charge a migrant between $1,000 and $3,000 to be smuggled into the U.S., with no guarantees of even making it.

The second option is to go it alone. 700 people walk through the deserts of Mexico toward Arizona everyday, through 100-115 degree heat. It's often a week long journey with very little water or food.

This is where the death toll increases so rapidly. Imagine walking with little more than two gallons of water for at least a week, in 110 degrees. Patrolmen do not only find dead bodies every day, but also find clothing, blankets, underwear, suitcases, baby bottles, and anything else one just cannot continue to carry under such straining conditions. And some still just do not make it.

The fact that thousands and thousands of people are dying—literally *dying*—just to try to work in America is scary.

Part of the problem stems from the campaign, "Operation Gatekeeper," which former President Clinton instituted in 1994-1995. It sought to keep migrants from entering the U.S. through cities. Since that campaign, over 3,000 people have died in the heat from strokes, exhaustion, and hyperthermia.

To visualize the extent of this crisis, think of the immigration problem as a balloon. Economic injustice will always drive people north, over the border. Squeeze one end of the balloon, and another side just expands. Now migrants have no choice but to enter through fatal deserts.

The group *Derechos Humanos* ("Human Rights") has realized this travesty and placed dozens of 200-gallon water tanks and stations with food throughout the desert area near the southwestern US border with Mexico. Their actions have saved hundreds of lives.

So how can you help save migrants before the death toll doubles? Spread the word! There are three links on the Juniatian website that connect to different organizations that help raise funds and support the stations that keep migrants alive.

Another way you can fight against human injustice is by supporting migrant worker bills. There are several proposals in congress that help Latinos needing work to come over the borders safely and work jobs.

Don't worry about losing our American jobs, though. The bill requires the supervisors to be sure that there are no Americans who want to work those jobs. This helps migrant families sustain themselves and achieve an education. (Interestingly enough, Canada has started their own guest worker program for all the Latinos that the America

Presidential perspective

Q&A with President Kepple

"JAB typically offers a bus trip to New York City every fall, but so far there has been no announcement of it. Will the trip happen, and if not, why?"
You will have to ask JAB about this one. It always seemed like a good trip to me.

"As nearly everyone on campus is aware, the new pond outside of Enrollment was filled with soap bubbles shortly after its construction. Do you see this as inappropriate defacing of college property or merely an amusing prank? Will the administration take action to ensure that this kind of damage does not happen again, at the pond or elsewhere on campus?"
While we didn't have any money on it, several of us assumed it wouldn't take very long for someone to put soap in the new water feature, but I wouldn't have guessed only 24 hours! The first time it is amusing. Now we have fish in it, and it does take a good bit of time to empty the water and clean out the pond, so I hope it does not happen again.

Students, faculty and staff may submit questions for the Presidential Perspectives column by e-mailing juniatian@juniata.edu. Questions are forwarded to President Kepple anonymously.

LETTERS TO THE EDITOR

Return of the Native

I read with interest your cover story, Return of the Native. On page 16, John Hille, VP of marketing, is quoted, "I suspect that some of the alumni may give to the statue because of their feelings to the [Eagle] mascot, but that is not our motivation." Why, then, does the purpose of the statue not come about in Hille's conversation, or your report, until the seventh paragraph from the end? And, why is the Vice President of *marketing* directing the efforts for the creation and placement of a piece of public *art?* It certainly occurs to me that this is motivated by a desire to win back contributions from alumni. For what it's worth, in my 3.5 years at Juniata College, I've never heard anyone talk about a Native American heritage. Hmmm.

Lynn Cockett
Asst. Prof. of Communication

I happened to read about the $400,000 statue just after I sat in a Good Hall classroom with rain dripping through the ceiling. The proposed Indian – excuse me, Native American – statue seems like a bad idea to me, for two reasons.

In the first place, the statue is clearly intended to serve as a permanent bronze thumb in the eye of those who voted to change the mascot in 1994. Instead of offering reasons and argument, the donors have chosen a mute and obstinate display of their sour grapes.

I abstained from the vote (I thought the whole thing was pretty silly) but it *was* put to a vote. The proponents of the Indian did not persuade the faculty to keep it. If they want to re-open the discussion, fine. But it should be a discussion. This is just childish.

In the second place, the administration's attempts to make the statue sensitive are going to saddle us with tons of earnest Socialist Realism smack in the middle of campus. We will be able to tell it's sensitive because the Indians – damn it, Native Americans – will have wise and thoughtful expressions on their faces. No one seeing the statue, I predict, will be unmoved by its evocation of the injustices done to native peoples.

We will thus be doubly reproached. The alumni can consider us chastised for our Political Correctness, and the Native Americans can think that we are confronting our ancestors' injustices. Everybody wins, except perhaps those who like art.

Let me offer a counter-proposal. If we must have a $400,000 sculpture of an Indian on campus, I think it should be something more in keeping with Juniata's heritage of peace and nonviolence.

I think we should have a statue of Gandhi.

Now, about the roof of Good Hall....

Jack Barlow
Professor of Politics

Response to "Undecided"

I have just read the "Don't discount the undecided", and I must say I'm a little irked. Before this and going into the interview I had a high-opinion of the paper. I thought for a newspaper written on a liberal campus, it did a good job of remaining fair and balanced. I liked my interviewer. She was very courteous, detailed and very, very professional. Coming out of my interview, I felt positive. I felt I had been treated fairly and the piece would accurately represent me. I was wrong.

I talked to my interviewer for a good hour, hour-and–a-half. We talked about a wide-range of political issues and I had many good things to say about America, my conservative beliefs and the War on Terror. My interviewer dutifully wrote this all down and again I had good feeling of what I was going to be quoted on. Once again I was wrong.

Somewhere along the way from interview to press, the ball was dropped. I asked my interviewer to e-mail any direct quotations she would use. She did not. The one quote that could paint me in a semi-negative light or make me appear badly was used.

continued page 8

IMF commentary lacking

I read Mary Gardiner's 10/14/04 article on the IMF and the World Bank with great disappointment. Much evidence was presented without context, creating a misleading picture. For example, Ms. Gardiner states that Mexican poverty increased by 50% in 1995, implying that the Structural Adjustment Program (SAP) was responsible. Actually, Mexico experienced an economic crisis that year caused by their poor policies. The SAP put in place, plus over $20 billion in loans from the IMF, World Bank and the United States, allowed Mexico to bounce back quickly by developing country standards. By the end of the decade, income and social indicators were improving.

It's true that the IMF and the World Bank voting are based upon which country contributes the most to each institution. While that may seem unfair, these organizations are banks. Should you, as a borrower of money, be allowed to decide when you pay back your loans? If that were the case, no bank would lend you money.

Also, no country has to borrow money from these institutions. They do so because they are too poor a risk to get money from private sources. This is primarily due to the corruption in developing countries. If one looks at the most indebted countries, they are also the ones lowest on the Transparency International's Corruption Perceptions Index, a corruption measure.

Corruption is also one reason why debt relief hasn't worked in the past. Countries borrow money, politicians steal or waste much of it, and the countries can't pay back the loans and scream that they need debt relief. The IMF and the World Bank provide debt relief, the countries borrow more money, and the cycle continues.

According to the William Easterly's "The Elusive Quest for Growth" (available in the library), forty-one highly indebted poor countries had $33 billion in loans forgiven by the World Bank between 1989-1997. They collectively borrowed $41 billion during that same time period.

Part of the problem arises because Ms. Gardiner relies on one source, a website titled globalexchange.org, for much of her key data. The site provides no discussion for how they gathered their information or calculated their data. They also have a clear agenda. Relying so heavily on one biased website is a danger when writing articles or papers. The truth is far more complex than the one-sided view that the article and globalexchange.org presented. I would encourage anyone interested in learning more to take EB105.

Brad Andrew
Asst. Prof. of Economics

Dear Abby,

Please help! I am the president of Haiti who is continuously been strapped down by the International Monetary Fund. The IMF has forced us to cut services for many of our citizens making the situation worse in my country. Our debt is compounding and we are hoping that IMF officials are kind enough to relieve some of our debt. But, what do we do in the meantime? These IMF policies aren't getting us anywhere.

Sincerely,

Desperate in Third World

Dear Desperate in Third World,

Wake up! The problems of your country were caused by you and the other government officials that you cohort with. First, your country and other countries probably refuse to institute the conditionality agreements that the IMF and World Bank hand down. These allow for stricter monetary and fiscal policy. Hey desperate, ever hear of a balanced budget or are you too worried about building that next palace of yours? These conditionality agreements wouldn't need to be handed down in the first place if you were a proper steward of the fiscal situation in your country. How about taking personal responsibility?

The problem with countries like yours and dozens of others is they borrow without thinking of the long-term consequences and then when they get saddled under mountains of debt, ask for debt relief. The high interest posed on the loans is not to make the life miserable of your people, you do enough of that yourself. The high interest is because your country is a high economic risk for these international institutions for the exact reasons you talked about above. You borrow, waste it or line your pockets with it, don't pay it back, then collapse under the debt. This is why your interest rates are so high. Plus, the money you pay back to the IMF and World Bank, when you do pay it back, goes to pay for more loans to other countries much needier than yourself.

The IMF was created not for a tool of "exploitation," but as a way to stabilize world exchange rates and help countries experiencing a short-term crisis. The first step your country can take is to hold elections and make sure you're voted out of office. Get people in there who will open up markets to allow the people of your country to become self-sufficient and produce what they have a comparative advantage in. Contrary to popular belief, the IMF and World Bank aren't out to get you. Since their inception, world trade rates have grown phenomenally. Countries like South Korea, Taiwan and Singapore have become highly developed countries largely because of free trade and the stability provided by the IMF and the World Bank. In my opinion, 50 years is NOT enough!

Student Govt. proposal questioned

I attended the latest Senate meeting on October 28th. Despite the limited advertising of the meeting, every student did receive an e-mail listing the agenda for the meeting. I know we are all busy with tests and papers, but the last item on the agenda, "the presentation of a new financial allocation process for RSOs," should have made anyone involved as an officer of a campus club consider attending. I am not a class officer, but I decided to take a two hour break from my homework and find out what the proposed allocation process would mean for the clubs I serve as an officer. Extra curricular club activities are an important addition to academic life at Juniata, but only a few other club representatives attended the meeting.

It turns out that the new allocation process has the potential to limit the load placed on the Executive Committee to distribute funds and spreads the responsibility among Common Interest Subcommittees (CIS). (See the Student Government website for more details.) Each CIS is made up of the president and treasurer of each club in the group. Unfortunately, the proposal also states that a student cannot represent more than one position in each CIS, effectively limiting the ways that active and committed students can participate as officers in clubs that have similar interests. In my opinion, the proposal should be amended to either allow one person to serve more than one club on the CIS or let a vice-president or other officer serve on the committee without forcing club officers to switch positions. Club presidents are elected because the club believes they are the best candidates to organize meetings and activities – Student Government policies should not deter dedicated Juniatians who want to take an active role in extracurricular activities from assuming officer positions.

I know that two hour meetings are a considerable time commitment during this time of the semester (or any time of the semester), but I implore anyone who is an active member of clubs on campus to attend the next Senate meeting on November 11. The new allocation process, including the clause that prevents any one student from serving in more than one position (president or treasurer) on a particular CIS board, is pending approval.

Talk to your class officers. Discuss the issue with your friends, and attend the meeting on the 11th to find out how the new policies will affect your involvement in clubs on campus.

Senior

Response to "Undecided"

continued from page 7

The quote even appears to be placed in the article haphazardly; something to throw my name and my organization into the article so that it appears to be balanced. As it stands, Students for Change and its two interviewed members were quoted 5-1 over me. I would have been happy with 2-1, but 5-1 seems a little off. Apparently out of all my quotes and sayings on America and conservative values, that one seemed to be the best…

I will not deny it, I did say that. It represents my personal beliefs on why one should be a Republican and join the GOP. I made my quote at the time thinking of the Republican platform on gay marriage and gay civil rights. Knowing the utmost importance of these issues to the gay community (having a Democratic gay aunt who e-mails me semi-monthly anti-Bush propaganda), I figured a member of the gay community wouldn't find membership in the GOP particularly attractive. I merely oversimplified that though into my printed quote.

Now many people will believe my quote to be wrong, and it may be. I'm human; I have been wrong before and I will be wrong again. While my quote might be entirely wrong, I still highly doubt AWOL will be joining True Patriots in our Bush rally in the upcoming weeks.

FNL turnout doesn't reflect quality

Morgan W. Sample

Friday Night Live is a wonderful series held here on the Juniata campus, and this past Friday, October 29, Juniata had a visit from a wonderful singer.

Tamara Bedricky, a 24-year-old singer/songwriter from Detroit, Michigan gave a fantastic and energetic performance in the Ellis Ballroom. Amid the paper-covered tables, students with hot wings and cold drinks in hand, were in for a treat. Bedricky took an active role with the audience, and made the Ballroom take on a coffeehouse-like atmosphere with her comforting and welcoming performance.

Bedricky has opened for Sheryl Crow and recently released a CD entitled "Through These Eyes" which is a fitting title for her music. She writes and sings about personal experience and emotions that are easy to relate to and understand.

She started the night with a powerful song entitled "I've Got 3 Hours Till I'm Finally Back Home." It fit the personal atmosphere perfectly when she shared with the audience that she was taking the weekend off so she could be back home for Halloween.

She followed with songs such as "Coming Clean," "A Million Miles," "If You Think You're Right, You're Wrong" and "Tell Me Why." These songs were an insight to who she is and what she has gone through in her life. "Sometimes life can make you feel incomplete," a line from "Coming Clean," sums up how she—and no doubt probably everyone in the audience—felt at one point in her life.

Morgan Sample / Juniatian

Tamara Bedricky performs at Friday Night Live.

Other songs spoke of past loves, past and present friends, and emotional experiences lived and fought through. "Tell Me Why" was a song Bedricky had written about a friend, James, who she met when she and her parents moved to Nashville. It spoke of how he saved her, and she later shared how she and James are still the best of friends.

She finished her concert with songs featuring a variety of themes, starting with "So Am I", a song about having mutual emotions and feeling what someone close to you is feeling at the same time. "Tied up and Twisted" which she made very clear was not a song that the audience, as students, couldn't hear, because it was *mentally* tied up and twisted. Next was "Blue", a song that everyone can relate to, about that person she had that uncontrollable crush on; the one that makes one simply say, "Damn you're hot," as Bedricky puts it.

Bedricky also sang a cover of "Linger," by the Cranberries.

"I liked how she mixed original works with a couple of remakes," said senior Stephanie Hodgdon.

Bedricky stuck around to comment about the show. When asked how she would describe her music she replied, "Alternative singer/songwriter with a pop influence," a comment that fits her style to the tee.

She said that she has been playing guitar since she was 14 and only took up singing about 5 years ago. She said that the music, "really helped me deal with my emotions and teenage everyday issues. It was an outlet for me."

Bedricky gave a beautiful performance, with great stage presence that made it obvious she felt very comfortable in front of a group. Unfortunately, the group of Juniata students that turned out for the show was small.

"I thought she had a very soulful voice but more notable was the lack of turn out from our lame student body" said junior Tim Cole. When the ballroom started out less than half-full, it was only more of a disappointment to see many members of the audience leave the performance only 35 minutes into it.

Although the student body had a more than disappointing turnout, Bedricky was still thrilled about performing at Juniata. She said, "I thought it was great. I really feed off the audience and I think the students were really into it so that makes me into it."

Her quote was a credit to the students who did come to and stay through the performance and were enthusiastic about something they felt was more than worth an hour on a Friday night.

Comedian Megan Mooney performs for FNL tonight at 10 p.m. in the Ellis Ballroom.

Scavenger hunt by car in downtown Huntingdon

Maria Piazza

It was a typical Friday night in Huntingdon, and there was nothing to do...or so most people thought. Catholic Council of Juniata's Campus Ministry, however, wished to disagree. Last Friday the Catholic Council held Road Rally, a scavenger hunt through Huntingdon by car.

Students competed in the Road Rally by following the clues to each destination in order to get tokens that would be presented at the end of the hunt.

Then, when they had completed the scavenger hunt, the competitors were given points for almost everything they had done up until the end. There were points given for group members wearing costumes, points for the car mileage, as well as for how well each of the groups understood the clues.

The clues were tied into the themes of scary movies, such as "The Exorcist" and "Frankenstein." The destinations were equally tied into the different themes of scary movies. For the movie "Frankenstein" students ended up running into a person dressed up like Frankenstein in a lab in von Leibig. This Frankenstein even pulled the town of Huntingdon into his crazy pitchfork-waving world with a clever reworking of a scene from the movie.

Of course there could also be problems getting to the scenes because of not understanding the clues. But that problem was anticipated and cheater clues were included in a second envelope which helped the competitors find the sites, but also took away points. There were other opportunities to make up lost points, like naming characters from the movie at each of the sites, or scoring well on a Juniata Factoids Quiz.

The scavenger hunt ended at 9 p.m. While the points were tallied, Catholic Council offered Halloween games and food in the Tussey and Terrace Lounge.

Prizes were given to the three groups with the least amount of mileage and most points at the end of the hunt, as well as for the best costume. The groups were each encouraged to donate 5 dollars and canned food for charity. Many brought extra cans in order to earn more points.

Once the points were tallied, the winners were announced.

Anna Elias / Alfarata

The Catholic Council hosted Halloween Road Rally on October 29. Council President Anna Elias and the group above helped to organize and put together the large scale scavenger hunt as a way to collect funds and food for charity.

Campus community enjoys Fiesta Latina

Richard Pulliam

Held on October 23 this year, Fiesta Latina is an annual function on campus. Sponsored by Spanish Club and Club International, it was a great way to taste all kinds of different dishes from Latin cultures and to socialize with many students and professors.

Some of the delightful dishes included food like 'yuca salad' which is a type of cold potato salad with different meats in it. Also served were quesadillas and 'paella,' which consists of rice, chicken and shrimp which flavored the rice and made it sweet. For dessert the clubs served 'tres leches,' which is a type of pound cake that consists of three milks is quite moist and also sweat.

Melissa Fiori-Agoren made the amazing paella. She said that, "mounds of chicken and shrimp, four times more what the recipe called for," went into the successful dish. Paella is a Spanish/Cuban recipe that can also have muscles, scallops, rabbit legs and sausage in it.

To the delight of all, after the buffet dinner, club members pulled out a piñata filled with candy that the children present could volunteer to hit. While the children had fun whacking and collecting the candy from the piñata, the rest of the audience had a good laugh watching them.

After the piñata was broken and the candy safely in the hands of the 'ninos,' six people from Club International began the salsa dancing. Soon after they started, they went around the room and encouraged people to join in on the fun.

When asked about the fiesta, senior Jacob Warner said, "I enjoy the food, music, and camaraderie."

Senior Eli Finberg agreed, saying, "It was a culturally exotic evening in the center of campus and I think it's splendid."

Fiesta Latina began three years ago to celebrate the Latin culture at Juniata College. It is currently being held during the fall of each year. Though according to Gael Lamielle, president of Club International, the very first Fiesta Latina was "a mess," this year there were only a few small glitches in getting the event ready: there were no utensils. However, the very generous and responsive Sodexho saved the day by providing the clubs with the necessary utensils.

Fiesta Latina cost $4 per ticket and was a considerable success, proving it is not an event to miss on the Juniata campus.

Right: Even the kids were involved in Fiesta Latina. After the meal each niño got a chance to break the piñata. ***Hannah Rauterkus / Juniatian***

Column from abroad: Cuídate mucho

Jay Trovato

You've all seen in the movies and heard from your friend's friend's cousin how Americans who go to other countries get robbed, get some horrible disease, or get kidnapped by rebel guerrillas. Yes, hazards do exist abroad, but *your* actions will probably determine what happens to you more than any third party in your host country.

As you all know, just about any city in the world is bigger than Huntingdon. With more people around you, NYC-style common sense is in order: don't flash money or valuables around, travel in groups when possible, and try not to attract attention to yourself. That last point has been difficult for me as the token blonde guy in a dark-haired population, but if I see someone staring at me I usually just extend a friendly greeting. If you don't need important items like passports and bank cards, don't carry them with you – leave them hidden in your room. Don't walk alone on dimly lit roads at night, and be extra-careful in big crowds.

It's also a good idea to stay clear of personal political involvement in your host country. *Do*, however, discuss politics with the natives, and find out everything you can about their political system. I was fascinated by the extensive and enthusiastic campaigning that took place during the race for the governorship of Veracruz state. One of the candidates even gave out free promotional 3-minute phone cards!

As far as avoiding major diseases, get needed shots before you leave home (check the Center for Disease Control at www.cdc.gov/travel for medical advice about your particular host country). It's more likely, however, that you will face minor respiratory or gastrointestinal problems, since new climates and foods can upset your system. For me, Mexico's rainy season has been a drag health-wise: I've had two colds in three months. For minor stuff, just take it easy for a few days and eat carefully until you're better. See a doctor if you happen to come down with something serious.

One thing I've learned the hard way is that a Mexican's average

Movies: "You can't deal with my infinite nature, can you?"

Carolyn Keller

The independent film review returns! I know you're excited. If you aren't, fake it, because these are the movies worth watching. This week the movie that should capture your attention is, drumroll please... "I Heart Huckabees." Yes, it's finally out in wide release and it's here! (read: Altoona) And existential detective comedies don't get any better. Which may or may not say much.

"Huckabees" stars the great Dustin Hoffman and Lily Tomlin, as two existential detectives who will find the meaning of your life for you for a fee.

Also starring Jason Schwartzman ("Rushmore"), Jude Law (everything under the sun this movie season) and Mark Wahlberg ("Three Kings"), the movie accomplishes something profound: There is no time in recent memory in which I've enjoyed a movie so much without having a clue what on earth was going on.

The seemingly simple, crazily creative premise is only a hint of what's to come—and when it arrives, you may not know what to make of it. The movie seems to delight in its roundabout-ness...but whether or not that roundabout-ness is problematic or charming depends on the viewer.

Hoffman and Tomlin attempt to solve a series of coincidental encounters between environmental activist Albert (Schwartzman) and a rather tall African man. Things start to get messy when Schwartzman's inner psyche reveals that he has a fascination with salesman Brad (Law), who stole his job of protecting an endangered marshland. Schwarzman wants to protect the marsh with poetry ("You rock, rock."); Brad wants to use Shania Twain for the job. It's a slight conflict of interest.

Add to the mix the evil existential detective from France (Isabelle Huppert), Wahlberg's "dismantling" fireman Tommy, and Naomi Watts' hilarious fashion-model-turned-sunbonnet-queen, and the movie becomes appropriately oddball. To divulge the entire plot would put a damper on the film's randomness, and on the film itself.

"Huckabees" is a fun film, but it is also lumpy and awkward at times. You may not know where it is going (and you may not care) but at least the writing is good and the actors are in top form. Schwartzman is funny as the deadpan, disillusioned environmentalist; Law channels Brad's cardboard cutout overachieving sales rep freakishly well; and Wahlberg steals the film as Albert's slightly panicky, increasingly unhinged "Other" (think "sponsor").

Yet they all seem like they should be starring in three completely different movies.

And there's the rub. The bouncing, bounding plotline is both the soul and sole source of brilliance and confusion in the film. The viewer can sit back and enjoy the performances, and at the same time wholeheartedly second Brad's demand when he asks, "Wait, what does that even mean?"

Writer-director David O. Russell doesn't seem to care. "Huckabees" is a far cry from his last venture...the superior, visceral, and devastatingly original "Three Kings." Both are equally imaginative and entertaining, but "Huckabees" lacks the aggression and direction of its predecessor. It tries to go in too many directions at once. Though one's based on whimsy and the other, the Gulf War, both are in the position to ask the Big Questions. Both do it with humor, but where "Kings" aims to scathe, "Huckabees" falls squarely in the whimsical category...which is fine; it just doesn't always pack the punch it could.

Ultimately, "I Heart Huckabees" is going to either win you or lose you, depending on what kind of movies you like. If you're open to offbeat and funny, go see it and judge for yourself. The movie is both fluffy and philosophical, and as witty as it is loosely strung together. What it *is* worth is your five-to-seven dollars. Russell is a confident, assured director, and the cast is great. If "Huckabees" doesn't sound like your cup of tea, odds are "Three Kings" will be. Check them out.

Two and a half stars.

The high note

Jacob S Warner

This week I offer a special delight. I bring you a band that will be at Juniata on Saturday, November 20, promoting its second album, due to be released within weeks.

The band is IY (pronounced 'eye why'); the album is "Further Gone."

At a time when most of their peers are frantically searching for direction in life, these four late-teenagers from Ithaca, New York are producing music of a caliber that most bands will never reach, and if they do, few will have achieved as much before they could legally drink.

And this is their second album. The disk is a sophisticated smorgasbord of musical entrées, with styles, sounds and simplicity sure to satisfy everyone.

Track one sets the tone for the album. The disc begins with deep tribal beats, transporting the listener to a mysterious jungle of sounds, only to be brought safely back by a soothing voice that seems to penetrate to the very core of the soul. A subtle, yet captivating guitar strums in the background, eventually giving way to a Led Zeppelin-Smashing Pumpkins guitar sequence that makes you ask, "How old are these guys again?"

But as quickly as it dazzles, the guitar is quieted as a bow is pulled deliberately across the neck of a cello, producing a peaceful yet eerie interlude to the invigorating punk riffs and pulsating rhythms that propel the song forward at the next moment. The journey is brought full circle as punk retreats into the shadows and acoustic again basks in the spotlight. The soothing voice is audible once more, oozing from all directions, as the closing mantra-like words "no worries" settle into your soul like spiritual sediment in a fine wine.

With this elaborate musical collage, the band sets the bar for the remaining 14 tracks of their masterful disk. "Further Gone" is an album about life, highlighting its idiosyncratic, complex and fulfilling nature. By employing a wide array of sounds and pulling influences from all directions, IY has woven musical cloth bearing the pattern of life itself. When you combine the band's lilting lyricism with their depth of musical prowess, it is easy to forget how relatively young these artists are.

I got lost in the disc's fifth track; its upbeat feel and catchy yet conscious lyrics trapped me in a hall of musical mirrors. I got up and danced on waves of gentle guitar riffs, and careened around the room spasmodically during an intricate and inviting drum solo.

Further displaying their musical dexterity, IY moves from this pseudo-pop neo-hippie grooving to cool and contemplative instrumentals two tracks ahead. A sensual piano plays under a canopy of spacey sounds, entrancing and encapsulating the listener. At precisely the right moment, a drumbeat begins and a guitar sounds, giving rise to imaginative meanderings, as the mind is caught in the web of enticing sounds. From a distant point, harmonious voices can be heard and the instrumental slides seamlessly into the next track, a thought-provoking lyrical gem, laden with mesmerizing piano and blistering six-stringed synaptic assaults.

One track later the boys have slithered into a sultry, smoke-filled club, producing a sexy, blues driven, jazz-infused number concerning the dichotomy of

Adventures in bartending, part II

(nobody expects the Spanish Inquisition)

Carolyn Keller

Never underestimate the food service industry. Or the friendly folk who come in to take advantage of what it provides. You'd be surprised what you can learn.

Like history. Or perhaps it's social science. Bar 101 can be quite illuminating, and I'm not talking about the aging process of tequila. Rather, I'm talking about the countrymen who are aging the tequila. You can learn a lot in the BAC...oh sorry, I meant the Bartenders/Alcoholics Classroom.

For example, have you noticed that the number of Spanish speakers in the U.S. has been rising exponentially?

And did you know that in 15 years the Hispanic population is going to outnumber the Caucasian population here in the U.S?

And did you know that white people aren't going to like being the minority?

And did you know that white people are going to be so perturbed about this that in order to preserve their place in the ranks of...something-or-other...they're going to start a civil war?

I sure didn't. But I'll grab my Corona and sit back and watch the show. After all, interesting things happened at the Alamo.

Now I want you to sit back and imagine the person who said this to me. Start with a blank canvas. What do you see? How are your racial profiling skills?

Are you thinking...white.... male...educated businessman... jolly bar regular...perhaps Santa Claus in a previous life?

Me too. So backstory: This guys walks into a bar, almost every day, orders a double Manhattan up, downs it in a few seconds, and leaves. He's a trooper, or else an alcoholic. But he seems friendly nonetheless, and since this form of behavior didn't seem particularly healthy to me—at least not in the middle of the workday—I start to strike up conversations with him, because that is my job. And if I do my job, well I get better tips.

[In theory. Remember to always kindly tip your friendly neighborhood bartender.]

Well, the drink is $7.25

[Also: Don't buy your drinks at Olive Garden.]

My efforts to this day have not yielded more than a $0.75 tip from Good St. Nick, but they did yield the above conversation. Much like with my Meatitarian, I spent most of the conversation practicing my Straight Face and wondering if perhaps that nagging feeling was my leg being pulled, or if Jolly Businessman had perhaps misinterpreted the Onion.

Hispanics are so threatening, after all.

I thought about offering the kindly encouragement that if Pennsylvania were invaded by South-of-the-Borderians, at least we might have a decent nightlife. But somehow I didn't think that would be helpful. Also, his happy hour seemed to be quite enough.

So I bit my tongue, and marveled at the fact that my being an also-Spanish major by default could spawn such oddities as, "Oh that's wonderful you speak Spanish, because when the Spanish Inquisition comes, at least you'll be prepared!"

Here I was just hoping basic language skills would keep me off the street after graduation.

It could be a hint of some kind, a sign from the alcohol gods, if some such exist: Why grad school? I'll just stay behind the bar for awhile...it's quite the education.

Cuídate mucho - continued from page 10

height is several inches less than mine. One day I was walking along, not paying attention, when suddenly my head banged into a metal sign which most Mexicans could have easily passed under. I apologized to the sign's owner, who just looked at me as if to say, "Watch where you're going, kid."

Her advice is a great way to sum up. Keep a close eye on your possessions, your health, and low-hanging objects, and you'll most likely make it home in one piece.

Do something Mexican!: When greeting your friends of the opposite sex, try using a light kiss on the cheek. Both people turn their faces to the left and give a simultaneous kiss. If you miss the cheek and kiss air, it's OK. Two women also greet each other this way, but two men shake hands and pat each other on the back.

The high note - continued from page 11

life and death, positing that "to die is our reason to live."

"Further Gone" is a superbly assembled menagerie. IY combines jazz, blues, folk, and pop with clever lyrics that drip with maturity and mindfulness. Bring a sponge to their show on November 20 and be sure to soak up some of what these amazing young artists have to offer.

IY will perform in the ballroom on November 20, with the Daddario Quintet, and hopefully another unconfirmed band. Tickets are $5 and all proceeds will benefit the refugees of Darfur, Sudan.

The Bookmarkables

Nate Thompson

You probably really wish you knew where you saved your rough draft of that twenty page research paper that is due tomorrow. Unless you are that rare breed who actually has every little file on your computer organized in ways far beyond normal human capacity, you only have one option. You have to sit there, staring dully at your computer until the Windows search finally crawls past the right folder.

Well, my friend, times have changed, and so has your reliance on one more program spawned in the offices of The Evil Monopoly known as Microsoft. Google, in all of its infinite wisdom, has released "Google Desktop." This is your salvation in more ways than one. You can download your electronic messiah free at desktop.google.com.

desktop.google.com

Addiction	2, Need-based.
Humor	3, Find it faster
Navigation	5, Google is divine.
Political correct.	3, Privacy worries.
Usefulness	5, A must-have.

Google Desktop searches your entire computer for files in less than a second. Its results are also far more inclusive than anything Bill Gates could scheme up. This program goes beyond simple documents, folders, and media files.

Did you ever have the unfortunate incident where you are writing a report and one of your sources suddenly disappears from the Internet or changes its webpage? Google Desktop caches (saves) the websites you visit. You can quickly search through previous versions if something changes. Also, when the Juniata network blows up later this week, you can view all those webpages while you are sulking and offline.

There may be a few times when you really wished you had saved that really funny (and perhaps incoherent) AIM conversation that you had with a friend. There may also be conversations that you wanted to keep for sentimental value or for whatever other stalking needs you may have.

Unfortunately, the outdated, free version of DeadAIM no longer works with the newest versions of AIM. There is a new way to take care of your online stalking. Google Desktop automatically saves every single line of your conversation the second you send or receive it, so you never have to worry about actually remembering or saving what people send you.

To add more icing to the cake, Google Desktop even searches Outlook emails. The program will also organize replies and forwards by the original message when it displays the search results.

There are a few drawbacks to this product. Its specifications recommend half a gigabyte of free space for Google Desktop. This program is also still in beta testing, so there may still be a few unforeseen bugs in it. It is currently only available for Windows XP and 2000.

There is also the issue of privacy. Any time a program from an internet-based company offers to save an image of your hard drive, there will be an issue of privacy. However, I will gladly put my faith in Google on any issue.

With the new Google Desktop Search program, Google has taken its searching capabilities one step closer to finding the missing remote for my television set. They have also created in this program the salvation of every disorganized college student.

If you have an idea for a future "Bookmarkables" column, please feel free to email your idea to the Juniatian@juniata.edu.

Road Rally scavenger hunt - continued from page 9

All of the winners were thrilled. First place went to the women of 306 East: Julia Williams, Bethany Stark, Thea Loth, Becky Davis, Kelsey Brewer, Jessa McKillop and Jill Seraphin. Their van, appropriately emblazoned with the words "Faster than You" on its back, rolled them to victory. Williams summed up the experience, saying that Road Rally "was awesome and we had a lot of fun."

The winner of the costume contest was Jeremy Langdon, who came as a girl all decked out in pink, from the tip of his head to the pink boots he had on his feet. Another girl came as a pimp, with her friends dressed as her working girls.

Another highlight in the costume department was Father David Arseneault, who dressed like a scared student, who came to talk to the priest. He helped out with the "Exorcist" site.

Those involved in the Road Rally deemed it a success, and were happy to donate so much to the St. Vincent De Paul Food Pantry. The Catholic Campus Ministry are ecstatic to have more food to give since the previous food drive didn't work out as well as expected, especially in comparison to the success of last year's drive.

Catholic Council president, Anna Elias said, "Everyone had a great time. I'm glad we do this every year."

This event might be over, but Catholic Council will create more fun before the year is through.

Field Hockey prepares for Playoffs

Jeremy Simmons

On Nov. 3 the Juniata field hockey team fell in the MAC Commonwealth Conference semi-final playoff game to Lebanon Valley. The team lost on penalty strokes, 2-1. Though this loss ends JC's bid to win the conference title, an at-large bid to the NCAA tournament still may come to the Eagles.

Juniata finished its regular season on October 30 with a double overtime loss to Houghton. The 2-1 loss dropped Juniata to 14-3 at the end of the regular season.

Freshman Leslie Stern gave Juniata an early lead as she scored her first goal of the season with an assist from junior Elise Zimmerman. Juniata goalie Melonie Sappe had three saves as she tried to help the Eagles hold onto their lead despite wet field conditions. Eventually Houghton's Kelly Mazzeo scored a goal to tie the game with less the four minutes remaining. Elizabeth Mueller ended the game for Houghton with a goal in overtime.

Juniata won its last Commonwealth Conference match on October 26 against Susquehanna, blanking the Crusaders 1-0. Freshman Kim Wagner scored her 15th goal of the season with 6:21 left on the clock. The goal brings her one goal away from the program record for goals scored in a season, set by Kathleen McGowan in 1988.

Melonie Sappe helped Juniata keep its lead by making four saves, one of which came on a penalty stroke.

The win improves Juniata's conference record to 6-1, with its only loss coming at the hands of Messiah.

The team had many other exciting matches leading up to the end of the season including a 2-1 win in double overtime against Moravian on October 9. Both goals were scored by freshman Kim Wagner with an assist from Meredith Low. Melonie Sappe stopped three shots in the match.

Washington and Lee would be the next to fall to the Eagles. Goals by Kim Wagner and Grace McCluskey gave Juniata a 2-0 win.

The next game was a 3-1 victory over Frostburg State, giving the team a program-record six-game winning streak. Elise Zimmerman scored two goals during the match with a third by Sierra Dickman.

Unfortunately the team's winning streak was ended by Mary Washington on October 17 as Juniata suffered a 3-1 loss. After a scoreless first half, Mary Washington put three balls into goal to take control of the match. Juniata tried to fight back as Kim Wagner scored a goal on which she was assisted by Elise Zimmerman with only 44 seconds left in the match, but it proved to be too little, too late.

The team then bounced back with 3-0 wins over both Seton Hill and Catholic University of America. Goals were scored by Sarah Bender, Elise Zimmerman and Kim Wagner.

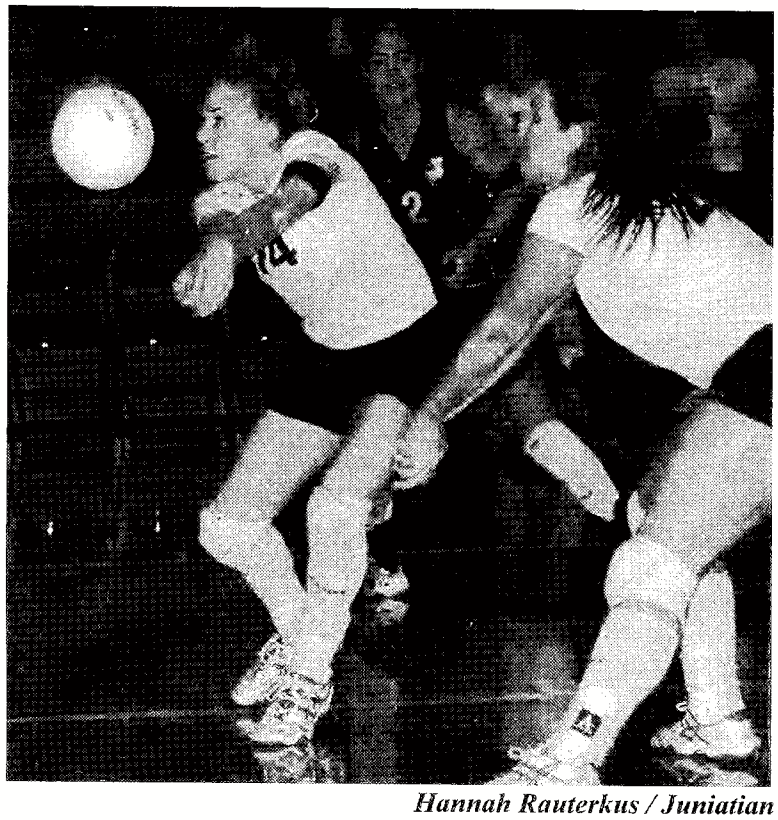
Even though the team ended its regular season with a loss, the Eagles have had one of their strongest seasons ever. Winning 14 games this season ties a team record for wins in a regular season, set by last year's team. The record for wins in a year is 15.

When asked about the postseason, coach Caroline Gillich says that "we are going to do what we have been doing all year and take it one match at a time."

This has been a big year for the Juniata field hockey team. Besides having an overall outstanding season, the Eagles also celebrated their 400th game; unfortunately it ended in a loss to Mary Washington.

Look for a complete story on Juniata's playoff loss to Lebanon Valley and the team's NCAA hopes in our next issue.

Eagles land top spot



Colleen Hughes

The Eagles opened their 2004 playoff run with an easy win on Nov. 3. The team defeated MAC conference foe, Lebanon Valley, in three games. JC took only 65 minutes to dispose of LVC, 30-9, 30-17, and 30-16.

With the victory Juniata advances to the conference championship game on Saturday at home. Larry Bock's program seeks its 24th consecutive conference title. The Eagles will face the winner of the Elizabethtown-Susquehanna semi-final match.

At its playoff tune-up, Juniata was in full flight during the Trinity University National invitational as they rose to a 30-3 record. At the end of the season, Juniata posted 11 consecutive wins and holds the top spot in the AVCA/CSTV Division III poll. This also marks the 34th consecutive season in which the Eagles have won 30 matches.

Juniata gained a much-deserved placement at the top of the national poll after some strong competition in Texas. The Eagles posted scores of 3-0 in winning both tournament games on Friday, October 29. The Eagles defeated both Texas- Lutheran and sixth-ranked Ohio Northern in the first night of tournament play.

Hannah Rauterkus / Juniatian

I've got your back. Senior Katie Charles (right) lends support as Erin Weiser (left) returns an attack in a 3-1 win over Carnegie Mellon.

The win over Ohio-Northern was the fourth time Juniata defeated a team in the Division III top 25. Juniata outscored Northern, 30-21, 30-18, 30-17. Katie Laucks and Erin Wisor eached knocked down 13 kills respectively. Laucks also added two service aces, as did Lindsey Habel. Setter Carli Dale directed the team with an impressive 48 assists.

Defensively, Stephanie Kines had a pair of blocks while libero Kelly Popernik aided with a team-high 15 digs.

Juniata also overpowered Texas-Lutheran by pounding out scores of 30-22, 30-25, 30-17. Dale dominated this game with her 38 assists and by tying for a team high nine kills. Laucks also knotched nine kills and served three aces.

continued page 14

Football finally posts first win

Brit Tew

With only two games left in the season, the Eagles picked up their first win, beating Lycoming, 14-7, this past Saturday.

After a scoreless first quarter, freshman quarterback Corey Doyle threw a 2-yard pass to Jason Koch to put the Eagles ahead, 7-0. Lycoming answered in the third quarter with a touchdown of its own to square the game at seven.

With 4:50 to go in the third quarter, Troy Beaver intercepted a pass and ran 55 yards for the winning touchdown. The Eagles were then able to shut down the Lycoming offense for the remainder of the game to ensure the season's first win.

According to freshman linebacker Justin Bell and freshman wide receiver Luke Ferster, the coaches had a great game plan and the team played with a lot of heart. "Our defense played really well," Bell said.

Prior to the win, the Eagles fell to Wilkes University, 49-21, on October 23. The Juniata defense could not hold back Wilkes, who scored five touchdowns before the Eagles could put any points on the board.

Juniata scored its first touchdown of the game with a little under a minute remaining in the first half. Koch caught a 29 yard pass from Doyle. Dan Heinlein kicked the extra point, sending Juniata into the locker room trailing, 35-7.

After a seventh touchdown by Wilkes, the Eagles scored with a five-yard run from sophomore Duane Ehredt. Doyle added a third touchdown with a one-yard run, making the final score 49-21.

Against Albright on October 29, the Eagles fell 48-17. Juniata let through four touchdowns and a two-point conversion before answering back with points of its own, a 42-yard field goal from Heinlein. Juniata trailed at the end of the half, 27-3.

The only touchdown of the third quarter came from Albright. The Eagles responded in the fourth quarter with a seven-yard touchdown pass from Doyle to Koch. Albright answered back with a 30-yard touchdown run.

Less than a minute later, Doyle threw a 23-yard pass to Koch for the touchdown. Albright came back with another touch down late in the fourth quarter.

The state of athletic recruiting

Tommy McConnell

Recruiting is the single most important aspect to the success of any athletic program at the collegiate level. While there are maybe more obvious – or at least visible – signs that a program is headed in the right direction, no one aspect indicates a program's success more than recruiting.

"The correlation between recruiting and success in terms of competitiveness is probably major," athletic director and women's volleyball head coach Larry Bock said. "We think we do a real good job across all the sports of developing players and athletes putting in the time and everything that we do technically and tactically and everything that we do with strength and conditioning. We're probably at the state of the art there. In all likelihood, recruiting not only remains, but is becoming increasingly important."

The importance is stressed even more at the Division III level, and more specifically at Juniata. Coaches must deal with a plethora of obstacles – lack of scholarships, tough academic standards, location concerns, tuition issues and more – to put a competitive team on the field.

Each coach deals with sport specific issues. One thing every program can agree on, though, is that a lack of talent is extremely hard to overcome.

"You can try as hard as you want with average players," field hockey coach Caroline Gillich said, "but until you get great players…a team can only, unfortunately, do so much. You need great players."

Usually, it boils down to the coach with the greatest players is the greatest coach.

"The quality of what you have to work with is what matters," men's basketball head coach Greg Curley said. "The better the talent [the players] have, the better they can be. But you can only make guys so much better. So you've got to get them here at the high end and hope you improve upon that."

The first thing any DIII coach must get past with a potential recruit is the fact that they are not getting a scholarship.

Baseball coach George Zanic said, "Kids watch so much sports on TV, everyone thinks they are going to get a scholarship. The first question, when you call a kid in the recruiting process is, 'How many scholarships do you have?' Once you get over that hurdle, it gets a little easier."

A potential athlete at Juniata is treated the same as any other student as far as enrollment and financial aid is concerned. The NCAA, at the Division III level, forbids coaches and enrollment to work together to lower a potential athlete's tuition.

Once a coach can overcome the scholarship issue, dealing with Juniata's relatively high tuition can be another tough pill to swallow for a student straight out of high school.

"I think its harder because the standards at the school continue to get tougher and the price tag seems to continue to go up," cross country coach John Cutright said. "Both are sticker-shock items for high school seniors, so getting them past that sometimes is a very difficult challenge."

Money is – and always will be – probably the biggest setback a coach has with a potential recruit. Still, the problem is not as drastic as it may appear.

"The biggest reason, I guess, would be money," Curley said. "But, we don't tend to run into that with top-rated kids. They'll either choose another school or have an opportunity at a higher level."

Juniata may still be pricey, but when competing in-conference, it doesn't tend to be as big a factor.

"Usually, I'll find that if it is a difference between three or four thousand dollars, [a recruit] will go to the school they want to go to," Zanic said. "The difference is when I am competing with a PSAC school, where the difference [in tuition] is overwhelming."

Another drawback is Juniata's tough academic standards.

"I think at Juniata it would be tough to ask a prospect who wasn't prepared for the education here...to go ahead and put forth the effort knowing they didn't have the tools to do it," soccer coach Scott McKenzie said. "If I knew an athlete who was a premier soccer player, but I didn't think they had the intellectual background to succeed at Juniata, I don't know if it would be fair of me to ask them to come here and fail academically but succeed on a soccer field."

"I'll be recruiting a kid," Zanic said, "get his SAT results, and you know the kid can't come here. The next spring, you see

Fast feet bring high finishes at MACs

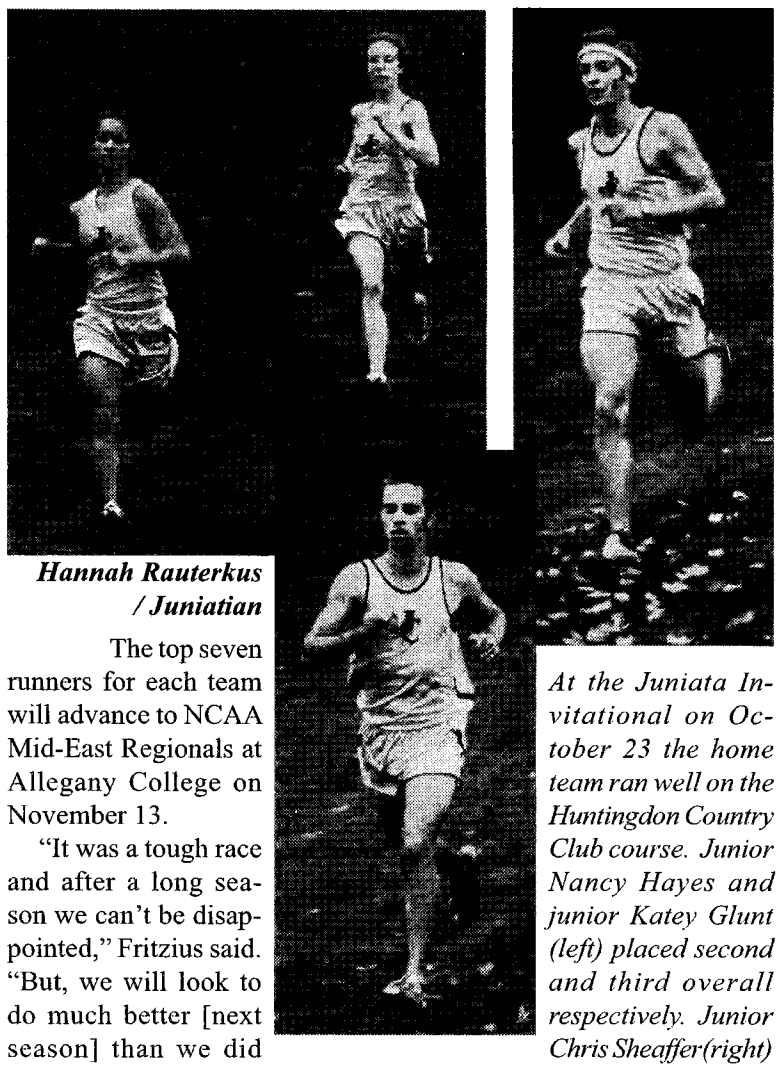
Corinne Barabas

On October 30, the cross country team headed to Belmont Plateau in Philadelphia to compete in the MAC Championship. The weather was good, but course conditions, hills, and a slippery terrain were not ideal. Despite this, both the men and women ran solid races.

"Not doing as well as some people were hoping, both teams came out ready to run, and raced as hard as they could," sophomore Christina Jones said.

The men took seventh place out of 13 teams and the women captured fifth in a field of fifteen teams.

For the men, juniors Chris Sheaffer and Justin Fritzius placed in the top twenty with times of 27:09 and 27:17, respectively. Sheaffer's time was good for 16th place and Fritzius finished in 19th.



"I think going into the meet we knew that we could get anywhere from 3rd place to 7th," Fritzius said. "As the race unfolded, a lot of things didn't go the way they were planned. I think that each individual runner on the team expected to place better than they did, but by the end of the race nobody really had a lot left."

Freshman Shawn Rumery, with a total time of 28:06, was the next finisher in 33rd place. Mike Vella ran a 28:52, earning him 48th place and freshman Ryan Conrad completed the 5-mile course only one second behind Vella. Freshmen Eric and Jason Hoover rounded out the top seven runners, finishing in 55th and 73rd places.

On the women's side, junior Nancy Hayes was a top-ten finisher. Running a time of 24:05 for the 4-mile course, Hayes finished in eighth place. In his twelve-plus seasons coaching the Juniata team, Coach Cutright had never had anyone finish top ten at MAC's.

Running a strong race for the Eagles, sophomore Lia Bella ran a time of 25:59 to finish 39th. Coming in fourth on the team, Sarah Bay, with a time of 26:33, finished 49th and Lauren Gates, running 26:34, finished 50th. Sophomore Christina Jones ran 27 flat and came in 57th place. Emily Landis took 66th place, with a time of 27:16, was the 7th finisher for Juniata.

"[Everyone] put themselves out there," Lia Bella said. "We took some risks which is what championships are about. The women did well considering injuries and illnesses."

Hannah Rauterkus / Juniatian

At the Juniata Invitational on October 23 the home team ran well on the Huntingdon Country Club course. Junior Nancy Hayes and junior Katey Glunt (left) placed second and third overall respectively. Junior Chris Sheaffer(right) finished first overall for the men while junior Justin Fritzius (center) finished close behind him for second.

The top seven runners for each team will advance to NCAA Mid-East Regionals at Allegany College on November 13.

"It was a tough race and after a long season we can't be disappointed," Fritzius said. "But, we will look to do much better [next season] than we did this year. There are 365 days until the next MAC Championship and the journey starts now."

Women's Volleyball - continued from page 13

On defense, Abby Leonard recorded 14 digs. Habel and Philips had two blocks each for Juniata.

On the second day of tournament play, Juniata closed out its regular season by posting a pair of victories. First, after dropping game one to Trinity, 30-22, the Eagles dominated its opponent, winning the next three games 30-19, 30-21, 30-24.

Finally, Juniata brought players off the bench in defeating St. Olaf, 30-17, 30-27, and 30-17.

"We have been working and changing around the line up," Wisor said. "We have depth in a lot of positions and we've been working to that strength."

Dale and Laucks were both named All-Tournament for Juniata. Dale was also named MAC Commonwealth Conference player of the week for the third time this season following her play at Trinity.

No playoffs for Men's Soccer

Dave Shalkey

In its last game of the season, Juniata fell to conference opponent Moravian, 5-0. The game acted as a summary of the whole year for the Eagles. Starters Robert Bowser, Will Spigler and Mike Alianiello were all unavailable. Injuries and suspensions that led to defensive breakdowns and offensive miscues plagued the Eagles.

The loss to Moravian on October 30 marked the thirteenth time this season that the men failed to score more than one goal in a game. Overall, Juniata was outscored 39-3 in conference games. Its record of 5-12-1 overall and 1-6 in the conference is not a great season, but this year's win total more than doubled last year's two wins.

A tough conference schedule made the playoffs elusive to Juniata once again. Juniata faced one of those conference foes on October 27. Elizabethtown was sitting on 699 wins coming into the game. The visitors must have been extra motivated to become the third NCAA Division III men's soccer program to total 700 all-time wins. Juniata could not stop the E-town attack as they scored five goals in each half. The Eagles playoff hopes ended with the 10-0 conference loss.

Juniata faced the best team in the Commonwealth Conference and one of the best teams in D-III soccer on October 13. Messiah has been a powerhouse in college soccer for many years. This year is no different. Messiah ran up 11 goals and held Juniata scoreless.

David McClellan of Messiah scored three goals in the first 19 minutes of the game. Juniata could only get two shots on goal, opposed to Messiah's 36. The game ended in an 11-0 loss for Juniata.

The Eagles traveled to Lebanon Valley on October 23 for an important conference game. The Eagles, with a record of 1-3 in the conference, needed a win to keep their playoff hopes alive. The Leb Val offense was too much for Juniata's defense. Juniata allowed a goal three minutes into the game, and then allowed six more before the end of the half. Juniata picked up its defense in the second half and only allowed one goal. Still, Juniata could only get three shots on goal.

Josh Cady was ejected early in the second half. He received his red card for a hard foul.

Before the two conference losses, Juniata stepped out of the league for a match against Pitt-Bradford on October 17. Chad Weller scored his first career hat trick. Capitan Jeff Gehring and Kyle Dunn each added a goal to Weller's three. The defense held Pitt-Bradford scoreless, ending the game in a 5-0 Juniata victory.

Mike Gwiazdowski had a game of highs and lows against Albright the day before, on October 16. The refs let the game get a little too physical, allowing hard fouls from both sides.

"That was the hardest I have ever been hit," Gwiazdowski said after he was elbowed in the nose on a Juniata corner kick. Blood was pouring from his nose and there was no call on the play. Mike kept his composure and headed in the only goal of the game later in the second half.

continued back page

Women's soccer season ends

Richard Pulliam

It has been a tough week for Juniata's women soccer team. After a strong win over Pitt-Bradford, the Eagles dropped three straight conference decisions. The three-game skid cost Juniata a winning record, but the Eagles still came within one game of tying the program record for wins. The Eagles finished 6-11-1 overall, but a disappointing 0-7 in the conference.

The win over Pitt-Bradford was a promising one. The offense really took charge in the game. With goals from Lindsey Treon, Alicia Walsh and two from Rebecca Shoaf, the team shutout the host, 4-0.

The women's soccer team had a 0-2 loss in the next game against Lebanon Valley. However, Juniata showed a solid defense, especially shown by midfielder Heather McMinn. She took home the game ball for game.

Player of the week Stephanie Mury said, "Our defense is strong. We are so concerned about defense that we can't covert to offense." Mury attributes the recent losses to this problem.

When asked what it feels like to be player of the week, Mury said, "It's pretty cool." She has always been proud of recent players of the week and the hard work that they had done for the team. "It feels good to know that you worked hard to achieve that," she said.

Juniata played strong out of conference, but struggled mightily in it. The Eagles will look to improve its conference record next season in hopes of making a playoff run.

Athlete off the Field

Katie Laucks

When you think about what you will be after you graduate, you often put yourself in someone else's shoes. You see yourself as a doctor, a lawyer, a biologist or a teacher. Either way, it is a profession that you want to fill. This issue's "Athlete off the Field" is taking that seriously.

Hannah Rauterkus / Juniatian

Rachel Taylor, a senior on the Juniata field hockey team, is taking those shoes and filling them. She student teaches throughout the week from 7 a.m. to 3 p.m. Take those long hours and add a two-hour field hockey practice, and you have a full time career woman on your hands - or at least one in training.

This semester, Taylot is student teaching at Mount Union Senior High School, where she is teaching 12th grade British Literature. As most of us understand, seniors in high school can be hard to motivate. But, this task is something that Rachel enjoys. "I find teaching seniors is slightly a challenge, but this makes me learn different strategies and methods of teaching," Taylor said.

Rachel finds the most difficult thing about going from student teaching to practice is the transition. All day she teaches students and then she must switch to field hockey practice where she is now the one being taught.

"I sometimes find myself using my teacher voice at practice," Rachel said. "And then my teammates will ask me how teaching was and that will slowly remind me that I'm on the field and not in the classroom."

The combination of student-teaching and field hockey is demanding, so staying involved on campus is a difficult task. But, Rachel said, "I have learned a few things from student teaching, one being multi-tasking."

Her ability to multi-task is paying off. Rachel has been everywhere on campus as early as this summer. She was a summer orientation leader and enjoyed every minute of it. As well as being an orientation leader, Taylor also volunteers her time to the Special Olympics. "I find this to be a very enjoyable and rewarding experience. I enjoy helping people learn," she said.

Along with these activities, Rachel is also involved in JIF, the Juniata Instructors of the Future. In addition, she is her second year as an RA for East Houses. "I enjoy being an RA. It allows

THE RANDOM ELEVEN

Matt Russell, layout editor

Blue Army and its toys: They recently changed the lamppost banners on 18th Street. You can just about touch them from the ground, so you'd figure it would maybe take a step ladder to accomplish this, right? Nah, not for the Blue Army. They used one of their mobile crane monstrosities to get 8 feet off the ground. Why carry a ladder when you can drive through crowds of students, right?

Not so Good: On a tour weekend, someone wrote 'BAD' on the sidewalk with an arrow pointing at the appropriate building. Well done.

Soapy fish sticks: President Kepple says in his column this week that they put fish in the new Enrollment pond to deter another detergent debacle. First, I see no fish. Second, isn't that like putting Bambi's mom in the forest to keep people from lighting fires?

Dude, these fake handcuff hurt: There was a Halloween party busted two weeks ago, but there was a little trouble doing this. The problem? "Haha, nice cop costume!"

Juvenile humor: See the headline on page 2? I had nothing to do with it. Heh.

Stall wall: Someone scrawled "Beef – it's what's for dinner" there. Then, someone crossed out "Beef" and replaced it with "Soy." Now, come on…

Statue crack: A professor, upon hearing a squirrel hit a classroom window: "For a second I thought it was the eagle that the Indian released."

Great Moments in Sodexho History: I went to Muddy and asked for a grilled cheese. The "cook" pointed to one sitting under the heat lamp. "Why would you make one and put it under the heat lamp to dry out and harden?" I asked. "Well, I didn't have anything else to do with it after I thawed it out," she explained. Wait. They FROZE a grilled cheese and SERVED it again? I quit from eating.

A friend's drunken explanation for his recent headache: "The problem is my hat is too small and my head is expanding."

Puppy power! My family's puppies tend to chew on power cords. One recently gnawed right through my laptop's cord while it was disconnected. I told my mom they'd learn real quick when they bit through a live one. She didn't think so. "They'll never make the connection," she said. Oh, I think they'd make the **connection**…

Trippy video games: I recently wore a t-shirt depicting the various mushrooms from Mario video games. Most people smirk when they see it. One professor had a slightly different reaction: "Heh, 'shrooms..."

Election 2004: Bush

continued from page 1

wee hours, but as time ticked by it became clear that there was nothing to do but sleep and wait.

The morning after

On Wednesday morning, many awakened to similar uncertainty.

"The first thing I did when I woke up was turn on the TV," said sophomore Gabi Cushman. "All they were talking about was Ohio."

Indeed they were. Ohio was still counting provisional ballots. As the margin narrowed, Kerry supporters remained hopeful.

"When I got up, it was still 252 for Kerry and 254 for Bush, and I thought it was going to be close," said junior Sarah Wharton. "But then in French class, a student had their laptop out and found out Kerry conceded. My French prof seemed like she had the wind knocked out of her. We were all devastated."

The waiting ended at about 11:30 a.m., Wednesday morning. Many found out at lunch.

"We won!" exclaimed Bush supporter Mike Fouse at lunch.

"I thought Kerry was going to win—it was a major shock," said another Bush supporter, senior Alex Monteleone. "I'm definitely happy that there was such a bigger turnout."

Others weren't so enthusiastic.

"The atmosphere on campus is more liberal, so you feel like Kerry's gonna win. With all of the stickers and the buttons, you're totally oblivious to the rest of the world," said junior Bobby Wadud.

Some professors buzzed at lunch, hesitantly accepting the reality of concession.

"If it weren't for the possibility of four Supreme Court seats up for grabs, it'd be okay. That's the biggest downside to this election," said Dr. Miller, a religion professor.

Dr. Tuten, a history professor, looked on the bright side. The Republicans dominate all three branches, and Tuten said, "but maybe we'll still have the liberal media!"

Many moved onto more pressing issues. Who will be the next Secretary of State? The next Senate minority leader? Who will emerge in 2008? Names like Giuliani, Clinton, and even Richard Pearl surface.

Either way, the next four years will hold many more challenges for all. Many hope that our president will lead us to a brighter, more unified future.

Athletic recruitment

continued from page 14

the kid playing against us, for a team in our conference, and that happens. There is a very wide range of academic standards in our conference."

It can be frustrating for a coach to hear from a recruit that Juniata's location is a big factor. Many recruits place a heavy emphasis on staying close to home.

"That last hour that people drive is a little scary for some people from outside the area," Bock said. "You have to get past that. The 'What-is-there-to-do?' factor is one that we run into. But, the more that we can get people on campus and involved with the people here, those become not just limited factors, they become non-factors. It's not just 'What do I do,' its 'How do I get it all done?'"

"That is the hardest thing for me is when it is location because there is nothing I can do about it," Gillich said. "I can't change that. I can't change kids' minds and say two hours isn't far, when some kids think two hours is so far away…For some kids, they need to be close to home."

Football is unique to all other sports at Juniata because of the quantity of kids they must replace every year. An ideal recruiting class would have between 40 and 45 kids.

"In Division III college football, recruiting is a numbers game," football coach Darrel Alt said. "[Football is unique] just because of the sheer number of people that it takes to run a successful football program. You need 11 offensive people, 11 defensive people, special teams players, plus there are 66 different job descriptions just on your special teams. So, the nature of our game requires that we have a lot more numbers than say many other sports on our campus."

Despite all the potential obstacles, Juniata has experienced its fair share of recent success.

"Last year we were in the top 120 in the Director's Cup standings, out of over 400 schools," Bock said. "That puts us in the top third of all Division III schools in terms of success. We're doing pretty well. Can we do better? Yes."

The tuition, the academic standards, the remote location, what other programs may see as negative, coaches at Juniata see as positives.

"I think they're not things that hold us back," Alt said. "I think they're opportunities for us. So, not obstacles, but opportunities."

Zanic's recruiting mentality is typical of a Juniata coach: "I remember being told by a member of the administration that no one is going to come to Huntingdon to play baseball," he said. "We're not far enough south, that it doesn't make sense. But that's not true, because you sell people and you sell other students…There is something about Juniata that you can't explain over the telephone."

Men's Soccer

continued from page 15

Juniata held on to win 1-0.

"We were two teams battling to make the playoffs," said Coach McKenzie about the intensity of the game.

Jeff Gehring, Will Spigler, Mark Guthridge, and even the Juniata bench received cards.

There were many good things to take away from this season. Coach McKenzie said the team was playing "exciting soccer" and that this year's team was one of the deepest he has ever had.

He was glad that the younger players got so much experience. Sophomore Josh Cady ended the season as the team's leading goal scorer, with seven goals. Sophomore Mark Guthridge was named Goal Keeper of the Week for the Commonwealth Conference. Both will be back next year with a healthy Robert Bowser. Juniata only loses two starters to graduation, so next season could be a breakout season for Juniata's men's soccer team.

Football win

continued from page 13

Despite the loss, it was a particularly good game for Doyle who had 287 passing yards.

Juniata will look to build from momentum of its first win of the season in its final two season games. The Eagles face Kings on November 6 and FDU-Florham on November 13, both at home.

Off the field

continued from page 15

me to learn a lot about leadership and different relationships with people," she said.

She also stays active in the Field Hockey Club during the winter. This may explain why the team is continuing its strong play this year as it heads into MAC playoffs and the NCAA Tournament.

JUNIATIAN

HUNTINGDON, PENNSYLVANIA

NOVEMBER 18, 2004 | JUNIATA COLLEGE | VOLUME 86, ISSUE 5

College drafts consensual relationship policy

Stephanie Shaver

The right for a consensual relationship between a Juniata College student and faculty member is under questioning, as is their right to keep their private lives private. The faculty executive committee is currently drafting a consensual relationship policy for the Juniata College faculty handbook.

This type of policy is standard in college and university handbooks. "It is unusual for a college handbook to not have one," said Provost James Lakso. As it stands though, the Juniata College handbook is void of any such policy. The closest thing to it is the College's section on sexual harassment.

College Legal Information, Inc. publishes a model college/university handbook as a guide for colleges that are creating their own handbooks. Under the Consensual Amorous Relationships section it is stated that "clearly, faculty and adult students have the right to choose whom they date and marry." However, the section also states that a college has a responsibility to protect its students from possible abuse of power by faculty members.

If Juniata College has made it this long without a policy and has not faced any legal dilemmas, why is there a sudden need for the policy now?

One might speculate that a current faculty-student relationship has brought the Provost's attention to the matter. However, as far as he knows, "there is no hot and heavy" faculty/student relationship going on. Then why is there a sudden rush to regulate the right for a student and a faculty member to have a consensual relationship?

The Provost has three concerns pertaining to the drafting and implementation of a consensual relationship policy. One is a legal concern – the College is being legally advised to have such a policy added to the handbook. Secondly, the College has an obligation to assure that its students are fairly evaluated. Fair evaluation does not only apply to the student in the relationship but also other students in the same class. Thirdly, "some people would question whether a professor-student relationship would ever be consensual," said Lakso. In a consensual relationship, the inherent power dynamic between a professor and a student could potentially lead to the exploitation of the student.

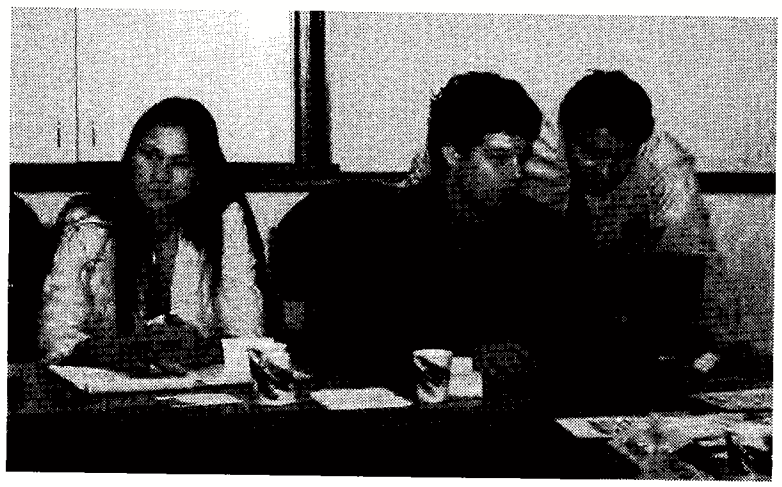
Model U.N. reaching out



Annual conference hosted for high school students

Mike Chirdon

Many students may have noticed that the familiar international flags were out in full force on Monday, November 8.

International perspectives were exactly what 170 high school students from 15 different schools in Pennsylvania and Maryland experienced here at Juniata for the Model United Nations Conference. Each high school was given a different country to represent. The students took the role of delegates to the U.N. from those countries and debated many prominent world issues in committee sessions throughout the day. The committees' job was to pass resolutions, which explain problems and lay out plans on how to solve them.

Topics discussed during the day included women's rights, biological and chemical weapon disarmament, global warming, U.S./China trade relations, and AIDS in Africa. The delegates needed to have not only a solid understanding of these complicated issues but also needed to know where their countries stands on them.

Hannah Rauterkus / Juniatian

Olga Lomonosova, Kristof Boda, and Gabriel Lopez Escalante led the UNEP delegation on Global Warming. The controversial subject brought the high schoolers to the forefront of the political debate.

One of the unique components of Juniata's conference is Bush's National Security Council. In this committee, students take the roles of many of President Bush's top advisors. It was easily one of the most intense groups of the day. They were constantly changing topics between foreign policy issues, such as how to deal with the possibility of loose nukes, and domestic affairs, such as race riots in Detroit.

Juniata College students

Senate approves funding process

Nate Drenner

The Student Senate unanimously approved a new funding process for Registered Student Organizations (RSO) at its meeting on November 11. This process is similar to the original proposal as reported in the November 5 issue of the Juniatian. However, the proposal was amended to allow flexibility for students holding offices in several organizations.

The treasurer and another executive from each RSO will sit on a Common Interest Subcommittee (CIS) with the officers of similar organizations. For example, the Dance Ensemble and the Pep Band could each send their treasurer and another executive officer to the Arts CIS.

Each CIS will select its own president and treasurer. This president will sit on the Senate with full voting rights, and this treasurer will sit on the newly-formed Allocations Board.

Junior Mike Best is the Senate's executive treasurer. "We felt that it was necessary to represent clubs in the Senate and the allocations process," he said, speaking for the Executive Board.

Each CIS creates a budget for all of its clubs, which it passes to the Allocations Board. The Board then creates one proposed budget including all CIS groups and submits that budget to the Senate for approval.

"We will be able to see how we're spending money," said Best. The Senate will see total figures for each CIS interest group.

Clubs will also be able to petition the Senate for additional special funding during the academic year.

Four additions passed in a vote, amending the original allocations process proposal. The Senate used a new electronic voting technique to tally re-

Southwestern experience

Remote Field Course offered for all POEs

Maria Piazza

Adventure and low risk: what a great deal when the two come together. That is what the Remote Field Course offers. The Remote Field Course (RFC) is an opportunity to explore the Southwest while working to gain two credits in a natural science course. From the sizzling heat of the Grand Canyon to the chilly water of the Colorado River, students will have a short supply of boredom.

Professor Matter of the Biology Department stated, "Students should go just to experience something outside of their comfort zone." The big open spaces of the southwest will captivate and excite anyone who chooses to take this course and step away from the comfort of hilly Pennsylvania.

The course consists of two days of travel and 12 days of work on different modules. The modules are taught by Professors Ryan Mathur, Laurence Mutti, John Matter, Jim Borgardt, and David Widman. The modules are designed for any student who is interested in having a hands-on experience with the natural sciences. Each module covers a different topic and lasts for about four days.

This year, Widman, a psychology professor, will offer two new modules. One of the psychology modules deals with how high altitudes affect the cognitive ability of the mind; the other deals with how culture affects a person's cognitive ability.

One favorite session is always the Grand Canyon module; it's a national landmark for starters. Matter said of the Grand Canyon, "It's an experience, and a hike that you'll never forget."

The modules range in topic from water use issues to the study of mantle rocks in Arizona. Nothing is too large or too small for the professors to talk about. The largest topics consist of the atomic age and visits to meteor craters from thousands of years ago. The smallest consist of water evaporation and studies of different types of lizards.

After mentioning the lizard module, Mathur, of the Geology Department, said, "It's great fun to catch the little lizards, since they're only the size of your palm, and quite fast."

This course sounds extremely science-oriented but many students including Michael Vella, a biology student, said, "I would recommend this course to anyone interested in an adventure, not just science students."

But is the adventure dangerous? No. Every module and experience that the students have is carefully examined before allowing students to work on them. The professors use the first module to teach students safety measures, including everything from using sunblock to drinking appropriate amounts of water in the desert. The campsites are chosen with extreme care; excepting the occasion of a large wind storm, few problems arise while camping out. The scenery is beautiful and the campfires at night are great fun.

Lauren Forster, an environmental science student, said, "The stars at night are quite beautiful, brighter than any I'd ever seen in Pennsylvania."

The cost is well worth it. The whole trip costs $1,250 dollars but includes everything from two academic credits, travel expenses, food, and shelter to module cost. The travel time is about 36 hours and is now split between two days because of the dangers of driving through the night.

To apply for the trip, fill out the forms at http://departments.juniata.edu/geology/newrfc/registration.html. Take the forms to Dr. Jim Borgardt in the Brumbaugh Academic Center room P226 as soon as possible.

Seven months in the Middle East

A unique study abroad experience

Sarah Wharton

Imagine sitting around, drinking tea, and discussing Plato's "Republic."

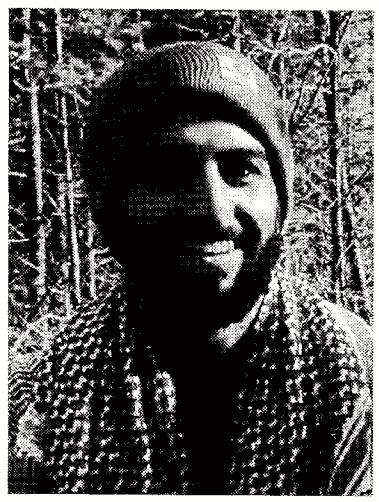
Imagine looking up and realizing mid-sentence that you are sitting amid dry surroundings, drinking tea without the aid of Lipton or Tetley, and discussing the famous Greek work in Arabic.

For senior Joseph Viscomi, this perhaps surreal experience happened often during his recent seven-month stay in the Middle East.

But why visit the Middle East, especially at such an unsettled time?

"I wanted to see what the situation was really like there," said Viscomi. "We don't get much information here over the Israeli wall," he added – apart from explosive bits of violent news coverage, that is.

Viscomi, who will burst from JC this May with a POE in anthropology and cultural adaptation, decided to study abroad like many JC students. *Un*like many, though, he chose to head off from the U.S. for Jordan and later Palestine – not the typical sojourn to see the Eiffel Tower or Big Ben.



In a program with the School for International Training, Viscomi spent last spring in Amman. He and eight other students took Arabic language, history and politics classes at the University of Jordan.

When his semester was over, he spent the summer doing an internship at Augusta Victoria Hospital on the West Bank. It provides care to the many Palestinian refugees displaced during the ongoing conflict. There, in East Jerusalem, he worked with his girlfriend gathering stories and experiences that illustrated the daily lives of the patients.

Viscomi's study and stint at the hospital allowed him plenty of time to travel and interact with people. Some days, he interviewed mothers and daughters in Jordan for a project on culinary culture. Other days, he spent time in different villages along the West Bank, chatting with locals.

"A culture of hospitality permeates through every aspect of society in the Middle East," said Viscomi. "People were always quick to invite me in for tea and conversation."

But behind the warm culture and friendly people, there is a backdrop of enduring tension and bloodshed. Frustrating for Viscomi, who now has seen the injustice of the Israeli wall and

Joe Viscomi photographed by Hannah Rauterkus / Juniatian

checkpoints firsthand, is the fact that many Americans do not seem to care about the situation. Or they are comfortable being uninformed.

Students seem to express that they don't believe everything in the news, but they don't do anything about it. Few question what they learn, as with the example of the number Palestinian deaths in the conflict. The media rarely represents the number of Palestinians who have died accurately. Actually, close to four Palestinians die for every one Israeli, according to Viscomi.

"It's completely obvious for anyone who has any understanding of math to see what's happening," said Viscomi sadly. He continued, "People don't seem to have the capacity to listen."

Few people also stop to think about how diverse the Middle East is. They forget or ignore the fact that it's not just a desert full of camels. The people, ideas, and styles of living vary greatly. Viscomi wants people to know this.

continued page 3

Senate approves funding process

continued from page 1

sults. Senators simply pressed a remote control to record their votes, which were immediately displayed on the classroom projection system.

The Senate decided that any elected club officer can participate in the CIS rather than limiting the RSO's representative to the club's president. The club treasurer still must be the club's second CIS representative to be involved in the funding process.

This decision alleviated concerns about restricting students who hold officer positions in more than one club in the same CIS. For example, under the original proposal, one person would not be able to become the president of both the Environmental Science Society and the Chemistry Club because those organizations fall under the same CIS. One person representing both clubs would be considered a conflict of interest. But now, the vice president of the Environmental Science Society could represent that club in the CIS if its president also leads the Chemistry Club.

According to the Senate's Executive Board, seven club officers currently overlap duties within the same common interest group.

Nine senators voted for this amendment, while three preferred an option that the second CIS representative not be limited to a club's treasurer.

In a related amendment, the Senate voted unanimously to allow any type of executive officer other than a treasurer to serve as the CIS representative to the Senate. Previously, this representative would have been limited to a club president.

Another amendment also passed unanimously to clarify that each RSO can choose any elected officer as their CIS representative.

Finally, the Senate decided that each CIS will be moderated by a Senate member. The moderator will be determined by volunteer and cannot have a conflict of interest with the CIS he or she will coordinate.

"We are not actually proposing which clubs are in each CIS at the time being," said Best. But now that the process is approved, the subcommittees will form for next semester. This funding process will be used for 2005-06 academic year allocations.

Ceramics Studio location questioned

Richard Pulliam

Juniata's Ceramics Studio, commonly known as the Pot Shop, has been here since the 1970s. It has its own separate rooms for mixing clay. And it has a separate room for making pots and other clay creations. Finally there is a room for baking these creations to make the clay hard.

The Ceramics Studio building, however well it may serve its purpose, seems lacking in much needed equipment. For example, the place that the clay is kept once mixed is simply a very old floor to keep moisture out. However functional this may seem, pieces like this and a 1940s bread mixer for mixing clay give the Ceramics Studio a sense that it needs to be updated.

According to Joy Bridy, the ceramics studio assistant, the College has been talking about turning the current studio location into a parking lot.

Provost James Lakso clarified that when the Ceramics Studio does move it will most likely be turned into a facilities place for athletic teams (soccer, for example), and not be demolished to make a parking lot. The parking lot rumor has appeared in the online forums. Lakso said, "If you hear stories you might want to check to see if they're true or not before you go spreading them around."

However the Ceramics Studio needs a place to move to first. Bridy is concerned that if the Studio is moved to Brumbaugh Academic Center there is a good chance that it will not expand at all. Bridy said, "I think they should tear down the current Ceramics Studio building and build a better one in its place that would give room for expansion."

Bridy's interests are that the Ceramics Studio be moved to a location where it can grow and have longevity to it. She said that it would be nice to have a larger space for kilns and a slab roller, which most other ceramics studios have. This larger space would also make the mechanics of producing clay creations more manageable.

Jack Troy, associate professor of art, has been in the process of searching for a location for the Ceramics Studio to move to that will work for everyone.

Lakso said that there is a big issue with the money that will be needed even to move the Ceramics Studio. He did confirm that when the pot shop does move it will most likely move to second floor of BAC. However, biology professors are concerned that there might be an issue with the Ceramics Studio activities. Activities such as vibrations or other factors might affect the Biology Department.

Lakso stated that the earliest he could see a Ceramics Studio move would be September, 2006.

The Juniata brand

Sarah Svigals

When potential students hear Penn State, they think "Blue and White." When baseball fans see an intertwined "NY," they think "Yankees." These are both strong cohesive brandings and logos. Juniata hopes to become like this – that is – a strong, uniform logo that is easily identifiable and properly used.

The integrative marketing team, headed by Assistant Vice President of Marketing Michelle Corby, spent the last year and a half working on a strategy for a powerful, consistent, and appropriate branding for Juniata.

In this strategy the team identified five core descriptors for Juniata, essentially, "what makes Juniata Juniata" according to Corby. These descriptors are: momentum, flexibility, environment, experience and community.

"These core descriptors or values are meant to be used in all of our print publications, our website, basically all of the different types of communications we use to give a picture of the Juniata experience," said Corby.

This branding basically paints a picture of Juniata in words, pictures and graphics. Another textual part of the Juniata brand will be the positioning statement.

The positioning statement says, "In a safe and beautiful environment set in the Allegheny Mountains of central Pennsylvania, Juniatians benefit from rich traditions and academic experiences that flexibly support learners. At Juniata students are challenged by enlightening questions, they approach choices with growing confidence and they act on well grounded values."

Corby describes this as a thumbprint of Juniata. "Sometimes we need to quickly get across an image of Juniata to an audience. This allows us to give a snapshot of Juniata," said Corby. "Groups do not have to use this statement as written; they can adapt it as JCEL has to fit their own unique program. In essence they can personalize it for what it means to them."

The last element of the brand is the tag line: "Think, Evolve, Act." This tag line, used for 12 years, is now the official tag line, departing from the "Expect the Uncommon" tag line used in the last capital campaign.

"The team feels that these things are the most powerful because we did not have to create them, we've been using them for a number of years, and only now have we explicitly pointed them out," said Corby.

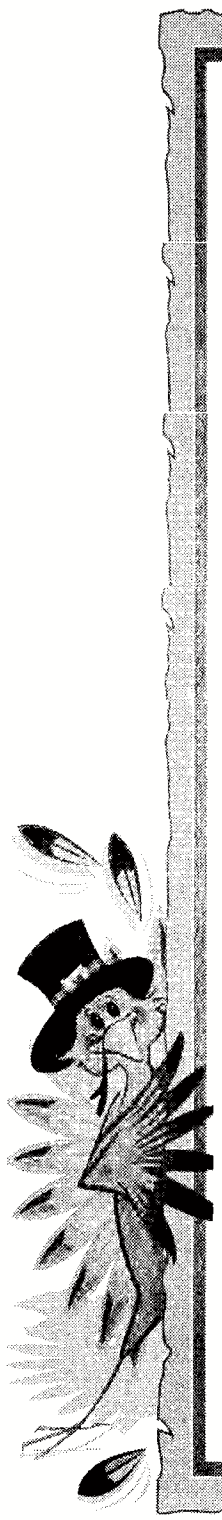
"It is a very competitive marketplace and if Juniata doesn't focus on who we are then the marketing dollars that we spend will not be spent well and we will be missing out on people having the Juniata experience," concluded Corby.

Seven months in the Middle East

continued from page 2

But warring and fighting, unfortunately, are what get people to tune into the news at night, he said.

And yet, incredibly, amidst all the carnage, people remain relatively happy.



"I was amazed at the optimism some of the people put forth," Viscomi said. "To have walls built around you, to be treated like animals going through checkpoints, and to still live and get by is amazing."

To help these people get by, Viscomi is starting a co-op. A group of seven or eight women from a village in the West Bank will sell traditional embroidery to the Juniata community through the co-op. After the olive harvest ends, and the women can embroider again in their free time, JC will have access to hand-sewn textiles from across the world.

Despite the violence, in Viscomi's opinion, the people overseas are very much like those here. The differences between American and Middle Eastern youth are fewer than the similarities. Most of the youth are kids in the same way Americans are, worried about their friends, or outside every day playing soccer in the fields. They seek distraction from life just like many teens do.

"They just want to live," said Viscomi.

And to drink their tea in peace.

College drafts consensual relationship policy

continued from page 1

Given these concerns, what language is going to be used to form the policy, and how strong will that language be? The American Association of University Professors (AAUP) provides three categories that colleges' and universities' consensual relationship policies tend to fall under: absolute prohibition, limited bans on faculty-student supervisory relationships, and strong discouragement.

The faculty executive committee is steering the creation of this policy. Given that, who is in the driver's seat, so to speak, and how right or left winged are they?

Belle Tuten, W. Newton & Hazel A. Long Associate Professor of History, is one member on the executive committee. Taking a conservative standpoint, Tuten said, "I happen to be one for absolute prohibition." An advocate for a policy using stronger language, Tuten suggests wording such as "Juniata College discourages student-faculty consensual relationships" and/or "we feel student-faculty relationships are bad and should be avoided."

Tuten understands that a consensual relationship between and student and a faculty member is a possibility considering the college is such a small place. However, "openness is extremely important," she said.

Taking a more left-winged stance is executive committee member and Assistant Professor of Mathematics Daniell Toth. Toth agrees with Tuten in that if there is a faculty-student consensual relationship, it should be disclosed. However, Toth is an advocate for very loose and general terminology. He believes that the stronger the language, the less likely a faculty member would be to disclose if there is potential for penalization.

Janet Lewis, associate professor of philosophy, is not a member of the executive committee. On one hand she believes students should be allowed to choose. However, "my more libertarian part says students are in very unequal power relationships which make it impossible to have a consensual relationship," said Lewis.

It is evident that there is an inherently unequal power dynamic between students and professors. Implementing this policy is an attempt to regulate any abuse of that power. Therefore, some say that students should be involved in the process.

Lewis believes students should be encouraged to openly speak about the policy. "It is their personal life we are talking about," said Lewis.

Toth believes students have a right to be involved. "We need to have an open forum where students can discuss it themselves without faculty being there, and then...communicate that to the faculty," suggested Toth.

Few students were aware that the College did not have a consensual relationship policy. Once they were told, however, students were eager to give their perspectives.

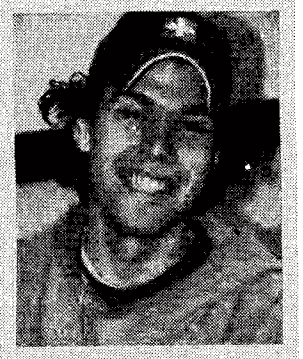
One student, who chose to remain anonymous, understands the administration's legal concern, but believes the policy is only necessary to ensure fair evaluation of the student. This person said, "The policy should state that students can have a consensual relationship with a professor as long as an outside source evaluates the student in class." The student is not in favor of disclosure.

Senior Sarah Kimmerle, believes there should be disclosure. "We are all adults and can make decisions, but those decisions should be made public so as to avoid detrimental consequences such as favoritism," said Kimmerle.

Once the executive committee completes the policy draft, it will be sent to the faculty for their approval. If the majority accepts the proposed policy, it will be added to the faculty handbook. If the majority declines, the policy will be sent back to the executive committee for revisions.

"The looser [policy] with less condemnation has a better chance of any sort of success", said Toth.

Even if the policy is accepted by faculty and implemented into the College handbook, what are the chances that the policy will easily be enforced? "The problem with enforcing it is the harshest penalty falls on the professor," said Kimmerle.



Students, faculty, and staff should expect to see the consensual relationship policy added to the College handbook sometime this spring. In the meantime, students can consider ways to voice their opinions on the College's right to legislate morality.

Roving Reporter

How should sexual relationships between faculty and students be defined, if at all?"

Model U.N. reaching out - continued from page 1

started organizing the conference at the beginning of the year. Conference coordinator Sarah Kimmerle and other members of the Juniata's Model U.N. class had to registered high school students for the conference, planned opening and closing ceremonies, and selected topics for the various committees. On the day of the conference, they served as committee chairs and assistant chairs. There was also a "home government" office set up to do fact checking and to answer last minute questions for delegates.

Kimmerle said one of the chairs' hardest jobs is to know each country's stance on each issue and be able to anticipate where the debate might go. Chairpersons must also know parliamentary procedure.

At the same time, chairs must be careful to let the delegates have control over their committees, but also to keep them on task. For example, the Committee for Human Rights dealt with the broad topic of women's rights. The chair, Emila Brkic, noticed that the delegates' discussion was alternating between two different issues. She explained to the delegates that they were allowed to talk about whichever issue they wanted, but they had to do so in an organized manner. She then explained how they could switch between topics simply by making a motion and taking a vote. That way everyone in the committee would always be on the same page.

Some topics seemed very simple. For example, most anyone would agree that AIDS in Africa is a problem. So wouldn't that mean that most anyone would be glad to give the Africans low cost drugs and contraception to combat the problem? The U.N. Developmental Program assistant chair, Mary Gardiner, pointed out to the delegates that the solution was not so simple. Several countries would disagree with that stance, she informed the group, and that was an issue they would need to debate.

Even though the topics being discussed were serious, and the atmosphere was professional, there were still several moments of levity throughout the day. The National Security Council was informed that the mayor of Detroit was blaming President Bush for the race riots in the city.

Later, in the same committee, Professor of Politics Emil Nagengast came in playing the role of Detroit's mayor. After the council expressed that they felt it would be unwise for Bush to make a trip to the city, Nagengast said, "I know Michigan voted for Kerry, but I had assumed it was still part of the United States."

A notable comment of the day came from the Special Committee on Israel-Palestine. The delegate from the United States told a delegate from Afghanistan, "You are my fifty-first state, no more speaking out against me!"

Perhaps the best comment might have come from the Disarmament and International Security committee when delegates were informed that, in their simulation, a nuclear bomb was dropped on the U.S. The delegate from Japan quickly said, "From one victim of nuclear attack to another, I offer my deepest sympathy."

Hannah Rauterkus / Juniatian

Kevin McElfresh (Bellefonte Area High School) won an outstanding delegate award for his role in the UNSC Sudan crisis committee.

Correction

The Juniatian regrets the following error in the Nov. 5 issue:

"Class gift confusion cleared up," page 2 – The article stated that the Class of 1999 intends to donate money for a fountain near Founders Hall. The statement was a direct quote from President Kepple, but he later apologized for the error. The fountain will be donated by the Class of 2000.

The mythological fence: who hates whom?

Stephanie Shaver

A myth has been formulated throughout the years of Juniata College's establishment. This myth suggests that underpinning the College and Huntingdon community's "Town-Gown" relationship is loathing, distrust, and jealousy.

Town-Gown is a term used to describe the relationship between the community (town) and the College (gown: symbolizing a college's graduation ceremony).

Kelly Turlish, Juniata College's community service-learning coordinator and an alumna of the College, doesn't think that there is an overall problem between the two communities. In her job she deals with college-community relations and claims to have great experiences within the Huntingdon community.

However, this was not always the case. Juniata College did not always have a community service-learning coordinator. Therefore, students had to work on community projects individually without the guidance that Turlish now provides.

By listening to the community and assessing its needs, "we provide a structure and a base because we don't want to duplicate services," said Turlish. This centralized location has greatly reduced community complaints about college students' services.

"I get constructive criticism if I get a complaint," said Turlish.

Dr. Lynn S. Cockett, professor of communication, has been a member of the Huntingdon community for over three years and currently lives downtown. Cockett says she has a great deal of interaction with people in town.

"In terms of the people that I know well from the community, they are all happy to be involved in this town, and they don't see the College as a threat," said Cockett.

Kelie Cummins has been a student at Juniata College for three years and a resident of Huntingdon for 15 years.

"I do believe that there is a myth that the College and Huntingdon communities don't get along," she said. Although Cummins does not buy into the myth, she does attribute its formation to several issues.

"The first reason that leads college students to believe that the town does not get along with the College is because the College and the town are very separated," Cummins said. She added that, secondly, "the College and the town have differing political views."

Although Cummins believes that the College and town differ on issues, she also believes that the two communities get along, and that their relationship has improved over the past five years.

Yet the question remains: if people believe that this myth exists but do not buy into it, what, then, keeps it alive?

"I hear the rumors that everybody else hears, but I think most of them are rumors," said Cockett.

Turlish believes the dilemma isn't specific to Juniata College and the Huntingdon community. Most college towns experience the same controversial myth—"the unruly school and the quaint community."

"I think people say it in jest, [like] 'Oh those liberals up at the College,'" said Cockett.

One student, who has chosen to remain anonymous, said, "I have heard that people in town are intimidated by us because we go to 'the big school up on the hill.'"

Juniata students have roles in both the College community and the Huntingdon community. Therefore, students can take many different actions to diminish the suggestive myth that underlying the "Town-Gown" relationship is loathing, untrustworthiness, and jealousy.

Cockett recommends an Adopt-A-Student program. During her undergraduate years at Messiah, members of the surrounding community could adopt a student to exchange conversation, share meals with, and provide familiarity to a student in a new environment.

"I felt like I had a family away from home," said Cockett.

Turlish recommends generating discussion and providing information about the Huntingdon community to incoming freshmen during CWS lab.

"We [the College] are going to be here; we might as well work together," she said.

Students should also have more involvement in community events and the College should continue to "encourage community members to attend Juniata functions," said Cummins.

These goals are attainable, and as members of both the College and Huntingdon communities, Juniata students are capable of diminishing the falsehood from both sides of the mythological fence.

The vegetarian next door

Emily Eller

"I find that I don't have to explain myself as often as I used to. I think there [are] more vegetarians now," said junior and vegetarian Shannon Callahan.

She may be right. Food Service Director Hal McLaughlin estimates the number of vegetarians that eat at Baker to be between 80 and 100. That number is consistent with national percentages. But at Juniata, that number has certainly increased over the last few years.

"It's becoming a more popular lifestyle; there's been a move toward more health conscious eating," said McLaughlin. That shift has led to tangible changes in Baker.

The last two years have seen the addition of both the Vegan line and the new program "Health, Wellness and You." Yet the Baker staff didn't know if the trend would evolve into a standard dietary choice.

"That's why there's no neon sign that says 'Vegan Line,'" explained Executive Chef Patrick Goodman, who arrived the same year that the Vegan Line. "We weren't sure that it would last."

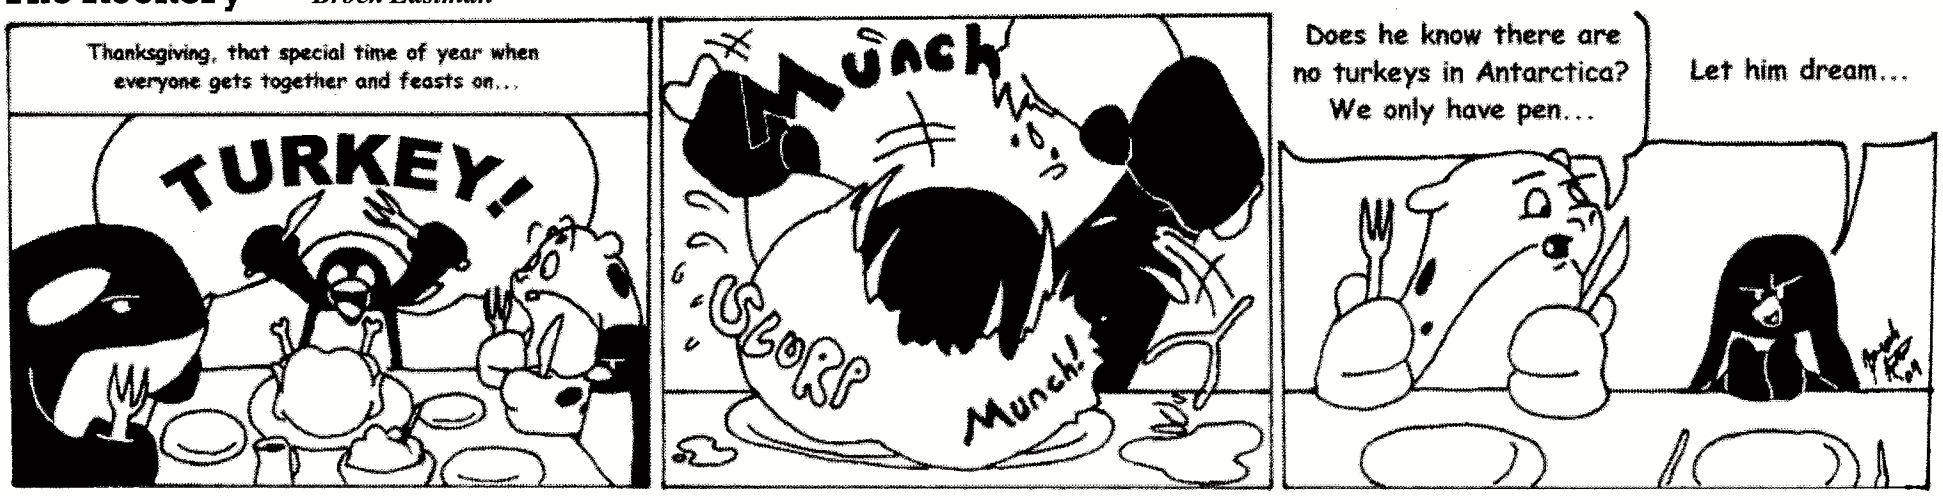
Not only did it last, it's become very popular. Most vegetarians are happy with the options that Baker has provided them. However, vegetarianism is not always easy in a world full of meat-eaters.

"Some people think it's a bit ridiculous," said senior Paul Blore.

Callahan agreed, "[People ask] why? And then, 'is it a moral thing or a health thing?'"

For the most part, the "whys" aren't irritating. However, while most people are generally respectful, there is a tendency toward absurd outlooks among many meat-eaters.

Some meat eaters find themselves flying into Tourette-like fits, spewing out the names of meats they enjoy: "Bacon!" "Hamburgers!" Others meekly utter that they too *barely* eat any meat anyway.



The most creative meat-eaters wander into impossible hypothetical land, where they encounter situations that might cause a vegetarian to stray: "So, what if you were lost in the woods...and all you had was a bow and arrow...and if you didn't eat meat you would die...then would you eat meat?"

The least creative meat eaters claim to be champions of vegetable rights: "But you're killing a carrot!"

Many vegetarians live off-campus. McLaughlin wasn't sure how many. The fact that many vegetarians choose to cook for themselves is likely more a reflection of lifestyle choices than of Baker food.

LETTERS TO THE EDITOR

'Return of the Native'

I read the article entitled "Return of the Native" [October 14] with interest since it evoked memories of an earlier offered "donation" for a statue of an Indian in the early '70s (that one to be placed in front of the athletic center presumably to honor the many Native American athletes who had excelled at Juniata). Thankfully the College had the good sense to reject the donation as inappropriate. Now it looks like we're at it again albeit in a bigger and better way, since the original offer was for a paltry $8,000 instead of the current $350,000+. In addition, the location has changed from the gym to intersections between Von Leibig, Beeghly and the gym (doubtless to honor the many Native American Juniatians who excelled in athletics, science AND library studies).

Said statue(s) will stand 11 feet tall and is (are) supposedly to enhance both peace and public art. Give me a BREAK! This reads like an instance of the College taking advantage of Native American "vogue" by using its representation to "adorn" its campus with "art." Add to this the fact that the donors are not Native Americans and wish to remain "anonymous" (one wonders if this is not an elitist "in your face" bit of pique by folks who remain angry about Juniata's rejection of its mascot), and the whole endeavor is crass, self serving and materialistic.

Ironically, in the same issue of the Juniatian I read about the College's genuine attempts to enhance diversity starting with a fund of $50,000 created by the trustees. If the College REALLY wanted to honor Native Americans it would take those hundreds of thousands of dollars and create scholarships for students of this heritage. Not only would this help students with monies for education, it would further our efforts toward diversity.

We already have a building named after one of the most corrupt politicians in the history of Pennsylvania (at least that building actually benefits students), now we seem willing to go a step further to take money that is truly not intended to benefit the tribe it represents. While I certainly think that people should be allowed to spend their money as they see fit, I also believe that a college should have the good sense (and integrity) not to take money that serves no purpose other than to satisfy donors and make the campus look socially responsible.

Janet R. Lewis
Associate Prof. of Philosophy

Did something in the Juniatian pages pique your interest? Think something was missed? Write a letter to the editor! We invite students, faculty, and alumni to write on any issue of concern to the Juniata community. Please note that, due to available space, we ask for letters to be limited to 300 words. Send your letter to juniatian@juniata.edu. *Opinions expressed in the commentary pages are not necessarily those of the Juniatian staff.*

Lessons from Latin America

I used to believe that the world was like the movies; the good guys battled the bad guys and one was distinguished as good or evil by the color of the horse they rode. For me, the U.S. always rode the white horse. "When I was a child, I thought like a child." Now, I am abroad in Mexico, and I've had to put such childish thinking behind me.

The United States is regularly mentioned in my Latin American History textbooks, often followed by phrases such as "CIA organized military coup" and "overthrow of democratically elected government." (And no, these mainstream texts cannot be dismissed as leftist propaganda.) The historical reality is that our nation's foreign policy has borne mixed fruit. For all of its good, our policies have also produced some of Latin America's worst human rights abusers. U.S. funds and military aid helped to bring to and keep in power the regimes of General Pinochet in Chile, Rios Mont in Guatemala, and countless others across Central and South America. The results were state sponsored rape, torture, and the slaughter of civilian populations. Terrorism.

I don't write this to defame the United States. We have much of which to be proud. Rather, I write this to debunk the ideology that the U.S. is infallible. The blind faith that our country can do no harm is a bastardization of religion and a bad reading of history. Moreover, believing that we are always the white knight is dangerous, for it stops the very self-criticism that checks against abuses of power. Whether or not America lives up to its ideals of spreading justice and democracy in the world depends on whether or not we hold our government accountable to those ideals. There are voices out there labeling those critical of our government as unpatriotic. On the contrary, it is the critical citizen who ensures that America's actions are worthy of our pride.

Get to the point

After reading Mary Gardiner's article titled "The IMF and Neo-Colonialism" as well as Professor Brad Andrew's response and Josh Scacco's global finance advice column, I found all three failed to place the issues of international development and neo-colonialism in an appropriate historical context and fell short of making the discussion relevant to our own lives. Ms. Gardiner's article does attempt to bring home the gravity of the vast economic disparity in our world today. However, poverty is something that one must see face to face to understand its import.

The nations that fund and control the IMF and World Bank are the biggest financial donors in the global fight against hunger. Massive poverty on our planet is not a consequence of failed IMF and World Bank policies. Yet they've both funded ill-advised projects with disastrous effects on native populations, such as the Chixoy Dam in Guatemala (please Google it). I do not feel that either organization offers a plausible means to eradicate poverty.

The problem of global poverty is, as Ms. Gardiner points out, rarely discussed in our daily exchanges. When that changes, we can hope for progress in eradicating poverty. However, the portrayal of debt relief as banana republic begging for western generosity is a fallacy of enormous proportions. What is debt? The citizens of those nations whose genetic, spiritual and intellectual superiority has rendered them the wealthiest in a global economy based on equality of opportunity, laissez-faire capitalism and fairness in the conduct of business must thoroughly examine this question. I would suggest starting that examination not in EB 105, but rather in HS 152. Then and only then, can we approach the wretched of the earth, hat in hand, and discuss debt relief.

The vegetarian next door

continued from page 6

Many vegetarians opt out of a meal plan to ensure that they can support local farmers and prepare the types of food that they are accustomed to.

"I often wonder about the sustainability of Baker food," said sophomore Todd Bokin. He explained that as part of his vegetarian lifestyle, he likes to know where his food comes from and prefers that it be local and organic.

"There's tons of food out there," said Bokin of vegetarian cuisine. "[It goes] above and beyond tofu and rice."

Food service at Juniata has been trying to go above and beyond those limited options.

"We don't want to get stagnant. We want to keep changing and moving forward," said McLaughlin. Both he and Goodman recognize the need for food to be more than just something you eat.

"It's a mind, body and soul idea," said McLaughlin. "It's aimed at not just the food need but the whole being." He added, "Students have never been as stressed out [as they appear now]. I want to tell them: eat, breathe, have some soup, relax."

Presidential Perspective

This week, responses came from other administrators because President Kepple is out of town. The Juniatian thanks Tristan delGiudice (Director of Facilities Services) and William Alexander (Vice President for Finance & Operations) for their answers and James Lakso for facilitating the process.

"The residents of East pay the same amount of money as everyone else for our room and board at Juniata. However, I can count on one hand the number of times that our dorm has been cleaned. There are remnants of Halloween costumes in the stairwell, three or four beer cans as well as a lollipop that has been there since before fall break. I understand that we should be big kids and pick up after ourselves but honestly the dorm looks like a disaster area. I lived in Tussey last year and the dorms were cleaned at least twice if not three times a week. What's the deal?"

Tristan delGiudice, director of facilities services: Our custodial department recently went through a reorganization in an attempt to address some areas of concern including East Houses. Currently our custodial department is set up to provide custodial services to East Houses 5 days a week, Thursday - Monday. Thursday, Friday and Monday are typically days that we clean the towers and common spaces, while Saturday and Sunday are primarily spent picking up trash and cleaning up messes. We have been short handed recently which hampered our ability to keep up with all of East on a regular basis but that problem was isolated in two stairwells and we have resolved these coverage issues. Although we did experience this isolated problem in the two towers, we have experienced few if any complaints this year from students or the Office of Residential Life regarding East

Public art makes waves on campus

Morgan W. Sample

"Public art is a means by which a community, as it is defined, can complement its environment through the placement of aesthetically driven objects," said Dr. Nancy Siegel, director of the Juniata College Museum of Art.

Public art is a major issue here on Juniata's campus. Very few pieces of art are on display. The most major and obvious piece, a work done by Peter Calaboyas, is located on Tussey and Terrace patio. Juniata has also recently added a fountain outside of the Enrollment Center on Moore St. This is considered public art in a sense.

In the broad sense of the term, many things can be considered public art, such as buildings, landscape designs and even products of nature such as trees, ponds, grass and the like.

According to John Hille, vice president of advancement, "In the broadest sense of the word, there is a great deal of public art on campus. In a more narrow and traditional view of public art, there is too little out on campus."

Hille also said that "on our campus, [for all but a few students] one must make an intentional effort to 'visit' art." One example of this situation would be the hike necessary to see the Peace Chapel.

Public art may be a scarce thing for our campus, but it can still make news. The controversy involving the Native American statue brought public art to the campus's attention, albeit in a negative way.

The very nature of public art makes it difficult to please everyone. Dean of Students Kris Clarkson commented, "I suspect there will always be varying opinions – and, people seem naturally resistant to change."

In regards to the controversy, President Kepple said, "I do believe controversial art does have a place on a college campus. For example, the initial concern about the Indian sculpture has produced some very good discussion on various and interesting views. That's a healthy thing at a college."

The controversy also highlights how one piece of art will not appeal to or be appreciated by every person. However, art is meant to stir people's imaginations and get them thinking, and public art can do just that. That is something to keep in mind when acquiring art, especially that which will be in daily public view. The abstract piece on Terrace is seen by many, and it being abstract allows people to interpret it their own ways.

Siegel said, "I would prefer to see more abstract art on campus, in particular environmental art and kinetic sculpture which is so related to the environment."

President Kepple also highlighted the practicality of making art more visible on campus. He said, "We need much more of it [public art] inside and outside around the campus. If we are to enhance our art program by attracting students interested in art, prospective students need to see more art on their campus tour!"

This statement is all too true when it come to the arts. In terms of art, change can be good, even an improvement. Public art is needed on campus, not only for aesthetic value but inspirational and motivational values as well.

John Hille "would like to encourage more displays of art created by those closest to our college— students, alumni, faculty, staff and trustees – whether as part of displays we have in the lobby of von Liebig and in Founders or as more permanent installations in places such as Ellis, Kennedy and Good Hall." This should not be limited simply to those affiliated with the College but to people outside Juniata's culture as well.

Concert choir sets the bar high

Richard Pulliam

On November 7, the Juniata Concert Choir performed at the Rosenberger Auditorium with a special purpose in mind. Though in past semesters this concert was never specifically dedicated to anyone, this year marked an important change in Juniata's musical community, a change that deserved to be recognized. Ms. Katsuko Ochiai retired after twenty-two years of teaching piano to students. In honor of her commitment to Juniata, the Choir felt compelled to dedicate this spectacular performance to her.

The concert consisted of all Japanese music, which presented a great challenge to the choir. They had to learn the songs in Japanese, with the added pressure of knowing that there would be Japanese students in the audience who would know if they sung something amiss. Because the majority of the students in the concert choir are not Japanese, nor do they speak it, Ochiai shared the songs and their respective pronunciations on the College network. To prepare and to gain knowledge of the proper Japanese pronunciations, the students then listened to the pieces on the network over and over again.

It worked. Japanese students in attendance commented after the concert that they understood every single word in the pieces of music.

"This floored us," said a pleased Russell Shelley, director of the Concert Choir and assistant professor of music.

Shelley was also pleased by the large number in attendance. The downstairs part of the Rosenberger Auditorium was completely full.

"It was one of the largest fall concert audiences we have had here in my time," Shelley said.

The majority of the audience was composed of students from Juniata College, parents of students who were performing in the concert and Juniata alumni. About a dozen former concert choir students traveled from as far as New Jersey and Virginia just to see this fall's concert.

The majority of the Concert Choir is composed of all Juniata students, most of whom have had some sort of singing experiences in the past. They've been hooked on the value of choir music and it made them want to continue it at a college level. The commitment level of these students is extremely high.

Members of Concert Choir rehearse Monday, Wednesday and Friday for an hour. They also meet with peers in their respective vocal sections for an additional hour of practice each week. On top of that, they also have quite a bit of independent voicework to do.

Hannah Rauterkus / Juniatian

Sunday Nov. 7 the Concert Choir, led by Russ Shelly, performed Japanese pieces to a packed audience.

Their dedication does not go unnoticed, as is reflected by both the size of their audience and the gratitude of their director.

"As a conductor I am extremely appreciative of the level of commitment of the Concert Choir this year," Shelley said.

The Choir's job is just beginning. As Shelley spoke, Portuguese lyrics being pronounced very clearly and slowly could be heard in the background. The Concert Choir will tour Brazil in March, and must turn its attention from one world language to the next. Shelley explained that the source of the Portuguese was a Brazilian conductor who was recording the language.

Not five hours after the end of the concert, the choir began work on the new Portuguese pieces. As Shelley explained, "[They have] a full sleight of work this year."

The choir will not perform again in Huntingdon until the spring. On April 2 at 7:30 it will hold a concert at the Most Holy Trinity Catholic Church, in honor of their homecoming after the Brazilian tour.

From one language to the next, these committed singers are making their voices heard.

World premiere of Paganini Mania wows Juniata

Mary Gardiner

On November 12, 2004, Juniata was honored to host the world premiere of Paganini Mania, a show presented by the globally recognized musician Janice Martin. Martin was advertised as a violinist, but is also experienced in numerous other musical practices.

Martin wowed her student audience, experimenting with an array of various types of music. She incorporated everything from jazzy blues to traditional Indian music in her show, belly dancing and performing body contortions all the while.

"Singing and dancing is fun," said Martin, who is also a yoga lover and a black belt in several martial arts.

Not only did she play the violin—both chamber music and "angry grunge"—but she also played the piano. Martin performed a few different pieces, tributes to Paganini, one classical and another new age.

"She's not just a violinist. She's a true musician. She can do everything," said Chad Herzog, the director of the Artist Series, which sponsored the show.

The show's name stems from a 19th century violinist, Nicolo Paganini, widely known for his "supernatural" ability on the violin. Martin wanted to imagine what he would have done with musical styles of India, Ireland, East Asia and the American South. Very few violinists can mimic his style and ability. Janice Martin is one of the elite.

Though few students knew anything about Paganini, all were surprised by her wide range of gifts.

"I don't think it's what people expected when they heard a violinist was coming to JC," said Bobbi Albright, the student leader of the Artist Series.

Indeed, Martin's scope of skill was shocking, to say the least. Students entered expecting chamber music, and left with an entirely new perspective on what musical ability means.

"We're doing something that no one's ever seen before. That's what the Artist Series is about," said Herzog.

When asked what one thing she would like to tell the Juniata Campus, Martin replied with words of wisdom, "Your work is who you are. It's a real honor to be able to share myself and my work with you all."

The show also included musicians Uli Geissendoerfer on keyboard and percussion; Brandon Terzic on the guitar, banjo, and sitar; Michael Savino on acoustic and electric bass; Greg Gonzalez on drums; and Jeffery Crumrine dancing.

Hannah Rauterkus / Juniatian

The performers of Paganini Mania hosted an enlightening workshop on music and dance that delighted the audience.

"Unlock your voice" to honor women writers

Emily Eller

On Friday night, students from the Women in Literature class and the "Unlock Your Voice" practicum will perform pieces by the female authors of their choice at the annual event "Unlock Your Voice." It will be a night of honest hip-shaking, estrogen-driven, all-out belting of the words and works of female authors.

"I think the community at large doesn't recognize how much women authors have contributed," said Associate Professor of English Judy Katz, who oversees "Unlock Your Voice" and teaches both the Women in Literature class and the "Unlock Your Voice" practicum.

She continued, saying of this year's event, "It is not, by the way, appropriate for children. Some of the works are pretty graphic."

And if past years can serve as any indication, she's right.

This year the gloves are off. Five years ago the format was changed to a coffeehouse atmosphere, away from the more formal speech set-up. This year the "Unlock Your Voice" team is eliminating the podium altogether to try to achieve an even more personal, theatrical feel.

"People are trying to express their piece using more than just their voice. We want to let the energy of the whole piece come through," said senior and participant Lynne McCausland.

All the readers have chosen works that are meaningful to them. And this year, for the first time, many participants are performing the very personal accounts of blood relatives.

When asked why the Juniata community should attend "Unlock Your Voice," McCausland said, "It's a nice thing; a slightly intimate thing. It'll be a good time."

Unlock Your Voice will be held this year on November 19 at 8pm in the Ellis Ballroom. Admission is free.

I am not a fan of large corporations. I would love to see Teddy Roosevelt return from the dead and beat Bill Gates to a pulp with his big stick. Unfortunately, our government is too weak to actually tackle empires like Microsoft.

In this corporate sewage, there is one company to which I shall remain faithful. It is the One True Corporation: Google.

How is Google different? When the company went public, they all but flipped off Wall Street. Instead of relying on the usual, and expected, ways to attract investors, it used a process which allowed for a true public company.

The Ratings
gmail.com

Addiction	5, Forget Outlook.
Humor	3, Amusing sayings.
Navigation	5, Google is divine!
Political correct.	5, Not a problem.
Usefulness	5, Get it ASAP!

Google is most noted for its omnipotence in searching, but its diverse applications are what really make the difference. From Froogle to Google to your desktop, they have all of your searching needs covered (minus my missing TV remote, of course).

But the company's power has grown stronger. Google will soon do e-mail, or "Gmail." Many of you may have a beta Gmail account already, but its public release date has yet to be determined.

As always, Google promises to outdo everything on the market. For starters, it offers a whopping one gigabyte of storage space. That is 100 times what your Juniata account offers.

Imagine being able to save, send, and receive as many e-mails of any size as you would like, and without ever worrying about those stupid "size limit" warnings. This is one situation where everyone would agree that size matters.

Of course, Gmail's presentation of e-mails is even more revolutionary than its monstrous size. Gmail cuts all the crap out of e-mails, so all responses originating from the same initial e-mail can be read almost as one long AIM dialogue.

I recently had a quick discussion involving three other people via e-mail. While the rest had to sort through their Juniata inboxes to find all the replies, I had only one thread to look at. On this thread, each person's name was a different color. I could instantly collapse any response on the list to a single line, thereby shrinking the size of what I have to look at. I also do not have to sift through all the boring reply code when I breeze through the e-mails.

Replying to an e-mail is also as simple as an instant message. Simply click in the open text box at the bottom of an e-mail, type your reply, and hit send.

Gmail has what many lack: organization. Stop trying to use folders which you will forget about anyway. With Gmail, several clicks of the mouse can give any one e-mail thread any number of labels. After you label it, just archive it and forget about it. When you need it again, simply click on the label you are looking for and pull it up. If you don't use the labels, you still have the One True Search Engine (er, Google) to find it.

Even its address book is above par. Gmail lets you import address books from other programs. More importantly, it automatically saves all addresses that an e-mail was sent to or received from. Never again will you lose the address of the alumni mentor who never bothered to reply to your email.

Of course, Gmail has the other bells and whistles that accompany e-mail programs. You can save drafts. Numerous shortcut keys speed things up. It is also equipped with spam filters.

Mr. Gates, your Microsoft Outlook is now Outdated, Outdone, and Out-of-style. Get a Gmail account.

Since this free e-mail service is not yet public, you should do two things: ask your friends if they have a Gmail address and can spare an invitation to join Gmail. Then apply to receive Gmail updates so that you know the public release date.

Once you have a Gmail account, you will understand why I dread opening my Juniata inbox.

Perhaps you too will begin to believe in the glory of Google.

Estás en tu casa

Jay Trovato

Immersing yourself in another country's culture is hard, but the task can be made easier and more fun by living with a host family. Your host family can provide you with valuable insights and support when the going gets tough.

First of all, living with native speakers is a great opportunity to perfect your host country's language. It's like having a living textbook with you to correct the millions of mistakes you will make – especially if your family is a stickler for grammar! Also, someone in the family will probably have an interest in English, and even if you only teach them a few phrases, s/he will genuinely appreciate it.

Host families will also help you find your way around the town you live in. When I arrived in Xalapa, I was quite intimidated by the idea of taking any of the buses weaving through the city, fearing that stepping on the wrong one would take me to the other end of the universe. A few pointers from my host siblings oriented me, and now I am fearlessly and regularly using the buses.

You'll also learn formalities like table manners. Thanks to advice from my host dad, I now know the correct way to eat tortillas. He also taught me another point of etiquette: the right way to burp. In the U.S., if someone burps quietly with a closed mouth, it's overlooked. Here, no matter how quiet it may be, you're supposed to hold it in until you're out of earshot.

Aside from those practical matters, host families can give you candid perspectives on your host country. I'll never forget the time I asked my host mom and sister about Mexican ex-president Carlos Salinas. They minced no words about how much they loathe him! Your host family can learn from you, too; you can challenge the stereotypes they may have about the United States.

Of course, as with any family, things aren't always smooth sailing. It's disheartening sometimes to have my Spanish and my table manners scrutinized. It gets exhausting to be on a constant learning curve. And one of the ambiguities I struggle with sometimes is to what extent I'm a guest and to what extent I'm part of the family.

These feelings are short-lived, though, and are always overcome by the extraordinary Mexican talent for hospitality. My host family has definitely made me feel at home, and I know I'll miss them I leave.

Do something Mexican!: You know how hard it is to cut a skinny sliver from a round cake without having it disintegrate into crumbs? Try the Mexican method: cut the cake into two concentric circles. Now, cut slices from the outer ring. The pieces of cake will have a better chance of surviving the journey to your plate. Plus, you'll still have the center piece to fight over once the outer circle is gone!

Collegiate dementia:

Zen among haybales

Carolyn Keller

On occasion, people manage to astound even me. I'm not even talking about the President, just ordinary, regular people who say or do something that is so comically horrific I have to choke myself not to laugh.

Flashback to a warm, breezy August evening this past summer. I'm in my Land of Zen, also known as 7-D Stables. It's where I spend the majority of my free time during my summer breaks at home.

"Spend." I suppose that should be "spent," but we'll save the graduation panic attack for another column.

Anyway, as all equine-philes out there know, horses can provide affection, friendship and therapy. After a day or night dealing with the hazards of bartending, it's where I would go to chill and put order back into my universe.

Enter the thirteen year old barn-evangelist to shatter my utopian world. She arrived innocuously enough; her friend from Japan's little host sister was taking a lesson, and the two girls arrived with the littlun's father to pick her up. Next thing you know, the exchange student is bopping around the ring on Katie, the World's Nicest Living Pony, and I am keeping the as-yet-in-the-biblical-closet-bumpkin company by the rail.

It all started out okay. Idle chatter, you might say. We were talking about studying abroad, which is always fun for me. The kid seemed smart and outgoing, always a good thing.

So, what did your mother tell you about appearances being deceiving?

One minute I'm nodding half-absentmindedly in that way I do when I'm listening to nice people's nice conversations, and then the next, POW!:

"But I'd love to experience an entirely different culture," she says. "I'd like to learn a language, but I think it'd be too much work. But if I did, I'd want to learn French, but I don't think I'd ever want to go to France, because I'm a Christian, and it's only 2% Christian there."

Um. A few thoughts:

1. She wants to experience an entirely different...*Christian* culture? Like....Kansas?

2. France is like, 98.109874510649871406% Catholic, give or take several percentage points. Now, I've been more-or-less an on-and-off Catholic for most of my life, and I could be wrong here, but who does she *think* we Papists worship up there on the cross? Brer Rabbit?

"Really?" I say, slightly snidely, but not so you'd notice. "I thought France was mostly Catholic.

She gave me a blank look. "Maybe, but it's only 2% Christian."

Iiiiiinteresting.

"Yes...but I thought Catholics *were* Christians," I said.

I believe my actual thoughts at the time were something akin to: HOLY GOD CAROLYN QUIT TRYING TO TORMENT THE POOR DELUDED CHILD!

"I don't know..." she began to trail off and look very, very confused.

I did the only logical thing. I sold out to diplomacy.

"You know what, I could be wrong," I said. [I'm totally *not*, but this seemed on par with telling the kid the truth about Santa Claus]. "I know that can be an iffy area for some people" [wait, what does Santa have to do with religious tolerance?]. "So I'm not sure." [I am the worst sellout *ever*].

Little Girl: "Yeah, I don't really know either"

I did the only thing I could think of, aside from panicking: I scurried away to the beckoning haven of my heathen ways, and helped Instructor Sis to put the horses out. The exchange student hopped off Wonder Katie, and then everyone played w/ the cats and the rabbits, and all was well in LaLaLand again.

I never saw the child again, but I did learn a very important lesson: Never sacrifice the truth for diplomacy.

I'm so moving to France. Just let me get my canoe.

Movies: "Polar Express" jump-starts the holiday

Carolyn Keller

The Christmas season seems to start earlier every year, and "The Polar Express," released November 10, looks to usher in a dose of Christmas cheer before Thanksgiving turkeys have even had time to panic. However, cheer it does, and see it you should, albeit perhaps closer to the holidays.

Based on Chris Van Allsburg's holiday children's classic of the same name, the movie examines the meaning of Christmas on a slightly deeper level than, say, "Surviving Christmas." Yet "Polar's" premise is a surprisingly simple one. Five minutes before the clock strikes midnight on Christmas Eve, children questioning their belief in Santa Claus are whisked away on the Polar Express. And where else would the magical train transport them to but the North Pole, to meet the jolly "Mr. C." himself?

Of course not all goes as smoothly as planned, and after adventures including a lost ticket, a malfunctioning brake system, and a runaway train car, the two boys and a girl at the story's center are ready for anything, except perhaps to believe that Santa is real.

That's where Tom Hanks comes in. Playing six different characters, including the train's conductor and Santa himself, Hanks, through his characters, tries to convince the children that the good old-fashioned Christmas magic still exists. And in the hands of director Robert Zemeckis ("Forrest Gump"), the film also aims to remind audiences that movie magic still exists as well—a hopeful note for a mediocre movie season.

Teaming up with Zemeckis for the third time (after "Forrest Gump" and "Cast Away"), Hanks launched himself into a relatively new style of filmmaking. Using a technique similar to what was used to animate the infamous Gollum from the "Lord of the Rings" trilogy, special effects wizards gave Hanks a studio as his stage. They then monitored all of his movements with a computer, and he was animated and transferred into the film.

The result is astounding. Though the characters are still obviously animated, they occasionally will break out into a movement so lifelike that it may cause the unsuspecting to do a double-take. The technique has a long way to go, and overall the characters do not escape the eerie robotic motion of computer animation, but the new technology's effectiveness in "Polar Express" is admirable.

It's true that at some points of the movie, the new technology threatens to trump old-school Santa Claus charm. However, Zemeckis, who co-wrote the screenplay, manages to infuse the story with a strong and surprisingly melancholic emotional core. He doesn't let computers distract too much from the tale being told.

That tale is great for kids, great for big folk who still want to be kids, and greater still for those who want a booster shot of that warm and fuzzy holiday feeling. However, if you're in a bit of a "Kill Bill" mood, try opting for one of this season's heinous(ly bad)-looking horror movies instead.

The point is if you're primed

The high note: the Daddario Quintet

Jacob S. Warner

Sunday night, music fans were treated to the heavenly jazz-funk-fusion of the Daddario Quintet. The band, comprised of five Juniata students, rocked Ellis Ballroom as prospective and seasoned students alike moved and grooved to the sweet sounds emanating from the stage.

Stephen Yeager, Takahito Matsuyama, Paul Berry, Muhammad Jami, and Nick Daddario delivered an electrifying display of musical proficiency, ebbing and flowing through liquid jazz and funk compositions with the utmost ease. You soon realize that they are not *playing* music—they are speaking through their instruments; they *are* the music. And they have merely gathered for a rousing chat.

As a band, they possess the uncanny ability to capture their listeners within that first half note—cast, set, boom…you're hooked! From the first mini-moments of Sugarhill Gang's "Rapper's Delight," the crowd watched intently as Jami sent old-school rap on a collision course with Daddario's funky guitar, Berry's boombastic bongos, Matsuyama's masterful percussion, and Yeager's bounding bass lines.

The Quintet flawlessly flowed from neofunkadelic revivals of old-school canonical creations to musically chilling pieces, eliciting images of Santana, circa 1969, Woodstock, the famed "Soul Sacrifice" performance. Daddario sits, legs crossed, his guitar floating gently amid his hands. When he plays, it's as if the frets are teasing his fingertips as they glide effortlessly along the neck. The bass booms in the background, lifeblood pumping as the bongos and drums combine and collide with sultry saxophonic sounds.

From this the guys slide into a collaborative creation dubbed simply "The Bossa Nova Song." Cymbals crash and chimes chatter. Soprano snakes writhe under the sax sounds as the band embarks on a karmic sound trip, exploring Middle Eastern flavor. The piece is peppered with gutsy blues riffs and deep bass reverberations, as the band glides effortlessly across the musical time-space continuum.

A few songs later the quintet offered up the funkiest, soul-groovin', jazztastic version of "Broadway" I have ever witnessed. Jami's sultry voice combined with the improvisational mastery of the band made this one of the highlights of the evening. Band members traded smiles and solos, as they let free-form expression run rampant, once again displaying their ability to take musical standards to entirely new realms.

The electro-groove psychedelia of Ben Harper's "Steal My Kisses" got the room moving, and I put pen and paper down and let my feet do the writing, as the music sent me careening across the floor in spasmodic revolutions, physical manifestations of a musically blown mind.

The Daddario Quintet ended their two-set show with a slower jazz piece deserving of a night spent with a beautiful woman and a bottle of wine. Jami's fireside sex sax intermingled with sensual six-stringed sensations, throbbing bass and delicately placed percussion.

But the end was not quite the end, as the band was joined by Eli Finberg for an impromptu jam session. Matsuyama, Daddario, and Yeager created music on the spot as Finberg's free-styling rhythmic rhymes washed over them. Lyrical crescendo was matched perfectly by the creative spontaneity of these highly talented musicians, further illustrating their raw talent and impeccable improvisational ability. Do not pass up any opportunity to see these guys Live and in action.

The Daddario Quintet will be performing at the Darfur Benefit Concert with Dubmissive (winner of Battle of the Bands), and IY of Ithaca, NY. The show will be held in the Ellis Ballroom. Admission is $5 for students, $8 for non-students, and all proceeds benefit the refugees of Darfur, Sudan. The event is BYOB and begins at 8:30 p.m.

Hannah Rauterkus / Juniatian

The Daddario Quintet entertained perspectives on Nov. 14. The Ballroom was packed with new faces interested in what Juniata's social life has to offer. The band definitely made JC sound like a good choice.

Polar Express

continued from page 10

for something sweet but not too sugary, duck into "The Polar Express." The characters are engaging, the visuals are amazing, and while there are those moments of impending cheese, the movie's mostly magic. To the pleasure or chagrin of the viewer, "Express" does demand the audience suspend disbelief on numerous occasions…but really, isn't that what the movie's about?

"The Polar Express" is loaded with charm and adventure, with little hope thrown in for good measure. It's not "Toy Story" or "Shrek," but let's face it: you'd have to be a Scrooge to knock it down too far. Three stars.

Victory is near: Eagles advance to quarterfinals

Colleen Hughes

Was there ever any doubt that they would make it this far? For the 24th consecutive season, the #1 ranked Juniata women's volleyball team advanced to the NCAA Quarterfinals. The Eagles improved to 34-3 after two wins in the NCAA Mid-Atlantic Regional Championship in Gettysburg Saturday night.

The Juniata women's volleyball team has never won the National Championship. This fact makes these wins all the more exciting as the Eagles strive for the ultimate victory.

Katie Charles said, "This could be the year. We're keeping our fingers crossed and I feel like we deserve to win because we work so hard."

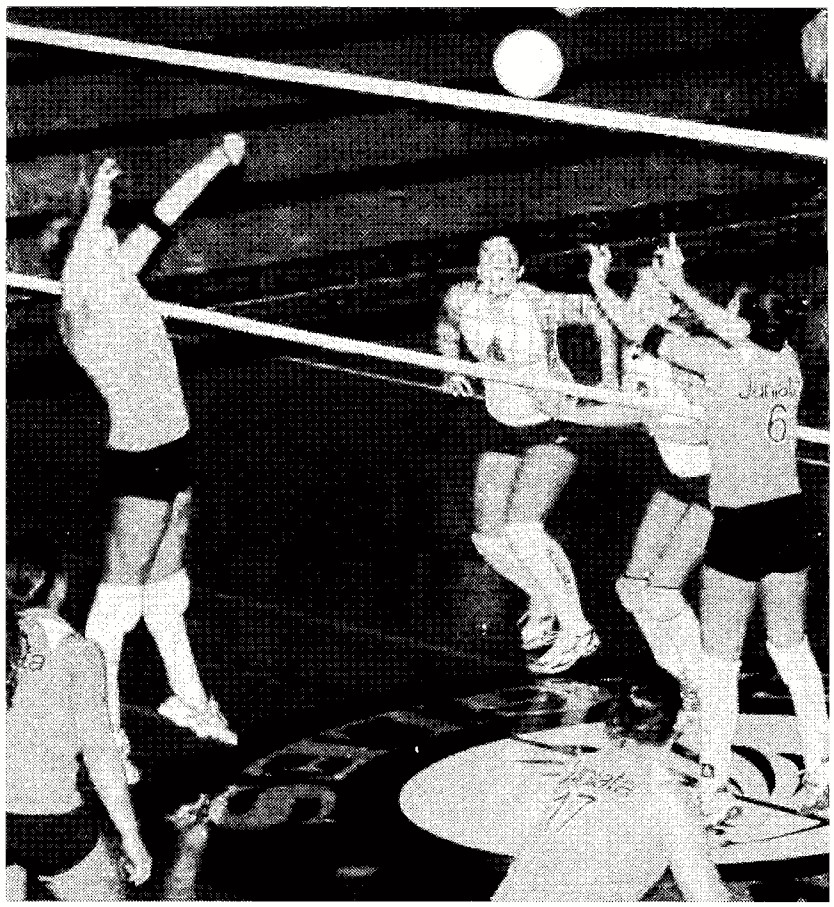
Stephanie Kines added, "I'm so pumped up. The feeling is indescribable. There are points in your day that's all you can think about. Everyone is really positive."

On Saturday evening, Juniata defeated Eastern University 30-18,30-21,30-22. Game one consisted of some solid blocks to disrupt Eastern's offense. Rachael Shatz and Stephanie Kines took care of the blocking and the hitting early in the game. Then back-to-back kills from Shatz and Charles won it.

The Eagles flew ahead early in game two with successful serving from Erin Wisor and Katie Laucks as the team jumped out to an 8-1 lead. Eastern then led for a bit, but not for long. A kill from Charles and a double block from Kines and Shatz led the team to the victory.

Game three was tight as the teams battled for points back and forth. This time Carli Dale went up with Kines on the blocks. Then Dale set Kines up for some heavy kills. Tara McMinn then served six uninterrupted points to wrap it up.

Kines paced the team with 12 kills and four blocks. Shatz posted 10 kills and also four blocks. Wisor added 10 kills with Dale passing out 42 assists.



The night before, Juniata also took a 3-0 match from Frostburg State University with scores of 30-15, 30-17, and 30-20. Solid defense was the name of the game as the Eagles brought up 45 digs. Laucks finished with a game high of 14 kills while adding three blocks. Dale passed out 42 assists and brought up six digs. McMinn led the team with 12 digs.

As the Eagles advance to the quarterfinals, energy and intensity are high and rising.

Charles said, "There are always a little bit of nerves when you get this far, but I'm feeling really confident. I know we'll take care of business when it comes time."

Kines said, "I don't want to expect to win a national championship. [But] We deserve to win a national championship. I just want to leave the season knowing we gave all we had."

The Eagles face Emory University on Friday night at home at 7 p.m. with a trip to the Final Four on the line.

Hannah Rauterkus / Juniatian

Award winning combo. Senior Carli Dale (6) sets up sophomore Stephanie Kines (5) for the kill. Both players have been named Division III National Player of the week at different points this season.

Big season ends in first NCAA tournament

Jeremy Simmons

This Saturday the Eagles went into the history books as the first Juniata field hockey team to make it to the NCAA Tournament. Unfortunately the match ended with a score of 2-1 as Cortland State bested the Eagles in overtime bringing Juniata's final season record to 14-5.

The match started with a bang as senior Grace McCluskey's ball hit home just 3:47 into the match giving Juniata the lead. The Eagles fought hard and held their lead for the rest of the half.

However 3:39 into the second half Cortland player, Courtney Ryder scored with an assist from Kelli Johnson to even up the match. Next with only 1:20 left in the game Melonie Sappe' made a diving save to put the match into overtime.

Throughout the match Sappe' made 5 saves whereas Cortland's goal keeper Jessica Anderson had to stop 11 shots. The match was ended 4:01 into the overtime period as Judith Slopnick scored the game winner for Cortland with an assist from Johnson.

Hannah Rauterkus / Juniatian

Grace McCluskey (21) led her teammates to a stellar season during her senior campaign. McCluskey was named to the Commonwealth Conference All-Conference team for her superior play for the second time in her career. She leaves Juniata with 53 career points, ranking her ninth on the College's all-time list.

This year the Eagles have had one of the best field hockey seasons that Juniata has ever seen and they now have many milestones to celebrate. First, finishing the season with a record of 14-5 they came only one win away from the program record. Along with this they have had the fewest losses since 1991's team who had a record of 8-2-1. During the year the team won six Commonwealth Conference matches which is a personal best for the program.

Because of all this hard work the conference recognized our team by placing six Juniata players on the All-Conference team. Kim Wagner was named Commonwealth Freshman of the Year scoring 15 goals, one short of the Juniata season record for goals. Head coach Caroline Gillich was named Commonwealth Coach of the Year for leading the Eagles to an outstanding season.

Looking ahead to the future Juniata has some hurdles it will need to pass if it wishes to have another season of this caliber. The Eagles will be losing eight seniors this year, four of whom made it onto the All-Conference team. On the other hand the Eagles have had an extremely strong freshman presence this year with Kim Wagner taking the spot of leading scorer while other freshmen have normally shown up in the starting lineup.

The Eagles proved that they can work well under pressure this season ending six of their games in overtime or with penalty shots. Juniata's ability to keep cool under pressure was one of the team's strengths. All in all looking back a few years its hard to believe that the team has made so much progress so fast, and hopefully we can use this momentum to have another tremendous season next year.

Football season comes to an end

Corinne Barabas

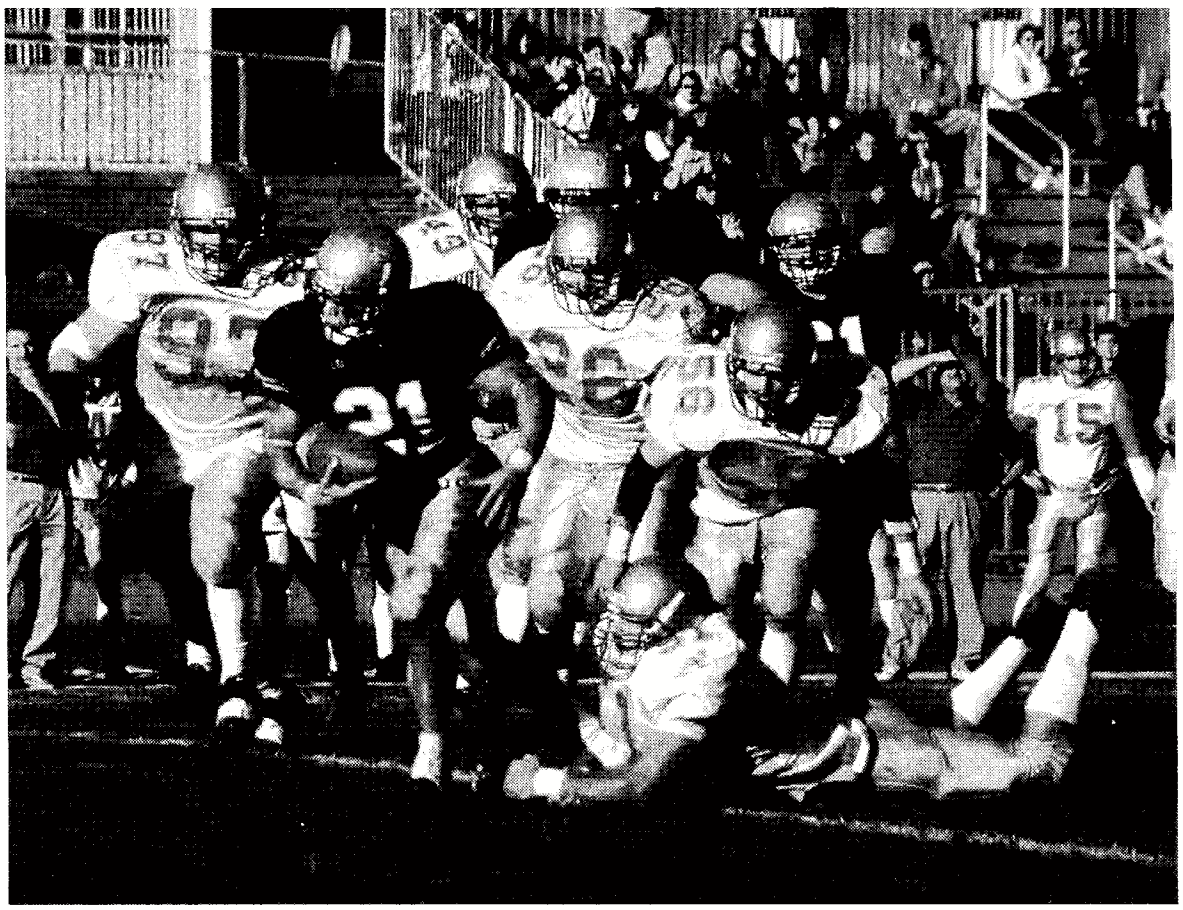
The Juniata Eagles finished the 2004 season 1-9. Despite a disappointing record, the Eagles played tough and were dedicated to improving.

In spite of a tough effort in all areas, the Eagles came up short to MAC opponent FDR-Florham on Saturday, November 13 at Knox Stadium.

At the end of the first quarter, the scoreboard showed a tight game with FDR only one point ahead, 7-6. The second half of the game was dominated by the defenses, but a strong drive by the Devils to open the half would prove to be the difference. A last-minute drive by Juniata came up just short, giving the visitors a hard-fought 13-6 win.

Dominating both sides of the ball, King's College defeated Juniata 48-10 last Saturday on the Eagle's home field. Among many solid performances by the Monarchs, there were a few positive plays for the Eagles. Too many turnovers, however, gave King's extra offensive opportunities.

Offensively, Duane Ehredt Jr. rushed for 99 yards and Jason Koch led the Eagle's receiving corps with eight catches for 72 yards. Freshman quarterback Corey Doyle finished the game 14 of 30 for a total of 113 yards.



On the defense side of the ball, Troy Beaver recorded 12 tackles, with another nine made by Matt Schmidt. Frederick Wall posted two tackles, one resulting in a loss of yards and the other a hard hit to the Monarch quarterback.

The Eagles will be saying thanks and goodbye to 14 seniors who put in a ton of hard work and displayed a commendable amount of perseverance during their four years on campus. "They are an outstanding group of young men who provide great leadership for the program on and off the field," coach Darrell Alt said.

For the season, the Juniata offense averaged 78 rushing yards, 130 passing yards and 208 total yards per game. They averaged 12.9 points per game against their opponents.

The defense was led by junior inside linebacker Peter Thomas, who posted 78 tackles on the season, with Bryon Latterner following suit with 70 take downs. Senior Frederick Wall flattened his adversary 50 times, including seven sacks.

Sophomore standout Duane Ehredt Jr. averaged 99.8 yards per game over the past five weeks, with a total of 190 carries for 590 yards.

Hannah Rauterkus / Juniatian

Sophomore Duane Ehredt Jr. is followed by a mass of white as he breaks for the goal.

Freshman QB Corey Doyle completed 51 out of 102 passes for 550 yards. Jason Koch, Doyle's favorite target, had 38 catches for 450 yards this season. John Boyer registered 26 grabs for 350 yards.

Giving 110% every game, according to freshman Mike Conte, "we are going to be much better next year. There were just too many injuries, forcing [us] to play a lot of younger people."

Coach Alt said that "he enjoyed all phases of the season. Going to practice, going to the games, and seeing the kids get a great win over rival Lycoming [were highpoints this year.]"

Athlete Off the Field: Carli Dale

Katie Laucks

It is hard to pick a place to start when talking about Carli Dale. Most people familiar with volleyball off campus would know her as one of the top setters in the nation. The ones on campus are used to seeing Dale wearing a blue and gold number 6 jersey, serving up aces, hustling after every ball, and setting Juniata to another win on the volleyball court. But, what we don't know is what she does when she is not practicing with the team, striving for that common goal - a national championship.

Senior Carli Dale has a POE in accounting. It wasn't a surprise for this on-track senior to have an internship this summer. Dale had an internship at the Regional Public Accounting Firm in Hanover, Pennsylvania

Senior Carli Dale, photo by Hannah Rauterkus / Juniatian

for the second summer in a row. "I enjoyed it so much, I wanted to go back this past summer," Dale said. "The experience is such a good one and I learned so much." She must have had done something right in the office during the summer because she was offered a full time job after she graduates from Juniata.

On campus, when not in the gym or weight room, there is a good chance Dale is assisting students. Dale is a peer tutor for financial accounting. She is also a student assistant for entrepreneurship. This gives students the opportunity to connect academics to JCEL. This is part of Juniata's way of helping students who want to own their own personal businesses someday. On top of this, she serves as the Business Manager for the Alfarata and Juniatian this year.

Dale is also coming up on her fourth year as a student assistant to the Juniata men's volleyball team. "It gives me the opportunity to see the other side of the game," Dale said.

She said, "There is a more tactical thing about the game of volleyball that I get to see, and I also get to bounce ideas off of Ken, the men's coach."

So, could we see Carli Dale being a coach someday? Being a successful student of the game and having worked under such brilliant coaches, it would seem the building of a coaching mastermind is in progress. "I don't know, maybe someday," Dale said with a smile.

With all this going on, one can see Dale has a lot on her plate. But, the number one thing on her agenda right now is obvious. The volleyball team is coming down to the end. With three games left, the elusive national championship is almost in her grasp. So how does it look? "We are a target, being recently ranked number one in the AVCA poles," Dale said. "We are going to take one game at a time, play every game as though it is the national championship."

If you tried to give the number one setter in the nation most of the credit for why this team is succeeding, you would receive a humble reply. "I only know I'm playing well when my teammates are playing well and when we are winning," Dale said.

When taking her off court responsibilities and mixing them with her on court duties, you can imagie the load Carli Dale is carrying. Dale isn't backing down just yet, not until she sets the final ball of the final point on November 27 at the NCAA final. Until then, her load is just a little heavier. But for now, you can catch Dale practicing in the gym or working hard in the classroom, until she graduates the way she wants - a national champion and a fulltime career woman.

Cross Country ends strong season

Corinne Barabas

The men and women's cross country team finished out the 2004 season with an exceptional showing at Allegheny College on Saturday, November 13. Competing in the NCAA Mid-East Regionals, the Eagles ran hard against the top runners in the area.

The men placed 16th out of 34 teams, competing in the eight kilometer race. Chris Sheaffer's time of 26:42 was good enough for 24th place, earning him an all region title. Justin Fritzius finished in 48th place out of over 200 runners with a time of 27:23. Freshman Shawn Rumery ran a 28:28 to capture 109th place overall and third on the team.

The women ended the race in 16th place out of 35 teams. Katey Glunt, running strong for the Eagles, captured an all region title as well, coming in 32nd with a time of 23:47. Nancy Hayes ran the six kilometer race in 23:54, earning 37th place out of almost 250 runners. Sarah Bay finished in 25:50, earning 108th position.

The cross country team had a successful season. They are looking forward to next year, where they will try to run stronger and faster and improve on all levels.

Intramurals Saved!

Dave Shalkey

Due to severe lack of gym space, intramural sports were almost cancelled this year.

The main problem is that there are only two gyms and everyone wants time. After the varsity sports get their share of gym time, there is little left for club sports and intramurals. But the student population is increasing and more clubs are forming that need gym time.

Initially, intramurals were going to be removed from the picture completely and the gym would be "first come first served" after varsity sports. The logic behind this was that most of the students playing intramurals were out of season varsity athletes.

Scott McKenzie is the "liaison between clubs and athletics" and deals with the stressful task of finding gym time for clubs and intramurals.

"We want everyone to have a chance to use the gym, not just varsity athletes," he said.

Now though, he has a new plan in place that will give time to both intramurals and club sports.

"IM's will be offered on Monday and Thursday nights. With the extended hours, we should be able to enjoy the same number of games per night as we enjoyed last year."

The gym is now open until 1:00 a.m. Intramural basketball and volleyball are going to be scheduled this semester. Possibilities for other IM sports next semester are still up in the air. Until Juniata College builds a new gym to accommodate the increasing student population, expect intramurals and club sports to struggle with this more and more every year.

No Seniors, No Worries

Dave Shalkey

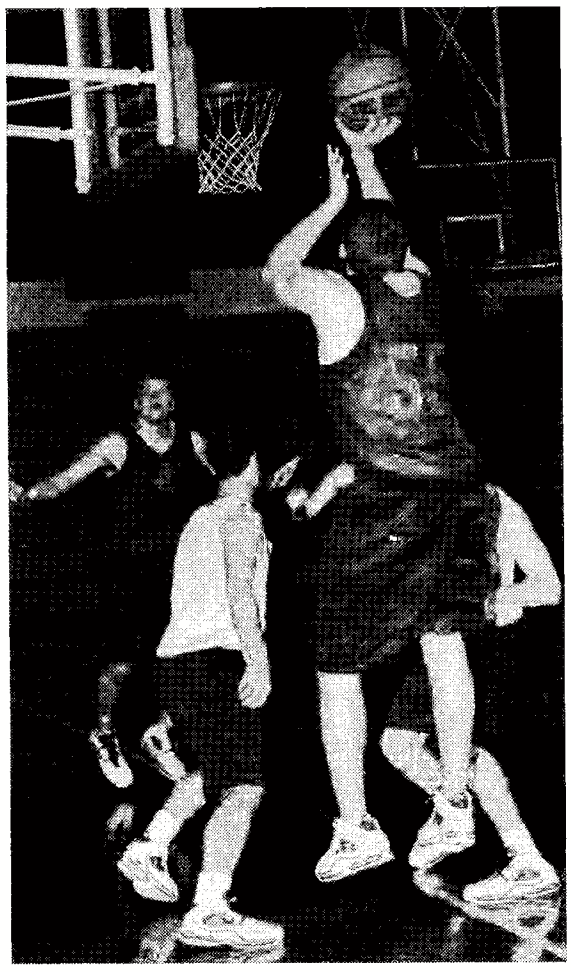
In a preseason poll voted on by the eight coaches in the conference, Juniata was ranked seventh out of eight.

"We are underestimated and we lost five seniors," head coach Greg Curley said. "It was tough losing good kids and good players." The Eagles lost their top two scorers from last year and four of the seniors played at least 20 minutes per game.

This year there are no seniors on the team to lose. Instead, the team will be led by juniors. Travis Boyd is the returning leading scorer from last year, averaging 10 point per game. Tommy McConnell has started for coach Curley the last two years. Neil Holloway and Jeff Byer were voted captains.

"This is an opportunity for young guys to take a feature role," Curley said about his young team.

Juniata is looking to get over the hump and make playoffs this year. They have posted winning seasons the last two years (13-12), but barely missed the post season both times. Curley thinks he has a big piece of the puzzle back this year.



"We would have made playoffs if we had Neil" Curley said. "He is toughness personified."

Holloway missed most of last season because of knee surgery and the team still thought enough about him to vote him a co-captain. Curley loves his work ethic and is ecstatic to have him back.

Neil wants his work ethic to rub off on the rest of the team.

"We gotta keep our nose to the grindstone," he said.

Having Holloway back to play alongside sophomore center, Chris Jasiota, also means that the Eagles will have an inside presence this year. They mainly relied on three-point shooting last season. Coach Curley wants to have more of an inside-outside game, but still plans to the shoot the three.

Hannah Rauterkus / Juniatian

"We are one of the best three-point shooting teams in the country," he said. Juniata made over nine three-pointers per game last year and shot 36.3% from behind the line.

A talented freshman class will also help. "We have a strong freshmen class. The team will be deep," Curley said. There are eight freshmen on the roster. Kyle Opitz, from Pine Richland High School will either start or play a significant roll.

Curley is looking forward to the Doc Greene Tournament, held at Juniata, where the Eagles have a "great home atmosphere." The tournament starts this Saturday when Juniata will face Penn State-Berks at 3:00 p.m.

Swimming team off to smooth start

Katie Laucks

Last year was unique in the Juniata College swimming pool. It was one of the most successful seasons the team has had in a long time. The team was 9-3 and finished third in the MAC. The third place finish was an improvement from the prior year when the team finished fourth. So what can we expect from this rising team this season?

Second year coach Brian McGrath said, "Better than last year."

Last season, the team had a new coach come in. That meant new training, new trust, and the uncertainty of what to expect from the season. But, with gradual drops in individual swimmer's times and the team putting marks in the winning category, Juniata began to put trust in its rookie coach.

"For someone to come in late, it is hard to trust them right away. But, this year we know how he trained us and how we did from his training, so we trust him now and only want to train harder," junior Amy Hanson said.

The team is starting the season off right; it has five wins under its belt right away. The team had success at the first meet, the Clarion Invitational and followed that up with a win over Widener. Then, the Eagles posted a strong showing at Goucher College, knocking off the host and then defeating Arcadia.

Recently, the team traveled to Albright where they suffered its first loss. The swimmers quickly forgot about that loss and bounced back with wins against Lebanon Valley and Drew.

"We are starting off the season at a higher level," Hanson said.

That higher level may be due to the return of several strong swimmers. Veterans of the team include senior sprinter Kathy Trainor, junior sprinter Amy Hanson, as well as top distance performers Allison Engle and Kim Dierolf. Hanson said, "We also have really strong freshmen that came in that I feel even have the opportunity to break some records and medal this year."

So what is the one thing on this team's mind this year? "We want to be recognized as a top competitor in the MAC. We want respect," Coach McGrath said.

If you ask anyone on the team, their feelings would be mutual.

Hanson agreed. "As a team, our goal is to get better, better than third place in the MAC...we want to win them all," she said.

These high goals don't seem too far-fetched this year as the team is starting off right. Look for this year's season in the pool to be another success and a record breaking one.

Women's hoops relying on young talent

Tommy McConnell

Last season, in Danny Young's first year as head coach of the Juniata women's basketball team, she simply wanted Juniata to compete. In a rebuilding year, Juniata did just that. Although they finished 5-19, the Eagles lost eight games by single digits, including a handful as the season drew to a close.

This season, Juniata looks to get over the hump. Carry over may prove difficult from last season, as Juniata adds nine newcomers to a roster with only three returners.

Luckily, one of those returners will be Kristen Kirk. The junior was a standout for the Eagles last year, leading the team in scoring and earning a berth on the All-Conference Second Team. Kirk was an integral part of Juniata's success; in its five wins, she averaged 20 points per game, compared to 14 in losses.

Unfortunately, Kirk enters the season with a lingering knee injury. She opted out of surgery prior to the season, but the injury may hamper her this year. If she is not 100%, Juniata will have to rely even more heavily on the new crop of freshmen.

"We rely on her for her leadership and her enthusiasm," Young said. "But we also have 12 quality kids that can play just as good. She is definitely irreplaceable, but she has some competition this year."

With or without a healthy Kirk, the freshman class will make or break Juniata's season. There will be at least two freshmen on the court at all times this season, usually more. How quickly they develop will determine Juniata's success.

"It takes patience," Young said. "We are going to take some lumps, we're going to take a lot of lumps early in the season, and heck, were going to still be taking them at the end of the year. But, we are going to work with what we have right now. It is a great opportunity for them and I'm excited to see what they can do with the opportunity."

A lack of proven players is likely why Juniata was picked eighth in the preseason coach's poll. Still, the second-year coach feels the freshmen are becoming more accustomed after the preseason scrimmages. The real test will be once the actual season starts.

"The girls, with the last two scrimmages, got an actual taste of what college basketball is all about," Young said. "I think the Catholic [University] scrimmage was a huge eye-opener for them. There are nine new faces and they have no clue what it's like to play at this level. We try to practice and simulate, but they'll never know until they get the experience."

With a small lineup – the

Rugby season comes to close

Brit Tew

For its fall season finale, the men's rugby team faced Allegheny on East field on Saturday, November 13. The River Rats squashed the visitors in a hard fought match, bringing their final record to 1-5. With a final score of 54-10, the Rats ran all over the opposition. The first tri was scored only two minutes into the game. Wing Captain Jordan Miller and President Corey Duvall both scored 3 tris each. Matt Sheley scored two tris. Jared Hamilton and John Marshall scored one tri each. Matt Yeats kicked the extra points.

With the fall season over, the team will end its practices until the spring. Most players will follow a personal weightlifting or exercise routine to stay in shape for the upcoming spring season.

The team, with about 20 rookies, is a "feisty group of guys" with of drive and desire, according to match secretary Brenton Mitchell. Every game that the Rats play is full of intensity and spirit. Even when they didn't win a match, they still sent the other team home hurting.

The large number of rookies and the overwhelming interest in rugby from this year's freshman class brings promise to the team's future as the new players will

Sodexho's bad food and students' seedy conversations - what else is new?

Matt Russell

Overheard, part 1: The Juniatian office's door is located in the middle of the line for Baker. This puts me in an interesting position to overhear loud comments made as students view the samples of the various dishes that are laid out. I'll say no more; just let your imagination fill in the rest.

Too Much Info: A Computer Science professor underwent surgery for an injury. Just before he went under, he looked at their monitoring equipment... and realized the surgeons were using an unstable operating system. Sometimes you just know too much.

Mad ride, yo: Late one evening I saw an odd light pass through an intersection - it was a vehicle with glowing wheel rims. What I noticed next made me despair for humanity: it was a minivan. "Soccer moms, REPRESENT!"

Overheard, part 2: There was a pasty, red noodle concoction available in the Ciao line recently in Baker. I saw two female freshman approach it and exchange these words: "What is that?" "I don't know, try it." "YOU try it." "No YOU try it!" Sodexho's stock must be soaring.

The Incredibles: Pixar has outdone itself once more. The computer animation looks excellent, but it's the plot and script that carries this flick to greatness. It's a rare movie you could watch with a friend, girlfriend, your parents, or the kid you're babysitting. It's just all-around good entertainment.

Quote of the week: "Hey Matt, do you have a sticker for my beer bong?"

Overheard, part 3: I heard the following (very loud) conversation exiting Baker. A guy says, "I just want her to sleep with me!" His female friend replies, "She will, just give her time." Values... discretion... etiquette... anything? No?

Madrigal line: Head-tent was well-deserved this year. Within ten minutes of the e-mail, the person responsible for attaining that position had sprinted across campus and finished setting up. Few things can make a guy pitch a tent that fast.

Pause: That last item contained no juvenile joke. No, stop looking, I'm serious...

What the blazes? Despite recent renovations in BAC, Alumni Hall's lighting is still hooked to 1970s dimmers the size of a refrigerator – which are in the midst of some very pricey equipment in the Digital Media Zone. If you were in the Blue Army and were told said system was sparking and smoking, might you move with haste? Wrong! You'd arrive half an hour later and decide to fix the problem tomorrow. No hurry... maybe leave a fire extinguisher?

Overheard, part 4: This gem is from the lunchtime grill line in Muddy Run. Two employees were discussing the day's special, chicken cordon bleu. "Isn't that spinach and chicken?" one asked the other. A student had to explain the sandwich's composition. Maybe tell the cooks what's in the special next time?

Pres. Perspective

continued from page 7

Houses which is a significant improvement over last year.

"Parking is a reoccurring topic on campus, but lately I have heard that there may be plans for new lots at locations such as the "Sherwood swamp," North Lawn (when Halbritter construction is complete), and the Pottery Shop grounds. Are these sites actually under consideration for future parking lots, and if so would construction start within the next year?"

William Alexander, vice president of finance and operations: Next summer we plan to construct a 67-space parking lot parallel to College Ave. It will start with the current location of the recently built "temporary" lot by Muddy Run. We will endeavor to build the lot around some of the existing large trees in the area.

The space in front of Sunderland currently used as a staging area for the Halbritter Project will be returned to lawn for recreational uses. Hopefully, it will be better than it was before the construction.

No firm plans have been developed for the Pottery Shop area, although some additional parking there is a possibility.

Women's hoops

continued from page 15

Eagles will likely be outsized at every position this season – Juniata will look the push the ball as much as possible. They will use a four-guard set and run at every chance they get. They will try to make up for size with speed and athleticism, something they didn't have in the past.

The same goes for the defense. The Eagles will use speed and pressure to bother taller opponents.

"I want everybody to know Juniata by their defensive intensity," Young said. "Defense is what I'm all about. It's what I was all about as a player and it is what I want to pass along."

Young knows it won't be easy, being outsized and with freshmen becoming accustomed to defensive schemes. She sees progress already, and with time, she is confident the team will gel.

"It just takes special people and a special team to make defense our number one priority and it's something again that I think they are buying into already," she said. "I think its just going to get bigger and better as the year progresses and as they become more successful with it."

Rugby seasons comes to close - continued from page 15

become seasoned in the years to come. "It's very exciting to see all the excitement that the freshman class has taken to rugby," Mitchell said.

As well as improving their play and knowledge of the game, the Rats are working to improve bonds with the community. After the flood that had most of lower Huntingdon underwater, the Rats went to the Christmas Shop for two days to help salvage its supply of plastic Christmas trees.

The men's rugby team is a group of players, but more importantly a group of brothers who support each other on and off the field. With a team stocked with potential and seasoned experience, they are ready to take on the spring season and make a name for Juniata men's rugby.

The women's rugby team, with a 3-2 mark, finished up its season as well. The Hell Benders scored wins from Allegheny twice and also the University of Pittsburgh-Johnstown. Losses for the Hell Benders came against Allegheny and Cal University.

Hannah Rauterkus / Juniatian

These dresses were never going to make it out in one piece. Nov. 6 the Hellbenders hosted the rugby formal where the only thing prettier than the dresses was their win against Allegheny.

According to club president Lindsay Clark, the team lost many experienced players to graduation and gained so many rookies this year that the seasoned players were outnumbered, causing the team to have to slow down and teach the game.

All of the teaching has paid off for the Hell Benders. According to Clark, the team has come a long way, is more aggressive and not afraid to go out and play. "They have a much better sense of the field," Clark said.

According to Jessica Deal, the vice president of the women's rugby team, the team is very enthusiastic and plays really well with each other. Team synergy plays a big part in Hell Benders' rugby.

In their annual formal that the women host every year, the Hell Benders raised 700 dollars for charity. During the formal, the ruggers dressed up in 80's style dresses then played a normal game. They also sold food and raffle tickets. Last year's team made 400 dollars; this year's fundraiser surpassed the team's expectations.

With a large group of rookies, the Hell Benders look to next spring and the coming years for the team to truly flourish.

National champions

Juniata Women's Volleyball team ends season with the title

Colleen Hughes

On November 27, 2004 the Juniata College women's volleyball team made history by winning the NCAA Division III National Championship.

Juniata made it to the title match on Saturday by defeating NYU in three games on Friday night in the semi-final.

The win was sweet, not only because it propelled the Eagles into the final, but because it completed a mission of revenge. The Violets ended Juniata's undefeated season in 2003 with a shocking upset in the national quarterfinals. One year later, the Eagles took pleasure in returning the dream-crushing favor.

The title contest on Saturday night against three-time championship foe, Washington University, took Juniata's players to the peak of their careers.

Junior Abby Leonard stated that, "After regionals we talked about mountains. We weren't allowed to pick Everest. That would be later. We picked the second highest mountain in the world and that was Emory. It kept us motivated and in the moment; something to keep us focused."

Freshman libero Tara McMinn added, "The concept was that you can't summit the mountain without going up one camp at a time."

With the sheer determination to reach the top, the Eagles conquered their Everest. Extending its win streak to 20 games, Juniata closed out the season without dropping even a game in the playoffs, winning eight straight 3-0 matches. The Eagles took Washington University in the title contest, 30-27, 30-27, and 30-28.

In game one, Juniata took an early lead. Then, Washington kept the scores close until the teams tied at 27. Juniata ran the next three points with kills from Katie Laucks and Lindsey Habel. Laucks sealed the win with an ace.

In game two, Juniata never trailed. The Eagles flew into a commanding lead at 29-23. Washington responded with a four-point run to pull close at 29-27, but a service error after a JC timeout gave Juniata the win.

During game three, Washington took the lead. Then a kill from Stephanie Kines tied the match at 14. The teams battled back and forth until Kines' kill gave Juniata the lead, 22-20. Wash U. tied it once more at 25 but Katie Charles and Laucks responded

continued page 4

Paul Leonard / submitted photo

The one and only. On November 27, the Juniata women's volleyball team ended the season as the #1 team in the country and the only team in JC history to win the NCAA National Championship.

Emotions fly high

Colleen Hughes

Every season the Juniata women's volleyball team walks into the first day of camp feeling the weight of expectations.

Each player puts on a jersey bearing a college's name that is synonymous with volleyball greatness. Each woman knows that she will step into a spot once filled with an All-Conference player, an All-American, or a Juniata legend.

For many, those expectations would be overwhelming enough. But the players themselves know that bearing the weight of what has been done is nothing compared to carrying the burden of what hasn't.

Fans would flock to the Eagles' nest each season, whispering about possibility and potential. But at season's end they would whimper about "if"...and they would wait.

Now, the wait is over. The Eagles have landed! And beyond the box scores, beyond the stats, beyond the rankings, you find the heart of this team. You find the undying spirit that has flowed through every person ever affiliated with this extraordinary group of people.

Possibly the origin of this spirit lies within the one man who has been through it all. 2004's NCAA Division III National Coach of the Year, Larry Bock has been the backbone of this team's success and unity. The extreme love of coach and team is what makes this program all the more special.

The feeling after winning the game of his life, Bock said, "I just want to hug everybody." He added that he and Associate Head Coach Heather Pavlik are hopeful that the team and the alumni take all the ownership.

Another year, another acronym

Faculty elect to trade CAI and CAII courses for new IC and CA designations

Mike Chirdon

The face of CA at Juniata is changing. Students in the incoming class of 2009 and members of this year's freshman class will not be required to take a Cultural Analysis I class. Instead, they will take a class called Interdisciplinary Colloquial. Like many things at Juniata, it will be referred to by its initials: IC.

Though CAI classes are changing, a cultural analysis course will still be a requirement. Instead of being required to take CAI and CAII, in the future students will take an IC class and a CA class. The requirements are not changing for students who are currently enrolled as sophomores, juniors or seniors.

When the curriculum committee met to discuss CA, it came to the conclusion that the requirement needed to change. However, there were many components of CA that they believe are important. Those components are the focus on culture, team teaching, interdisciplinary study, and the concentration on serious liberal arts questions. All of these components will be kept intact, but not all in one course.

The main difference between IC and CAI is that the focus of the curriculum will not be culture but rather on interdisciplinary curriculum and writing skills. However, some CA courses may become IC courses in the future. Sophomore standing will still be required for enrollment in any IC or CA course.

IC will be taught by two or more professors and class sizes will be smaller. Small discussion sessions will be required for all IC classes.. Also, because there will be more faculty free to teach courses, a larger variety of courses will be available.

Professor of Russian Jim Roney, who currently teaches a CAI class titled Modernity, Knowledge and the Self, said that he and another professor might team teach a course in literature and economics next fall.

IC will build on the writing skills that students begin to develop in CWS. Each student will be required to write a six page paper in IC. Also, students will have conferences with their professors to discuss the development of their writing abilities.

The new cultural analysis requirement will be much like the current CAII requirement. Certain classes will have a CA designation. Students will be required to take one class with a CA designation. Roney speculates that many of the current CAII classes will not serve as CA classes because they do not have enough focus on culture.

One student (who wished to remain anonymous) said, "Honestly, though, I think [the change] is a good thing. Something needed to be done about that class."

Roney believes the changes will be good as well. He, however, never thought there was anything wrong with CA.

Roney said, "Many students would secretly tell me how much they enjoyed the class, because, you know, they wouldn't want their classmates to know that."

In the end, Roney feels that it is important that Juniata offers courses that ask important and challenging questions that delve into the meaning of life.

How do you feel about the fact that this year's freshmen will not be required to take CA I, but will take a new Interdisciplinary Colloquium course instead?

"Juniata has a tradition of academic excellence. Making things 'easier' for freshmen/sophomores may jeopardize this." - *Drew Waligora '05 (right)*

"They should've done it two years ago!" - *Curtis Ishler '06 (left)*

"I like CA and think all students should still take the courses. You learn a lot of important information. However, you shouldn't be forced to do anything if you don't want to. - *Paul Fleischer '06 (right)*

Two degrees for the price of one

Carolyn Keller

These days, on a global scale, the glass seems awfully half-empty, and connections in the international community seem more likely to be broken than forged.

So what's a small liberal arts college to do? Leave it to Juniata to put its best face forward, and plant its foot firmly in the "uncommon outcomes" door. Juniata is developing two study abroad programs where students can connect with peers at other universities around the globe...and literally earn two degrees for the price of one.

Business and IT students can now fulfill both their POE requirements and their sense of adventure in Bocholt, Germany. Students studying French and Education can do the same in Lille, France. Upon return, students then graduate from Juniata with both an American and a European degree.

There is a catch: for the Bocholt program, students must complete a thesis before the European degree can be received; for the Lille program, students must meet a highly specialized list of requirements, both at Juniata and in France. Both programs also require a solid grasp of their respective foreign languages.

But it has been done.

The idea of a dual degree program is not a new concept at Juniata. Most international students on campus have the option of completing just such a degree. However until last year, American students had not had the chance to do the same.

Enter Juniata alum Nicole Smeal, '02, and Lauren Peppers, '05. Both Smeal and Peppers embraced the unique opportunity to be the first to further their international education through the new programs.

A common phrase they use to describe themselves is "guinea pig."

Smeal, who graduated with a degree in International Business, was the first Juniata student to receive a dual degree. After graduating, she pursued her Master's degree with the Bocholt program.

Peppers, on the other hand, will be the first Juniatian to receive dual degrees as an undergraduate. After spending her junior year at Lille, Peppers will receive both a Bachelor of Arts and a French Licence degree this spring. Peppers said that her role as a pioneer in the dual-degree process was the result of hard work...and good timing.

"The dual degree program was really serendipitous because I had the [required] classes and I knew I wanted to become a teacher, and it was a good fit," she said.

This is not to say it was easy. "[At times] I felt overwhelmed but I felt it was the best experience, and I wouldn't have changed it," Peppers said.

Junior Brian Wilson will see exactly what she means this spring, when he becomes the first Juniata student to attempt the undergraduate dual degree program in Bocholt, which operates slightly differently than the Lille program. Instead of spending one academic year abroad, students venturing to Bocholt will spend their spring semester at the university, and then participate in an internship lasting through the summer and into the fall. Then, upon completion of their requirements at Juniata and their theses, they will walk away with two degrees.

Wilson, who hopes to intern with either a car or weapons manufacturer, is eager to get going. "I'll have another degree from another university. It's kinda hard to pass up," he said.

It can be hard to pass up practically as well. Kati Csoman, director of International Student and Scholar Services said, "For Americans, it may make them more competitive for an international corporation. It infers that they have a second language capability and may have developed some knowledge outside their own country and industry. Two degrees makes one stand out and a more attractive candidate for a job."

Csoman also cited the personal benefits of attaining a dual degree. "For both sides, knowing their own field within different cultural centers will help them to become better leaders and better in their jobs because of their perspective," she said.

The Lille and Bocholt programs are just the beginning. As European education systems become more standardized with the development of the European Union, "it's probably going to become easier to look at different European countries and be able to work out agreements," said Csoman.

Through these innovative programs, Juniata hopes to start a rich international tradition, one connection at a time.

WKVR hopes to add 8 hours of new shows

Jeremy Simmons

The campus radio station (WKVR) plans to add eight hours of additional daytime student programming for this upcoming spring semester. The tentative schedule is to include a new two-hour block of student programming Monday through Friday from 2:00 p.m. until 4:00 p.m. After the new shows are over, the station plans to switch back to National Public Radio (NPR) for the news before WKVR picks up again with its regularly scheduled programming from 6:00 p.m. to 2:00 a.m.

This plan remains in a tentative state because it needs to be approved by WKVR's partner station, WPSU.

The first step to adding the new hours was to get the plan approved by the WKVR board of directors. After the board had approved the new schedule, Provost Jim Lakso had to give it his endorsement. According to Matthew Newman, business director of WKVR, the Provost has approved the current plan to add the new hours and all that needs to be completed is a revised version of the current contract WKVR has with WPSU.

The current contract states that WPSU will provide Juniata with the equipment and ability to retransmit WPSU broadcasting (NPR) on WKVR. In return, WKVR's on-air fund-raising, member drives, and other income generated as a normal part of operation go to WPSU.

Currently WPSU also reserves the right to broadcast its programming from 2:00 a.m. until 6:00 p.m. This is the portion of the contract that will be renegotiated in the upcoming winter break because WKVR hopes to add student shows during WPSU's current time slot.

WKVR had originally planned on adding well more than eight hours per week of new student programming. The original proposed schedule was reduced to the current eight hours because there was a significant outcry from the community that enjoyed the current NPR programs. One of the largest complaints was that NPR is the only way to get radio news shows in the Huntingdon area.

Some members of the community may also be concerned about the content of student radio shows that run in the afternoon. "I don't feel that WKVR is always the best thing for my family to be listening to," said one community member who wished to remain anonymous.

To come to a compromise, the new student programming will be taking the place of time usually reserved for classical music so that no news broadcasts will be eliminated in the new schedule. The WKVR staff hopes that this will please the community who enjoy NPR while also adding new student-run shows.

All in all if this plan is approved by WPSU over the holiday break, it could mean a big change for Juniata's campus radio station by offering daytime programming in the spring semester.

BYOB events resurface

Sarah Svigals

Two recent BYOB events on campus have brought attention to the prospect of alcohol consumption at school sanctioned events. This however is nothing new for Juniata or for many colleges worldwide.

Dean of Students Kris Clarkson said that in prior years there were many more BYOB events than there are currently, such as "Madrigal dinner, Ellis dances, the Cloister beer garden, and parties in the South Lounge (where the Residential Life office is now) and TNT lounge."

Clarkson doesn't see this to be a problem or a detrimental direction for the College to be heading.

"I certainly don't want every event on campus to become centered on drinking [or] that in order to have fun there must be alcohol involved," said Clarkson. "As long as students remain responsible and obey the laws and policies set out by the College it seems to be a fair direction to be headed."

Director of Student Activities Staci Weber does not see this as a direction that she would like the College to be heading, but she said, "I don't see 2 BYOB events to be a problem."

Senior Eli Finberg, who organized the Daufur Concert, one of the BYOB events this semester, agrees with Clarkson. He said, "BYOB events on campus allow for greater monitoring of alcohol abuse, which I think is healthier than relegating it to something more underground."

Hannah Rauterkus / Juniatian

No one will ever know if it was the music or the drinks that brought the crowd. BYOB events have started to make a comeback at Juniata.

Finberg went on to say that many European schools and even some American schools have pubs on campus and that he believes that having a pub on campus "would serve to unite students as well as faculty and staff in a place where meaningful discourse could continue outside the classroom."

Finberg also believes that allowing students to kick back with a beer and enjoy some good music increased attendance.

"It certainly takes away the excuse that they can't attend because they'll be at the bar," said Finberg. "Creating an event that students will enjoy and allowing them to enjoy it with a beer will never have trouble drawing a crowd."

Senior Corey Duvall, president of the Rugby Club, which hosted another BYOB event this fall, agreed. "Sometimes it's nice to be able to sit outside in the sun and have a beer. So if everything is kept under control, then why not have that as an option for people?" said Duvall.

However, Duvall went on to say that perhaps some events would not be appropriate for a BYOB event "such as a choral concert...but if it's a sporting event of some sort, allow people to make their own decisions."

Don't Forget . . . McDonald's Gift Certificates Make Great Stocking Stuffers!

New forums meet initial goals

Richard Pulliam

Juniata has had online discussion boards for over three years, but they were not being used to their fullest potential. They were hard to maintain and unattractive. There had only been about forty posts in that three year span.

Over the summer the College made some dramatic changes to the Juniata online discussion boards found at http://forums.juniata.edu. These new changes were so significant that in the first week of operation there were more than forty posts. After one semester of operation, the initial goal of replacing the forums to have them be used more often appears to have been met.

Looking at 2,000 posts in three months with the new forums compared with the 40 posts in three years with the old ones, it is apparent how much more efficient and useful the new forums are.

Joel Pheasant, Director of Web Technology, said, "We were looking for a better software package for the forums that would allow people to communicate on campus."

Junior Matt Russell helped the Solutions Center make important initial decisions such as which software package to use to make the new forum. He has also taken the lead on the development of the forums and is in charge of their day to day maintenance.

The Solutions Center has restricted access to some of the individual forums to specific groups. This is so only certain members will be able to post to group discussions for specific classes and clubs.

Faculty and administration have separate boards to use that students and others cannot see or post on. However, they have not been limiting themselves to just these boards. There have been many posts by faculty and administration for all to see and respond to publicly.

Pheasant said, "[Faculty participation] has been a lot more successful than we had originally anticipated."

There are plenty of topics to choose from, and there are even forums for general chit-chat, such as the coffeehouse forum.

Topics in the forums can range from College operations to political arguments or just general discussion. One thread about football, which was started in the beginning of the school year, has still been receiving responses even now. As of November 29, there were 99 people who had responded to this post and over 1,400 people who have read them.

Students and faculty regularly post things for sale in the buy, sell and rent forum. Some students have noted that their items have been sold within one day of posting.

There is also a "For Sale" section in the Outlook public folders, but one of the long term goals of the Forums and the Arch is to start to consolidating resources that are spread out on Juniata's network. Things such as the public exchange folder, the P: Drive and the intranet will all be accessible in the near future via The Arch.

And since students no longer have access to mass e-mail, the online forums are one way to spread the word about club events.

After one semester, Juniata's new online forums appear to be a solid part of the ever-developing campus technology.

BYOB events resurface

continued from page 3

BYOB events are not the keggers that one perhaps would anticipate from watching any sort of Animal House-esque film. There are strict regulations involved in hosting such events.

According to Weber, there must be at least two event managers with alcohol training – right now only RAs and RDs – at a BYOB event. Also required are a six-pack limit which must be checked in and identification by wristband or hand stamp for those of legal age to drink.

Weber also said that "when alcoholic beverages are permitted, non-alcoholic beverages and food must be provided and the event must be registered 10 days in advance in order to secure event managers in a timely fashion."

National Champions: Women finish season with the title

continued from page 1

with back-to-back kills.

As the final serve came over the net, a trio of deserving seniors won it for the team. The dig by Erin Wisor, the set from Carli Dale, and then the kill by Habel ended the match and Juniata's long quest for its first ever national title.

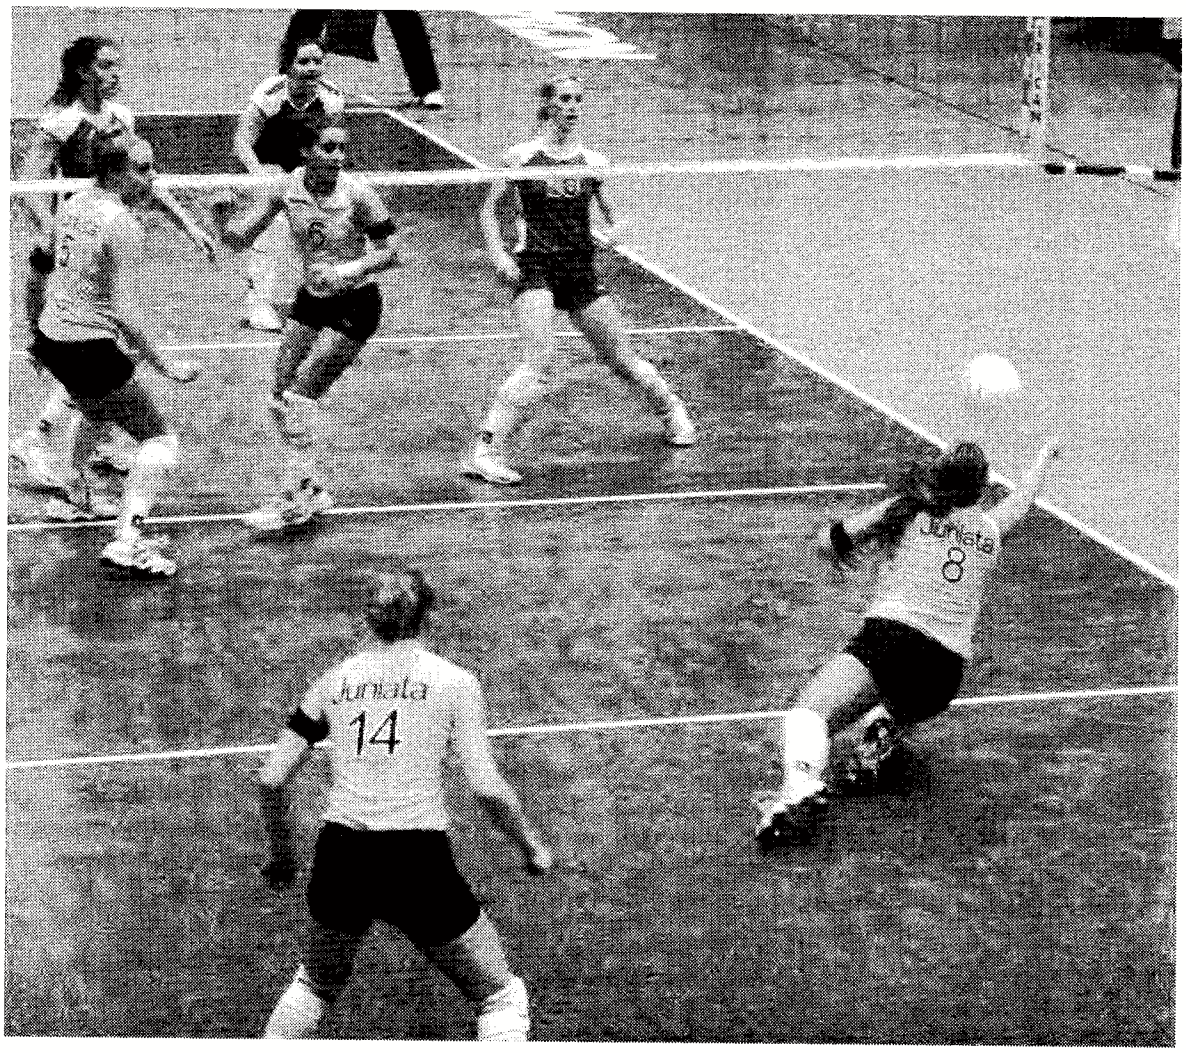
Habel admitted, "I was ready. I knew Carli was going to set me. [I thought] Obviously Wash U. was going to hook right onto Steph [Kines] and that ball is going to come right out to me and they aren't going to have a prayer. I knew. I felt it and I couldn't wait for the set."

Dale said, "The games were close, really close, but I felt that we were in control the whole time. Going into the weekend we knew that we were going to win. It was such a different feeling than the past. I was just like, 'We are going to destroy whoever comes in our way'."

Wisor also knew that "It was time to finish the job."

Coach Bock stated, "As a whole, this is the toughest team and probably the most physical team [I've coached]. This team knew how to finish."

Juniata benefited from a total team effort to claim the victory. Stephanie Kines led the team with a match-high 17 kills. Katie Charles added 13 kills. Katie Laucks chipped in 12, and Rachael Schatz added 10. Carli Dale passed out 51 assists, moving her into first place in Juniata history in career assists. Dale also added 12 digs while Tara McMinn finished with 25.



Kines, Laucks, and McMinn all joined Dale on the All-Tournament Team. Dale, Kines, and Laucks all received All-American honors. Also, Dale was chosen as the 2004 American Volleyball Coaches Association Division III Player of the Year. This is the first time in Juniata history a player has been awarded this title.

Habel stated, "This year it was made very clear that in order to win this we need everyone. It will take everyone. And people did their jobs and got it done. I mean it's that simple. We were a team, an awesome team."

Larry Bock said, "I remember thinking we just played the best volleyball I can ever remember at the most important time. I couldn't be more proud to be associated with this team. I know for sure that Heather and I want to keep doing this [winning] and doing it right."

What made the difference this year?

Kines answered, "There wasn't any doubt."

submitted photo

Laying it on the line. Junior defensive specialist Abby Leonard (8) lays out on the ten foot line to dig a Washington University hit in game two of the national championship match on November 27 in Rochester, Minnesota. Relentless hustle plays like this one typified the Eagles' performance throughout the playoffs. A "do anything it takes" attitude gave Juniata the edge it needed to bring home the first NCAA Division III National Championship in the program's storied history.

Emotions fly high: women win championship

continued from page 1

The quality that Bock is probably most noted for is his humbleness. Though during the middle of this season, the team heard Bock say something that might have made the difference this year.

Erin Wisor said, "During the year there was one meeting where he [Bock] said, I think his words were, 'If that is your goal to win the national championship, well, I'm on board.' And I was like "Whoa, and my heart dropped."

Carli Dale added, "He doesn't talk about winning the national championship and to hear him say 'Yes I want this too,' he let everyone else believe it."

Bock agreed that during the middle of the season the team really started to get it and from that point on they weren't afraid to think it, say it, and do it.

And boy did they do it, but surprisingly not one member of this team will take any bulk of the credit.

Abby Leonard said, "You want to win for the team but if any people deserve it more it's Larry, Heather [Pavlik] and Erin [Dodson]. We play for a tradition rich program. The alumni support is amazing. I am glad that we did it for them too. They deserved it just as much. They really set the standards for our program today."

Tara McMinn added, "Larry is a coach that because we have so much respect and confidence in him as players we want to be the best we can be in practice, games and even in life situations."

This team has been through it all together and perhaps the most emotional aspect of the season they faced this year was the absence their fellow teammate, Erin Dodson. Dodson, a freshman outside hitter who looked to play a significant role on this year's team, was diagnosed with brain cancer early in the fall. Though she has been in the hospital battling her toughest foe, she has been on the bench in spirit all season. And then, on November 27, unbelieavably, she made the trip to Minnesota to fill that missing spot in the lineup.

Larry Bock said, " My team was together finally since September 7. It just felt right."

Katie Charles said, "I felt stronger to know she did everything to be with us. It made me stronger."

Stephanie Kines added, "The team in general felt honored and inspired that she was so determined to come out."

Erin Wisor spoke about her long time friend and said that Erin put herself through a lot of pain to get to Minnesota, and added "The least we could do was play as hard as we could."

It is obvious this team had shared some amazing experiences but which are the ones they will hold on to?

Katie Laucks said, "Seeing Larry run out to accept the trophy, he was just smiling the whole time. There is nothing else I want for that man other than to be happy. He deserves the best."

Wisor, Habel and Dale agreed that seeing their coach strip off his modest mask and jog out for the trophy made the win even more emotional.

Leonard said, "Having Larry give Erin the trophy. Seeing him receive it and then give it to her was the most moving moment."

Larry Bock said, " This has been the ultimate coaching experience. On a different level, the best thing I have ever done as a coach was coaching my daughter. These two experiences will be the ones I look back on."

McMinn said, "Right after we won we were together in the locker room and it was nice to be together as a team, with all the emotion, one last time. There are so many memories that you want to pick but all of them you'll remember forever."

The Juniata Women's Volleyball Team of 2004 will be remembered forever as legends.

Underground learning

Students remember U.S. military abuse

Emily Eller

During this week, with the whip to students' backs, it is hard to believe that any students would be doing work that they didn't have to. But some Juniata students have been doing just that. A small group of about 12 have been meeting once a week in the dimly lit space upstairs in the Oller Center for Peace. Their purpose? To get to the bottom of the Abu Ghraib prison scandal and find out if responsibility lies in the hands of a few soldiers or if responsibility can be traced all the way to the top.

"To blame just a few soldiers is for me part of the problem of the whole war. You can say it's a few bad apples, but war is not pleasant and it brings out the worst in people. There have to be other people accountable for it," said Gareth Walker, a member of the study group on Iraqi Prison Abuse.

The group has been studying the three independent reports on the Abu Ghraib prison scandal as well as the two government reports and newspaper accounts. Group members found that awareness and accountability can be assigned the full length of the chain of command ending with Secretary of Defense Donald Rumsfeld, Vice President Dick Cheney and President George W. Bush himself.

Why is this important? "Abu Ghraib combined with Guantanamo Bay and the disregard for the Geneva Conventions is a deterioration in the regard for international norms of human rights," explained senior Steven Allen.

The group originally formed because the members were concerned that awareness of military abuse would fade away. There have been so many scandals in the last few years that those that are no longer making headlines are quickly forgotten.

But concerns over abuse are making headlines again. A report from the International Committee of the Red Cross was leaked to the press on Tuesday, November 30. In the report, the ICRC clearly labels actions carried out in Guantanamo Bay as acts of torture.

"The argument is when it is useful to use torture to protect America," said Walker.

On Wednesday December 8, the student study group asked that question in an interactive presentation focused on what the abuses were, links between Abu Ghraib and other U.S.-run facilities, the military chain of command and the rules of war as defined by the Geneva conventions.

For those who have forgotten about the brutality displayed in the photos taken at the Abu Ghraib prison in Iraq, it may be time to do a Google search. The whole story may never be known, but at least one group of students is not willing to forget.

Presidential Perspective

"Some of the parking spaces on campus are not clearly marked. Why does the campus assume that the whole world knows through some sort of psychic connection that parking along 17th Street and Oneida Street is considered 'on campus parking?' How do folks know what the parking policies are in unposted lots?"

All persons who receive a Juniata parking sticker get the campus parking regulations and map. Oneida and 17th Streets do adjoin campus buildings and thus we regulate them as well. If there is a place that is not clear we are happy to take a look at it.

"Why does the fall 2004 semester run so close to the Christmas holiday? If the goal – as is rumored – is to avoid holding the commencement ceremony on Mother's Day, why wasn't just the spring semester scheduled to begin one week later, giving a longer holiday break, instead of moving the entire academic calendar forward one week from the usual?"

The fall semester schedule seemed to work well this year giving everyone one more week during last year's summer. Graduation will be the week after Mother's Day because of how we scheduled the second semester.

Students, faculty and staff may submit questions for the Presidential Perspectives column by e-mailing juniatian@juniata.edu. Questions are forwarded to President Kepple anonymously.

Apathy is lethal: AIDS in Africa

Mary Gardiner

Last spring, 6-year-old Martha Chimuonenji's mother, Ruth, died in her home in Zimbabwe. Ruth was only 28, a mother of two—two who now live parentless in a land where half of today's teens are expected to die of AIDS. She will grow up vulnerable to insecure marriages at a young age—that is, if she doesn't starve first as she drops out of school to fend for herself.

Her case is not unusual. Right now, there are 23 million Africans infected with HIV/AIDS, and worse, 34 million children under the age of 15 orphaned by the disease. The crisis has led to economic instability, widespread fear and stigma and worst of all, the unnecessary deaths of *millions* of people.

The acronym HIV stands for Human Immunodeficiency Virus. It weakens the immune system to the point that the system has difficulty fighting off certain infections. A simple flu or cold can immobilize, or even kill someone with an HIV-affected deficient immune system. In Africa, malaria and tuberculosis, two of the most prominent diseases, often end the lives of those infected with HIV.

At this point, the Joint United Nations Programme on HIV/AIDS (UNAIDS) is estimating that by the end of 2010, 100 million people will be infected with the disease. That means tens or hundreds of millions of orphans, most of whom will be dropping out of school. That means large proportions of nations' labor forces dying, which in turn furthers the political instability of the continent whose situation is precarious as it is. How can African nations strive for stability when their labor force continuously diminishes and their children are going uneducated—52% of non-orphans attend school, as compared to 2% of orphans?

What could they possibly do? What can *we* possibly do?

Currently there is no cure for HIV or AIDS, but there is treatment, prolonging and improving the lives of HIV/AIDS victims. Studies have shown that these treatments, called ARVs (antiretrovirals) can prolong the lives of victims up to ten years. ARVs can also boost the health of those infected so that they may return to work and care for their children.

Unfortunately, of the 30 million people in Africa living with AIDS, only approximately 50,000 are on these drugs.

If, however, more ARVs could be provided, parents would be able to care for their children and they could work and sustain themselves. Most beneficial of all, victims would be able to educate their friends and family about the disease. ARVs can cost as little as $100 per person, per year, and are now being distributed with the help of the Global Fund and the $15 billion grant promised by President Bush last January.

It's time that the U.S. really takes a stance on this crisis. AIDS, TB, and malaria kill six million people each year—that's like the atrocities of the Holocaust occurring *every single year*.

With the help of treatment, of education, and further research to search for a cure, the insurmountable disease might indeed become surmountable. Millions upon millions of people could continue to stabilize their countries, their families and their lives.

Visit the Global Fund's website at theglobalfund.org if you would like to help with donations or volunteer work, or even if you would just like to read their newsletters. Also, for more information about the crisis, see the UNAIDS website at unaids.org.

The Juniatian would like to congratulate staff member Katie Laucks, her teammates and her coaches, on their historic run to the NCAA Division III National Championship. Thank you for the dedication that you put forth and the triumph that you brought home. The Juniatian has been honored to cover your journey into Juniata history.

LETTERS TO THE EDITOR

Having interviewed members of the faculty executive committee, a professor of ethics, the provost, and several students, for an article ("College Drafts Consensual Relationship Policy") in the November 18 issue of the Juniatian, my initial and more radical 1960's burn-my-bra in protest feeling reserved itself. I somewhat understood the College's rationale for drafting a consensual relationship policy. However, surrendering to a policy (or party for that matter—hint: the GOP) does not mean we have lost our voice.

This boat arrived at the dock of reason on two accounts. One, I don't want the College getting sued because a professor is shagging a student, because then my family will read about it in the paper, hear about it on the radio, watch it on the news and have it stuffed down their throats with the Christmas ham by their conservative friends who think a liberal arts education is the devil (coincidentally they feel the same about John Kerry, abortion and same sex marriage). My second reason for setting aside my Students Against College Policy ((SACP) personal concoction) activist sentiment is hey, if the College doesn't legislate our right to date whomever we want, our government, and I don't mean Student Government, probably will within in the next 3.987654321 years.

I know these reasons sound rather extreme, but I can't help but see similarities between our government's newfound pilgrimage toward a holy land of values and our College's pilgrimage toward a sanctified College handbook.

After the Nov. 2 presidential election, I, like many other students and professors across the *WORLD*, lost hope in the future of our nation. I felt like I had done all that I could (attempt to vote, which was slammed down by a big "Sorry, the paperwork must have been lost somewhere between where you registered to vote and the courthouse. We can't give you a provisionary ballot, either."), so it was either move to Canada, England or Mexico, or sulk until Hillary runs in 2008.

Then, I remembered a professor from my freshman year and two of his many words of wisdom: "Challenge authority." Now I'm not saying go to every executive committee member's home and knock on the front door in protest. Nor am I asking you to be the next Lee Harvey Oswald. I am, however, echoing my eccentric and uber knowledgeable professor, and I am asking us, as students at a liberal arts college and as citizens of a *free* nation, to question what is right and what is wrong, discover what lies in between, and speak for those who cannot speak for themselves.

A consensual relationship policy is bound to weasel its way into the College handbook whether we like it or not. So, as students of this college, not necessarily interested in shagging our professors but interested in having the *choice* to do so, we have the right to voice our opinions on the terminology used within the policy. Students have the right to contact and petition Student Government and the administration to air concerns.

And, as citizens of this free nation, we have the power to do more than just vote. As Alice Walker wrote, "The most common way people give up their power is by thinking they don't have any."

To find out more on how you can make your voice heard politically, log on to www.workingforchange.com.

Senior Stephanie Shaver

I'm studying abroad in Leeds, England this year, and I just received a copy of the November 18 issue of the Juniatian from Jarmila Polte. The front page article on consensual relationships between students and faculty particularly caught my attention because it's a situation I am currently experiencing. For a few months now I have been dating a lecturer in the biology department at the University of Leeds. I can say from personal experience that the "inherent power dynamic" is not leading to "exploitation of the student."

Leeds does have a policy on this sort of relationship. Basically, the University does not encourage or prohibit relationships, but the faculty member involved is not permitted to grade any work submitted by the student. In my particular case, I originally met the lecturer off campus and do not have any classes taught by him. In cases like this, I see no justification for absolute prohibition. If I was in any of the classes he teaches, the prohibition on him grading my work would prevent favoritism or exploitation. While I agree that it's good to have a policy in place to prevent any confusion or legal troubles, it seems naive to think that prohibition at any level would be enforcable or lead to anything other than stress and secrecy.

While it is less of a concern, it is also worth mentioning the possible effects a prohibitive policy might have on friendships between students and faculty. Juniata is a place where student-faculty friendships thrive. For me, these friendships have led to increased learning both in the classroom and beyond, and have offered invaluable support in dealing with current stresses and planning for the future. A highly prohibitive policy on consensual relationships could lead to fear of misrepresentation of close friendships, hindering student-faculty relationships in general.

I would also like to add that I'm glad to see the Juniatian bringing issues that may affect the student body to the attention of the students. While any policy approval is ultimately the decision of the administration, a policy that directly affects interactions between students and faculty should have input from both. Because this issue was brought to my attention I am able to offer my perspective. Thank you for this opportunity.

Junior Sarah Pierce

This year the presidential election called people's beliefs into question – on the news, in the papers and in the classroom. Tensions ran high, and some people took it upon themselves to attack others and their views. These types of attacks may be expected for talking heads on television--but is the classroom an appropriate environment for such attacks? You'll have to decide.

Unfortunately, my beliefs became the target of such an attack by a tenured professor. I was faced with a tough decision. Do I sit back and take it or do "walk with the wind" as John Lewis encouraged us to do? I chose to take a stand, and I filed a formal grievance against the professor with the College's administration.

On November 3, the professor entered our classroom ranting about the inevitable concession of Senator Kerry. After about half an hour of this professor complaining that he could not believe that a president could be voted into office based upon morals and values and that most Republicans are uneducated voters, he proclaimed, "Conservatives are stupid. And if it were up to me, the stupid people of America would not have the right to vote." I was flabbergasted to say the least that a "highly educated" professor would use his classroom as a soapbox for such degrading assertions. I raised my hand and commented, "You are pathetic. You have no right to say that someone who believes differently than you does not have the right to vote. Just because you've probably come from a privileged or middle-class family and was able to get your Ph.D. doesn't mean that your vote counts more than the blue-collar worker." Ultimately, the class ended with the professor having the last word and several students coming up to me after class thanking me for standing up for conservatives.

On November 8, this professor entered the classroom with a video in hand. He walked up to his podium and looked in my direction and said, "I'm going to finish what was started on Wednesday." He said that he had misspoken on Wednesday when he said conservatives are stupid and didn't have the right to vote. What he meant to say was that, "All *religious* conservatives were stupid and should not be allowed the right to vote." He also stated that religious conservatives were anti-intellect and not capable of rational decision making. He then showed the class a scene from a Hollywood *dramatized* video of the "Scopes Monkey Trials – Day 7" to "prove" his assertion. After the clip he said, "All religious conservatives are bigots."

I could not believe that a professor would act so unethically and unprofessionally. I felt that he was using his power in the classroom to create a hostile environment that was not conducive to learning for those students who held religious or conservative allegiances.

Many conservative students feel as if they do not have a voice on this campus. Wonder why they feel this way? If students dare to venture outside the liberal mindset so prevalent on this campus, they risk the chance of being made a spectacle of.

Juniata College is the oldest of six colleges affiliated with the Church of the Brethren. According to the Brethren.org website, the Church of the Brethren heritage and values continue to be lived out in the strong focus on the campuses to produce students who will live fulfilled and ethical lives, serve humanity, seek to make the world a better place in which to live, and seek to comprehend their relationship with our Creator. What's happened to Juniata College?

The faculty handbook states that professors should demonstrate respect for students as individuals and adhere to their proper roles as intellectual guides and counselors as well as avoid any exploitation, harassment or discriminatory treatment of students. I argue that this professor, and possibly others, cross the line in their classrooms. Juniata College is supposed to "Celebrate Diversity." To me, this means that students should be able to voice their differences without fear of humiliation or being made a spectacle of by professors.

As we have seen on campus in the past, students do not have to tolerate degrading actions or statements made by other students, so why should we have to tolerate them when made by professors?

According to Dean Clarkson, if you have a grievance with a professor, you should first go to the professor, if, according to the faculty handbook, you feel s/he is approachable. If not resolved, or if you feel that the professor is not approachable, go to the Department Chairperson, then to the Provost if need be. **Know and exercise your rights as students.**

Senior Melody Bratton

LETTERS TO THE EDITOR

The October 14, 2004 Juniatian contained a report by Nate Drenner and Morgan Sample entitled "Return of the Native" which told of the possible plan to locate an eleven foot statue of three Indians on campus. I was surprised at this since our college has no historic relation to Indians that once lived in this area. The Indians once in this area had been gone for around 100 years when the Brethren's Normal College was founded in 1876.

Under President Martin Grove Brumbaugh, the charter of the school was revised in 1896 which changed the name of the institution to Juniata College. According to Juniata historian Earl Kaylor, the eponym "Juniata" is a corruption of an Indian word for the Indian village marker, a tall stone, next to the river that flows through this county. "Onaytta" means "Standing Stone" – the obelisk marker to the Oneida village which was located beside the Juniata River near what is now William Smith Street in downtown Huntingdon. Kaylor also reports that the idea of an Indian mascot was started in 1925 by unknown writers who began calling our athletic teams the "Indians" in the Juniatian.

While I am delighted that we might have a statue on our campus, I wish and propose it be related to our history rather than inventing a historic connection to the Iroquois nation that we never had. Statues on a campus or at government sites usually recognize founders, great heroes or great contributors to that institution or nation. I think it would be much more appropriate to have a campus statue of Juniata's greatest president, Martin Grove Brumbaugh, who also served as governor of Pennsylvania between his two stints as President of Juniata College. It was during his tenure that many great things happened on campus including his successful appeal to Andrew Carnegie to pay for a library on campus. Or perhaps we could have a statue of the founders of the college along with M.G. Brumbaugh that tie into our history rather than a statue of Indians to whom we have absolutely no connection except their name for an obelisk and then subsequently a river which flows through Huntingdon and many other counties.

Duane Stroman
Professor of Sociology

Tonight, I witnessed 15 people ruin dinner for at least 200. The women's volleyball team won their first national championship, and don't get me wrong, this is a major accomplishment and I'm very proud of them. However, their celebration has been one of the worst planned events I have ever seen. First off, getting into Baker was insane; people were waiting outside in the dark on the steps of Ellis waiting to get inside as the parents of the volleyball team were ushered ahead of all the students to get prime seating in Baker promptly at 5:30 p.m., right when dinner opens. Inside, it was a mad house. There weren't even enough seats for everyone! Students who pay for their meals were forced to eat standing up! I saw some students attempting to open the faculty lounge so that they could sit and attempt to enjoy their meal with bad recordings of volleyball matches being played over the loudspeakers. And even though there was no event going on behind that large yellow wall, a Sodexho staff member forced the students to stand instead of allowing them to eat in there and closed off that section. I also heard rumors that the event, which was scheduled for Monday at 6:00, was announced to those that had to set up around 9:00 p.m. on Sunday. That's only 21 hours, only 8 of which were during normal working hours. It's not fair to the staff and student workers setting up the equipment needed that there was such little advance notice, especially on such a large event! All students who eat at Baker were affected by this and it shouldn't have happened like it did. This event should have been held in Neff, Alumni, or the Ballroom, all of which would have been better for everyone involved. I'm not against the volleyball team celebrating their victory; I'm against them using their victories to affect the lives of all students on campus.

Junior Barry Long

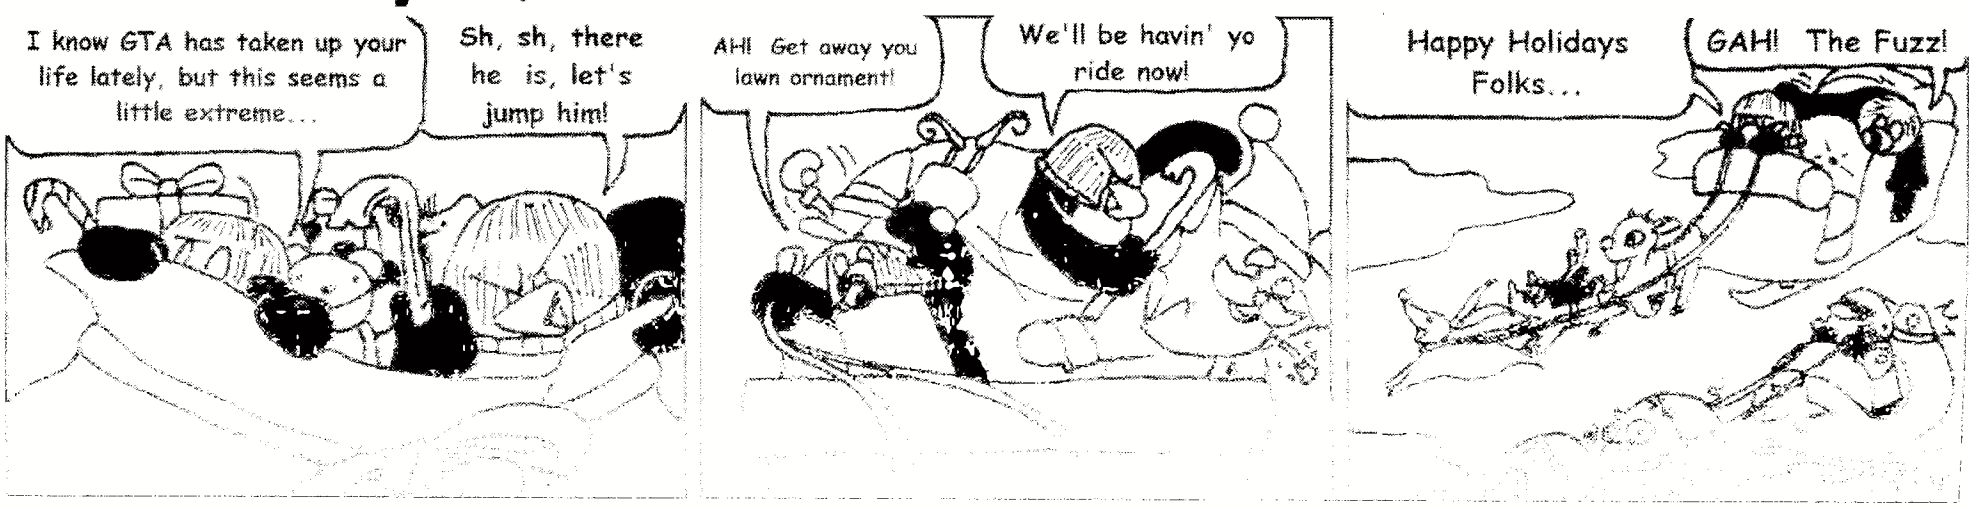
This week, a three-judge panel of the United States 3rd Circuit Court of Appeals found that educational institutions have a First Amendment right to keep military recruiters off their campuses. As a result, colleges and universities opposed to the presence of military recruiters on their campus may bar them without risking the loss of federal funds.

"Now every academic institution in the country is free to follow their consciences and their nondiscrimination policies," according to E. Joshua Rosenkranz, who represents the law schools who sued. The law schools that sued did so on the basis of the military's policy of discrimination based on sexual orientation.

We at Juniata should bar military recruiters from campus not only for this injustice, but more fundamentally because we are an institution founded in the principles of non-violence.

The Church of the Brethren is not just a stone building on the corner of campus. It is a denomination whose brotherhood declared in 1958 that it was a time "for positive and constructive teaching of friendship and peace in our churches and nation." Juniata's own Peace and Conflict Studies department and Baker Institute are committed to the study of how to solve the *causes* of tension and conflict and educating to "create a future where war no longer exists."

At their annual conference in 1970, the Brethren declared: "The official position of the Church of the Brethren is that all war is sin and that we seek the right of conscientious objection to all war."



In honor of the legacy of the founders of this college, in appreciation of work currently done by much of our faculty and in concern and sadness over the increasing bellicosity of our nation and world, I urge every Juniatian to demand that the U.S. Armed Forces exclude Juniata from its recruiting efforts.

Senior Eli Finberg

Did something in the Juniatian pages pique your interest? Agree? Disagree? Think something was missed? Write a letter to the editor! We invite students, faculty, and alumni to write on any issue of concern to the Juniata community. Free exchange and thought are important parts of a liberal arts education. Please note, though, that due to available space, we ask for letters to be limited to 300 words. Send your letter to juniatian@juniata.edu. *Opinions expressed in the commentary pages are not necessarily those of the staff.*

The Rookery

by Brock Eastman

"Imagined Discoveries" exhibit opens

Sarah Wharton

Walking through the huge, wooden double doors of Juniata's Museum of Art unlocks a portal to a new artistic experience.

The current exhibition, titled "Imagined Discoveries," delves deep into the colorful and clay-spattered psyches of two of JC's finest professors, Alex (Sandy) McBride and Jack Troy. The works in the show highlight McBride's active and vivid paintings and Troy's animate and moving ceramics. The two styles and personalities of the artists merge into one creative and intellectual experience.

On November 19, under Carnegie's domed ceiling, Troy read original poetry to a rapt audience of students, faculty and town residents to kick off the show. Many listened to the poems with eyes closed, opening them only to chuckle at their often humorous endings or to tiptoe to the refreshment table for cider and cakes.

After the poetry, museum-goers viewed the professors' pieces, chatting with the artists and each other about the works – each one unique.

McBride's images – very large, very bright and very abstract – are full of myriad minor elements and hidden facets. A small head may conceal itself in a tiny circle ("Sacrifice"), or a figure may reveal itself upon the viewer's retreat from the wall. One canvas, entitled "Life in a Day," portrayed an intense array of colors with a real butterfly set into the layers of acrylic paint.

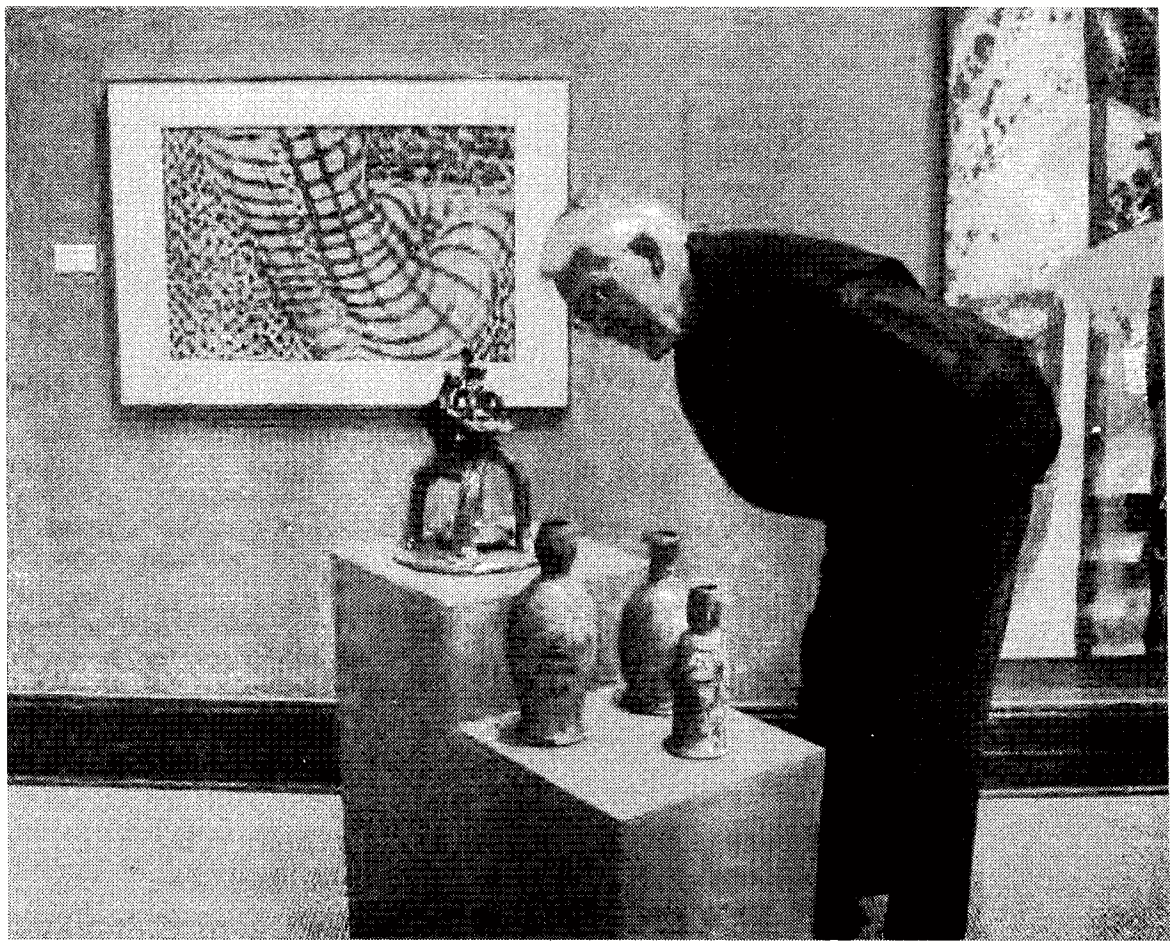
"I collected it from the wipers on my truck," said McBride. "A lot of my work has to do with submitting the painting to accident," he added.

All the canvases begin the same way, with floating colors and undeveloped forms. But McBride explained that, for a painting to survive, it has to make a point. It must turn into something the mind cannot deny. He went on to say how this "something" always changes, though, because even when they're finished, the works are *not* complete. They are constantly in a state of *becoming*.

Like McBride's paintings, Troy's ceramics begin very simply – with a lump of clay. His plates, bowls and figures push through space through their forms and colors. "Screamer," a large, shallow dish, has an orange-glazed, face-like shape at its center. And yes, it is screaming, with white eyes and mouth opened wide. "Metaphor" depicts a potter working at the wheel who shapes another smaller figure also working at the wheel.

Illustrated with the piece is Troy's idea that *everyone* is an artist.

"There's an anonymous quote I like," he said. "It says: 'An artist is not a special kind of person; every person is a special kind of artist.'"



The special kind of art that Troy creates is pottery. He began learning the art of ceramics in 1968, looking for something tangible to do. He explored the exciting medium of clay to combat his more sedentary work as an English professor. But even though he's an internationally renowned potter now, he was not a natural.

Believing that persistence is a kind of intelligence – and taking that to heart – Troy tried and tried to form clay. "I took longer to learn than anyone I ever taught," he said. "I thought, 'How can a ball of clay make me look so dumb?'"

Both McBride and Troy, as artists, professors and people, believe in spreading the power of art to younger generations. Each has been a part of Juniata's art department over 30 years, respectively coloring and molding student minds.

"It's very exciting to teach," said Troy. "People who think they have no sense of originality or creativity find out how wrong they are," he said.

McBride agrees. "It's very satisfying to teach people who are flexible, resilient and who have a sense of humor," he said. "They will create something in this world that doesn't exist yet."

Jessica Long / Marketing

Jack Troy and Sandy McBride's collaboration was a hit! The art exhibit, which opened Nov. 19, explored the two artists' imagined discoveries from their most recent works to past creations.

Choir to be featured on CBS on Christmas Eve

Sarah Svigals

Recently the Juniata College concert choir traveled to Richmond, Indiana to perform at Bethany Theological Seminary, the Church of the Brethren's seminary, for the televised CBS Christmas Eve service.

Each year CBS chooses a different Christian denomination to perform at its Christmas Eve service, which will air on most CBS affiliates after The Late Show with David Letterman.

This year's chosen religion is the Church of the Brethren.

The choir was selected through a combination of chance and reputation. During a tour in California, the Juniata concert choir gave a concert at the University of LaVerne, another Brethren institution, and left a lasting impression. Shawn Kirchner, who was a music professor at LaVerne at the time of the concert, now works with music for the Church of the Brethren. When he was contacted about CBS's need for a choir, Juniata's performance stuck out in his memory, and from there arrangements were made.

According to freshman soprano Sarah Hall, the choir rehearsed all day on Monday, with breaks for lunch and dinner. They then had a technical rehearsal with lights and a camera crew on Monday night. On Tuesday they began rehearsal after lunch and then began taping the special at 6. The taping took roughly two and a half hours.

Because the crew was tied up in the actual performance hall the choir rehearsed in Earlham College's Quaker Chapel, which proved to be a special experience in and of itself.

Hall explained, "A Quaker chapel is designed with pews on all 4 sides of the room, with a bit of space in the middle. It was like we were making music for each other, not just rehearsing for a performance."

For Hall, a member of the Church of the Brethren, the experience was very emotional. "The whole event was very moving, to be a part of something on such a large scale was overwhelming to me. It still boggles my mind. I think I was also so moved because of my connection to the Church of the Brethren, and because I was overwhelmed with joy at the thought of being talented enough to participate in something on this level," she said.

Don't miss the chance to hear that exceptional talent this Christmas Eve.

Madrigal: dance your finals blues away

Morgan W. Sample

A longstanding tradition at Juniata College is the Madrigal dinner and dance, which was established in 1970. This is one of Juniata's most attended and popular traditions: 600-700 students attend each year. This year, the Madrigal dinner will take place from 6:00-8:00 p.m. on December 11 in Baker. The dance will follow later in the evening, from 10:00 p.m. until 1:00 a.m.

In a sign of its popularity, the event really begins far earlier in the year with the formation of the Madrigal Line. Many students spent a frosty week in November lined up in tents complete with music, food, TV, and friends. Every night from 7:00 p.m. to 7:00 a.m., as well as during lunch hours, tenters showed their determination in trying to secure a spot at the event's prime tables, the Five Golden Rings tables. Their diligence was rewarded with what will no doubt become a new tradition: on the last night before ticket sales, the first tent in line, known as Head Tent, sponsored a dance party, complete with a DJ.

Tenting may seem crazy to some, but junior Hannah Rauterkus offers an explanation for the insanity. "Tenting for Madrigal is really all about the experience. The dinner/dance isn't worth the hassle but the chance to bond with your tentmates is what keeps the tradition going."

Senior Valerie Myers agreed. "It's a lot of fun. It might be cold but you don't realize it. Make sure you're there for roll calls because some of the redemptions can be interesting," she said.

Hannah Rauterkus / Juniatian

Shannon and Steve attempt to stay warm while waiting for roll call.

Creatively named tents caused laughter at the sporadic roll calls that tried to bump competing tents to the back of the line. Hells Bells, Itsy Bitsy Spider, Up the Water Spout, and Smesh were a few of this year's participants.

All was not lost if you were bumped, however, for tents could be redeemed. To get their spots back, deliquent tenters had to do favors or chores for a tent that was ahead of them in the line. This year some groups had to make "Sheetz runs" for other groups, or even had to go around campus on a scavenger hunt.

Yet tenters and all students in attendance are justly rewarded. Madrigal begins with a wonderful formal dinner served to the students by the faculty and staff. Following the dinner there is entertainment ranging anywhere from skits to warm wishes. Last year some may recall Assistant Dean of Students Dan Cook-Huffman's version of "The Grinch Who Stole Christmas," or the poopfinger that terrified the Juanita's of Juanitaville.

Following the entertainment, the entire group sings carols ending with the 12 Days of Christmas, where different sections of the dining hall sing the parts of the song. For those who won a spot in the Five Golden Rings section, this is their time to shine.

Madrigal can ultimately be thought of as the "last hurrah before finals."

The Bookmarkables

Nate Thompson

Let's face it. It is the end of the semester. You don't want to read about anything useful any more than you want to remind yourself that it would have been useful to read those textbooks for your upcoming finals.

The latest in Google advances will probably not interest you at this point in the semester. Instead, I would like to offer you something positive. Specifically, I am referring to somethingpositive.net (please pardon my punmanship). This website has precisely what you need for a study break.

Somethingpositive.net is a web comic designed for the college student. The site boasts a tacky yet unrefined blend of extremely tasteless humor and witty remarks.

When you check out the comic, I suggest starting with the first comic and working your way through the archives by the date. This will give you over three years of archives to provide you with plenty of mindless humor.

One of my favorites is the comic from May 13, 2002. In this issue, Davan proves just how cynical he is when it comes to dating. When a friend tries setting him up with a girl from the bar, he responds, "Fine. We'll have a relationship. This should take two minutes."

The Ratings
somethingpositive.net

Addiction	5, Great storylines.
Humor	5, College Humor.
Navigation	4, Great.
Pol. correct.	1, The worst!
Usefulness	2, Study break.

Perhaps the most amusing character is Choo-Choo Bear. Apparently, this strange cat is so old that it no longer has bones in its body. The boneless critter provides endless amusement as it slips down drains, engulfs its prey like an amoeba, and hides in shampoo bottles.

However, this is not a web comic which you should share with your mother, much less your grandmother. In fact, do not share it with anyone who would not appreciate humor at the expense of extreme political incorrectness.

If this comic is not your style, the site also offers links to other web comics. Perhaps you will find these comics to be more humorous.

No matter what it takes for you to survive finals this semester, remember that laughter will help relieve your stress. Somethingpositive.net will provide an appropriately tasteless study break. The website is also cheaper and safer for your liver than other stereotypical forms of college stress relief.

In search of Huntingdon's

holiday shopping spots

Mary Gardiner

As the holiday season approaches, most students on campus are puzzled as to where in Huntingdon they could *possibly* shop. Fortunately, the myth that Huntingdon is some sort of barren wasteland is false.

If you're wondering where you might find some gift goodies, here are a few tips.

Huntingdon features some spectacular specialty shops. A much-loved favorite of Juniata students is Vintage Art Glass, in town at 500 Washington St. If you have any slight interest in stained glass, this store will blow your mind.

Featuring hand-made jewelry, beautiful murals, hanging snowflakes and angels, and exquisite jewelry boxes—all made of glass—there's a gift to be found for everyone. Call 643-0636 for more information and ask for Leah, the store's owner. Students get 20% off!

Foxfire Gifts & Collectibles is another great gift shop right in town. Antique dolls, glassware, incense, and porcelain figures line the walls of this unique store. Stop by at 713 Washington St., only two blocks from Vintage Art Glass. Call 571-4368 if you have any questions.

If you're looking for something on the sparkly side, check out Swartz Jewelry Co., at 717 Washington St. Swartz has gorgeous jewelry at fair prices, and has some of the best salespeople in town. They'll help you find exactly what you're looking for. If you need more information, give them a call at 643-0600.

If you're a fan of flea markets, Victoria's Gallery is a must-see, right down Rt. 22 in Mount Union. Every Saturday from 9-5, stop in this indoor flea market for spectacular prices on some great gifts, like hand-woven baskets, china, collectibles and more! (You can also pick up some cheap furniture for your room here at Victoria's.)

Unfortunately, unlike most gift shops, Victoria's is not in town, but if you're interested in low prices on great gifts, it's worth the ten minute ride! To get there, follow Rt, 22 and take a right on Jefferson St. into Mt. Union. Pine Street is about 0.3 miles from Rt. 22. Victoria's Gallery is on the southeast corner of Jefferson & Pine. Call 542-8807 for more information.

Of course, Four Seasons Florist at 1100 Moore St. is a great standby for flowers for special someones, or to bring home for mom. For those of you who don't have cars on campus, it's less than a mile walk. They also offer a 20% discount for college students.

Don't forget to check out Huntingdon's Christmas Shoppe, at 700 Washington St. This store has everything Christmassy you could imagine. With a wide variety of Christmas Tree hangings and ornaments, decorations, and collectibles, this store has everything for the Christmas enthusiast! If you have parents who love Christmas decorating, check this store out for perfect gifts for them. Call 643-3151 if you have any questions.

Lastly is Miller Pottery, a small shop at 3514 Cold Springs Rd, with one-of-a-kind gifts. This store not only offers stoneware and clay pottery, but also Native American jewelry and sarongs from Indonesia. A car is probably needed for this drive, but if you're stuck walking, don't fret. This shop is only a mile out Cold Springs past College Avenue and the Field Hockey Field. Call 643-3774 for more information.

If you don't want to travel, you can get some great gifts from clubs here on campus. You can buy Bahamian Calendars from the International Club. Contact Demetri Patitsas for more information. You can also consider the Concert Choir CD recordings from their tour in Europe. Contact Russ Shelley if you're interested!

Happy Shopping!

Bringing the bands to JC

Richard Pulliam

There seems to be the thought, at least by some, that there are not that many musical things to do on the Juniata campus. However, there are multiple events held here that are cheap or even free. Many bands have been making their ways to the Juniata campus, through the tireless efforts of students.

A few weeks ago senior Eli Finberg and others made it possible for many bands to play in Ellis Ballroom, in order to raise money for the victims of the ongoing genocide in Darfur, Sudan. Students and faculty members took the stage to play alongside band IY, which hails from Ithaca, New York.

Opening the concert with a brilliant duet were talented students Brandon Long and Brenton Mitchell. Professor of Geology Larry Mutti followed their tough act with a much-applauded set on the auto-harp. The Daddario Quintet, composed of five Juniata students, then showcased their musicianship in a long set of funky jazz.

Then it was time for IY to take the stage to launch their second album, "Further Gone," and wow all those who stuck around past 1:00 a.m.

"Already content as clams, the concert-goers then delighted in the sensory ecstasy of a 15 man jam session," Finberg said.

The show, which culminated with the crowd singing John Lennon's "Imagine" arm-in-arm and in unison, was attended by over 200 people and lasted nearly five hours. It raised $1300 for the victims in Sudan.

IY may not be the only outside band to grace Juniata's campus in the near future. After seeing the band Tycoon Dog at State College, Juniata students Joseph Viscomi and Matthew Holtry were able to talk to members of Tycoon Dog. Upon hearing that the band enjoys playing music more than the money they receive from it, Holtry and Viscomi concluded that this band could be a very affordable fit with Juniata. They also suspected that they would be a good fit when it comes to musical style.

"[Tycoon dog] is pretty much a jam band, like they have songs that they play on a regular basis. It's a really relaxing show to go to where everyone can kind of kick back," said Holtry.

Viscomi agreed. "They are more rootsy, folksy and are like a folksy jam band," he said.

However Tycoon Dog is not

Lighting up campus holiday traditions

Maria Piazza

At this chaotic time of present-buying, card-sending, and relative-calling: the meaning of celebrating any holiday can sometimes be forgotten. The point of this holiday season, whether celebrating Kwanzaa or Hanukkah or Christmas, has to be remembering the love of family and friends, and the miracles that bring people together at this time. This year Juniata has succeeded in bringing that holiday feeling into the hearts of its students.

This December, the Kwanzaa dinner on the fourth, the Hannuakah dinner on the seventh, and the lighting of the tree in von Leibig all bring together this holiday spirit…not to mention the upcoming gingerbread building, and cookie decorating stress busters on the 17 and the 18.

Over the last week, with the two dinners and the tree-lighting in von Leibig, the festive spirit of Juniata has arisen. The Kwanzaa dinner, sponsored by the United Cultures of Juniata College and the African Student Alliance, was a great success. This dinner is usually the last bang of the seven-day Kwanzaa celebration, and would complete the celebration, beginning December 26, of community and culture within the African American people.

Though coming first, the quality of the dinner can be an indication of what will come later. The food was not fancy, but consisted of good homemade foods like creamy peanut soup, crispy fried chicken, melt in your mouth pecan pie, and spicy collard greens.

Hannah Rauterkus / Juniatian

Live music, home made food, a cultural experience... the Kwanzaa dinner, held on Dec. 4, gave students and professors the opportunity to mix, mingle and learn about the festivities.

The music that accompanied the food deserves a whole article, because it was wonderful. The music, performed by the Dorian Quartet, was a quiet yet intense jazz performance that interwove itself into the mood of the night. Slowly lifting the spirits of everyone in the room, the music

We're not in Founders anymore, Toto

Jay Trovato

Although it's probable true that the majority of your learning abroad will take place outside the classroom, you'll still have to hit the books and navigate an unfamiliar university system. With a little planning and adjusting, you can take full advantage of your foreign academic experiences, and observe firsthand how other countries do the college thing.

Before you leave Juniata, it's important to visit your advisors. Check which requirements you need to fulfill abroad, and then consult the Eagles Abroad database to see what classes are offered at your host university. Have your plan written down somewhere – trust me, it makes selecting your classes easier and removes some unnecessary stress from the whole equation. You'll probably make changes or have questions once you get to your host country, so stay in close touch with your advisors.

Registering for classes can be considerably different and several times more complicated than at Juniata. Here at Veracruz University, each department and subdepartment has its own registrar, instead of one central registrar like at Juniata. Let's just say the whole process was pretty confusing. Also, class times may change from what is stated in the course catalog, which makes establishing a schedule even tougher. Almost all of my classes were rescheduled at least once, which made my hourly schedule look like a football chart with lots of Xs and arrows. I promise you'll survive the experience – just bring some extra patience with you.

Other adjustments are more simple things, like getting yourself to class on time. One great thing about Juniata is that from any dorm on campus you can roll out of bed seven minutes before class and arrive on time. Most likely, the location of your host family, dorm, or apartment will require more travelling time to and from class. I have definitely taken a few taxi rides when my meals or afternoon *siestas* haven't left me enough time to walk to class.

Sharing a class with foreign students can give you a unique window into your host country's culture. It has been really eye-opening for me to observe the Mexican university dynamic. Here, professors frequently arrive ten or twenty minutes late, without apologizing or bothering to mention why they were late. Students often leave in the middle of class to buy a coffee, missing half the class in the process. These phenomena don't make much sense to me, coming from Juniata's more formal and rigid academic framework, but it makes perfect sense in the cultural context of Mexico.

I'll leave more detailed discussion of culture until the spring. For now, Juniatians, enjoy your winter break, and I'll see you next semester!

Do something Mexican!: Patronize the many quality mom-and-pop businesses in Huntingdon. Small vendors are the rule, not the exception, in much of Mexico – people have done business that way for generations. This pattern is currently being challenged, however, as convenience and lower prices are drawing more and more Mexicans to big, mostly U.S.-owned supermarkets, restaurant chains, and retail stores.

The High Note

Jacob S Warner

For this final edition of The High Note, I've decided to serve up a musical feast, worthy of thanks, complete with all the trimmings. Put on that elastic belt and indulge yourself, stuffing mind and body til you can take no more.

First on the plate: *Super Sessions*. This rare and relatively unknown disc is absolutely unbelievable. In 1968, three extremely talented musicians coalesced for two scorching studio sessions, and they were indeed super. Al Cooper, Mike Bloomfield and Stephen Stills jammed relentlessly, producing some of the best improvisational and impromptu musical mastery available on the shelves. Blistering blues riffs slither effortlessly into dazzling serpentine solos, engulfing and encapsulating the listener in a fury of spasmodically melodic soundscapes. Orgasmic organ flows into soulful balladry in 'Man's Temptation,' a comical comment on the temptations women pose to men, especially men who already have a woman. From ballads to blues to a rollicking country version of Dylan's 'It Takes A Lot To Laugh, It Takes A Train To Cry' to a skin pin prickling rendition of Donovan's 'Season of the Witch' and back again, this album in sure to please the true musical connoisseur.

Move over the *Super Sessions* and make room on that fine china for The Derek Trucks Band and its second to last offering, *Joyful Noise*. Every time I listen to this album, a certain part of me does not believe that a band can produce these sounds. From the very first notes of the opening track, 'Joyful Noise,' the music of The DTB grabs you. Sultry slide guitar, full of the blues, opens and titillates the listener's ear. Trucks' masterful guitar work is reminiscent of Duane Allman's surrealistic slide, and the distinct bluesy southern rock influence of the Allman Brothers can be heard in many of the tracks.

The DTB travels fast and far through the musical world on this disc. Trucks' slide is heard alongside chilling flutes, dancing keys and soulful lyrics sung in multiple tongues. An almost tribal percussion can be heard coursing through the album's veins. Deep blues tunes blend to Spanish and African celebrations of life, morph into sexy contemplative blues and slide into Miles Davis-esque jazz expressions, similar to Davis' work on *Kind of Blue*. This album is incredible, and with collaboration from artists such as Rubén Blades, Solomen Burke, and Susan Tedeschi, The Derek Trucks Band fuses blues, jazz, and world music into a spinning work of art.

Live from Anchorage from The Danny Godinez band is the white wine to the fish and steamed vegetables of *Joyful Noise* and *Super Sessions*. Gently soft yet powerfully smooth guitar picks while bass thumps. Afro-Cuban percussion ebbs and flows with standard and free-form jazz drumming while keyboards dance under fingers possessed by musical gods. Songs melt into one another as clean cut musical reality gives way to extended jams and improvisation. Inspiring and thought-provoking lyrics ride on sensual sound waves as spacey keyboard transportation and flirtatious flamenco finger-picking spin and twirl solos through space. If someone asked me to assemble a band that could blend jazz, improvisational rock, world beats and funky jams, I would have to look no further than the Danny Godinez Band. *Live from Anchorage* dazzles with passionately intricate guitar and keyboards coupled with otherworldly vocals and percussion. The intricacies of sound that this band produces will provide any listener with an intense musical voyage.

Check out any of these bands and your winter music listening is sure to be a little brighter.

Movies: "Sideways" is the cream of the crop

Carolyn Keller

There's just one thing to say about "Sideways": What a way to end the year! Funny, deep, sweet and sour, this little movie is the perfect antidote to the traditionally slim pickings of central Pennsylvania. The Pre-Christmas season is always a quality-fest...if you live in New York City and can afford to go to the movies there. This side of East Coast, however, the options don't look so merry...and won't until the spring, when the movies previously condemned to art-house obscurity or select cities are given a second run.

For this issue, choices were boiling down to the reputed-to-be-atrocious "Bridget Jones" sequel or "Christmas With the Kranks," when a little theatre in State College came to the rescue with one of the brightest and most brilliant films of the year. "Sideways" is smart and engaging...and it also is generating some Oscar buzz for nothing less than Best Picture of the Year.

There's no doubt it's a little early to be making that kind of prediction, but "Sideways" at least merits your attention, despite its status as a relatively unheard-of movie.

The most famous members of the cast are Paul Giamatti and Virginia Madsen, and if you haven't heard of them, don't start panicking yet—though do check out "American Splendor." Better yet, just go see this little gem, because you'll find it more than worth your while.

Entirely right-side-up, "Sideways" is a tightly written slice of life, with beautifully developed, full-bodied characters brought to luminous life by actors Giamatti, Madsen, Thomas Haden Church, and Sandra Oh.

The film follows recently divorced middle-school teacher and struggling writer Milo (Giamatti) and his high-living old college roommate, Jack (Church) on a tour of California wineries.

Milo's arranged the trip as a bachelor-party substitute for Jack, who is to be married at the end of the week. Jack, however, has bigger plans for his last week of freedom than quality buddy-bonding with best friend and best man Milo.

Instead, Jack's happy-go-lucky air soon wins over a local winery-worker (Oh), as he tries to simultaneously hook Miles up with waitress and wine aficionado Maya (Madsen). Naturally, the ladies are not let in on the secret that is Church's impending wedding, and appropriate—and appropriately bittersweet—hijinks ensue.

Director Alexander Payne pulls no punches, and gently guides the story while primarily letting both it and its characters speak for themselves, which is part of the beauty of the movie. However, his spot-on eye for comedy that won him acclaim in "Election" and "Citizen Ruth" is skillfully interwoven amid the script's astute and somewhat sad statement on relationships.

Yet this is a very funny movie.

Based on the book by Rex Pickett, but with a script adapted by Jim Taylor and Payne himself, "Sideways" takes its time but nonetheless holds both the viewer's attention and affection, thanks in a large part to the work of its actors and a script that lets the characters ripen and breathe to their full potential. The film is awfully on-target when it comes to making thoughtful observations on messy, lovely humanity. In the end, "Sideways" seems like it should be compared to the fine wines the characters love so much; comic, poignant, and beautiful, it's in a class by itself. Four stars.

But don't go yet! As a last hurrah, here's a list of must-see movies for the holiday season: Don't ask, don't think, just go! "The Life Aquatic with Steve Zissou," "Closer," "Kinsey," "Bad Education," "The Motorcycle Diaries," "The Sea Inside," "Finding Neverland," "A Very Long Engagement," and of course "The Merchant of Venice." Trust me. Make your holidays complete.

Collegiate dementia: fowl play

Carolyn Keller

It's that time of year again; time to give a grand "hello!" to the holiday season. As with relatives and other extended family, whether or not you choose to welcome this time of turkey and mistletoe with an arms-wide-open welcoming "hel-LO!" or a rather leery, surprised "HELL-o!" depends entirely on your past end-of-the-year experiences.

Flashback to Thanksgiving. I know, I know, in this land of stress and finals, it seems like a lifetime ago, but try. Before the break, my roommates and I, in the name of holiday cheer, decided to throw a Thanksgiving dinner of our own, for us and our extended college family.

Recipes were collected, ingredients assembled. We immediately called for aid from our mothers, grandmothers and my Aunt Susie, the Turkey-Prepping Goddess. Aunt Susie promptly overcame the surprise of hearing from her favorite niece at 8:30 a.m. on a Saturday to deliver the day's most insightful words of warning:

"You're going to feel like a gynecologist by the time you're done with that bird!"

With that in mind, on the morning after Madrigal tenting, on two hours of sleep, and armed with the wisdom of generations and an eighteen pound bird from Weis, we set out to make some Thanksgiving memories.

We decided to dub the turkey "Bob." Obviously, this was our first mistake, as it is never a good idea to assign a label of affection to the lump of cold, dead, pinkish-blue fowl occupying your kitchen sink, awaiting a hearty roasting. Especially not when said lump is to be pried open, gutted and then re-stuffed with something that promises to be delicious, but at the moment is really just a pile of gloppy spiced mush. No, naming Bob just made the process all the more violating.

But turkey preparation commenced. Roommate Stacey and I were very unsure about all this—the bird had to be stuffed, after all, but where was the stuffing supposed to go? For all the hype of the pseudo-medical procedures we'd have to be doing to the animal, there didn't seem like an awful lot of space to work with.

This was solved rather quickly by our brilliant chef-in-residence, Amara. After much poking and worrying by Stacey and myself, Amara waltzed back in from the grocery store to save the day. She took one look at our situation, wordlessly shoved her hand up that bird's butt, and one crunching sound later, surfaced with the remains of Bob's neck, revealing a gaping hole.

"Oh," I said, "So, that's that."

Nothing says roommate bonding like shoving your fist up a turkey's behind. We popped Bob in the roaster and left him to cook while we watched a movie.

3.5 hours later, we looked to see how Bob was coming along.

Bob was coming along *very* nicely; in fact, it turned out our Bob was done. No need for further checking, no need for further roasting, Superbird was all set to be eaten. It was 4 o'clock. As opposed to 5:30.

This caused a minor panic, but after much flurrying and phone-calling and reheating and bird carving, we managed to wrap things up with a nice Thanksgiving dinner. As Stacey would say, "RIP Bobs everywhere," and with much thanks, because Bob, you were delicious.

Hel-LOOOOO, holiday season. May all of yours be so eventful.

Eagles cruise towards MACs

Brit Tew

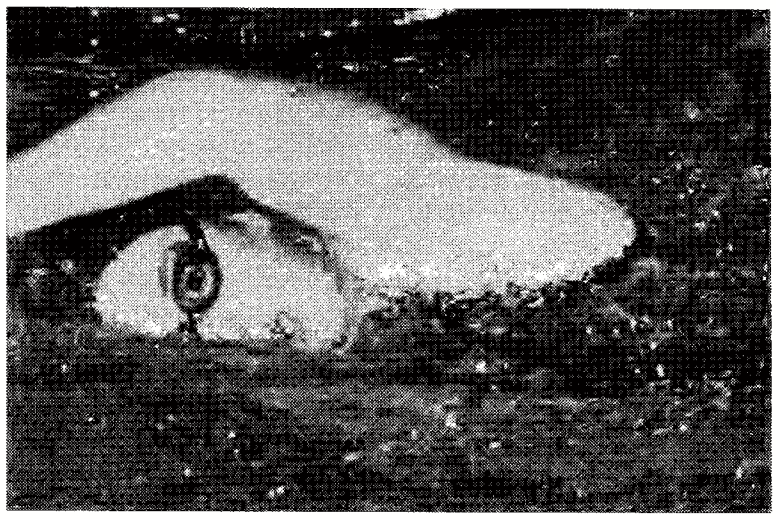
With a 6-2 overall record, the Juniata swim team is gliding into mid-season. The Eagles most recent win was against Bryn Mawr on December 4. The Eagles dominated the visiting team, winning all but one event. In many races Juniata swept the top three finishing spots. Bryn Mawr only scored 98 points against the Eagles, who scored 158. Due to the Eagles high scoring, several of the events at the end of the meet were turned exhibition.

The team's most recent loss came against Scranton, currently one of JC's top competitors. Last season, Scranton handily beat Juniata, according to Coach Bryan McGrath. This time the Eagles didn't go out so easy, losing by only four points, 104-100.

The Eagles have faced the two toughest teams in the conference. With those out of the way, it should be an easy trip to the MAC championships for the Eagles. "I think we will beat everyone else in the conference," said junior sprinter Amy Hanson.

"We are in the hunt for MAC title," said Coach McGrath.

With an especially long season and the added pressures of being a college student constantly plaguing them, the Eagles have to keep their intensity up and push through the hard season to reach the MAC. "With the hard meets over, Brian might be afraid the the team will relax," said sophomore distance swimmer Allison Engle.



According to Hanson, the team just has to keep up with school, practice hard and stick with it, which are completely feasible goals for the team. "The training break in Florida will be critical," Hanson said.

The Eagles will be swimming against two Division II teams later in the season. These meets will challenge the Eagles and keep them in check. "They will act as a test," said distance swimmer Kimberly Dierolf.

To prepare for the MAC championships and the rest of the season meets, the team's focuses, according to Coach McGrath, are technique and conditioning. "Conditioning is our number one priority," McGrath said.

Another large goal for women's swimming is to make everyone hit a lifetime best, according to McGrath.

Upcoming meets for the Eagles include Lycoming on December 9 and Indiana (Pa.) on December 11. According to Coach McGrath, Lycoming will be the last true test of the conference teams.

Hannah Rauterkus / Juniatian

Juniata swimmers, like Amy Sutherland, have drowned their competition throughout the early part of this season.

Indoor track begins

Corinne Barabas

It is indoor track season, but don't let the indoor part fool you. That's right: the Juniata track team practices in weather fifteen below zero, with frostbite on the skin if it's not covered and ice and snow up to the knees. There is absolutely nothing indoor about it.

Since Juniata does not have an indoor track, runners, throwers and jumpers use the indoor track season as a "warm-up" for spring track.

"When we go to meets we don't kill ourselves," head coach Jon Cutright said. "We compete hard, but are not going to sacrifice an exceptional outdoor season for indoor track. When other teams peak mid-season during the spring, we will be strong all the way through for the conference championship."

He also said that "meets are like hard practices. It gives the athletes a chance to compete and get in even better shape."

The first indoor track meet will be held on December 10 at Dickinson College. Cutright commented that "the team has a lot of potential to be very good. Once workouts and practices get involved, they should start improving and continue to through the spring."

Some key returnees for the Eagles are jumpers Jeremy Weber, Adam Loser, Randy Anderson and Gary Ondecko. Others who will contribute for Juniata this season include thrower Mohammad Ali Khoshnevisan, Shawn Miller on the pole vault, mid-distance and distance runners Justin Fritzius and Mike Vella and sprinter Dusty Sier.

On the women's team, a few returning athletes are sprinters Meredith Troutman, Elena Amato, Lynzee Alworth and Rebecca Shoaf. Distance runner Nancy Hayes and thrower Kira Troutman will also look to have a productive season.

There are many talented freshmen joining the team this season looking to make an impact. Overall, the men and women's teams should have a solid season as neither team lost many seniors.

Athlete off the Field

Katie Laucks

Recently, 48 student-athletes were named to the Academic All-America team. Among those selected were two Juniata students and stand-out athletes, including this month's athlete off the field, senior football player Matt Garner.

Matt has been a four-year competitor on the Eagles' football team and has started since his junior season. Coming into his senior year, Matt was honored by being named a captain. His strong moves on the field reflect his strong dedication in his studies.

Here at Juniata, Matt has been a constant standout in the classroom. Carrying a POE in biology, one might think it can't get any harder, but Matt participates in not just one sport, but two. Not only does he compete for the football team, but for the 2004 MAC championship baseball team as well. Add the many clubs he is involved in and this All-American is a very busy student.

During the week Matt is involved in HOSA. He is a member of Tri-Beta Biological Honors Society as well as the Juniata Honors Society.

In HOSA - Health Occupations Students of America - Matt and other students involved see themselves as having a future in the health care profession. In the Tri-beta Biology Club, Matt is involved with other students who have a POE in biological sciences. As a member of the Juniata Honors Society, he is among the elite of Juniata College for his academic success.

Senior Matt Garner

With all this going on, Matt has maintained an impressive 3.989 GPA.

This summer he put his studies of biology to the test as he accepted an internship in the health field. He took a research position through the Blair Orthopedic Associates and Altoona Hospital. He also did a research fellowship at New York Presbyterian Hospital and Weill School of Medicine of Cornell University.

This issue's athlete off the field is certainly on the right track to success after he graduates from Juniata College. With these opportunities and the many academic successes that Garner has had in the classroom and on the field, it won't come as a surprise when he succeeds the professional field as well.

If you know of a Juniata athlete who makes outstanding contributions off the field, and think that he or she should be highlighted in an upcoming edition of "Athlete Off the Field," please send your suggestions to juniatian@juniata.edu.

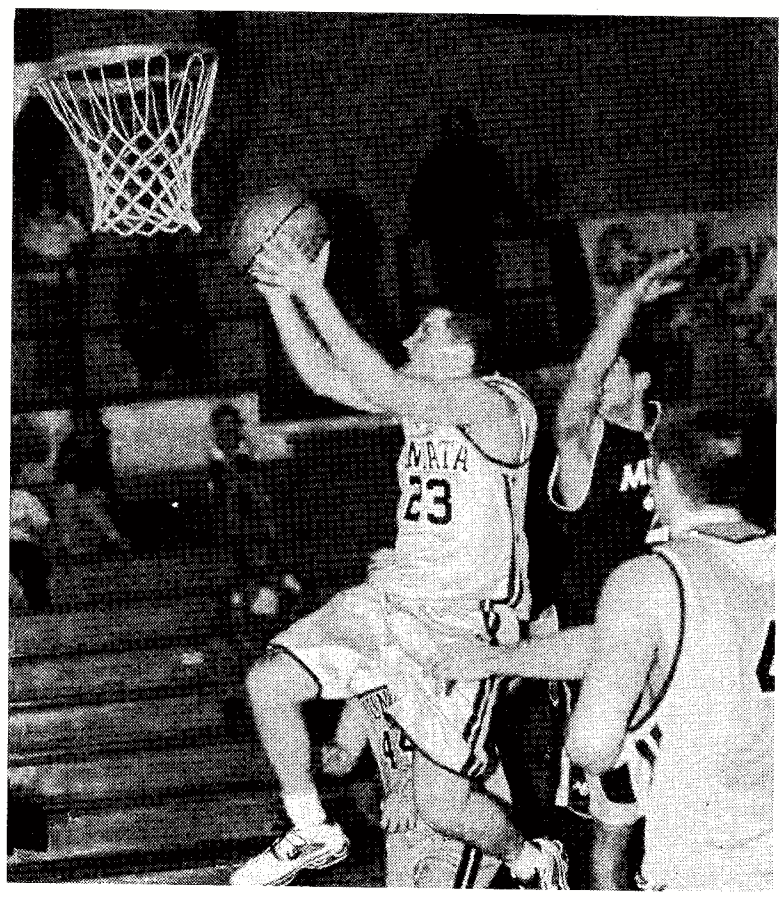
Eagles fall in conference opener

Dave Shalkey

Juniata played undefeated Messiah in its first conference game on December 1. Both teams shot over 50% from the field, but turnovers were the difference in the 95-79 Juniata loss. While Messiah only had 12 turnovers, Juniata turned it over 21 times, leading to extra scoring opportunities that Messiah capitalized on. The loss dropped Juniata to a 1-4 overall record and 0-1 in the MAC.

The silver lining was that this was the first time Juniata has shot over 50% from the field this season. The hot shooting was led by Travis Boyd's 19 points, including five 3-pointers. The reason for the improved shooting was obvious to Boyd.

"The practice we have been putting in is finally paying off," the sweet-shooting junior said. The players have been having extra practice sessions and the results are showing.



Last month, Juniata lost to Muskingum, 72-53, in the championship of the Doc Greene Tournament on November 21. Hoping to use the momentum from winning their season opener, the Eagles wanted to win the tournament for their home crowd. Strong defensive pressure from both teams early in the game resulted in neither team being able to score. Eventually, Muskingum began to make back-door cuts and shred the Juniata defense. The Eagles could not respond and trailed 29-16 at the half. Juniata's three-point attack was stalled as they missed all nine attempts from behind the arc.

Juniata played much better in the second half, but to no avail. They could not stop the offensive attack from Muskingum. Juniata shot 36.1% from the field and allowed Muskingum to shoot 52%. Muskingum shot a high percentage, mainly due to back-door cuts that resulted in easy lay-ups. The Eagles, who had one of the highest 3-point percentages in the country last year, had a tough shooting day, making only three of 22 from long-distance.

Chris Jasiota and Travis Boyd led the Eagles with 13 points and six boards each.

To get to the championship game, Juniata beat Penn-State Berks the night before, 74-69. Nick Hager led the team with 18 points five rebounds and three steals.

Bridgewater College came to Huntingdon on November 23 for Juniata's third game of the season. Another rough shooting day led to a 67-60 loss for the hosts. Despite poor shooting, Juniata only trailed by a basket with under two minutes left in the game, 57-55. Bridgewater made its foul shots in the final minutes to grab the win. The Eagles returned to form by making seven of 18 three-pointers, but still struggled from the floor. They could only manage to shoot 39.6% from the field and allowed Bridgewater to shoot 47.7%. Tommy McConnell led the team with 10 points five assists and three steals.

Hannah Rauterkus / Juniatian

Juniata junior guard, Tommy McConnell (23) sliced through Messiah's defense to take the ball strong to the basket for an easy lay-up.

Up and down start for women's hoops

Tommy McConnell

Five games into the season, the Juniata women's basketball team is 2-3. After losing its season opener, the young Eagles' squad rolled off back-to-back wins, but then dropped their first two decisions in conference play.

"I think we have been competing with teams very well for how young we are," junior Kristen Kirk said. "I think we are going to surprise some teams this year, and come out with a better record than last season."

In its most recent outing, Juniata fell to Widener on the road, 76-67. The difference maker was an 11-2 run by Widener to close the first half. Excluding that run, Juniata played dead even with the home team.

Freshmen Jess Winemiller had a career-high 24 points to lead the way for the Eagles. Entering the season, Juniata was unsure who would help last-season's leading scorer, Kristen Kirk, shoulder the scoring load. Winemiller seems to have filled that role, averaging over 16 points per game and leading Juniata in scoring in three out of its five games.

Prior to traveling to Widener, Juniata hosted perennial conference-power Messiah in its MAC opener. Juniata never led in the game and was dealt a 79-55 loss. The Eagles played with Messiah for most of the first half, staying within striking distance until late in the opening period. Messiah ended the half with a 13-3 run to push its lead to 16 points. An early first half push would get the lead above 20, and Juniata would never get any closer than that margin.

Winemiller again led the Eagle with 23 points. Kirk was among three others with six points and she also handed out three assists. Freshman Jill Walsh pulled down eight rebounds from her point guard position.

Juniata opened the season in the Penn State-Behrend Tournament. After dropping its first game to the host school, Juniata responded with a come-from-behind win over Bethany in the consolation.

Trailing by seven halfway through the second half, Juniata went on a 13-3 run. The Eagles were led by freshman Ali Meckey, who scored 10 of her 12 points during the run, giving Juniata a three point lead they would not relinquish.

"We were confident," Meckey said of her team's ability to come-

THE RANDOM ELEVEN

by Matt Russell

Fines, ransom demands, guilt-trips, and governmental meddling. Another normal R11.

Willy Wonka, reinvented: The combined twisted geniuses of Roald Dahl, Tim Burton, and Johnny Depp will be revealed in July 2005. The results can be nothing short of spectacular.

Residential Life fund raiser: In preparation for an event, a group recently put candles in everyone's mailbox. Isn't it something like a $100 fine for even having a candle in your dorm room? Nice way to hand out some Christmas cheer!

Plague is SO last century: A friend started coughing violently so I quipped he should don a surgical mask to contain his cold. He commented that "they used to make them in all kinds of crazy designs when SARS was in." Yeah, that disease is so passé now.

Fluxx: The rules of this card game change as new cards are played; you win by having the right "Keepers" in front of you. Keeper cards are all named after random nouns like War, Love, Milk, Toaster, etc. A few friends dealt me into this game without explaining any of the rules. I immediately drew a card that said I would win if I had Bread and Toaster in front of me. Naturally, I ran to the kitchen, got both, and declared my victory. Woops...

Too much free time: Cloister 308 kidnapped my favorite pen and delivered a magazine-clipping ransom demand. [Matt checks "R11 shoutout" off the list and goes to find a can of refried beans.] Professors, if you have a student in that room, you clearly aren't giving them enough work.

Crazy forums: Where else could a conversation about the volleyball crowd in Baker spawn a comparison of Huntingdon to the Gaza Strip? Yeah, you read that right. I guess the number of firearms is similar, anyway... (I'm kidding, folks.)

Baker boo-hoo: I'm organizing a pity party for everyone crying about the lack of space in Baker during the volleyball celebration. It was annoying at that moment, but can you really ruin a meal at Baker?

They know it too: On a night when Baker was serving some interesting seafood concoction and mashed potatoes in the same line, a student requested to only be served the potatoes. The employee replied, "Good choice."

Government amok, part 1: The Student Government has tried to meddle with the newspaper too many times this year. First, they wanted their press releases printed verbatim. Unfortunately, our reporters come equipped with brains and can write their own articles. Second, they wanted us to allow the preview of articles before publication. Isn't that condoning censorship? Third, they wanted the Juniatian to explain how article topics are selected. I'm sorry; did you want to make a list for us? We'd be happy to fetch your slippers and curl up in your lap while we're at it.

Government amok, part 2: Obviously, the Juniatian flatly denied all of the above demands. We finally refused to continue meeting with them. In response, **they froze the Juniatian's financial account.** Funding must depend on the newspaper staying in their good favor.

Government amok, part 3: The Juniatian already secured separate funding starting next fall and can continue to print through spring without funds. If they can't stop the press, then the only plausible reason was to provoke us. Napoleon once said he feared three newspapers more than a hundred thousand bayonets. I guess they have more courage than he did.

Bands to JC

continued from page 11

scheduled to perform at Juniata yet. Instead, on December 11, they will be performing very close to Juniata, at Boxer's bar, located on Penn Street in town.

But Viscomi and Holtry are still working to convince Tycoon Dog to play on campus.

Viscomi stated his concern that people in the Juniata community are not active anymore. "People don't do anything on the weekends because there aren't events going on."

But he and other students are working to bring other musically-inclined events to campus. According to Viscomi, other student activities that you can look forward to are coffeehouse events. Sophomore Bobbi Albright is trying to organize these coffeehouse events once a month starting next semester. These events will include local bands and Juniata musicians.

The next concert students can look forward to is Alison Brown, who will come to campus through the Artist series on February 4.

Contrary to beliefs, there are many upcoming bands and events for Juniata students to look forward to. Scheduled events can be found on the Arch.

For those interested in seeing a specific band come to Juniata try speaking with JAB or forming a post in the Juniata Forum to see how many other people would support the band's event.

Up and down

continued from page 15

back. "We didn't play well at all in the first half and went in at half time only trailing by five. So, we knew if we played our game in the second half, we'd come out on top."

Kirk paced the way for Juniata with 17 points. Junior Katie O'Brien had a solid afternoon for the Eagles, finishing with 14 points and seven rebounds.
Juniata returned home from the PSU-Behrend Tournament and easily dispatched PSU-Altoona two days later.

A huge second half paved the way for the win. Juniata outscored the visitors 21-4 in the first seven minutes of the half to take a 15 point lead and never looked back. Kirk scored 18 of her game-high 20 points in the final stanza, including 13 in the game-breaking run. O'Brien had another strong game, recording a double-double with 17 points and 12 rebounds.

Juniata's next seven games come against non-conference opponents. The non-conference games will give the young team some valuable experience and time to improve on the execution of its game plans before league play heats up in mid-January.

"We are approaching the non-conference games like any other game," Kirk said. "We go into the game hungry for a win and emphasize our defensive intensity in order to create turnovers and easy transition baskets."

Bailey Oratorical

Important Dates

Signups: On or before January 21 (in Pat Musselman's office, Founder's Hall)
Preliminary Round: January 29
Final Round: February 10
Plus winter break to write and prepare!

This year's topic: Should traditions limit or liberate us? What role should traditions play in our community, society, and world? What powers should traditions hold, if any?

Prizes: First Place: $1000 Second: $500 Third: $300

Speeches are to be between six and seven minutes in length, persuasive and coherent. The competition is open to students from all academic disciplines. *Contact Grace Fala for more information.*

Holiday traditions on campus

continued from page 11

gave each individual a moment of forgetfulness of the worries outside, and allowed each person to enjoy the dinner.

"This dinner was a great idea. The food is so much better than Baker. The music was a great touch, and I did enjoy learning about Kwanzaa," said Aaron Shotts, a freshman who attended the dinner.

The Hanukkah dinner sponsored by the Jewish organization Hillel was just as enjoyable, and laid back. As Rachel Vansant, a sophomore and a member of Hillel said, "It's really a nonchalant holiday...but we still enjoy it."

Hanukkah is an eight day long celebration of a miracle that is said to have occurred in the ancient days of the Jewish people. Ancient Jews were hiding with lamps that would go out in a day, but the lamps did not go out. Instead they stayed lit for eight.

At the dinner there was the traditional lighting of the menorah along with a Jewish prayer. The menorah, which is a u-shaped candleholder, was lit in a window to show pride in Judaism and to show that they no longer must hide the light.

Attendees also played the traditional dreidel gambling game. The dreidel game had four letters, which sand for "A Great Miracle Happened There," referring to the miracle of the lights.

All the food that was served at the dinner was deliciously fried in oil, like this writer's favorite food of the night: latkes, or fried potatoes.

The tree lighting in von Leibig was truly enjoyable. The tree glittered with the many lights reminding everyone of the light that lives in each person to shine.

In the week of finals the Office of Student Activities is sponsoring a free gingerbread house-making and cookie-baking to break up the stress of finals. Not only is it free, it promises to be relaxing and fun.

JUNIATIAN

HUNTINGDON, PENNSYLVANIA

FEBRUARY 10, 2005 | JUNIATA COLLEGE | VOLUME 86, ISSUE 7

Speakers flock to Bailey Oratorical

Liz Houts

Thirty students flocked to the preliminary rounds of the Bailey Oratorical speech contest at 8:00 a.m. on Saturday, January 29, to reveal their outlooks on the speech topic, whether traditions should limit or liberate us.

The final round of the annual Bailey Oratorical is tonight, February 10, in Ellis Ballroom at 8:15, when the finalists will face off with some of the best public speaking skills Juniata has seen.

At the beginning of the preliminary round, Communication professor Grace Fala made a point to congratulate each and every participant. "To deliver a speech requires a certain amount of courage and commitment," stated Fala as she welcomed the competitors.

Because this year's topic was such a broad one, participating students' speeches covered traditions ranging from family dinners to varying traditions across cultures. Senior Eli Finberg, one of tonight's finalists, lightheartedly scoffed at the question. "Phhht!" he exclaimed at the start of his speech. "Nothing limits us!"

As always, the competition was stiff and the judges deliberated for hours before narrowing down their top picks. At last, they announced that this year's finalists are seniors Paul Blore, Angela Condor, Alexis Donkin, Eli Finberg, and Alcione Frederick, and juniors Zineb Gormat and James Nelson.

"I found that after I gave my speech, I wasn't terribly concerned if I moved on or not. I was satisfied with my performance and was happy to know that I had passed on a message that was important to me. The fact that I am now a finalist is a tremendous bonus," said Nelson of his advancement.

During the two week grace period between the preliminary and final rounds, finalists have the opportunity to revise and strengthen their speeches to prepare them for their most intense deliveries. Each finalist will have spent hours fine-tuning their speeches with Communication professors Grace Fala and Sarah Worley, co-coordinators of this year's Bailey Oratorical.

Hannah Rauterkus / Juniatian

At the prelims Jessica Nieves spoke about the traditional image of women through society.

The pair thought of the speech prompt months ahead of time as they noticed everyone suddenly challenging all traditions, up in arms over everything from war to science to marriage.

Since traditions are being given up or modified practically every year at Juniata, the vast difference in what traditions remain interesting to students became apparent. Now it's just a matter of determining which are holding us back and which are opening new doors.

"What I think is really interesting about it," said Worley, "is that the Bailey itself is one of the traditions that is not dying." With the typical waves of interest and disinterest among students, however, the Bailey did take a 50-year hiatus before being revived in 1986.

The judges for the preliminary rounds of the Bailey Oratorical were three alumni: Andrea Mundis '03, Matthew Peters '01, and Katie Padamonsky '97, who is now an enrollment counselor at Juniata College. "Compared to previous years, the speeches this year offered a lot more variety. I found this a very refreshing change," commented Peters following the final speech.

Tonight's judges, who include Tracy Houston '85, Dr. Bill White and Dr. Neil Johnson, will have a tough decision to make.

New van service gets positive reviews

Mary Gardiner

The past two Saturdays, many students traversed the great forest of Route 26 to State College. Two vans were packed, mostly with freshmen and international students, eager to explore the world outside of Huntingdon. And what a world it was!

The vans, a new transportation service offered by JAB, took two stops, one at the mall and another downtown. Students enjoyed the Creamery and the several movie options—things that Huntingdon just *doesn't* have to offer.

"I was truly impressed," said senior Gonzalo Banda Cruz of his trip up north. "It was a cosmopolitan night. At Penn State, you have choices, rather than at Juniata, where your choices are, well, East."

"Juniata is fine, but sometimes you just have to get out of here," said Cruz. "Plus, State College is simply a student community, so the student discounts are great. We went salsa dancing for free!"

So, how did this service come into being in the first place?

Last October, East residents received a few e-mails from an RA, Pete Patitsas. He asked for feedback about an idea for a van service to our neighboring student community at Penn State. Several international students constantly lamented that there was no night life in Huntingdon, and that they wanted to see what Pennsylvania had to offer. They were disappointed that there was no public transportation anywhere.

"They were surprised to find no bus, taxi or shuttle, so I thought, why not provide that service to students who might not have a car at their disposal," said Patitsas.

When students responded positively, Patitsas consulted JAB. They decided to offer the service and scheduled shuttle trips on January 29, and last Saturday, February 5. JAB plans to send vans again this weekend.

The vans arrive in State College at 7 p.m. and drive to the two stops, which deliver students to restaurants, fields, bus services, shops, gymnasiums, and not to mention, 40,000 students. Once in town, students can pursue any option they wish.

"It's just so relaxed. You don't have to worry about parking, driving arrangements," said sophomore Demitri Patitsas. "This is no field trip. It's completely free range."

One student admitted that the bus service might even save her relationship with her significant other at Penn State.

All of the students who have been on the shuttle thank JAB profusely. JAB is now considering Fridays instead of Saturdays, as students bemoan the lackluster Friday nights here over the

Future of popular JC hangout in question

Nathan Thompson

"I hear good things about this place," quipped junior Anna Eller, before her first trip to J's Tavern. Like many upperclassmen, Eller considered her trip to J's to be the official marker of her 21st birthday.

According to one of the bartenders, almost every upperclassman has been there at some point after turning 21. J. Maierhofer, the owner, offers a free drink to anyone celebrating his/her 21st birthday. Maierhofer is known by college students only as "J."

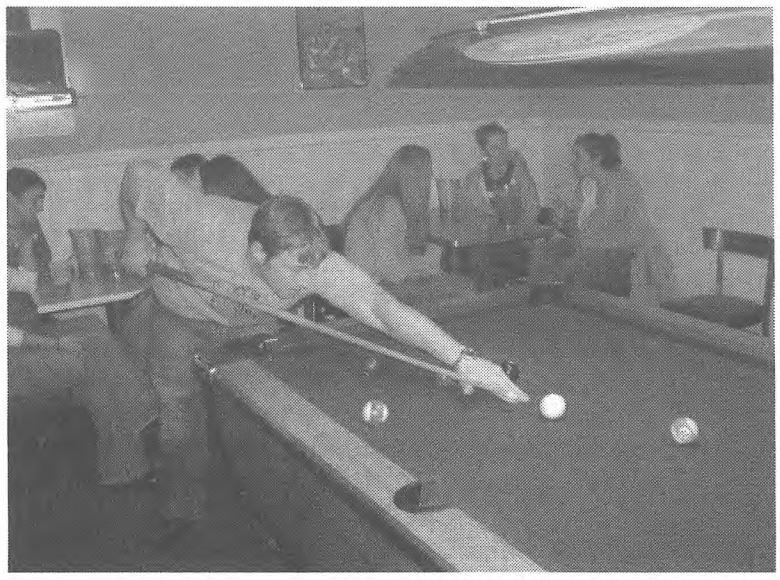
The bar is also well known by students for its Thursday night wings and pitcher deals.

However, recent rumors about J's Tavern closing or being sold have left many students worrying about its fate. Many rumors began circulating last semester when J. began the process of selling the bar. Two of the most popular rumors were entirely false. One rumor suggested that the owner of the Brass Rail would be buying the bar. The second myth was that the student hangout would be closed for much of this semester.

J. insists that the bar would not close while classes are in session. It would be very detrimental to close during this time because the bar serves about 200 college students a week.

Senior Lauren Chappie expressed her relief when she learned that it would not be closing. "I didn't want to have Bar Walk without J's," Chappie said.

J. currently has two possible buyers for his bar. The first buyer, Jake Glass, has until February 15 to finalize the sale. Jake is the son of Juniata College Police officer Dan Glass. Like his father, he was first a Philadelphia police officer. Glass is rumored to be an energetic man with some fresh ideas for the bar.



At press time, Glass had yet to produce the paperwork or money to J. in order to complete the transaction. J. is unaware of what has kept the sale from being finalized by now. Officer Glass was unavailable for comment as to why his son has not finished the deal.

If this purchase is unsuccessful, the offer will then be turned over to the second potential buyer, the manager of the local Hoss's Restaurant.

After owning the bar for eight years, J. realized that he needed to sell it. "The health just isn't there anymore," J. explained. He plans to find a house in the area and recover his health before finding a new job. J., a Vietnam war veteran, has been all over the country. He wants to stay in the area because he grew up in Altoona.

Sophomore Mike Powers has a dual interest in the fate of the bar. Powers both works and lives on the property being sold. Powers joked, "Yeah, both my job and my apartment are currently in limbo." Fortunately, he has been assured by Glass that he will be able to keep both after the sale.

It is not unusual for the current staff to continue to work after a bar is sold. Bartender Cher Port worked at the bar before J. owned it. Back then, it was called Coach's. J. bought the bar from former Juniata athletic director and head baseball coach Bill Berrier. Despite similar student worries at the time of that sale, the bar has continued to thrive.

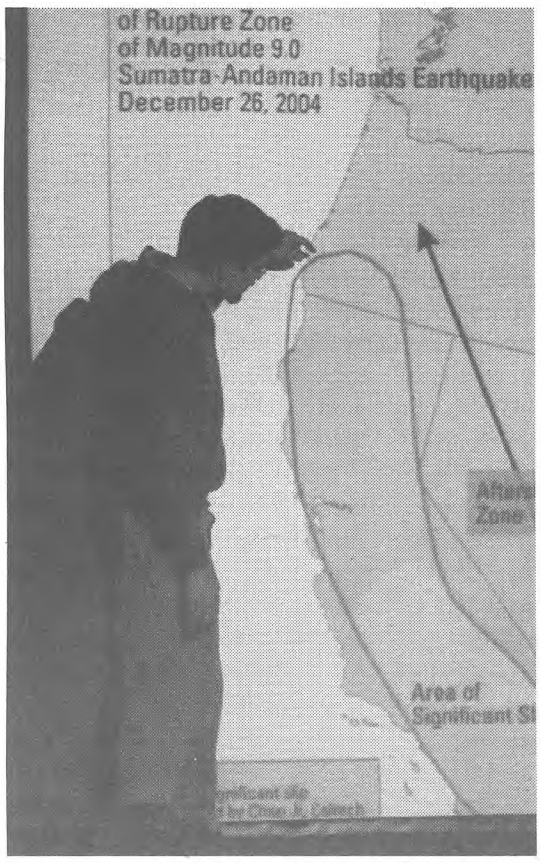
Nathan Thompson / Juniatian

Senior Andrew Waligora plays some Thursday night pool at J's.

In fact, the only factors affecting business are the College and its students. "When alumni come back, they always complain that they can't get the students away from their studies or their Xbox to come out to the bar," said Powers. He felt that the increased academic pressure of the College has had some impact on the overall attendance at the bar.

As J.'s ownership of the bar winds down, he wanted to both thank and reassure his patrons. "It's been great, the next owner will be great, and the tradition of this bar being here since 1933 will continue," J. concluded.

Relief efforts stronger than wave



Corinne Barabas

On December 26, the Sumatra earthquake, which registered 9.0 on the Richter scale, caused damage and tragedy that shocked the world. In order to understand the magnitude and destruction of the tsunami that was triggered by this earthquake, three Juniata geology professors recently presented a lecture explaining the causes and effects of this massive wave.

At this lecture on January 25, professor Ryan Mathur said the enormity of this tsunami and the power behind it exceeded by 30 percent the total energy consumed by the United States in one year. The impact of the earthquake that generated the tsunami caused well water levels to rise as far away as Florida.

He also explained that a tsunami is generated by an earthquake and the displacement of a large area of seawater.

A tsunami has a very large wavelength (hundreds of miles).

Hannah Rauterkus / Juniatian

Professor Ryan Mathur was the first of three professors to present on the causes and effects of the tsunami.

Therefore as it moves toward a shallow shoreline it does not break against the land, but continues to grow as it moves forward. Eventually it engulfs whatever is around it and disperses very rapidly.

Professor Larry Mutti discussed "our responsibility to respond to human misery and the restoration of not only an economy but also nations' livelihoods."

The water that ripped through coastal villages and classy resorts destroyed the lives of thousands. There were no warnings of the catastrophic event which left utter devastation and misfortune to people around the world.

The Juniata community, in an effort to support the victims, will collect money to send to the devastated nations. Although millions of dollars have already been gathered worldwide, there are still people in need, especially children.

The tsunami has left approximately 1.5 million children orphaned or separated from their families. Refugee camps remain in terrible condition and sanitation is deficient, providing ideal environments for diseases.

This past Tuesday, PAX-O representatives went door-to-door in residence halls to collect donations for UNICEF. UNICEF is the United Nations Children's Fund and has been collecting donations for tsunami relief.

According to its website, PAX-O is the Juniata student organization which "promotes awareness of Peace and Conflict Studies and its ideals through activism, education, and collaboration within the local, national and global spheres of influence. Our progression will be rooted in dealing with issues of the present and their impact on the future."

PAX-O is also tentatively in the process of planning another concert similar to the one held last semester which raised money for the Darfur region in Sudan. Students and faculty are encouraged to attend the concert, both to help others and enjoy some excellent music.

PAX-O secretary Shannon Callahan stated, "In addition to money, awareness and empathy can be very powerful as well. I would encourage everyone to read more about relief efforts. We're going to help as many [people] as we can, and we will need the entire campus's assistance for this."

The Juniata community has risen to the occasion before to support those in need, and although many of the victims are miles away, they still remain close at heart.

Campus Ministry moves to new "Unity House"

Joins Office of Diversity & Inclusion in renovated building

Meredith Pink

On January 25, Campus Ministry began its move from the basement of the von Liebig Center for Science to the Wey House located on 1905 Moore Street. This facility, dubbed the Unity House, boards the Office of Diversity and Inclusion as well.

In addition to accommodating these offices, the Unity House is a place for students. The front parlor of the house is the Meditation Room. This inter-faith-prayer space is a haven for all. It is a quiet, tranquil room where people can pray, meditate, study, hold meetings, and hang out.

College chaplain David Witkovsky said, "It was very important to have a nice universal space for whoever needs it. It is a flexible room for students to do with as they wish. In fact, students are already plotting how the room will be decorated."

Dean of Students Kris Clarkson said the Unity House came about based on the recommendations from consultant Art Jackson. Campus Ministry and the Office of Diversity and Inclusion needed more space for meetings and activities.

These two offices are also very important in terms of what they represent. Clarkson said, "Art mentioned the advantages of establishing a specific building/house that students would identify with as a symbol of this commitment to develop and embrace campus diversity and spirituality."

A newly refurbished kitchen is attached to the Meditation Room, which is also available for student use. Anna Elias, Catholic Council President said, "We have a nice kitchen again to make food for different events, like the fish fries coming up at the church downtown and the cookies we make for freshmen at the beginning of every year. We have a big conference table for meetings,

continued page 4

Hannah Rauterkus / Juniatian

The Unity house, the new home for Campus Ministry and the Office of Diversity and Inclusion, is located between Swigart Hall and Pink on Moore Street.

PRIDE helps community, encourages students

Genna Welsh

In an upcoming annual telethon held from March 16-19, a local service organization, Huntingdon County PRIDE, is offering Juniata College students the opportunity to serve their community and gain valuable skills. At the same time, they are challenging students to work toward a better future.

Huntingdon County PRIDE is a non-profit organization devoted to helping individuals with disabilities who live in the area. fundraising contributes to helping these individuals increase their quality of life.

How does PRIDE achieve such success? Area residents and businesses of Huntingdon County offer their time, talent and services to create individual fund raising projects. These contributors then donate their proceeds to PRIDE on the final day of the annual telethon.

This year PRIDE hopes that Juniata College students will join area residents in reaching their goal. The telethon, which often raises in excess of $100,000, offers Juniata College students the opportunity to gain valuable skills necessary to their futures.

PRIDE also encouraging students to create their own fundraising projects to raise money for their neighbors in the Huntingdon community. This challenge is open to all Juniata College students willing to show neighbors, peers and potential employers that they have what it takes to create their own projects and successfully raise funds for PRIDE.

Helping PRIDE is also full of benefits. As PRIDE board

continued page 4

Alumni offer career, internship connections

Seniors looking for jobs and underclassmen looking for internships this summer will have an opportunity to network with Juniata graduates on campus this month.

The Student Alumni Association and the Alumni Council is again sponsoring the "Student Alumni Career Connection." The event will take place on Friday, February 19 at 1:00 p.m. in the Ellis Ballroom.

Alumni will visit campus and spend the afternoon discussing their career or graduate studies fields with Juniata students. Last year, the Career Connection day led to job offers for several graduating seniors. Other students also benefited from discussions about options in their chosen field.

For more information, interested students should contact Melvin "Bub" Parker in the Alumni Office, at extension 3444.

National Parks Chief Historian speaks

Civil rights, presenting national history in parks are topics

Nate Drenner

A yearlong focus on civil rights continued last week as Juniata College welcomed an official from the National Park Service to campus as part of the College's lecture series.

Dwight T. Pitcaithley, chief historian of the National Park Service, presented a public lecture last Thursday, February 3. His talk centered on recent changes in the presentation of historical stories at the national parks.

Faculty, students, and community members scattered throughout Alumni Hall for the lecture titled "The National Park Service and the Civil Rights Movement: Remembering a Difficult Past."

Pitcaithly visited the College for a week as part of the annual Woodrow Wilson Fellowship. In addition to the lecture, he spent time in various classrooms.

Pitcaithley has worked for the National Park Service for 29 years, and during that time he has seen "remarkable change in this bureaucracy of ours," mostly during the last 15 years.

"Most importantly, the National Park Service is less insolent. We now have cooperative relationships with other organizations. We're more willing to accept criticism," said Pitcaithley in his lecture.

Pitcaithley credits this change to a new framework for presenting the past.

Beginning around 1936, the NPS tended to categorize historical events into themes and sub-themes. But recently the focus has moved toward social history, presenting a variety of stories from the perspectives of different historical players.

For example, Pitcaithley cited Little Bighorn National Monument, which was formerly called Custer National Monument. The park was renamed and a new monument was dedicated to recognize the Native American perspective in that historical battle.

"We have realized that there are multiple ways to tell about these parks," said Pitcaithley.

In fact, until recently, the Park Service had no official statement about the causes of the Civil War. Instead it focused on military history and battle strategies.

However, a new visitor's center at the Gettysburg National Military Park will include history of the conflict that led to the infamous battle at that site. And in recent years the Park Service began showing a Confederate statement of secession at Fort Sumter, the site of the first battle of the Civil War.

The battle at Fort Sumter has also been linked to civil rights struggles at other national monuments, such as the Frederick Douglass house, a new park dedicating the Brown v. Board of Education desegregation trial, and the trail of the civil rights march from Selma to Montgomery, Alabama in 1965.

Several Juniata College alums, then students, participated in the march to Montgomery. They will return to campus later this semester to continue this year's theme of civil rights in the College's lecture series.

Pitcaithley compared these "sensitive history" initiatives

continued back page

PRIDE helps community

continued from page 3

member and Human Resources Benefit Coordinator at Juniata College Cady Kyle points out, "This is a unique opportunity to work with individuals who are grateful for your work—both clients and staff of PRIDE."

And, as Juniata College alumnus and Director of Web Technology Joel Pheasant pointed out, serving the community means forming connections that may be beneficial when seeking employment. "There is the added bonus of [making] contacts," said Pheasant. "Through volunteering in the telethon as a student, I gained a contact that led to the job I was offered when I graduated from Juniata."

Pheasant's work as a student involved re-writing a program that tracked bids during the telethon. This alone shows the diversity of tasks available for students willing to serve.

PRIDE's programs include speech and occupational therapy and a supplemental prescription drug plan. PRIDE board member and Juniata College Director of Development Marsha Hartman stated that their clients receive help for "necessary medications these individuals may not otherwise receive."

In addition to the Telethon, Huntingdon County PRIDE offers additional projects throughout the year, including a PRIDE Olympics, Auction off a Bachelor Night, and a Wing-Off, on March 13. At the latter event, esteemed residents of the county, selected by PRIDE, will judge which restaurant cooks the best hot wings.

PRIDE is offering the challenge. In exchange for their service, students will undoubtedly gain valuable opportunities for their lives and careers. Volunteering in any capacity is as simple as visiting PRIDE's website at: http://www.huntingdon.net/pride.

Van service

continued from page 1

Saturday nights. Anyone with feedback should e-mail Director of Student Activities Staci Weber with ideas.

Students can pick up shuttle tickets at the Info Desk for $5.00 – but seats are limited to 30 per week, so students are advised to purchase early.

Unity House

and a meditation room for bible studies and worshiping."

In order to reserve this space, students need to contact Dawn Scialabba, campus ministry assistant.

The freedom for students to believe and express their unique cultural and religious views is very important to the College. The Unity House embraces and encourages these values.

Elias said, "We hope that more people feel free to come in and out as they please, and feel comfortable there, and that we reach out to more people on campus."

The unity of Campus Ministry and the Office of Diversity and Inclusion will surely become an iconic jewel of Juniata College.

Apathy is Lethal:

Muslim Student Association offers window to our troubled world

Mary Gardiner

This semester, I'd like to bring this column to a more local level. Of course, not because I solved the world's problems—as I would, of course, like to think—or for any other reason.

But I have realized recently, that as much as one can care about injustices thousands of miles away, there are so many more here to deal with. I would be unreasonably overlooking the problems of my own fellow students if I only focused on Darfur and the IMF. And furthermore, I've also found that the international presence on campus is undervalued. Therefore, I'd like to devote this column to the opportunity we have for international learning, here in the middle of nowhere, Pennsylvania. So, here goes.

Did you ever hear the term, "towel-head," being used casually? Have you ever used it yourself? Have you seen the prejudices against Muslims in our country? If you haven't, you must be missing something. It's everywhere.

I've seen it in my family, in my friends. And I was very rudely awakened to the ubiquitousness of such discrimination while living with two Afghan Muslims this summer.

They told me about their house being robbed, just days after September 11. They watched as people always avoided them. They had trouble buying a car, and finding a place to live, for no other reason than their nationality, appearance and religious background.

After that experience, I came to be extremely interested in the Muslim Student Association (MSA) on campus. Led by Javaid Zeerak, Sonia Eqbal and Muhammad Jami, the group's goal is to show Juniata students and the surrounding community the truth about Islam and the Qur'an.

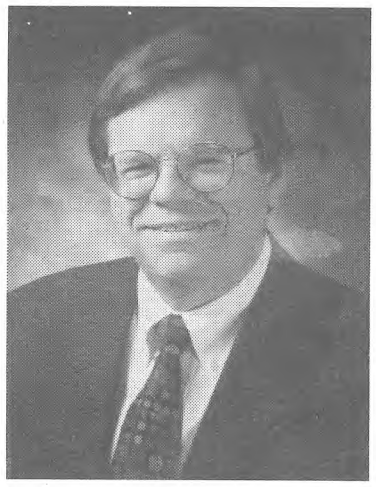
Last semester, they presented a movie, "Islam Denounces Terrorism," citing verses from the Qur'an that condemn terrorists instead of supporting them. At the discussion held afterwards, the club leaders further drove home the point that nothing about the religion intrinsically supports the terrifying actions of Islamic terrorists.

Indeed, they argued, what does "Islamic Terrorist" mean? What is the difference between Islamic terrorists and Christian terrorists? Why make the distinction?—they both terrorize.

The club further makes its presence clear at several United Spiritual Council, PAX-O and UCJC meetings. They also contributed to Saturday's Eid dinner (see p. 7). On January 30, the club answered questions at World Religion Day about subjects like tolerance and women's rights.

The MSA is extremely open to students who are interested in learning more. All of the members are very receptive to questions about their religious experiences. I would strongly suggest that anyone interested in the life and spirit of Islam, should contact one of the aforementioned officers.

As a matter of fact, I would suggest that whether you are interested or not, get in touch anyway! Go to an event, a discussion, or an open meeting. In order to truly experience the liberal arts, one must be open to the international presence on campus. There is an opportunity for cosmopolitanism, even here, in Huntingdon, and to ignore it is to truly deny the world.



Presidential Perpective

"Last semester, over Thanksgiving break, the campus post office supposedly threw away newspapers students had paid subscriptions for. Some people were really upset by this. So, what is the post office's policy for holding/forwarding student mail during breaks?

It states in the student Post Office Policy that no newspapers are kept over breaks unless the Post Office is contacted and asked to hold them. The reason for this is space. Boxes are small and shared by two people and so room does not permit it. Only First Class and magazines are saved during breaks due to space. Mail is only forwarded over the summer. The reason for this is the turn around time for that mail. By the time the mail is sent on during a break, the students will be returning. It is USPS who makes the guidelines for forwarding. First Class mail is forwarded for 12 months, magazines for two months. Presorted and Non Profit cannot be forwarded.

"Are there any plans to create a lounge in Good Hall for humanities students? What will the recently-vacated office space – created when business professors moved to BAC – be used for?"

The lounge for Good Hall will be located in the basement space now occupied by the Theatre folks. Once they move to Halbritter we will convert it to lounge space.

Students, faculty and staff may submit questions for the Presidential Perspectives column by e-mailing juniatian@juniata.edu. Questions are forwarded to President Kepple anonymously.

Juniatian announces public policies

Nate Drenner

Today marks the fourth semester that the Juniatian has been published as a product of the Writing Practicum course. Recently, the Juniatian ended its status as a Registered Student Organization through the Office of Student Activities and became a solely academic endeavor housed in the ECTA Department and funded by Provost's Office. This article is dedicated to describing both what the Juniatian is and how it operates.

The Juniatian student newspaper is committed to publishing compelling, original articles for and about the Juniata College community. It strives to challenge the community with an accurate and ethical reporting style, both in celebrating the community's successes and acknowledging areas with potential for improvement.

●The Writing Practicum Juniatian Administration

When course registration approaches, students may notice an English course called "EN-181-481 01: Writing Practicum/Juniatian." This course debuted in the fall of 2003 to offer academic credit to students contributing to a printed student newspaper.

To join the Juniatian staff, students simply must register for the Writing Practicum, taught by English instructor Amy Mathur. This is a workshop class designed to give interested students hands-on experience writing for a college-level newspaper. It should not, however, be confused with "EN-311: Professional News and Feature Writing," another ECTA Department class, which is a more intensive, classroom-based course in journalism. Students should enroll in EN-311 if they seek theoretical instruction in journalistic practices. No one enrolling in the Writing Practicum needs to have taken EN-311. The course is open to all POEs.

Students may receive 1-2 academic credits based on their initiative and consequent involvement in the course. Students may also enroll in the course more than once.

Student editors and staff writers determine the content of the Juniatian. Regular staff meetings and editor meetings ensure that the Juniatian remains a student-centered publication.

Anyone interested in the course or concerned about how the newspaper operates can contact Professor Mathur or the student editors by e-mailing juniatian@juniata.edu or contacting the Juniatian office at (814) 641-3379.

●Prior Review

The Juniatian expects its student reporters to uphold basic journalistic principles, and every article undergoes an extensive editing process that involves staff, editors and the course instructor. Therefore, no one outside the Juniatian staff may review materials before publication. The instructor and current editors would consider prior review demeaning to the responsibility of the staff as well as opening the door to censorship.

●News Tips

The Juniatian strives to publish engaging, thought-provoking stories for its audience of Juniata College students, staff and alumni. Any member of the Juniata community is welcome to submit story ideas or news tips to juniatian@juniata.edu. However, all articles must be written by members of the Juniatian staff. Any student who wishes to contribute to the newspaper, outside of letters to the editor, news tips, and questions for President Kepple, must be registered for the Writing Practicum.

●Corrections and Letters

As with any publication, inaccuracies sometimes appear in print. When facts are printed inaccurately, the Juniatian will print a correction in the following issue.

Readers are encouraged to comment on articles by sending a letter to the editor to juniatian@juniata.edu.

●Advertising

The Juniatian is printed through an agreement with the Huntingdon Daily News. The

LETTERS TO THE EDITOR

Lack of studying in "underground learning"

Honesty seems to be something as elusive today as it was when I was a student at Juniata. Then the war in Vietnam was a focus of many of Juniata's students. Now the War on Terrorism and general anti-military rhetoric seems to again be a focus for some students.

The article titled "Underground learning" and dialogue opposing access to the campus by military recruiters strike me as an examples of a lack of honesty. I make no excuses for the conduct cited in the article and students purport to "study" with regard to events at Abu Ghraib. I challenge that actual studying is taking place.

Why? Simply a conclusion has been reached prior to commencing "study." This is a scenario that only lends itself to significant bias and exclusion of information that might not support or even contradict the conclusion established at the start. It is simply not honest and does not deserve to be reported or treated as an honest or academic inquiry.

Recent tragic events in the Indian Ocean have brought to the fore activities that the warmongering, homophobic U.S. military is routinely called upon to perform: humanitarian relief that the U.S. military performs exceeding well. Yet some on campus prefer to focus on matters that have little real significance in the world at large. Righteous, God fearing pacifists are able to sleep safely and express their opinions freely because of the efforts of generations of warmongering, homophobic U.S. military personnel, yet feel obligated to condemn the military and protest recruiting efforts. Similar attitudes and efforts were present during the Vietnam War, and military recruiters were exiled briefly to Founders Hall while recruiters from Dow Chemical (the manufacturer of napalm) were welcomed on campus.

Honest inquiry, open dialog are appropriate. Equally fair questions about the ethics and morality of the world at large need to be asked and addressed at least as urgently as those purportedly asked regarding Abu Ghraib. How could member nations in the Security Council vote knowing they were violating the Security Council's Sanctions and act as if they were on the moral high ground? Why has there been an Arab, Islamic, European silence regarding beheadings and mindless executions, ie: Margaret Hassan? These are certainly violations of Geneva Conventions and international norms of human rights and treatment. How long has the U.N. known of and turned a blind eye to massive corruption that aided and abetted the undermining of its own sanctions? Etc.

Juniata's student population is not exclusively Brethren. Banning military recruiters from the campus is in effect imposing the religious beliefs of a minority of students on the entire student population. Further, a glance through the Alumni Directory reveals a sizable contingent of Juniatians who have made careers in the U.S. military rising to Field and General grade officers, which does not include the many who served, voluntarily or as draftees following their time at Juniata nor those who served prior to coming to Juniata.

The U.S. Armed Services offer a broad array of career and learning opportunities. Imposing a single religious or social litmus test that is not applied to every organization seeking to recruit on Juniata's campus is blatantly unfair and dishonest. The military does not exist to conduct social experiments but to protect the freedoms enjoyed by all of us. Including dissent.

Dan Hueglin
Class of 1971

Challenging the views of faculty

Melody Bratton's letter in the December 9 edition raises several important issues. Politics in the classroom, and the liberal persuasion of many college faculty, are not things peculiar to Juniata, of course. Nor are the critical questions of academic freedom. We need to be sure that we, as a community, react to situations of this kind in ways that reinforce, and if possible enhance, our commitment to be open to all points of view.

It is a delicate balance. I would argue that while everyone has the right to have his views respected, no one (including faculty) in a liberal arts college has the right to expect his views to go unchallenged. Our entire enterprise hinges on the idea that students should learn to lead examined lives. Vigorous, and sometimes even heated, debate is a part of the process of examining one's life. We should welcome that.

Melody is absolutely right that "students should be able to voice their differences without fear of humiliation or being made a spectacle of by professors." But we would not be doing our jobs if we allowed students just to voice any old difference, or simply offer "because I said so" as a reason. As a faculty member, I have an obligation to my students to insist that they hold their own opinions up to critical analysis and present them (after examination) using solid evidence and sound argument. Some students need a harder push than others before they will do that. Where a hard push ends and humiliation begins is often in the eye of the beholder.

The fact is that most students come to college with a lot of attitudes that they have never been asked to defend. And it bothers them to have to defend their views. The easy thing for the student to do is blame the professor for being "liberal" (or, less commonly, "conservative") and spend the rest of the term sulking. This misunderstands our aim. Our hope is that by challenging the views that students hold, often by acting as devil's advocate, we will encourage them to want to defend their views more clearly and persuasively. The object is not to change students' minds, but to help them to be more thoughtful and better informed, whatever their political views.

I have known a lot of thoughtful and well-informed conservatives who have graduated from Juniata, still conservative, having thrived on the intellectual atmosphere here. They found that their views could not only stand up to critical scrutiny, but could be sharpened and improved in the process. The contemporary conservative movement has deep intellectual roots that deserve to be explored, and we have a number of classes that offer the chance to do so. To say that Juniata offers a hostile environment for conservatism fails to acknowledge these opportunities. In my experience, Juniata is not hostile to conservatives, but is and should be hostile to those who do not see the value in examining their own convictions.

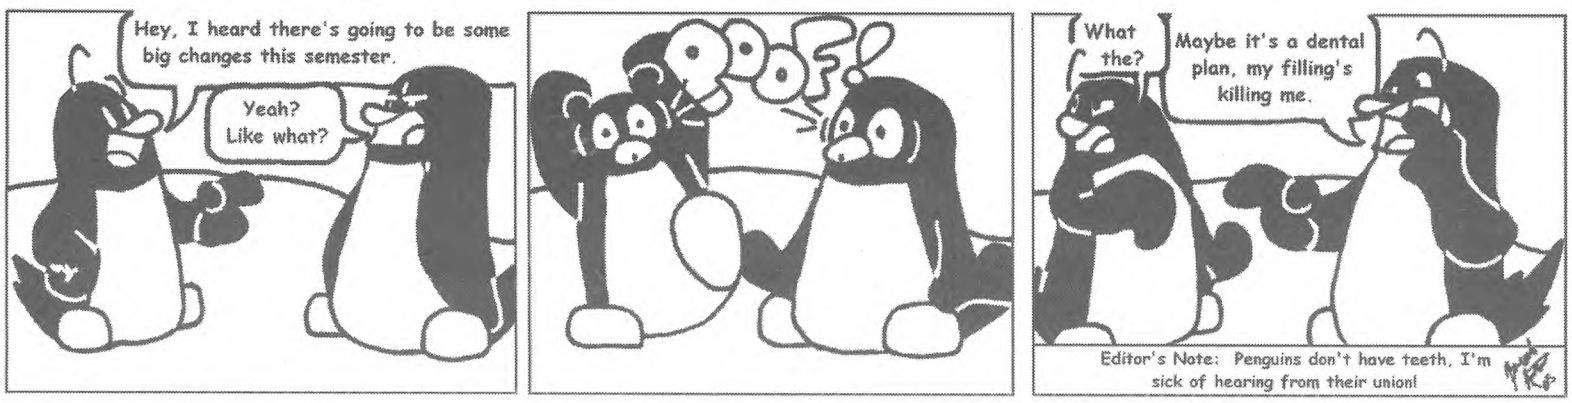
Jack Barlow
Professor of Politics

Juniatian policies

continued from page 5

Daily News also handles the sales of Juniatian advertisements. The Juniatian does not set advertising rates and sizes, so potential customers should contact the Daily News office in downtown Huntingdon with questions in regard to this matter.

● Circulation / Subscriptions



The Juniatian is offered free in print at any news stand on the Juniata College campus. The Juniatian is considering ways to offer subscriptions to alumni and students off campus, but no subscription service is currently in place.

Juniatian policies and its publication schedule are also available online at http://clubs.juniata.edu/juniatian.

Write a letter to the editor! We invite students, faculty, and alumni to write on any issue of concern to the Juniata community. Free exchange and thought are important parts of a liberal arts education. Please note, though, that due to available space, we ask for letters to be limited to 300 words. Send your letter to juniatian@juniata.edu. *Opinions expressed in the commentary pages are not necessarily those of the staff.*

The Rookery

by Brock Eastman

Local radio expands options

More student hours and 24 hour WPSU both possible with new plan

Holly Brown

In 2005 Juniata students and the Huntingdon community will be seeing extensive changes in college and local radio programming.

As reported previously in the Juniatian (Dec. 9 issue), WKVR is expanding its student broadcasting hours. The proposal for more hours of student and faculty broadcasting has been approved and is now effective. Plans have also been made to add a translator to the WPSU signal: that is, to create its own frequency to free up WKVR.

While the new programming hours will be flexible each semester, currently the hours of 2-4 p.m. Monday through Friday are open. No students have stepped forward, but several faculty members have laid claim to the spots.

These hours were previously occupied by WPSU programming. The new hours were carefully chosen to overlap classical music and not popular National Public Radio shows. Still, some are concerned that NPR is being slowly eliminated from WKVR broadcasting. Fortunately this will not be a problem for long.

Mainly because of its location in the mountains, Huntingdon is normally unable to receive WPSU. To remedy this, Juniata and PSU have been working together for five years to share radio time.

WPSU is broadcast on WKVR when students and faculty are not.

However, this was meant to be a temporary solution. Issues of Juniata students losing their radio station and what hours WPSU should be broadcast have arisen. It's been a difficult balancing act.

That difficulty will hopefully come to an end this summer. By that time, WPSU hopes to put the translator into effect.

The translator solves both the problems of sharing WKVR hours and the low strength of the WPSU signal.

Professor Donna Weimer states: "By getting a translator not only will we have a greater reach and stronger signal, but now folks will have access [to WPSU] 24/7."

Unlike a new tower which, because of the cost and trouble of finding a new frequency, would be difficult to install, a translator will boost the WPSU signal and move it to another frequency, freeing up the time used on WKVR. It will still be WPSU 91.5, but now it will be available in Huntingdon.

Greg Petersen, WPSU manager, has been working closely with Weimer and members of the Huntingdon County Community Board to find this solution.

"What's great is that Juniata and Penn State came together to serve the community, not competing as schools," said Petersen.

Unlimited access to WPSU has been an anticipated convenience for many community members. When the translator goes into effect, WKVR will have its station back to focus on campus programs. Whether the Juniata community can sustain interest in these new hours is, however, questionable.

"Even though the radio station is not that nice and not too many people actually listen, it is really fun for the people involved with the shows," said sophomore Reid Smith, who DJs Sundays from 10-12 p.m.

WKVR has been working for several years to update their equipment. DJs have been training with a new computer system that went into effect on Sunday. The new hours are another attempt to improve the station. But although WKVR has been working to improve, it's unclear whether campus interest will increase.

This semester's small step toward more hours will hopefully prepare the station for full time broadcasting. A new lineup may just be able to spark more campus interest.

Eid Dinner celebrates ninth year

Muslim cultural event draws crowd of 200 students, faculty, and community

Nicholas Carney

The ninth annual Eid al-Adha Dinner was celebrated in the Ellis Ballroom on Saturday, February 5. Featuring traditional Muslim cuisine and entertainment, the event drew a crowd of nearly 200 students, faculty and members of the community at large. Presented by a triumvirate of organizations, the United Cultures of Juniata College, the Muslim Student Association and Club International, the dinner marked the end of the traditional pilgrimage to Mecca known as the Hajj.

During this year's program, attendees enjoyed authentic Muslim cuisine from over a half-dozen countries including: Syria, Iran, Morocco, Turkey, Palestine and Afghanistan. Among these gastronomic delights were M'qalli, or chicken with olives, and Saniet Patala, a kind of vegetable salad, and curry over rice.

Hannah Rauterkus / Juniatian

Over 200 people attended. They kept the servers busy and the lines long, but the wait was worth every bite!

Guests were entertained by a Lebanese folk dance, known as the Debka, among others. The music of the night originated from tens of nations from across the globe.

Also presented this year was a video produced by the Muslim Student Association. The video detailed the tradition of Juniata's Eid festival, as well as the world at large. The video was produced over a two year time period, and debuted at this celebration.

An Egyptian student and member of UCJC, named Khaled El-Zahhar, began Juniata's Eid tradition a decade ago. Since then, it has remained one of the campus' most notable festivities, and has embedded itself in the collective mind of the community at large.

"Often, newly arriving Muslim students are struck as they experience Eid thousands of miles away from home and see the welcome participation of so many of the community members and their sense of sharing this happy occasion," said Ahmed Javaid Zeerak, a member of the MSA Steering Council. Zeerak goes on to point out the importance of Juniata's tradition of Eid as an "imitable symbol of cosmopolitanism, tolerance, and sharing."

Hannah Rauterkus / Juniatian

Demitri, Fouad, Tom, Javaid, Kurdo, and Pete were dressed to impress during the Eid dinner on February 4.

So popular was this year's feast, that extra tables were added to accommodate a number of surplus guests. "I just hope there is enough food to go around," stated Dr. William Frazier, a local dentist, who attended with his wife Sally Frazier, an instructor for the Intensive English Program.

In the Muslim world, Eid al-Adha is celebrated by a feast where only about a third of the food is eaten; the rest is given to those in need, neighbors, and acquaintances. Supported by both the Office of Diversity and Inclusion and the Center for International Education, the dinner offered a unique opportunity for multiculturalism and transnational cooperation.

continued page 8

Alison Brown Quartet fills Oller Hall

Latest artist series event features banjoes and fiddles

Jasmine Frishkorn

Juniata students and community members filled Oller Hall on Friday, February 4 to listen to the Alison Brown Quartet. Alison Brown, a Grammy award winning banjo player, was joined by her band mates who played guitars and the piano. Special guest Andrea Zonn also joined the quartet with the fiddle and vocals. The performance included songs from the band's newest album "Replay" along with past hits.

Alison Brown dedicates the song, "Lorelei," on her new album to her fat cat. "I wrote it for her to jazzercise to," explains Brown.

The Alison Brown Quartet, a traditional bluegrass band, has successfully blended a variety of musical backgrounds including jazz, folk, and classical music.

"Their music is exciting and unique," said sophomore Sarah Kotora. The perfect mixture of bluegrass and jazz created an energizing sound that was highlighted by the soothing voice of Andrea Zonn.

The band was able to incorporate the audience into the performance with short introductions of each piece.

One of the audience's favorites was a new rendition of an old bluegrass classic "Colonial Boy." It is the enthusiasm the band brings to the performance that has brought them to the top of the new acoustic movement.

Part of the concert included a duet performance by Alison Brown and Andrea Zonn using only the banjo and fiddle. The duo took you back to the roots of traditional bluegrass music, to "a time when you sat on your front porch with your fiddle and banjo…and simply played," said Brown.

Although many audience members were familiar with the band beforehand, some were not.

"I had not heard the quartet's music before. It was nice to have a new sound on campus, one what we aren't exposed to very often," said senior Nicole Fernandez.

The Alison Brown Quartet has found some new fans here on campus with their unique sound and lyrics.

With the foot tapping and finger snapping beat of the quartet's music, it was easy to see that all who attended thoroughly enjoyed the concert. The performance was truly refreshing and a great way to kick off the spring semester Artist Series.

Eid Dinner

continued from page 7

Brent Calaway, a Juniata student who survived the tsunami disaster, spoke at the dinner in an effort to help raise funds for the crisis in Southeast Asia. Calaway, whose surfing plans brought him to the beach that day, described his experience as well as the fear he and his friends felt: in the village 38 people perished when the waters rose nearly 20 feet.

"You just can't imagine the power of the wave," Calaway said.

Continuing the Eid tradition of helping those in need, funds collected at the dinner will be given to UNICEF to help tsunami victims.

Collegiate dementia:

Smooch the pooch!

Carolyn Keller

Hello everyone, and welcome back for the second semester! It's already February, and Valentine's Day is upon us! And what better holiday is there to take a potshot at than Cupid's behemoth itself?

You heard my thoughts on the similarities between puppies and the opposite sex last semester. So in a nod to the holiday spirit, we'll call both humans and canines equally lovable. And I won't blaspheme the happily-together or the bitterly separate. The first is to be commended, the second, well…I'm sorry.

You have to be careful, mocking the Day of the Heart. Face it, it's been done. Whether love is a many splendored thing or love just plain hurts, there aren't many stones left unturned when it comes to poking fun at February 14.

But true love? Cut me a break, the object of *my* column's affection is far more shallow than that! No, it's all about the Puppy Love: you can't go wrong, right? It's superficial, it's merry, it turns us all into squealing 13 year old girls. Even the boys! If you're a romantic, it's the prelude to the good stuff. If you're a cynic, it's the gooey moment before you find out just what's wrong with the person you're dating.

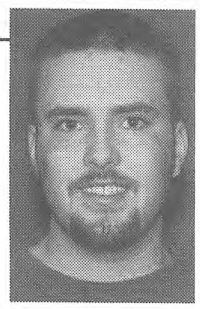
And puppy love has even more uses than the occasional prank or wishful thinking! It can be recreational as well. Snapple will help you understand this. According to one of its word-to-the-wise-giving bottlecaps, a one minute kiss burns 26 calories. Think about it, and imagine the dawning realization of delight that came across my face when, sitting at the kitchen table with my roomies, I realized that if I kiss a boy for four minutes, I can have a cookie!

"Sweets to the sweet" aside though, there's also the historical aspect of puppy love to consider. It dates back all the way to the Garden of Eden. For example, ever wonder why you don't perhaps fall for the right people at the right time? My brother has the answer for you!

Paul says, "Human nature wants what is bad for it. We cannot help it, ever since Adam ate from the tree of knowledge, all because he wanted to get into Eve's pants." He pauses and considers the situation, "That is, if she had pants on at the time. But after he ate it, she wore pants, and he wanted in them!"

Don't get me wrong, for all my would-be cynicism about love, when push comes to shove I tend to be one of the more squeal-y girls on campus. And I used to proudly be considered a "dude!"

What happened? Puppy love. I melted into a puddle during a romantic movie when the leads didn't even have the courtesy to die in the end. Turns out I'm a girl after all.



Burn some calories and smooch that pooch this Valentine's Day.

The next issue of the Juniatian will arrive Feb. 24!

JAB behind the scenes: organizing the major concert

The Bookmarkables

Nathan Thompson

As I begin my final semester, I would like to welcome you once more to my column. Here, I once again promise to take time away from less important activities like class assignments and devote it to my readers. As my terminal senioritis reaches advanced stages, I am sure that I will be spending even more time researching websites. Sure, some may call it "slacking off," but I know that my efforts are noble.

Through my research for this column, I have learned much. For instance, I have learned that modern technology allows any half-wit to plague us with un-truths. Just ask Dan Rather.

We can combat this sea of idiocracy with websites like the Urban Legends Reference Pages. For a decade, Barbara and David P. Mikkelson have been fighting the moronic masses at www.snopes.com.

We all have at least one mass-mailing friend or relative. You know, the one who plagues your inbox with those forwards titled, "Did you know?" Most of us just hit the delete key. But there is a way to fight back.

Most likely, those e-mails, like many rumors, are false.

By going to www.snopes.com, a quick search reveals that many rumors and forwarded e-mails are nothing but lies. This website is especially useful after major world events, to help separate truth and fiction.

Did you hear the one about the car that gets 200 miles per gallon? It's just a myth that has been around for decades. What about the IQ rankings of the red and blue states? Nothing more than a bitter prank resurfacing from the 2000 election.

How about the Air Force Jets flying in a "USA" formation? Adobe Photoshop flew that one. Photoshop is also the only place where President Bush held a book upside down. However, the photo of Bush delivering an illegal punch while playing rugby for Yale is authentic.

Perhaps the most depressing bit of knowledge that Juniatians may find is that Juniata has never been on a "Top Party Schools" list by *Playboy*. If you were a firm believer, I apologize. You'll just have to try harder.

The site also deals with about 2,400 virus hoaxes, societal legends and all sorts of trivia of questionable credibility.

When you visit the website, you can search for a specific legend or browse through their forty-two different topics and countless sub-topics. When you browse, the claim of each legend is color-coded to reflect its level of validity. Each page includes references to prove validity.

The website is maintained through donations and advertisements. Unfortunately, this means that you will receive a pop-up when you first visit the site.

Overall, www.snopes.com is a small beacon of truth in a cyberland of yahoos. This is one site you will be glad to have on hand when you open your inbox to another forwarded falsity.

The Ratings (out of 5)
www.snopes.com

Addiction	2, Trivially entertaining.
Humor	4, Funny stories/style.
Navigation	3.5, I've had better.
Pol. correctness	5, Not a problem.
Usefulness	3, Be in the know.

Prioritizing your foreign life

Jay Trovato

No matter where you choose to go, studying abroad will offer you wonderful opportunities to see new places and do unusual things that just can't be seen or done in Huntingdon. These kinds of experiences will deepen your understanding and appreciation of your host culture and create great memories that you will carry with you forever. However, just like at Juniata, you need to be aware of how you want to spend your time and money, because there won't be enough hours or pesos for you to do everything at once. The semester flies, so establishing your priorities early will ensure that you can accomplish everything you want to do before it's time to leave.

First, although it's kind of a drag sometimes, you need to remember that your first job is to be a student, not a tourist. Therefore, you must resist all temptation to flunk your classes while lying on beaches or climbing mountains! All bets are on academically-speaking while you're away from Juniata, and you need to take the time to keep up with your assignments, even if that means skipping a night out with your foreign friends once in a while.

Also, try not to procrastinate your final projects if at all possible; you'll want to spend your last days abroad relaxing and partying with your friends and host family rather than writing some essay in a foreign language. I fell into that trap at the end of last semester, and wish I could have spent less time holed up with homework and more time with people that I might never see again.

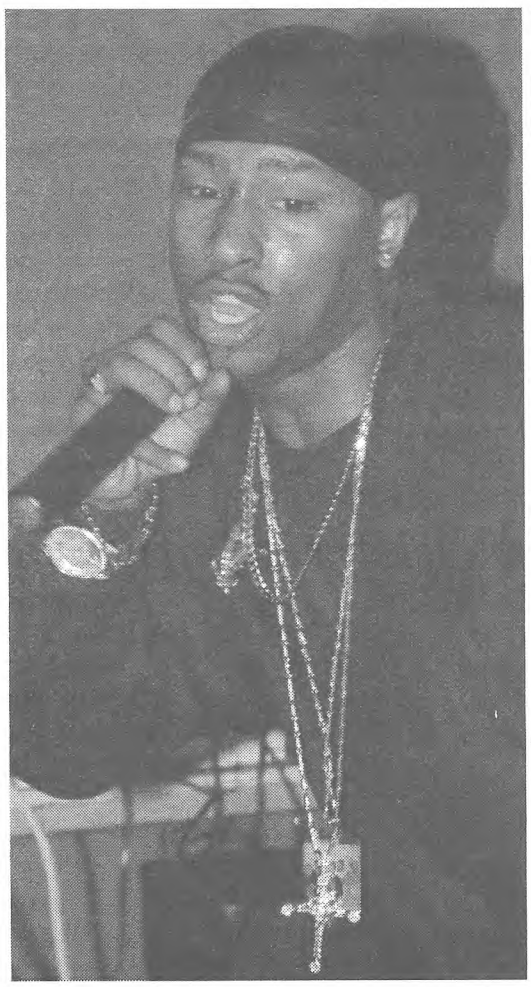
Just like time, money is another limited resource that can go very quickly if you're not careful. During your first few weeks abroad, determine how much money you have to work with and how much everything costs in your host country. Then, make yourself a budget – approximately how much will you spend each month on laundry, public transportation, Internet access, long-distance phone calls, and the kitchen sink? Include a column or three for fun and travel, making sure you can afford it all. You don't want to be stuck eating peanut butter and jelly for a month because you went on too many expensive trips or bought a million souvenirs early in the semester.

That said, I hope you *do* go and take advantage of the opportunity to travel and have fun abroad. I have definitely loved having the chance to explore ancient ruins, bizarre churches, and lively cities, as well as trying out regional specialties like grasshopper quesadillas and cactus soup. My hope is that you'll plan ahead and be able to do it all while maintaining good grades

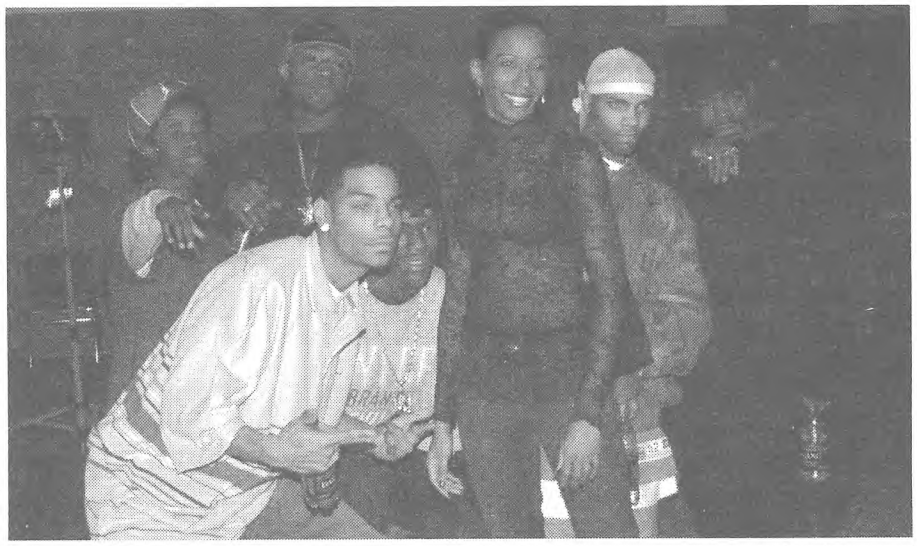
continued back page

Catch the Fire!

On Monday, February 7, Juniata students participated in "Catch the Fire," the 16th nationwide read-in celebrating African-American history. Students gathered in Ellis Hall from 11:30-1:30 and in vonLeibig Science Center from 4-5 to hear their peers read poetry and prose by several notable African-American authors, including Alice Walker, Lucille Clifton, Zora Neale Hurston, and Maya Angelou.



Citing the efforts made in the past to spread tolerance and acceptance, junior Rachelle Luther said, "I believe it is important for us to honor our fellow Americans and show support of their heritage and culture."



"Catch the Fire" was sponsored by ECTA.

Story in Photos: Sincere the Great

Hannah Rauterkus / Juniatian

Hannah Rauterkus

On Saturday, January 29, Juniata experienced premier hip hop talent from Sincere the Great and his group. Opening up the night for Sincere was True (left) who thrilled the crowd with handouts of his new CD "The True Arrival." True and Black Night set the mood and got everyone dancing (middle bottom).

After a short intermission Sincere (right), who didn't start rapping until his college years, rapped a few of his hits currently battling the top 10 charts with the likes of Ludacris. This New York native is not only gaining popularity in his home state but also across the country. Sincere recently won a BET freestyle rap contest 7 weeks in a row, and the music execs are taking notice.

"My style is like an eclipse. People hear about it before it comes, then when they see it, it's striking, when it's all said and done, it's beautiful," says Sincere on his website. His newest album, "7 Week Sin" is a labor of love.

His group (middle top) includes, from the right, Bookie, True, Amy, Twin Rated, (bending) Sincere, and Black Night.

They would all like to thank Juniata for allowing them to perform and also thank them for all the love JC showed.

Special thanks to senior Denique Conner who organized the concert and to the numerous campus offices that generously helped to sponsor the event.

Movie review: Aviator doesn't make the grade

Holly Brown

Well dear readers, we're all back and ready for a new semester of stress and slacking. Fortunately for us movie lovers, the monotony of class and studying will be interrupted on February 27 with the arrival of that hailed event – the Oscars.

Ah, the Oscars. Perhaps the most boring 12 hours of television (if you sit through the red carpet drudgery) meant to commemorate and award a year of exciting and inspired filmmaking. And leading the nomination list this year is Martin Scorsese's "The Aviator" with 11 Oscar nods.

Despite last year's lucky number, however, it seems doubtful that "The Aviator" will be making any "Lord of the Rings"-esque sweeps. While director Scorsese's latest film may have an epic feel, a lack of general narrative and a three hour running time might hinder it from being a favorite for both the Academy and regular viewers alike.

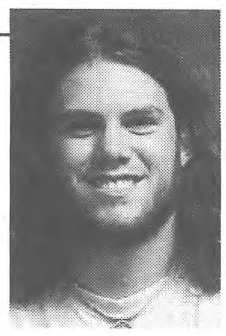
"The Aviator" is a biopic about Howard Hughes, the legendary American director, businessman, media figure and of course, aviator. Producing controversial and legendary films (such as "Hell's Angels", "Scarface", and "The Outlaw") was just a trifle to the rich and energetic Hughes who also owned TWA. Like most American biopics it's full of the usual – sex, money, drive and plenty of neuroses.

Deciding whether Howard Hughes is anti-hero, role model or just too big for life is a futile task. His big dreams and "everyman" qualities, backed by a never ending budget, are never pushed on the audience as moral or inspiring or "right."

Leonardo DiCaprio, disappears into the driven character of Hughes, taking himself leaps and bounds beyond his teen heartthrob stereotype. But despite superb acting and great action, it's hard to decide if Hughes is a sympathetic character or not.

DiCaprio is not the only star to shine. Cate Blanchett, as Katherine Hepburn, threatens to steal the show. Blanchett studied Hepburn films for hours to pin down the monumental actress's speech patterns and eccentricities. At times, however, you wonder if Blanchett is capturing the legend on screen or just overacting. Yet whatever qualms you might have with the Oscar-nominated star, it's certain that both she and the great Hepburn always strove to play mesmerizing female characters, which is a nice shift from our modern, boring waifs.

Scorsese refuses to stop with Blanchett, DiCaprio and Beckinsale. The movie sometimes feels like a neverending parade of stars, the likes of which could even challenge "Zoolander" for number of cameos. It's fun to see all the familiar faces (from John C. Reilly to Alan Alda), but I would have preferred to see some comprehensive narrative over stars.



While it's true that it is a biography and only a slice of 20 years of Hughes's life, "The Aviator" seems rather sprawling and, at times, pointless. There's drama, love, and humor, but all is mixed up in a somewhat incomprehensible 3-hour cut.

Three hours was too long of a cut. Apathy crept in and I found myself laughing at the serious bits and yawning at Hughes' triumphs. The length ruined the narrative flow.

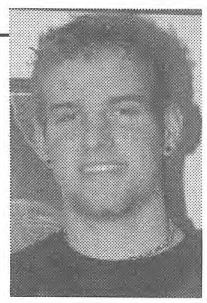
It's a fun ride, but not excessively fulfilling in the grand scheme of things. "The Aviator" is worth a look if you're keeping up with the Oscars or a fan of the time period, but casual movie viewers should beware.

The High Note:
Doculators deserve 'grassroots' designation

Jacob S Warner

Grassroots. Managers are eager to knight their valiant musicians as riders of the grassroots stallion, and musicians are more than willing to be stuck with the grassroots label. It presupposes something about the band, the musicians themselves and the conventional, popular music world. Call a band grassroots, and many times their popularity soars. Everyone likes an unheard-of, an underdog to support. With so many willing to toss around the grassroots moniker, it can be hard at times to ascertain if a band's 'grassrootness' is true, or merely a clever PR move.

All of this said, I'm willing to go out on a limb and offer up what I believe is a truly grassroots musical ensemble. Meet the Mood Doculators. This unique blend of musicians, currently living around Berkeley, California, is a vivid stir fry made with whatever vegetables you happen to have at the time. The line-up of this eclectic ensemble changes periodically; musicians rotate in and rotate back out. Sometimes you have a carrot, sometimes broccoli. Either way, the dish is always delectable. Time after time, these guys serve up sumptuous musical delicacies.



The Doculators have no official recordings, but many recorded jam sessions are passed among friends, family and fans. Their latest, "out of the trunk" offering is from 12-11-04, and at 79 minutes, this disc takes the listener on a cosmic journey through time, space and music. The disc begins with other-worldly profundity, as eerie relativisms begin to fill the speakers, slowly at first, and then the funk begins to pour, gliding into soulful jazzmatic grooving for minutes on end. The drumbeats are crisp and continually rolling as a jazzy guitar picks its way through the crowded musical streets; electro-sirenic sounds slide through the air, creating the feel of a Central Park funktastic jam fest, complete with the soulful sounds of squad car just down the street. Electro-siren funk blends into reggaezmic guitar, building to a crescendo, as Jamaica meets John Scofieldesque jazz guitar and electronic groove elation. After jamming for a while, the Doculators turn down a different path, exploring late 60's psychedelic sensation. Santana, Jethro Tull and the Grateful Dead can be heard mingling surreptitiously among the purely Doculators sound.

To an easily bored ear, much of this CD could be regarded as regurgitated sounds and hyper-extended hippie jam sessions. Sure. But when the mind is attached to the ear, the true beauty of this piece begins to become manifest. From the first minute to the last, the music glides with acute precision, sliding effortlessly through the continuum of spacial recognition and cognitive belief. Track numbers and lengths are but arbitrary demarcations placed on a piece of art that will forever raise the bar of musical and artistic creativity. Ranging from spacey soundscapes to techno-innovations to funky reggae infusion rock, these guys can flat-out play. At times the ear conjures up visions of whales mating, other times a large steel saw blade bending and twisting, full of funkadelic swagger. 80's synths and video game space-ship-surrealism mix wit George Clinton and the master of funky inter-galactic and intra cerebral exploration. The nex minute island steel vibes swin in a hammock with jazzy come hither notes and mind-bogglin synthetic sound waves.

Pulling from an array of mu sical styles ranging from islan reggae to psychedelia, jazz, elec tronica and meditative chanting the Mood Doculators have forge a sound all their own. Precisio of innovation and improvisatio is what makes the Mood Docula tors one of the best on the scen today: a truly grassroots band.

Unearth: The Oncoming Storm
Continuing to pioneer the metal crusades

Jonathan Moody

On the aptly titled "The Oncoming Storm," Unearth's fourth release pulls the listener into a hurricane of unrelenting metalcore. Their most mature album to date, "Storm" has helped Unearth to carve its name into the metal scene with a musical variety that most metal bands do not possess. Thought-provoking lyrics, mesmerizing riffs, pummeling breakdowns and surprisingly catchy chants, characterize this Massachusetts–based ensemble.

For those tired of hearing about how much someone hates their ex-girlfriend, rejoice! Unearth's lyrics deal with nothing of this nature, but rather with the current state of our country, commercialization and politics.

Yet while Unearth has some marvelously written lyrics, others feel forced and tacky. One objection is the predominant negativity throughout all of the lyrics. Too many bands are incredibly pessimistic without any positive input.

But lead singer Trevor Phipps brings a presence and frenzy that helps to ignite the music. He growls at times with such passion that one would think that his larynx is going to disintegrate. Other times, he boasts a beautiful and melodic voice that adds diversity to Unearth's sound. At one point in the song "Lie to Purify" both styles are layered over each other to create a surreal atmosphere.

Unearth frequently slows down its energetic barrage into methodical chanting. This musical device distinguishes Unearth from most metal bands. At the conclusion of the song "The Great Dividers," Phipps chants "Take over the world/Does hate mean freedom?" with a prophetic confidence.

Don't be confused though, Unearth can still rock with the best of them. At times the band's sound reverts back to "old school" hardcore with breakneck speeds and unmerciful break downs. Their songs may sound too similar at times, but Unearth mostly keeps its innovative style fresh.

"Zombie Autopilot" is the best song on this album and asserts itself from the start. It helps to illustrate Unearth's incredible talent. The song begins with a captivating riff that dances through the listener's head while foreshadowing what is to come. It continues later in the song with an extended version that leaves the listener awestruck and begging for more. The song ends on a very strong note with a contagious chorus, in which Phipps exclaims: "Free us a piece of mind, gone are dreamers who strive to know!"

Unearth has become one of the premier metal bands performing today. After listening to "The Oncoming Storm," it is easy to understand why. This album comes highly recommended for open-minded rock enthusiasts

Alt officially named head coach

Turns his attention to rebuilding Juniata's football program

Tommy McConnell

When Juniata went searching for a head football coach at the close of its season this past fall, the College put its applicants through an exhaustive process. A search committee made up of people ranging from Provost James Lasko to members of the Enrollment Center all the way to current players participated in the interview process.

Fortunately for the school, its current head coach had been applying for the job for well over a year. Since being named interim head coach prior to last season, Darrell Alt has had his sights set on being the school's twentieth head coach.

"I really looked at this past year as this is my job interview," Alt said. "It's not meeting with the search committee, its what I do right now. It's my actions every day that's going to decide it."

Juniata officially removed the interim tag from Alt on January 14.

"It was a very humbling experience," the new head coach said. "I just felt so lucky that the search committee chose me because it was a pretty impressive group. I was very excited for our program and for our kids."

As well as the support of the school, Alt has the support of his players. Six current players had a chance to interact with candidates and then share their impressions with the rest of the search committee. Troy Beaver, a member of the player's committee, was pleased with the choice.

"As a collective group, I think we all decided that Coach Alt was the best candidate," he said.

Once Alt was informed he was the permanent head coach, little changed for the no-nonsense coach.

"I planned on working the whole way through," he said, "I said a prayer and I told my wife."

Juniata's football program now has Alt's complete attention. After going 1-9 last season, Juniata is in the midst of rebuilding its program. Literally.

"We compare our program to the building that's being constructed [on campus]," Alt said. "It looks pretty ugly on the outside, but if you go by that construction site, there's a lot of activity going on. That building, a year from now, is going to look a lot different, just like our program is. So, we gave each one of our players a brick - just a little reminder of how hard we're going to work."

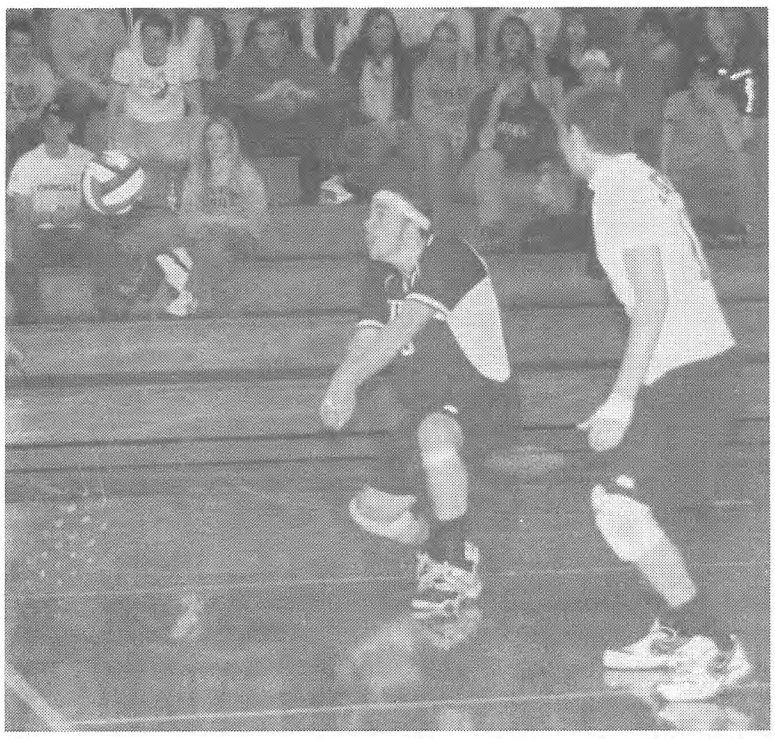
Having an official head coach will also help with recruiting. A permanent staff will eliminate uncertainty and show stability to potential players.

"Right now, we have a sense of urgency with recruiting," Alt said. "That's been our biggest focus with what we're doing. Getting recruits to visit, getting their applications in and just showing them Juniata College."

Alt's personal commitment helped separate him from other candidates.

"Aside from football, he's just a great person, in general," Beaver said. " I think that's what a lot of people saw in him. He has the opportunity to be a real good coach, and it was the personal aspect that the guys on the search committee saw."

In Alt, Juniata gains a leader with not only head coaching skills, but also someone who is deeply invested in Juniata College and the young men he coaches.



Coach Alt said, "As a football coach I love doing what I'm doing, so if I wouldn't have been named head coach I still wanted to work for our players, work for the school and work to promote the game of football."

Men's Volleyball raises record to 2-4

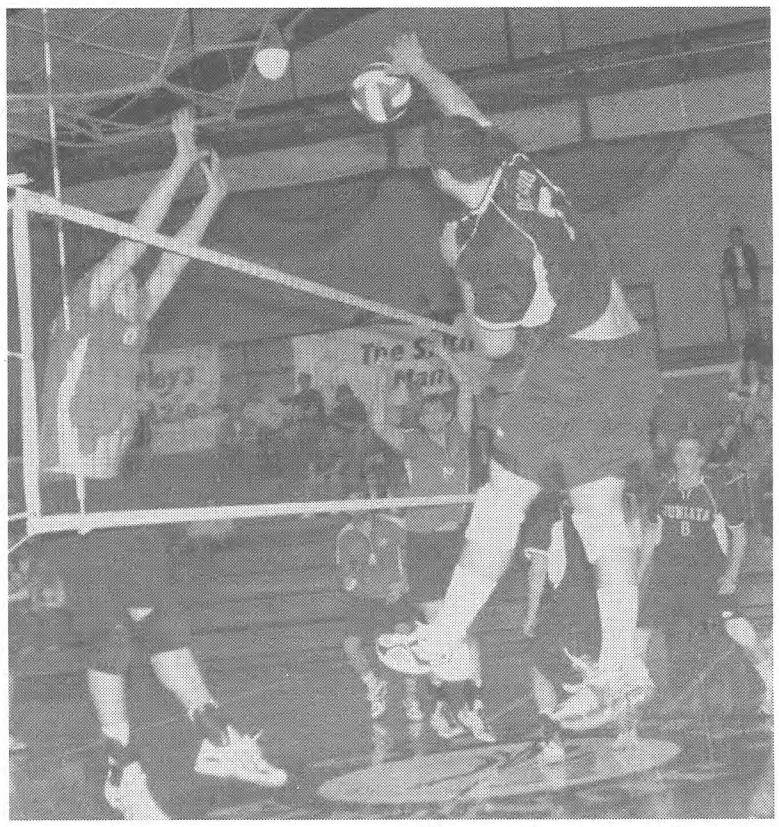
Brit Tew

The Eagles, now six games into the regular season, currently stand with a 3-4 mark. The Eagles earned wins over Division I Princeton on February 6, D'Youville on January 28 and D-I St. Francis on January 19. Juniata suffered losses against D-I opponents IPFW, Rutgers-Newark and twice fell to the Ohio State University.

The Eagles played Ohio State for the second time this season on February 4, falling to the Buckeyes 3-0. According to Coach Shibuya and freshman Matt Fritz, the team did better in its second attempt against Ohio State.

Hannah Rauterkus / Juniatian

Sophomore Glenn DeHaven sets it up as junior Tim Cole watches his back.



In the first game of the match, the Buckeyes quickly took the lead, creating a large margin between them and the Eagles.

Nearing the end of the game, Coach Shibuya sent in Fritz, who dished out back-to-back kills to close the gap for the Eagles. But it wasn't long before the Buckeyes had sealed game point (30-17).

According to Coach Shibuya, the Eagles panicked in the first game.

After the side change, the Eagles regrouped and made the second game a closer contest. Neither team led by more than three points. Juniata and Ohio State traded points until kills from Fritz gave the home team a three point lead, 14-11.

The teams remained close throughout the game, the final tie coming at 26-26 after kills from Cordt Withum and Fritz. Two service errors from the Eagles put the Buckeyes in the lead. The service errors, which have plagued the young JC squad throughout their early season match-ups, gave Ohio State the opening it needed to seal game two with a pair of kills from Andy Cole.

Hannah Rauterkus / Juniatian

Sophomore Nate Ocasio hit a career high 24 kills against Rutgers-Newark in a close match.

Game three was also close throughout the early points. Midway through the game, the Eagles led their visitors, 20-19.

A 5-1 run from the Buckeyes quickly separated the two teams. The Eagles fought back, bringing the game within two points, 28-26. However the Eagles could not close the gap any further, as Ohio State scored the game's last two points.

Coach Shibuya was pleas-

continued page 15

Swimming team gears up for the MAC

Jeremy Simmons

The Juniata women's swimming team won its final dual meet against Kings College on Saturday to bring its regular season to a close with a final record of 11-4. This tops last season's record of 9-3 and is a new program high for the Eagles. The team is currently amidst a three week resting session in preparation for the upcoming MAC championships.

The Eagles' final victory over Kings came at the end of a three meet winning streak that gave them the new program record.

Juniata started out strong in the 200-meter medley as the relay team of seniors Dana Gais and Kathy Trainor along with sophomore Amy Sutherland and freshman Jenny Bair claimed victory for the Eagles.

Juniata's sucess continued with junior Kim Dierolf, sophomore Rachel Almy and freshmen Kathleen O'Leary and Carli Zoubek all claming victories in each of their individual events.

The Eagles sealed their victory over Kings as sophomore Collin Thompson and freshman Kasey Brough both finished first in the 100 backstroke and 500 freestyle events, respectively.

As well as their win at Kings the Eagles have looked sharp in the pool since returning from winter break, earning a pair of victories as both Susquehanna and Elizabethtown fell to Juniata swimmers in its last two dual meets. The only loss since winter break came from a tight match up against California University, where the Eagles lost a close one, 132-121.

Before the season started head coach Brian McGrath predicted: "We are capable of doing better than we did last season," and he was correct.

McGrath says that the "the team did better than expected" and as a coach he is "very pleased with the team's performance."

Hannah Rauterkus / Juniatian

Junior Amy Hanson doesn't let anything get in the way of her and the goal.

The Eagles have had a very strong season and when asked what their secret weapon is McGrath responded, "the biggest strength that the team has had this year is that they are now more comfortable with my training style." McGrath explains that last year the team had to go through some changes but now they know what he expects of them.

With the MAC championship coming up the swim team prepares for what is its most important moment of the season. Eager to top the third place spot it earned last year, Juniata is going into this year's MAC championships with hope of bringing home the title. Coach McGrath is confident his team will swim well and says "if we do not claim the title this year then we will win it next year."

The only thing left now is to wait for the big day on February 11 as the Juniata swim team heads to the MAC championship with hopes of a first place finish on its mind.

Indoor track competing strong

Corinne Barabas

On January 29, the Juniata track team competed at the Ducharme Relays at Dickinson College. Overall, both the men and women's teams had strong performances.

Head Coach Jon Cutright saw progress from his team.

"We had improved since the previous meet," he said. "We're not in great shape. We still have a long way to go, but this week merits some improvement."

The men, placing second as a team out of six schools, had some strong performances on the track. Sophomore Randy Anderson placed first in the 200-meter dash with a time of 23.50 seconds. He also earned second in the 55-meter dash.

Junior Adam Loser, outjumping his competition, took a first in the high jump. Senior Jeremy Weber captured second in the long jump and third in the triple jump. Freshman Matthew Booth placed right behind Weber in the triple, finishing fourth. Justin Fritzius ran the 3,000 in 9:33, earning him third place, while freshman Eric Hoover placed fourth in the 800.

Weber is currently ranked eighth in the country and has a strong chance of competing at Nationals. Also, Randy Anderson and Adam Loser are ranked first in the MAC.

The women also had many solid performances. Junior Meredith Troutman brought home victories in both the 200-meter dash and 400-meter dash. Elena Amato finished close behind in the 400, winning fourth.

Freshman Caitlin Hinson took third in the 55-meter dash. Distance runners Lauren Gates and Nancy Hayes both took third in the 800 and the 3,000, respectively. Sophomore Maria Welch earned third in the long jump by jumping a 4.86, barely missing a first-place finish.

On January 22, the team participated in the Orange and Maroon Classic in Selinsgrove. While battling against competi-

continued page 15

Athlete off the Field

Kathy Trainor succeeds in and out of pool

Katie Laucks

To be the best athlete that one can be in a sport requires a lot of dedication. It would be an understatement to describe this issue's Athlete off the Field as a hard worker. She might just redefine the term.

Juniata College senior and swimming standout Kathy Trainor knows what goes into hard work, both in the pool and out. She has been described by Juniata swim coach Brian McGrath, as someone "that the team looks up to."

That hard work has paid off not only in the pool but outside it as well. Kathy's POE is social studies and secondary education. Last semester she was in an 11th grade classroom, being put to the test. This was a great experience for her since she plans on teaching in high school after she graduates this semester. Trainor said the student teaching experience "was awesome" and she misses it.

"You realize what you learn and study, what it is all for and it finally made sense when I was there," Trainor said about student teaching.

In the pool, Kathy has become a huge asset, not only by demonstrating her talent, but as a leader. McGrath compared Trainor's professional experience this fall to her endeavors in the pool. "Her team depends on her to be leader just as her students depend on her in the classroom," McGrath said.

"She is not just focused on herself winning, but she knows that the team is just as important to have a winning season, too," McGrath added.

This year Kathy has taken on the role of co-captain with junior teammate Amy Hanson.

"I look up to her for encouragement all the time since we swim the same events," Hanson said.

Adding to the load of a playing a demanding sport and a rigorous POE, Trainor is also the president of the Juniata Water Polo team. The club is fairly new, starting when Trainor was a freshman. It is made up of mostly swimmers. They meet in the spring about once a week for about an hour. "Most of us played in high school, and it is something we missed," Trainor said.

With dedication, the drive to win and her leadership, Kathy's senior season is making a splash.

"She has improved by leaps and bounds," McGrath said.

Trainor has been swimming

continued page 15

Men's Basketball: stepping it up

Team finishes first half of conference play in a big way

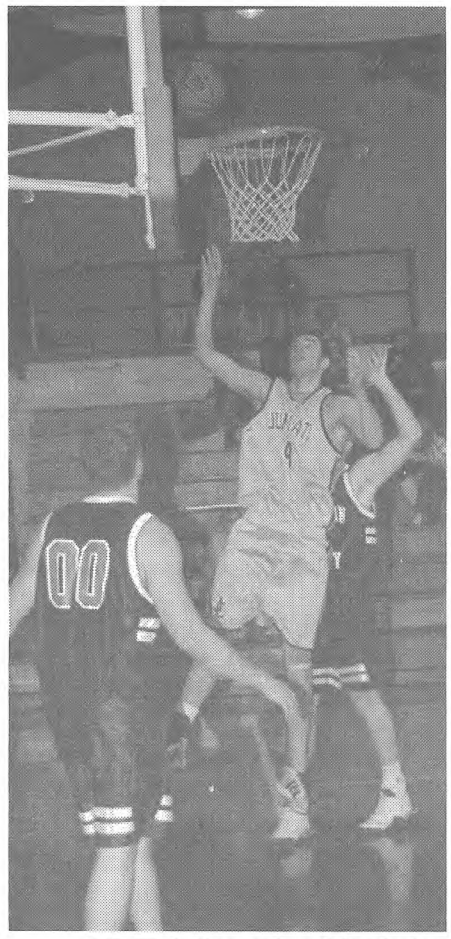
Katie Charles

The men's basketball team earned a big conference victory with a 75-72 win over Lebanon Valley on Jan. 26. The team got a huge game from sophomore Aaron Chamberlain. He scored a career best 28 points, while adding three steals and four rebounds for the game. He hit five three-pointers and effectively shut-down Lebanon Valley's preseason All-American shooting guard with smothering defense.

Steve Holencik hit a free throw with 12 seconds to play that put Juniata up, 73-69. After Lebanon Valley scored a quick three-pointer, Juniata sealed the win in the closing seconds on two free throws by junior Tommy McConnell.

Coming into the game, Lebanon Valley was ranked 19th in the nation. The Juniata team effectively dismantled them with a strong defensive effort. They forced 18 turnovers and grabbed 11 steals in the game.

Coach Greg Curley said, "We felt confident and comfortable. Our defense was great."



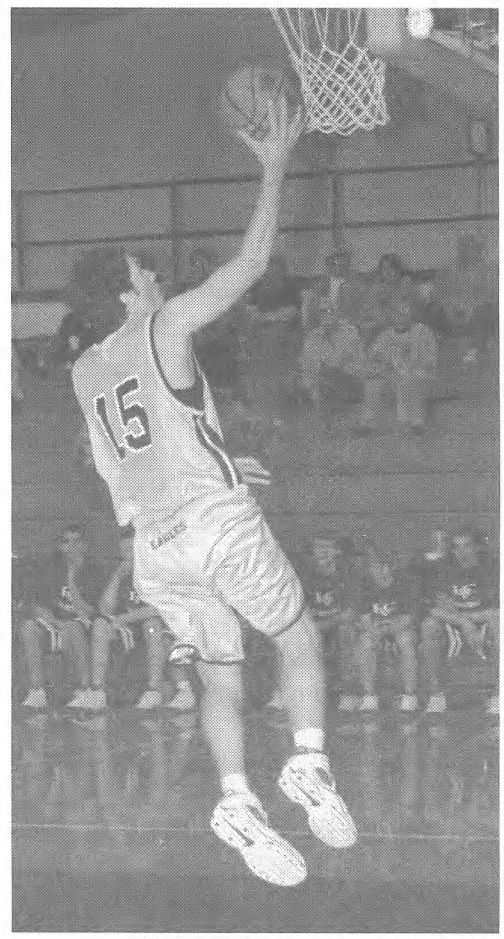
This game marks a big victory for a very young team. Curley does not see youth as a disadvantage. He said, "The guys are continuing to work and get better. I think we have a bright future."

Chamberlain is also confident in the team.

"After Christmas break, the team has really bonded," he said. "It's a lot of fun. Being young is not going to affect us."

The team began the second half of conference play January 29 against Widener University. They fell to the Pioneers, 78-54. Despite the loss, Juniata got strong performances from two freshmen. Brian Cannon scored a career-high 16 points, while Steve Holencik added 11 points and seven rebounds.

The team lost to Messiah last Wednesday, 74-58. Cannon matched his career high for the second straight game with 16 points and nine rebounds. Sophomore Chris Jasiota chipped in 10 points.



Hannah Rauterkus / Juniatian

Sophomore Chris Jasiota adds another 2 as he leads the Eagles in scoring.

Last Saturday, the team fell to conference foe Moravian, 92-63. Jasiota had 12 points in the loss, while Chamberlain chipped in 10. McConnell added five assists.

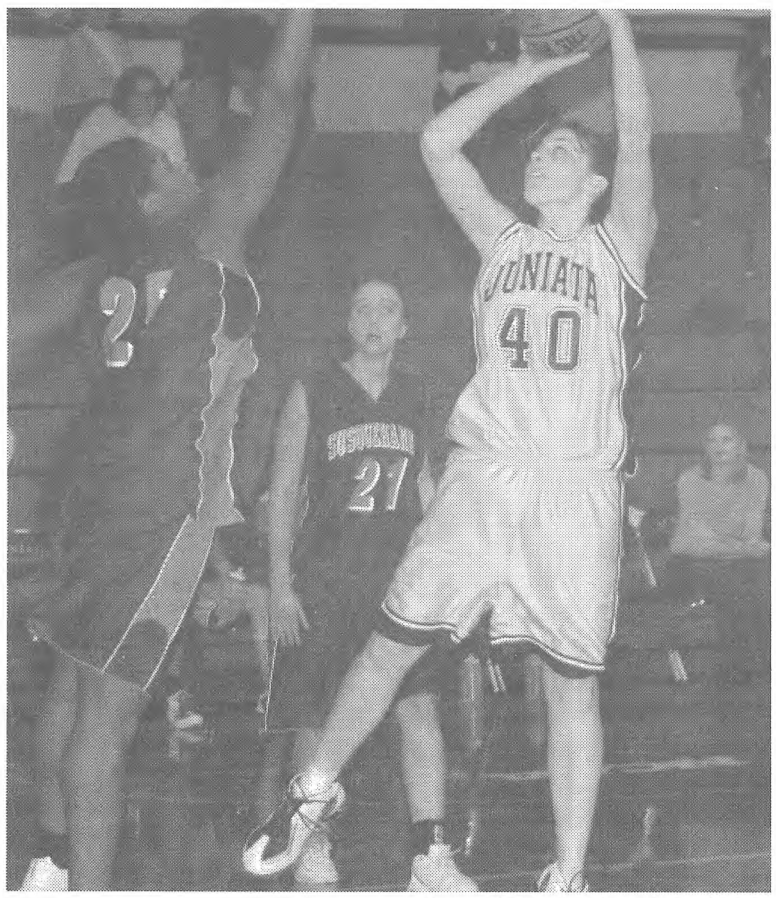
The team now prepares for the end of the regular season and possibly the playoffs. The team has three more conference games. Their final home game of the season is this Saturday.

"Every game is a big game." Chamberlain said. "We need to take them one at a time. Defense will be a key for us. We need to put together a full 40 minutes."

Hannah Rauterkus / Juniatian

Sophomore Aaron Chamberlain makes a clean break from Susquehanna's defense.

Tough two weeks for Women's Basketball



Maria Piazza

It was a tough two weeks for the women's basketball team. The women lost, 73-70, to Lebanon Valley on January 26; 83-80 to Widener on January 29; 71-44 to Messiah on February 2 and finally lost, 71-45 to Moravian. A combination of strong opponents, questionable calls by the referees and failure to push the ball in transition as much as they would have liked, spelled the difference between victories and losses. It was a setback for the Eagles since all four contests were conference games, but the stretch was not a complete loss.

Head coach Danny Young said, "We lost but we showed Juniata and the rest of the conference that we can hold our own against good teams."

The women are currently 1-9 in the conference and 5-15 overall.

The games against Widener and Lebanon Valley were quite close. Lebanon Valley was a strong team that kept the women on their toes through much of a tight game. Kristen Kirk's three pointer with eight seconds left in regulation tied the game at 62, sending the game into overtime. In the extra period, Lebanon Valley stole the game on a late three pointer by Donna Geiger.

Hannah Rauterkus / Juniatian

Freshman Jess Winemiller goes for 2 over a Susquehanna defender.

The game against Widener was a struggle early on for the Eagles. They failed to effectively handle Widener's defensive pressure. After a strong second half comeback, fueled by intense defense and timely shooting, the Eagles found themselves in a nail biter. Freshman Courtney Callas' three pointer, which tied the game with fourteen seconds left on the clock almost sent the game into overtime. Unfortunately, Widener's Nicole Stanley answered with a last second three pointer of her own to win the game.

"I'm not disappointed," junior Katie O'Brien said. "The team worked well together. No one gave up. Even when we were losing, we all kept at it."

The games on February 2 and 5 pitted Juniata against strong Commonwealth Conference foes with more depth and experience than the freshman-laden JC squad. The young Eagles guards had trouble handling the defensive and offensive pressure that Messiah and Moravian applied. In the first half of both contests, the Eagles struggled to stay even with their opponents. In the second halves of those games Moravian and Messiah pushed ahead by 20 points.

Even with the struggles, Young is still hopeful about her team's chances in the upcoming outings. The past games have been against tough teams, which tested and strengthened all of the team's skills.

"We need more contact with the opposite team," freshmen Jess Winemiller said. "As a team are learning how to work with each other."

Indoor track going strong

continued from page 13

tors from over 15 schools, Juniata put up a tough fight.

For the men, Adam Loser took first place in the high jump clearing 6 feet 4 inches to edge out the competition. Jumper Jeremy Weber took third in the long jump. Randy Anderson took second place in the 55-meter dash and sixth in the triple jump.

On the women's side, Meredith Troutman, senior Rebecca Shoaf and Elena Amato all had impressive showings in the 400 meter run, coming in fourth, fifth and eighth, respectively. Junior Nancy Hayes took home a seventh place finish in the 1500.

Coach Cutright said, "We are afraid to compete a little harder. We need to put ourselves out there. We have the potential, we just need to show the other teams what we've got."

Cutright is sure that many of the new freshmen on the team have the "early season jitters," but he is looking forward to a good finish to the indoor season and a strong start for the outdoor season.

Athlete off the Field

continued from page 13

well and practicing well as she has led the team to a record setting season. Her team is warming up for the conference championship with an impressive finish to the season. The team is currently 11-4 overall and an impressive 5-2 in the conference.

At the MAC championships on February 11 Trainor will look to repeat her effort from last year and capture conference titles. She also is working in order to keep the MAC record in the 50 and the 100 freestyle events.

After the MAC championships Kathy's goal is to make nationals. With her continued persistence and hard work, it isn't out of the question.

When Kathy's final lap in the pool is taken, she will not just have a successful career in swimming behind her but a future of successful teaching ahead.

Men's Volleyball

continued from page 12

antly surprised by the performance of some of his non-regular players including Fritz, who led the team with a career high 13 kills.

Matt Springer was also on the coach's list of top performers with 12 kills. Senior Ricky Ziegler dished out 40 assists for the Eagles and served up two aces.

The Eagles now turn their attention to the games that really count--the ones still ahead on the schedule. "We can't get down about the game too much. We have to keep winning the division games," Fritz said.

Previously, in a heart breaking, evenly played contest against Rutgers, the Eagles fell in game five by only two points.

Nate Ocasio had an outstanding 24 kills. Glenn DeHaven earned a career best 23 kills. Bernardo and Withum added 13 and 11 kills respectively for the Juniata offensive attack.

Ziegler dished out 63 assists for Juniata. The Eagles had digs from Tim Cole with 15 and Bernardo and DeHaven with 11 each. Jeremy Barndt had five blocks for the Eagles' defense.

Juniata is a young team, but still has a chance to be as successful as last year's Molten Division III National Champion squad. "We have a chance to be as good as last year, or better," said Coach Shibuya.

Super Bowl XXXIX: Patriots vs. Eagles

Robb Patty

The Patriots won their third Super Bowl in four years under head coach Bill Belichick and can now officially be called a dynasty. The Patriots join the Steelers of the 70's, the 49ers of the 80's and the Cowboys of the 90's after defeating the Eagles, 24-21, in Super Bowl XXXIX in Jacksonville, FL.

The Eagles sought their first title since 1960, but once again New England proved why it is the team of the new millennium.

The Super Bowl is like a holiday for sports fans. It's the biggest sporting spectacle of the year. Friends and family gather with food and drink in hand to watch not only the Super Bowl, but everything it has to offer.

This year the pre-game show featured Bill Clinton and George Bush talking about tsunami relief, along with singer Alicia Keys singing with deaf and blind children from the Jacksonville area.

The halftime show featured Paul McCartney, who played a few of his hits from back when I was about five feet shorter. However, McCartney did manage to keep all of his clothes on, unlike Janet Jackson of a year ago. I'm guessing that made the people at FOX very happy.

This year's Super Bowl once again had advertisers trying to win a wide scale audience's attention. Lays Potato Chips showed M.C. Hammer and a '72 Impala being hurled back over a fence after children threw a bag of chips over it in hopes of retrieving a lost baseball. Pepsi went old school, bringing back the attractive Cindy Crawford to sell Diet Pepsi. Each spot, however, had its price as advertisers are now paying roughly 2.4 million dollars for 30 seconds of television time.

The game itself was decent. In the first half the teams traded touchdowns and the score was tied coming into the last 30 minutes of play. This is when the Patriots' offensive and defensive lines began to dominate the ballgame. The defensive line contained Philadelphiarunning back Brian Westbrook, holding him to just 44 yards on 15 carries.

On the offensive side, the line created running room for halfback Cory Dillon that seemed to really wear down the Eagles toward the end of the game.

The Eagles, though, were able to hang tough with a late touchdown pass to Greg Lewis that cut the deficit to three with just under two minutes left in the ballgame. But, just like in their previous two victories, the Patriots would hang onto that three-point lead and come away champions for the second consecutive season.

Wide receiver Deion Branch was named Super Bowl MVP as he racked up a record 11 receptions for 133 yards.

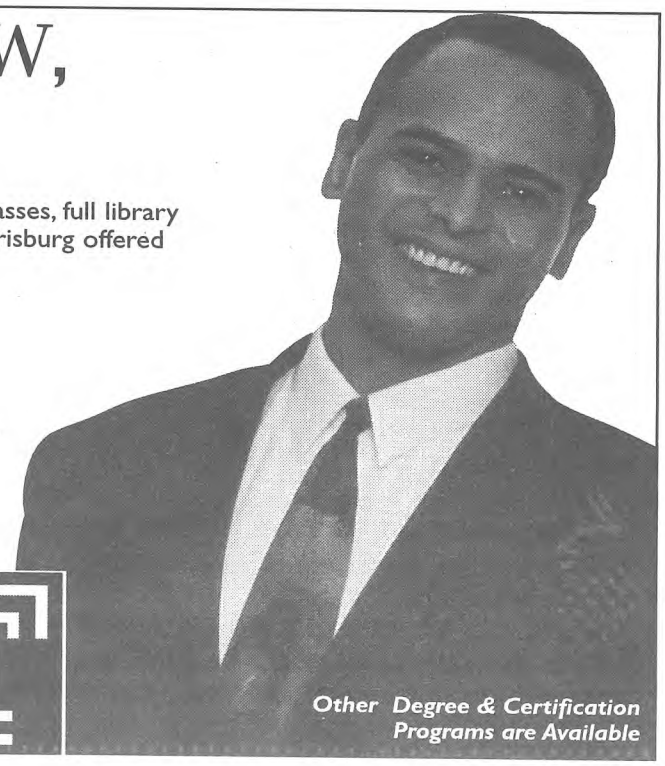
On the other side, Terrell Owens was absolutely incredible as he played on an ankle that was nowhere close to one hundred percent and was able to haul in nine balls for 122 yards. That performance just five weeks after ankle surgery shows what kind of shape T.O. is in and how much he loves playing the game of football.

In the war of words before the game, Eagles' wide receiver Freddie Mitchell called out New England's safety Rodney Harrison, exclaiming that he, "had something for him." It turned out that Harrison actually had something for Mitchell as he intercepted two of Donovan McNabb's passes and added seven tackles and a sack. Meanwhile, Mitchell had a huge day, catching one pass for 11 yards. Maybe next time someone should think before he opens his mouth to start trash talking to a Pro Bowl caliber safety.

All in all, the Super Bowl was everything it always is: a display of high quality entertainment that all sports fans love. There always seems to be a little something for everyone when the Super Bowl rolls around - even if your team isn't playing in the game.

"When I planned my MSW, I planned on Temple".

"That's right–Temple. With the convenience of a central PA location, small classes, full library resources, internet access and individualized attention, Temple University Harrisburg offered everything I needed to complete my Master of Social Work degree".



Temple Harrisburg offers your choice of concentrations:
- Clinical Practice with Individuals, Families and Groups
- Management and Planning
- Practice with Communities and Policy Arenas

Whether you choose the main Harrisburg location, or satellite MSW programs in Huntington and Pottsville, you'll find all of Temple Harrisburg's classes are developed to meet the needs of working students, with classes held in the evening and on weekends.

Advanced standing program available for qualified applicants with a BSW degree.

Blowing things out of proportion since 2002

Matt Russell - that guy →

No pictures, please: It was insisted that if I put in staff pictures for all the other columns I had to put mine in as well. If I offend you this week, please pretend you still don't know what I look like. Much appreciated.

It'll be no Pheasant Lounge I'm sure: As per Kepple's response in "Presidential Perspective" (page 5), Good Hall will get a lounge in its basement when the theater people vacate upon completion of Halbritter. Science gets a new building, Theater gets a new building, and Humanities gets… a room back from Theater to have a lounge. That seems fair.

Where's my bat? (part 1) 1:40am: South fire alarm goes off. 1:50am: Alarm sounds for 30 seconds. 1:55-2:35am: Alarm sounds a few blasts every 90 seconds. By then we were ready to break it and take our chances with fires. Is it so hard to find the 'off' button?

Cheesy options: Ever notice that Baker's nacho cheese and mac & cheese taste pretty much identical? Yeah…

Grainy options: When was the last time you went to lunch or dinner at Baker and one (or two or three) of the options wasn't over rice? That's what I thought.

Where's my bat? (part 2) I felt compelled to investigate what was being done downstairs to turn off that cursed alarm. Try to picture this now. A member of the JCPD (no snickering) was standing alone in front of the control box with a finger pointed at it. Every time the alarm went off he would attack the box with his finger, repeatedly pressing a button until it turned off…. and did this every 90 seconds for well over half an hour. Nice solution.

Atkins options: Did you see that sign? "Low carb options can be assembled at the salad bar." They actually wrote it! I still think it would be fun to have a "fad diet" line in Baker.

Wasted time: I always hate it when I take the time to solve a puzzle and it turns out just being an advertisement for something really, really lame.

Random quote from a coworker out of context: "Oh, there's a fork in my hair. I'm gonna go eat some of this stuff."

Signature juvenile humor: You know your U drives are currently on a server called 'Saturn', right? Well, I recently had to name a new server and briefly considered naming it 'Uranus'. How much fun would the calls to the Help Desk be when people needed to connect to, access, or open it?

And really old, too: During the State of the Union, a friend didn't recognize teleprompters to the left and right of the President. He asked me, "What are those white things on either side of the President?" I quipped, "That would be the Vice President and Speaker."

and not going broke.

Do something Mexican!: Name your car. Many taxis, buses and trucks have names painted on the tops of their windshields. The names seem to fall into three categories: names of loved ones, statements of faith in God, or rough-and-tough sounding names. My favorite so far has been a garbage truck named *Cowslayer II*.

Classic Juniatian

From September 14, 1989 by Michele Miller

Juniata enrollment rises despite tuition increase

For the ninth year in a row, the price students pay to attend college has risen faster than the inflation rate, the College Board said.

Educators and other adult observers bemoaned the increases, yet generally thought the price of college remained affordable. Students, on the other hand, seemed to greet the news with more alarm.

"It's getting harder and harder. I know a lot of people who were very scared that they wouldn't be able to come back, "said Chris Victor, a sophomore from Juniata. [...]

Kent Halsted of Research Associates of Washington D.C. said that his 1988 study of college prices concluded that the tuition rates were about the same percentage of average American incomes – as they were two decades ago. Consequently, he said, college is still "a good buy."

"It's hard to make the case that most mid-to-lower-class students can't afford [college]," said Halstead. "Most increases are only about $100 a year. People can buy a portable radio for that price."

While such may be the case for most colleges and universities, Juniata College is not among this group. With tuition at $9,540 for the '88-'89 year, this year students are paying $10,600, constituting a $1,060 increase for the '89-'90 tuition. The Juniata College Board of Trustees Executive Committee also said that the amount of financial aid available to Juniata students will be increased by roughly 20%.

In relation to the increase in tuition, of the 70 students who withdrew from Juniata for the '89-'90 year, 14 listed financial reasons in general as the reason, according to Dawn Williams, assistant director of housing. The rise in tuition has not, however, affected the enrollment, as it rose from 1125 last year to 1137 people on campus this year. [...]

Students might as well get used to annual tuition increases of about six to seven percent in the foreseeable future, the ACE's Merkowitz said. "Tuitions have got to go up," commented Jennifer Lincoln, a sophomore, "but it would be nice if we knew what it is being used for."

From February 15, 1990 (no byline)

JC tuition hits $14,990

The Executive Board of the Juniata College Board of Trustees has unanimously voted for a tuition hike of 8.3 percent, raising the price tag of a Juniata education to $14,900 for the next academic year, announced John Deppen, student government president. [...]

The rate hike raises tuition from $13,840, said Scott Neff, assistant director of admissions at Juniata. The bill can be broken into three parts: tuition, $11,520; room, $1,640; board, $1,830.

Bill Alexander, vice president for financial affairs, deferred to comment on the new tuition rate until after Dr. Neff returned from Europe.

But Alexander would cite problems facing the budget.

"The difference in class size will result in a decrease in the number of students. We will have a few fewer students next year. Medical insurance rates are skyrocketing – they are for employers across the country – and utility costs and oil prices are also going up," Alexander said.

"We have many miles to go before we're going to balance next year's budget," Alexander said.

Senate members weren't happy about the tuition hike.

"I'm glad I'm graduating this year," said Misty Payne, student government secretary.

"I challenge the trustees to send a full, written justification of the tuition increase to The Juniatian for publication," said Kirk Almanshofer, student government treasurer. [...]

JUNIATIAN

HUNTINGDON, PENNSYLVANIA

FEBRUARY 24, 2005 | JUNIATA COLLEGE | VOLUME 86, ISSUE 8

Students balk at concert choice

Why did JAB select Pat McGee and Virginia Coalition?

Genna Welsh

Lately, students across campus have been dying to know who will perform at the upcoming JAB major concert. On February 11, they were given an answer: The Pat McGee Band and Virginia Coalition.

At the time of the announcement, however, student on-line voting for these two bands had totaled only 11 of all 516 votes. Now, those 97.8% of students who voted for Breaking Benjamin, Coheed & Cambria or any other bands on the ballot, are unsatisfied.

"I'm very upset with the result," said freshman Michael Zanic.

Senior Lauren Chappie's disapproval was even more adamant. "I'm boycotting this show," she said. Zanic and Chappie are just a few of the many students dissatisfied and frustrated with JAB's band selection.

With only 2.13% of the voting population choosing the selected acts, students began to ask whether the student vote was merely a facade. This year's voting, conducted for the first time on-line at the Arch forums, was popular, totaling over 180 posts on the thread, with 516 votes. Yet to many students, this vote seemed pointless.

"The fact that they had a poll and we could see the results made it feel like a slap in the face," said junior Michelle Schoonmaker, one of the many students who felt that the vote was useless.

Zanic agreed and suggested that JAB's decision was unilateral. "I felt like they were making their own selection regardless of what students want."

JAB, however, maintains its emphasis on student input. "We try to do what we hear people want," said Staci Weber, Director of Student Activities and JAB advisor. According to Weber, JAB recognizes the problems with on-line voting, and hopes to improve the method next year. "You live and learn. Next year's voting will be done differently," she said.

Weber said that in the future JAB hopes to give students more than one vote to determine which bands students would be most likely to attend. However, students would still be restricted to the list of bands JAB creates. "We are more concerned not with students' favorite bands, but in seeing, 'Of the following fifteen or so bands, which would you come and see?'" Weber said.

Students also felt JAB listed unobtainable bands on the ballot from the start, presenting false pretenses and heightening students' hopes. Like many students, Schoonmaker argued, "If bands couldn't have come, they shouldn't have been on the list. JAB should plan ahead, make offers to groups and then send the vote to students."

Concert chair Lyndsay Frye insists upon the feasibility of each band as a potential major concert act. "When the poll was posted, each band was a realistic option," Frye said.

Clicking for classes

New online course registration set to begin

Jasmine Frishkorn

With course pre-registration approaching on March 14, students should prepare for a new registration process. The upcoming registration period will be the first time all Juniata students will register for classes online, and the Registrar's Office is ready for reactions from students and faculty.

In the past, the Registrar's Office provided each student with a course packet that included forms for fall and spring course registration, drop/add, and a graduation checklist. Now registration is available online, and the remaining forms are available for students to print out and hand in as needed.

The new online registration process will require students to first visit the Registrar's website and look up class schedules. It is highly recommended that students select courses prior to the beginning of registration.

Class registration will be available on March 14, the first day students return from spring break. Juniors will begin registration first, followed by sophomores, then freshmen.

Students can access the registration portal by signing into the academic page of the Arch. Students who know exactly which classes they need to take will be able to use Express Registration. Express Registration allows students to enter the ID number of each course and number of credits to instantly preview their schedules. Students must click *submit* after adding all their courses in order to be entered into the College system.

Express Registration tempo-

Nagengast sets sights on Africa

Wants non-Western exposure for students

Mary Gardiner

When Dr. Emil Nagengast walked into the classroom on the first day of his new course, Contemporary African Politics this spring, he shocked the students. Juniata's European politics expert explained why he was offering the course.

"I just got bored. Europe's success has made it boring," said Nagengast.

Little did he know, his boredom had set him on a venture that would bring both learning and anxiety.

"I don't want anybody thinking I'm Mr. Africa," Nagengast said. "I'm doing this, even though it's not my area, as a desperate attempt to bring non-Western exposure to our students. Everyone recognizes that Juniata College doesn't have enough course offerings that cover other parts of the world."

With less than twice the enrollment of Juniata, nearby Dickinson College offers majors including East Asian studies, French and francophone studies, Italian studies, Judaic studies, Latin American studies and Russian area studies. Dickinson also employs 16 political science professors, over five times that of Juniata's three.

As Nagengast explained to the twenty-five person class, until recently, he had known just as little about Africa as the students.

"[The course] absorbed so much of my energy. Before the first day of the class, it was like I was cramming for a final. There's so much to learn," said Nagengast.

In his professed lack of knowledge about African history and politics, he sought out friends and students who could share

CIS funding: pros and cons

Gives clubs individual power but requires more from the students

Corinne Barabas

The new CIS funding process implemented by Student Government has created confusion, complaints and concerns for some students as to how well it is going to work and how reasonable it is.

On February 8, elections were held for CIS Senators and Allocations Board representatives. Attendance was very low at this meeting, suggesting that students either did not have the time for or do not care about the new policy.

Many students who participate in clubs feel that Student Goverment's new process is a good change because the old way was not as efficient and rational, yet others think it is a change for the worse.

"Many [current] treasurers had no intentions of being this involved with the Senate. They do not want the responsibilities of the Student Government officers and feel that it is not their job to decide how the club's money is dispersed and used," said Elliot Stillwater who is treasurer for two clubs on campus.

The CIS, or Common Interest Subcommittee, was approved by the Senate last fall with little opposition, as covered by the Juniatian. The process brings representatives from similar clubs into each CIS unit, which proposes a budget request to the Allocations Board and Senate.

The new system does offer more control for clubs to receive the funds that they request. However, it is going to require more work from the clubs' officers.

Angela Davidson, Psychology Club president said, "It will enable each club to justify their budget on a more personal level, increasing the chances that each club will get what they ask for."

Whereas, sophomore Karen Leonard, Chess Club president, said, "I like the idea of the new system, but I don't like the implementation. The idea is to cut out the middle man and give clubs more control over budgeting, but in doing so a new group of middle men is created. These middle men are the worst kind; they have a vested interest in their own clubs and groups instead of being completely impartial."

Student Government secretary Kelie Cummins said, "[Student Government] invited students to their last meeting to get different opinions from the different clubs on campus. We wanted to see what they thought about the idea. People weren't upset about it as much as they were simply vocalizing specific questions. The majority felt it would work fine."

"The reason for creating the new system was to give student clubs more of an opportunity to have more power in decisions and budgets. Each club is represented equally and will have a say in their own funding," Cummins explained.

There are eleven CIS groups. Two people from each CIS will be chosen to serve on the Allocations Board and to serve as a senator, respectively. The CIS senators will have Senate voting rights. The person serving on the Allocations Board is to be a treasurer from one of the clubs in that specific CIS.

The Allocations Board handles funding requests and various other duties. Mainly it will examine the budgets and decide how much money each CIS group will receive. A person cannot be an elected representative or treasurer in more than one club in one CIS.

President Carl Kihm said, "It is the first time doing this. We don't expect it to be perfect. We are however, taking a step in the right direction, and should see it improve over the next couple of years."

Junior Michelle Schoonmaker, co-president of AWOL, and member of the African American Student Alliance and various other groups on campus said, that her "biggest complaint is that it requires too much time. Students are required to attend extra meetings to discuss, create, present, and divide budgets. These meetings have to be coordinated with up to eleven different people's schedules, which is going to be extremely difficult."

Students with questions or concerns should contact Student Government.

Career Services: Guardian of futures

Liz Houts

As their final semester flies by, hundreds of seniors are frantic about finding jobs following graduation. Little do they know, dozens of helpful resources are right in front of them.

The Career Services Office, located in the basement of Ellis across from the Post Office, has been helping seniors take steps toward finding jobs for years.

Underclassmen, too, can take advantage of internship opportunities and job preparation through Career Services.

"I think the important thing for students to know is that these services are available to them, and for free," said Shirley Powell, Career Services Assistant. "We can't hand them a job, but we do all that we can to help them in their job search processes."

Seniors can create credential files, including résumés and letters of recommendation, which will be used for referral to potential employers. Office staff members proofread and critique the submitted résumés.

"It's nice to have another set of eyes to look over your résumé and cover letter subsequent to the professors in your department," said senior Andrew Hoffman. "Also, having your credentials on file with them just adds another resource for getting interviews."

When he comes across a promising job opportunity, Director of Career Services Dr. Darwin Kysor finds the students on file whose career interests match the job description. If he finds a match, he forwards the contents of the student's credential file to the employer.

The office also coordinates a number of on-campus recruiting opportunities. When an employer is planning a visit, students are encouraged to submit their résumés and sign up for interviews. Anxious seniors can also sign up in the office to attend any number of job fairs off-campus.

Another of Career Services's helpful tools is its frequent workshops for students. These include seminars on résumé and cover letter writing, graduate/professional school essay writing, graduate school planning, interviewing skills, job searching and more.

"We try to have the workshops several different times each semester so students can fit them into their schedules, but if they're not convenient, we can schedule a time to suit you," said Powell. "We know you have a lot going on, so we're pretty flexible."

Students are always welcome to schedule appointments with Kysor to discuss anything from career exploration to finding a job. One of the most popular meeting topics is internships. Kysor helps dozens of students coordinate internships at many locations.

Hannah Rauterkus / Juniatian

Director of Career Services Darwin Kysor helps junior Ashley Kuzar perfect her résumé.

By filling out a few simple forms and giving either a poster or an oral presentation, students can have their summer jobs listed on their transcripts as non-credit internships. This goes for any student, freshman through senior.

"If your summer job is at all related to your POE, you can most likely have it noted on your transcript," said Carolyn Wait, a Career Services student assistant.

Internships are powerful tools and wonderful résumé boosters when it comes time to look for a job, pointed out Powell. With internships under their belts, students are no longer the average entry-level job searchers; they have experience in their fields.

Students are encouraged to stop by the Career Services Of-

continued page 4

Instrumental programs hit crescendo

Music participation increasing despite lack of POE

Nate Drenner

When Dr. James Latten became a full-time professor of music at Juniata College, approximately 20 students participated in instrumental music groups.

That was in 2002. Today, approximately 90 students participate in the Music Department's wind symphony and five ensembles. And Juniata does not offer a music degree.

"Soon after I arrived, I noticed that the retention rate was getting higher and the attrition rate was getting lower. More students that were coming into the program seemed to be staying for more semesters," said Latten. Latten directs most instrumental ensembles. Each ensemble is offered for one academic credit in the fine arts distribution.

About seven percent of Juniata's total enrollment now participates in music groups. Latten claims that anything over three percent is superb.

Latten attributes this instrumental growth to several factors, most importantly the recruiting of new members and the retention of existing members.

"The first time I really considered it, I think, was when Dr. Latten called me. He called all of the incoming freshmen that had expressed an interest on their application and invited us to join," said freshman Aaron Shotts. Shotts plays trumpet in the wind symphony and jazz ensemble.

Jim Laughner

The alto saxophone section of the jazz ensemble practices in the Ballroom.

Freshman Dan Popernick, a member of the percussion and jazz ensembles, also cited recruitment as a reason for his involvement.

"They've done a lot more publicity, getting people to know that Juniata has ensembles, and that although we don't have a music [POE], there are some decent players here," said Popernick.

Senior Crystal Trinneer has witnessed the growth firsthand. A member of the wind symphony for four years, she recalled that the trumpet section only included three students during her sophomore year.

"We had to rely on outside community [members] who would come to a few of our rehearsals and our concert because we just didn't have the part covered," said Trinneer.

Since then, the trumpet section has grown to ten members – all Juniata College students. And some sections simply cannot accept more players, or the ensemble would lose balance.

Sinfonia, the College's sole string ensemble, has seen perhaps the most marked growth. This program recently celebrated its 100th anniversary but "has seen its share of ups and downs over the past century," according to Latten. The group is currently up to 15 string instrumentalists and has joined with winds and percussion to perform pieces for full orchestra.

"After playing music in junior high and senior high, I was compelled to continue my passion in college, and it seemed like the Sinfonia was a great way of doing that," said freshman violinist Jenny Liu.

The ensembles will perform at concerts in April. The jazz ensemble also has potential engagements lined up at the Altoona Curve and on the upcoming Huntingdon PRIDE telethon.

Now that they have built a significant, reliable base of players, Latten will concentrate more on developing the different groups' quality rather than start new instrumental ensembles.

The Sinfonia will be able to concentrate more on works by great music masters, and the jazz ensemble will start to emphasize improvisation techniques.

The wind symphony is the main instrumental group, but others can fluctuate over time. Participation in the Music Department's brass ensemble is actually declining, but the percussion ensemble, as a separate entity, grew out of a strong section in the wind symphony.

Sometimes, though, students take the initiative to form their own music groups, like the cello choir that performed last semester or the Musical Theatre Club. These types of programs are not offered as courses through the Music Department so that the main ensembles do not stretch too thinly.

"We don't wish to create so many groups [as courses], all of which would be sort of average and equally struggling for a full complement of musicians. Instead, we want to have the main concert ensembles and make them superior experiences," said Latten.

Latten and several students also emphasized that the music programs are sensitive to students' schedules in other academic programs, and those already in one or two ensembles simply would not have time for a third.

Currently, there is no formal audition process, but each instrumentalist plays for Latten so that he can determine their level of performance. Latten said, however, that developing quality could mean that some students will not be chosen to participate in the ensembles, or they will be in some but not all of the pieces performed.

"There are so many gradations of talent that you have to account for everybody," said Popernick of the music selection.

Musicians come to Juniata with a variety of backgrounds, from experience in competitive regional or even state bands to high school or beginner levels. About 40 percent of Juniata students who participated in high school music groups continue to perform at the college level.

Latten estimated that participation in the wind symphony and jazz ensembles are now about the same as other small liberal arts colleges.

Latten also noted that Juniata's percussion ensemble is now larger than some schools with music majors. But for a true comparison, "the difficulty is that we have to find schools like us that don't offer a major in music. Or a minor. There aren't that many of them," said Latten.

Jim Laughner

Junior Alison Earnhart tunes her tuba for the Wind Symphony.

Correction

The Juniatian regrets the following error in the Feb. 10 issue:

"New van service gets positive reviews," front page – The van service is sponsored by the Office of Student Activities, not JAB as reported.

1st place – Eli Finberg
2nd place – Alexis Donkin
3rd place – Angela Condor

'Twas the week before Break

Last-minute vacation options for the procrastinating student

Nicholas Carney

The bikinis were hung by the suitcases with care, in the hopes that midterms would no longer be there. The students nestled all snug in their beds, while visions of margaritas danced in their heads.

Spring break has long been a time for college students exhausted from half a semester of studying to take off to an exotic tropical destination, leaving their cares behind them. Most students with a measure of foresight booked their vacations in November, having ample time to both select the destination of their choice and save money for the trip.

Yet, for those who have no plans, there is still hope for a spring break that doesn't involve lounging on the nearest sofa.

Price-wise, tropical destinations during early to mid-March are prohibitively expensive for the average collegiate budget. One week at the Hyatt Beach Resort, in San Juan, Puerto Rico, for example, will cost an astounding $4953 (Expedia.com) including airfare. Those students not wishing to lake out a loan for their spring break will find that there are a number of excellent travel options for the time-constrained and budget-minded.

Domestic destinations, like Virginia Beach, are generally a very cheap alternative to more exotic locales and can be reached by car or train. When traveling domestically, much less planning is needed, and trips can be put together at the last minute.

For foreign travel, Education First, or EF, the world-renowned student travel company, offers inexpensive trips to Europe, Central America, and Oceania—starting at around $600. Their packages include airfare, accommodation, meals and even a bilingual tour guide. The downside is that when booking close to the departure date, EF will charge a $95 late-processing fee.

Hotel and motel room rates are negotiable, and, despite the promises of Internet companies, calling the hotel directly usually offers the best chance for getting a high quality room at an economic price. Booking companies often add on extra commissions and fees, whereas the hotel's reservation service does not. Websites can offer insights into room availability, but their value as a money saving tool is limited.

Online booking may not be the best option for accommodations, but airfare is another story. Most travel websites, like Travelocity, offer last-minute deals at drastically lowered prices. The last-minute deals go on sale 14 days prior to departure, and the popular destinations fill up quickly.

When booking a flight, however, travelers should try calling the airline directly too. Sometimes the airlines can offer better deals than those posted on the Internet.

Last-minute spring break vacationers should keep a few tips in mind:

- Try to travel domestic. It's lighter on the wallet and easier to plan.
- Call hotels/airlines directly; they can usually offer the best deals.
- Try alternative accommodations, like staying in hostels and camping.
- Mention student status; most companies will honor a discount.
- Call local, state and national government travel commissions. They are there to help.
- If traveling internationally, ensure all paperwork is in order (passports, visas, etc.).
- Have fun, and wear plenty of sunscreen!

Online course registration

continued from page 1

rarily saves the students spots in the registration process. However, students must meet with their program and general advisors to review the courses they have chosen and finish registration.

"We want to increase the discussion students have with advisors. Advisors are here to help and guide, and by registering online, students can get more than a signature," said registrar Athena Frederick.

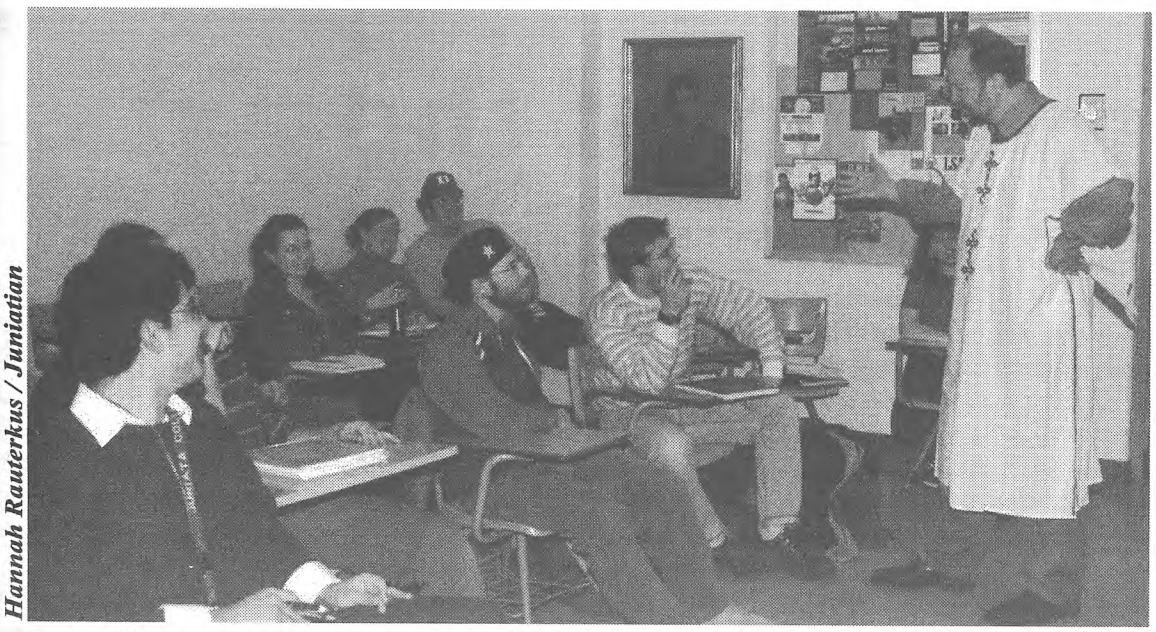
If an advisor disagrees or suggests another class, he or she is able to drop and add courses for the advisee. Once the student and advisors agree on the schedule, both advisors must click *yes* on the schedule preview screen that is available only to faculty. Students will not be registered for classes until both advisors approve the schedules online.

If students have not looked up courses prior to registration, they will be able to sign in on the Arch and look up classes and then register at that time. This may sound like it would involve a greater time commitment from students, but the new system allows students to search for classes by time, subject, and instructor.

Students will also be able to view the number of seats available in each class, helping to avoid waitlists. Students will receive a messages online when entering classes explaining if the courses have been temporarily added to their schedules, if they are waitlisted, or if they don't meet pre-requisites.

Frederick said, "The online registration will hopefully save students and faculty time and money with the need for less paper." The online process will require students to be prepared. It is still a first-come first-served basis, but the sooner students enter their classes online to hold their spots the sooner students can meet with advisors and be registered. This is of course a new system, and there will be kinks that will need to be worked out.

If students have any questions before or during the registration period, first check the Registrar's website and then contact Athena Frederick in the Registrar's Office.



Career Services

continued from page 2

fice to peruse the library of career reference books, dig through the internship listing files, pick up a handbook on any number of career-finding necessities, or just to chat with the friendly staff anytime.

But the time for upcoming Juniata graduates to visit the Career Services office and utilize its staff's expertise and helpfulness is now.

"Just don't walk in for the first time in the first week of May," laughed Powell. "The job search process takes longer than that, and by that time, we're just as stressed as you!"

Hannah Rauterkus / Juniatian

Dr. Emil Nagengast puts on a non-Western look for his new Africa course.

Nagengast sets sights on Africa

continued from page 1

their expertise on the continent. He delegated friend and former advisee Wossie Mazengia from Ethiopia and colleague Dr. Buba Misawa from Washington & Jefferson College to teach classes. He also asked Juniata visiting language instructor Rebecca Ngo Yana and professors Andy Murray and Dave Sowell for input.

He has also recruited students, such as Mike Powers and myself to teach class sessions.

Several students appreciated the new course saying that their quest for broader horizons led them to enroll.

"I decided to take the class because it's a part of the world I don't know about. If I want to know about the world, I have to know about the whole world," said sophomore J. P. Melle.

The three credit course covers issues like the slave trade, colonialism, imperialism and the optimism of de-colonization. It also reviews the history and troubles of the Democratic Republic of the Congo (former Zaire), Rwanda, South Africa and Darfur. But that's not all.

As an extension of the course, Nagengast will take Juniata students to West Africa's Senegal and Gambia this May.

Students will visit Senegal's capital Dakar, an historic trade gateway, and a major African port. The city is covered with pristine beaches, bustling markets and galleries.

Students will reside in the capital of Gambia, Banjul, for the majority of the trip. Banjul is an island city in the middle of the Gambia River. Surrounding Banjul are more beaches, resorts and markets. Nagengast even noted that he believes the trip may be too much of a lavish vacation.

The trip is coordinated with Buba Misawa, a Nigerian professor, who takes students from the University of Pittsburgh and Washington & Jefferson College to Senegal and Gambia every January. He is offering the May trip to accommodate Juniatians.

The trip is open to all students. Nagengast hopes that it will perhaps join the current repertoire of annual summer study abroad programs. This trip will be worth three credits for three weeks in late May and early June. Interested students should contact Nagengast.

Nagengast also hopes to work with the Center for International Education to implement a semester-long study abroad program in Sub-Saharan Africa.

"I really want to have a way to get Juniatians to Africa," urged Nagengast.

Nagengast's biggest concern, however, is that he cannot do enough to bring non-Western exposure to campus. "What am I going to do next year, teach Indian Politics?" he asked.

Instead of Indian Politics, Dr. Nagengast will teach African Politics again next spring. He strongly insisted that more students know about the world outside of Europe.

Nagengast stressed the point. "We desperately need someone who can bring more regional diversity to international studies at JC."

For now, this will have to do.

Students balk: concert

continued from page 1

In response to students' suggestions, JAB major concert co-chair Nate Capp indicated it is impossible to obtain a commitment from bands prior to the student vote. Consequently, too many bookings can occur, and as a result bands will not want to deal with Juniata in the future. "Their managers will not hold dates just in case a venue wants them. We can only give offers to bands one at a time," Capp explained.

Capp also feels that students should have considered the possibility that some listed bands may turn down JAB's offers. Capp said, "I'm sorry that so many had their hopes up for Breaking Benjamin, but you must have known that just because they were on a list of possible bands that they weren't guaranteed to come."

Criticism of JAB's accountability also arose after the announcement. Many students disappointed with selected bands feel JAB's lack of preparation is to blame. Some suggest that JAB plans further ahead for concerts. Zanic said, "Maybe next year JAB could plan this vote a year in advance."

According to Capp, JAB has recently undergone leadership changes and added a concert in the fall, which slowed major concert preparations in the spring. He explained, "It is true that JAB has done concert preparations in the first semester, but this year was different because we had new leadership and had to adjust to that. Also, we brought another concert in the fall semester."

But, in an effort to further please students, JAB has one more suggestion. If students are still dissatisfied with JAB decisions, they are encouraged to become members of JAB. In addition to JAB President Nicole Lewis, Conrad and Capp, Frye also invites students to participate. "I encourage you to join JAB next year if you would like to have personal input regarding who comes to campus for the major concert." JAB meetings are held Tuesdays at 8 p.m. in the Rockwell Seminar Room in von Liebig Center for Science.

Students, however, cite lack of time as a deterrent and wonder if this does not simply prove their case that you must first be a JAB member for your concert opinion to matter.

Despite the student dissatisfaction, Frye has decided to emphasize the positives. "I have come to realize that you're never going to be able to please everyone. Keep in mind that a lot of students put a lot of time and energy into making this show happen. I hope you will all come support JAB, your friends and classmates who will make this show happen, and the bands!"

To major concert co-chair Ryan Conrad, the entire concert experience is an opportunity for campus-wide learning, "It really embodies the college motto [Think. Evolve. Act.] and shows what Juniata is all about."

Juniata's underdog of the arts

The arts at Juniata are growing, but where does music fit in?

Nate Drenner

Every day I notice the renovations turning Oller Hall into the Halbritter Performing Arts Center (HPAC). Living on the corner of the Cloister wing, the HPAC skeleton is forming right outside my window.

And much well-deserved ado has been made about the resulting growth of Juniata College Theatre. A professional theatre company and renewed theatre POEs highlight the HPAC. (See the related article on page 7.)

Yet performing arts as a whole is not limited to theatre.

Enter the Music Department, until now relegated to Swigart Hall, the white house on the corner of 19th and Moore Streets.

I originally spoke with Dr. Latten regarding the growth of instrumental music programs (see page 3). This article spawned a new tangent, however, when considering where this growth, the already well-known vocal ensembles, and the HPAC could take the Music Department.

It seemed to me that, if Juniata can confer degrees in studio art and now theatre, music is the next logical place for academic growth in the renewed commitment to the arts that Halbritter represents.

But the Halbritter building itself receives mixed reviews when concerning music.

One of the biggest benefits is the addition of a climate-controlled room with lockers for storing musical instruments. Currently, instruments are stored in a corner of the Ballroom.

That's almost where it ends. After HPAC construction is complete, instrumental groups will use the auditorium stage as their main practice room. The choir will remain in the Cream Room because scheduling one space among the Music Department ensembles themselves, not to mention the public events that normally inhabit Oller, will be nearly impossible.

Music offices and classrooms will remain in their current location, Swigart Hall.

While that is probably a less than ideal scenario for music, it is not without benefit. If little else, Halbritter serves for music students and prospective students as a symbol of commitment to the arts.

"It'll be our building instead of coming up to the Ballroom [for rehearsals]. It's going to boost morale," said senior Crystal Trinneer.

Freshman Aaron Shotts said, "It'll be nice because we'll have a real place to practice and perform. Right now we're up in the Ballroom, kind of crammed in the corner, and the lights are pretty bad up there."

Shotts and Trinneer are both members of the wind symphony and jazz ensemble. Admittedly, I haven't spoken with members of the choir about their practice space, but one wonders how 50 people can adequately rehearse in the tiny Cream Room.

But let's talk about intellectual, not just physical growth.

Juniata values interdisciplinary study. That is apparent in the new Interdisciplinary Colloquium that is replacing Cultural Analysis I, as well as the very nature of the individualized POE itself as opposed to a traditional major system. And it is more than notable that so many Juniata students choose to participate in vocal and instrumental groups outside their studies in, say, biol-

Students, faculty, staff, alumni: send your letters to juniatian@juniata.edu. We print all letters to the editor that are of interest to the campus community – in response to one of our articles or on a completely separate topic – so start typing! If you're lucky, we might even print a response. Please try to limit letters to about 300 words, and note that longer submissions may be edited due to available space. Opinions expressed on the commentary pages are not necessarily those of the Juniatian.

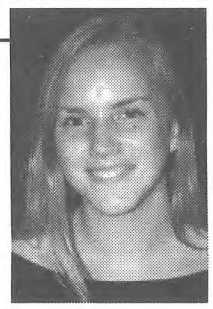
Presidential Perspective

"Looking into the future, what areas on campus are most important for the next capital campaign to cover?"

Unlike the current campaign, where we had a near consensus on campus projects: science building on campus and at Raystown; performing arts space; renovation of the south wing of Brumbaugh; fields for soccer, field hockey and softball, and renovation of Founders, there is less consensus today about what is next.

Some likely candidates are ongoing work at Founders, Brumbaugh and Good; expansion of the library; and facilities for the studio arts. Once the current campaign is over in June, we begin with a new strategic planning process that will develop the priorities for the next campaign. Donor interest will also create opportunities and increasing the endowment will probably be the largest target. Stay tuned, and please do send me suggestions for the strategic planning committee's review.

"How will the Oller Hall renovations affect graduation? Will the commencement ceremony be held in Oller, on Oller Lawn, or at another location?"



Dean Clarkson has consulted with the senior class officers and the decision is to do graduation in front of Halbritter (Oller), weather permitting. By graduation, the front of Halbritter will be completed. The theatre expansion will not be done, but it should be well enough along to not take away from the graduation experience.

President Kepple wants to hear from you! *He uses this space to answer any college-related question from the campus community. Simply e-mail your question to juniatian@juniata.edu, and the editors will forward it* ***anonymously*** *to Dr. Kepple.*

Apathy is lethal:

Opportunities on campus

Mary Gardiner

In our second week of French class, Monsieur Henderson produced a world map in an effort to teach his students how to say different nationalities in French. Japonais for Japanese, Polonais for Polish, Russe for Russian.

So we did an exercise. Who is from Japan? Noriko. Who is from Poland? Magda. Who is from Russia? Olga.

But when we moved on to the exercise concerning professors, there were barely any to name. We came up with Dr. Wang from China, Dr. Jaeger and Dr. Kipphan from Germany, Dr. Nieto from Spain, and Dr. Ochiai from Japan.

Why such an unvarying bunch? Last time *I* checked, this was a liberal arts school, where diversity is the necessary precondition for our worldly knowledge. As a matter of fact, I find that the students who are abroad are more engaged than the professors are, at least, taken as a whole.

But I'm looking for Dr. Wang to tell us what it was like in Communist China. And I'm hoping for some new professors from Nicaragua to talk about the strife there. Or from the Balkans. Or from India.

Something else caught my mind in the process of thinking about the international presence. We have no one from sub-Saharan Africa. Can you believe that? Some mention visiting French professor Rebecca Ngo Yana's Cameroonian roots, but she is, nevertheless, a French citizen.

Some might respond to this column saying that I am being too demanding. Of course, I recognize that professors from India can find jobs elsewhere—I have asked Xinli Wang numerous times why he is here instead of anywhere else he could find a job. But I think it is Juniata's responsibility to offer the incentive to interested international faculty.

Why? Because as I looked for a subject for this column, all I found were the same students, going to the same dinners. When I asked friends and faculty, "Anything new in the international realm of Juniata?" there are blanks across the board. Of course, I highly respect and admire the students who organize Eid, or who teach Arabic (see the Juniatian's next issue for more information about Arabic classes). But our classes need to include that spirit, too.

I fear that here at Juniata, diversity and multicultural awareness is like a hobby, something to keep aside, to keep in the corner until it's useful again, much like the flags that miraculously show up just as prospective students visit.

I think this is something we need to develop. If we are going to make a commitment to diversity, we need it in our extra-curriculars *and* in our academics.

"Standing Stone" covers new ground

New theatre production shows promise of growing theatre department

Carolyn Keller

It's all about connections.

As sophomore stage manager Moyra Mauger said, "We all have connections with certain places, even if we can't put words to it."

On February 24 through 26 in Oller Hall, Juniata Theatre and the Gravity Project will present their first production to the Juniata community. Called "Standing Stone," the play delves into what it means to belong to a particular place, what one associates with the place where they spent their childhood, and how history plays a role in a person's development.

The play's plot centers on a landscape painter who returns from out West after his father dies, in order to collect his inheritance. When he returns, he finds he has a greater connection than he thought with the place he called home.

"It's an entirely different feel from anything we've ever done," said Juniata Professor of Theatre Andrew Belser. Belser, known for his more abstract work, joked that "Standing Stone" is also different because it has an actual narrative.

But "Standing Stone" not only boasts the presence of a plotline, it also introduces audience members to the unique collaborative effort between students and professional artists, the latter of whom hope to perform the piece on tour.

Students will still perform the play for its Juniata run. Students also collaborated with Belser to create the play, which Belser says had great effect on the work ethic of those involved.

Over the course of a year, Belser, who is also directing, developed Standing Stone's basic plotline and collected ideas for the production from books, poetry and song. The cast then gathered with Belser to bring their own perspectives to "Standing Stone." Using his ideas as a guide, students meditated on what it means to feel connected to a particular place. They then integrated their conclusions into the play.

The fact that the play "will have a professional life" after it debuts at Juniata served as inspiration for students working on the production, said Belser. He stated that, though students working in theatre have always been dedicated, "Now it's real to them. They behave differently when they know there's a lot riding on it. They rise to the challenge."

The prospect of creating a work of art that will last long after graduation is not the only energizing factor for students involved in Juniata theatre. Beyond the pending completion of Halbritter, a new wave of freshmen has brought new energy as well. In "Standing Stone," seven of ten cast members are freshmen, and the production's technical crew consists primarily of underclassmen.

Their dedication speaks volumes. The cast and crew of "Standing Stone" returned one week before the start of classes to begin work on the play. Since then, all involved have devoted four hours every night and at least five hours on Saturdays to the production.

"Theatre is just as important as any kind of sport," says Mauger. "I don't think [the uninitiated] realize the time commitment."

Members of the Gravity Project have also brought new life to "Standing Stone," which features shadow puppetry and digital projections. New York-based puppeteer Stephen Kaplin taught four Juniata students on the intricacies of puppetry. Kaplin, who worked as a puppeteer for the Broadway musical "The Lion King," provides just one exciting example of how the Gravity Project will be connecting professionals with Juniata students.

In the future, more artists will come to Juniata to help with productions, the emerging Theatre Performance and Performance Art Management POEs, and to provide a network of contacts for students who want to make their ways in the world of theatre.

Yet theatre also connects to those who don't necessarily plan to pursue it as a profession. As Mauger said, "Theatre is just important in life and how you present yourself." Theatre allows the audience connect with each other, and helps individuals connect with themselves.

WKVR's shows have captive audience

Holly Brown

WKVR's DJs count on friends and music lovers around campus to tune in each week. But as the radio waves travel across sleepy Huntingdon, they find a dedicated, and perhaps unexpected, audience: the prisoners.

Students and faculty members tune into radio shows to relax, share their music tastes and have fun. But each week as the WKVR mail is posted, it's clear that Huntingdon's incarcerated citizens are also listening.

Sophomore Sarah Kotora's show "Metal Chix" gets most of the mail: an average of 10 to 20 letters from prisoners each week. The letter content is as varied as their authors' sentences.

"We get photos, poetry, and drawings pretty regularly from the prisoners," she said. "Most of them are, have been, or plan to be tattoo artists, so I have gotten some tattoo designs from them. I have made a scrapbook of letters from the prisoners and artwork from them."

Because Kotora and the other DJs receive so much feedback, they often cater to their rapt audience.

"We tend to aim our show at them, as in playing all of their requests and answering their appropriate questions on air" said Kotora.

The appropriateness of the letters is often an issue, as in the case of "The Jump Off" show on Sunday evenings. Junior LaTeya Foxx and her co-DJ, senior Denique Conner get a variety of letters, some of them a bit too personal.

"Some prisoners send sexually-oriented letters and some send very intellectual letters," Foxx said. "They also send pictures of themselves in prison."

Foxx and Conner don't normally respond to letters, although they have sent Christmas cards. Usually they acknowledge the letters and requests on air.

"I guess I don't really have the time to write. And I definitely don't want to encourage sexual interest," said Foxx.

Of course, prisoners aren't the only listeners. With the live streaming radio available online (http://clubs.juniata.edu/wkvr/) WKVR is able to reach a wider audience. Friends and family from outside the area can tune in any time.

But the unexpected audience does make things fun.

Sophomores Claire Fultz, Charlie Foster and Reid Smith run the "PES" show on Sunday nights. They receive letters from two regular listeners who they acknowledge on the air. Because of this, the two prisoners met and befriended one another.

"I love that our show brought two people together. It makes me happy," said Fultz.

Hannah Rauterkus / Juniatian

Senior Chris Brookhart (Brooky) helps his Huntingdon listeners pass the time.

One of these regular listeners is a prisoner who calls himself "Crust." Crust writes in each week to request music, praise the "PES" show and write about his life. He's also sent in artwork that includes a "PES" logo.

Like many of the prisoners, he claims to look forward to his show of choice all week.

"Love that stuff, love that stuff, words don't carry weight like this," he wrote. "I'd be sick as (expletive) if I missed those songs that you played for me!"

Streaming feed and new hours are helping WKVR reach more people. But it appears their biggest audience will continue to be the most captive one.

Vagina Monologues return to Juniata

Holly Brown

"The Vagina Monologues" returned to Juniata for a second year of drama, charity and red boas. After a successful run in 2004, the performance piece graced campus last week with a new cast and a few surprises.

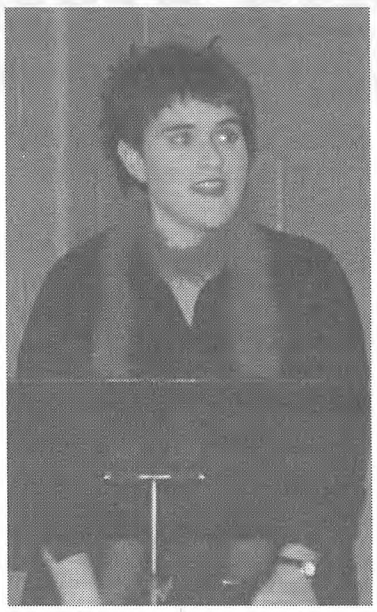
Last year's crowd pleaser was matched with three evening performances and over 450 guests. This year's production was managed by senior Denise Showalter and its directors, sophomore Lisa Detweiler and senior Alcione Frederick.

Besides the new leaders and cast, five brand new monologues were performed and more merchandise brought in.

Lipgloss, purses, lollipops, bejeweled pens, bath bubbles and condoms were all on the table, further supporting the "openness" aspect of the show.

But these novelties are not a money making scheme. About 90% of the profits are donated to the Huntingdon House. The other 10% goes to the V-Day organization.

This tremendous donation is all part of the "Vagina Monologue's" purpose: to support women and raise awareness about abuse. These motives were fully embraced by all involved.



"Women being able to talk about their bodies is really a defining part of who they are," said senior and cast member Anne Laird. "Women aren't objects. They have thoughts and feelings, and it's harder to abuse someone you see as human."

In addition to raising awareness on violence towards women, the show has a specific candor as well.

"I think some of it is women standing up and saying it's okay for us to be sexual and who we are," said senior Alaina Cominskie, also a cast member.

The cast members read 23 monologues, either individually or in a group chorus. The topics ranged from abuse to sex and childbirth.

Audience members were enthralled. They laughed uproariously at Alison Earnhart's "The Flood", listened tensely to Amie Park's "The Braid" and

Jennifer Hess delivered the second monologue.

gave Denique Conner a standing ovation for "The Woman Who Loved to Make Vaginas Happy," a skit made popular last year by Detweiler.

At the end of Tuesday's performance, Frederick was named this year's Vagina Warrior. The award recognizes achievement in bringing women's issues to light. Frederick is co-president of Juniata's Women's Group as well as the African American Student Alliance. The award was also given to Daniel Cook-Huffman on Thursday, and to Tanya Hartman, Huntingdon House's sexual assault counselor, on Friday, the show's closing night.

Although the subject matter can cause some to be squeamish, most audience members understand the production's frankness. With the increase in attendance this year, it's obvious that not many were put off by the nature of the show, or the more risqué advertisements for it.

Sophomore Charlie Foster felt the frankness is justified. "I feel that announcements need to be loud and catch people's attention, because advertising on campus is very limited and difficult as it is," he said.

Senior Nate Freitag disagreed. He felt that the extreme nature of the advertisement might have stopped some from coming.

"Yes, I know that the "shock factor" is a goal of the event, but I am one person who finds himself distanced from the event because of the apparent radical nature of the VM's. If the advertisements were a little bit more appropriate I think that more people would attend," said Freitag.

The Monologues ended on a high note, bringing in well over last year's $1200 raised. With the increased support from the campus and community, it seems the Vagina Monologues are here to stay at Juniata.

Juniata at center of world's best fishing

Brit Tew

Juniata often boasts of its science programs, its communal campus, and a variety of other unique opportunities. One of the school's bigger secrets is the plethora of first class trout streams that surround our campus. Central Pennsylvania has been dubbed by some as the "Mecca of trout fishing" in the United States.

There is no better way to relieve stress from school, work or social life than standing in the middle of a cool stream battling with some of nature's most beautiful creatures. The Little Juniata River as well as nearby Spruce and Spring Creeks are considered some of the best trout fishing on the east coast.

And aside from fly fishing for trout, there are many locations where one can fish for larger freshwater fish such as musky, walleye, or striped bass, among others. Most of these fish can be found in Raystown Lake, the Raystown Spillway and the Big Juniata River.

The current fishing conditions are a little slow due to the cold weather, but some fish are still biting. According to several local fishermen and the game warden, the walleye are still running strong below the Raystown Dam and in the Big Juniata River.

If looking to catch walleye, use a small shiner or fat head minnow. Live minnows are the best bait for walleye at this time. Live bait often catches more fish, but other small grubs and jigs also work well. Small nymph flies, small colored worms and small streamers are all recommended flies to use this time of year.

Trout fishing in the surrounding streams is relatively good at this point in the season. For the dry fly practitioner, winter afternoons are best for midge hatches. A midge is a tiny insect that hatches from the water. The fish will eat the bug as it is hatching on the surface, or floating just after hatching. A "dry fly" is a fly that resembles a bug floating on the surface of the water, as opposed to a wet fly that would resemble a minnow or nymph. The best fly shops nearby that provide an excellent variety of tackle are in State College.

Before fishing anywhere you must purchase a fishing license. In-state resident licenses cost around $25 and out-of-state licenses cost $52.

Don't make the mistake of thinking it would be easy to fish without a license at Raystown because you will get caught. The fine for fishing without a license is around $140. All proceeds from fishing licenses and fines support all of the streams in PA.

Remember that college isn't always about class, and it isn't all about parties. Take some time to relax, whether it is wading in the middle of a trout stream, or battling a 40 pound musky in Raystown Lake. There is so much excellent fishing right in Juniata's backyard. Take advantage of it.

Eagles Abroad: Redefine "home"

Jay Trovato

You won't be abroad for long before your thoughts turn toward the people you left behind at home. The problem is, you won't be able to go home for a weekend or a holiday to cure your homesickness like you can at Juniata. So you need to learn to use homesickness constructively to immerse yourself in your host country, rather than allowing the "I miss you" blues to drag your spirits down.

Homesickness works two ways: you'll miss people back home, and the people there will miss you. The tug-of-war can be especially potent if you have strong ties with your family, friends, significant other or all of the above. Homesickness can also go hand-in-hand with the phenomenon of "culture shock" – an emotional one-two punch that can send you reeling if you don't fight back.

Particularly disconcerting is the sensation that life is going on without you. You will continue getting e-mails from Juniata about cool speakers, concerts and other events that you won't be able to attend. Closer to home, you will get news from your family and friends about what's going on at home, and you'll feel out-of-the-loop. This kind of homesickness frustrated me last semester, because my family was having some difficulties, and apart from e-mails, phone calls and prayers, I wasn't able to help much.

So what can you do with your homesickness? One thing is very important: don't implode. Dwelling on your troubled thoughts will only make them worse. Also, please don't freak out and call your parents telling them how much you hate being abroad and how you want to come home right this second. It is an emotion; it will pass!

There are better ways to deal with your feelings. For starters, buy a journal to vent about your experiences, and bring lots of pictures of your loved ones. Beyond those obvious things, the key to fighting homesickness

continued page 11

The facebook: better than Stalkernet

Juniata missing out on nation-wide college network

Meredith Pink

I'll admit. I'm one of those people who incessantly checks away messages and profiles. I have little-old-nosey-lady tendencies, and I have a desperate need to stay within arms length of the Instant Messenger.

Am I alone in my quest for information and connection? No way! Hence the explosive popularity of Instant Messenger, chat rooms and now, the Facebook.

Over winter break there was an inescapable buzz in the air. My conversations with friends surrounded one thing: www.thefacebook.com.

Thefacebook.com was the brain child of Mark Zuckerberg, an undergraduate from Harvard University. He created this site over a year ago as a way to network colleges across the country. The site operates much like www.friendster.com but requires that members have college e-mail accounts.

The Facebook is a network comprised of 1.5 million student members from over 300 colleges. It's growing fast, but Juniata students can't take advantage of it – yet.

The site adds schools based on the number of requests they receive. People can make a request for their school at www.thefacebook.com/contact.php and submit necessary information at www.the facebook.com/newschool.php.

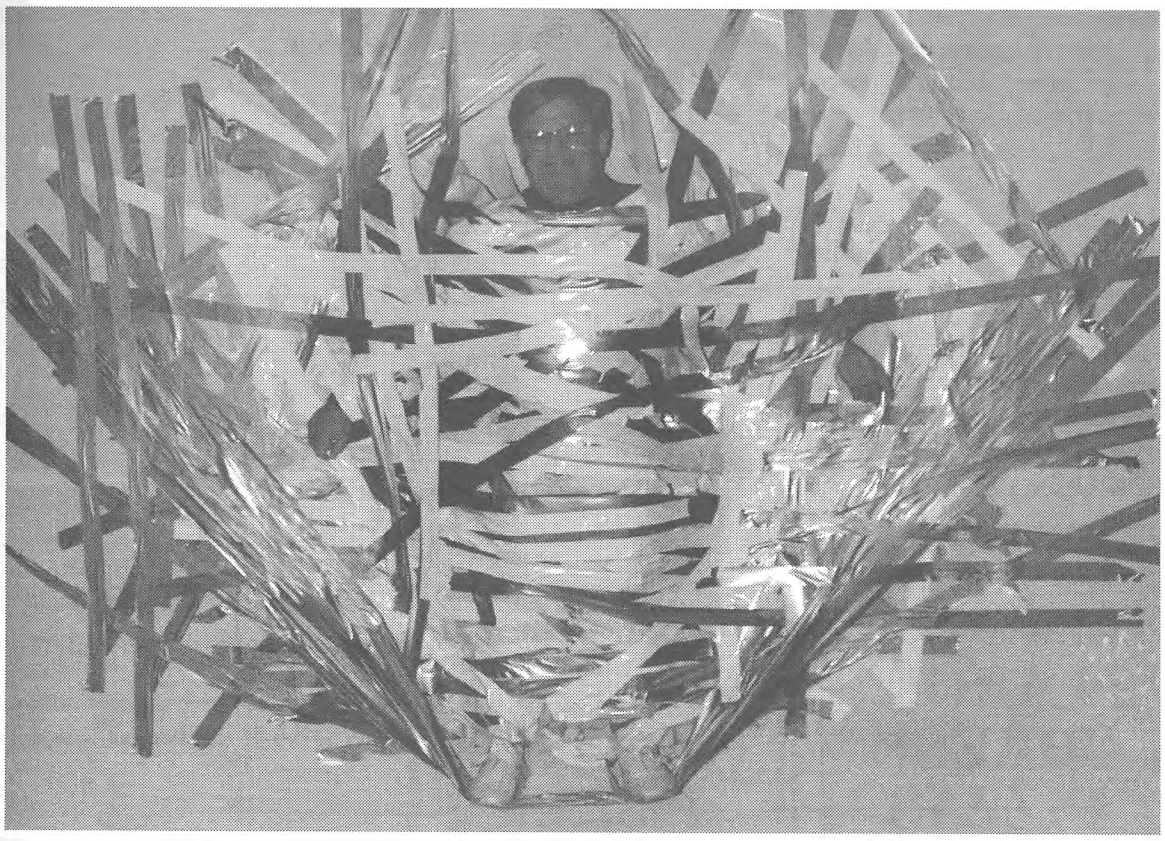
Students create profiles based on friends, photos, class schedules and activities, among other categories They can also join a wide variety of special interest groups spanning from "art history" to "addicted to tanning." It is Juniata's intranet directory multiplied by one hundred.

Staying connected with your friends has never been so easy. They are a mere point and click away. Letters, long distance phone calls and wondering what happened to your fourth-grade confidant are things of the past.

Margaret McShane, a junior from St. Louis University, admits to being "obsessed" with the Facebook. "My friends and I have a great time looking people up. I think of it as staying in touch, not stalking," she said.

As in life, the Facebook's highlight is friends. People can control who is and is not added to their own friend lists. Prospective friends send requests. Then users can accept or decline those people. This is a way for users to control who has access to their profiles. Only friends can view each others' profiles.

But some argue that the facebook is a mere flash in the pan or a waste of time all together.



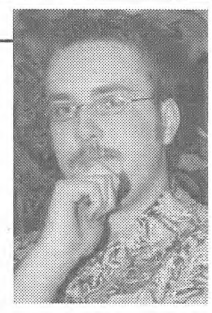
Victoria DeMaria, junior from Kansas University said, "I look at the Facebook as a fad. It's like the LiveStrong bracelets, side ponytails, Michael Jackson and long jean shorts. These things can only be popular for so long until people get bored and need something more."

Allison Krebs, a junior at University of New Hampshire cited different problems. "I think the Facebook is a giant stalker network. I also think it is a huge waste of time and it makes people antisocial," she said.

I always say, "If you don't like it, don't use it." Though some call the Facebook a fad, the same was probably said for amazon.com or eBay. These sites were revolutionary, and today are worth millions.

Juniata junior Angela Davidson said, "I have explored the Facebook a lot with my friends and it is awesome. I love looking at people's profiles and seeing who their friends are. Juniata needs to have the facebook!"

The facebook.com captivates and links college students across the country. All that's left is for it to find its way to Huntingdon.



Hannah Rauterkus / Juniatian

One more use for duct tape...

No--students didn't storm Founders to take President Kepple hostage to negotiate tuition. Habitat for Humanity members convinced Juniata's leader to allow students to duct tape him to the wall of the Kennedy Sports & Rec Center during a home volleyball match in order to raise funds for charity.

The Bookmarkables

Nathan Thompson

We're all easily amused to some degree. In fact, this campus tends to be very easily amused. Want proof? Try explaining Storming of the Arch, Mountain Day or Madrigal camping to friends from other colleges.

To go a step further, I'd bet that many students on campus have wasted at least one uninterrupted hour looking at fonts. How many people on your buddy list still use Times New Roman? If you're one of them, let me clue you in. The rest of us find that particular font to illustrate a dull personality. The same goes for using it to make a sign, flyer or other form of printed club publicity. Jeepers people, be a little more creative than a default font!

Of course, there may be times when you can't find that right font. That's why www.dafont.com is so handy.

Dafont.com currently boasts over 4,500 free downloadable fonts. It breaks the fonts into over 80 separate categories such as "Famous: Movies" or "Wingdings: Sexy" to make the navigation easy. And what could possibly be cooler than printing up your own name in the Walt Disney font?

Then again, nothing says more of the easily amused college male than printing up your roommate's name in an extremely risqué font. My roommate found such a printout taped to his monitor. Its appearance while I was researching the site was coincidental, I swear.

Dafont.com also has links to 25 other font sites. If you can't find the perfect font on those font sites either, there are 6,000 commercial fonts on Dafont.com. Of course, you'll laugh at the website when it asks you to buy them for $22 each. If you really feel the need to waste some money, you can also download several $30 font creation tools.

If you suffer from font fetish and refuse to find a shrink, check out the Dafont.com forums. Here, people talk about fonts with intense passion. It makes me want to give what little bit of a life I have to these poor souls.

Dafont.com is a French website, so you'll have to click on the English translation or type in www.dafont.com/en. To install the fonts, you need to take them out of the zip files and move them to the windows/fonts folder.

Unfortunately, there are some issues with using fonts from the web. Most don't include accented letters in their package. Some fonts don't provide numbers or capitalized letters. Also, you can only use the fonts on the computers on which they are installed. This makes trying to view the font in a computer lab a problem.

Despite the limitations of non-universal fonts, their coolness factor still makes Dafont.com a bookmarkable. When it comes to publicity or just general amusement, nothing beats a little downloaded creativity. Fool around with some of these fonts and you'll agree.

Collegiate Dementia

When having a battle of wits, watch how you sharpen your sword

Carolyn Keller

A few years ago, two of my roommates gave me a keychain that says, "I refuse to have a battle of wits with an unarmed person." This is a mantra I live by. However, as all of you know, there are exceptions to every rule. Circumstances sometimes arise in which it becomes necessary for wisecrackers to drop the greatest "Thou Shalt Not" of all…and just take a potshot at the "special" folk.

You know, like Dubya.

Wait! I know. You've heard the jokes ad nausea by now. Bush …he's not the brightest bulb in the bunch, crayon in the box, *son* in the solar system. It's old. I feel your pain. But I can understand the need to mock too. After all, while the pen might be mightier than the sword, the budget for defense trumps my savings account any day of the week…ever. It's only natural to want to poke fun. One might even call it justice.

And speaking of justice, every once in awhile, the karma gods like to remind us all that the meek (or at least the intellectually misunderstood) will inherit the earth after all.

Unfortunately, I learned this the night George W. Bush gave the first State of the Union of his second term in office.

I was in rare form too, feelin' good—comically speaking at least—and being just slightly bitter. I was ready to do Dubya some damage. After all, he did have the audacity to win the hearts of the crucial two percent of the country that got him re-elected!

So just a general word of advice: At times like this…restrain yourself. Don't gloat. Don't grin. And for the love of God and Co., don't touch the Instant Messenger.

Enter Paperboy Matt. You all might know him. If not, flip to the back page. Yep. That's the one. He's been known to be rather witty himself on occasion.

I ignored my above advice. Dismayed by the events of last November, the thought of having to watch George speak again was just too much to take. I decided Matt would be a good person to make a few snide rationalizations to. Bush is back, yes. Things look bad, sure. But it's okay, because it's just the State of the Union, man and—

"At least this will be the last time he'll be doing this!"

Er. Matt was understandably a bit confused by this.

"Um. No, it's not," he typed.

Still oblivious, I thought he was messin' with me. And with evil pride I thought, "Well, two can play at this game!"

Come on, it's the Random 11 guy! You would've expected a snide joke too!

My response? "Oh, yeah, I forgot, they're going to amend the Constitution so he'll get that third term, silly me."

Appropriately snarky, I was sure. Cynical, brilliant…

"It's annual."

And at that precise moment I realized that something in my prided sense of wit had gone terribly wrong. I blinked at the screen.

It's annual.

The State…*of the Union.*

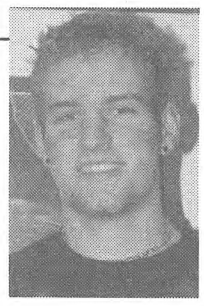
And then my brain spoke to me. A voice descended from the clouds.

"Baby Jesus!" it said, and "DUDE!"

"THIS IS NOT THE INAUGURATION."

I cringed, then burst out laughing.

"Wishful thinking?" I offered.



So, I had a moment of intellectual ineptitude. I bit the big one in the battle of wits. One might even say…I walked a mile in my President's shoes?

Although…you know the age-old saying…*never criticize until you've walked a mile…*

Oh, President Bush. The karma gods may have taught me a lesson that night…but that proverb marks the start of a whole new ballgame!

The Secret Machines

Jonathan Moody

On their Reprise label debut, "Now Here is Nowhere," The Secret Machines' psychedelic, vivid sound envelops the listener with spell-binding magic. They reach out and tickle your inner Risky Business-esque Tom Cruise, who wants to sing along with the choruses at the top of his lungs. I challenge you to keep still when the magnetic bass in "Sad and Lonely" first collides with your ears. This trio ambitiously sets out to transcend conventional musical boundaries, and with their dreamlike epics, they succeed. An otherworldly journey awaits you with each listen.

What makes The Secret Machines so special is their simple yet effective bass-driven sound. Songs begin with a boisterously deep bass that hits with a cavernous thud. The bass' simple rhythm maintains a steady beat throughout the verse, chorus and bridge transitions.

Exceptionally powerful and atmospheric, the bass enriches the music. It dominates the song "First Wave Intact," and is the chief reason that The Secret Machines stand out from other similar bands, such as Snow Patrol.

The Secret Machines have a pleasantly crisp and clear quality in all their songs. They never sound as if too much is happening at one moment, and therefore keep their music uncomplicated but adventurous, without it taking away from the grandiose scale of their work.

The band frequently uses ambient sounds as subtle background noise to supplement the instruments. Some songs such as "Pharaoh's Daughter" and "You Are Chains" are the exceptions with exuberant but not excessive ambience. Voice alterations appear in other songs, such as the eerie "Lights On," in which images of a ghostlike singer materialize in the listener's head. The lead singer's voice echoes with each lyric.

The lyrics are either straightforward or very abstract. With lines like, "I wonder was it the Pharaoh's Daughter or the wealth I still remember," there remains much room for interpretation, which adds to the Secret Machines' mysterious persona.

The guitars resonate distinctly, ranging from catchy rhythms to haunting electronic pulses. They never sound out of place in their respective songs. In "Nowhere Again" the riffs are quick, happy and jumpy, compared to the sporadic, more muffled sounds of "Sad and Lonely."

The biggest testament to the Secret Machines is their ability to craft genuinely diverse songs that never diminish in quality. Each song has its own personality and feeling. Only one song, the sluggish and slightly boring "The Leaves are Gone," feels out of place.

This band comes very highly recommended to any casual listener. The Secret Machines successfully mixes numerous genres, masterfully constructing enchanting epics. At times they seduce with their trancelike gui-

"Hitch" warm & fuzzy; formulaic romance stays sweet

Holly Brown

"Hitch," starring Will Smith, is the story of a successful New Yorker who makes his living teaching men how to enchant the women they love. However, when Alex "Hitch" Hitchens falls for a world-wise columnist, he learns that he doesn't have to be smooth; he just has to be himself.

All together now: *Awwwwwww.*

"Hitch" is a fluffy romantic comedy of the first degree; chock full of tender moments, impassioned declarations and silly misunderstandings. But with the extremely likable performances of Smith, Eva Mendes and Kevin James, it *just* manages to outshine the competition.

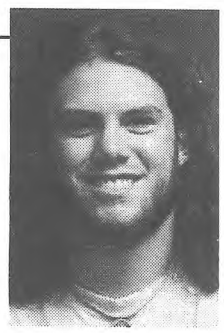
Hitchens is the all-around nice guy who has the moves but is secretly yearning for that chick flick staple: *the ONE*. Hitch is no sleazebag – he refuses to aid the guys who are just in it for physical attraction. Watch as Hitch publicly humiliates the rich and smarmy player! Oh Hitch, you're such a Nice Guy.

Hitch's latest project is the doofy Albert (James), an accountant head-over-heels in love with his client – the heiress Allegra Cole (Amber Valletta). The clumsy and insecure Albert doesn't have a chance with Cole until he overreacts in a meeting and quits his job to defend her. Cole is impressed, and with Hitch's help Albert gets his foot in the door.

James is a show stealer with his dorky but lovable character. Albert is so hopelessly in love that you just want to give him a hug and a tub of ice cream while you stick in the "Pride and Prejudice" DVD. James has amazing comedic timing and great chemistry with both Valletta and Smith.

So Albert manages to woo the illustrious Allegra, and Hitch breaks through Sara's (Mendes) cool demeanor. Of course, all this perfection is too good to be true. A silly conflict is introduced for the sake of the story, but it's not of any great consequence. Come on, you knew where this movie was going when you bought the ticket.

In the grand scheme of things, "Hitch" is just a nice feel-good movie. In comparison to other romantic comedies, it tries to stand apart by having likable characters and fabulous humor. Smith certainly has a high likability factor, and Mendes gets to play a fun, realistic female. And James? Well, he has this awesome dance move he calls the "Q-tip." It's absolutely priceless.



Another thing "Hitch" has going is the ability to laugh at itself. In one of the best scenes, a heartbroken Sara sobs while watching the "you complete me" scene in Jerry Maguire, possibly the best in cheesy movie history. She then stuffs her face with whipped cream straight out of the dispenser.

Unfortunately, "Hitch" loses its ironic flair and has an over-the-top "I'm not letting you go" ending. What is it with movies nowadays where the characters have to declare their love in thesis-sized speeches? "Hitch" goes from being fun and cute to sickly sweet in the last act.

It's fun. It's sweet. It's a good date movie. It hits some high marks within the genre but doesn't strive for anything very daring or original. "Hitch" is worthwhile if you're in the mood for the warm fuzzies.

The High Note: *The Miles Davis Experience*

Jacob S. Warner

Jazz. The mere mention of the word sends wrinkled contortions racing to the faces of many. Jazz. That's for stuck up yuppies in berets and sport coats with little elbow patches. Jazz. That's for starving artists and musicians to listen to in smoky, underground holes in the wall. Or is it?

Jazz. It's not all brass and snare drums anymore. It hasn't been since 1969, when Miles Davis and his merry band of improvisational hipsters raised the bar forever. Jazz could never be the same after the release of *Bitches Brew.* The album was not merely a lonely trumpet or sax accompanied by a simple snare drum and an upright bass. It was an experiment in sound and energy.

With records like *Kind of Blue* and *Sketches of Spain,* Davis established himself as one of the most talented and inspiring musicians on the jazz scene. He could have accepted his position and sat atop his mountain of achievements like a quasi-jazz guru. Instead, he headed into the studio with saxophonist Wayne Shorter, pianist Chick Corea, bassist Dave Holland and drummer Jack DeJohnette, among others, to create a jazz masterpiece.

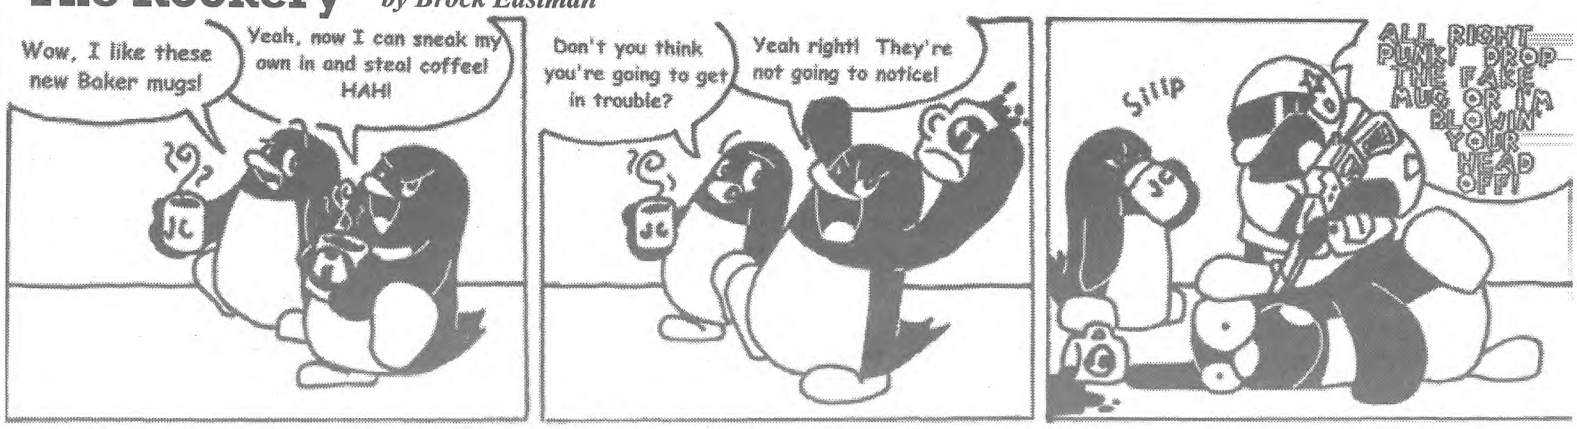
Describing a jazz album to a reader is daunting. Especially this album. There are no clean 3 ½ minute tracks as starting points. There are no lyrics. I cannot highlight a track for a specific quality, or point out a delicately crafted lyric. The first disk of *Bitches Brew* has two tracks, and each stretches past twenty minutes. The second disk's five tracks span nearly an hour. There are no bathroom breaks on this album; *Bitches Brew* is one large studio jam session. If you like this, great. You should have no problem enjoying this piece's multi-layered richness and intricacies. But if you're one who finds solace in track demarcations and lyrics that provide some sense of closure, you won't find it on this album. What you will find is a mind-bending experience that will challenge your conception of jazz forever.

Bitches Brew is an up-and-down emotive ride that if plotted would look like the polygraph printout of a heavy liar. Delicate, intricate keystrokes blend to all-out trumpetal assaults. Thunderous bass to subtle snares. Sultry trumpet insinuations to rapid-fire drum and bass combinations. One minute you're in a smoky jazz bar, the next you're in some far off steamy jungle jazz cabana. With an electric guitar. Surrounded by bells and organs. Smoky room. One-hour-motel-room-passion. Smooth island grooves. Exuberating guitar sequences and other-worldly trumpet arrangements. Keystrokes of the gods. It's all here.

Bitches Brew is indescribable. Of course, that's why I tried to bring it to you. I've attempted to translate into words what can only exist as pure energy captured for moments in time on a CD. Released over thirty years ago, *Bitches Brew* is as fresh as ever. No words can do it justice. This is a powerful, transcendental piece of musical mastery that is, to this day, pushing the bounds of reality and blurring the lines between experience and expression.

Listen.

Eagles Abroad



continued from page 8

lies in making yourself at home in your new surroundings. Take the time to really get to know your host family and your classmates. Laugh, eat, talk and party with them; no time you spend with your new *cuates* is ever wasted. I spend several hours every day in conversation with my host family, and not only has it made me feel quite at home here, it's what I treasure most about my time in Mexico.

If you try to immerse yourself in your new life, you will be happier. That's the whole reason you went abroad in the first place, right? Live your life abroad in such a way that when you return home, you will be homesick for the "home" you found in another country.

Do something Mexican!: Be polite. Go out of your way to say "please," "thank you." According to a Mexican saying, "being courteous costs nothing and is worth much." It's true!

The Rookery *by Brock Eastman*

Baseball trying to top itself

Can they Eagles improve on record-breaking season?

Tommy McConnell

Last season, the Juniata baseball team put together one of the finest seasons in school history. The Eagles posted 24 wins and then ran the table in the MAC playoffs to take home the school's first conference title since 1990. Juniata then bowed out of the NCAA Tournament after a strong showing in the Mid-Atlantic Regionals.

So, of course, the burning question heading into the 2005 season is, can Juniata repeat last year's success? Or, even better, can they top it?

It's a lofty goal, considering Juniata hasn't had this type of success for nearly 15 years. But, despite the departure of several significant seniors, the Eagles have the pieces in place for another run through the post season.

Maybe more importantly, winning a league title gave the team a new level of confidence.

"When we went into the season last year, everybody talked about winning a championship, but I don't know if anybody really believed that we could do that," head coach George Zanic said. "I think now we have 28 guys that expect to win the championship and not doing so isn't acceptable.

"You look two years prior, we didn't even make the playoffs. I can't even imagine those guys thinking that we won't make the playoffs. I think confidence-wise it has changed us for the better, because they believe going into the season that we can compete with the best teams in the country."

Much like last season's team, this year's squad has a pitching staff good enough to win games on its own. Juniata has 14 hurlers capable of pitching at the collegiate level.

"Pitching is our biggest strength," Zanic said. "There's no question about that. The hardest part will be finding out who are our top pitchers to pitch in a conference game and that hasn't been easy right now because everyone is throwing very well."

Jayme Fye, the staff's ace and all-conference selection, is looking to have another strong season.

"Jayme Fye is a leader on the mound," Zanic said. "He's our top pitcher without question and it's nice to have his leadership out there."

Unlike last year's team, Juniata doesn't have to play small ball this season. The Eagles added power to an already dynamic lineup and the result should be some high-scoring ballgames.

Two-time all-conference outfielder David Saintz will be a threat to lead the conference in total bases. Will Russell moves from the second spot to batting fifth. Freshman Dan Kaufman, a first-team all-state selection as a high school senior last season, will add power batting third.

But the offense will key around Walt Goedkoop, an all-conference first baseman, who will move from first to designated hitter to make room for Kauffman. Goedkoop led the Eagles in virtually every offensive category last season and should do the same this season, despite the position change.

"At first I didn't like the idea at all, but after meeting Dan and working with him all year, I am happy to do what is best for the team," Goedkoop said. "I think I will be able to fill that role well."

The fact that Juniata bumped its offensive MVP in order to make room for even more power speaks to just how much more explosive this offense can be.

Defensively, Juniata is as solid as ever, especially up the middle. Catcher Zach Sternberg is as good defensively as any in the league. Will Russell is as solid as a rock at second and Darren Hake is as sure-handed a shortstop as there is in the MAC.

Juniata will start two freshmen on the corners, with Kauff-

Men's Volleyball seeks successful season

Katie Laucks

This year for the Juniata men's volleyball team playing at the Division III level will not be good enough. This year it wants to be the best and play with the best. But right now, the Eagles see themselves as just average. They are nowhere near where they want to be by the end of the year.

"This team can play with Division I [competition], they just haven't got there yet," said third-year coach Ken Shibuya.

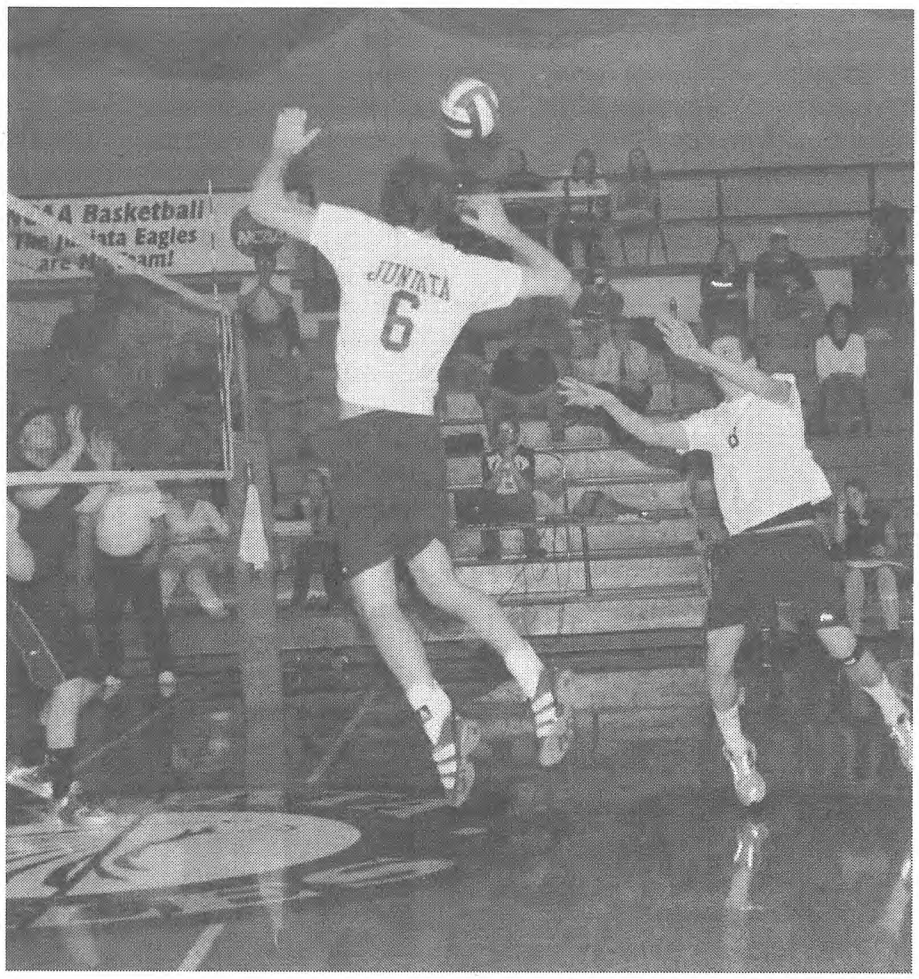
On February 9, the team took on George Mason, looking to put wins on the board. George Mason won the first two games, 30-24 and 31-29.

"They didn't come out really strong," said Shibuya of the team.

The Eagles fought back in game three, winning 30-25. But the Eagles couldn't hold off the strong play of the Patriots. They lost the fourth game, 30-28. Leading the Eagles in the outing was junior Matt Springer, who set a new career high of 20 kills. Cordt Withum added 12 and a team-best 4 blocks. Ricky Ziegler dished out 47 assists.

The Eagles were back on the court Friday at home as they hosted the Ducks of Stephens Tech. The men put on a show as they destroyed the Ducks, three games to none, 30-25, 30-21 and 30-27. Pacing the Eagles was Nate Ocasio, who hit an amazing .667 with 12 kills. Glenn DeHaven had nine kills while Nick Bernardo and Jeremy Barndt each added eight. Ziegler dished out 35 assists. DeHaven and Stephen Yeager had five digs a piece. Also, the team finished with a season-best 11 blocks.

On February 15, the team drove the short distance to take on its long-time rival Penn State University. "Playing Penn State is always good for us," said Ziegler.



This season Penn State is ranked fifth in the nation and the Eagles were looking to show up the Division I team.

The Eagles were unable to hold off the Lions, as Penn State cruised to a 3-0 home victory. "Even when we do not win, playing Penn State is a good test for us. It lets us see where we are and where we need to be," said Ziegler.

In the match, Nate Ocasio finished with a team-high 11 kills and a pair of blocks. Ziegler had 29 assists and Yeager finished with a team-high six digs.

"When they come to our gym, hopefully then we will have learned and improved and [be] ready to take a game or even the match from them," said Ziegler.

The Eagles will be back in the Kennedy Sports and Rec Center on February 25 at 7:00 looking for another victory against Springfield.

Hannah Rauterkus / Juniatian

Senior Ricky Ziegler (8) sets up sophomore Jeremy Barndt (6) for the kill.

Eagles tie third place record at the MACs

Looking forward to 3-day ECAC meet starting tomorrow

Jeremy Simmons

As the third day of the Middle Atlantic Conference swimming championships drew to a close, Juniata had earned enough points to give it a third place finish. This ties last year's record of a third place finish at the MAC championships, which was the highest the Eagles have ever placed. The team ended the championship meet with a total score of 505, 81.5 points behind second-place finisher University of Scranton and 251 points short of first place Albright College.

On the first day of the championships, Juniata came out strong, scoring 175 points, enough for second place.

Relay team members senior Dana Gais, Kathy Trainor, junior Amy Hanson and freshmen Allison Sweigart posted a school-record time of 1:39.95 in the 200-yard freestyle relay as they took second place in the event. Trainor then went on to best her conference record with a time of 24.66 as she claimed victory in the 50-yard freestyle event.

At the end of the second day of swimming the Eagles fell to third place with a total of 325 points. The highlight of the meet came when the relay team of junior Amy Sutherland, freshmen Jenny Bair and Sweigart and Trainor finished with a time of 8:13.64 in the 800-yard freestyle, scoring 32 points.

During the final day, Trainor gained another first place finish in the 100-yard freestyle. The MAC meet came to a close as the relay team of Gais, Sutherland, Trainor and Hanson took second place in the 400-yard freestyle relay to ensure the Eagles a third place finish.

Even though the team tied last year's third place mark, it scored 55 more points than at last year's MAC finals. Before last year, the best the team had accomplished was two fourth place finishes in the MAC finale.

The Eagles are all pleased with their performances at the MAC meet and are confident that they will be able to swim even better at next year's conference finals.

"I am so proud of our team because we keep getting better and better every year," Sutherland said. "Next year we are going to be amazing."

The whole team seems to be very high in spirit and ready to compete.

Freshman Kasey Brough said that her "experience was a new one, but I am looking forward to next year."

The Eagles make it a point to cheer for ever swimmer in every event, no matter how long, which seems to help unify the team.

"It was a real rush to be apart of this team last weekend," Brough said.

The MAC championship is now over, but the Eagles still have some swimming to do before the season comes to a close. The team's performance at the MAC meet qualified Juniata for the Eastern College Athletic Conference Championships. So now the team is working and-waiting with anticipation for the three-day ECAC meet that will begin tomorrow, February 25.

Athlete off the field

Ziegler wants Division I title

Katie Laucks

The height of an athletic career is achieving the greatest goal possible. That goal was achieved for Juniata College senior setter Ricky Ziegler last season, when the men's volleyball team captured the 2004 Molten Division III National Championship.

So what happens when you have achieved that goal and you have one more year left?

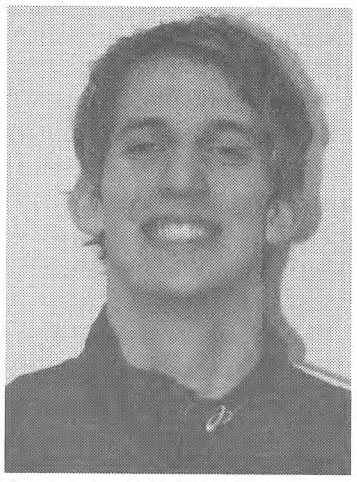
"Win back-to-back championships," said Ricky.

This issue's Athlete off the Field is in a position no other athlete is in or has been in at Juniata. He has a chance to do something that has not been done before.

Ziegler wants to do the unthinkable. "I have one goal: to do what no other team in Division III has done," said Ricky. "Go to the Division I NCAA Final Four and win."

Due to the small amount of men's volleyball teams across the United States, the volleyball teams from Division III schools are able to compete to go to the Division I NCAA Final Four championships.

"I feel as a team we are better than last year's team. We just need to put some things together," said Ziegler.



As soon as those kinks are worked out, the potential of the team will be put to the test. Right now Ziegler is putting his academics to the test as well.

His POE is engineering and physics. This summer he had the opportunity to put his almost four years of education into some real world experience. He interned at American Sign Company in York, Pennsylvania. There he was in charge of mostly computer-related tasks that developed the signs that are seen around the York area. "I really enjoyed the idea that what I did was eventually seen by others," said Ziegler.

After school, Ricky might be in an office like the one he was in this summer, but that is not the only career path crossing his mind: playing pro volleyball has been a reoccurring thought. Like so many of Juniata College's past great volleyball players, Ziegler is also thinking of playing professionally abroad.

If he does go on to play at the next level, several of his teammates and his head coach have confidence that he has the skills and the personality that can adjust to the competition.

"There is nothing he can't handle," said teammate Matt Springer.

Senior Ricky Ziegler

We will just have to wait and see what career move he makes. Until then, the only thing on his plate is getting his team to its goal - and his.

"At this point we have the potential. We just need to believe," Ziegler said.

For the next month and a half Ricky and the rest of the Juniata men's volleyball team will be practicing for one thing; to win the unthinkable. Shortly after the season comes to a close, Ziegler will be making the decision on what professional career he wants to follow. Until then, he is focused on delivering a Division I National Championship to Juniata.

Men's basketball rounds out regular season

Ends year with difficult schedule; looks to build strength in off-season

Katie Charles

The men's basketball team had an extremely difficult conference schedule to end the regular season.

The team got a huge win at Susquehanna on February 15, beating the Crusaders 70-54. Junior Travis Boyd led the team with 16 points and five rebounds, while freshman Brian Cannon chipped in 14 points and eight rebounds for the Eagles. Junior Tommy McConnell was also in double-digits with 12 points.

Coach Curley said, "This was one of our best defensive games of the season. I think the team really played well."

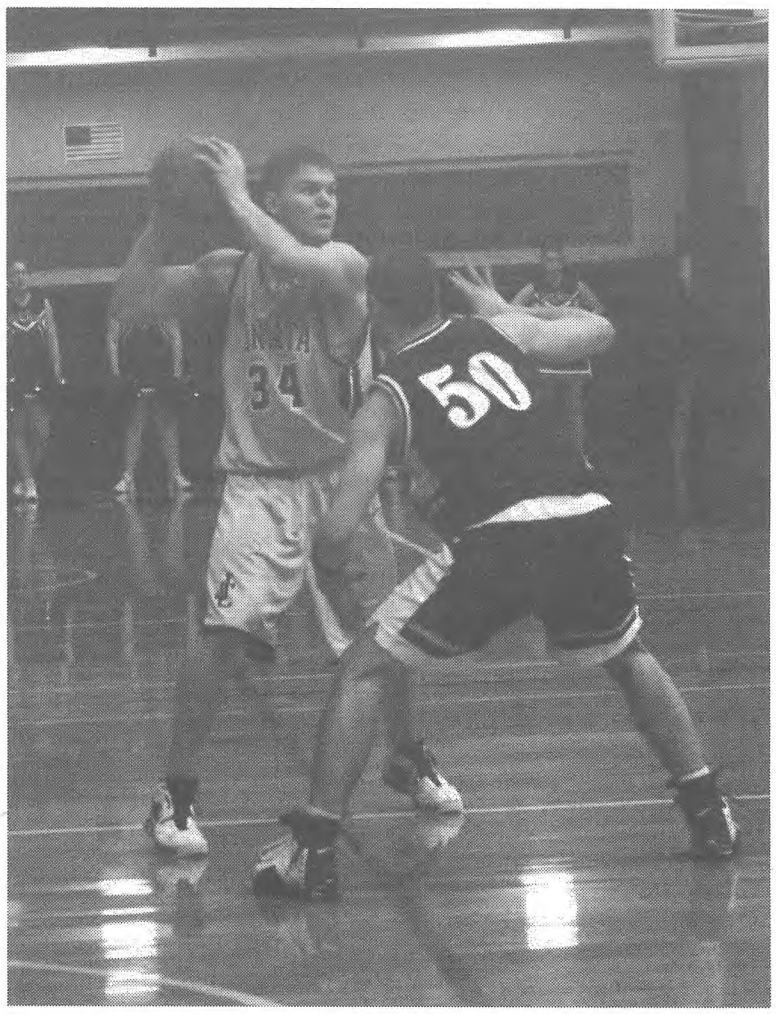
The team was not helped in its efforts by questionable refereeing in its game against Elizabethtown College on January 8, falling 90-72 to the defending conference champions.

A total of 47 fouls were called in the game, 30 of which were against the Eagles. Three minutes into the second half, there had already been eight fouls called against the team and the Blue Jays were shooting foul shots for the rest of the game. Not to mention the three technical fouls called against Juniata.

Despite the poor officiating, the team got solid performances sophomore Nick Hager and Cannon. Hager led the team with 16 points, shooting 60 percent from the floor. He also grabbed a team-high five rebounds. Cannon added 11 points, three rebounds and three assists.

On February 12, the team suffered another tough defeat against current conference-leader Albright. Once again, Cannon had an outstanding game, scoring 16 points to tie his career high for the third time. In addition to Cannon, junior Neil Holloway and sophomore Aaron Chamberlain each scored 10 points, while Hager added five rebounds and four assists.

In the final game of the regular season, the Eagles fell to nationally-ranked Lebanon Valley, 62-47. Hager once again led the team with 12 points and 5 rebounds, Boyd added 11 points and Holloway pulled down a team-high 7 boards.



The team is now looking towards next season. Since there are no seniors, the entire squad will return for the 2005-2006 campaign. Coach Curley is optimistic about next season.

"Every team we play has at least two seniors that play a huge role on their teams. Our major players are all underclassmen. That is a big advantage," Curley said.

In the off season, both Curley and sophomore Nick Hager commented that one of the biggest challenges for the team will be to become more physical. That means hitting the weight room.

"We got out-rebounded a lot. I think we need to be a lot stronger and that will be our focus in the off season," Hager said.

"We talk about being the hardest working team in basketball and the guys will have the opportunity to prove that in the off-season this year," Curley said. "We need to get bigger and stronger for next season. We return every player, so I don't think cohesiveness will be a problem. We just need to be in the gym working hard everyday."

Hannah Rauterkus / Juniatian

Junior Neil Holloway (34) protects the basketball while waiting for a cutting teammate to spring free.

Baseball: top self?

continued from page 12

man at first and Jay Enoch at third. Despite its recent success, the team welcomed the freshmen from day one.

"They have welcomed us in and have taken us under their wing," Enoch said. "After the fall and winter workouts, they have now got a feel for what skills we have and I think they have become comfortable with us in our positions. But they are always giving us tips that benefit the team and ourselves."

With all the talent, Zanic sees the possibility that the team may expect to coast this season, especially after winning a title.

"I am worried about that," he said, "and we've talked a lot about that. I think the thing that keeps us going is knowing our league is so good and we can't relax."

Last year was something special, but the team realizes it has a chance to be even better. The possibility of a national championship has made the team that much more determined.

"I think we are looking to accomplish even more than last year," Goedkoop said. "We want to repeat as conference champs, but we have our eye on the big picture, also, which would be the College World Series."

Despite its youth, Zanic believes Juniata has the ability to end its season at the one place they want to go.

"The College World Series. We're still young, but the goal is to compete for a national championship" he said. "I don't know how close we are until we get out there, but I think we have the pitching staff to do that. We can compete with the best teams in the country."

Get Rid of Your Brother for the Summer!

Do you dread going home this summer because of a meddling little brother or sister?

Or maybe you like your sibling but wish they would get out and explore the world as well as leave you alone.

Then send them to Juniata!

With a variety of camps for all interests and age levels, there's sure to be one for someone you know. Take a look and maybe you'll have a chance to relax at home, without your little brother staring at you all day.

Womens hoops' season comes to a close

Close matches and few seniors spell hope for next season

Robb Patty

The Juniata women's basketball team finished its regular season schedule on Saturday night with a trip to Lebanon Valley. The Eagles, however, were unable to end their season with a victory as they lost to the Flying Dutchmen, 79-69.

Junior forward Katie O'Brien had a career high 24 points to go along with 12 rebounds and four assists. Junior Kristen Kirk and freshman Jess Winemiller also helped the Eagles by adding 13 points apiece.

The Eagles ended this season with an overall record of 5-19. However the future does look bright for the women as they do not graduate any players from this year's squad. With a full squad returning, and a large freshman class that saw extensive playing time this season, the women will look to make a run to the top of the MAC standings 2005-2006.

This year the women have lost seven games by three points or less. With so many rookies on the team this may be expected, but head coach Danny Young said that next season the six returning freshmen do not have the excuse of being young.

The day after Valentine's Day the women took on conference foe Susquehanna and the Crusaders were able to hit a pair of free throws with 1.5 seconds left to hand the Eagles another crushing loss, 74-73. Junior forward Lesley Snoby led the Eagles with 17 points as she went 7-13 from the field.

"I'm happy that we are in games; there have been seven games this season we have lost by three points or less. I would have liked to see some of those translate into wins, however," said coach Danny Young.

Juniata lost another nail-biter on Feb. 12, this time to visiting Albright College, 55-53. Trailing by seven with just over a minute left in the game, the Eagles got three-pointers on three consecutive possessions from freshmen Mindy Werner, Jess Winemiller, and Ali Meckey to cut the Albright lead to 55-53. With four seconds left in the game Juniata fouled and sent Albright's Meredith Berger to the line. Berger missed both shots, but an offensive rebound for the Lions sealed the victory.

"We (the team) worked really hard to comeback by hitting a few key shots, and we tried our best to tie up the game," freshman guard Courtney Callas said. "But, the ball just didn't roll our way in the last few seconds of the game."

Track prepares for MAC

Indoor season winds down

Corinne Barabas

After two successful meets at Susquehanna, Juniata throwers, runners and jumpers will all be preparing for the MAC Indoor Championship meet on February 26.

On February 12, the men's and women's track and field teams competed at the Susquehanna Invitational where there were some key performances by many of the athletes.

For the men, sophomore Randy Anderson won the 55-meter dash with an NCAA Indoor Track Championship qualifying time of 6.49 seconds. Senior Ben Beas was right behind Anderson, finishing second.

Juniata took a second place finish in the 4 x 400 meter relay, while freshman Eric Hoover ran to a fourth-place finish in the 1500-meter run.

On the women's side, sprinter Elena Amato placed second in the 800-meter run and freshman Cara Carpin captured second in the 55-meter hurdles. Rebecca Shoaf placed fifth in the 400-meter dash and freshman Jamie Johns placed fifth in the 200-meter run.

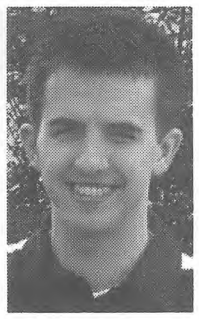
Distance runner Nancy Hayes competed at the Bucknell Bison Classic in Lewisburg where she finished sixth in the 5000-meter run. Hayes attended the meet because Susquehanna was not holding a five thousand meter run and she needed to qualify for the MAC meet, which she succeeded in doing.

On February 19, the track team headed back to Susquehanna. Battling the cold season, runny noses prevailed, keeping half of the women's mid-distance to distance runners in Huntingdon instead of at the meet.

At the Susquehanna Open, the men's team had some respectable performances. Randy Anderson earned a second place finish in the 55-meter dash with a time of 6.54 seconds.

In the long jump, Jeremy Weber and Randy Anderson placed third and fifth, respectively. Freshman Matthew Booth captured seventh place in the triple jump. Eric Hoover ran a 2:05 in the 800-meter dash and earned twelfth place.

For the women, Rebecca Shoaf turned up the heat and sprinted to an eighth-place finish with a time of 1:03. Nancy Hayes, running an 11:05 in the three thousand, took fifth place. Maria Welch placed eighth in the long jump and Senior Kira Troutman threw the shot put far enough to win tenth place.



Athletes who qualified will be heading to the MAC Championship meet, which will be held on February 26 at Susquehanna University.

THE RANDOM ~~ELEVEN~~ thirteen

Matt Russell, 1337 h4xx0r

A rose by any other name: If it's eleven every week, it stops being so random after a while. Cheers for two extra bits of randomness this week.

Like burning a fire extinguisher: A staff writer recently ordered a GPS unit online… and it got lost on route. That seems like the ultimate Catch-22.

Juniata has a great V-D, part 1: "*Communications Club - We do it Orally*"? Banned. "*Laughing Bush - We do it Outdoors*"? Banned. "*Vagina Monologues - Show us your Vagina*"? Wait, that's fine? It's not even a damn euphemism!

I have a bottle of it in my fridge: Don't you love ads that ask oh-so-profound rhetorical questions? I recently saw an Ocean Spray Cranberry Juice commercial that asked, "What's your reason?" Actually, I don't like it… it just makes a good mixer.

Teenage Wasteland: Ever tried walking up Moore Street between 3:00 and 3:15pm on a weekday? The street is flooded by a torrent of high school students yelling obscenities and throwing things from their cars. I've felt less threatened on a target range. Back in my day…

Waste Disposal: Picture this scene. A student knocks a stack of maybe 50 napkins off the condiments counter in Muddy. "I hope she's going to pick that up," I think to myself. A minute passes as she finishes fixing her sandwich, after which she bends over to pick up the napkins. Satisfied, I go back to eating... as she leans over and deposits the entire stack in the trash. I guess they must have been too contaminated to wipe up grease.

Juniata has a great V-D, part 2: So, they made it into a chocolate lollipop now. A friend of mine gave one to her boyfriend to watch him eat it. What did he do? Bit it in half. Well done, sir.

Constantine: I saw the previews and thought it looked cheesy. A friend persuaded me to go anyway… and it was really good. The conceptual work was outstanding, and it reaffirmed my belief that Keanu Reeves is underrated as an actor. I recommend it.

Check your local listings: JAB recently showed "Sleepless in Seattle" in Alumni Hall… the same night it was showing on TBS. Unfortunately, a TV Guide costs more than they made in ticket sales.

Seventh sign of the Apocalypse: Sodexho made some amazing Veggie Cacciatore in the Vegan line on Monday. It was possibly the best thing I've ever had in Baker. (See? I can be positive about Baker in this column… sometimes...)

No poking: I recently overheard a discussion about upcoming JAB apparel, including sweat pants. I hope they don't put the logo on the backside.

Concert hoopla: If the front page article didn't rid you of your angst about the band selection for the concert, join the entertaining discussion on the forum. A band with 2% of the vote got selected? I bet Raffi would've placed better if he was on the list.

Fun dinner conversations: I recently played a game I invented, "Porn Star or President?" with a friend of mine at OIP. Ron Jeremy? "Porn star," she replied. Very good. John Adams? "Porn star." Okay, maybe a little easier. James Garfield? "Umm… porn star?" Oh jeez. Grover Cleveland? "I don't remember that one… porn star?" Yahtzee.

Secret Machines

continued from page 10

tars. At times they get your feet stomping and head nodding to the thundering bass. Check out these bonifide blockbusters, you won't be disappointed.

Standout songs: Sad and Lonely, The Road Leads Where Its Lead, Nowhere Again

Lyrics Excerpt: "Cellophane flowers never happened for me/ I've been sleeping the day off/ Watching the night fall/ Covering nowhere/ Filling my time share"

Underdog of the arts

continued from page 6

ogy or history.

Yet Juniata students cannot currently build music into an interdisciplinary POE, let alone receive a full music degree.

According to Dr. Russ Shelley, Music Department chair, Juniata did offer music degrees at one time, including a music education certification. The last music degree was conferred around 1980. The program had no students for many years simply because no one came to Juniata to pursue a music degree.

When one of three music professor positions was cut in the early '90s for budgetary reasons, the POE was finally cut as well. It simply couldn't be supported by the remaining faculty. At about the same time, the theatre POE was eliminated for the same budgetary concerns.

To be accredited as a degree-granting program, the Music Department must meet standards prescribed by the National Association of Schools of Music. Juniata currently lacks the resources for that accreditation process.

Shelley explained the situation further.

"A legitimate music major requires a critical mass of talented students in multiple areas and instruments. It's doubtful, given the demographics and competition in our market, that we could achieve that critical mass," he said.

Pennsylvania colleges are already competing over a relatively small number of prospective music students.

Some Juniata students want to music in their POE, however.

According to Shelley, two students are currently considering a transfer out of Juniata. If these two do end up transferring, they will be the only ones in recent recorded history who have done so to study music.

Junior Heidi Shoemaker, a choir member, said that she simply found music more interesting than other fields and hopes to become certified to teach music – a certification that Juniata once offered.

"I've heard a lot of other people say they'd like to major in music, but Juniata doesn't offer it, so they chose a different program," said Shoemaker.

Sophomore Brandon Long is still considering a transfer but was adamant that "if Juniata offered a music minor I'd definitely be staying. I love it at Juniata, and I love the choir."

Many of the students I interviewed indicated that they would somehow incorporate music into their POE if they could.

Junior Nick Daddario realized that he wanted to pursue music studies after he arrived at Juniata. He attempted to develop an interdisciplinary POE.

"'Physics and Sound Aesthetics' is what we called it because you can't say, 'Music,'" said Daddario.

Some students, however, enjoy the freedom of the current program as opposed to a degree-granting study.

Shotts, a trumpeter and Biology Education POE, said, "For me, music is more of a hobby. I don't really see it fitting into my career goals right now. […] I think it's good the way it is – it's low pressure."

And that's the kind of student the Music Department is currently aiming to educate.

"Our focus is on training those who will consume the work of the music professional. Someone has to train the audience," said Shelley.

Shelley called it music for a life, not music for a living.

And certainly, if music majors came to Juniata, the Department's resources would be devoted mostly to those individuals. So in a way, students in other fields would lose some of that interdisciplinary education they currently receive by participating in music electives.

A music POE in the near future is unlikely and perhaps unnecessary for Juniata students as a whole - depending on who you talk to.

Yet Shelley also hinted that, many years from now, there may be more expansions to Halbritter to house the Music Department.

So where Halbritter and high participation lead the Music Department – and whether it will benefit biology majors, music majors, or somehow both – it seems that only time will tell.

HUNTINGDON, PENNSYLVANIA

MARCH 24, 2005 | JUNIATA COLLEGE | VOLUME 86, ISSUE 9

Bloody Sunday activists reunite

Remember experience in Alabama, lead civil rights activities on campus

Nicholas Carney

The Edmund Pettus Bridge still stands in Selma, Alabama on the 40th anniversary of the brutal events that took place there – events which included Juniata College students.

On March 7, 1965, protesters planned on marching from Selma to the state's capital of Montgomery—hoping to shed light on the issue of black voting rights in the southern United States. The marchers never made it across the bridge. Most of them were clubbed or beaten by state police under direct orders from the governor. The event was given the nefarious title of "Bloody Sunday."

The Juniata community, in the midst of its own social upheaval at the time, watched in horror as the events in Alabama transpired. The rage of some could not be contained, and quickly 15 students and faculty organized a trip to Alabama to participate in a recreation march organized by Martin Luther King, Jr.

Eight of those 15 returned to Juniata on March 20 and March 21, 2005 to participate in a two-day event entitled "Civil Rights: Reunion and Renewal."

The social dynamic of the Juniata College campus was so fragile at the time that College president Calvert Ellis forbade students from participating in the march unless they had a permission slip from their parents.

"It was foaming at Juniata," said Chuck Lytle, one of the original 15.

Placing both their futures and their lives on the line, Lytle, along with Harriet Richardson Michel, Galway Kinnell, Pamela Clemson Macomber, Don Ardolino, John Fike, Janet Kauffman, and Elmer Maas left for Alabama.

"I hope things go all right," wrote

continued page 5

Hannah Rauterkus / Juniatian

This famous photo of Harriet Michel ('65) wiping the blood off of Galway Kinnell (Juniata's then Poet in Residence) was one of many framed photos that greeted the community at the panel discussion.

House distress

"Alternatives to Alcohol" men keep housing by a close shot

Genna R. Welsh

Residents of Juniata's Alternatives to Alcohol House recently jeopardized that housing option after their admitted alcohol use and other violations were revealed. Consequently, House residents petitioned for a second chance.

Despite the violations, Residential Life reinstated the House, allocating it to many of its current residents for the next academic year. Now, Juniata students are wondering why and how these formerly substance free residents have managed to retain the House despite breaking their contract.

"That doesn't seem correct to me, but it's not a surprise. Change in policy does not come easily here," said sophomore Quinn Daly about The House's reinstatement to occupants despite their misbehavior.

"They should not be permitted to live in the House next year. Their actions would have gone against the purpose of having the House," said sophomore Morgan Riebel.

The House, which began in the fall of 2003, barely surpassed its one-year anniversary when current residents' behavior exhibited a break from its original

End of "dog culture?"

Administration revisits question of professors' pets on campus

Meredith Pink

An ongoing debate is raging between freedom from restrictions and the professionalism of this institution. It is a sensitive subject that administrators have put on the back burner for a long time, but growing concern has brought it to the forefront. The question at hand is: should faculty be allowed to bring their dogs on campus?

The current rule regarding pets on campus is that faculty cannot have dogs in classes and must keep them on leashes at all times while on campus. In addition, if dogs are present in faculty offices, the professor must somehow accommodate students who have concerns about animals. This rule is in place to protect students, faculty, and other college workers.

Dogs can pose a nuisance or even a threat to people around campus. Some students are allergic to dogs or are even afraid of them. It is also important to be mindful of junior Chris Westbrook and his service dog Atlas. Westbrook explained that currently Atlas does not behave well when other dogs get too close, whether they are leashed or unleashed.

Senior Bill Weikert said, "In my opinion, it is unprofessional for a professor to bring their pets with them to class or their office, just as it would be unprofessional to bring

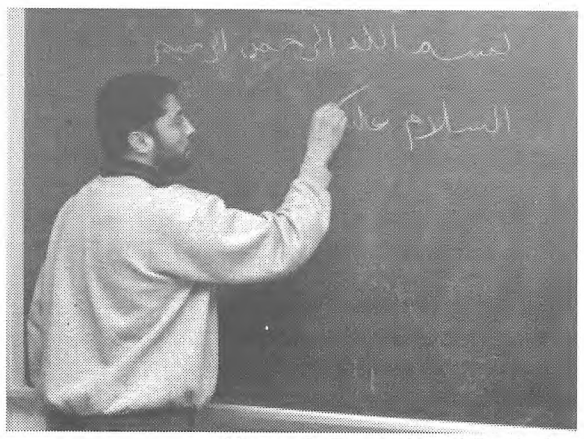
Arab students teach new foreign language class

Mary Gardiner

السلام عليكم



To some people at Juniata, that writing above looks like nonsense. To 246 million people worldwide, that is the language of their homes, their scriptures and their lives. And that number is growing.

That first line means "hello" and is spoken even here at Juniata among our Muslim residents. And as their language, Arabic, grows both internationally and domestically, Juniata's Arab speakers are offering a wonderful opportunity to the college and community: they are offering to *teach* it.

"It's a big challenge. When you learn Spanish, French, or German, it's not new letters, it's just new spelling. This is harder, but also enjoyable" said Mahmooud Al-Dabbour, one of the student teachers.

Arabic Numbers

واحد	إثنان	ثلاثة
wahid (one)	etnan (two)	talatah (three)

Hannah Rauterkus / Juniatian

Senior Kurdo Othman helps teach curious Juniata students basic Arabic every Monday at 7:30 p.m.

These teachers, however, aren't just doing it for fun.

"I'm so impressed with the turnout. We've had a minimum of twenty every week," said Al-Dabbour. The first few meetings had a turnout of 38-40 people, and attendance stayed fairly strong even through mid-term season.

"I had this idea in the first two weeks of last semester," said Fouad Touzani. "I went to some friends about

continued page 4

Defining campus technology

Software, help available for students – if they know where to look

Holly Brown

Juniata College works hard to provide useful technology and adequate computer assistance on campus. However, the uses of The Solutions Center (TSC), the Help Desk and the IT Floor are often unclear to students and faculty. Each service has something different to offer and a different purpose to serve.

"When we get negative feedback from students, it's usually because they don't know what we're here for," said Heather Bumbarger, the Help Desk Coordinator.

The Solutions Center, which relocated to BAC C107 last semester, is one of the first stops in the search for technology. Housing the Help Desk, the TLT media lab, a digital video production unit, and seemingly endless equipment and software for student use, it comes in handy for creating multimedia presentations and using equipment such as scanners.

TSC, a largely student-run organization, provides equipment and software for student use and assists faculty and staff through their SOS program, where students respond to faculty's needs and instruct them in various available programs.

When it comes to student computer problems, the residents of first floor South corner the market. The IT Floor (itfloor@juniata.edu) is made up of students trained and ready to respond to troubles with students' personal machines. And they work without charge.

Student's opinions on technology help services often depend on past experiences. While TSC and the IT Floor are generally able to fix problems, the demand and response time work against students.

"When we get negative feedback from students, it's usually because they don't know what we're here for."

- Heather Bumbarger, Help Desk Coordinator

Junior Amanda Smith attests to this: "For most of my problems that I do have, I just call my father and he helps me over the phone. I get a faster response from a phone call to a couple different people across the country than from a call across campus."

Junior Sarah Bay agreed. "It took a while to get a reply e-mail, but [the IT worker] fixed my computer right up, and I haven't had any problems since," she said.

TSC is partially funded by students' technology fees. Paid with tuition, this fee covers multiple things, such as phones and phone lines, technology equipment, and cable TV. They also cover printing, which is one of the highest costs of technology on campus.

Color printing presented a large cost, but recently, the color printer in TSC broke down and is now unavailable for use. Before that, students had to ask permission to use the printer for academic use.

That decision came after a re-evaluation of the printing cost and students' abuse of printing privileges. Instructional Systems Developer Nathan Wagoner said that club members would often print piles of fliers for their clubs and students would print personal spring break photos.

This is just one of many examples of the ways students and faculty misunderstand the purpose TSC is meant to serve.

Allison Engle, a sophomore, had a positive experience with the IT workers.

"The IT guys are always willing to help figure out problems with my computers and my friends' computers. I would have pulled an "Office Space" on my computer by now if it weren't for them," she said.

Despite students' preference to look to outside sources for technological and computer assistance, services at Juniata still warrant a look.

Beyond home: Juniata groups travel during break

a special feature by Liz Houts

This spring break, students made appearances both around the country and world, doing everything from building homes to singing.

North Carolina: Habitat for Humanity

Twenty-six members of JC Habitat for Humanity devoted a week of their time to building a home in an effort to eliminate substandard housing in Rocky Mount, North Carolina.

The students worked on constructing one house, from framing to interior finishing work. Although they started late on their first day of building due to downpours, JC Habitaters still far exceeded the goals for the week.

By lunchtime on Friday, the workers had the entire roof of the house up. They had started with a cement slab in the yard and suddenly had walls, a roof, and a home in which a family was going to live.

"It was truly amazing to see so many people be so selfless," said sophomore Charlie Bowerman. "I've been on other builds and done other jobs, but I've never gotten something so substantial from it."

Florida: Campus Ministry

With a similar dedicated work ethic to the Habitaters, 20 Campus Ministry student volunteers and five chaperones traveled to Orlando to conduct hurricane relief work. The group stayed at Camp Ithiel, a Brethren camp, where they spent their first day cleaning and repairing damages.

For the remainder of the week, the volunteers traveled in the Kissimmee and St. Cloud area doing miscellaneous hurricane clean-up jobs.

One group of volunteers helped clean up a fallen tree and other debris in an elderly couple's lawn that was in violation of a Kissimmee ordinance and was causing troubles for the couple.

"The couple was so appreciative of the work we did," said Juniata's Americorps/VISTA Representative Megan Launtz, who was one of the five chaperones on the trip. "They were not financially well off, so if we hadn't done the project, they might have lost their home. It was so rewarding to be able to help so much in such a short time," said Launtz.

In addition to their hard work all week, the volunteers also got a bit of free time to visit their choice of the Disney parks and the Hard Rock Café at Universal Studios.

Outer Banks: Laughing Bush Outdoor Club

In another part of the Deep South, members of Laughing Bush were camping, hiking, biking and paddling in the Outer Banks.

The group camped until 70 mile-per-hour winds tore through its camp site, collapsing three of four tents, and shattereing their aluminum and fiberglass tent poles. Because they were tenting on the site of a hostel, the hostel managers graciously took them in for no additional charge.

The students took two different kayaking tours on their Outer Banks adventure. They toured the Maritime Forest, a marsh forest in Kitty Hawk, and the Alligator River National Wildlife Refuge. The water in the river was laden with the remains of peat moss, so all the while the students kayaked in black water, not knowing there were alligators below the surface.

In addition to kayaking trips, the group went on several hikes, including one through a state forest covered in sand dunes. They visited two lighthouses, went offroading in a Jeep on the beach, and took in some biking.

"It was definitely worth letting other people experience the Outer Banks because they're just unforgettable," said Laughing Bush president and senior Nathan Thompson. The club has already budgeted to take this trip again next year.

Brazil: Juniata College Concert Choir

With a great deal of planning assistance from Juniata Dean of International Programs Joanne Wallace, the Juniata College Concert Choir stepped over the equator into Brazil for its annual singing tour.

The choir started in southern Brazil in Sao Paulo and moved north to Salvador for the second half of the tour. In each location, choir members were housed with host families, which helped immerse them in Brazilian culture.

"In a way, Sao Paulo was like getting our feet wet before Salvador," said sophomore Matthew Chabot. "The temperatures were less extreme than in Salvador, the concerts were less formal, and we stayed with families who spoke a lot more English."

In Sao Paulo, the choir performed a number of concerts for students in American and British schools. When in Salvador, there were several more formal concerts, including one in which Juniata's choir collaborated with a Brazilian choir to sing two songs in one of the best concert halls in Brazil.

"An awesome opportunity that most others our age don't get to undertake."

- Haley Goodwin, junior

"What we got to experience was such an awesome opportunity that most others our age don't get to undertake," said junior Haley Goodwin. "It was incredibly emotionally therapeutic for all of us."

The choir tour was also graced with the presence of Dr. Randy Kochel, a Juniata alumnus and father of junior Christopher Kochel. Dr. Kochel spent the week treating students for various ailments, and even set up a veritable triage clinic for dehydration and sun poisoning victims before the choir's final concert in Salvador.

The choir returned to campus on March 15, proudly showing off sunburns from their one morning at the beach under the strong equatorial sun and in utter awe from experiencing such an inviting culture.

First JCEL business growing

Owner received $5,000 loan and hopes to expand

Nate Drenner

A Juniata College sophomore who runs a gift basket business recently received her own gift from the College.

Sophomore Amy Albrecht became the first student to receive seed money from JCEL, the College's business incubator. The $5,000 loan was presented last month in a ceremony at the incubator's building on Moore and 14th Streets.

Seed money loans are available each year to students whose business plans and applications are approved by JCEL.

Albrecht began her business proposal during her freshman year, when she contacted Dr. Michael Lehman, executive director of JCEL.

"When I first met Amy, I was impressed by her creative energy and drive to make things happen," said Lehman in a press release.

Though JCEL itself was just starting last year, Albrecht received the coaching she needed to create a business plan and hire a lawyer, accountant and insurance agent.

"It's not hard as long as you follow [JCEL's] steps and advice. The biggest thing was making up the business plan. That took me the whole fall semester of my freshman year," said Albrecht.

But wait – a gift basket business needs a lawyer?

"In order to get off the ground, JCEL requires you to be somehow incorporated," said Albrecht. She hired a lawyer in her New Jersey hometown to become Amy's Creative Touch, LLC. Albrecht found an accountant and insurance agent through contacts with JCEL.

A psychology and management POE, Albrecht chose Juniata in part because of the JCEL incubator.

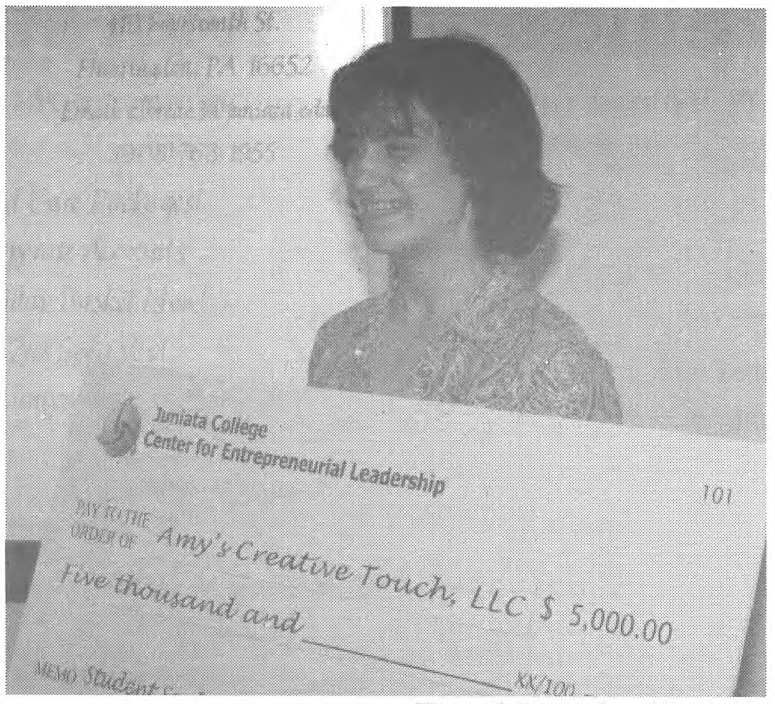
But after she came, "I had to figure out which [ideas] were viable, first of all for the $5,000 to cover it, what ideas could I run in JCEL, and then what businesses would I be interested in."

Albrecht decided on Amy's Creative Touch, a gift basket business geared toward college students and their families. The company offers custom baskets for holidays and special occasions and is online at http://www.amyscreativetouch.com. Albrecht rents office space at JCEL.

"I like to package my products in something more useful like a bin or a bowl, something the student can use in the future," said Albrecht. Baskets typically contain full-size candy bars, snack mixes and items like pencils that students would find useful.

"I highlight personal attention and customization in my baskets," she added.

Currently, Albrecht is the only employee of Amy's Creative Touch. She hopes to hire additional workers who will help with a busy holiday season next fall and run the business next spring while she studies abroad in Greece.



"I'm not sure if a basket business is what I want to do for the rest of my life, but it's a good place to start," said Albrecht. She hopes to attend graduate school and continue working for herself in the future. Albrecht considers this first business a learning experience.

Amy's Creative Touch received 134 orders last year and about 30 so far this year, mostly from the families of college students. Albrecht hopes to expand the business to corporate clientele with a new line of gift baskets.

But for now, Albrecht is continuing to learn, and the loan will help her business grow.

"I received the actual money in December. Before that, I was working off of a loan from my parents," said Albrecht.

The $5,000 from JCEL is expected to be paid back after graduation, with either 6% interest or a stock option.

Hannah Rauterkus / Juniatian

Sophomore Amy Albrecht receives a $5,000 loan from JCEL to help finance her gift basket business.

T-shirts be gone

New and improved fundraising ideas

Corinne Barabas

In with the new and out with the old. Students do not need to feel obligated to purchase yet another t-shirt to support a group on campus because new ways of fundraising are becoming more popular.

Recently, many Juniata students and faculty members have come up with various fundraising ideas other than the typical money makers. Innovative and unique, these new ideas are gaining support from most everyone on campus.

There have been numerous fundraisers that are not quite the ordinary. Date auctions, duct taping President Kepple to the gym wall and HOSA's comfortable hospital scrubs for lounging are just a few.

Circle K is currently organizing a Dance Marathon to benefit Children's Medical Network.

"Students will find sponsors to match the time that they dance," said Elena Amato, who is in charge of this event. "Students will raise money for a good cause, while having a really great time moving and grooving."

Other groups are also raising money for charities. Habitat for Humanity collected clothes from students and then resold them for a dollar. Proceeds will go to local charities. The Vagina Monologues, a performance put on by Juniata's Women's Group, benefited the local women's shelter in Huntingdon.

The Psychology Club is currently conducting a magazine fundraiser, in which students can purchase subscriptions of a wide variety of magazines at reduced prices. Junior Angela Davidson, who discovered this fundraising idea on the Internet, said that "this fundraiser was great for our club since we're very small and it's hard to carry out a complex fundraiser that requires participation from a lot of people. It's been very successful."

Many Internet sites have great ideas for college club or organition fundraisers that are easy to do and make a good profit. These sites include www.efundraising.com, www.fundraising-ideas.org and www.alternativebreaks.org.

Websites featuring fundraising ideas:

efundraising.com
fundraising-ideas.org
alternativebreaks.org

In addition to the fundraisers already being done on Juniata's campus, there are many that schools around the country are running and participating in.

Some new ideas that have not been done at Juniata yet include:

Jail and bail, where one student pays to put someone in a mock prison, and bail arrangements must be made before they can be released.

A King or Queen of Turkey Legs Competition, in which pictures are taken of people's legs, and a vote is taken on whose is the best looking.

continued page 4

Student activist speaks out

Freshman brought speaker, continues fight against Alaska oil vote

Maria Piazza

The U.S. Senate voted 51-49 last week in a move that could open protected land in Alaska to oil drilling. For at least one Juniata College student, the vote is a personal disappointment.

Freshman Sarah Hall has an internship this semester with the Alaskan Wilderness League (AWL). She has raised awareness of the issue on campus and continues to work despite the frustration of the Senate's action.

"Right now, I feel like what I'm doing is in vain. I'm frustrated that I haven't really made a visible difference, but there's still hope I think," said Hall.

According to the AWL website, http://www.alaskawild.org, the Senate vote is one step of a long budget process that may not win final approval.

Last month Hall brought Chad Kister, a spokesperson and lobbyist for the AWL, to campus to speak about the damage that could be caused by oil drilling in the Arctic National Wildlife Refuge (ANWR). In the month before the vote, the AWL increased its pressure on U.S. senators to face the facts about the problems with drilling in the Arctic.

> ***"Right now, I feel like what I'm doing is in vain."***
>
> *- Sarah Hall, freshman*

According to a study by the United States Geological Survey, the amount of oil that can be found in Alaska will only last the United States for six months, and it will not become usable for ten years. The AWL and people like Hall are dedicated to preventing any drilling for this reason and many others.

Hall has given serious thought to the damage that the oil companies have caused in the past to Alaska and is excited about her internship with the AWL that will allow her to prevent further damage. Her internship involves organizing speakers, talking to local politicians about the dangers facing ANWR and educating others about what the AWL does and why ANWR is worth saving.

Hall said, "I'm doing this internship for an idea of what I can do with my POE after I graduate, but mostly I'm doing [it] because I love Alaska and its natural wonders."

Kister claimed that drilling would also kill 86 percent of the caribou living on the Alaskan coastal plain and in a surrounding 30 mile radius. The caribou feed wolves and 17 villages of the Gwich'in Native Americans living in ANWR. The polar bears that inhabit this area are often classified as nuisances by the oil companies and killed on site. Over 100,000 birds will lose their nesting grounds along the coastal plain of ANWR because of the oil drilling, which will occur almost entirely on top of this area.

Kister said at his lecture, "Oil drillers who promise only a 2,000 mile area of intrusion into the refuge are twisting the truth. In reality they will only build on a 2,000 mile area, but the effect of the toxins and wasted oil drums from the drilling operation will be felt throughout the 19 million acres that comprise the Arctic National Wildlife Refuge from the arctic char fish to the grizzlies."

AWL sees oil drilling as a toxic accident waiting to happen, but many in the federal government and oil drillers seem to feel that it is a worthwhile investment. Oil energy is not renewable, and the pollution caused by oil usage is too great to be thought of as negligible. As part of her internship with the AWL, Hall has called Pennsylvania senators Rick Santorum and Arlen Specter to encourage them to vote against invading the last five percent of untouched land in the U.S.

Change is hard, but Hall and the AWL need help now more than ever. They encourage students to call their senators at (202) 224-2121 to voice their opinions about the effects of oil energy and drilling in the Arctic.

Student taught arabic class

continued from page 1

it. Then Joe [Viscomi] said, 'we'll have a class.'"

Since the beginning of the semester, Al-Dabbour, Touzani, and Viscomi, accompanied by friends Souzan Kurdli and Kurdo Othman have shows fellow Juniatians how to copy the letters: miim, ghayn, Qaaf. And another teacher, Zineb Gormat, visits and spells out numbers: wahid, itnan, talatah, and so on.

Zineb promises that if her students memorize their numbers, one through ten, then she will prepare an authentic Arabic meal.

The classes are taught in Good Hall, room 320 every Monday night at 7:30. Anyone in the community can still join if interested.

"I can't pronounce any of the sounds, and I admire the people who valiantly struggle to pronounce awkward sounds," said Todd Bokin, a frequent attendee. "It's sort of chaotic at times, but it's an enjoyable experience."

Chaotic, perhaps, but it is a promising gift bestowed by the student teachers. At Washington D.C.'s International Language Institute, for instance, lessons are $320. At the Boston Language Institute, Arabic lessons can cost $495.

Arabic Letters

م	غ	ق
miim (M)	ghayn (G)	Qaf (hard K)

And, as Touzani noted, many take Arabic courses in his home country of Morocco for $1500 for three weeks. But here at Juniata, lessons are free.

At such a price, the efforts of these instructors are quite noble. It's one thing to be a student teacher, but it's quite another to student teach in your second language.

"Well, for me, to teach is a duty," said Touzani.

In addition to teaching the awkward characters, pronunciation, and numbers, the teachers have also gone over common vocabulary. Students all learned how to say "Salamu Alykum" on the first day of class, and continued onto phrases like "good evening," "thank you" and even "my name is…"

Though students giggled over the feeling one gets in the throat as they say, "ayn," they realized they were acquiring an invaluable tool in their increasingly globalized world.

"There is a barrier between our cultures. There are so many misunderstandings. We just want to make it clear that there is fun and normal stuff where we're from, too," said Al-Dabbour. "It's not about terrorism, it's about breaking the barriers."

The numbers and the funny pronunciations meant so much more to students of this new class: a window to the realities of another increasingly topical culture.

As the Arabic students leave, they quietly say to their instructors: *Shokran* (thank you).

Fundraising ideas

continued from page 3

Teams can compete against each other in truck pulls to see who can pull it further and of course athletic tournaments such as dodge ball, ping pong, horseshoes, bocce ball or other uncommon sports.

Talent shows are also another beneficial idea for raising money and having a good time watching friends show their skills at something.

Many of Juniata's clubs are finding out that fundraising does not have to be a chore. Plenty of outlets exist to help campus organizations to come up with new ways to make some cash while still having a good time.

House in distress

continued from page 1

function.

Residential Life Director Tim Launtz – once adamant that a one-year hiatus from the House was necessary – reinstated it, insisting the residents' behavior will change based on their proposal.

"Everything in their new proposal has been worked out," Launtz stated, referring to concerns regarding the misbehavior of current House residents.

Launtz denied that House residents promised anything other than the correction of current problems.

There were many charges against the House, alcohol use being only the most prominent.

As Dean of Students Kris Clarkson pointed out, the House is specifically designated as alcohol-free housing for students committed to abstaining from substance use.

"It was supposed to be a place where students could live who would not consume alcohol," said Clarkson. "The current residents have taken it upon themselves to change the rules to allow residents to consume alcohol outside of the House," which Clarkson stated was against their fundamental commitment to House policy.

House residents did not deny using alcohol.

"The kids here were going out and coming back after using alcohol," said freshman House resident A.J. Farman.

House residents also jeopardized their home by allegedly inviting and admitting only track and cross-country friends to their activities. Again, House residents did not deny the truth.

"The selection process was that of a fraternity," said Farman.

One of the great benefits of Juniata, Dean Clarkson points out, is its resistance to such exclusive groups. "We don't have a Greek system. The House needs to be open to anyone" Clarkson stated.

Launtz explained that in the current entry process for the House, residents "have gone through their advisors, each submitting a statement of commitment to the House." According to Launtz, the current resident group was assembled prior to bidding based on "common interest."

However, Residential Life hopes to remedy the track frat problem in the future.

"After this year's selection, you will need to apply to live in the House," Launtz pointed out, "which will be much more fair."

Another charge against the House held that activities failed to occur there this year.

Farman explained that this was due to a lack of funding. "Because the funding fell through, we had no money. We were scraping together money." But Farman later claimed that activities were still occurring, "Activities were happening, but they were never reported."

Clarkson does not buy this plea. "They're making excuses if they say 'We don't have a budget.' There are plenty of groups on campus with no money, yet they somehow find money and support. [House residents] did not come to their advisors."

An additional concern included meeting a request for a comparable female residence. Moving the House remains an option to serve female students.

"We may take 1631 Moore Street and make that the [Alternatives to Alcohol] House, which would serve both sexes," Launtz indicated. This housing would enable one gender of students to live upstairs and another gender downstairs. Each apartment is outfitted with bathroom, kitchen and bedroom facilities.

For next year however, the House will remain at its current location with some of its current residents. Launtz concluded that conditions, for him at least, have been met by these residents, and emphasized, "It would be wrong for me to indict everyone in The House."

Civil Rights: Reunion and Renewal

continued from page 1

Lytle in his diary at the time. "I'd hate to have something happen and not have told Mom and Dad. But this is something I feel so strongly about, I don't think they understand. I don't quite understand it myself, I shall go…I shall go. This I understand."

The group encountered an unmatched, unbridled hatred in Alabama. In a now legendary Life magazine photo (see front page), Michel, a senior in 1965, wipes blood from the face of Kinnel, Juniata's then poet-in-residence.

"They went right for Galway," stated Michel in an interview for People magazine. "The hit him on the head and it just popped right open and bled like hell." The photo was taken by noted civil rights photographer Charles Moore.

"The hatred you could see on those people's faces," continued Michel. "We were naïve. All of us were naïve."

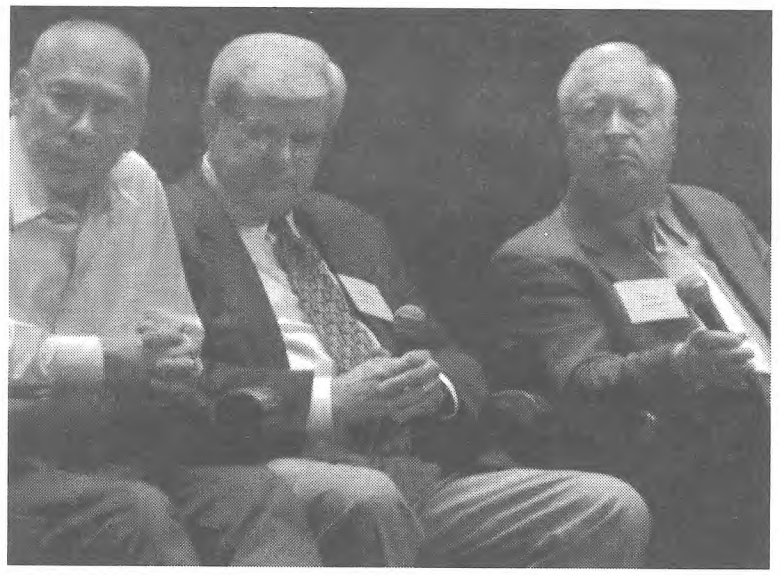
The brutal events of that day, as seen through the eyes of Juniatians, were forever memorialized when Lytle donated a unique collection of "Bloody Sunday" memorabilia to Beeghly Library. During its dedication on March 20, Lytle presented John Mumford, director of the library, with the handwritten pages of his 1965 diary among other items.

"I didn't give these to you before," said Lytle, holding back tears.

"This place can't be real."

- Chuck Lytle, in his journal

"But now I realize how important they are."



The journal tells of the Juniata group's travel to Alabama.

"God Almighty, this place can't be real," Lytle recorded in one of his most notable journal entries. "No American flag on the Capitol, just state and Confederate. Where are we? It can't be in the U.S."

Indeed, the southern states were very much like a foreign country in those years. While northern states like Illinois had African American voter turnouts as high as 68%, Alabama had only 6% of its eligible black community registered to vote. In fact, southern states went to elaborate lengths to prevent members of the minority from voting.

All potential voters were required to pass a complex literacy test, often being required to interpret a passage of the state's constitution. These tests were designed to minimize the impact of the black electorate and prevent them from voting.

Of the experience, Michel said, "I wasn't a hero at all.The real heroes were those people who lived through it [the civil rights movement] and through whatever that meant."

Photos: *(Top): Eight Juniata alumni returned to share their experiences 40 years ago, including why they went to Montgomery, Alabama to take part in the uproar. From the right is Don Ardolino ('67), Gary Rowe ('67), and Chuck Lytle ('68). (Bottom): After the panel discussion ended about 40 students joined in a candlelight vigil set up for the two-year anniversary of the Iraq war. Students listened to testimonies and prayers and engaged in a moment of silence to end the evening.*

"Dog culture" in danger?

continued from page 1

your pet into your office in any other workplace environment."

The administration is trying to determine whether or not restrictions are stringent enough or if pets should be prohibited altogether. Provost James Lakso confirmed that the administration is leaning heavily toward the latter.

Lakso said of the campus, "There is a dog culture that goes back a long time and will probably have to change."

Some faculty members are very opposed to prohibiting pets on campus. Philosophy professor Janet Lewis said, "It is stupid to pass a rule governing everyone's behavior because of one or two offenses. The more rules that govern people's behaviors, the less freedom there is."

Lewis owns five dogs who have all visited her office at one point or another. She is respectful of her students and colleagues and makes appropriate accommodations for them.

She believes this issue should be handled on a one-on-one basis. She also feels that it is the students' obligation to tell an offending faculty member if they do not feel comfortable with a professor's pet.

Math professor Sue Esch brings her golden retriever, Midy, to school every day and keeps him in her office. She has never been concerned about the liability issues associated with bringing her dog to school. On the first day of classes, Esch makes an announcement. If students are afraid or allergic she will meet with them in a location outside of her office.

Esch said that if she could not bring Midy to school, she would not spend as much time at the College. Esch added, "Faculty are allowed to bring their kids and should be allowed to bring their dogs too. The great thing about Juniata's culture is it allows faculty to balance their commitments."

Esch has always been conscious of Westbrook and others. She used to unleash Midy behind the baseball field when no other person or canine was around. This time outside was very important to her and Midy, but Esch cannot unleash her dog anymore. She claims that Midy does not need a leash and does not get any real exercise when restrained.

Esch asked, "Will I be able to walk Midy on campus this summer? I bet not."

Anthropology professor Paula Wagoner brings her dog Sadie to school every day as well. She said that she keeps Sadie in a kennel in her office while teaching classes or advising students. Sadie is also always on a short leash when Wagoner takes her out.

Senior Alex Monteleone supports dogs being on campus. He is a dog lover and says that if dogs are friendly and don't bark much, he does not see the harm in bringing them to campus.

Wagoner said, "Many – not all – students enjoy Sadie and say she is filling the void they feel for their own dogs at home. I think she is a cheerful part of the campus community."

Juniata College prides itself on its close-knit community with a friendly campus culture. Faculty pets have been a long standing part of this culture. They encourage dialogue and connection between students and faculty that might not have existed otherwise, as well as contribute to a low-key atmosphere.

Liability issues surrounding this subject, however, are real, and it seems that pet prohibition has been a long time coming.

Roving Reporter:

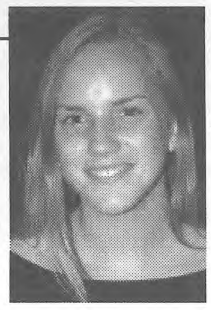
Is it unprofessional for faculty to bring pets to campus?

by Hannah Rauterkus

"I don't like the question...how exactly does bringing pets to school relate to professionalism?" - *Candice Hibberd, junior*

"For a campus this small, close-knit and 'liberal,' I think it's great that professors can bring their pets to school. It makes for a more friendly and laid back atmosphere for students in general." - *Han Nguyen, junior*

"I have no problem with faculty bringing their pets to campus. Actually, I think it's cool. They should do it more often. Ci-Ci might be the coolest dog on campus!" - *Tim Gill, freshman*



"I think it's unprofessional for professors to bring pets to class but not to keep them in their office." - *Hannah Lowe, sophomore*

Apathy is Lethal

Low Prices. Harassment. Worker Abuse. Discrimination. Every day!

Mary Gardiner

I've heard it over and over again:

"There's not one place in Huntingdon where I can even buy underwear!"

"I just want to go shopping!"

"This town sucks."

So when, finally, we got word that there is—hoorah!—a Wal-Mart coming to town, students climbed the metaphoric rooftops and jumped for joy.

But it is that very Wal-Mart that will lead to the detriment of Huntingdon, Pennsylvania.

I won't deny my own misgivings. I want my junk, whether it be made in sweatshops or falsely labeled. And I want it cheap, say many of us, whether or not we'll admit it. I want

There is no way that our town will be able to recover from this assault on Penn, Washington, and Moore Streets.

my Mary Kate & Ashley line, and I *definitely* want to be able to stop on the McDonald's in that Super Wal-Mart on my way out.

You get the drift. I love visits to Wal-Mart on occasion, never mind the unambiguous worker abuse, serious discrimination and other scandals the corporation has engaged in. So their employees have been sexually harassed. And their products are often overpriced. So what--their bags are cute, and they have the *best* posters.

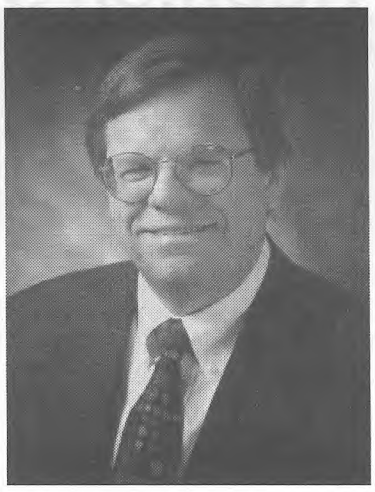
But friends, I tell you this: I came to Huntingdon in appreciation of Mark's Cutlery & Ammo, the Payless and our four most prized second hand shops. I came to Huntingdon from my hometown in cosmopolitan DC area in the name of 49-cent cans of Grizzly, and for the Clifton 5 and, especially, for our Family Dollar and two—count 'em, *two*—Dollar Generals. Not for Wal-Mart.

Groundbreaking was last fall at the store's future site, out by our town's other famed employer, the prison on Route 26. Did you know that this Wal-Mart will be the 80th in Pennsylvania alone? That worldwide, a new Wal-Mart opened every three days, last year?

And yes, it brings jobs, but only by taking them from other businesses in town—ergo, the owner of today's small discount shop is the toilet cleaner of tomorrow's glorious Wal-Mart. (Oh, and as for benefits—only 38% of workers are covered.)

As I said, Huntingdon, as we all know, has some serious development issues to tackle in the upcoming weeks. But there is no way that our town will be able to recover from this assault on Penn, Washington and Moore Streets.

I've even been told that Sheetz employees are anticipating Wal-Mart's presence, as Sheetz "policy" requires that wages be increased when Wal-Marts are close by. One iniquitous company supporting another, I guess.



Now, of course, Huntingdon has its misgivings. There have been limitless times that I have wanted to rip my hair out every time I pass its umpteen-bajillion churches, or when I hear about its unemployment rate.

And I'll admit it, I've done my fair share of griping and moaning about how it takes me an hour drive to get a tune-up for my car.

And when I want to go see Hotel Rwanda, I know that there's not a chance in hell that it will come to Huntingdon. And when I want to get furnishings for my dorm, I have to drive out to Altoona. And if I want to shop, I have to traverse over hills and valleys to Logan Valley, or scale a mountain to Nittany Valley. And when I need to find a real library, or even a bookstore, I have to spend all of that extra gas money. The list never ends…

But is this what Huntingdon needs? Or, might I elaborate: Is this big box (and all of the issues that come with it) worth dealing with so you can have your cheap underwear and your Martha Stewart bedding

continued page 7

Why so little time to register?

Did we change CAI to IC to save money?

Presidential Perspective

"Next year's course schedule was released during spring break. Since many students travel and may not have Internet access, and registration began the day classes resumed, does that really encourage students to think ahead and take care with their academic plans? Especially with a new registration system, wouldn't more time to review the schedule help avoid problems later, rather than rushing to meet with advisors and finalize registration before classes close?"

We have always released the next year's academic course schedule during spring break due to midterms and official POEs submissions being the main focus for faculty and students before the break. We did push up the registration schedule by one week, hence the first day of your return to allow juniors three days to register first and then sophomore starting next, to pre-plan and to familiarize themselves with the new on-line registration before they sat down with their advisors face to face on March 21.

This is our normal meeting time in our academic calendar for faculty and students to register for the next year. We foresee resuming our normally scheduled time next year whereby students can view the schedule the week they return and will register the week following and getting advisor approvals.

"According to the Registrar's e-mail to all students, the new IC requirement can count as a CAI course. Does that mean that IC itself is just an effort to save money, since a team of two professors teach IC rather than CAI's team of three professors?"

The faculty made the change from CA1 to IC to encourage more interdisciplinary courses but to allow the interdisciplinary focus to extend to issues and topics other than culture. The change has nothing to do with saving money. The number of students in any class will depend on the number of faculty teaching the course. For example, a CA1 course taught by three faculty could have had 60 students (20 per faculty member) while an IC team of 2 would have only 40. The enrollment per faculty member will be the same in IC as it was in CA1.

Letter to the Editor

Juniata's Real Underdog

Mary Gardiner's article in February 24th issue of Juniatian "Nagengast Sets Sights on Africa" raises an important issue regarding the shortage of course offerings in the Politics Department that cover areas other than the US Constitution, US government and European Politics. Professor Nagengast's brave venture out of his area of expertise is a welcome move in this direction (whether or not you believe his stated reason of being too bored with the success of Europe), but it is no way to confront the problem in a systematic manner.

As Mary points out, the entire Politics Department currently employs only three professors. Given that the academic and professional merits of these professors in their respective areas of expertise are *par excellence* (and as has been my personal experience with some of them, they do their job in a commendable way) it can't be denied that there is a felt need for addressing the departmental deficiency in other areas of specialty. As evident from Professor Nagengast's comments in Mary's article, this is fact that the departmental staff themselves will admit to, and hope to see addressed.

Although this college is known for its strength in the natural sciences, it is high time that the administration acknowledges the contributions as well as the needs of the social sciences. Juniata has much to pride itself on in the social sciences and the humanities. Indeed, the existence and robustness of the social sciences is central to Juniata's claim to be a Liberal Arts institution. With what resources at its disposal, the Politics Department contributes greatly to the campus environment at the same time as accommodating the needs of its students. It is true, however, that some needs, such as the present writer's 3-year-long craving for classes in the areas of Comparative Politics, Politics of the Developing World, and Near Eastern Studies are hard to accommodate given the current state of affairs. One hopes that taking note of this important matter, the administration gives this area the deserved attention.

Letter to the Editor

Blue Eyed Mexican

I am hardly a novice traveler. My previous experiences abroad have provided me with a framework to wax and wane with the daily linguistic, cultural and gastronomic surprises. But, despite my previous experiences, I was not prepared for the realization that I have a race.

I was prepared to be identified as an American. My clothes, my mannerisms and even my "distinct gait" (as an American friend once described it) are dead giveaways anywhere I go. Even if these indicators were somehow missed, my insatiable need to express myself ensures that any new acquaintance will inevitably encounter un acento bien feo.

What I was not prepared for was a never ending discussion of my skin tone. I left Juniata "raceless" (as last semester's *It's Ok to be White* speaker described the Caucasian experience in the United States) and landed in Mexico a minority; subject to staring, discussion, stereotypes and even a low level of danger.

On a large scale, Hollywood and Spanish occupation have left Mexico reeling with an image of "the beautiful Caucasian." This old image of the desirable has been mixed with the more recent experience of the not-so-culturally-savvy white (and especially American) exchange students and tourists. These experiences by the Mexican population have mixed a cocktail stereotype that white women are beautiful and desirable prostitutes, payable with promises of love.

My blue eyes separate me from some of the other gringos (which is a pseudo derogatory term for all Americans, but is often employed to avoid referring to physical Caucasian features directly) whom I would have thought of as being in the same racial category if we were in the United States. Brown-haired, brown-eyed, Caucasians-Americans are still "gringos" but, blue, green and gray eyed people are given a noticeably elevated level of attention.

This stereotype is indulged in liberally by strangers and drunks who stare and comment with gusto on the streets, in clubs and elsewhere. Meanwhile, the school children in the elementary school where I teach English have a healthy curiosity and innocence which limits their questions to whether my hair, skin, and especially eyes, are real.

Despite these direct references to my color, the people that make me most aware of my race are my politically correct friends, classmates and even professors.

These "good liberals" (as I like to call them) are fully aware of the implications of race, and are sometimes rendered fumbling and uncomfortable at my very presence.

Some of my more bothered good liberal friends keep trying to convince me that I have Native American blood in me…. I don't. And more importantly, I'm comfortable with my race; they don't have to apologize for me.

I've been struggling with how I will use my experience with race in Mexico to better understand race in the United States. I tried first to understand by searching for a racial group in the US that I could use as a tool. What I found was that I couldn't superimpose my experience onto any other racial group.

I think what I've learned here is that one of the confounding things about race is that experiences can't be easily compared. Every racial group experiences different stereotypes and reactions in different settings. And every individual in a racial group has his or her own unique experience with race. What minority groups share in comparison to majority groups is an external (and eternal) reminder of being "different."

So, for now I'll stock-up on sun screen and plant another aloe in the yard. Insult to injury, as the saying goes. It never ceases to amaze me that my skin can be so real and so theoretical all at the same time.

Apathy is Lethal

Huntingdon Wal-Mart

continued from page 6

line? So *we* can have that?

I think there's a better way to go about fixing unemployment than bringing this monster into our town. The birthplace of our national motto, the hometown of several 19th century heroes, like General David McMurtrie Gregg and J.C. Blair. There are *43 buildings in the Huntingdon Borough alone* that are on the National Register of Historic Places. Doesn't it matter that the legacy of Huntingdon is being trampled by a big blue architectural nightmare, with devilish business practices?

William Smith, the founder of this once thriving town, must be turning in his grave.

But I have my cheap underwear.

Understanding sexual assault

Students prepare production written by Paul Blore

Maria Piazza

According to a report released by the U.S. Department of Justice, the occurrence rate of rape has gone down by 54%. That number, while significant, has not decreased enough, and a group of dedicated students at Juniata is working hard to increase awareness about sexual assault.

Working with Beth Williams, of the Health and Wellness Center, senior theatre major Paul Blore and group of artistically-inclined students are producing "Shards of Skin & Porcelain," a play that aims to educate its audience about the aftereffects of rape, and the damage that sexual assault inflicts on its victims over various periods of time. The production will take place on March 29 at 8:30 in the Ellis Ballroom.

"Sexual assault continues to be a problem on all college campuses and I want to bring [awareness] to the forefront at Juniata," said Williams, explaining the piece's importance.

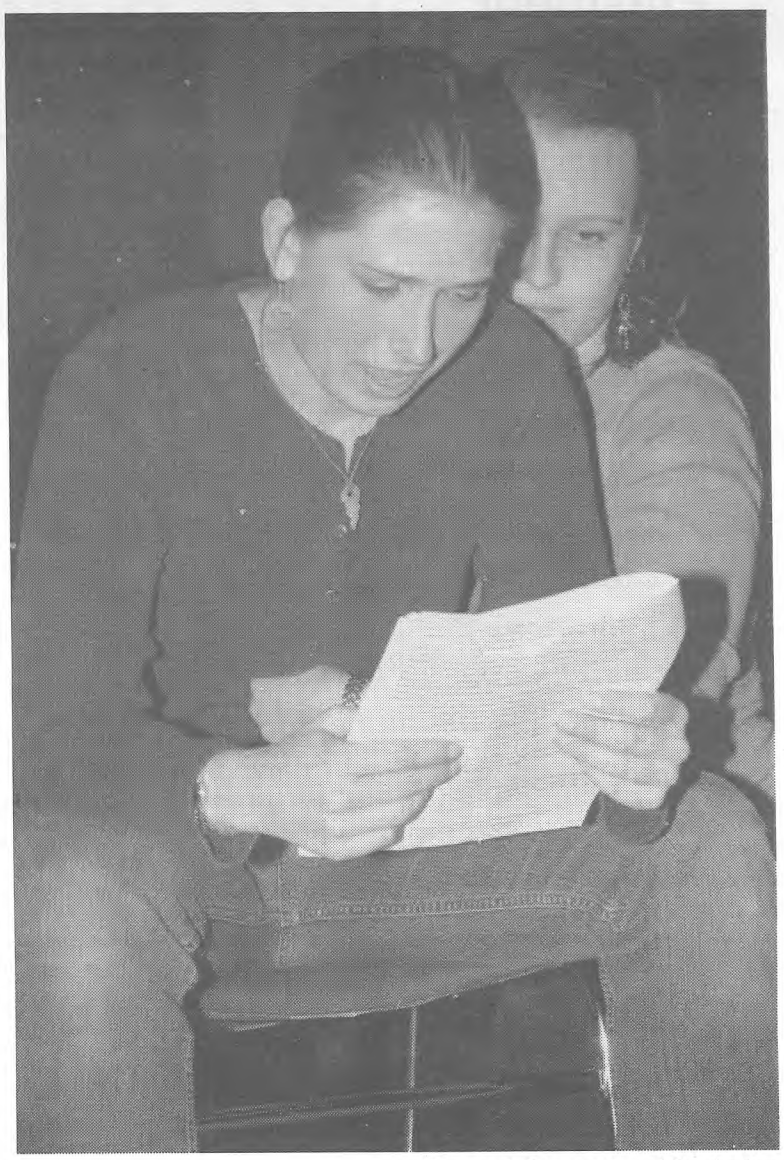
Based on new material written by Blore, the play details how sexual assault victims deal with the repercussions of rape. The plot revolves around three characters. The first is Tara, a woman whose rape occurred while she was in junior high. Tara is still dealing with the consequences of what happened to her, using outlets such as poetry and therapy, and by learning how to deal with another assault.

The second character is Kristen, a young woman who was raped just a few days before the play begins. Tara serves as Kristen's mentor and guide, but Kristen differs from her in that she uses partying and excessive drinking as an escape from her emotions after the assault.

The third character, Riley, is not a stereotypical rape victim, and represents a group of victims that is commonly ignored when the public thinks of rape. Riley is a young man whose rape has left him confused about how he should handle his attack. He uses sketching as an emotional outlet as he tries to work through what happened to him.

The characters are not based on actual people but instead are a compilation of different people who have been raped. Blore wrote the script in a way that will generate audience sympathy and understanding of both these characters and others who have been sexually assaulted.

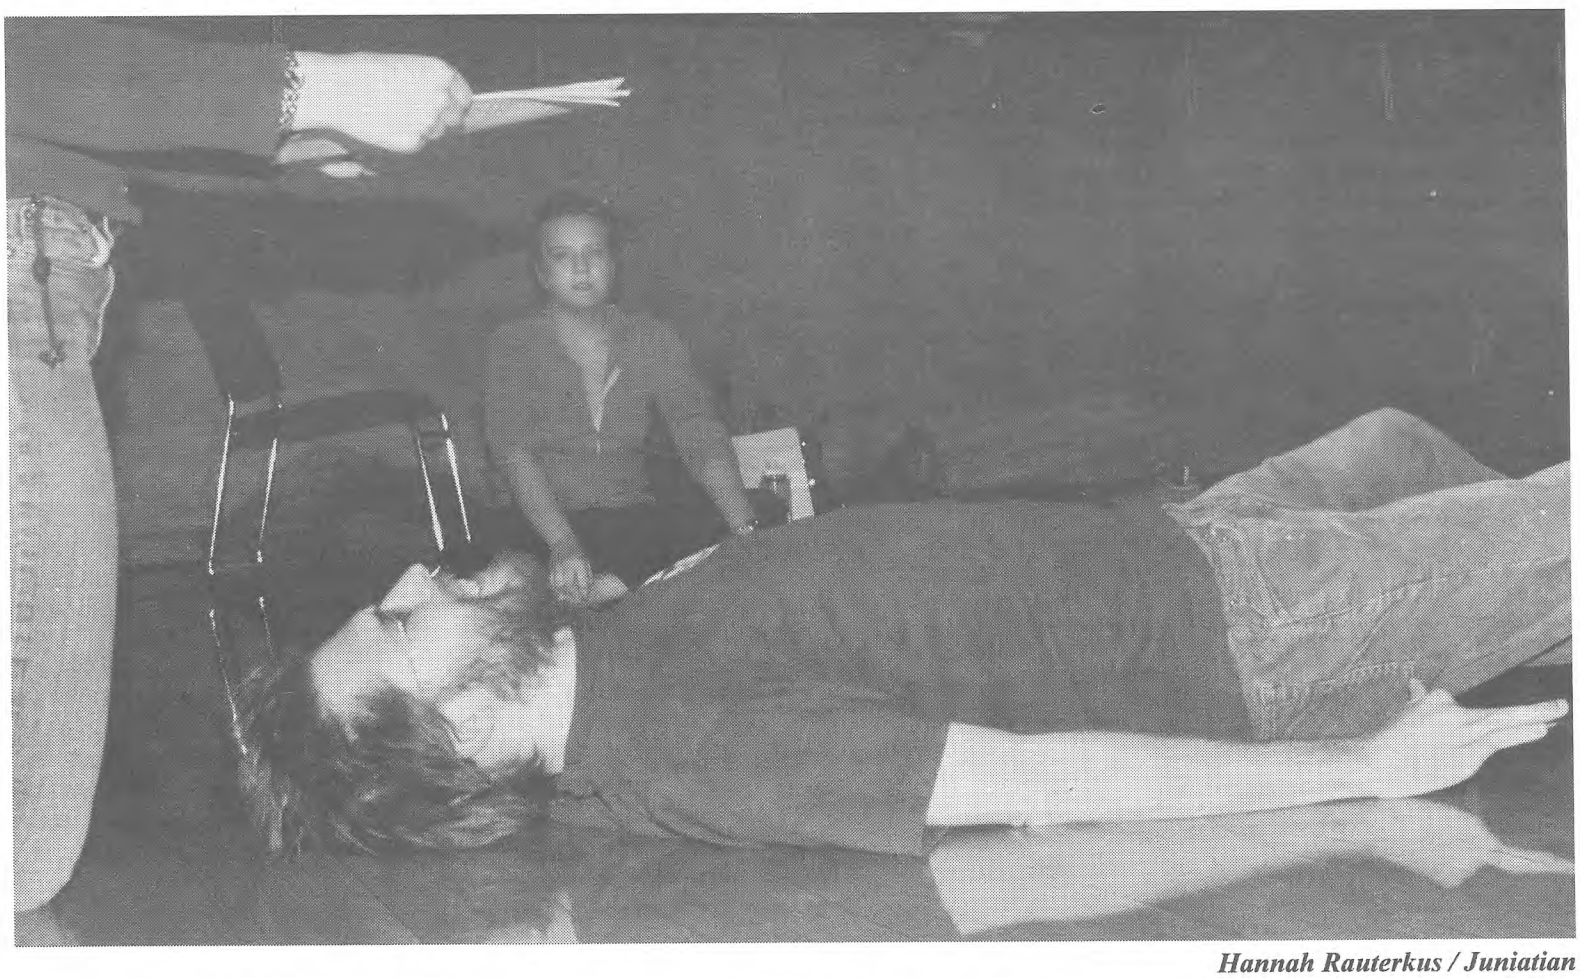
"It is, in truth, about the reality of rape and what it does to people."



- Paul Blore, senior

Blore said, "Writing the script was very important to me, a sort of therapy that shows many of my thoughts and feelings about rape, but it is in truth about the reality of rape and what it does to people."

This production requires a great time commitment from the students who are involved with it, as they work to piece together the production in a short period. Senior Brandi Martin is the production's principal director, with senior Becca Shoaf and sophomore Moyra Mauger as her assistant directors. Senior Jen John is the stage manager.



The play is completely student run, though Professor of Theatre Andrew Belser is assisting the cast and crew with questions they may have. Despite the time constraints, the creative team behind "Shards" is quite confident that their hard work is well worth their while.

After the performance on March 29, Williams will lead a discussion on rape, as well as the actors' thought processes. "Shards of Skin & Porcelain" promises to be a true piece of interest to those who want

Student artists shine in Shoemaker Gallery

Jasmine Frishkorn

Ever remember hearing the phrase "a picture is worth a thousand words"? Well, there is no question that the several pieces of artwork on display at Shoemaker Gallery in Carnegie Hall are truly worth more.

Every year, the Juniata Art department organizes the student art exhibit. This year, the exhibit opened on Friday, March 18 with a reception that was held from 5:00 p.m. to 6:30 p.m. The reception gave featured students a chance to see how others respond to their art. The exhibit is open to the public and to students and faculty, who are encouraged to bring friends and family to help celebrate the arts on campus.

Students enrolled in art courses during the 2004-2005 academic school year were eligible to be entered into the show with a recommendation from their professors. The studio faculty selected works from students that were representative of high achievements and excellence in their particular disciplines of art.

"I am so pleased by the quality of fine arts produced by our students at Juniata. It's a pleasure to showcase their accomplishments in the museum," said Nancy Siegel, director of the museum and an assistant professor of art history.

This year, there are forty-three works on display in Shoemaker Gallery, from thirty-four students. The works of art represent the diverse art courses offered at Juniata.

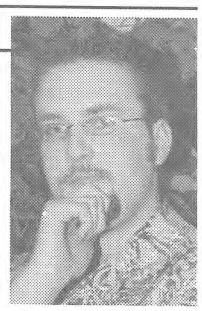
"The show features works on paper, computer art, digital as well as traditional photography, ceramics and painting - with a very eclectic mix of subject matter," said senior Sarah Beaver, whose work is displayed in the exhibit.

The students' work would not be a success if it were not for the numerous hours of planning and organizing that went into the creation of the art exhibit for Carnegie Hall. Students from the Museum Practicum course, along with the faculty and staff, designed and organized the show for Shoemaker Gallery.

"The works in this show are all very different and represent diversity in the arts," said senior Marylee Shumaker, a student in the Museum Practicum course.

The exhibit will remain on display until Saturday April 9. Everyone is encouraged to visit the museum and bring friends to admire the hard work and creativity of Juniata students.

Some of the other students featured in the show are seniors Lynn Rassel and Amory Koch, juniors Ashley Hughes, Heather Hodge, Celina Isenberg, and Lauren Forster and sophomores Emilee Spokus and Jillian Seraphin.



Hannah Rauterkus / Juniatian

Sophomore Emilee Spokus poses next to her photograph during the opening night of the Student Exhibit. The photo brought back fond memories of her summer trip to England, where the photograph was taken.

The museum is located in historic Carnegie Hall at 17th and Moore streets. Museum hours are Monday through Friday, 10:00 a.m. to 4:00 p.m., and Saturday, noon to 4:00 p.m. For more information, call the museum at 641-3505, or visit the Juniata College website at www.juniata.edu/museum.

The Bookmarkables

Nathan Thompson

Do you ever feel the need to reach deep into the closet and dust off an old favorite? When I do this, I always find myself trying to remind everyone of its untapped joys. Of course, this process only occurs after I finish cleaning up everything else that fell out of the closet, but I digress.

Earlier this month, I was reminding someone of the joys of the Internet Movie Database (IMDb) when upon my ears fell the unbelievable: "What's that?" I was shocked, sundered, heartbroken. There really are no words to describe how I felt, dear reader. It was as if all that I had known about the cyber universe in which we live was ripped out of my chest like that Voodoo heart-grabbing move in "Indiana Jones and the Temple of Doom."

I saved my sanity by dragging said person to the nearest computer and forcibly making them visit imdb.com. Through this horrific experience, I learned that, somehow, there are unfortunate souls out there that have slipped through the cracks. Therefore, I feel that it is my calling to remind others of the all-knowing abilities of imdb.com.

For starters, you won't find a better guide to motion pictures. I do not say this lightly. There is more information on IMDb than in Ebert & Roeper's four combined thumbs.

imdb.com is a must-use bookmarkable

With 400,000 titles and 1.6 million names catalogued, forget the Six Degrees of Kevin Bacon, here you will find all 360 degrees.

IMDb has more information than just actors and motion pictures. The latest TV, movie and celebrity news is also available through partnerships with media sources such as "The Hollywood Reporter," "Studio Briefing" and "WENN Celebrity News." Archives of these sources are available; just in case you want to chart the fact that celebrity marriages usually last a good week.

Of course, you may prefer to check out more useful news, such as motion picture openings, future openings, and box office top sellers. IMDb provides complete background information on all of these films, along with a plot overview and what the latest buzz is for the movies.

If you're a cheap college student who nevertheless still buys legal digital copies of films, the site also provides information on DVDs. This information will include release dates, what special features are included and both professional and amateur reviews of the entire product, not just the film itself.

The Internet Movie Database was started as a kind of hobby for a bunch of movie fans. You may ask what kind of people form a web site like this as a hobby. The managing editor claims to have seen over 7,000 movies in his life. For a man like that, I guess this could be seen as a hobby. Unfortunately, Amazon.com recently bought out the website. This is why you'll see "BUY" links by every DVD title.

IMDb also features some easy navigation. From a catalogued search engine to tabs and sidebars, you're more likely to get lost in your own dorm than on this web site.

Readers, let's get the word out. Imdb.com is a must-use bookmarkable. Even if you're only renting a movie, you should visit this site first. I say this from personal experience. I would have saved $4 last week if I had known beforehand that I could find a more interesting and better developed plot in a graveyard than in "Napoleon Dynamite." Yes, I went there.

Attn: Eagles Abroad not inclined to telepathy

Jay Trovato

While you're abroad, maintaining relationships at home will require several months of long-distance communication. Thanks to the Internet, such communication is easier than ever, but serious thinking must still be done about your approach to keeping in touch.

There are two extremes you need to avoid here. The first is dropping off the face of the earth by not communicating enough. People back home care about you, and want to know what's going on in your new surroundings. Plus, you don't want to be in the dark about the goings-on at home, which you'll eventually have to encounter when your time abroad ends.

The second danger is spending too much time trying to stay immersed in your home setting from a distance. Don't worry – it's not like Juniata where you're expected to check your email sixteen times a day. People know you're abroad, and if it takes you a week or three to write back, they'll understand. Even with official business from Juniata, like registration and room draw, administrators will probably be willing to cut you significant slack.

So what's the best way to stay in touch? Personally, I am a proponent of mass e-mail. I know it might sound impersonal, but, practically speaking, there just isn't time to pump out 150 individual e-mails that say essentially the same thing. I've found that writing mass messages is a good opportunity to reflect on my experiences and share the highlights with those I care about. I spend about an hour writing biweekly messages – in your updates, choose the length, frequency and contents to suit you.

it's not like Juniata where you're expected to check your email 16 times a day

Another nifty invention is the postcard: they're relatively inexpensive to buy and send, and each one only takes about five minutes to write. Postcards – or, even better, letters – let your family and friends know you're thinking about them. Obviously, this option becomes more important for your contacts who don't have e-mail.

Two more dangerous communication lines are the phone and Instant Messenger. It's great to hear people's voices on the phone, but unfortunately international calls are very expensive. Instant Messenger must also be used with care, because time can fly by very quickly when you're on it. You need to limit your time on the phone and IM, although it will be hard because you'll have so much to talk about.

In the end, you will design the communication strategy that's right for you, which will be some combination of phone calls, standard mail, and the Internet. As with all things abroad, make sure that your method of keeping in touch is compatible with your limited resources of time and money.

Do something Mexican!: Put your homework aside for a couple hours and enjoy a long conversation. In Mexico, the crux of everyday life consists of social relationships, not productivity; lunchtime isn't a rushed stop between classes but an opportunity to exchange ideas, jokes and everything in between. The art of conversation is well worth cultivating – you never know what you might learn.

Dear "Be Cool": follow your own advice

Sequel wants to be many things, including "Pulp Fiction"

Holly Brown

Latest on the "eh" list of spring movies is "Be Cool," a sequel to 1995 film "Get Shorty" and based on the book by Elmore Leonard. The movie stars John Travolta as Chili Palmer, gangster turned film producer turned music mogul.

The trick of the movie is that it is conscious of being a movie. The movie takes jabs at sequels, gangster films and musician cameos – all of which have something to do with "Be Cool." But instead of being a parody, or a clever Kaufman-ish play on reality, the movie wanders about from plot to plot, never really accomplishing anything.

I mean, let's be real. A movie that has Travolta, Uma Thurman and Harvey Keitel all cast is trying to say something. And that something is, "I want to be made by Quentin Tarantino."

Travolta does do a good job of looking cool, but his smugness tends to grate on the nerves after a bit. He does what he can to salvage the film, but there's just not enough snap to keep it interesting, despite all the plot twists that director F. Gary Gray tries to pull off.

Thurman is as nondescript as Uma Thurman can be. You get the feeling she's trying hard to play the love interest, but she's far too impressive to be stuck there. Her character Edie ends up being a caricature of someone Thurman is not.

Other stars are just there for the star power and given fairly ridiculous roles. Take Vince Vaughn, for example. He's a witless music producer who thinks he's black. And...that's the joke. Maybe it's funny the first time he says "don't be hatin'" but there's not enough for 120 minutes of movie.

The stealer of the show is Cedric the Entertainer as Sin LaSalle and his humvee-driving posse, headed by Andre 3000. Sin's character is just the right mix of straight-faced seriousness and winking satire that the movie requires. He doesn't have any trouble balancing on the line between the parody and plot.

The movie wanders about from plot to plot, never really accomplishing anything.

The movie's problem is it just wants to be other movies. That's supposed to be the catchy gimmick, but it just ends up being silly. If I want to see Uma and Travolta dance, I will watch "Pulp Fiction." If I want to see sneaky Russian mafia types, I will watch "Snatch." If I want to see the Rock as a gay L.A. bodyguard, I will check myself into a mental institution.

No, I take it back. The Rock as a gay wannabe actor, whose only move is the laughable eyebrow raise, was one of the funniest parts of the movie. And that, dear readers, should tell you something. Unless you're a big "Get Shorty" fan, stay away from this one.

An adventure back to the Wild West

Jonathan Moody

I know what you must be thinking. But please, don't be scared. Murder by Death is no greasy-haired, head-banging, incomprehensible thrash-metal band like their name might suggest. Instead, they are a delightful outfit whose album, "Who Will Survive and What Will Be Left of Them?" sounds like a throwback soundtrack to some cheesy, old-fashioned western that our fathers are all shamelessly guilty of watching. Make no mistake though, Murder by Death takes its music very seriously, which is evident in each emotional ballad filled with a brooding cello and a colorful piano. Rarely does a band emerge with such an unusual sound that seamlessly combines creativity and appeal to create an inspired masterpiece.

Adjust those holsters and saddle up partner. "Who Will Survive…" is a concept album that tells that story of a old western town that is under assault by the Devil and his demonic cohorts. It begins with an old-fashioned barroom piano that eases the listener into the gritty setting. The Devil is in a local saloon, drinking and ranting, until his alcohol-induced sermons are cut short by three gunshots from the narrator. So begins the tale of Devil's wrath and the undeniable fortitude of the human spirit.

This album definitely has that special "something" that elevates very good albums into the upper echelon of greatness. It's in the finely tuned placements of such effects as the narrator sipping on a whiskey jar in the beginning of "Three Men Hanging." Or the suspense that is built and relieved by the use of tempo changes. Or how it is hard to stop listening after a few songs and prematurely end the gunslinger's chronicle. Creativity oozes out of every orifice of this album. No matter what mood you are in, this is an excellent choice.

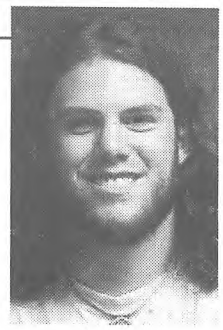
The incorporation of a piano and cello do wonders to further help the listener realize the intended atmosphere. Cellist Sarah Balliet's foreboding solos highlight many of the songs along with creating a sense of foreshadowing to the town's inevitable demise. It really shines through on such songs as "Pillars of Salt" and "A Masters in Reverse Psychology," but is always powerful on the other tracks as well. The pianist, Vincent Edwards, tickles the ivories as if he was a veteran saloon player.

So how did Murder by Death get their deceitful moniker? They were discovered by Thursday's front man Geoff Ricky and signed to Eyeball Records under the name of Little Joe Gould. Not much better huh? Anyways, they decided to change their name to better represent their sound. Their name comes from a 1976 murder mystery spoof of the same name. I'm still just as con-

A very daring and imaginative album

fused by their choice as you are. If I had any suggestions for Murder by Death, it would be to change their name to something, less…er, morbid.

Despite their bizarre name, Murder by Death has fashioned a very daring and imaginative album. In an age when rappers don't even create their own beats (cough cough 50 Cent) and bands are forced by major labels to modify their sounds to suit mainstream tastes (cough cough Evanescence), "Who Will Survive…" is a refreshing surprise. I couldn't recommend this album more. Pick it up. Download a song or two. Go now.



Standout tracks: "Devil in Mexico," and "The Desert is On Fire"

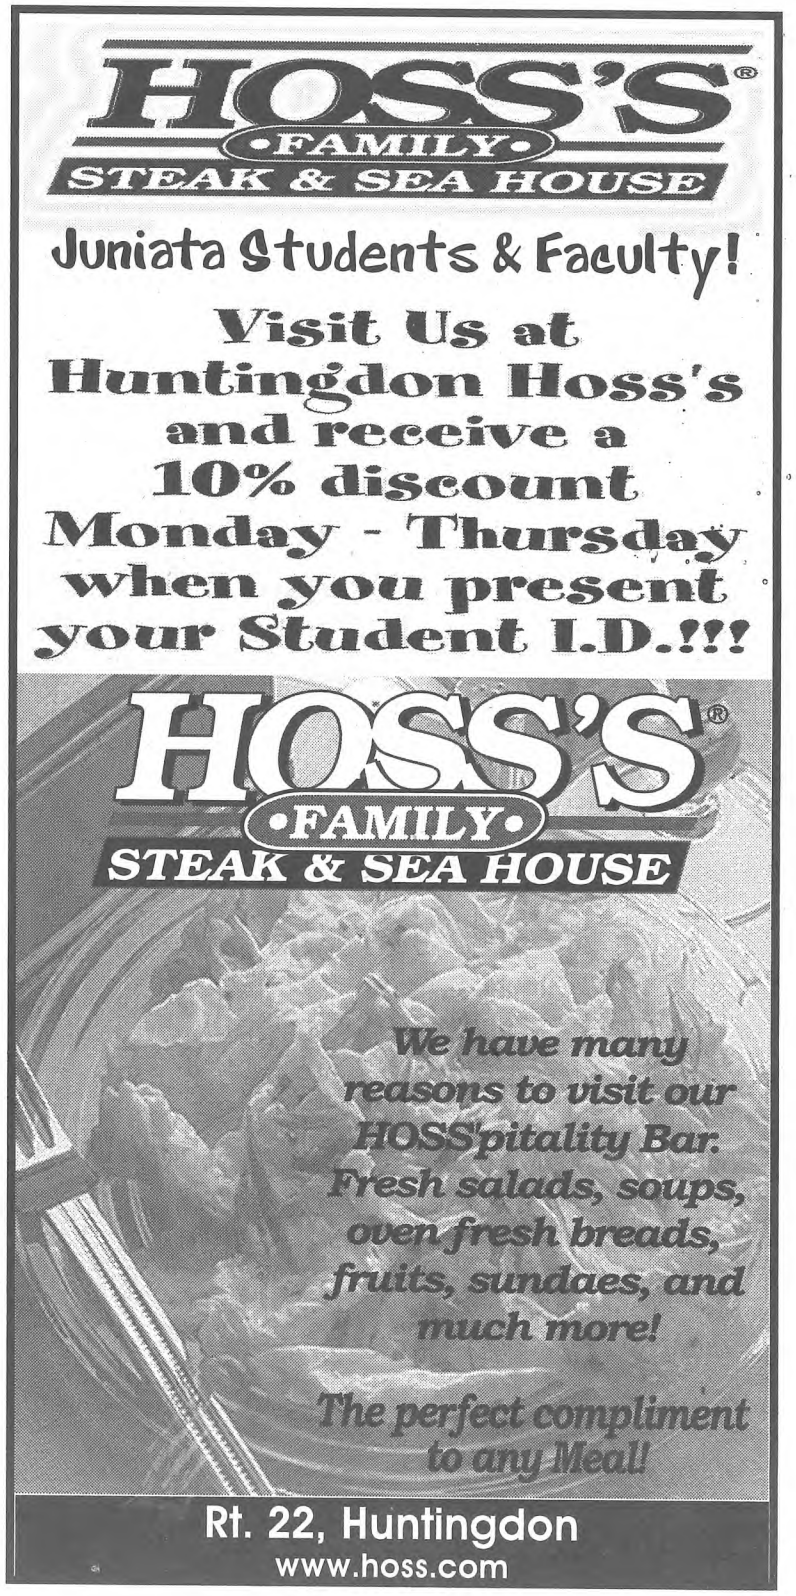
Lyrics Excerpt: "I fought off angels with my hands behind my back/I set the heavens all on fire."

The High Note

Pat McGee and Virginia Coalition looking for a crowd

Jacob S. Warner

Shakespeare would have had to rethink the title had one of his plays been written about music at Juniata College. Indeed, there seems to be much ado about *music*. Although you may not be satisfied with JAB's choice for the spring concert, I would urge you to consider a few things before you decide to stay home and listen to a CD of the band you chose. Sure, its cliché, but two bands are better than one. For $15, we have the opportunity to enjoy an even longer night of music than one might have expected.



Although the Pat McGee Band and Virginia Coalition may not have been your first choices, or even your fifteenth, it is music! Huntingdon is not bustling with nightclubs and bars supporting the local music scene. There isn't really a local music scene to support. Perhaps this is a circular predicament, but all things aside, we should be ready to support whatever music comes into the area, be it at Boxer's, Billie's, J's, or right here on our campus. If music is truly your motivation, I would urge you to lay your pride or prejudice aside, and come to enjoy exactly that: the music.

That said, it's not like I'm trying to promote two bands who have no talent. If that were the case, I'd be balking too. But it's not. PMB and Virginia Coalition are cutting-edge bands comprised of true musicians. This is not cookie-cutter pop megalomania. These guys aren't 'good' because they have the look or the correct flash-in-the-pan sound. Rather, these bands are born out of the grass-roots tradition. They've been together for years, and have played through the ups and the downs, the shows with only family and friends in attendance, and the shows where hundreds are grooving to their live creations.

Pat McGee Band's latest album, "Save Me," released last April, was a slight change in sound from their earlier work. Previous releases had carried with them a rollicky, countrified feel, like something you would hear from a good-time group of college country boys playing music in a shack at the edge of the property. Very good stuff indeed. Their latest deviates from this sound, but only to explore more complex and compelling musical territory. Saddling up the horses and riding out, the boys of PMB embarked on an exploration of their own musical prowess. "Save Me" showcases intricate and electrically enticing guitar work, providing the perfect accompaniment to their sophisticated, intelligent lyrical latticework.

Virginia Coalition, or VACO as they've come to be known, will be the perfect band to share the stage with PMB. Although crossing sonic paths at times, VACO and PMB have distinctive sounds that will only serve to enhance and complement each other. It's like pairing a fine vintage with a culinary creation of epic proportions. Virginia Coalition's sound, like equine tails, can be hard to pin down. With cleverly constructed lyrics and masterful exploration of their instruments, VACO has forged a sound reminiscent of bands such as Dispatch and O.A.R., but one that is still definitively their own. With feel-good elevating grooves, you're sure to be shuffling your feet in no time.

Well, I know they weren't your choices, unless you are one of the 11 people tuned into the magic and atmosphere that surrounds the music of VACO and PMB, but I strongly urge everyone to check these bands out on April 1. Having performed with the likes of the Allman Brothers Band, Blues Traveler, O.A.R, and Dave Matthews Band, they are sure to delight and dazzle a Juniata crowd. That is, provided we are music-lovers enough to provide them with that crowd.

Men's volleyball downs Div. I foes

Earns three home victories in a row

Katie Charles

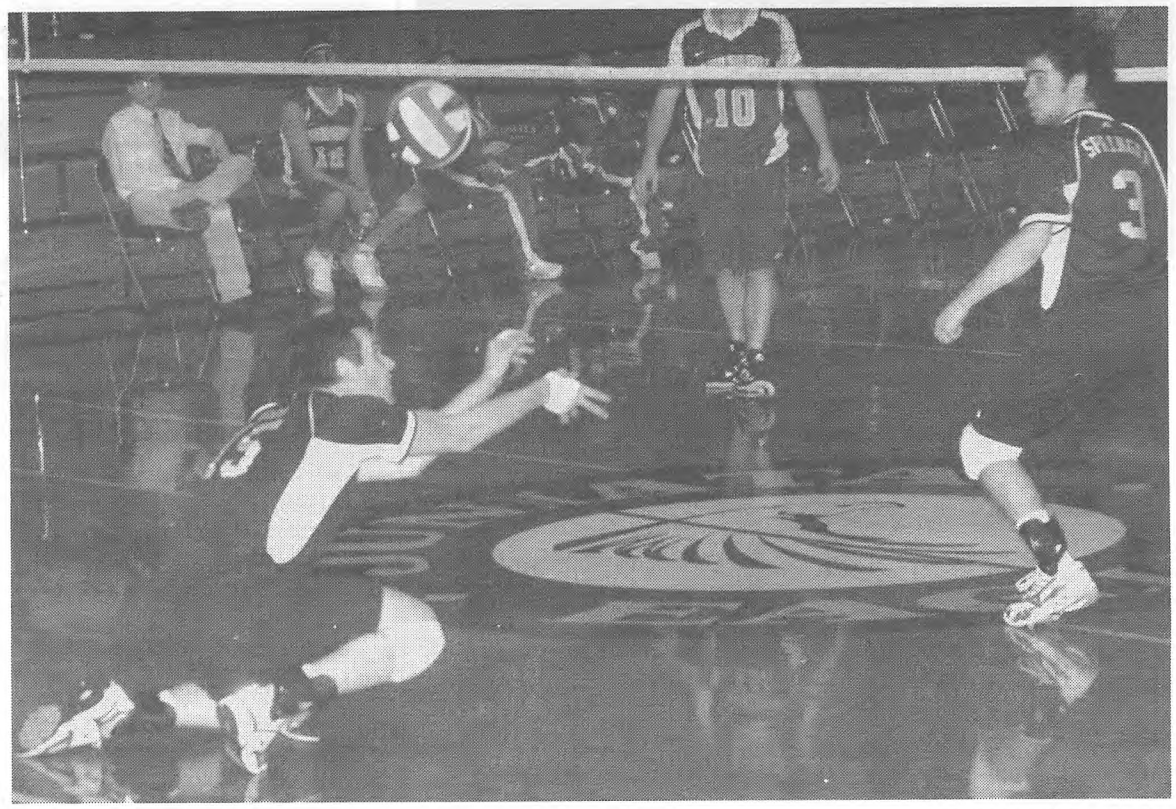
Last Friday, the Juniata men's volleyball team put in an impressive performance against Division I Ball State, winning the match in three straight games, 34-32, 30-28, 34-32. The Eagles were outstanding defensively, which gave them the advantage over the Cardinals.

The Eagles were outstanding defensively

Junior Nick Bernardo led the way for the Eagles, posting 14 kills. He added seven digs and two blocks to his superb offensive performance. Junior Cordt Withum put away 12 finishes, while sophomores Jeremy Barndt and Nate Ocasio added 9 kills apiece. Junior Tim Cole brought up 10 digs, while senior Ricky Ziegler finished with a team-best five blocks and dished out 47 assists.

The match was a hard-fought three games. In game one, the teams battled back and forth and were tied, 28-28. From there, the teams traded side-outs. Ricky Ziegler had the final point with a solo block on the outside.

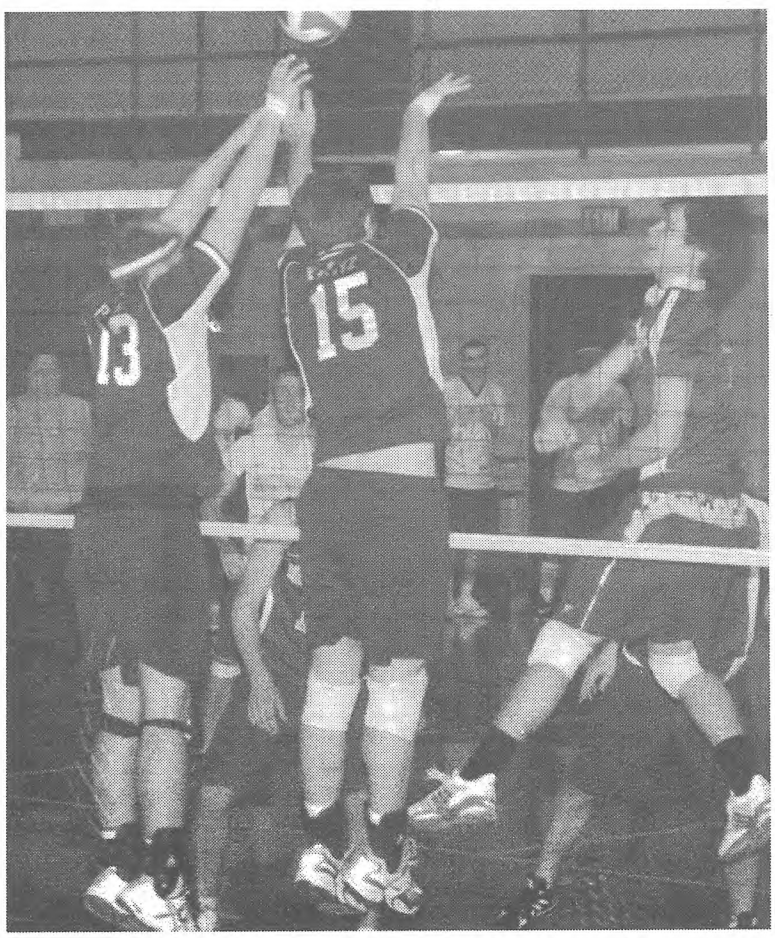
In game two, the Eagles trailed the majority of the game, until sophomore Glenn DeHaven helped the team to a 7-0 run with his strong serving, which made the score 25-21. During the run, Ziegler again notched another solo block and an assisted block with Barndt. Ball State got back into the game and tied it up at 28 a piece before a kill from Withum and an attack error from Ball State gave Juniata the game two victory.



The third game was another close one. The teams were tied at 28-28, again, and traded side-outs before kills from Barndt, De Haven and Ocasio closed out the game for the Eagles.

In Saturday's match, the Eagles followed up their strong performance with another win over the Nighthawks of Newbury College. In this match, Juniata looked to give its younger players some quality playing time and experience.

With a look at what the future may hold for the Eagles, sophomore Ryan McGinley led the way, hitting a phenomenal .818, with nine finishes on 11 attempts. Sophomore Derek Stanley and junior Matt Springer each put away seven kills. In his first start of the season, freshman setter Zack Bock passed out 50 assists and led the team to a .627 hitting percentage. Freshman Matt Fritz brought up a team-best seven digs and added three blocks to his defensive performance.



In the week prior to spring break, the men's volleyball team scored a huge victory over nationally ranked Division I rival George Mason, 3-2. Cordt Withum led the team with 16 kills and four blocks, while hitting a smoldering .600. Jeremy Barndt added 14 finishes for the Blue and Gold, while Nick Bernardo added 12. Ricky Ziegler led the offense once again with 67 assists on the night. Tim Cole led the solid defensive effort by the Eagles with 10 digs.

The team changed line-ups multiple times in the match, with 12 players seeing significant court-time. The switches kept George Mason unsure of how to defend the Eagles. The home team, down two games to one, pulled off two impressive, hard-fought victories in games four and five to take the match.

Hannah Rauterkus / Juniatian

Freshman Matt Fritz (15) makes a key dig in the second game while junior Matt Springer (3) checks the pass' direction before setting himself for an attack.

Hannah Rauterkus / Juniatian

Sophomore Robb (13) Patty and freshman Matt Fritz (15) deny Newbury's spike. Young talent stepped up in the JC victory.

Baseball team off to a scorching start

Tommy McConnell

Despite returning nearly everyone from a team that won the conference championship last season, the Juniata baseball team was picked second in the preseason conference poll behind Messiah College. Messiah also returned virtually its whole roster from last season, in which it lost to Juniata in the playoffs.

Unfortunately for Messiah, the season isn't played on paper.

This past Saturday, Juniata hosted Messiah and proved that last season wasn't a fluke. The Eagles won both games of the afternoon double-header, sweeping the Falcons, 6-5 and 6-3 in a pair of close games. The Eagles are now 10-5 overall and 5-1 in conference play.

"We lost some players from last year and we knew they weren't losing anyone," junior David Saintz said. "I guess that was the rationale for picking them to finish first, but we know we have a good team and we wanted to show everyone that this weekend by at least taking the series from them. So whether or not they want to give us respect, we're going to win it."

The Eagles were nearly unable to take the series, but some late-game heroics in game one allowed them to pull out a win.

Down 5-3 heading into its last at-bat, Juniata came up with a two singles and a pair of walks, scoring a run and loading to bases for Matt Garner. The senior came through in the clutch, slicing a single to left that scored two runs and gave the Eagles the win.

Garner finished the game 2-for-2 with two RBIs. Junior Troy Beaver chipped in with a pair of hits and two runs scored.

Hannah Rauterkus / Juniatian

Senior Matt Garner (8) gave Juniata the win in the 7th inning in a close match against Messiah

Game two was close as well, but Juniata scored early and never trailed. Tied 1-1 in the third, Juniata got an RBI single from junior Walt Goedkoop to take the lead. Messiah would try to answer with the tying run in the fourth, but Goedkoop again extended the Juniata lead, singling home Beaver and Saintz with two outs in the fifth.

Messiah refused to go quietly and scored another run, but this time it was Saintz' turn to extend the lead. Saintz' RBI single and freshman Jay Enoch's RBI double gave the Eagles all the insurance they would need.

Winning close games has been a staple of Juniata's success, dating all the way back to last season's title run.

"Our team just wins close games," Goedkoop said. "I can't explain it. We were like 13-1 last year in one-run games, so I think our mentality is to just keep playing because we are confident that when they game is over, we are going to win."

Prior to its two conference wins against Messiah, Juniata spent spring break in Arizona, playing ten games during its weeklong stay. The Eagles went 7-3 during the trip, picking up three wins in the conference, all over Moravian.

The highlight of the trip was Enoch. In his first college start, against Moravian, the freshman struck out an ungodly 15 batters to pick up the win.

> ***"Our team just wins close games, I can't explain it."***
>
> ***- Walt Goedkoop, junior***

"Going into my first collegiate start as pitcher, my first thoughts were to be aggressive and go after the team with all my pitches," Enoch said. "I wasn't really nervous because by then it was my sixth game of the year so I was comfortable."

While confident, Enoch surprised himself a little bit with his performance.

"I don't think anyone expects to strike out that many in their first start, but I know I have good stuff and I believe I am good enough, with my defense behind me, to shut down any team."

Juniata was confident before traveling to Arizona, but its success out west reassured the team that it is capable of meeting its own lofty expectations.

"Before the trip we thought we were a good team, and now after that trip we know we are," Goedkoop said. "We beat the teams we should beat and we were one hit away from beating DeSales, a top team in the nation."

Juniata travels to Mount Aloysius for a pair of games before returning home for a set of three games against conference opponent Elizabethtown on March 25 and 26.

Athlete off the field

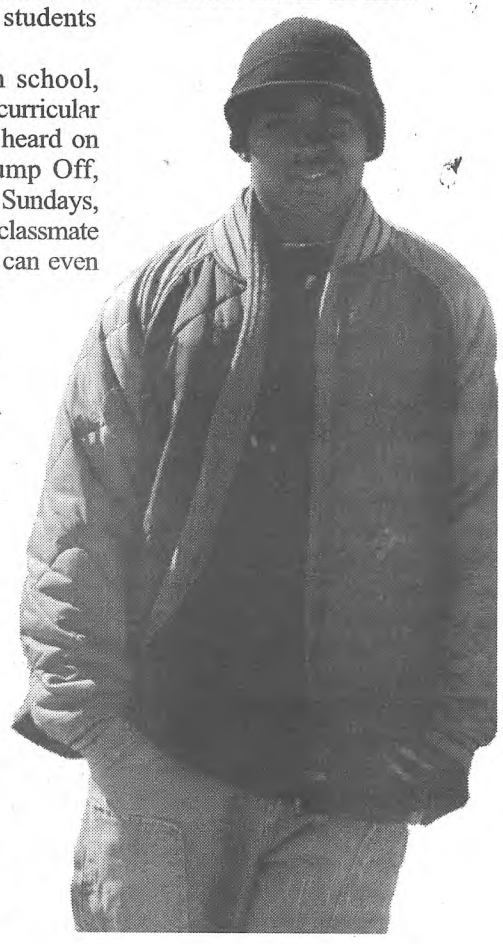
Katie Laucks

At this point in the semester, seniors are marking down the days until graduation. Most are eagerly waiting to sell their books back and say goodbye to school forever. Then there are some like this issue's Athlete off the Field who are saying hello to another couple of years in school. Juniata senior baseball player Paul Berry falls into the latter group.

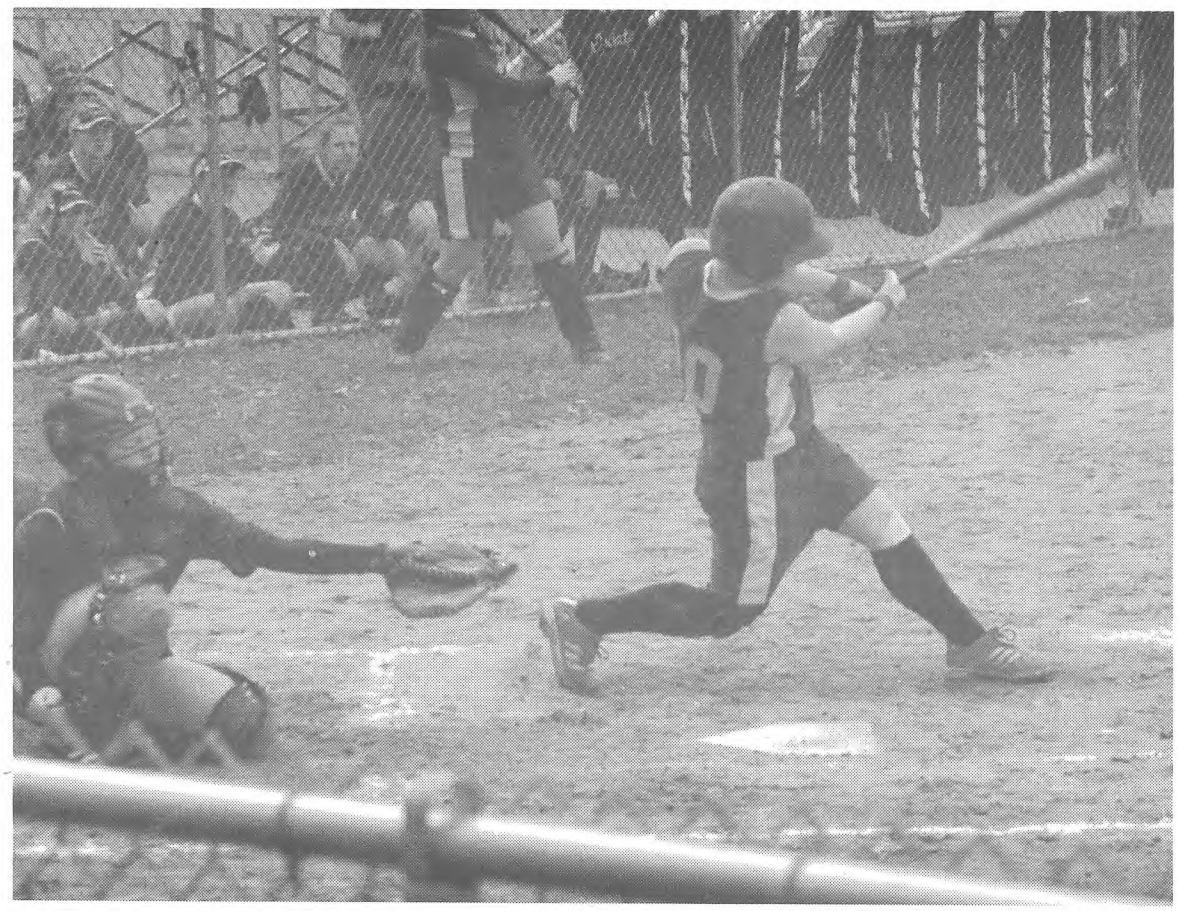
Paul Berry wasn't quite sure exactly what he wanted to study when he came to Juniata. He was interested in more than one thing. So instead of just focusing on one aspect, he combined two. His POE is natural and social sciences. "I was thinking of being a doctor, but I liked sociology as well, so I mixed both," Berry said.

Currently, he is studying the sociological factors of illness and how people recover at different rates. He plans to continue his education by attending graduate school. His top choice is Morgan State, where he would study public health.

Not only has Berry's focus been on his studies while here at Juniata, but he has been involved with many of the activities here on campus. He is a member of the Diversity Committee, where he deals with student's opinions, making sure that every student on campus has a voice. "The club also tries to make an increase in culture on campus," Berry said.



Berry is also the Vice President of the African American Student Alliance. This club creates a support network, and is a voice for students of African American decent. It focuses mainly on the students concerns.



While not busy with school, baseball practice or extracurricular activities, Berry can be heard on his radio show, The Jump Off, from 6:00 – 8:00 p.m. on Sundays, where he DJs with fellow classmate Denique Conner. Or he can even be caught jamming with the band The Daddario Quartet, where he plays the bongos.

Between all of his commitments, it would be expected that this senior is ready for a break. Not yet. As the 2005 baseball season gears up, so does Paul. "We have lots of talent. I'm very optimistic about this year," Berry said.

The 2005 team is coming off a huge season in which they won the 2004 MAC championship. "We are even more talented," Paul said. "And our goal is to win it again."

With the present goals in mind for this year's baseball season and his future goals just weeks away, there is no doubt that his career will soon be attainable. For now, Berry will continue his hard work in the classroom and on the field.

Hannah Rauterkus / Juniatian

Junior Leann Leymeister (10) advances the bases but comes shy of saving the team from a shutout with her hit against Messiah.

Softball conference play has rough start

Double-header against Messiah yields no wins for the women

Robb Patty

The Juniata College women's softball team dropped two conference games on March 19 to Messiah. The double-header was the conference home opener for the Eagles, who fell to 0-2 in the conference and 5-6 overall with the pair of losses.

The first game of the double-header brought an onslaught of runs by Messiah, as they beat the Eagles, 14-0. Then, in game two, the Eagles were able to mount some offense; however, it wasn't enough as Messiah pushed across 10 runs to sweep the Eagles and take game two of the double header by a score of 10-3.

In the first game, junior Renae Hobbs was able to keep the game close through six innings, allowing the visitors just five runs. It was in the seventh when the Messiah bats erupted sending 15 batters to the plate and scoring nine runs in the inning to extend the lead to 14-0. Hobbs also led the Eagles' offense as she registered two hits in the game.

In game two the Messiah bats were still hot as the visitors sent 10 runs across the board, two of those coming in the top of the fifth to extend its lead to 6-1. The Eagles were able to cut that lead to 6-3 in the bottom of the inning as senior Allison D'Ambrosia doubled home Hobbs. Then freshman Kim Stoia scored on a sacrifice fly from junior Abby Sener. The Eagles would get no closer, however, as Messiah would take game two by a score of 10-3. Junior Jessica Darrow took the pitching loss.

It is still very early in the season as the Eagles are just getting into conference play.

"We need to work on getting timely hits when there are runners in scoring position," Stoia said.

Prior to the conference opener, Juniata spent its spring break in sunny Myrtle Beach, South Carolina, where the team compiled a 5-3 record for the week. During the last day of competition, the Eagles defeated Gordon College by a score of 15-2, bouncing back nicely from a loss earlier that day to Worcester Polytechnic Institute, 4-1.

After only being able to get one run across the plate in the morning, the Eagles offense exploded for 16 hits and 15 runs in the finale. Stoia went all five innings, allowing just two runs and five hits to earn her second win of the year. Juniata broke the game wide open in the fourth, registering nine hits that scored ten runs. Stoia, junior Marcia White and freshman Kim Wagner each plated twice in the inning, sealing the 15-2 victory.

"Down in Myrtle Beach was the first time we got to play outside on a field," Stoia said. "We had the opportunity to work on plays. That is hard to do in a gym. Plus, we had a chance to practice fielding balls outside. We also got to spend a lot of time together, which helped getting to know each other better. It was a good team bonding experience."

The Eagles resume conference play on March 25 with a double header at Elizabethtown.

Women's Swimming finishes superb season

Jeremy Simmons

On February 25, the Juniata women's swimming team finished up its season at the ECAC championship. The Eagles relay team of freshman Allison Sweigart, sophomore Amy Sutherland, senior Kathy Trainor and senior Dana Gais posted a time of 1:44.26 and placed thirteenth. Gais and Trainor also posted times of 26.00 and 26.18 in the 50-yard freestyle competition to earn 39th and 40th place.

The ECAC championship is a large scale meet which many Division I teams attend. Despite the stiff competition, head coach Brian McGrath was pleased.

"We swam well as a team. Times were good and the meet, overall, was a success."

Even with the tough opponents, the team is in high spirits as Dana Gais explained that one of the goals of the competition was "to make the qualifying times and gain experience swimming in a *big* swim meet."

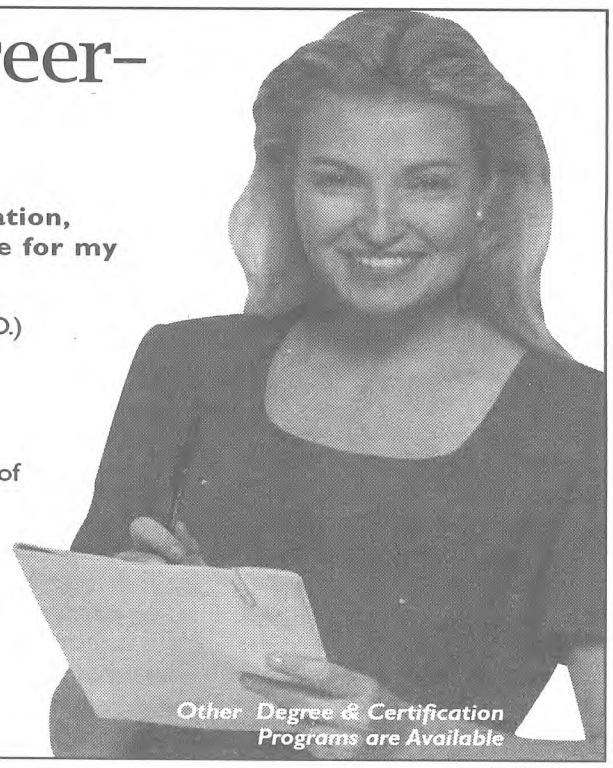
With the end of an extremely successful year, the Juniata swimmers are now looking to the future. Trainor said that this year, "Everyone either had a season or lifetime best and that's all you can ask for." With a program high of 11 wins and tying last year's third place finish at the MAC championship, the Eagles have set the bar high for themselves.

However, because of all the improvement he has seen, McGrath has already started training for next year. He is confident that the Eagles can go all the way and win next year's MAC championship. As he says, "It starts now!"

All in all, Juniata had an excellent season. Amy Sutherland, reflecting her team's attitude, is proud of this season's success, but is also already anxious for next season to begin.

"I am very excited to see how the team does next year," she said.

"I made Education my career– at Temple".



"That's right–Temple. With the convenience of a central PA location, Temple University Harrisburg offers everything I need to prepare for my teaching career."

Outdoor track athletes prepare for first meet

Corinne Barabas

Spring is right around the corner, bringing with it sunny days, blossoms on the trees, robins eating worms from the soft, green freshly mowed grass and, of course, outdoor track. Juniata's team is preparing for a successful season to accompany and surpass its indoor performances.

On March 19, the team headed to Knox Stadium and competed in a mock meet. Holding various events from each area - throwing, running and jumping - the coaches were able to determine the strengths and weaknesses of the team at this point in the season.

There are many key returning athletes in both the field and track events. For the women, discus, javelin and 400 hurdles will continue to score high and be a threat. Head coach Jon Cutright said, "The women are good in events that are not done indoor, so they are in a pretty good position."

"On the men's side," Cutright said, "throwing is going to be an area we are going to have to work on, since throwers are few."

"We are starting to form a strong team," junior Justin Fritzius said. "We have some key returnees in the sprinting and jumping events. I don't think we have one specific strong area, but we have a handful of really strong guys. We also have a chance at scoring points in the distance events and the 1500-meter run. The team is continuing to get better and we're looking to make an impact in the MAC after finishing fifth at indoors."

Junior distance runner Nancy Hayes, the school record-holder in multiple events said, "I think we've definitely improved [from last season]. Many indoor MAC qualifiers were better than last year, so the outdoor season should be better as well."

Cutright said, "We have the makings of two good teams. We aren't where we need to be for the end of the year, but that is what we will work up to."

Last season, many athletes qualified for the outdoor championship, and this year the team is looking to send more. Cutright said, "We could possibly send up to 40 people to MAC's. Already, twenty are qualified."

On March 26, the Eagles will compete in the Susquehanna Invitational in Selinsgrove.

River Rats take second in tourney, Hellbenders defeat Cal U

Brit Tew

As the snow begins to melt and the ground begins to thaw, the Juniata men and women's club rugby teams are heading to the fields to start outside practice. Both teams have been honing their skills twice a week in the intramural gym, working on conditioning and teaching newcomers the game.

The men's team, the River Rats, set out to the Pittsburgh Rugby Classic to start its season on March 19. The Rats finished in second place in the tournament, with a record of 2-1.

In its first game, the men's team faced Allegheny, beating them soundly, 5-0. The Juniata try came from freshman Andrew Loveitt. This was Loveitt's first rugby tri with the Rats. Intense playing and good field communication held the Rats on top of Allegheny, securing the win.

The Rat's second game came soon after its win against a team made up from players from Pittsburgh and Franciscan called "pitciscan." The hybrid team was made up mostly of rookies and players still learning the game. The game was close with the ball traveling rapidly from one side of the field to the other, but with no score. Finally in the end, sophomore fullback Mathew Yeatts kicked a penalty kick, ending the game in the Rat's favor, 3-0.

The third and final game, which would decide the champions of the division, came between Juniata and its rival, Geneva. Positions had to be changed around due to the injury of senior wing captain and fly-half Jordan Miller in the previous game. Positions had to be changed once more in the late second half to due senior scrum captain Chris Heaster's leg injury.

The Juniata and Geneva matches have always been intense and close, but this match came out in Geneva's favor. The Rats lost four trys to none, earning second place in the tournament. The Rats did earn valuable experience from their first tournament of the season, allowing many of the rookies to get a good taste for tournament games.

The women's team, the Hellbenders, faced Cal U on March 19. Senior hooker Lindsay Clark was unsure of the challenge that awaited the team. "It all depends on how much Cal U has been practicing," said Clark.

The team played two 20-minute halves for A-side and then one 20-minute half for the B, or JV, side. The Hellbenders defeated Cal U, 17-15. Hellbender trys came from Anne Baynes, Jacquelyn Atkins and a co-score from Sarah Zentmyer and Lynette Nolt.

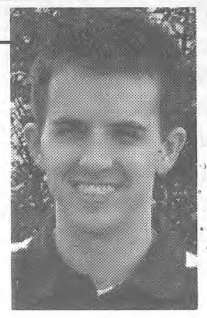
The two extra points were kicked by Atkins. The B-side women's team beat Cal U as well, 5-0. Juniata's B-side tri came from Shayla Sims.

Nolt was pleased with the performance of the Hellbenders. "This is an indicator of how the rest of the season is going to go," she said.

The River rats are scheduled to play in a tournament on April 2 and against the alumni River Rats on April 16 at the annual pig roast celebration.

The Hellbenders are scheduled to play Fairmont at home on April 2 and at Penn State University April 13.

In between games, both teams are in the process of building sound rosters and relearning plays from last season. The men and the women also highly encourage any new athletes to join for the spring semester.



Hannah Rauterkus / Juniatian

The River Rats Rugby team plays the alumni last semester. They will match up again on April 16th.

THE RANDOM ELEVEN

Matt Russell

Save a tree, kill a sign, part 1: Anyone else appreciate the 200 or so advertisements the volleyball team plastered up around Baker a couple weeks ago? A hundred just wouldn't have done the trick – they really wanted that wallpaper effect. Thanks for helping us keep the printers on campus free.

Save a tree, kill a sign, part 2: Student Government was more thoughtful. They only used half sheets to wallpaper outside Baker for… uh… something. Unfortunately they made the page so crammed with small type that I never actually figured out what they were about…

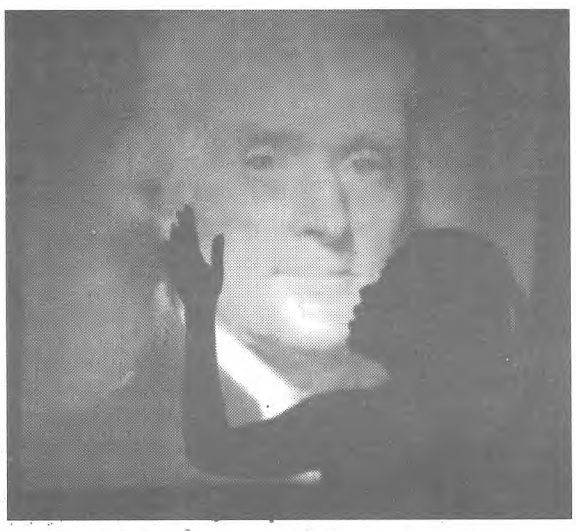
Seen on side of tanker truck: "INEDIBLE Animal Food". I bet the animals won't appreciate not being able to eat their food.

The Jell-O blues (I think that's wild berry): A friend recently told me she felt ill trying to eat Baker's Jell-O because she had consumed too many Jell-O shots the previous weekend and it reminded her of it. Funny, I don't really ever eat those, but Baker's Jell-O still makes be feel sick…

[insert another crack about Baker food here]: Sorry, it's too easy. I'll stop now for this issue.

Mistaken identity: Someone clearly had the wrong e-mail address when they sent my friend a sign image and asked for feedback on it. Instead of ignoring it as any mere mortal would have, he made a short list of suggestions, created an updated version in Photoshop, and e-mailed them back with a note at the end that said "And by the way, I think you have the wrong e-mail address." Well played.

Liar, Liar: Prospective student days are the only time I get to hear students say there's plenty to do here on the weekends. That explains last month when almost every person I knew in South Hall simultaneously went home for the weekend. Probably just homesick.



Borderline security: Generally, you're stopped by Customs when **entering** a country, right? US Customs officials questioned me for a good ten minutes during spring break while I was trying to **leave** the country for Canada. LEAVE. If I was a terrorist, don't you want me to get the hell out anyway?

Favorite question: My license plate tag expires this month. The US agent asked me if, in my state, it expired at the beginning, end, or in the **middle** of the month. "Yes, in the middle. In Pennsylvania, we've actually decided that those tags expire at 3:57 am EST on the 16th. Pretty weird, huh?"

Take a little trip to Allentown: A hydroponics company there recently played a commercial on the radio. It advertised their product could grow ANY plant in ANY space… even a closet! This message was set to "Have a Cigar" playing in the background. Hmm… plants in closets and Pink Floyd? Way to be subtle.

Folding@Home: Right now, my computer is using its idle power to fuel protein research for Stanford University that might someday lead to cures for Alzheimer's, Parkinson's, and types of cancer. What's your computer doing right now? It's easy to get involved. Check out teamshort-media.com/join for information or e-mail me. It's the right thing to do.

Story in Photos: Standing Stone. *Creative lighting techniques and shadow puppetry were just one of the many appealing features in the Gravity Project's production of Standing Stone (Feb. 24-26). (Left): Freshmen Adam Stanley and Mandi Yeager engage in thought-provoking dialogue. (Right): Junior Winnie Wong is seen as a silhouette behind an illuminated President Jefferson.* ***Hannah Rauterkus / Juniatian***

Collegiate Dementia

Movie geek goes ape on break!

Carolyn Keller

Ahh, Myrtle Beach. South Carolina. Spring Break. Warm weather, blue water, and nothing to do but relax for a week!

The stage set for adventure, I was attacked! Not even attacked by the zombies I suspected were lurking on the beach during numerous nighttime walks. No, I was attacked by a wayward shampoo bottle. It dented my toes, and now they hurt. One of them might even be broken. Fittingly, the criminal was a bottle of teal-blue Suave Ocean Breeze Shampoo. You should all stop buying this particular smell of shampoo immediately, until further notice.

In retribution, this column is now officially devoted to Those Things Which Bring Pain to Humanity. Take no prisoners! I mean movies like "The Notebook," or "Saw." I mean songs like the lovebird IM profile staple "God Bless the Broken Road." Things that, like that evil shampoo bottle, were part of my spring break, and should not have been.

I am going to start a letter-writing campaign to the World.

Dear World,

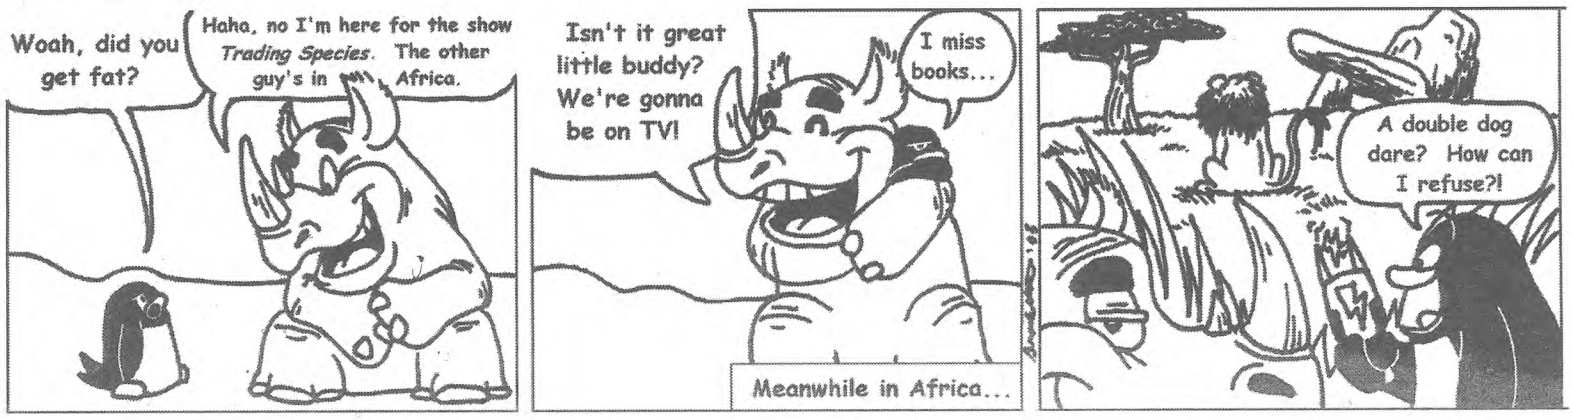
Please stoppit with the bad movies, and also the cheesy love songs. They are grossing me out. It's yucky. It is, in great essence, worthy of all that is B-movie projectile vomit. Please, please stoppit. Thank you.

Love, Cari.

Feel free to mass-circulate.

But my spring break did not suck! Au contraire! As the great Jon Stewart gleefully says, "In this day and age, you cannot judge a book by its contents!" He's right. Look at the surface! There was an ocean, and "Napoleon Dynamite," and good friends, and a visit to a bad buffet that was quite possibly run by the Russian Mafia. And to get back to the deep stuff, these life-altering altercations with toiletries can really make you think. Look at the life lessons I learned over break!:

1. Youth is eternal. AKA Gap clerks are not good at age-gauging. Though my job as a bartender allows me to appreciate the difficulty in this, there's something to be said for a senior in college walking up to a cash register and hearing "Are you 18?" The clerk looked at me doubtfully. Doubtfully! "Would you like to apply for a Gap card?" I stared, pondering how to tell her that she was off by the margin of an entire presidential term. I kept my mouth shut. Gap card? No, thanks. Anyway, she was probably judging my emotional age, so I left it at that.



2. You gotta stop to hear the music. One friend proudly announced that he knew my taste in guys exactly. He knew I'd think the MusicGeekDJ at the karaoke bar was cute. (I did.) And the next night, at the next place, he presumed he could be clairvoyant again, saying just wait till I saw this dueling pianist. How intriguing! Unfortunately, the pianist looked like a Hanson Brother Reject. Nice try, my friend. You cancelled yourself out, but I was entertained nonetheless. Priceless.

3. Movie Geeks are underrated, and you should be nice to them. See above. I coulda *told* you! But it did not help me, oh no, I still watched them, and "Constantine" to boot, and now my film geek heart hurts like my toes.

Because "The Notebook" and "Saw" nearly made "Constantine" look good. And while the Broken Road may have led You straight to Whoever, that doesn't mean that I can't wish for a pothole along the way, or perhaps a blowout, or a gas explosion. And if I wanted to break an appendage, I would have done it doing something athletic and world-conquering, like cattle-wrangling or dog-walking, and not while drying my hair in the bathroom. But to all, I say, here's to spring break! May your biting shampoo bottles be muzzled, and your bad movies be brief.

Drug use at Juniata exaggerated

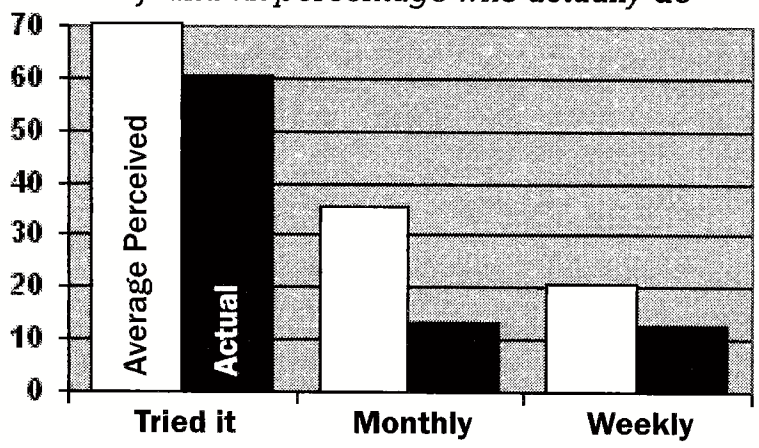
Students think more Juniatians use marijuana than actually do

Mary Gardiner

"So, Suzanne, what do you think about drugs on campus?"

"I don't think I do," said Suzanne Ostyn, a Juniata freshman. Suzanne had already explained her reasoning against drinking and began sharing her indifference toward drugs on campus. "I don't even think about it."

Dean of Students Kris Clarkson understands the indifference that permeates students' attitudes about drug use. "It's not a pressing issue in [students'] minds." Some, he explained – perhaps even most – won't tolerate the presence of illegal drugs.



But, according to a survey conducted by the Juniatian last Tuesday, many students have experimented with marijuana. Of the 196 responses, only 31% did not admit to trying the drug.

"When it comes down to it, it all depends on who you hang out with," said Katie Charles, a senior who has four years of Juniata experience to speak from.

It doesn't take statistics to realize that friends are the eyes with which one views the campus. If one were to perceive that a large percentage of Juniatians smoke, that person might be more inclined to smoke

continued page 4

Percentage of students perceived to smoke marijuana vs. percentage who actually do

Source: *Juniatian survey conducted March 29, 2005 in Baker Refectory. Sample size was 196 students.*

MONEY TROUBLE

Study Abroad company's woes affect JC students

Holly Brown

Brethren Colleges Abroad (BCA), a company that conducts many of Juniata's study abroad programs, is currently in financial trouble. While its struggles will not eliminate Juniata's programs, some students have returned from overseas with complaints against the company.

The most notable problem occurred this past fall semester in Athens, Greece. Nearly 50 students, three of them from Juniata, arrived to find that their overseas university had lost accreditation, and they were without a school. Quick action by the BCA director found the students a new university nearby, but the situation did little to foster respect for BCA.

Junior Andrew McWilliams, who studied in Greece last semester, said, "We still felt like BCA, while they had kept us in mind,

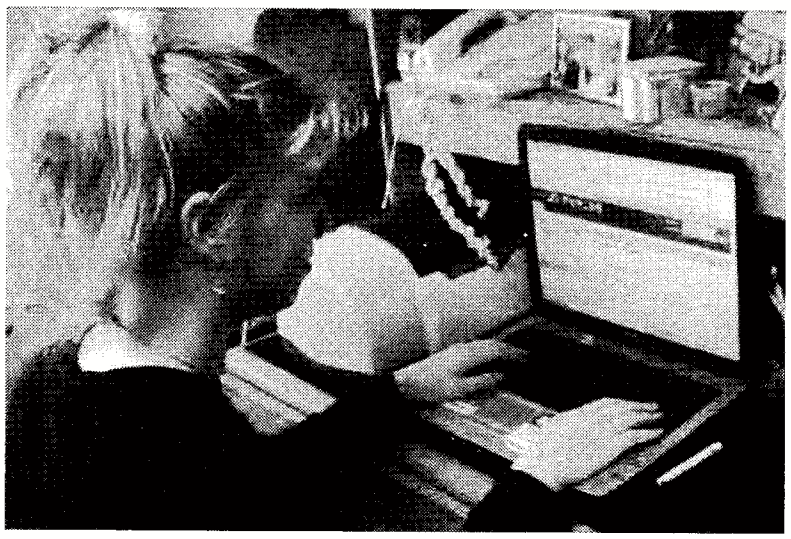
Campus "Dog Culture" versus "Kid Culture"

Meredith Pink

As reported in the Mar. 24 Juniatian, the days of faculty bringing their dogs to school may be numbered. Yet some wonder if the prohibition of faculty's pets should extend to the many professors who bring children to their offices, meetings and classes. It is a question that begs asking: Can children and dogs be considered a unified issue?

"Until some human being on this campus pushes a dog out of their own vagina and then breastfeeds it, a comparison cannot be made," said Communication professor Lynn Cockett.



Provost James Lakso remains firm in his stance that dogs are dogs and people are people. He emphasized the fact that dogs on campus are not an issue of professionalism. They are an issue of liability. Children can be just as noisy and disruptive as an animal, but no one is phobic of or allergic to children.

Professor of Mathematics Sue Esch recognizes the administration's concern regarding the liability of dogs – in which case dogs are a problem and children are not. She hopes that if dogs are banned from campus the same would not hold true for children. Esch said, "All most of us are trying to do is to find a balance in our lives, and give our 'dependents' as much of our time as we can."

There is no formal policy governing faculty who bring children to school. Dean of Students Kris Clarkson said that if children were repeatedly disruptive and disturbed faculty and students, then action would be taken. As long as kids do not get in the way and prevent faculty from doing their work, there is no issue.

Clarkson does, however, think

Campus reacts to online registration

Jasmine Frishkorn

It seems that the jury is still out concerning the new online registration process used this year. Reactions from students and faculty vary, but the outlook is good.

Online registration began on March 14. Students were able to register for classes from their assigned time until the end of registration on April 7. During this time juniors, sophomores, and freshmen were allotted times respectively according to their birthdays.

Students have had mixed reactions to this ranking process, commenting that it is an unfair way to divide the registration times.

Sophomore Selina Aurandt said on the Juniata Forums [forums.juniata.edu], "I was waitlisted for a course and am a little upset that just because I was born in November I can't get the course, and at that I am older than those born in earlier months because I was born in 1984!"

The Registrar's Office explained that it was a way to limit the amount of traffic on the system. Registrar Athena Frederick said, "It wasn't preventing anyone from registering after that point, and believe me we didn't have the number of students registering at great numbers at the time of the birthday."

Some students, especially those abroad, had no trouble with the

Sports, page 15

The effects of alcohol at JC

A look at relationships, the Greek system, and body chemistry

Nathan Thompson

Ernest Hemingway said, "Always do sober what you said you would do drunk, that will teach you to keep your mouth shut." He spoke from years of experience.

With its strong pervasiveness on college campuses, the effects of alcohol cannot be overlooked. Often, it can have a strong impact on personal relationships. While Juniata students cannot escape these trends, there is reason to believe that the Juniata community does add its own uncommon mixology to the issue of alcohol.

College counselor Beth Williams explained that, besides coordination, reasoning is one of the first areas affected. "Inhibitions always go down the tubes first," she said. This causes people to become louder and to use more demonstrative actions and body languages. People also tend to become more argumentative with friends.

Senior Joseph Lehner agreed with Williams. "From what I've seen, drunks tend to make themselves more open to things they normally wouldn't do," he said.

With these types of tendencies, it is not surprising that over 70% of violent crimes involve alcohol. It is also one of the leading causes of sexual assault. "It is probably the most violence-related *legal* drug that we have," said Williams.

Of course, alcohol does seem to affect people differently. Williams explained that it all depends on body chemistry. Even the same individual may be affected differently at different times. Body chemistry can be altered by such factors as recent food intake, medications and other drugs.

Perhaps the greatest irony of alcohol lies in its effects on intimate relationships. As personal inhibitions fall into the gutter, physical performance also drops. Williams quipped, "The desire might be there, but the performance isn't."

Williams suggested that alcohol would probably not be a problem if it was not abused. "It's not that alcohol is evil, but it's that people misuse alcohol," she said.

"The desire might be there, but the performance isn't."

- Beth Williams, college counselor

John "Hoss" Damin, from the Class of 2004, took this a step further. "In moderation, it can relax social situations, but it's a fine line," he said. During his four years at Juniata, Damin was a frequent patron of the party scene. When asked whether it was needed for a social gathering, he dismissed the idea and responded, "Plenty of great times were had minus the boozing." Damin then quipped that it did help bring about some humorous memories.

Dean of Students Kris Clarkson said that he believed that all colleges face alcohol problems. However, he feels that Juniata College differs from most colleges in terms of alcohol.

For starters, he pointed to the lower likelihood of Juniata students to drive after drinking. According to the College's Uniform Crime Reports, there have been no Driving Under the Influence offenses in the past three years. Clarkson believes that Juniata students are more likely to use designated drivers and to look out for each other.

He also believes that there is less peer pressure to drink at parties. Damin, who never drank before college, supported this claim. "When I did drink, it was of my own volition," he said.

There seem to be several reasons for this lack of pressure. For instance, Clarkson said that there is "not a drinkers and non-drinkers distinction" at Juniata. The lack of a Greek system was another factor in this lack of pressure to drink.

Clarkson was very supportive of the College's isolation from the Greek system. "We will never have fraternities or sororities," he stated. He cited those organizations' habit of fragmenting a college community as the top reason.

Nevertheless, the effects of alcohol should not be negated. "Are students still more likely to make bad judgments? Absolutely. Is HIV on this campus? Absolutely. Do people still need to be cautious and sensible? Absolutely," said Clarkson.

Juniata College does not escape the problems that alcohol can create in the social lives of its students. However, if you choose to, as the Barenaked Ladies once sang, "Walk the fine line between self-control and self-abuse," you may be very glad that you have Juniata students nearby.

Roving Reporter

by Hannah Rauterkus

How do you think alcohol affects student relationships?

"Alcohol puts more stress on a relationship, and people are more likely to cheat when they are intoxicated."

- Emilee Spokus, sophomore

"I think this is not a white and black issue. However, from what I have witnessed at Juniata, there is excessive consumption. Relationships among students *depend* on alcohol and that is very detrimental. A moderate consumption is fun and enjoyable, but it seems like people have problems exceeding that level."

- Gonzalo Banda-Cruz, senior

"It seems that relationships change under the influence of alcohol. One minute you are just friends, and the next minute things become complicated. Inhibitions are lowered, and the mind doesn't seem to be able to distinguish between right and wrong. I don't think meaningful relationships can be formed when alcohol is involved. All it seems to do is cause more confusion. It's just not worth the aggravation."

- Kerrin Doran, freshman

Origins of the uncommon

Juniata's values knit to Church of the Brethren

Genna R Welsh

Many features make Juniata "uncommon." One recent activity has brought to attention the frequently unknown origin of many characteristic features of Juniata.

The beginnings of Peace and Conflict Studies, women's achievement, service learning and other programs unique to Juniata began with the connection of Juniata's founding fathers to the Church of the Brethren.

"I think a lot of students don't see the affiliation," said junior Lori Martin.

Martin is right. Many students see no bond with the Church, but others have recently been showing that a steadfast bond still exists.

"We're still definitely active," said senior Eric Butler, a member of Brethren Student Fellowship.

Brethren Heritage Week, a student run celebration that occurred from March 17 to 24, celebrated Juniata's Brethren legacy. Through a fellowship dinner affectionately known as Love Fest, and guest speakers, students of any faith, learned about the history of the Church of the Brethren and its commitment to service. Students of the Brethren Student Fellowship were excited about student attendance of Heritage week events.

"Brethren Heritage Week has been an opportunity to teach the College about the Church," freshman President of Brethren Student Fellowship Tyson Daniels pointed out.

Juniata College Chaplain Dave Witkovsky believes the Church of the Brethren and Juniata are bound by members who represent a vast spectrum of theological diversity.

"There are Brethren across the theological spectrum from conservative to liberal," Witkovsky observed. Similarly, he continued, "Here at Juniata we are people from all beliefs and backgrounds."

First and foremost, Juniata shares a bond with the Church of the Brethren's values.

"The ideals of the Church of the Brethren are founded in peace. We really take seriously the commands, 'Love your enemy' and 'Thou shalt not kill,'" Daniels said.

Andy Murray, Juniata professor and ordained minister in the Church of the Brethren, pointed out one inconsistency between the College and the Church. "The College welcomes military recruiters. Many Brethren would not approve of this," Murray said.

Murray, like Witkovsky, pointed to the broad range of views held in the Brethren spectrum, saying that an opinion of military recruiters would be hard to generalize among all members of the Church.

Many conservative Brethren also feel uncomfortable with Juniata's openness to issues such as alcohol use, homosexuality and performances such as the Vagina Monologues; however, Witkovsky emphasizes the Church's passionate belief in acceptance.

"The Church is about listening to your own heart," Witkovsky stated.

Pastor Dale Dowdy of the Stone Church of the Brethren pointed out the common value of service between the Church and College. In activities such as Habitat for Humanity and Circle K and in courses such as Service Learning, Juniata's commitment to service is clear.

"The emphasis on service learning at Juniata points to a more global perspective," Dowdy stated.

Through courses in Women's Studies and programs such as "Unlock Your Voice," Juniata College promotes women's achievement, as it has throughout history. Unlike many colleges in existence at the time of its foundation in 1876, Juniata was co-educational from its first class, when the student body was composed of two women and one man.

The Church of the Brethren has encouraged female success as well. In fact, one pastor of the Stone Church, Christy Dowdy, exemplifies the accomplishment women can achieve in the Church.

"This local church has always been open to women in ministry and has always had women in its leadership," she said. Dowdy explained the similarity of philosophy behind women's achievement in both institutions. "From the beginning, we have seen men and women as individuals, in this church as well as the College."

The College and church are also bound by their members. Many students, even those who are not

continued page 4

Greek life, Juniata style: The "Hall unity" trend

Corinne Barabas

Picture something like Frat and Sorority Row, minus the outlandish initiations, pledging and classic stereotypes. Juniata's Residence Life staff is striving for this kind of feeling of campus wide acceptance, respect and unity.

One may argue that JC would be more exciting with a Greek life. However, the students here share a campus-wide bond that isn't always present on larger frat and sorority cluttered universities.

Recently, Residential Assistants have been encouraged to increase the idea of "hall unity" on the floors of the different dorms. An infamous rivalry between the first and second floors in Cloister may be the most well-known example.

What started as a good-natured insult toward a person on another floor has metamorphosed into a lighthearted feud between the men who reside on these two floors.

Demetri Patitsas, the ringleader of first floor Cloister said, "There is a strong sense of unity, which centers on competitions. One floor thinks that they are superior to another, which rallies everyone to want to compete and be the best."

Activities and events are not just held in dorms, but are done to gather the entire College community together. Some longtime great traditions, such as Springfest, Mountain Day, Madrigal, All Class Night, hall decorating contests, breakfasts, the annual Haunted House in Cloister and even Pig Roast all bring Juniata students and administration closer together.

Many years ago, before kegs were outlawed from legally appearing on campus, the residents of first floor Sunderland rolled them down the hall. They became known by all as the close-knit residents of "Thunder Alley." Even if it isn't as extreme as it was back then, that ambience of unity still exists to a great extent on campus.

Dean Clarkson said, "It is not so much the dorm you live in, but rather the people you are introduced to and spend a year or more with and the involvement of the people on your floor and your RA."

He also said, "Juniata will never install a Greek system. We do not want our residential system to be like that. We want and encourage the organization of events and programs to generate community and support."

Patitsas said, "People get to know each other and earn a deeper appreciation for their floormates. There is a mutual feeling of respect and understanding from everyone."

From football games to poker tournaments, students at Juniata do not have the pressures brought on by a Greek system. No pledging, no stereotypical dress codes or personality requirements and no forced initiations.

Juniata has its own unique idea of a campus community. Most anyone could probably relate to attending a party off campus, at the volleyball house, or the football house, or the basketball house.

"We even have a special handshake, and when I e-mail the guys I usually start it off with 'Gentlemen of the brotherhood,'" said Patitsas of his floor.

And who rattles off a list of people who live in the different quads at East? No one, because the rooms are known by their numbers or by the people living there.

Juniata prides itself on building a considerate, supportive and civil community and will continue to cultivate a unified campus.

Charlie Foster / Alfarata

This semester Cloister RA Demetri Patitsas organized for his hall and others in Cloister a game of flag football.

OSA still building

What its new focus is doing for students

Liz Houts

In the wake of the new Director of Student Activities, Staci Weber, the Office of Student Activities (OSA) has been refocusing the office toward student involvement and leadership.

That is nothing new, but at this point, OSA is still developing to serve as a helping hand to student involvement and leadership.

Weber explained that student involvement works on three levels, attendance of programs, membership in organizations, and holding leading roles with those organizations.

Speaking up about how these changes in OSA have affected the Juniata Activities Board (JAB), senior Jake Harper said, "The new leadership style has encouraged JAB members to take more of a leadership role and they have flourished." Several JAB officers agreed.

So what are some things OSA is doing to help out with student involvement? The Spring Involvement Fair is a prime example. New this year, the fair was similar to Lobsterfest in helping clubs recruit new members.

The Spring Involvement Fair is especially tailored to first-year students looking to get involved now that they have settled in at Juniata, to new and transfer students, and to juniors thinking of getting involved and building up their résumés in their senior years.

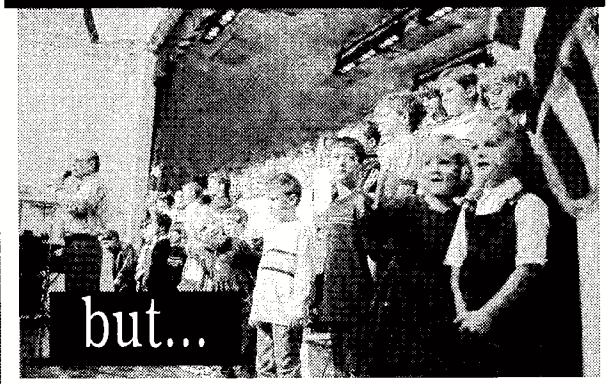
"We're looking to give students the means and the resources to make the decisions themselves," said Weber.

Another way OSA has done this is by implementing some changes in Registered Student Organizations (RSO).

"The Office of Student Activities made it possible for student organizations to have office space," pointed out Harper, former intern with OSA. RSOs were given the opportunity to apply for larger offices in Ellis Hall that became available when OSA, Sodexho, and several other offices changed locations.

Other changes have helped to instill responsibility and accountability in RSO officers. For instance, RSO treasurers are no longer required to get Weber's signature on their paperwork.

"I think Student Government and OSA have held RSO's accountable for their actions and provided a sense of leadership that has been absent for some years," said senior Kristofer Youtz, President of Habitat for Humanity and treasurer of Student Government.



Under Weber, OSA holds high expectations for student leaders. In addition to this year's successful leadership workshop series, OSA will be working even harder to develop student leaders next year.

"I know what they're capable of," explained Weber. "OSA pushes students to put their own skills into use."

Study abroad program: financial danger

continued from page 1

hadn't dealt with us as quickly and honestly as we would have liked."

Other problems, such as a program in Aberystwyth, Wales, that was undertaken without an on-site advisor, experienced smaller scale difficulties. Without a director, forging lines of communication to find assistance for students was more difficult for the three Juniata students studying there. The Aberystwyth program has been cancelled at Juniata.

Provost Lakso said that while BCA had some rocky times, they now have a plan to get back on track.

"I certainly have a more positive sense that BCA has a good future. They have a plan to get the ship righted and move forward," Lakso said.

And most students who travel with BCA find the experience to be a positive one. Jay Trovato, currently studying in Xalapa, Mexico, appreciates the benefits of having a BCA director on-site. An assigned director is one benefit that separates a BCA program from a general exchange.

"The BCA directors know a ton about the country and can take some of the guesswork out of navigating and understanding it," said Trovato. "Plus, they're an advocate for you if something goes wrong."

Financial problems began emerging two years ago when the company amassed large deficits. The company's recent past has been hectic, with many changes in programs and leadership being made. Recent president of five years, Karen Jenkins, steered the company in a new direction, including programs such as on-site faculty training sessions. While the moves were positive, they were also very costly.

Jenkins resigned last year, with former Elizabethtown College provost Ron McCalister temporarily filling her place. A new president is still being sought.

Some smaller BCA programs have been dropped, but the financial difficulties should not affect Juniata's relationship with the company or the College's study abroad programs. The ties between BCA and Juniata are strong.

Their working relationship goes back to BCA's inception in 1962. Juniata's own past president Calvert Ellis was instrumental in founding the program, according to Lakso. BCA's board of directors is made up of presidents from Brethren colleges. Currently, President Kepple is the chairman of that board.

Though not directly related to BCA, the latest study abroad adventure occurred off of the Galapagos Islands. Three Juniata students were caught on a sinking boat coming from the island. All of the passengers were rescued safely, but all of their possessions – including passports – were lost.

While problems have arisen with the program in the past, Juniata's study abroad director Jarmila Polte works closely with students and universities to assure everyone is safe. Difficulties arise from any number of situations – due to BCA or not – and the study abroad experience is geared toward preparing students to deal with these issues.

According to Polte, "The study abroad program helps students to form maturity, personal growth, and a bicultural and bilingual experience as they prepare to go out into the world."

Drug use at JC exaggerated

continued from page 1

as well.

That's why it is so frightening that surveys showed that average Juniata students think that over 35% of people on this campus smoke monthly – three times as much as the actual prevalence of drug use at Juniata. "Probably around 30-40% [students] weekly, 10% daily. I would guess about 75% have tried it, at least," estimated one student, anonymously.

Illegal drug use on campus – which is most always marijuana use – seems to be either something that no one wants to talk about, really, or something that no one cares about. And it's shaping up to be more of the latter.

"This is the way it is," said a junior. "There are regulars – people you see, and you know, and they don't care that you know. It's just the way it is."

Therefore, it seems that the more pressing substance-related issue on our campus is alcohol use. About 70% of students drink at least weekly, according to last week's survey. Only a meager 5% have abstained from alcohol at Juniata.

"Alcohol is certainly the drug of choice at Juniata," said Clarkson.

Clarkson, however, stressed the responsible trustworthiness of the community. "Juniata has fairly redeeming characteristics: students look out for one another, typically have a designated driver. To portray Juniata students as partying and puking all the time, that's just unfair."

To compare Juniata to other colleges, for instance: In 2003, there were 42 disciplinary actions based on liquor law violations at Juniata and none in regard to drug law violations. But at nearby Penn State, one out of every five arrests concerned drug law violations. Those statistics are quite revealing. It seems that drug use, while existent, is not the problem that both students and the community of Huntingdon perceive it to be.

"I think it's just that those that [smoke] are so open and vocal about it, that we think it's a bigger problem than it is," said a sophomore.

Clarkson agreed. "Students at Juniata think they're big partiers... but really, there's much less substance abuse today than there was ten, twenty, thirty years ago."

"I don't want to sound complacent," continued Clarkson. "Booze is definitely a problem at JC... But we've got this wonderful community. Is it being threatened by illegal substances? ... Is it malicious? Absolutely not."

Whether or not drug use has increased on college campuses as some articles predict, apparently hard drug use and the pressure to use them are not as prevalent at Juniata as one may think.

OSA still building

continued from page 3

Starting in fall 2005, OSA will be holding a Leaders in Motion program to help 12 to 16 first-year students learn and develop leadership skills. The seven-week program will involve students and hone their leadership from the very start. According to Weber, a number of other schools have tried similar programs and have had tremendous success.

OSA is also working on setting up Leadership Lunches for next semester. Once a week, Weber will meet with a number of Juniata club leaders over lunch. Weber and the students will keep each other up to date on campus and club happenings, and exchange ideas to help the clubs collaborate and work together.

"In general I think that the changes are positive, but the OSA and its leadership are still a work in progress. Staci brings experience to Juniata, but learning our culture takes time," said Youtz.

Weber herself mentioned that learning the ins and outs of Juniata's culture has been one of her greatest challenges in settling in here. With so many unique traditions at Juniata, such as Lobsterfest and Mountain Day, this comes as no surprise.

Origins of the uncommon

continued from page 2

bound by their members. Many students, even those who are not Brethren, worship at the Stone Church. According to Dale Dowdy, this is a blessing for his church.

"Because students come here and worship, it brings a lot of life to us," Dowdy said. He explained that student attendance was encouraged by the adaptability of the Church's philosophy of acceptance.

Kari Dundore, a junior at Juniata who regularly attends the Stone Church services agreed that "The church adapts well to students."

Dundore also pointed out attendance of faculty and staff at Stone Church.

Dale Dowdy added that this attendance enriches the church/College bond. "Faculty and staff attendance gives students a sense that their lives are impacted by what happens here at the church."

"Dog Culture" vs. "Kid Culture"

continued from page 1

that children should not come to faculty meetings. In his opinion, it would be better for all parties.

Esch believes that dogs and children humanize and personalize the academic environment. They are a part of what makes Juniata such a friendly and open place.

"But the world is changing, getting more legalistic, and unfortunately Juniata seems to be being dragged along. I know I sound like the ghost of Christmas past, but I miss some of the things that made Juniata more of a family," said Esch.

In the past, issues like this have always been dealt with on a personal, one-on-one basis.

Professor Janet Lewis said, "The only reasons I can see for banning all pets or all children are either a campus where pets or children run rampant, or one where there is such a concentration of cowardice that all one-on-one conversation that might be 'unpleasant' must be avoided at all costs. This, to me, is ironic on a campus whose motto is 'truth sets free.'"

In addition, it does not matter whether bringing children to campus is professional or not. Babysitters cancel, emergencies occur, both parents have jobs and most of the time bringing kids to work is the only alternative.

There is a lack of daycare options in Huntingdon. In fact, professor Kathryn Westcott believes that a college sponsored parent co-op child care facility should be a priority on this campus.

The Education Department sponsors the Early Childhood Education Center as a field experience for students seeking education certification. However, its hours and enrollment ages are limited.

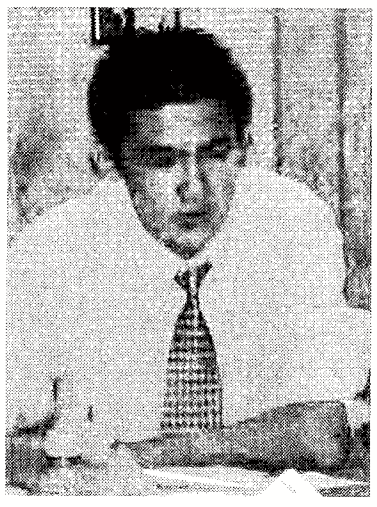
Clarkson said, "A daycare will never happen on this campus. From a business perspective, there are just too many risks and liabilities for the College to take on."

Cockett explained, "I think the real problem is that the institution – and here, I do not charge Juniata College, but almost all workplaces – is uninformed and unresponsive to the issues germane to dual working parents."

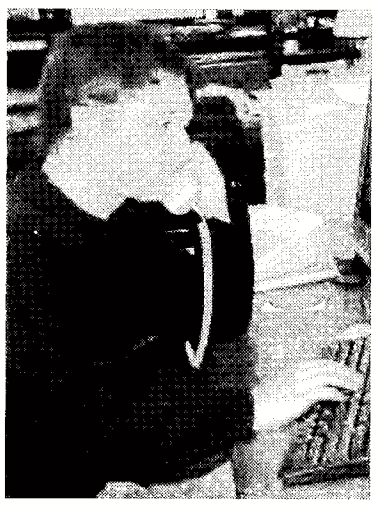
Every Wednesday, professor Dave Hsiung's son comes to the History Department meeting. If his son were not allowed at the meeting he would have to reschedule it. He said that people have always been very accommodating.

Westcott and Dr. Mark McKellop bring their children to work on occasion when it is necessary. Westcott explained, "Emergencies happen and we have no other choices. I can't leave them home alone with a dog biscuit and tell them I'll be back in an hour."

With a lack of daycare resources, faculty are often at a loss of options when is comes to bringing their children to campus. They must either bring them or cancel their meetings and appointments.



Faculty bringing their children to campus also provides an invaluable example about balancing family and work life. Hsiung said, "It gives students proper role models for considering the issues that they might face in their post-Juniata lives. I don't think the same can be said with faculty and dogs."



New Student Government Executives

Elections were held on March 23 for 2005-06 Student Government Executive Board officers. Ahmed Javaid Zeerak *(center)* won the presidential election. Joshua Scacco *(far right)* was elected as vice president and Brenton Mitchell *(below left)* as secretary.

Zeerak said, "First of all, my thanks to the student body for entrusting us – members of the new Executive Board – with the important task of representing them. The principle goal of the Student Government is to serve as a platform for communicating the needs and desires of the student body to other constituencies of Juniata College, and throughout the coming academic year, the newly elected members of the Executive Board will strive to do just that.

"However, as with any representative government, we too depend upon the students themselves to be vocal and open about their needs and demands. It is our hope that the students will speak to us openly and often about issues that concern them so that we can better represent them. We intend to remain as *responsive* and *transparent* to the student body as possible. Additionally, the new Executive Board will carry on the new allocation process that was put in place this year, and also work out a smoother working relationship with other student activities offices."

Campus reactions to online registration

continued from page 1

system and preferred to use it.

Jessica Perry, a junior abroad this semester said, "I think it was easier to register this year than it would have been if I had been abroad and not had the opportunity to register online."

The Registrar's Office tried to anticipate other problems with the process. In order to answer any faculty and student questions regarding online registration, several training sessions were offered to both groups.

About eight or nine faculty members showed up at the first training session and faculty continues to call the Registrar's Office for advice or stop by for one on one instruction. Students also appeared in the Cyber Connection with questions, but most continue to call or e-mail the Registrar to clarify concerns.

Online registration was designed to ensure that students come to advising sessions prepared with schedules. Hopes that online registration would push the advising experience have not been dismissed. However, there are always going to be a few participants who find ways to dodge the system.

Several students have used e-mail to get approval from advisors. This not only puts more pressure on the faculty to approve schedules, but students are risking their schedules by not actually seeing their advisors hit "submit."

Being able to communicate with advisors is important in the scheduling process. Juniata has tried to make this interaction easier for students by providing them with the opportunity to register online.

Perry said, "I was able to register for three-fourths of my classes on the first try and then it just took a couple e-mails to my advisors to get the other classes I needed. Overall, I was pleased with the process."

With positive feedback such as Perry's, it seems online registration will be a welcomed new experience for Juniata students and faculty.

Frederick said, "It is a new process and it will take some time getting used to. Overall, I think it has been a success. It has been five years in the making for me, and only time will tell. We just have to wait until April 7 and see how it goes."

Apathy is Lethal

Moving moments at Juniata College

Mary Gardiner

I just wanted to spend the column this issue in a tribute to two nights that have moved me immeasurably in the past two weeks. They are both graphic manifestations of the horrors that humans can commit, one oh-so locally and one as far away as could be.

On March 24, my intimidatingly genius friends and I spent the evening remembering a sin other than that of crucifying Christ, or whatever we're supposed to feel bad for on Maundy Thursday.

Instead, we endured the full two hours of "Hotel Rwanda," sobbing together, gnashing our teeth together, empathizing together. Dredging up in our minds the 1994 atrocities, seeing dead bodies – in the hundreds, at least – strewn across roads, we – though I may only be able to speak for myself here – felt as if the incident was our fault. And, in some small, perverse way, it may have been.

There's a woman in that film, a white Western woman, who is evacuated from the country, a week into the mass slaughter. They file all of the Westerners onto the bus that will save their lives. And this woman, this totally oblivious woman, just sits there with her poor dog as a man takes a picture, as if the refugees, the corpses, the damned machetes were scenic.

I don't want to be that woman. It's my biggest fear. I don't want to look at people on this campus, people in this whole country, and see that woman, ever. I wanted to throw a shoe at her, and more.

I guess that's why I say apathy is lethal.

But – and here's where I digress – my second biggest fear is that I worry too much about a tiny little country in central Africa, and overlook the ubiquitous problems we have here in our country, our state, our own campus! Wal-Mart is one of those problems, but there's more.

There's something so much less abstract and theoretical than Wal-Mart and free trade and AIDS.

That's why I say: Paul Blore, *kudos*. Major kudos. Eli, JP, Alci, Ran Tu, Thea – kudos, man. And Brandi and Beth Williams and everyone else who made that show what it was, thank you. When I went home from seeing Paul's play, "Shards of Skin & Porcelain," about rape and sexual abuse, I could only cry for about three hours from the same tear ducts and emotions that made my heart wrench for the Tutsis.

I apologize to my readers now, if any of you have ever thought that my concerns are too intangible and conceptual. I know a few of you do. And my care about AIDS, though I have never met a person with AIDS, is *so* pointless, when it's compared to the Social Security issue my generation should be quite on their heels about. Right? I suppose.

Either way, I wanted to try and make sense of it all – all of the inhumanity that only humanity can produce. I suppose seeing it in print makes it a little clearer.

Why aren't we paid more than minimum wage?

Are we doing anything to keep the softball field usable?

Presidential Perspective

"All of the jobs on campus, even those that require higher skill levels, such as research, lab or teaching assistant positions, are minimum-wage jobs, which makes it difficult for students trying to work their way through school to afford their college education and expenses without having to work off campus. Why is it that all jobs pay the same, minimum rate?"

Because of limited employment opportunities in the Huntingdon area, the College attempts to maximize the number of students employed on campus within the budgetary constraints. We also have to make sure to meet the needs of those students with work study financial aid. During the summer we do provide a higher wage rate based on skill level. If we did raise salaries, the funds would have to come from some other area of financial aid or some reduction in another budget.

"With the constant rain and cancellations of softball games, is there anything being done to keep the field in playing shape?"

Actually, there has only been one home softball game cancelled due to wet conditions. There was a second game cancelled against Mt. Aloysius that was supposed to be played away, but because they still have snow on their field we were going to host it. Thanks to our grounds department, the March 19 home opener was one of the earliest games ever played on that field.

We also installed an additional drain line near home plate earlier this year and we have ordered a tarp to cover the entire infield that should arrive any day. Our efforts seem to be paying dividends; after receiving almost two inches of rain over the weekend recently the field was ready to play on only two days later. The softball field, because of its location, does not receive sunlight until later in the day, so many days it is frozen for several hours. With warmer temperatures arriving, the field dries out much more quickly.

President Kepple wants to hear from you! He uses his column to answer any college-related question from the campus community. Simply e-mail questions to juniatian@juniata.edu, and the editors will forward them anonymously to Dr. Kepple.

Students, faculty, staff, alumni: send your letters to juniatian@juniata.edu. We print all letters to the editor that are of interest to the campus community – in response to one of our articles or on a completely separate topic – so start typing! If you're lucky, we might even print a response. Please try to limit letters to about 300 words, and note that longer submissions may be edited due to available space. Opinions expressed on the commentary pages are not necessarily those of the Juniatian.

Social Security: Imminent crisis for college students?

Hannah Rauterkus

When I started my research for this article, I went in as a skeptic of Social Security reform. Like some college students, I felt burned by the recent presidential election and became increasingly cynical toward this administration.

I am not the only one to feel this way, and statistics reflect this disillusionment. Despite President Bush's continued campaign to win over our generation, a recent Washington Post poll shows only 35% of those ages 18 to 25 approve of how he is handling the issue of Social Security.

Currently, the rate of return when one retires is approximately 1-2%. Therefore, a college graduate making $33,200 will receive $1,559 each month after retirement.

The government funds Social Security by taxing every person's paycheck 6.2%, unless the person is self-employed; then he or she must pay the full 12.4%.

Now, Social Security is not the pressing crisis that President Bush is claiming it to be. While Social Security needs to be updated to fix certain parts of the program, we could certainly focus on more pressing issues, such as the environment, education, record deficits, oil consumption and did I mention the environment? But I digress.

Due to reforms in the 80s, Social Security is currently running a surplus. The government takes the current surplus and uses it as a loan in return for specially issued bonds. In turn, the government uses these bonds for other projects both internationally and at home. As a result, the 2003 Social Security Board of Trustees report projected that the system will run a deficit as early as 2018. Following that, they project that by 2042 Social Security will only be capable of paying out 70% of the promised benefits.

So what is being done to fix this problem? By now I am sure you have heard of private or personal accounts. The semantics are lost on me, so I will refer to them as personal accounts. Personal accounts will allow workers to deposit the full 12.4% Social Security tax into a company, selected by the worker and/or their employer, who will then invest and manage the money.

The drawback is that this will benefit two groups: the wealthy who are already familiar with investment, and young middle class college graduates who have a little bit of common sense. This leaves the low-income workers who, without the knowledge or means to invest on their own, depend on and trust the government to keep their best interests at heart. If you haven't already, start reading up on investment now.

You may be wondering what happens if you *do* invest, and are just about ready to retire when the stock market crashes? I have heard rumors that in such a situation, the government may top off the personal accounts to keep those workers above the poverty line. However, with the recent bankruptcy bill in mind that caters to special interests of credit card companies, I'll believe it when I see it. The final Social Security reform bill will tell if such a safety net comes to life.

As Social Security stands now, if your caretaker dies you will receive their Social Security benefits for a certain period of time. Some of the proposed benefits of personal accounts are higher returns and

continued page 7

Letters to the Editor

"What happened at Juniata in 1965 was about imagination"

*[**Editor:** Gary Rowe presented at the civil rights renewal on campus last month, as covered in the Mar. 24 Juniatian.]*

The civil rights reunion last month was a gratifying reminder of the uniqueness of Juniata College. For me, this reunion was not so much about history. It was about imagination.

I never expected to return again to that time in my life. But this reunion pulled us back in time to try to take the measure of what happened in 1965. For me it began with a phone call from a recent graduate, Matt Bettig, who researched old editions of this newspaper to track down those of us who were active in the effort to join the civil rights movement in the South and to plant its call for justice in the soil of Pennsylvania.

Sylvia Kurtz, writing her master's thesis at Penn State, continued this renewed attention and fortuitously sent me a copy of a long-forgotten article I wrote for the Juniatian, published on March 12, 1965. In it, I invoked the work of history professor James Silver whose then recent book, "Mississippi, the Closed Society," described the hate-filled South, its untenable myths, and its repressive distortions of history and law. "The enforcement required to preserve this system...has transformed Mississippi into nothing less than a police state," I wrote then. The article made the case that Mississippi was more than a place, it was a cancerous mindset infecting America with the poison of racism.

In the mid-1990s I served for several years as a national finalists judge for the Coca-Cola Scholars Foundation. On one of those panels I sat with the Washington bureau chief of the Wall Street Journal, a former mayor of Charlotte, North Carolina, and William Winter, former governor of Mississippi. Before us sat a young woman who was arrested at the age of 13 for selling hard drugs on the streets of Jackson, Mississippi, to support her younger siblings, abandoned by their crack-addicted mother. But here she was, rescued by two school teachers – the unsung paramedics of social breakdown – and now on her way to a university.

How could I imagine in 1965 that I would one day sit before a black woman, a child of God, whose achievement made tears stream down the face of a Governor of Mississippi? We all cried that day. Perhaps they were tears of celebration that America had come that far.

I think that what happened at Juniata in 1965 was about imagination. We couldn't foresee America's future, but we imagined that personal witness was the first step to creating a different America than the one gripped by racism. We didn't see clearly that there were thousands of others – many thousands in the South – standing up, too.

The faculty, staff, and students who organized the reunion deserve our heartfelt thanks for remembering us and bringing us together again for this commemoration. But I personally hope that the impact of what we said is not a mere reflection of the past. I hope it is a call for renewed imagination. We live in a global society now, one that has taken frightening turns, divided by tribalism and racism.

Governor Winter taught me that "uncommon outcomes" is much more than a clever phrase. It is what we all dreamed and made real over years of struggle. It is a legacy, one that I hope identifies Juniata College for generations to come.

The call for engagement is as clear as ever. It will take people who imagine a different world to answer the call, and I trust that you will be among them.

(An account of Governor Winter's impact is at http://www.npr.org/templates/story/story.php?storyId=1718439).

Gary Rowe
Class of 1967

Founding House member responds

As a founding member of The House, who graduated last year, I have to say that I was appalled after reading the recent article "House Distress" in the Juniatian [Mar. 24]. The whole idea behind why The House was founded has apparently been lost in a few of the House members' self-minded and sophomoric actions. When we started The House, it was to be a place for ALL students to come, at ANY time, to just hang out and have a place where there was no pressure to drink. We intended to choose responsible students to succeed us after we graduated, and who would keep the mission of The House intact. Obviously we failed. It is almost humorous to me also to hear the excuse of lack of funding for why the House members have neglected to hold events this year. We had a budget of $0 last year when we put on one of the most successful events of the entire Juniata year, the Trail of Terror, which drew over 800 students and community members. There's money out there - be creative. My point being, stop making excuses. If you want to drink, that's fine; it's your own decision. But don't make a mockery of something that a lot of people worked hard to create. I'm sure there are many people that would love to have an entire House to live in and help plan events in. Let those who truly believe in the mission of The House live there and hopefully it can again become a productive addition to Juniata life, not just a hang-out for a select few.

Social Security: Crisis?

continued from page 6

greater benefits that can be passed on to one's family well after death. It also means that good investment can accrue great wealth that individuals can control. However, these reforms will considerably uproot and change the foundation of the system, and there is no guarantee that your investment returns will be any greater than those given by the present system.

So, aren't there other, less drastic methods that can be employed to save Social Security? Yes. Some have argued for cutting benefits, raising taxes, increasing the taxable wage and increasing the age of retirement. The percents and figures surrounding the effectiveness of each suggestion vary depending on the source.

With welfare cut beyond recognition, public schools closing because of the unfunded mandates of No Child Left Behind and public transportation receiving the brunt of Bush's budget cuts, it is no wonder why people want President Bush and his administration to leave Social Security alone.

This plan sounds nice on the surface. However, when legislation is drafted and passed at 12:42 a.m. on a Thursday night with three Senators present, I will know my skepticism was founded. Now it is your job, Juniata College, as responsible individuals to do some research because this *directly affects* you and me.

Major concert draws small crowd

Controversy lingers; student reaction polarized

Brit Tew

On Friday, April 1, the JAB-sponsored annual major concert took place in Baker Refectory. Headliners The Pat McGee Band and the opening band, Virginia Coalition, drew a low number of students to see the show, but accounts vary as to whether low numbers signified quality of experience or merely student apathy.

Before the show, a JAB member stated only a little over a hundred tickets had been sold for the event. For many, this low turnout was unsurprising, due to unrest in the student community over the contracted band.

Students gave many reasons why they did not attend the major concert. The two most common reasons were dissatisfaction with the band choice and the ticket price of $15.

Students were upset that the contracting of The Pat McGee Band did not mirror poll results that indicated the bands they wanted to see.

Senior Klint Hockenberry admitted that he did not go because of this.

"[JAB] didn't listen to the students," said Hockenberry, "and that made my decision a little easier."

JAB's chair, senior Nicole Watson, countered that the organization made the most of limited means.

"Some students were practically working a part time job, in terms of hours, to get this done," she said. "We did what we could. We worked with what we were given. We're the Juniata Activities Board, not the Penn State Activities Board. We had limited funds, limited space and limited time."

Ticket price was also a deterring factor. Many students felt that the show was just not worth that high of a price, or just did not have the money to spare.

When asked why he did not attend the concert, junior Mark Cuppett simply replied, "I'm broke."

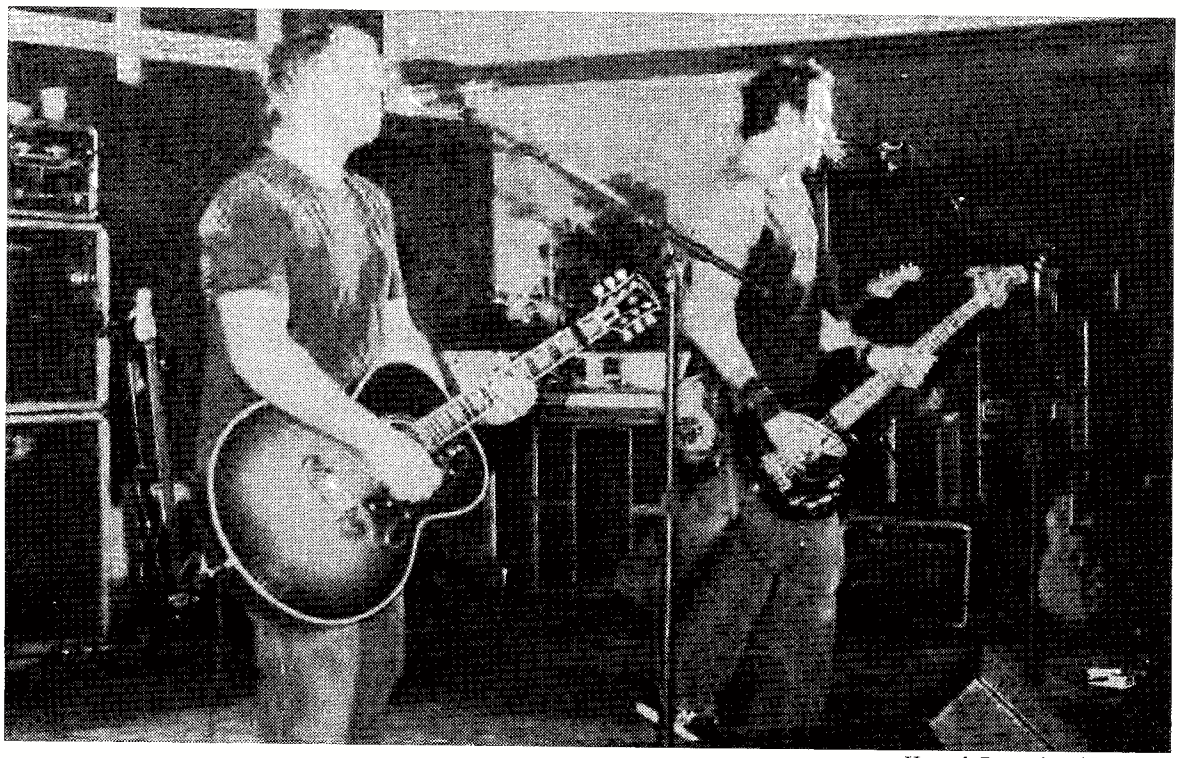
Though discounted tickets were available before spring break, and JAB offered discounts for those who bought two or more tickets, many students remained angry.

The Arch forums buzzed with discontent as students argued about the ticket prices and band choices. Even Juniata staff members were actively involved in the debate.

Director of Web Technology Joel Pheasant suggested that JAB increase turnout by reimbursing students who had already paid for their tickets, and instead let everyone in free of charge.

Watson argued the impossibility of this. She stated that the ticket price was low in comparison to many other concerts, and that JAB had to charge $15 in order to "defray the price of the band in general."

Beyond prices, there were other complaints. Junior Scott Stephan cited problems with how JAB ran the event. Stephan gave the example of how JAB covered the Muddy Run windows overlooking Baker on the day of the concert. Under the "Major Concert Poll" thread on the Arch forums he wrote, "Blacking out the windows has got to be one of the most juvenile tactics to come out of the JAB office in quite some time. This whole thing reeks of an organization unready for any sort of professional affair."



Watson, however, stated that covering the windows in Muddy had nothing to do with preventing people from seeing into Baker. "The light coming from the window lights a lot of Baker and it makes it senseless to have the lights out [downstairs]," she said, adding that in the past, comedians and other performers have complained about the incoming light.

Not all students reacted negatively to the concert. Many who attended enjoyed themselves. The smaller crowd promoted a more intimate setting, and more students were able to stand closer to the stage. Many took advantage of the extra space to dance in the back of the crowd.

The opening band, Virginia Coalition, seemed to arouse more interest in the students than the actual headliner. The audience decreased significantly once Virginia Coalition finished playing.

Junior Anna Eller was praised the band. "Virginia Coalition was awesome, very energetic," she said.

With the poor final turnout and unrest in the student community, some students hope that JAB will rethink its tactics in choosing a band for the major concert. Others who enjoyed the concert hope that poor turnout at the Virginia Coalition and Pat McGee Band event will not signal the demise of the major concert, which in recent years has featured stand-up comedians in lieu of musical acts and has been overwhelmingly well-attended by students, faculty and staff.

Hannah Rauterkus / Juniatian

Pat McGee Band headlined Friday night's major concert at Juniata. Here, Pat McGee and bassist John Small sing in unison. The six-member band has currently released 5 albums.

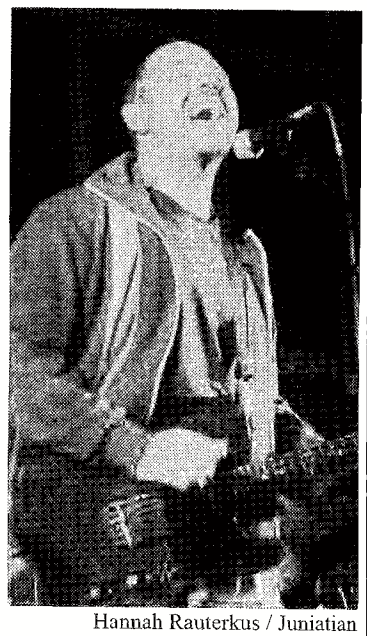
The Juniatian sits down with Virginia Coalition

Brit Tew

This reporter had the chance and the privilege to sit down and talk with the members of Virginia Coalition after their set. For the first ten minutes, it was a solo interview between a writer with his own, similar, musical aspirations and lead vocalist and guitarist, Andy Poliakoff.

Poliakoff offered insight into what is most important to Virginia Coalition: the fans. The low turnout didn't seem to bother Poliakoff, who said that as long as he knew that he did everything he could to let the people enjoy the show, he did his job.

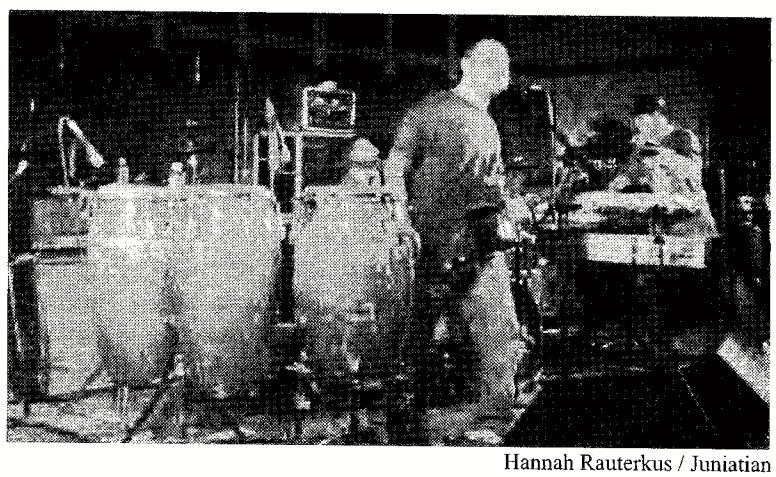
Poliakoff explained that, in a sense, he saw people as energy and that if he could get some energy out of a person during the show, then it was a good time. What disturbs him are the people who just stand in the audience, staring with no real emotion on their faces, as they weren't affected by the music at all.



Hailing from Alexandria, Virginia, the band has shared a close bond of friendship since high school, where they met in the music program. Starting off with cover songs and slowly adding in originals, the band worked its way to the big time through small clubs and the college circuit. The band members have worked hard to get where they are now, with over 3,000 shows under their belt in 5 years of playing together. The band is signed to an independent record label, Bluhammock records.

Virginia Coalition's influences range from Paul Simon to Tears For Fears.

"It's hard not to be influenced from the music, by the music you hear everyday," said keyboardist and percussionist, Paul Ottinger.



Their playful spirits, evident during the interview, are perfectly portrayed in their music. From their funky beats and audience interaction, to their jungle-like percussion breakdowns, this band electrified the room with a radiant energy.

Virginia Coalition is a heartfelt group of friends that seemed completely satisfied with its performance, despite the size of the audience. Their lively faces and animated bodies kept the musical energy alive in a not-so-crowded room.

Hannah Rauterkus / Juniatian

Lead singer Andrew Poliakoff drew in a crowd of about 120 with his voice and presence. Here he sings Voyager 2, a song written about the satellites carrying song lyrics across space.

Hannah Rauterkus / Juniatian

The Virginia Coalition opened up for Pat McGee on Friday, April 1. The band's energy was not lost on the students.

Philly dance troupe packs Oller Hall

Nicholas Carney

A dull yellow fog rolled out into the audience, eclectic music filled the air and audience members were filled with the insatiable desire to tap their toes to the rhythm. There was a sudden clap of music—and then the Koresh Dance Company dazzled the audience.

The performance, staged on March 31 in Rosenberger Auditorium, featured the world-renowned dance company as choreographed by legendary dancer Ronen Koresh. Koresh's style of dance is an amalgamation of a variety of modern dance techniques; combining

They received a standing ovation that lasted several minutes.

ballet, tap, jazz and hip hop dance styles.

The Juniata audience enjoyed four separate dance acts by the Koresh Company. The first acts, entitled "Twisted Pleasures" and "Facing the Sun," were bathed in amber and white lighting and featured a modern, techno-themed score composed by Hovaness and Daniel Bacon. The choreography of the acts matched their musical forms—complete with acrobatics and subtly accented with ballet.

In its second act, the Koresh Dance Company involved the audience in the show, thrusting the dancers into the aisles.

Michael Velez, a member of the company from San Diego, dressed as a street vagrant and entertained the crowd during the second act. He also had his own brief dance solo, performing as a drunk.

"You gotta a dollar?" Velez, dressed as his drunken character, asked a random audience member. "I've gotta show for you if you've gotta dollar."

Company members ran down the aisles, chasing Velez as he ducked into vacant seats and booed the performers.

"[It was] probably one of the best Artist's Series' [performances] we've ever had here," said Jared Smith, freshman. "It was just very unique—something we don't normally have here [at Juniata]."

So popular was the dance company that it received a standing ovation that lasted several minutes.

But the Koresh Company has roots that begin thousands of miles away from the United States and Juniata College. Company leader Ronen Koresh, formerly of the Marha Graham's Bat Sheva Dance Company, was born in Israel and immigrated to the United States in 1983 to further his dance career. His interest in dance ignited by watching his mother dance in the traditional Yemenite folk dancing style, and Koresh later grew more interested in the art form that would become his life.

Hannah Rauterkus / Juniatian

The Koresh Dance company put on a sultry display of original choreography for Juniata and community on Thursday March 31.

Koresh founded the group nearly ten years later, in 1991, and the company is currently based out of Philadelphia. Along with providing entertainment, the group also acts as an educational platform for both dance and the performance arts in general.

The Koresh group also offers dance classes for children at the Philadelphia Koresh School of Dance at a reduced cost.

"The best part of me is that I love what I do," said Koresh on his company's website. "I live it. I sleep with it. It is what I am."

The company arrived at Juniata as a part of its eleven-month tour, fresh from its March 19 performance at Mercyhurst College in Erie, Pennsylvania. The group will go on a several week hiatus and will next be performing at the Western Illinois University on April 23.

The Koresh Dance Company is made up of artists from all corners of the globe. Featured at the Juniata performance were dancers Fang-Ju Chou Gant, Amy Elfers, Jessica Daley, Curtis Lassiter, Lyron Paulin, Melissa Rector, Michael Velez, Dougie Styles and Natalie Williams.

A poignant homecoming for concert choir

Offers a musical feast of Brazilian and American folk songs

Maria Piazza

An evening of flavorful music that seemed to role off the tip of the Juniata Concert Choir's collective tongues made its homecoming concert something to remember. This past Saturday, April 2, in Most Holy Trinity Church, the concert choir brought its experiences and memories from sunny Brazil back to Huntingdon in a lovely homecoming concert. The choir sang a combination of Brazilian folksongs, American folk songs and African-American spirituals that demonstrated a true break from the classical, European style music the concert choir commonly presents.

The choir chose this year's music in an effort to break from the norm and work toward something completely different. Nothing could have been more amazing as the stream of ideas that came from several different types of songs, exuding a feeling that is rarely felt in traditional choir music. Each of the songs was filled with emotion, and a few were even accompanied by dance, which marked another change for the concert choir.

Senior soprano Anne Laird said, "The best part of a homecoming concert is that the music sounds different, hopefully better, because the memories that we have from Brazil shine through in each of the songs, which just changes our approach [to the music] and we get to share that with the community here at Juniata."

An important inspirational element of each homecoming concert is the choir's spring break trip, be it to freezing cold Croatia or boiling hot Brazil. Being in the country where the songs were born allows the choir to absorb the feeling of the country, as well as to gain a true appreciation for how the songs should sound. The homecoming concert then truly reflects the meanings behind the songs.

Professor Russ Shelley, head of the music department, said, "I don't think that anyone came back the same. The whole trip was a life changing experience; the trip in itself was profound in gaining the chance to appreciate a radically different culture, and I hope in the homecoming performance that we [gave] everyone else a taste of that."

"The whole trip was a life changing experience."

- Russ Shelly, Music Department Chair

A taste and more of Brazil was given on Saturday, when the choir sang "Hino de Louvor," "Boi Bumba," "Kyrie de Nanã," "Ave Maria do Morra," "Nosse Gente," "Quixabeira," "Resiado do Piau" and "Frevo," transforming pieces that moved everyone in the audience. In particular "Nosse Gente (Our People)" was a forceful piece full of feeling about the meaning of being a native of Brazil, and Brazil's importance in its contributions to culture and tradition around the world.

Though the concert choir did not travel to Africa or around the United States, the African-American spirituals were just as palatable, with expressive songs such as "Motherless Child," "Poor Wayfarin' Stranger," and "My Soul's Been Anchored in the Lord."

Especially notable was "Got a Mind to Do Right," which was sung only by the men of the choir. Their rich voices filled the room with the importance of living according to what is right. The other spirituals were no less impressive, filling the mind with thoughts of finding a home and being at home. They gave the end of the concert a savory aftertaste that will remain in the audience's mind for a long time.

As the concert closed with a song of love, a tearful rendition of "Set Me as a Seal," the audience left with a sense of the journey that the Concert Choir had undertaken while learning the music. And they left with a desire for more.

Eagles Abroad: The infamous "C. S."

Jay Trovato

It's time to talk about something as abstract and psychological as the Rorschach inkblot test: the "culture shock" phenomenon that will likely affect you during your travels abroad. But keep your critical thinking skills and patience intact, and you'll survive this mysterious component of life in another culture.

Before I say more about culture shock, I must mention I'm not too fond of the term itself. When I hear the word "shock," I imagine some poor soul sticking a butter knife into an electrical socket. Culture "shock" isn't nearly as sudden or harmful as the term implies, although you'll probably have experiences where you'll feel like you've been struck by a cultural lightning bolt. It happened to me at a village fiesta: I was eating unfamiliar food, surrounded by strangers, and being blasted with deafeningly loud Mexican old-timer music, all at the same time. It made me wish my plastic lawn chair was an ejection seat.

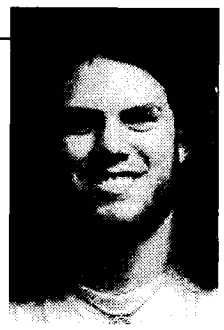
Situations like that are only temporary, though – they're not culture shock. Culture shock has a much fuzzier cause-effect scheme; it's a gradual process, impossible to pin down to one specific cause. It comes from your prolonged encounter with a completely new way of thinking, acting and relating. Your host nationals' system of existence – their culture – is not the same as the culture you and your U.S. compatriots are used to. The result is a psychological "shock," which varies for each person. It can include irritability, fatigue and a general feeling of unwellness. The frustrating thing about culture shock is that its causes are subtle and irremovable, so you won't be able to blame anyone or anything in particular for how you feel.

For me, one of the biggest sources of culture shock has been the extremely lax Veracruz university system. There have been many days that this strange school has left me confused, disappointed, and occasionally even ticked off–classic results of culture shock.

For example, the administration is inefficient–some of my classes started weeks after the beginning of the semester because the higher-ups hadn't yet contracted a professor. The professors often arrive unapologetically late to class, or sometimes don't arrive at all. My classmates talk loudly during class, or leave the room and come back half an hour later with a cup of coffee, missing most of the lecture in the process.

Now imagine me in the middle, your average hardworking Juniatian, coming from a college where none of the above ever happens. The most surreal thing is that no one besides me seems at all bothered by this culture – for my Mexican *compañeros*, it's totally normal.

I've popped some serious neurons trying to make sense of it, and have finally reached a conclusion that makes things fall into place: Mexico's cultural axis is social relationships, not punctuality and efficiency. Since figuring that out, I've slowly come to feel more at home at the Universidad Veracruzana, and in Mexico in general.



It may take you a while to understand what is going on around you, but be patient: answers will come. Mentally asking the question "Why?" is one key to fighting the disorientation of culture shock. Another important point: make sure to get enough sleep at night. Everything seems more stressful when you're tired, and culture shock is always more manageable after a good night's sleep. Finally, let a friend in on your thoughts, preferably from your host country; he or she may be able to give you culturally informed clues to help out.

Unfortunately, there is no magic cure for everyone, since culture shock is a highly personal event that you must respond to in your own way. Do, however, make attempts to grow through the experience rather than allowing it to defeat you, because culture shock can be the gateway to your most profound international learning.

The High Note

Wynton Marsalis Quartet delights imaginary crowd

Jacob S. Warner

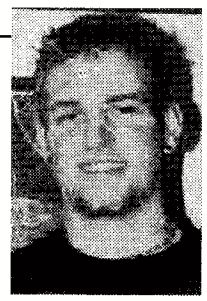
A cigarette's ember slowly chases filter as it nimbly rests, caressing the ashtray's glass groove. Ashen smoke freefloats upward in unequivocal spiral undulations, drifting, dissipating, joining the burgeoning haze. Cerulean bulbs send waves and particles careening across a smoky landscape. Candlelight flickers underneath the Star Wars extravaganza, inviting halos to dance on tables. There's anticipatory chatter, voices heard, then unheard, words like pieces of a vast vocal puzzle. House lights dim, and the room assumes a cool, steel feeling. Through the haze, figures seemingly seep from the hanging sweat and smoke, floating into position on stage, their hands caressing brass, ivory and wood.

Upright base bellows out the first notes…ba bum, buh bum, ba bum, ba ba bum ba…reverberating like fog horns through the smoky waves of the underground jazz café. Chatter slows to a halt, gazes following the sound to its source. Buh ba bum, ba ba bum ba….SNAP!! Wood collides with percussion, and the night has begun. Tsshhsh, tshshshsh, tsshshssh…cymbals crash with perfection and grace, gliding in and out of bass notes like tiny brass goldfish in a murky pond, shimmering flashes of musical spontaneity.

The lights come up…she stands, bathed in golden red energy, soul careening from her lips like a tribesman's darts, shot with precision, bursting with energy and emotion. Belting out highs and lows in seemingly simultaneous sequence, the tiny café is transformed into a cyclonic underground den of jazz ejaculation. Words spill out, swirling your body…head, feet, hands, chest…until you are the cyclone, circulating in elliptical ecstasy as the bass thunders and the drums keep a feverish beat.

Brass flashes, reflecting blues reds yellows; air becomes sound, becomes movement, becomes energy. Trumpet cuts through the fog, like a needle, sewing sensual sensations through this opening jazz tapestry. The snares SNAP, SNAP buh ba bum ba buh ba bum ba of the deep redwood bass provides the framework for the words to play, like spastically energized children on a jungle gym, recessed in this underground creative cave. SNAP, buh bum ba bum, the trumpet now sounds like a kazoo high on amphetamines, man this guy can blow…..the band reaches a feverish pace and the crowd wonders…can these guys go any higher, blow any harder?

Seemingly detached fingers sashay on an ivory dance floor, pounding pigments, evoking sonic surrealism. Voice, percussion, ivory, brass, bass…elements of nature in perhaps their purest and



This is the periodic table of jazz

yet most ambiguous forms. This is the periodic table of jazz. Combine them all, and the ensuing reactions are not only imminent, but beautifully unpredictable. The science of music is that there is no science. Theory states that nothing is certain, and all you can do is shake your head and order another beer. Because this band is just warming up. Coming down for minute, only to let you realize, if you can, how

The Arcade Fire: Cue the orchestra!

Jonathan Moody

Mmmmm, a sound comparable to the taste of smooth vanilla. Arcade Fire serves up large doses of sweet goodness. Comprised of friends and family, the band takes the increasingly popular "rock opera" trend one step further by crafting musical scores more accustomed to a concert hall or opera house. This large assemblage of musicians from Montreal and Quebec utilizes an impressive array of instruments to subtly caress your ears and mind with its sugary symphonic sound. Lullabies that take your hand, pull you close, gaze into your eyes then seduce you by whispering sweet nothings.

A very interesting story surrounds Arcade Fire and the making of its latest album, "Funeral." Members of the group fled Texas and Ontario to settle in Montreal and Quebec, where they endured extremely harsh winters. Barred up in a small hotel, they recorded some preliminary songs for "Funeral" in August of 2003. Later that year they came face to face with the cruelest winter yet, which showed no mercy upon the group, but helped to create lyrical inspiration. At this time they recorded the remaining tracks, despite the tragic deaths of numerous family members; hence the album title of "Funeral." Yet these sad and trying times didn't stop the Arcade Fire from keeping the album's tone light-hearted.

The sheer number of instruments and musicians on this album is nothing short of astonishing. This can be seen written on the small pamphlet inserted within the sleeve of the CD jacket, which lists everything from harps, cellos and violins to organs, horns and xylophones. Such an assortment ensures diversity throughout all of Arcade Fire's songs.

Brilliant use of these instruments glows on songs such as "Neighborhood #3 (Power Out)," where the xylophone jumps around to a most cheerful rhythm. "Haiti," their most unusual song, begins with the sound of water as a guest female singer's voice elegantly creeps in, at which point the listener is then treated to a delicacy of percussions and string instruments. In contrast "Rebellion (Lies)" is far and away the most ridiculously likeable and catchy song that you may hear in a long time. The drums and bass line coupled with the quick, one-note piano at the start make certain you understand that you're in for an enjoyable ride.

Despite a very satisfying album, Arcade Fire has significant room for improvement. The lead singer's voice is adequate throughout, but rarely exceptional. His ability and range is every so often pushed to its limits. As with most bands, his voice should improve as Arcade Fire releases more albums.

As a lyrics aficionado, I was quite disappointed in most of Arcade Fire's lyrics. Some are just downright comical, such as "I am waiting 'till I don't know when, 'cause I'm sure it's going to happen then." All of the lyrical subject matter was inspired by the death of family members and the severe winter seasons they encountered, but the same words and sometimes phrases are continuously repeated throughout the songs. This gives a bad déjà vu feeling of reoccurrence. The lyrics are questionably the lowest point on an otherwise very good album.

"Funeral" is Arcade Fire's most recent and technically remarkable work. Their symphonic presence coupled with vast instrumental variety isolate them from most other bands, but at the same time make them attractive to all listeners. Case in point: my older relatives heard them on a trip over Easter break and were quite pleased. "Funeral" is perfect when in need of a calm and relaxing mood trip.

Standout Tracks: Rebellion (Lies), Une annee sans lumiere, Neighborhood #3 (Power Out)
Lyrics Excerpt: "People say that your dreams are the only ones that can save ya/ Come on baby, in our dreams we can live our misbehavior."

Nathan Thompson

For the past two years or so (I'm not a math major), I have kept this column true to its format. Never once have I deviated from my format or the Ratings. However, the time has come to break the mold. What I present to you today is not a web site, *but* it will revolutionize the way you view the web. Ladies and Gentlemen: say hello to AdBlock.

If this name does not ring a bell, you are living in the dark ages, my friend. Allow me enlighten you. Imagine going to a webpage and not seeing any of those "click the iPod" or "shoot the melon" banners. Imagine never seeing any of those dizzy flashing advertisements saying something like, "Congratulations! You are customer #7,777,777, and if you click our ad, we'll bombard you with spam!" Imagine never seeing **any** advertisement banners or pictures. Face it, many of you secretly dream such fantasies. I know that I used to. However, unlike the dreams most guys have about supermodels, this is one fantasy that actually came true.

AdBlock is a Mozilla Firefox extension that is designed to block filtered image files before they ever load on the web page. All you have to do is specify what you want to be filtered, and AdBlock will do the rest. By using an asterisk, you can block any image from a certain site. For instance, by creating the filter "*doubleclick.net*," you will block every image from doubleclick.net, probably the largest, most vile advertising company on the Internet.

When you add filters, just be careful that you don't block something you may need. For instance, if you filtered out all images from Amazon (*amazon*), you'd remove all images from the company's site, and never be able to see book and movie pictures.

It would appear that the AdBlock project team at Mozilla created a utopian tool. While this may be true, we do not live in utopia, so it still has drawbacks, albeit ethical ones. It is really a simple leap of logic. Web sites cost money, and someone has to pay for it. Popup blockers have killed the revenue of popup advertising, so what's left? Banners and images on the actual web pages.

If everyone in the world were to use image blocking technology, a major source of the Internet's financial support would be blocked as well. By using AdBlock, you may have some small part in the increased pressure for malicious advertising software, spammers and maybe even the speculative loss of the Internet as a free commodity.

Personally, I don't buy the ethical debate. As it stands, I still can't give Corporate America enough of my two middle fingers. They can take their advertisements and bugger off.

If you choose to use AdBlock, there are several steps that you may have to complete first, though. First of all, you need to use the Mozilla Firefox browser. If you don't have it yet, just what are you thinking?!? Download it at www.mozilla.org. Then, in an open Firefox window, click on Tools>Extensions. Select the "Get More Extensions" option and download AdBlock from the list of possible extensions.

No matter where you stand on the ethics of ignoring advertisements, you have to admit that it's a pretty neat idea. You can cut all the extra fringes out of webpages and have them download faster. You can even snub your nose at corporations who see you as nothing more than possible revenue.

I personally think that Mozilla should take this a step further and develop StoreBlock. Image a world where you can simply create a filter and remove Wal-Mart stores from across the nation (filter: *evil-corporation-mart*). Until then, at least we can fight the good fight at a cyber level with AdBlock.

high you are, they glide into a sexy jam session that sends the mind on an adventure of unparalleled proportions. Punctuating piano tangos with sharp and poignant percussionary persuasions. The pace thickens and the musical plot quickens, as the band becomes not so much a band, but living, breathing musical energy. There are no lines left to blur. Reality becomes the unreal and the unreal, reality.

The Wynton Marsalis Quartet. *The Magic Hour.* A masterful menagerie of sound and sensuality, expression and improvisation. There are no lines to blur.

Jazz.

Sin City: Art AND action

Holly Brown

For a movie lover, the winter months aren't just long and cold because of the weather, they're also entirely devoid of any good releases. The Christmastime movies are far gone from theaters and the big time summer blockbusters are months ahead. Fortunately, director Robert Rodriguez decided to grace us with his brainchild "Sin City," a comic book adaptation using state-of-the-art digital filming.

"Sin City" is an exercise in style, being shot entirely using green screens. Director Robert Rodriguez employed an obsessive cinematographic style, taking frames from Frank Miller's comic and exacting the look on screen. The result is absolutely breathtaking.

The film itself is in black and white, with key elements – a woman's dress, the hero's shoes or a startling tattoo – filled in with color. Streets are gritty and black, rain falls like drops of ink, and the blood is sometimes red, sometimes a startling white pool. It's a beautiful, artistic film.

But just because it's pretty doesn't mean that dialogue and plot are neglected. Everything about "Sin City" is extreme – the violence, the drama and the dialogue. You just have to let it draw you in.

The movie attempts to create a new film noir style, and sometimes the extreme caricatures of the rough street rogue or the femme fatale are almost laughable. The delivery, however, is always sincere. The film is so strong that it can afford to be laughed at.

The film follows three different story arcs, each delving into the world of corrupt cops and gun-toting prostitutes that is Sin City. The arcs are each narrated by a different gritty tough guy, played by Mickey Rourke, Clive Owen and Bruce Willis. Each actor brings a distinct voice to his character and respective struggles.

Owen's complex story involving Benicio del Toro as a psycho cop and Rosario Dawson as the leader of a gang of tough-girl prostitutes is by far the best.

The weakness of the film, if it can be called a weakness, is the over-the-top tone it takes on. Rodriguez, who is a friend of Quentin Tarantino, attempts to recreate the film noir genre through his own modern perspective, much like Tarantino revives the pulp and samurai film genres. As a result, despite—or perhaps because of—its over-the-top style, "Sin City" isn't quite like anything you've ever seen before.

The film's only other drawback is that, in the grand practice of action flicks, most of the women are the simpering, dependent types. Dawson's mohawk-wearing Gail and Devon Aoki's samurai Miho are exceptions. But Jessica Alba's fawning character Nancy grates on the nerves something awful.

If you couldn't tell by the film's description, the audience is rather specific. The entire movie is a grown up comic boy's dream, so grown up comic boys will probably enjoy it best. Violence, language and nudity are rampant, so it's not for the weak of heart or easily offended.

Right now it's being touted as a male action movie against Queen Latifah's "Beauty Shop" girl flick. In fact, my friends and I overhead surprise that women were in the theater, and we were referred to as "girly" – a label I *greatly* resent. This isn't a *guy* movie, it's a *good* movie. Go prepared. Allow yourself to be fully submerged in a two-hour artistic, gritty whirlwind.

Men's volleyball finishes regular season in style

Earns big wins over Tait Division opponents

Katie Charles

The men's volleyball team saw its first real challenge from a Division III opponent on April 1. The team traveled to Springfield to round out Tait Division play for the regular season. The Eagles put together a well-rounded performance to beat the Pride, 3-2.

With the win, Juniata improves its record to 8-4 in the Tait Division and 15-7 overall.

In game one, the Eagles saw little challenge from the home team, winning by a solid 30-22 margin. Game two saw the tides begin to turn, as the Pride put up a solid fight. The game went back and forth until the Eagles took the lead for good on a kill from senior Ricky Ziegler, bringing the score to 22-21. Nick Bernardo put away the final kill to give the Eagles a 30-28 win.

Games three and four saw the Eagles fall to the Pride, 30-26 and 30-28, extending the match to a fifth game. In the final game, the Eagles led the whole way, jumping out to an early 6-2 lead before Springfield answered with a 5-2 run, cutting the lead to one. Sophomores Glenn DeHaven and Jeremy Barndt each had a kill and a block down the stretch to seal the game five victory.

For the match, sophomore Nate Ocasio led the way with 17 kills and three aces. Barndt and DeHaven had 11 and 10 finishes, respectively. Ziegler dished out 53 assists to go with his eight kills. Junior Tim Cole demonstrated a superb defensive effort with 18 digs on the match.

Earlier in the week, the Eagles took on Tait Division foe Penn State. The team played a tough match, eventually falling 3-1.

Juniata came out strong in game one and stunned the Nittany Lions, taking it 30-24. But the team couldn't hang on and dropped the next three games 30-14, 30-25, 30-24. Leading the team once again was Ocasio with 13 kills. Barndt added 12 finishes of his own. Ziegler passed out 43 assists. Junior Cordt Withum, Ziegler and Barndt each notched 5 blocks, while Cole paced the defense with five digs.

The team will use this match as a learning experience.

"It was a major disappointment. We thought we could do better. We have a chance to win the EIVA's, but this match proves that we still have a lot of work to do," head coach Ken Shibuya said.

Ocasio and Bernardo shared his opinion. Bernardo said, "We need to be more consistent. If we do that, we can win."

Even though the game was not their best, coach Shibuya was confident his team can pick up the pieces

Track team shatters records

Strong performances mark their opening meets

Corinne Barabas

The Eagles traveled to the Susquehanna Invitational on March 26 to compete against 17 other teams in their first meet of the outdoor season. Despite a dreary and cold day, the athletes handed in some strong performances and earned several top ten finishes in all events, in both track and field.

For the women, sophomore Elena Amato placed sixth in the 400-meter dash, and junior Meredith Troutman ran to an eighth place finish in the 100-meter dash. Freshman Caitlin Hinson took ninth in the 200 and thrower Debbie Delaney racked up a tenth place finish in the discus.

On the men's side, junior Justin Fritzius, the current school record holder for the 3000-meter steeplechase, broke his previous record with a time of 9:52.52, beating his old mark by ten seconds. Sophomore Mike Chirdon ran the 10,000-meter race in 33:49.40, which topped the school record by a minute.

Chirdon said, "Being that it was my first 10,000, I was really surprised that I broke it by the amount of time I did. And I ran the first 5K faster than the second. It's definitely a mental race; you have to find a good pace and just stick with it. It also helped to listen to Coach [Cutright]. He helped me out a lot."

Jeremy Weber captured the gold in the long jump with a winning measurement of 6.68 meters. The men's 4x100 meter relay team won first place after a good performance by sophomores Gary Ondecko, Dusty Sier, Randy Anderson and senior Jeremy Weber.

Anderson also took third in the long jump and second in the 100-meter dash. Senior Ben Beas and junior Mike Vella both earned fifth place in the 400-meter hurdles and the 1500-meter run, respectively.

Battling almost 20 schools, many of which were Division I, Juniata braved the rainy, cold conditions and showed some strong performances in both track and field events on April 2 at the Western PA Championships in Pittsburgh.

The men placed eighth out of 14 teams. For the second consecutive week, junior Justin Fritzius broke another of his school records. He topped his own time of 16:09.98 by almost seven seconds in the 5,000-meter run.

Fritzius commented, "Breaking these two records feels good, although I knew a lot of records would fall this season. We are starting out strong, and hopefully we will keep it rolling and bringing down times."

Hannah Rauterkus / Juniatian

Freshman Matt Steficek, senior Dave Bowser, and sophomore Elena Amato practice for track with the team every weekday.

Baseball team drops heartbreaker to Lebanon Valley

Robb Patty

The Juniata College baseball team lost an extra inning thriller to conference foe Lebanon Valley, 8-7, on March 31. The loss dropped the Eagles to 14-9 overall and 6-4 in the Commonwealth Conference.

The Eagles trailed 7-4 after seven innings, but were able to plate three runs in the top of the eighth to tie the ballgame. With the bases loaded in the top half of the eighth, senior Matt Garner cleared the bases with a triple to keep the Eagles' chances for a major conference victory alive.

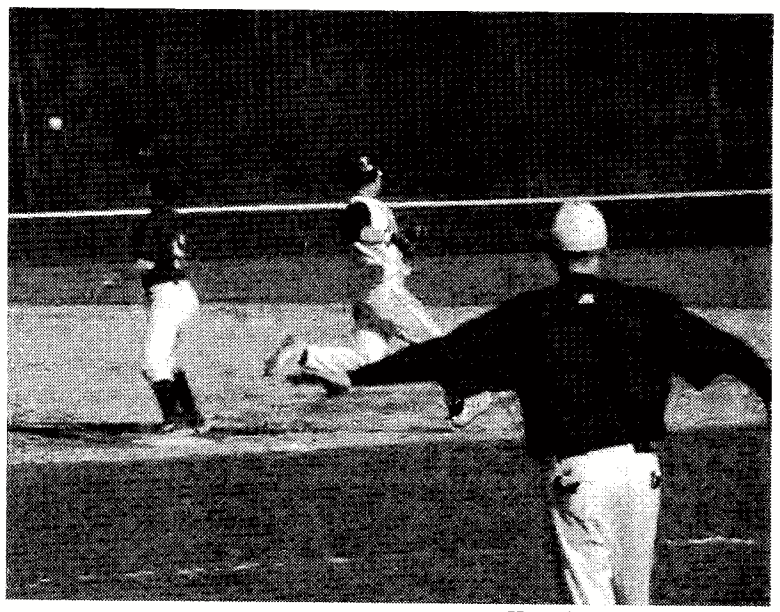
Senior Matt Garner cleared the bases with a triple

Sophomore relief pitcher Jeff Hayes then came into the game and pitched three solid innings for the Eagles. Hayes pitched perfect eighth and ninth innings to send the game to extra innings.

The Eagles, however, were unable to push across a run in the ninth and tenth after putting runners on base in both innings. Lebanon Valley then sent pinch-hitter Christopher Schank to lead-off the bottom of the 10th and he delivered a game-winning solo home run.

The team salvaged a split with host Elizabethtown on Saturday as the Eagles dropped game one by the score of 12-0, but woke up in the late game, beating the Blue Jays 4-1.

In the second game of the double header, junior pitcher Cody Zong tossed a complete game four-hitter that earned the Eagles a much needed split against the Blue Jays, as well as a huge win in the MAC.



In the top of the third inning Zong got some help from his teammates as freshman Jason Enoch led off the inning with a single, followed by junior David Saintz crushing his fourth home run of the season. This put the Eagles up 2-0 and would be all the run support needed for Zong as he went the distance for the win.

In game one the Blue Jay offense erupted as they scored 12 runs on 16 hits. Elizabethtown scored runs in every inning and had at least one hit from each of its nine starters. Senior pitcher Jayme Fye was charged with the loss. Saintz, junior Troy Beaver and junior Walt Goedkoop each finished with a hit for the Blue and Gold.

This season the weather has affected the Eagles' ability to have practice outside for quality time on the diamond. The inclement weather also forces the team to play many games in a row or doubleheaders to account for the cancelled games.

"The weather can cause problems in many situations. First off if we have bad weather we usually will only get outside to practice like once a week when were not playing games. Then there is obviously restrictions on what you can do in the gym versus what you can do outside," said freshman pitcher Jay Enoch.

The Eagles will take the field this Friday and Saturday when they travel to Albright for two more important conference games.

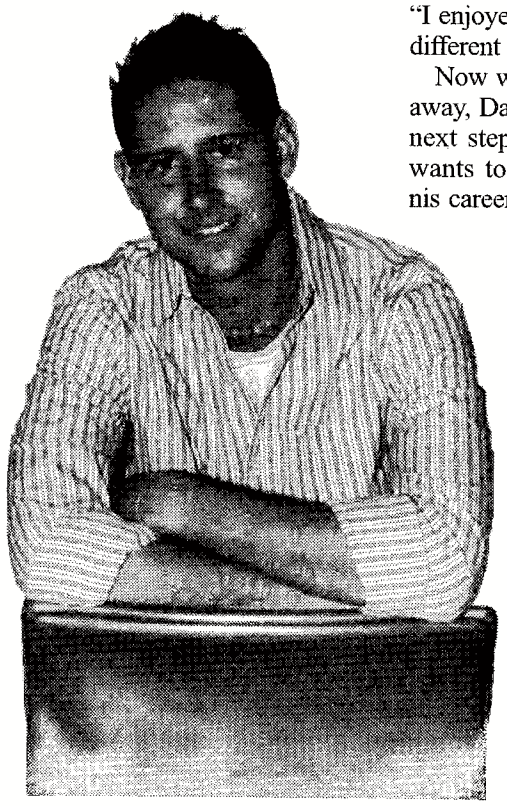
Hannah Rauterkus / Juniatian

Junior David Saintz (5) is faster than the throw making it to first with plenty of time to spare.

Athlete off the Field

Katie Laucks

Graduation is just around the corner. It has never been so close. But just before senior tennis player Dave Bullock takes those last steps on Juniata ground, he has a few things he must finish.



His classes are one of those things, and the second is a successful tennis year. So far this season, Dave is undefeated in singles and is helping the Juniata College men's tennis team to a successful 2005 campaign. Once the tennis season ends, however, Dave is still faced with a looming challenge.

After he graduates, Dave plans on attending graduate school to continue his education. Here at Juniata, his POE is history with a secondary emphasis in marketing. "I started with a business POE, but I found that I enjoyed my history classes more," he said.

Dave will use his studies in both history and marketing at Lehigh University next fall. "I plan on becoming a professor someday," Dave said about his future plans.

This year Dave was accepted into the senior thesis program. This is a program a student applies for and if his thesis is accepted, he then participates in the National Conference of Undergraduate Research. At the conference, Dave presented his research on the political influence of the public games on rulers in both republican and imperial Rome. "I am very pleased with the work I have seen so far," said Professor Belle Tuten, Dave's supervisor for the project.

Dave also does many on-campus activities to keep himself involved. He works as a campus tour guide, where he enjoys the a chance to interact with future students. He is also a volunteer at the Special Olympics. "I did it once and enjoyed myself so I just kept volunteering. It always feels good to give something back," Dave said.

During his time at Juniata, he also had the chance to participate in the international study abroad program. Last year he studied abroad with the business program in Germany. "I enjoyed the professors, and the different culture," he said.

Now with his future just weeks away, Dave is ready to take those next steps. But, before that, he wants to end his collegiate tennis career with a solid record and he thinks the team can do that. "Teams will underestimate us. This team has a positive attitude and I think we will surprise a lot of teams," he said. "Top three in the MAC is something I think we can pull off."

At the conclusion of the tennis season, Dave's full attention will turn to becoming a professor. There is no doubt that his positive attitude on the court will carry over into his career aspirations.

MANAGEMENT
Advance to the front.

FedEx® Ground needs you for our front-line management team at our new facility in Hagerstown, MD. This is a great opportunity for recent college graduates. We also have part-time management positions available for undergraduates.

SERVICE MANAGER

QUALIFICATIONS:
- BS/BA degree
- 0-3 years' supervisory experience
- Dispatch, dock management experience preferred

BENEFITS:
- Health/dental/vision, 401(k)
- Compensation in the mid $30's
- Stock purchase, pension program
- Competitive, team environment with growth opportunities

Please fax or e-mail your resume to:
Fax: 301-233-8737

Men's tennis team secures first conference victory

Jeremy Simmons

On Saturday, April 2 the men's tennis team earned its first conference victory of the season as Widener fell to the Eagles, 5-2. The Eagles currently have a record of 2-1, while Widener dropped to 1-2.

The match started out a bit shaky for the Eagles as Widener claimed the first two singles matches. However, Juniata fought back to win the next four singles matches at the third, fourth, fifth and sixth positions. At both the third and sixth singles spots, senior Dave Bullock and junior Romain Plessis achieved 6-0, 6-0 scores.

Once the doubles play started, things began to look grim again as the Eagles dropped the first doubles match to Widener. Nevertheless, Juniata fought back again to take the second and third doubles contests. Sophomore Jonathan Cohen and junior Tom Nelson teamed up for an 8-2 victory in the second doubles spot, while Plessis joined up with freshman Brian Sykes to finish the match with another 8-2 victory.

Prior to the win, Juniata played an exciting season opener against Moravian College on March 19. Unfortunately, the Eagles lost the match by one point, 4-3. Bullock, Tom Nelson and Romain Plessis all recorded wins in their singles matches and Plessis joined up with Brian Sykes to obtain an 8-5 win at third doubles.

In the Eagles' second outing of the season, they bounced back after their close loss against Moravian to defeat Penn State Altoona at the Blair Racquet Club, posting a final score of 5-4. Bullock and Plessis again recorded wins in their singles matches and were joined by Cohen, who also posted a singles victory for the Eagles. Juniata also recorded two wins in the doubles division as Bullock and sophomore Brandon Long, along with Plessis and Sykes, pulled off victories.

The team as a whole seems to be in high spirits and has a great level of confidence. Plessis said, "Everybody supports each other…all the team is cheering for each other."

Even with the unfortunate season opener, the team rallied together to win its next two matches. Bullock said, "We don't want to let the Moravian game slow us down."

The Eagles next game is away when they play Penn State Altoona on April 4.

Softball winning despite weather

Rain has delayed most of team's season

Katie Laucks

It would be nice to have sunny weather here in Huntingdon, especially for the Juniata College softball team. But, due to the recently harsh weather, a good chunk of the season has been postponed.

The softball field has been under water and quite a number of times been in no condition to have a game on. In turn, many of the women's games have been postponed with no definite set time for a make up.

"It's really annoying to keep having games canceled. It's really no ones fault, it's the weather," said junior Abby Sener.

However, the team continues striding to a successful season. So will the season be going on longer?

"We won't have to go longer in the season, because [the games] all fit into the end. Unfortunately, that is during when finals and big projects are, too" said Sener.

The team was finally able to take the field on March 31. The women took on the Bullets of Gettysburg College, putting up a good effort in both games.

Junior pitcher Renae Hobbs tossed in one of her best performances. Hobbs went six innings allowing just two runs on six hits while fanning one. Unfortunately, the team couldn't hold off the Bullets. The visitors scored on a triple in the second and then again in the bottom of the second. The Bullets went on to win, 2-0.

In game two the Eagles came out strong with tough pitching from Lizzie Bartosik, who allowed five runs on nine hits in six innings and struck out four batters. Still, the Eagles lost game two, 5-2.

Recently the team took on Pitt-Greensburg. Juniata posted two wins, 3-0 and 4-0. Strong performances from freshman Kim Stoia and junior Jess Darrow helped seal the victories. Stoia allowed just three hits in seven innings and struck out seven batters.

In game two, Darrow only allowed two hits in her five innings of play. Bartosik came in to finish the game and did not allow a single run. With these two games the team is back on the route to winning.

The team takes on Albright College in a double header on April 9, if the weather cooperates.

Men's volleyball finishes regular season in style

continued from page 12

and finish out the season well. "The players really took charge after the loss. They are dedicating themselves to the details and won't settle for mediocrity. They are a mentally tough team."

On March 26, the team earned another victory over a Division I rival; this time, Princeton. The Eagles took the match in three games, 30-28, 30-28, 30-25.

In the win, the Eagles got an outstanding match from Ocasio, who recorded 15 kills and two aces on the offensive end, as well as six blocks and six digs for his defensive effort. Balancing out the attack were Withum, Barndt and Bernardo, adding 10 kills apiece. Ziegler dished out 43 assists, while helping the team to a .274 hitting percentage for the match. Cole led the defense with 10 digs.

The night before, the Eagles scored a victory over EIVA Tait Division foe New York University. The team won the match in three games, 30-23, 32-30, 30-26. Bernardo and Ocasio led the attack with 14 finishes each. Bernardo also led the team with three blocks on the evening. Ziegler set the tempo for the weekend by passing out 44 assists.

On March 22, the Eagles took on long-time rival and Division I opponent, Rutgers-Newark. Prior to the match, Juniata and Rutgers had played each other on 23 occasions, with Juniata winning only twice. But the Eagles turned the tide with a decisive 3-0 victory over the Scarlet Raiders. The Eagles took the match in a convincing fashion posting scores of 30-26, 30-18, 30-25.

Leading the way on the attack was Barndt, who finished with 12 kills and a career-best seven blocks. Also in double figures were Withum and sophomore Glenn DeHaven, posting 11 and 10 finishes, respectively. Ziegler directed the offense with 46 assists, as well as three aces. On the defensive end, Ziegler and Bernardo added five blocks apiece and Withum chipped in four, while Ocasio, Bernardo and Cole each brought up seven digs.

On April 2, the Eagles once again had the opportunity to give some younger players valuable court time. The team went up against EIVA opponent, Sacred Heart. The Eagles presented a very balanced attack, with freshman Matt Fritz leading the way with nine kills. Sophomore Ryan McGinley and junior Matt Springer added eight kills apiece. Freshman Zack Bock directed the offense with 37 assists and sophomore Dan Rapp had three blocks.

The team is now preparing for the post-season. The next step for the Eagles is the EIVA Division III tournament, where they hope to earn a bid to the Molten Division III Championships at Stevens Tech on April 15 and 16.

The team will use the Division III tournament to get ready for the rest of the season.

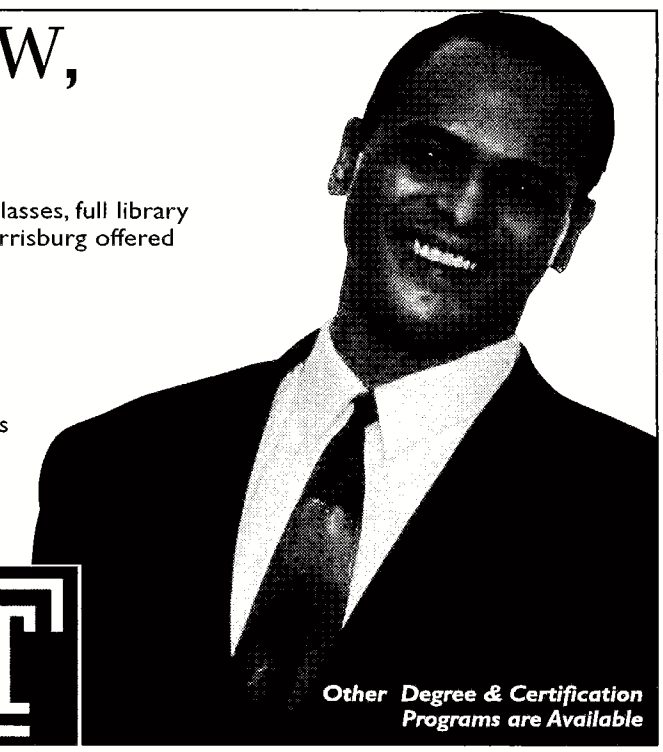
"We are using the Division III play-offs to build momentum, consistency and confidence," said Bernardo.

"We want to see Penn State again," said Ocasio.

Juniata is currently ranked third in the Tait Division and will qualify for the Division I play-offs following the Molten Tournament.

"When I planned my MSW, I planned on Temple".

"That's right–Temple. With the convenience of a central PA location, small classes, full library resources, internet access and individualized attention, Temple University Harrisburg offered everything I needed to complete my Master of Social Work degree".



Temple Harrisburg offers your choice of concentrations:
- Clinical Practice with Individuals, Families and Groups
- Management and Planning
- Practice with Communities and Policy Arenas

Whether you choose the main Harrisburg location, or satellite MSW programs in Huntington and Pottsville, you'll find all of Temple Harrisburg's classes are developed to meet the needs of working students, with classes held in the evening and on weekends.

Advanced standing program available for qualified applicants with a BSW degree.

Tar Heels win fourth National Title

Classic championship game fitting end to terrific tournament

Tommy McConnell

The Madness began in March, but it ended with May.

Sean May scored 26 points and pulled down nine rebounds – on his birthday, no less – to lead North Carolina to a 75-70 win over top-ranked Illinois Monday night at the Edward R. Jones Dome in St. Louis.

The game was close through most of the first half, until a trademark UNC run – think Raymond Felton rocketing from baseline to baseline, lots of alley-oops to Marvin and Jawad Williams and transition threes from Rashad McCants – gave UNC a double-digit lead heading into halftime. A flurry of second-half threes from Illinois eventually tied the game, but Marvin Williams' tip 1:26 left in the game was the difference maker.

The win gave North Carolina its fourth national title, but it was the first for its head coach, Roy Williams. Williams had been to the Final Four four times before with Kansas – twice losing in the title game – but had never won the big one. With Phil Mickelson winning a major and the Red Sox finally winning a World Series, ol' Roy had become the poster child for Close, but No Cigar.

He silenced all doubters Monday night, orchestrating an instant classic.

For being the favorite in the game, North Carolina had a lot of doubters. Williams finally laid his critics to rest. Then there were those who said the Illini were a better team, that UNC would lose the "team vs. talent" battle. A gorgeous second half play where all five Tar Heels touched the ball consecutively, leading to a fouled Sean May lay-up, was the best "team" play of the night. And those who said North Carolina played no defense? UNC held Illinois scoreless for the final two and half minutes. Case in point: Needing to make a final stand with under a minute, Felton promptly picked off an Illini pass, sealing a Carolina victory.

The title game was a fitting end to one of the more dramatic tournaments in recent years. The bracket could barely contain all the upsets and buzzer-beaters, the storylines and subplots.

Take retiring Vermont head coach Tom Brennan leading a first round upset of Syracuse - helped by T.J. Sorrentine's dagger three pointer from what seemed to be Burlington – and then becoming *only* the third person to have a Ben & Jerry's ice cream named after him (Retire Mint).

Illinois coach Bruce Weber suffering the loss of his mother prior to the tournament, then leading his team on an emotional run to the title game.

Or West Virginia's Mike Gansey. Two years removed from the quitting scandal at St. Boneventure's, Gansey wouldn't let WVU quit,

The bracket could barely contain all the upsets and buzzer-beaters

leading them to upset after upset – and to within a game of the final four. He and his teammates put on one of the best outside shooting performances in tourney history, plus how many kids did he inspire to wear a t-shirt under their jerseys?

How about University of Milwaukee head coach Bruce, who was once the mascot at Boston College, knocking out his former employee to go to the Sweet 16?

And the buzzer-beaters. Bucknell knocking off Kansas with an fundamental post-move, N.C. State eliminating defending champ UConn with a – cue Bill Rafferty – dipsey-do…and the kiss! Salime Stoudamire's heroics one night, only to be forgotten in the same situation the next. Or Patrick Sparks will-this-ever-bounce-in three to send the Kentucky-MSU game into OT?

The only way it could have gotten any better is if Gus Johnson could have called every game.

The game of the tournament had to be West Virginia against Wake Forest in the second round. It was a double-OT thriller, with little known WVU connecting on three after three, answering title-contender Wake bucket for bucket for 50 minutes. Player of the Year candidate Chris Paul had to watch from the sideline, after he unwisely fouled out, as WVU sent him and his team packing.

In the end, though, it came down to the two best teams all season. For the first time since 1975, the two top-ranked teams squared off in the season's final game, and neither dissapointed. UNC prevailed, its "talent" too much for the Illini team.

(UNC's talent level dropped considerably just moments after the game. Star swingman Rashad McCants, who once referred to UNC as a "prison," said he was likely entering the draft. McCants stood at center court, looking upward, arms outstretched, looking like Andy Dufresne after escaping from Shawshank.)

Still, the night belonged to North Carolina. Sean May dominated. Raymond Felton ran the show. McCants scored and threw up the ROC. Roy Williams got the monkey off his back, and he did it his way at his alma mater. You can click those 'Heels three time, Roy. You aren't in Kansas anymore.

And for those scoring at home, that's UNC 4, Duke 3.

Track team shatters records

continued from page 12

Anderson sprinted to a second place finish in the 100-meter dash with a time of 11.35, while Sier earned fifth place in the same event. The 4x100 relay team, composed of Anderson, Sier, Ondecko and Weber, had a strong showing, earning them second place. Freshman Matthew Booth took a sixth place in the long jump.

For the women, senior Kira Troutman registered a fourth place in the javelin throw. Elena Amato took eighth place in the 800-meter dash.

Junior Debbie Delaney took care of the record-breaking on the women's side as she earned a new school record in the hammer throw. Delaney earned an 11th-place finish with her throw of 112' 03", breaking the previous record of 109' 8 ½."

Delaney said, "I was really excited and surprised, since this is my first school record. I thought I'd be doing it first with the discus. I'm really proud of all the throwers, because everyone is getting new personal records in their events as the weeks go on."

Next week, the Eagles will be competing against many MAC teams that they will meet again in the Championships at the Messiah Invitational.

THE RANDOM ELEVEN

The column with no rules. Except profanity. And libel. And stuff like that.

Matt Russell can't count.

Constructive bureaucracy: PennDOT, like all great government operations, has a lot of procedure manuals. To make changes to one, they send out what's called a "strikeout letter," abbreviated SOL, to officially make a correction. The overseer of this process is known as the SOL Administrator. Heh.

What's the *symbology* here? I recently read an article mentioning the practice of dove hunting. Running around shooting doves? What do you do afterwards, gather for an olive tree bonfire?

I_ONY STORE: Every time I go home I drive by a store called the Lighting Gallery. Since last fall, it's had three letters in the sign burnt out. I guess those letters were out of stock.

Inappropriate animal contact: I was fumbling in my friend's bathroom for a light switch when I heard him call out, "Pull the cow in front of the mirror." Oddly, that worked.

Free terrorist training: Apparently, a college staff member's name is on the terrorist watch list (it's a duplicate name). It makes it a big hassle when she wants to board a plane. Before her last flight, the booker advised her to use her middle name to avoid this. When she responded that she didn't have one, the booker suggested she make one up. Doesn't that imply she'd need a fake ID too? I can't raise my eyebrow any higher.

Liberty is safer behind bars: Ah, Philadelphia, the City of Brotherly Love. It's home to some famous pieces of our history, like the Liberty Bell. Our "terrorist" staff member was there recently and reports that the Bell is quite safe from real terrorists, enclosed by metal bars. You actually have to wait for a guard to periodically open the gate to let people in and out. Nevermind the irony, at least we're safe! …right?

Drunken quote of the week: "I'm not drunk, I can say 'sophisticated!'"

Sober quote of that week: "That blowup doll is finally bringing some hall unity!" Now tell me which quote made more sense.

Guest lecture for our guest lecturer: Some guy posed a five minute long "question" after the lecture by the New York Times education editor, rambling on about Head Start. New rule: If it takes you longer than 30 seconds to pose a question, someone chucks a soapbox at your head.

Conflict of interests: I like how JAB had to move that Friday night movie at the last minute. Even their own staff forgot about poor Pat McGee. With that option removed, I didn't have much choice… I went downtown to see Sin City.

"Pat McGee - it gets better every year!" That's what the banner over the entrance to Brumbaugh said. What the hell does that mean? Were they referring to Mr. McGee with the indefinite pronoun "it," or were they talking about the concert that hasn't existed for three years? Hmm…

Facilities decides the season: It's officially springtime now. How do I know? No, it wasn't Easter. Nor was it Punxsutawney Phil, the Spring Equinox, the returning birds, or the weather. No, I know it is spring because Facilities, trying to replace the grass they ripped up along the sidewalks with snow plows, went and sprayed that green snot fertilizer all over the place. Ah, another Juniata spring.

All Class Night

9pm tonight!

It's not just a tradition - it's damn funny.

Collegiate Dementia

"God, The Musical."

Carolyn Keller

Stop for a moment and pretend that Easter was just yesterday. April is when that Christian-Holiday-That-We-All-Pause-For usually is anyway.

And in the name of Easter, I ask: ever have one of those moments when something is unintentionally, hysterically funny? Ever have that moment involve Jesus?

Yeah, so I was sitting in church for Easter Sunday—and for those of you who know me better, no, that's not the joke—and the flock was in the pews, and the church was decorated, and after many excessive readings, it came time for the Gospel. This part I don't exactly remember, but apparently it had something to do with the Baby Jesus rising from the dead, which prompts the question of zombies and their existence in the world and Holy History, and then it was Homily Time.

Next thing you know, Enthusiastic Pastor-At-Large Father (Fr.) Andy K. is bounding up to the lectern with quite a bit of glee, hair wild and ablaze in blonde highlights. Then, mixing with the lilies and climbing up the stepstool, looking every bit the psychopathic Fievel, grinning, he says:

"You're going to live FOREVER!"

You know. Standard church fare. But Pastor Fr. Andy K. was quite pleased to give this revelation. And the sheep are happy, because not only have they just been saved, commemoratively speaking, but they know Fr. Andy K. is the King of Feel Good Sermon-ry, and he's going to back up that statement with some kind of bravura performance.

Yes, and get his Oscar too. Fr. Andy K. leans into the mic, breaks from his pseudo-evangelical posture, and waxes pensive and nostalgic.

"You know," he says, surveying the crowd, "Back in the 70s or 80s there was this old musical-comedy. It was called...." Fr. Andy K. pauses here, oozing drama:

Intrigued, my brain started going a bit. "West Side Story"? Clearly not, as everyone dies. "Jesus Christ Superstar"? Hmm. More fitting. "Joseph and the Amazing Whatsicolor Dreamcoat"---

"'FAME.'"

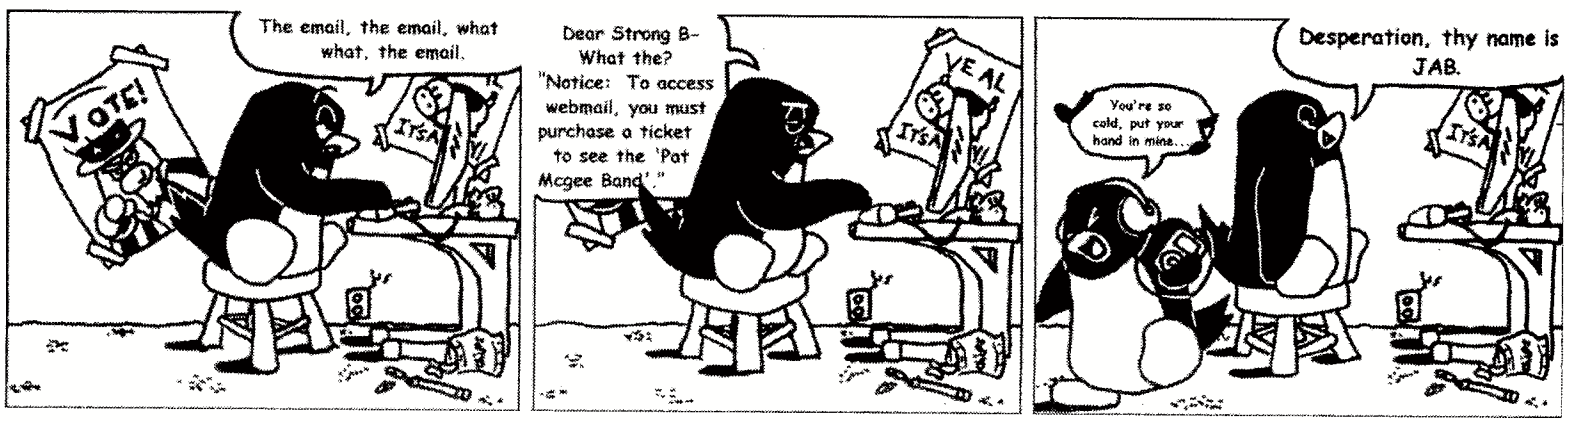
"Fame?" Simon Peter singing the body electric and the Christ wielding a microphone like Cookie Monster on speed?

My face took on a twisted, bewildered aspect, and I started making that funny gurgley noise that you often hear in those that succumb to faux-coughing/laugh-smothering, as though they were Charlie Chaplin with TB.

My mom started looking at me a little funny, no doubt wondering why my shoulders were shaking in a most unnatural way.

And Fr. Andy K proceeded to promise that no, he was not going to sing, and no, it may not be in photographs or on a movie marquee, but yes, we were allll going to live forever.

Oh happy day.



He was, of course, talking about heaven and whathaveyou, and not glorious 80s cheese, though postmodernists might relate the two. Or maybe they wouldn't. Sorry all, I suppose I ought to know that but it was covered in CA, *so*.

Either way, the Good Lord, or the Kindly Prophet, or the Historical Revolutionary, or whatever title floats your particular boat, doesn't rise from the dead, or claim to, every day. So, for a moment, among the lilies and in the pews, everyone in church and Fr. Andy K. especially got to ponder what this revelation means to them, and how eternity figures into the deal they call their own lives.

Which, to say the least, reiterates the need for ESP. I could write a book with what I would have learned, and that'd be enough, I think, to at least get my name up in lights.

The Rookery

All Class Night: too much?

Tradition makes controversial comeback; spawns public forum

Nate Drenner

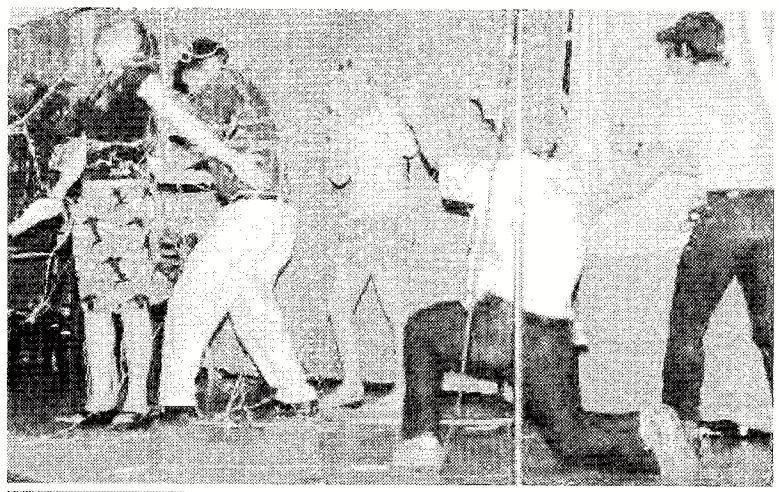
All Class Night has returned from near-death and brought with it a renewed taste for the extreme.

But this year's All Class Night crossed the line of good taste in some people's eyes. A public forum was held on April 14 to discuss what transpired at the event a week earlier.

A number of incidents that occurred on stage, including portrayals of ethnicity, were deemed inappropriate by administrative staff and offensive by some students.

"If done in the right way, what you're about to see is for mature audiences only," said Bub Parker, assistant director of alumni relations, introducing All Class Night as emcee. The tradition is known to be crude but to some it went beyond even that this year.

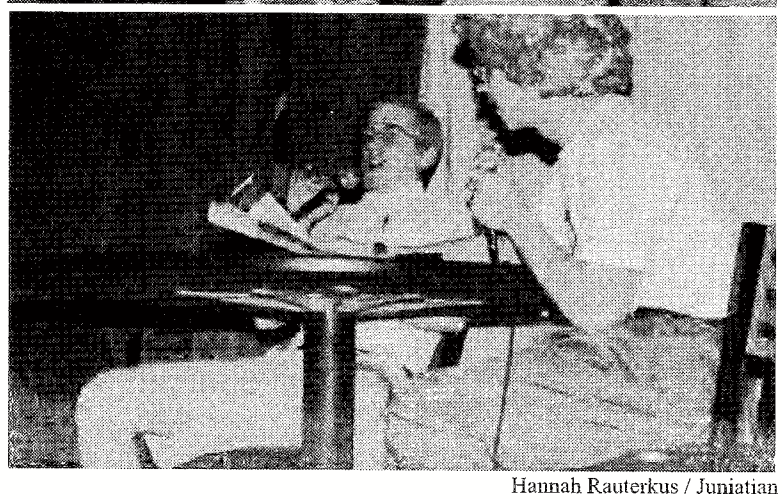
This was the first year since 2002 that every class participated in the event, which has mocked Juniata College life since 1938.



Though several points were brought up at the forum, the senior class's skit involving recruitment of ethnic minorities was the most hotly discussed. Some compared the scene to blackface, an old form of theater where white actors painted their faces black and portrayed African Americans stereotypically.

The seniors apologized and emphasized that their intention was to satirize the Enrollment Center's commonly perceived overrepresentation of ethnic minorities in marketing publications. The now-infamous scene centered on an Enrollment photo shoot where students donned different colors of face paint to appear as several different races.

"The entire enrollment scene was not to make fun of students of different race, religion, or background. Rather, it was to make fun of the lack of diversity which we claim to have," said senior class president Drew Waligora in a statement of apology that was read at the forum. Waligora was unable to attend.



The skit crossed the line far

continued page 3

In the freshman skit (top), the JCPD attacks prospective students with silly string. Representing the sophomores (middle top), Lisa Detweiler dons a Catholic girl outfit and a sardonic sense of humor to host a prospective. Muhammad Jami is tackled by the JCPD (Brad Kissel) for carrying a suspicious substance in the juniors' skit (middle bottom). In the fourth performance (bottom), seniors Jeremy Weber and Jeremy Langdon play their roles in an allusion to "Napoleon Dynamite."

EAST EXODUS

Popularity declines as more move off campus

Meredith Pink

Students are usually chomping at the bit to live in East. With friends, parties, air conditioning and apartment-style living arrangements, what's not to be desired? But this year told a much different tale.

In previous years, the Residential Life Office was flooded with applications from prospective East residents. This year, however, applications did not start coming in until the day of room draw. In fact, after room draw two East apartments were left unoccupied.

Tim Launtz said this was the first time in his years as Director of Residential Life that East did not reach full capacity.

Launtz said a major cause of the decreased interest in East was that more students than usual were allowed to live off campus. A total of 185 students were granted permission for the '05-'06 school year.

Junior Tiana Mazzarese has lived in East for the past two years and will be living downtown next year. She said, "There are no parties

Students petition daily announcements

Format blamed for club decline

Genna R. Welsh

Amid decreased attendance at activities and complaints of censorship, students have expressed their dissatisfaction with the daily e-mail announcements. In fact, the dissatisfaction of Juniata's current students is so emphatic that some are petitioning to revise the new e-mail policy.

"The Big Brother announcements page" is what junior Kevin Fasick, widely known as "PAR," calls the daily announcements. Like many students, Fasick believes it enforces censorship. Fasick has written a proposal asking administration to reconsider the loss of direct, unmediated communication that recent e-mail changes have created.

"It's like they pick and choose which announcements will be posted," said senior Nikki Bressler, secretary of HOSA and co-president of women's lacrosse.

But technology officials say that the announcements are not selective.

"I definitely do not want to censor anything," said Director of Web Technology Joel Pheasant. Pheasant pointed out that incorrect or lack of room scheduling can prevent announcements from being posted. The Office of Conferences and Events verifies room assign-

50 show research at Symposium

Presentations range from bioterrorism to music; keynote has students sitting in aisles

Liz Houts

Anyone who meandered into von Liebig Center for Science on Thursday and Friday, April 14 and 15, probably noticed a bit more clutter and excitement than usual. The 2005 Juniata College Research Symposium showcased more than 60 oral and poster presentations by student researchers spread throughout these two days.

Dr. Mark Buller, Professor of Molecular Microbiology and Immunology at St. Louis University, delivered the opening address on Thursday. Buller's speech, entitled "A Coming Plague: Infectious Disease in the 21st Century," lured so many students and faculty that many had to sit in the aisles in Neff Lecture Hall.

Buller's speech focused on both the history and the future of bioterrorism -- or as he liked to call it, "biocrimes." Buller explained that biocrimes are likely to become an increasing threat in the future because infectious diseases are so easy to cultivate.

"If you go onto the Internet and conduct a search, you can find recipes for pretty much anything, like ricin or botulinum, very easily," explained Buller.

Buller, a long-time collaborator with Juniata College faculty member Dr. Michael Boyle, was asked to speak at the symposium last May by senior Levi Blazer. Blazer, a biochemistry POE, is secretary of the Tri-Beta Biological Honor Society and the student in charge of the majority of the planning for this year's Research Symposium.

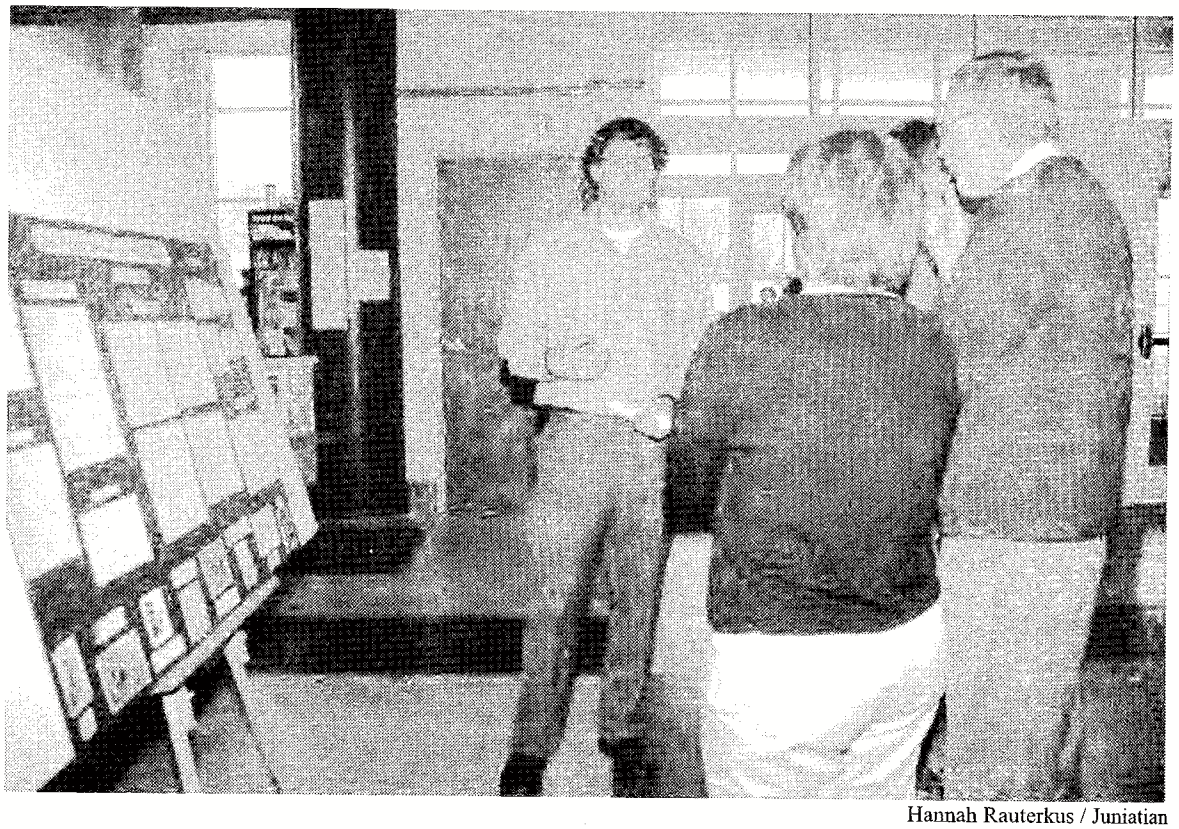
Although the symposium has been traditionally dominated by science-oriented presentations, this year's presenters included students from nearly every discipline. For the first time, the symposium even included two musical performances: a piano recital by Sara Campbell and several pieces performed by the Juniata College Flute Choir.

Campbell performed two piano and vocal songs she composed, in an effort to display the contrasting feel of music based on the different chords incorporated into the piece.

"A lot of people don't realize the importance of music theory. So this is to demonstrate how you have to have an understanding of theory before you can put emotion into music," said Campbell.

In addition to new performances, however, this year's symposium did not forget the best of Juniata's science researchers. Many of the students who presented have also shown their work at either the American Chemical Society (ACS) or the American Society for Biochemistry and Molecular Biology national meetings, both held in San Diego this spring.

One of these esteemed researchers was senior Derik Frantz, a chemistry POE, who began the symposium Thursday morning with his oral presentation on progress in the synthesis of 1,5-methylene-semibullvalene. Frantz has been working on this research with Dr. I. David Reingold for several years. His work is the continuation of a project that has been in progress for around 20 years. Frantz presented the research at the ACS meeting.



Other students are taking their presentations to the Virginia Military Institute and Washington and Lee University this week to present at the National Conferences on Undergraduate Research (NCUR). Students presenting at NCUR were required to participate in the Juniata College Research Symposium, but many of these students claim they would have participated nonetheless.

"I didn't learn about the Juniata College Research Symposium until I was applying for NCUR, but I loved the idea of it," said junior Steven Knepper. "I think it's great to see a lot of the people you see around campus – like in Baker – and get a look at their academic interests and what unique projects they've been working on." Knepper presented the literary research he completed for an independent study with Dr. Mark Hochberg last fall.

Each year, Juniata's chapter of the Tri-Beta Biological Honor Society sponsors the Juniata College Research Symposium and completes all of the necessary legwork. The event is funded by the William J. von Liebig Foundation, and awards will be presented to the winning students at the Awards Convocation on May 3.

"It's been a long, hard road planning this event. I think the biggest challenge for me was trying to keep everybody happy and still pull off a successful symposium," said Blazer.

When the symposium finally concluded after 5:00 p.m. Friday evening, Blazer laughed and said, "Now I get to go home and work on my thesis!"

Hannah Rauterkus / Juniatian

Senior Matt Holtry participates in the research symposium on Thursday April 14.

FCA born again; spurns national policies

Organization renames self Association of Christian Athletes and breaks official ties

Corinne Barabas

Juniata College strives for ever-growing acceptance and recognition of diversity. Many campus clubs and organizations exemplify this understanding, and JC's former Fellowship of Christian Athletes (FCA) changed its name because of school principles and also for members' own moral issues.

The group is now called the Association of Christian Athletes. To Juniatians, the first letter is all that is different. Indeed, the purpose and idea of Juniata's club remains the same as ever. But the national organization is much different.

The FCA, a conservative Christian organization, does not accept homosexuals as members and looks down on drinking and pre-marital relations. The College is not in total agreement with the FCA, especially on the sexual orientation component.

According to the national Fellowship of Christian Athletes website, www.fca.org, the vision of the organization is "To see the world impacted for Jesus Christ through the influence of athletes and coaches."

Representatives from the central board of the FCA visited campuses around the country to ascertain that everyone followed their policies. They required leaders to sign a statement of beliefs and a code of conduct.

Leaders of FCA chapters are required to sign a contract saying that they would not drink, were not gay or lesbian and would refrain from pre-marital sex while serving in a leadership position.

Senior Jeremy Weber, vice president of the ACA said, "Our advisor and many of the leaders could not in good conscience sign this agreement for different personal reasons."

Weber also stated that a big reason for discontinuing membership was that it "conflicted with College policy and our [Juniata's] idea of diversity and inclusion of everyone."

> **"Many of the leaders could not in good conscience sign this agreement"**
>
> -Jeremy Weber, ACA VP

Senior Nick Hartman, co-president of All Ways of Loving (AWOL), said, "[Homosexuals] are a visible minority. This kind of action helps give us more visibility to who we are. It clears up misconceptions and stereotypes which paint the idea that people who are gay can't be religious or athletes."

For many years, Juniata was not an official member of the FCA organization. About two years ago, advisor Dave Witkovsky paid for a membership and Juniata became affiliated with the Fellowship of Christian Athletes.

Juniata's ACA is no longer associated with the FCA in any way. The FCA is a nationwide organization, whereas the new name established by Juniata, ACA, is used strictly by Juniata.

Weber said, "We didn't really lose any benefits, and the nature of [Juniata's] organization has not changed at all. Since we didn't sign the statement, we felt we shouldn't use the name." They simply replaced the "F" with "A" and stopped paying membership dues.

Hartman said that he was "grateful that the club was willing to recognize other students and their style of life, and that they were Christians too. It is a step in the right direction, gaining their support."

Old endowment, new professor

Religion department expands beyond Christian emphasis

Maria Piazza

The religion department has been searching for another professor to replace Dr. Jose Nieto when he retires this spring. Questions arose for how the new professor's salary would be paid. There was a theory that the new professor – who will teach world religions – would be supported by the money from an endowment that is earmarked for professors of Christian background.

However, the College managed to sidestep that potential conflict.

The J. Omar Good endowment is currently used to support two religion professors, Drs. Donald Braxton and Robert Miller, who have Christian backgrounds, as the endowment specifies. The religion department wants this new position to have a serious background in one of the Asian or African religions, which would create a conflict if the Good endowment is used to support this professor. This, however, is not the case.

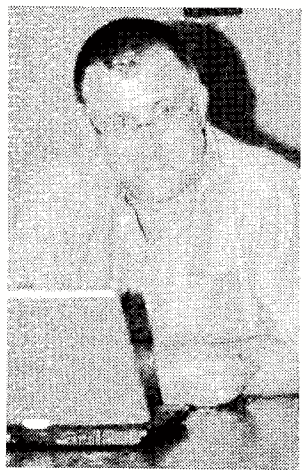
The new religion professor will be hired and supported using money from the College that is outside the J. Omar Good professorship endowment. Juniata is looking forward to hiring a professor who will have a specialization in Buddhism, Shinto, Hinduism, or an African religion because so many people practice these religions worldwide.

Provost James Lakso said, "Juniata College is searching quite hard for a world religions professor. Even though we will not be relying on the J. Omar Good Professorship endowment, we should be able to handle the expenses otherwise."

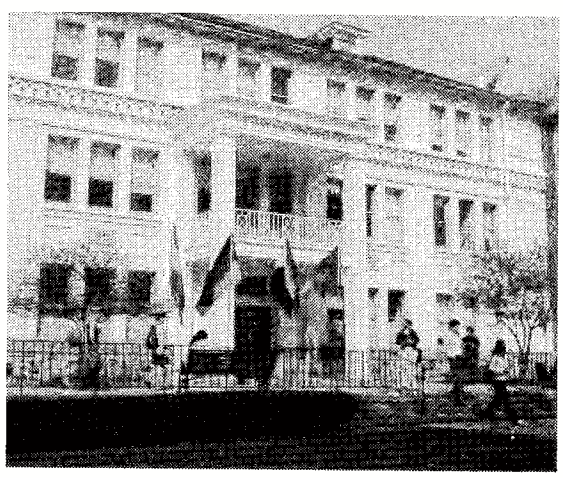
In order for the religion department to be fully diverse as well as fully rounded it is important that there be a professor who can expose students in detail to the variety of religions that exist in the world.

Professor Donald Braxton, department chair, said, "A religion class here at Juniata is not a push for someone to follow that certain religion but rather a place where an intellectual investigation and a serious talk about religion can occur."

The Good endowment originally supported one visiting professor each year. However, the endowment grew large enough to support two full-time faculty.



Religion professor Robert Miller said, "I think the school was wise to accept the endowment. The trustees of the endowment do not affect my teaching style at all yet they afford the College the great opportunity to have a religion department."

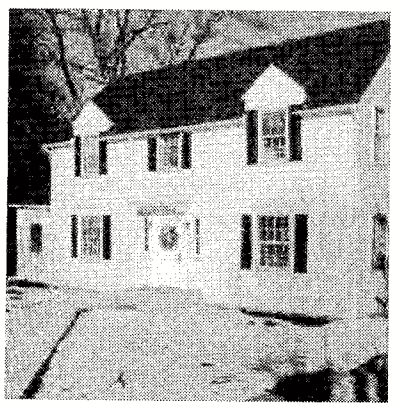


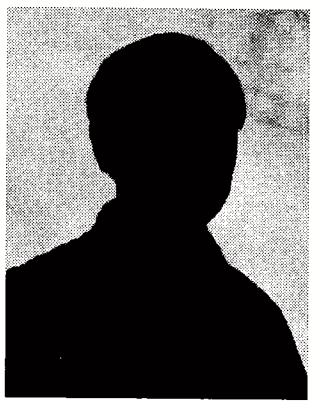
The Religion Department is not interested in the new professor's own religion. Instead they are looking for someone with specific knowledge about the background and the practice of the religion s/he studies. The professor will be hired by fall 2006 by a committee of religion faculty and other faculty based on the candidate's in-depth background in Asian or African religion and ability to relate to students.

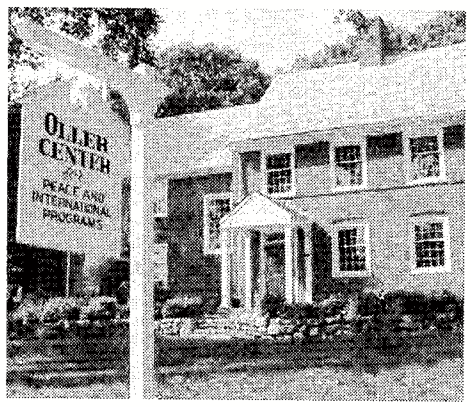
The religion faculty is hopeful that the addition of another professor will broaden the amount of classes offered each semester. Beyond offering more religion classes there will also be more information and ways to study another part of the world open to the students.

Miller said, "Religion is an immensely important aspect of cultural studies because most of the world has a religion of some type, and to know about these people you need to understand their religion because it affects so many aspects of their daily life."

Supported by J. Omar Good Endowment







Dr. Donald Braxton *is chair of the Religion Department and designated as the J. Omar Good Associate Professor of Religion.* ***Good Hall*** *was funded in large part by the J. Omar Good Endowment.* ***Dr. Robert Miller*** *is the Rosenberger Chair of Religious Studies and Christian Thought.*

Not supported by the Good Endowment

The Unity House *is the new location of Campus Ministry as well as the Office of Diversity and Inclusion.* ***A new professor****, yet to be hired, will specialize in world religions. The College's* ***Peace Studies*** *are also not eligible for the endowment funds.*

All Class night: too much?

continued from page 1

enough to convince the judges to declare the sophomore class the winner, even though the seniors scored the most points.

Those at the forum did not deny the seniors' harmless intentions. However, several claimed that their offense was initially not taken seriously by the skit participants.

"It's not your place to say, 'you shouldn't be offended,'" said senior Marissa Gunn.

Philosophy professor Janet Lewis called for a distinction between portrayals that are racist and those that are offensive using race. She believed the seniors' skit to be offensive to some but not racist.

"My sense of All Class Night is that it is [traditionally] insensitive, boorish and rude," said Lewis.

The public forum was sponsored by Student Government, the Office of Diversity and Inclusion, and the Dean of Students' Office. Junior Javaid Zeerak, recently elected as next year's Student Government president, moderated the forum.

Zeerak said that the forum was organized to "clarify, understand and learn from All Class Night."

A thread posted to the online forms about All Class Night generated 128 replies and 5,094 views as of April 15. In less than two weeks, it had become the second most viewed thread after the JAB major concert discussion, which was initiated this past December.

The online forum posts were not the only reaction to the night.

"The next day, my phone was ringing off the hook," said Rosalie Rodriguez, of the Office of Diversity and Inclustion. Her "immediate response was to get everyone together." Offended parties – both those who were at the event and who heard about it secondhand – met to discuss their reactions, then arranged the public forum.

Some believed that the online forums did not provide a true discussion atmosphere, though the online debate continued at least to press time.

Freshman Adam Green pointed out that many students did not know what blackface is or why it would be offensive.

Rodriguez said that the Office of Diversity and Inclusion sponsored the movie "Bamboozled" on campus recently, which is about blackface theater. Only two people showed up for the movie.

The seniors, though, were not the only class chastised. The juniors were asked to skip ahead in their skit when they began an extended graphic portrayal of a College administrator – as having a literal stick up her rear.

The juniors came in last in the competition.

They, too, had a scene mocking Enrollment's exaggerated show of diversity, though theirs was shorter than the seniors and included minority students rather than Caucasians wearing face paint.

The seniors said that no minority students volunteered to be in their skit.

All Class Night judges at the forum also said they were concerned with a portion of the sophomore class skit that suggested one of WKVR's fans from the local prison being raped.

See Commentary on All Class Night *page 6*

Senior Nate Freitag suggested that there be more visible administrative support for reviewing scripts, someone with more authority to tell students what to not include in a final production.

The seniors' plan to wear face paint was in the script submitted to JAB prior to the performance.

Carl Kihm, student government president, agreed, "The scripts are not being handled and processed as they should be."

"The guidelines were the same as last year," said JAB member Jacob Harper. The only difference was that the event was held in Baker instead of Oller due to the construction on the latter building.

According to Michael Lehman, an alumnus and All Class Night judge, in past years scripts were reviewed by multiple staff members before performance, a dress rehearsal was held, and students were not allowed to ad-lib.

"Two of the judging criteria were presentation and acting," said Lehman. He did not rate the seniors well in those categories because performers were visibly intoxicated and consuming alcohol on stage.

Lewis, however, recalled seeing intoxicated students at many past All Class Nights since she arrived at Juniata in the 1970s.

Green was concerned about increased censorship and political correctness. "We can't gain knowledge from not talking about [issues]," he said.

And many of the forum discussion participants agreed that the discussion and education was most important.

"Social justice and understanding is extremely important in order to obtain social equality. [The] discussion was certainly a step in the right direction," said Staci Weber, director of student activities, after the forum.

Grading the professor

Student evaluations used to determine tenure, promotions

Nick Carney

Eve McConnell, like many Juniata students and faculty, spends a great deal of time sorting through an immense pile of e-mails sent to her inbox everyday. This past week, among the daily announcements, solicitations and professors' notes, McConnell and others found a series of messages vying for her attention: the professor evaluation web form.

"I was like, 'Holy crap! Leave me alone,'" said McConnell. "My whole inbox is filled with these requests!"

While many students simply delete the messages, others spend a great deal of time evaluating their professors.

"I do actually fill them out," added McConnell.

Contrary to this, many students believe that their evaluations simply do not matter in the long run—believing that they are relegated to some dusty filing cabinet. This is not the case, according to the administration.

"The student evaluations are one part of the overall evaluation system," said Provost James Lakso. "But they are a very important part."

The Personnel Evaluation Committee (PEC) evaluates a faculty member's eligibility for tenure, promotion, or contract renewal based on four key factors: teaching effectiveness, advising, professional development and service. These are judged in part based on student evaluations.

The teaching effectiveness and advising categories include such criteria as approachability, advocacy, and basic communications skills. Professional development touches on the faculty member's contribution to the scholarly community. Finally, service focuses on the professor's contribution to the Juniata community including participation in campus events and traditions.

The life cycle of a student evaluation begins when the student receives the evaluation request in his or her e-mail inbox. After the student fills out the form, it is placed into the faculty member's file—where the professor is permitted to reference it after submitting final grades, sans any student identification.

The student evaluations are added into a more thorough evaluation file as compiled by the PEC. The PEC file also contains recommendations from other faculty members and information on the professor's contribution to his or her field of study.

All faculty members are required to have at least one course evaluated a year, according to Provost Lakso, though many chose to evaluate all of their courses.

"My experience is that the great majority of students take the process very seriously," continued Lakso. "I also think moving to an online format has enabled students to make more thoughtful comments."

The difficulty with any professor evaluation form is that students tend only to comment on professors whom they particularly enjoy or especially loathe. Specific, detailed feedback is hard to find.

Such problems have arisen in the popular website Ratemyprofessors.com. The site contains over three million ratings from students in over 4,500 universities and colleges in North America.

"His class was like milk," commented one anonymous rater of a non-Juniata professor. "It went bad after two weeks."

There are equally ambiguous ratings on the other end of the spectrum—highlighting the "awesome" or "very helpful" nature of professors.

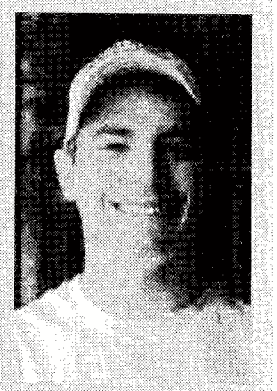
The site receives around 10,000 new ratings each day and rates professors on four criteria: ease of the class taken, clarity of the professor, helpfulness and the rater's interest in the class. These are quantified by the rater on a scale from one to five (five being the highest possible score).

Ratemyprofessor.com is no stranger to Juniata. The site contains evaluations of nearly every professor on campus—totaling 120 rated faculty members in all. Juniata professors average a score of around 3.9, overall. A Juniata student also moderates the site.

Regardless of the format, student evaluations are used to benefit both college professors and the students they teach. Students can use the publicly available ratings of the Internet to help formulate their next semester's schedule, and professors use the PEC evaluations as a way to invigorate their classrooms and ensure their future careers at Juniata.

Roving Reporter

by Hannah Rauterkus



Do you feel student to professor evaluations are effective?

Well, it makes me feel better! If I have a prof. I really love or hate, I feel such a relief when I can put it in writing. I use ratemyprofessors.com to vent a lot of my praise and aggravation when I can't wait till the end-of-the-year reviews.

- Anna Elias, junior

Yes, I am glad to have them but I think it would be more effective having student interviews instead of online evaluations.

- Adam Bergstein, junior

No. Because 1) I don't fill them out half of the time and 2) the teachers I gave bad reviews to are still here.

- Ben Beas, senior

No, I don't think that everyone even fills them out; a lot of people just delete them.

- Scott Millberg, junior

Juniata students, local teachers make connections in Guatemala

Unique study abroad opportunity offered again this summer

Katie Charles

Juniata students and teachers from local school districts will travel to Guatemala this summer as part of an alternative study abroad opportunity. This year's program will also include teachers from local school districts, thanks to a grant given to Juniata's Language in Motion program.

Several students will spend their summer in Xela, Guatemala, as part of an immersion program with the Centro Maya de Idiomas. For part of the day, the students will take Spanish classes at the Centro. They will spend the rest of their time teaching English at the Colegio Miguel Angel Asturias, a local elementary school.

Senior Jake Warner will take part in this program. He will spend four weeks learning Spanish. "I was looking for a program that offered me the opportunity to stay in the country after it was done," he said. None of the other programs had that, so [Professor] Henry [Thurston-Griswold] set me up with this one."

The students will have the opportunity to stay in Xela after their intensive Spanish program and help with several organizations, including Colegio Miguel Angel Asturias and Educacion y Esperanza, an after-school program for poor and malnourished children. With the connections that have already been made there, it was easy for interested students to be placed with the program.

Thurston-Griswold, chair of the World Languages department, first visited Guatemala in 1990 as part of the Habitat for Humanity Global Village.

In addition, a group of language teachers from local school districts will be at the same Guatemalan school for intensive Spanish work through the Juniata College Language in Motion (LIM) program. The teachers will have the opportunity not only to learn the language but also to attend lectures on regional culture.

LIM's main mission is to send international students to local schools to teach about their language and culture. However, LIM received a $146,041 grant from the Arthur Vining Davis Foundations to provide this new opportunity for teachers.

The teachers, in addition to the classroom experience, will have to opportunity to travel to various areas within Guatemala to learn more. The teachers will be living with selected families in Xela as part of their program, so they will be completely immersed in the culture and language.

Language In Motion received a $146,041 grant to provide this opportunity

But this isn't the first time Juniatians have visited the country.

In 2003, Thurston-Griswold led a student service-learning trip to the country over spring break. He led 17 students and staff members to the country to meet with human rights groups around the country and to teach English at Colegio Miguel Angel Asturias, in Xela.

During the summer of 2004, another group went to Xela as a medical delegation. The team spent a week giving health clinics and providing basic health care to the members of the community. Several of the students stayed longer than the week the team was there to help with more medical issues.

Thurston-Griswold was excited about the possibility of coordinating with the Centro Maya for students in the future. He said, "They offer individualized instruction in the language, and it is extremely inexpensive. It is a fabulous environment in which to learn."

Daily Announcements draw blame

continued from page 1

ments before the daily posting of announcements. Pheasant said that this is the only reason an announcement would not be listed.

Students claim that most members of campus, students and faculty in particular, are less aware of events and activities. Students also argue that Juniata's social values and traditions are disappearing due to the ban on mass e-mails, which once allowed direct communication between clubs, students, faculty and administration.

"Campus communication is all but gone," Fasick said. He explained that the "amazing sense of community" he found at Juniata is rare and valuable. To Fasick, this sense of community is in danger of disappearing with the continued use of the announcements. Through his proposal, he hopes to restore direct communication through the reinstatement of mass e-mails and the discontinuation of announcements.

Pheasant cautions that petitioning and eliminating the announcements will only further harm campus communication, and likens students' motives as resisting change.

"People are taking their hostility for the loss of mass e-mail out on the announcements. If you do away with announcements, you won't get mass e-mail back," said Pheasant.

Additionally, Pheasant, a Juniata alumnus, pointed out that while he was a student, mass e-mail was not the primary advertising medium for events, yet members of campus still attended activities.

Pheasant argues that the hostility towards the announcements will not last.

"Upperclassmen are adverse to reading the announcements because they remember mass e-mails, but over the next couple years people will get used to it," Pheasant explained.

Clubs, though, argue the announcements are the cause of decreased attendance at this year's activities.

"We had one event where no one showed up," said junior secretary of Juniata Instructors of the Future Sara Smith.

According the Pheasant, the capability to mass e-mail all administration, faculty and students on campus was eliminated because of heightened traffic on mail servers. Since its elimination, the load on the e-mail server has been reduced 62%, with an 84% decrease of the student server.

Many students have been calling the poopfinger a means of conveying Juniata's heritage, arguing that it represented its own social form of announcements.

Pheasant, however, points out the poopfinger's role in ending mass e-mail.

"Had it not been for the poopfinger, I don't think this would've happened," Pheasant said.

Additionally, many students expressed concern that posting announcements through the ARCH was difficult and ineffective, citing that their announcements often go unannounced.

Pheasant points out that users must click "submit" on the review screen when posting an announcement. Also, they should receive a confirmation e-mail verifying that an announcement was posted. If they do not receive this confirmation, they should contact Pheasant.

"If your announcement did not get listed, send us an e-mail; we'll send an update," Pheasant added.

He concluded that the most productive way to increase student awareness of announcements and events on campus is promoting students to read the announcements.

"We get the feeling people do read [the announcements]. Just encourage them to do that," suggested Pheasant.

We asked campus leaders

"Have you found it more, less, or equally effective to advertise your club's meeting and events after the implementation of the daily e-mail announcements?"

Women's Lacrosse and Phi Alpha

"Make a Difference Day did not have participation and I think its because people didn't know about it."

- Emily Blejwas, co-President of women's lacrosse and vice president of Phi Alpha

Psi Chi Honor Society

"Our announcement was for a research project. It seemed we got a reasonable response in respect to the previous year."

- David Widman, advisor of Psi Chi

KVASIR literary magazine

"It is more difficult for us to make people aware of what we are doing without mass e-mails. Clubs should be able to get a certain number of mass e-mails to use. It's been harder to notice what Kvasir's doing without mass e-mails."

- Matthew Schramm, President of KVASIR

Skulldiggers and Vegetarian Club

"I find that using the announcements to communicate to club members, and the student body in general, is much more difficult than it was under the mass e-mail system. It has been my experience that the majority of students don't read the announcements due to lack of time or, more often, lack of interest."

- Valerie Brand, president of Skulldiggers and of Vegetarian Club

East Apartments: losing appeal?

continued from page 1

anymore. It is terrible. Everyone is sick of getting into trouble when certain RAs misuse their power. East used to be fun."

But East has not lost its appeal to all students. Junior Ashley Heckman said that East has a closeness of community that is hard to come by in other dorms. Most of her friends live in the towers, and she has enjoyed living in East this year.

All the apartments have been filled at this point, and only six beds remain empty. These beds will most likely be filled by transfer students.

Launtz is assured that permanent interest is not lost in East. He said that room draw is never the same from year to year.

The target number for off-campus residents changes from year to year. More people were allowed to move off-campus in part to accommodate the growing student population thus freeing up more campus rooms for incoming students.

By allowing more students off-campus is the school inadvertently sacrificing Juniata's ever so prided close-knit community? Launtz said, "Campus always has and always will be the hub for students, even those who live off campus. It is the center of activity."

But Launtz also wishes that more seniors would stay on campus. He said, "They add a certain flavor and leadership to campus life that could be missing when they live elsewhere."

Reasons students were reluctant to live in East for the upcoming year included claims of lack of parties, power-hungry resident assistants and unclean facilities.

An anonymous East dweller suggested that allowing kegs back in East would spice things up again. The student also explained that the towers are dirty. The student cannot understand why Facilities Services cleans on Friday instead of earlier in the week. "They should clean after the weekend, not before it. It just doesn't make sense to me."

Launtz said there is always a backup plan in the event that East is not filled. Empty apartments would be made into "halls," and the individual rooms would go as doubles. For example, "Hall 303" would include four groups of doubles placed together.

Launtz added that if this ever came to pass freshmen would not be placed in East.

Correction

April 7 - "Drug use at Juniata exaggerated," front page. The Juniatian regrets a potential bias in conducting a survey on drug use. Survey respondents did not have the option to choose "none" for frequency of drug use, though many people left the question blank or wrote in "never." This may have skewed the survey results. The Juniatian looks forward to conducting more surveys in the future and will take care to write surveys that produce more reliable results.

All Class Night definition needed

Nate Drenner

Somewhere between censorship and slander is a line between removing legitimate material and permitting deeply offensive substance.

All Class Night is a tradition built to push that line; there is little question about that. But in light of this year's disagreements, we need to find that line for today's audience.

For next year, a real agreement is needed as to what All Class Night is and is not. I do not believe that detailed rules or censorship markers are appropriate for this type of event, which has a history of mocking campus rules and policies.

Rather, we need a general understanding among the campus community about what to expect, especially because the tradition has wavered. This year's was the first full All Class Night since 2002.

It could be as simple as a value statement that is drawn from and circulated to the community.

Even the panelists and participants at the open forum on April 14 were uncertain what ACN is.

According to Michael Lehman – 2005 judge, Juniata alumnus, and JCEL executive director – during his years as a student, All Class Night scripts were strictly enforced, and any ad-libbing during the Night would mean the end of the performance. The same went for drinking during ACN, he said.

Yet Janet Lewis, professor of philosophy, said that she observed plenty of intoxication at All Class Nights since the '70s.

What was deemed "acceptable" in the '70s might not hold up in the '80s or '90s, or maybe those latter decades were too polite for today's audience. Either way, it's time to decide what the '00s are about.

Admittedly, I did not attend All Class Night. But after the fracas broke out on the online forums, I obtained a copy of the video and watched it in the relative comfort of my dorm room. Yes, various skits pushed and maybe crossed the line at some points, but I failed to see what such a *strong* reaction was about.

So I went to the campus forum expecting it to be wholly unnecessary and repetitive.

However, it became very apparent that some people – on both sides of the issue – needed the face-to-face discussion. For them, the forum was anything but unnecessary.

Perhaps one element that contributed to the controversy was the length of the scene. As Lehman pointed out during the forum, the infamous Giant Smoking Head would have been more funny and less offensive had it been a quick gag rather than an extended joke.

Likewise, the juniors' jab at marketing photos was brief. And the audience initially roared at the seniors' "Instant Diversity" gag, but as it continued, interest declined.

Brevity, after all, is the soul of wit.

But joke length is only one theory, one that doesn't completely address the alleged blackface.

If faculty and staff are not sure of what All Class Night is, how can the student participants and organizers and a new Director of Student Activities, know? A real, publicized understanding is a must, and those in charge of the event need to have the authority to interpret that understanding.

If not, ACN will become overly legislated after this year's debacle, leading to waning interest for an already threatened tradition.

All because we can't agree on the line.

Apathy is lethal

Holy SUV, Batman!

Mary Gardiner

2.19... 2.23... 2.29... 2.19 again.

Sweetie, these ain't swim team records for the 200 breaststroke, though our swim team is quite impressive.

If you haven't noticed, gas prices are soaring, and to me that means more money to Sheetz and less money to Strickler's, Domino's, and Good Will. My awesome 1994 electric blue Pontiac Sunbird is indeed awesome, but it's becoming a cash vacuum.

And if you haven't noticed, almost anything worth doing in Huntingdon requires a car to get there—and you have to drive to Altoona or State College for the really good stuff.

$2.23 a gallon won't cut it.

So I decided that for those of you who feel my pain, who have no idea why gas prices are so frikkin' high, I'd share a little history behind the dollar value of the gallon.

In 1972, before the dark days of the OPEC embargo, barrel prices were about $12 per barrel. In college student terms, that's 36 cents a gallon. Do you know what I would *kill* to be able to spend 36 cents a gallon on gas? Fill up on less than five dollars!? My car expenses could practically be limited to those annoying yellow tickets we get for "street cleaning."

What happened to that heavenly price? Israel happened to it. In 1973, US support of Israel in the Yom Kippur war infuriated oil producing countries in the Middle East. On the eleventh day of that war, OAPEC (Organization of Arab Oil Producers) put an oil embargo on the US. Prices shot up. Lines at the pump stretched.

Only seven years after the embargo, even after production and prices stabilized, crude oil was at *$36 per barrel.*

The OPEC embargo was the first and most notable muscle exercise of developing countries in the Middle East. Realize, folks, that a country like Saudi Arabia, which was so poor before finding oil, with such a terrible human rights record, is doing quite well now because of that embargo. And while our country isn't quite hurting, our pockets are.

Consider this: for you lucky kids on campus who have cars, how important is gas in your life? Is it like milk (which I, for one, haven't had in months), or like T-shirts, which a nation can just go without buying for a few weeks? Nope. Gas is precious, precious juice that we need to get to work, to school, to the grocery store, to... well, everywhere. *Especially* in a town like Huntingdon.

Now, some scary news: on April 4, crude oil prices reached a high: $58 per barrel. By last week, prices slipped to $52 per barrel, and thankfully, that $2.23 per gallon dropped back down a little. Nevertheless, I don't have $20 to be spending on gas every week. Do you?

And for those of you who think that our presence in Iraq is going to solve this problem by any means, you've got it all wrong. As a matter of fact, terrorism on oil pipelines, seemingly to spite the West, have decreased oil production.

But the most daunting fact is that there have not been any new oil fields found since 1976. Before most of us were *born*. There will be a point at which oil production is going to start decreasing very quickly, very soon. And when our resources are exhausted, we'll all reminisce about paying $2.23 a gallon for gas.

Our only option in the coming years will be to opt for the Toyota Prius instead of the SUV. For those like me, however, who appreciate the 1994 Sunbird, we'll have to accept our fate, our history, and dole out the cash.

Does ACN need more restrictions?

What do you think of the Daily Ann.?

Presidential Perspective

"As a tradition, All Class Night has been a night of irreverent parody. However, this year some members of the campus community found the skits to border on serious insult. Should more specific guidelines be put in place to govern student performances, or would such restrictions diminish the tradition?"

Specific guidelines are issued but not always followed. While I appreciate some degree of artistic license, students should be more sensitive to highly offensive and/or hurtful content and ad-libs.

"Many club officers and organization leaders have observed a decline in attendance at their events. They attribute this to the fact that low numbers of students seem to read the Daily Announcements. Does the College have any plans to amend the mass e-mail policy or change the Daily Announcements in order to reverse this trend?"

We do not have any specific plans to amend the mass e-mail policy or change the Daily Announcements, but all College policies (including the mass e-mail policy) are reviewed periodically. The Daily Announcements format has been changed several times already and will likely continue to evolve. I believe as time goes on the system will be much more effective than everyone e-mailing everyone about every event. I read it each day and like the format.

President Kepple wants to hear from you! He uses his column to answer any college-related question from the campus community. Simply e-mail questions to juniatian@juniata.edu, and the editors will forward them anonymously to Dr. Kepple.

Students, faculty, staff, alumni: send your letters to juniatian@juniata.edu. We print all letters to the editor that are of interest to the campus community – in response to one of our articles or on a completely separate topic – so start typing! If you're lucky, we might even print a response. Please try to limit letters to about 300 words, and note that longer submissions may be edited due to available space. Opinions expressed on the commentary pages are not necessarily those of the Juniatian.

Letters to the Editor

Online forums: legitimate platform?

Are the forums a legitimate place to discuss issues?

I would consider myself an ordinary Juniata student. I check my email constantly for announcements, notes from professors, clubs, friends, and family. I go onto the U: or P: drive at least once a day. I check the daily comics, webcomics, blogs, and news. I check the Juniata forums at least two times a day. All while listening to iTunes.

I got introduced to the Juniata forums by way of the Juniatian. There was an article that wrote something like, "Now, when people tell you to 'take it to the forums,' more people will listen to you." With the loss of mass e-mail, the forums gained popularity. Professors, faculty, and students alike collaborate in these online discussions without worrying about mailboxes getting filled up.

There have been a variety of issues discussed, like the Federal Marriage Amendment, blackfacing in the senior All Class Night skit, pot shop demolition, girls in boys' bathrooms, over-representation of liberal speakers and national politics. There have been inane discussions, such as Wetzel and Quinn talk aimlessly, vibrating beds and complaining about Pat McGee.

The forums are incredibly user-friendly. It's easy to find threads, post a reply and look up someone. The forums are also convenient; a student can catch up and contribute to the forums when their classes, schoolwork, meetings and other stuff is done for the day without having to alter their schedule.

Contrast the online forums with open student forums usually held at the end of a semester. The open student forums require scheduling, are usually two hours long, involve several people talking at the audience rather than to it, are sometimes mandatory and there is always someone right behind you making stupid comments. Online forums are more convenient, do not have time limits, allow you time to think about what someone has said and construct a well thought out response. And those stupid comments are on other threads devoted to such.

Of course, seeing someone speak in person has its advantages too. Online, it is impossible to get visual body language cues and voice inflections without the writer giving hints. Online, people have less inhibition and are far more likely to make their own comments on the discussion rather than staying silent. Many conservatives have spoken up about liberal issues and vice versa in the forums while I have seen very little participation like that in open forums.

I argue that the online forums are a legitimate area to have discussions that are important to the entire campus. This is not to say that open forums are not valid, but that online forums should be given a rightful place in legitimacy next to them.

Karen Leonard
Class of 2007

Let's talk about race

I used to strive to be race blind, to not even notice someone's skin color when I talked to them. While this allowed me to live out my values of "judging people not by the color of their skin but by the content of their character," it blocked my ability to see the real role that race played in their lives.

Growing up a minority is a distinct experience. An African American male, for example, is twice as likely as a white person to be living in poverty and has a one in three chance of going to prison sometime in his lifetime. I will never know what it is like to walk into a room being keenly aware that I'm the only black man in the classroom.

Understanding where someone is coming from is crucial to connecting with them. This means noting social categories, such as race, and knowing what role that might have played in the person's life. If you meet someone from Russia it would aid your ability to connect with them to know about the rampant alcoholism and depression that is plaguing the post-Soviet world. If a friend of yours is poor, it would do nothing but help the relationship if you are familiar with the additional hardships that come with poverty. Race, nationality and socioeconomic status are real phenomenons that shape one's experience. Recognize these realities, and instead of using them as a point of division, maybe they can be a point of understanding.

ASSOCIATED COLLEGIATE PRESS

BCA Inaccuracies

As someone familiar with Juniata College through my work at the Baker Institute for Peace & Conflict Studies and BCA (Brethren Colleges Abroad), I found that your article in the April 7th edition about BCA, "Money Trouble," contained some inaccuracies that I would like to clarify. BCA is not in financial trouble, as the article suggests – we have cash reserves in the seven figures. As your article correctly indicated, there have been deficits in the past couple of years, but the single most important factor in this has been the decline of the dollar's value versus that of the Euro. Nearly 300 of the students BCA sends abroad each year study in Europe. During the last two plus years the value of the dollar has declined by over one-third against that of the Euro – from a ratio of $1.00 - €0.92, it has gone as high as $1.00 - €1.37 making our costs go up significantly while income remained stable.

Although BCA has not been informed officially that Juniata College will not be sending students to Aberystwyth, Wales in the future, your readers should know that BCA has great confidence in the program there. BCA established the program at the University of Wales in Aberystwyth because it has one of the most renowned faculties in international politics anywhere in the world. Juniata senior Eli Finberg described his experience there during the previous academic year to me as "absolutely fantastic!"

Regarding onsite directors, BCA has programs that have directors, and some that do not. As many students are aware Juniata's own study abroad programs do not have onsite directors. If students think they want the support of an onsite program director while abroad, we would recommend that they choose a site where there is one – Barcelona in Spain, Marburg in Germany, Quito in Ecuador, Cheltenham in England, and Nancy and Strasbourg in France, to name just a few of the sites where BCA has directors.

Studying in another country is meant to be challenging and BCA looks forward to continuing to work with Juniata's excellent international education staff in meeting the study abroad needs of the college's students.

James M. Skelly
BCA Coordinator for Programs and Planning

RANDOM ELEVEN ANNEX I

Students we should expel, part II: The person who chucked rolls of toilet paper out a window onto South Lawn. Also, the guy who tied the end of a roll of trash bags to the third floor handrail and threw the roll down the stairs. Please report to the Dean's office for a swift kick.

Blore explores JC's creative side

Theatre major authors two plays this semester

Holly Brown

Juniata often boasts of its "uncommon outcomes," and senior Paul Blore shows just how creativity and leadership can flourish on campus. Having already written one play this semester, the sexual abuse drama "Shards of Skin and Porcelain," Blore, is in the process of writing his second work, an as-yet-untitled piece to be performed at the end of April.

A theatre and literature major who hopes to forge a career in the arts, Blore is also trying his hand at directing. "I'm learning what my process is for directing from scratch," said Blore. "[College] is where you can gain some skills and practice, and when you graduate you can have some idea what you're doing."

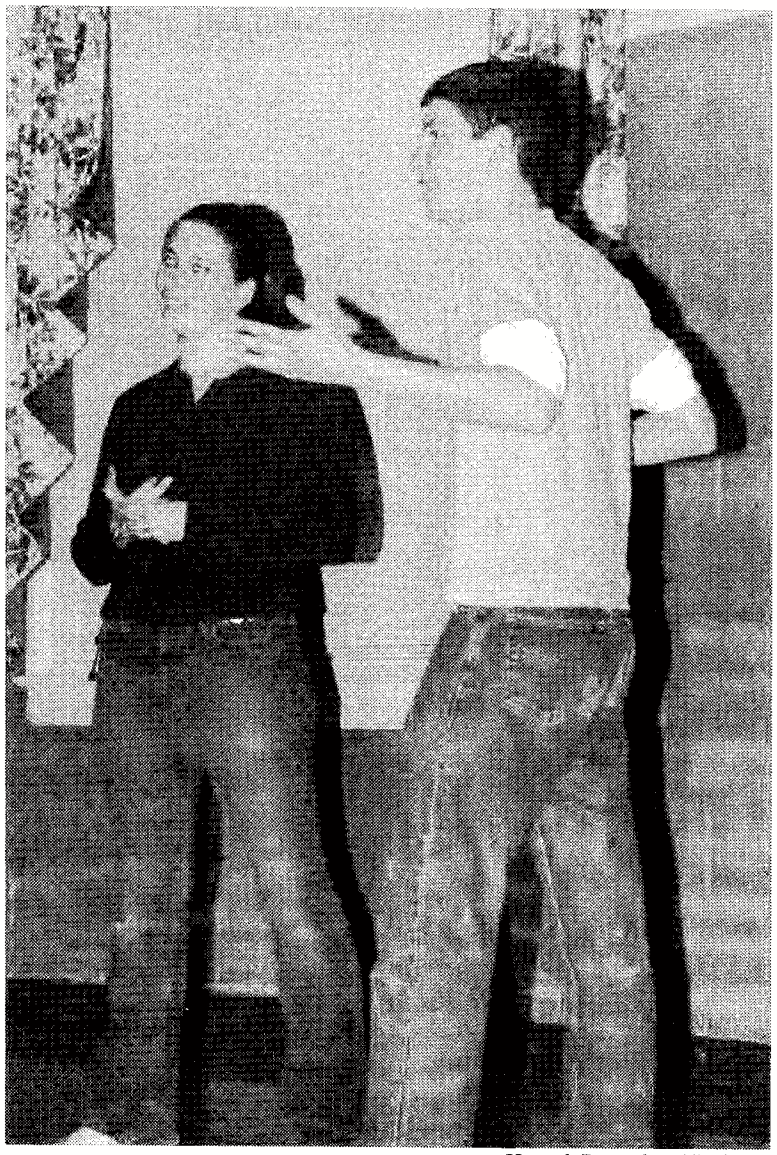
Excited by the success of his last production, "Shards…", Blore's second endeavor will nonetheless be drastically different. He has structured his newest work, an examination of the Self, on a combination of literature, poetry and movement work.

Blore first started thinking about becoming more involved in theatre when he took the 20th Century Theater class, taught by Professor Andy Belser. The class explored theoretical aspects of theatre, and Belser taught it on a graduate school level, encouraging students to think more abstractly than perhaps they were accustomed.

It was thinking beyond the art of acting, as well as encouragement from Belser, that led Blore to think about writing for theater. Because Juniata did not previously offer a POE in theatre at the time, Blore created his own individualized POE that combined his interests.

When he returned from a year in Lille, France, Beth Williams encouraged Blore to create a piece to promote campus awareness about sexual abuse. He felt up to the challenge. The result was "Shards of Skin and Porcelain."

For "Shards," Blore spent time talking with fellow students and advisors to discover what issues of rape and assault concerned them. He also read accounts of rape victims and compiled three characters dealing with their own experiences with assault. Senior Brandi Martin directed the play, with assistance from senior Becca Shoaf and sophomore Moyra Mauger.



"It's not an after-school special," Blore said of his first piece. "We wanted to go deep and straight to the point about things."

The experience of "Shards" garnered confidence for Blore that encouraged him to keep writing. For his second production, Blore's main influences were Milan Kundera's *The Unbearable Lightness of Being* and a collection of poems. The play will deal with the concept of Self, and how different aspects of the self are sometimes irreconcilable. "Shards" director Martin, Mauger, and Blore will all act in the piece. Junior Haley Goodwin is the stage manager, with freshman Adam Vachon acting as her assistant.

According to Blore, the most satisfying part of his creative work was all the people who said "thank you" instead of "congratulations."

In the future, Blore hopes to continue writing for theater, perhaps also working as an actor and theater manager to support his pursuits. He credits Juniata's supportive, close-knit environment with helping him to turn his ideas into actual productions.

Blore's second piece will open to the Juniata community at 7:30 p.m. on April 28 in the Ellis Hall Ballroom.

Senior Paul Blore goes over a few techniques with Thea Lothe before rehearsals for his last play.

Charitable entertainment:

Good times for a good cause

a feature by Jasmine Frishkorn

On Friday, April 22, students in the Group Communication class and members of Juniata's Circle K will bring a night of entertainment to campus to raise money and awareness for two remarkable charities. The Ronald McDonald House and the Children's Miracle Network will benefit from students and community members who attend the events.

Group Communitcation Talent Show

The night will begin at 7:30 p.m. in the Kennedy Main Gym, where the Group Communication team will host a talent show. The talent show will have twelve acts in total, ranging from singing and dancing to skits and readings.

The acts include performances by Spencer McMinn, Shannah Boring, Brittany Barbara, Brandon Long, Brenton Mitchell and many more. There is also one community act scheduled to perform.

"We wanted to get the community involved and are happy that they were willing to participate," said Stephanie Kines, member of the Group Communication team.

Seniors Rebecca Shoaf and Pat Cain will MC the event. Judges include Larry Bock, Dr. Barry Bruce and Meghan Launtz.

The money collected at the talent show from participants and donation cans alike will benefit the Ronald McDonald House, located in Danville, Pennsylvania.

The Ronald McDonald House is a global charity organization that provides a supportive place to grow and heal for children with illnesses, as well as their families. This "home away from home" facility has helped more than ten million families since its founding in 1974.

The organization has also influenced the Juniata community. Recently, Erin Dodson, freshman member of the Juniata women's volleyball team, was diagnosed with cancer and stayed at the Ronald McDonald House.

"They were very supportive to Erin and her family," said Alynne Pompeani, Dodson's teammate and Group Communication project member.

The talent show is open to all students and the Huntingdon community. Tickets are $3, and donations are welcome at the door. Soda can tabs are also being collected in dormitories until April 22. Students are encouraged to bring these tabs to help raise more money for the Ronald McDonald House.

"It's going to be a lot of fun. It's for a good cause and we hope everyone will attend," said Kines.

Circle K Dance Marathon

Directly after the talent show, Circle K will host a dance marathon in the Kennedy Intramural Gym. Dancing begins at 10:00 p.m. and ends the following morning at 10:00 a.m.

The dance marathon is open to students and the public, and Circle K has extended invitations to area high schools and the community. Registration is $15 and the proceeds will benefit the Children's Miracle Network, specifically the Janet Weis Children's Hospital in Danville, Pennsylvania.

"There could be anywhere from 50 to 300 people attending," said sophomore Elena Amato, service chair of Circle K.

There will be a different musical theme every hour. Themes include salsa, country, swing, hip-hop, and possibly Victorian. Food and restroom breaks will be scheduled during the night. There is no dance contest, but door prizes and giveaways will occur throughout the evening.

"You don't need to know how to dance, just come have a good time," said Amato.

Children who have benefited from the Children's Miracle Network were also invited to the dance marathon.

The Children's Miracle Network is a non-profit organization that raises funds for children's hospitals across the US and Canada. They are committed to saving and improving the lives of children by providing the finest medical care, research and education to help children overcome illness and injury.

Students, faculty and the community are encouraged to attend these two events and bring friends. For more information about the charities, please visit the Ronald McDonald House at www.rmhc.com or the Children's Miracle Network at www.cmn.org.

Gamer culture on campus

Students react to claims that video games are problematic

Brit Tew

If one were to walk down the halls of a Juniata dormitory, he would most likely hear different music, but a familiar sound. It might be a covenant grunt being blasted with a sniper rifle, or the recordings of John Madden reporting a custom-team touchdown. The angry yelps of students might accompany these video game noises, as their roommates school them in their favorite mind-numbing activities.

Video games, be it X Box, Play Station 2, PC or Game Cube have assumed an important role in student life at Juniata. Whether it is out of boredom or utilized as a therapeutic stress reliever, video games are a core form of entertainment and procrastination on campus.

There is concern that students are spending too much time blasting bad guys and not enough time crunching numbers or reading books. However, the detrimental effect of video games depends highly upon the kind of person that is playing them.

Freshman Matthew Booth dismissed the idea that video games affect academic performance. "I think it's more of a personal control thing. There are a lot of things that could be distractions. Video games are just one thing to get distracted by," he said.

Booth also said that, barring special conditions, video games do not detract from his studies, "unless it's Unreal Tournament."

Junior Scott Stephan, an avid gamer, also believes that balancing homework and games is a matter of self-discipline. "I play a lot of video games. It's just a problem with people controlling their leisure time," said Stephan.

Students play video games for all sorts of reasons. Lack of things to do in and around Huntingdon may contribute to the thriving game culture on campus. Walking down the hall on a warm day one might see some students still hunkering down in the dark, with eyes glued to the television or computer when there are endless activities waiting outside.

"It is easier to turn on the TV and play a game then to find something to do," said freshman Michael Motley.

Other students look to video games as a form of stress relief or a way to spice up what they view as redundant, regular everyday activities. Sometimes practice doesn't go well at all, which makes the ability to do three flips and a slam dunk while surrounded in an aura of fire seem that much more appealing. Some just want to slip off into a foreign world where they can fly around on a spaceship and shoot down enemy craft with plasma lasers.

"It's a change in how you conduct yourself and your business. It can be relaxing," said Stephan.

But how do video games affect those outside the gamer culture, who share the Juniata network with them? They don't. Video games at Juniata don't cause problems with the network due to the priority set by the networking staff. Like downloading music and movies, gaming is set at a low priority on the network.

Gamers might find their digital experiences choppy and slow sometimes, but that is only the network protecting other uses of the Internet, such as e-mailing and web surfing, from being too bogged down by online gaming and downloading.

It's a small price to pay. Some people, like Stephan, feel that video games are a good way to meet people and forge friendships that extend beyond 3D graphics. Stephan said, "Outside of the game, I am better friends with them because of [the game]."

Juniata is full of video gamers of all different levels. From the once-a-week players to the everyday video game legends, students always seem to find time to indulge in a little digital fun. Those interviewed all conceded: as with any other form of diversion on campus, when it comes to balancing academics and gamer life, it's all about the personal responsibility.

Joe Wills / Alfarata

Senior Adam Loser and sophomore Regina Diehl practice procrastination as they play Nintendo in South.

Eagles abroad

Home: not quite the same anymore

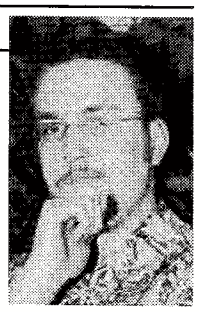
Jay Trovato

Through the experience of culture shock, you will slowly come to feel at home in your host country's culture. When you step on the airplane to go home, though, Act II of culture shock begins: it's called "reverse culture shock." It's the process of readjusting to living in your home culture.

Many study abroad returnees say that reverse culture shock is more disorienting than the culture shock they experienced abroad – they're "home," but everything looks different than it did before. They've just extracted themselves from a completely distinct way of interacting with time, space and everything in between, and the home cultural context they took for granted before suddenly seems unfamiliar.

In my case, one challenge I'm going to face when I return to Juniata is having to re-enter its thriving do-eighteen-things-at-once mindset. Here in Xalapa, most folks aren't in such a hurry, and I've become used to a slower pace of life. My friends and professors who haven't lived here, however, will still expect me to rush around like the average over-committed Juniatian. So learning to avoid Juniata's rush-around culture while still getting everything done will be part of my battle with reverse culture shock.

The people you come home to may also inadvertently trigger reverse culture shock. After filling you in on what happened while you were abroad, they're guaranteed to ask you, "how was (country name)?" Even though you'll have a thousand stories to tell, you'll probably be at a loss for words. You weren't just on some vacation, after all; you had an experience that changed you, one that would be difficult to describe at all–much less in most people's short conversational attention span–and some old friends may not be ready for the new you.



I've become used to a slower pace of life

That's exactly what happened

The Bookmarkables

Nathan Thompson

The Real World. No, not the MTV show. The actual place that I'll have to go to in less than a month. It's a scary place to think about, which is why I avoid thinking about it at all costs. Unfortunately, this leads to parental intervention: "What do you mean your applications aren't done yet?!"

I wonder if Van Wilder had a mom who constantly told him to go get a job.

For those of us who haven't chosen to hide at a grad school for a few more years, this Real World seems to be centered on a certain word much different than the three and four letter words that were the focus of college life (beer and…). The word is job.

Do not underestimate the importance of this word. "Job" even has its own book in the Bible. Yes, I know it's not the same word, but it could be a sign. Maybe through divine intervention Job was given his name and became important not only to remind us of all those other important reasons, but also to remind us to get a job. After all, don't we often talk about our "calling?"

Finding a job is even scarier than the prospect of having one. If there are any budding film producers out there, remember this. Think about the instant college cult classic: *Attack of the Employers: Campus Invasion*. You'd be rich—after you pay my royalties.

However, finding a job doesn't have to be this scary. This is where www.craigslist.org comes in. While I could prattle on about its classifieds, its housing posts or its forums, the value of the site is the jobs. Besides, the Juniata Forums are exciting enough. Craigslist has become the most efficient job web site in some areas of the country.

So what is this web site? With 2 billion page views per month, Craigslist serves as a collection of electronic classified papers from 100 different cities and their surrounding areas.

Its true beauty is in the layout of the web site. After all the flashy, fancy, meaningless sites you are bound to visit on the Internet, this page is quite the relief. There are

Movies: "Sahara"

Was a shirtless Matthew McConaughey really worth it?

Holly Brown

There's a really great line in the 1993 film "So I Married an Axe Murderer," where Anthony LaPaglia is complaining to his police captain about his job. He says, "In all my times as a cop I've never commandeered a vehicle. I've never chased a guy across a crowded street. I've never hung on to that part of the helicopter – you know that part?"

Breck Eisner – director of "Sahara" – does indeed know that part, and every other action-adventure fantasy. If "Sin City" was a comic boy's dream, "Sahara" is the Boy Scout dream – the same little boy who idolizes Indiana Jones.

"Sahara" is an adventure flick based on a series of books by Clive Cussler. Matthew McConaughey stars as Dirk Pitt (haha), historian and adventurer who recovers sunken artifacts with his lifelong pal, played by Steve Zahn. McConaughey's Holy Grail is an American treasure ship that escaped the country during the Civil War and supposedly made it all the way to Africa before disappearing. The boys join Penelope Cruz's serious-minded doctor to uncover the ship and with it the source of a mysterious disease spreading throughout Africa.

The movie is just what it sounds like: an "Indiana Jones" knockoff. There are boat chases, deep sea diving, a million gunfights and even an interesting scene where the heroes jump on to a moving train from the backs of their camels. There's also Lambert Wilson as the bad guy (he's the evil French guy from the Matrix sequels) and a solar power plant in the middle of the desert that is used to eradicate nuclear waste.

I know, what?

"Sahara" is definitely a whirlwind adventure, but a mediocre one at best. The dialogue is of the very basest quality. While I personally don't like McConaughey, I think he is capable of being dramatic and charming when the material is right. Here, it's not. Even funnyman Zahn had trouble making the material interesting.

Another problem is how to categorize the movie. Eisner is a first time director, and he had obvious problems deciding on the film's tone. Is it a mindless action-adventure flick? No. It gets too serious at parts, with the threat of nuclear waste and cold military executions. Is it a buddy film? Not really. McConaughey and Zahn never really get a chance to develop their characters or the relationship they share. "Sahara" wanders in search of genre for the entire tedious two hours.

I didn't hate the film: it's far to silly to excite any great emotions either way. There was a decent plot, the actors weren't *terrible*, and the exotic scenery was beautiful on screen. But in retrospect, I just have to wonder why a film like this even had to be made. It doesn't break any new ground or have a clever catch. It's easily bested by even the most standard summer blockbusters. "Sahara," to me, was just a drone: springtime filler.

Of course, Matthew McConaughey does take off his shirt a lot. That has to count for something, right?

Unwritten Law

Long-time punksters change gears

Jonathan Moody

You might not have ever heard of them, but veteran hipsters Unwritten Law have dished out servings of healthy punk since the band formed in the early 1990s. Much like Incubus and Blink 182, Unwritten Law has seen lasting success by continually tweaking and essentially improving their sound with every album; a must for the long term success of any band.

With its latest album, "Here's to the Mourning," Unwritten Law follows this ideology and attempts to create a more cohesive outing—with mixed results. Despite a few dynamic and original tracks, this album feels awkward and somewhat unexciting.

If you *have* heard of Unwritten Law, it's probably because of their extremely popular single "Seein' Red," from their 2002 album, "Elva." The album helped them gain the public's attention and national notoriety. Playing on TRL screens nationwide, "Elva" leaped to the top of the charts.

When beginning its next album Law faced a common yet potentially destructive obstacle – creating an equally, if not more impressive album. When bands do not overcome this challenge they run the risk of spiraling down into a hole of anonymity and reclusion.

With that said, "Here's to the Mourning" for the most part disappoints. Most tracks feel contrived, lacking in energy and freshness. Instead of utilizing its signature "power-pop" sound, the band experiments with heavier guitars and more contrasting transitions between verses and choruses.

The result is clumsy at best, with Third Eye Blind-type flows in the verses mixed with more straightforward and boring choruses layered against riffage associated more with louder alternative bands. It seems that Unwritten Law is having identity problems, unable to decide between funkier pop–punk and generic alternative rock.

One example is "The Celebration Song," which starts off strong with a standard-fare intro, then follows with lead singer Scott Russo's voice dancing with the cheerful and bouncy bass line. All of this energy is lost when the chorus turns into a raspier grunge-fest. Sadly, many of the songs fall victim to this same disposition.

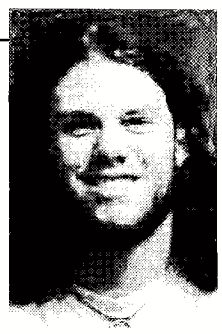
You might find yourself daydreaming as the CD plays through, with the exceptions of a few memorable tracks. Current single, "Save Me" is one of the highlights, with its appealing anthems and sure-fire self-loathing lyrics. It has all the ingredients for a hit single and is currently climbing the MTV Rock Countdown.

"She Says" is another quality track that begins with an acoustic guitar, then gently cradles you into a quicker, electric guitar driven chorus where Russo exclaims, "She says, 'I don't love you like I loved you before.'"

The last song on the album, "Walrus" is another exceptional song with great melodies that create a happy, arms-around-your-friends campfire sing-along feeling.

Unlike its sound, Unwritten Law's lyrics have improved in "Here's to the Mourning," with some profile-worthy lines for the broken-hearted such as, "Tell me when did I die, cause I'm not alive/Flip through the script and tell me what it says/Skip through the story tell me how it ends." The lyrics are clever and humorous at times and delve into many topics, illustrating Russo's fine writing ability.

The final verdict? For longtime fans, give "Here's to the Mourning" a try, but be warned: you will probably be disappointed with the edgier sound. For all others that are contemplating a purchase, test the waters before diving in. Unwritten Law's experimentation with a different, but not necessarily superior, sound may prove to be too hard to swallow for most casual listeners.



Standout Tracks: "Walrus," "She Says," "Save Me"

Lyrics Excerpt: "I went to heaven, but couldn't get in, for what I have done/I said please take me, they said you're crazy/You were too much fun."

The High Note

Monkeys dance to Hydra's creations

Jacob S. Warner

A new sound has been born. Barely a few months old, he stumbles to his stocky, sonic feet and, what's this…begins dancing, like he got into some of Kesey's Kool-Aid, writhing, bobbing his head, waving arms and chanting wildly, pounding, tapping, jumping, round and round the centripetal camp fire in a dance that can only be inspired by pure mechanical radiant energy. Sound. But not just any sound. This is not the voice of Aunt Edna on Easter. Or the Chihuahua in the Prada bag next to you on the bus. This is sound like the world has never heard before. Who are these revolutionaries, willing to counter the effects of Pandora by opening their own box of sonic sensibilities?

Hydra. A true experimentation in exploration. A blend of tribal protrusion sonic profusion and world infusion. Hydra is a pairing of improvisational geniuses who enjoy venturing further. Particle, the masters of instrumental electro-funk jive-fest jam sessions have come together with legendary polyphonic purveyor Mickey Hart, drummer of the Grateful Dead and beyond. Together, they are forging sounds delectably foreign to the ear. Which sounds trite, I concur. Every music writer has probably unveiled the concept before. But I'm going to assume my position on the tree's appendage; Hydra's sound is like a purple carrot. Something completely unconventional.

Having recently formed, Hydra has a small but lively collection of original material. They are currently orbiting the country in the middle of a fourteen-show tour, exploring and expanding the musical territory of these few but fertile creations. Songs like "Creature of Comfort" and "Heart of the Hydra" are sure to send audiences soaring. In addition, the band plans to delve into the depths of their own repertoires, along with entertaining the possibility of creatively reworking a number of Grateful Dead compositions.

So what *do* they sound like? I don't know. I don't know what this sound is.

But picture this: You have been raised by a band of agile monkeys from the age of 3, onward. Swinging through trees, dancing erratically, playing relentlessly…this is what you know. And then you are suddenly discovered by a roaming band of hippies who have wandered off from a music festival weeks ago. They're carrying all sorts of weird things, from which emit even crazier sounds. All you've known is monkeys; you…you are practically a monkey. Who are these beings, where are their tails, and what are these strange sounds, you say to yourself in monkey-speak, pausing to tap your paw. Your monkey shoulders start bouncing…these strange, yet incredible sounds…you let out a high-pitched squeal of monkey delight…you start dancing with the foreigners. They, being hippies, love your spastic monkey dancing…the jungle erupts into ecological ecstasy.

Alright. That's what Hydra is like. Hydra is being raised by monkeys, getting introduced to hippies playing music, and having the jungle turn into a love fest of sound. This stuff will blow your primate mind. Drumbeats give birth to drumbeats in mid air, asexual musical reproduction, forming explosive percussive fractals, blooming into full throttle transcendental transfigurations, sailing into the harbor tug boat bass booms and waves of electro-grooveswirledsuspensional-stupification, daffodils in December and there goes the geometry you didn't remember, red circles and orange rectangles implode until someone asks you to find the area of your mind.

That's basically how it works. Improvisational experiments in musical existence. You have not heard this before. Check out www.hydra-music.com for more expansion.

Above is Juniata senior and amateur photographer Jessica Long's award-winning photograph, "Daisy Blue Bunch." The National Photo Awards' Annual Photo Competition selected this photo as a winner for 2004. The competition had divisions for both amateur and professional photographers, and the photo can been seen in color, along with the other winners, at www.NationalPhotoAwards.com.

Eagles abroad

continued from page 9

to my friend, junior Athena Gibble, after her fall semester in Ecuador. She wrote to me about how she dealt with her reverse culture shock. "I quickly surrounded myself with people that care the most about me—my closest friends and family," she said. "They accepted me for who I had become during my time abroad, and were always willing to listen when I needed someone to understand. I was also sure to spend time with some of the other students with whom I had studied abroad, because they were a part of my abroad experience, and they understood what I was going through."

Forming alliances with understanding people at home is a great suggestion for combating reverse culture shock. You'll also need patience as you try to incorporate the perspectives and experiences you acquired abroad into the rest of your life.

Do something Mexican!: Take pride in your native country. Mexicans are fiercely nationalistic, despite the fact that their country has many problems and its government doesn't always act in its people's best interest. The US is definitely far from perfect, but I've realized during this trip to Mexico that my country also has many positive contributions to make to the international cultural exchange.

absolutely no fringes or fancy designs. The style is simplistic and almost suggests a type of personal community.

The jobs on this website are typically ones that you won't see through Career Services. Most of the Help Wanted ads specifically mention that the ad should not be reposted anywhere. On top of this, there is a separate category, "Gigs," for temporary yet highly enjoyable jobs. For instance, you can earn quick money in a focus group near Pittsburgh. Why not DJ or take photographs at a wedding for cash? You can even post your resume free of charge.

Unfortunately, Craigslist still has its limitations. It does not deal with much outside of the cities. If you find a telecommuting job, this doesn't matter. Otherwise, don't expect to find jobs that are more than a few hours away from its cities. Suprisingly, the vast municipality of Huntingdon does not have its own list. In fact, the only lists for this state are Pittsburgh and Philadelphia.

Many of you have not yet resigned yourself to the awful fate that faces us seniors. Many seniors themselves are not willing to admit that they must leave. However, this is one bookmarkable that shouldn't be forgotten. Even if you aren't looking for a permanent career yet, there are some great opportunities available for some added side cash, which makes you think: how much more you could have spent on Pigroast beverages?

Men's Volleyball: second consecutive national title

Ziegler tabbed Division III player of the year

Katie Charles

For the second year in a row, the men's volleyball team brought home the Division III Molten Championship Title. Sophomore Nate Ocasio was named the tournaments most valuable player for his efforts. The Eagles also were able to placed three other players on the all-tournament team, including senior Ricky Ziegler and juniors Tim Cole and Cordt Withum.

The semi-final match saw a repeat of the 2004 Molten Championship. The Eagles faced Medaille College. The results were much the same, as they downed the Mavericks in three games, 30-19, 30-22, 30-18.

The Eagles played outstanding defense in the win, posting 13 blocks as a team. They held the Medaille offense to a .033 hitting percentage.

Withum finished the match with six blocks, while Ziegler and sophomore Glenn DeHaven added four a piece. For the Eagle attack, Ocasio and Barndt each registered 10 kills, while DeHaven chipped in seven. Ziegler led the offense with 33 assists on the match.

In the championship match, the Eagles took on Carthage College, who was making its first-ever appearance in the Molten Tournament. The Redmen played a tough match, but fell to the Eagles in four games, 30-23, 26-30, 30-22, 30-24.

Despite the tough opponent, head coach Ken Shibuya had confidence in his players.

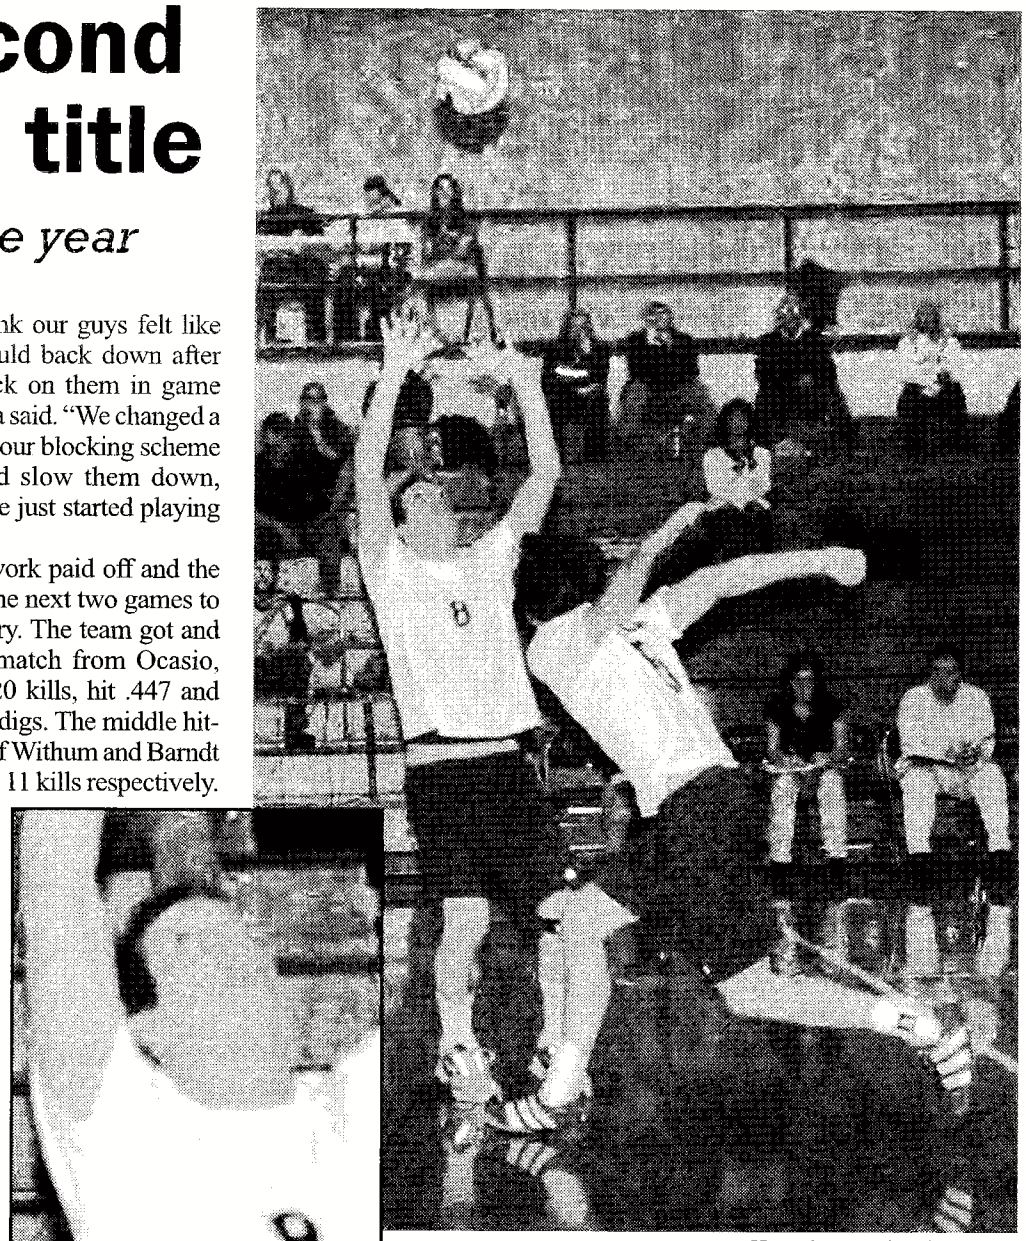
"Carthage really played a very strong match, but in the end I think we were the more consistent team, and that's what made the difference," he said.

In the game two loss, the team got a wake-up call. The Redmen picked up their game and came out strong. "I think our guys felt like Carthage would back down after we came back on them in game one," Shibuya said. "We changed a few things in our blocking scheme which helped slow them down, but mainly we just started playing harder."

The hard work paid off and the Eagles took the next two games to seal the victory. The team got and outstanding match from Ocasio, who posted 20 kills, hit .447 and registered 10 digs. The middle hitting tandem of Withum and Barndt posted 12 and 11 kills respectively. Ziegler directed the offense with 47 assists, while adding a team-best three service aces.

During the Championship banquet the night before competition began, five Juniata players were named to the All-American team. Senior setter Ricky Ziegler was tabbed as the Division III National Player of the Year, capping his accomplishments and a terrific career. Ziegler has directed the offense as a full-time starter for two years and has been the team captain for both of those years. Also garnering first team All-American honors were Withum, Ocasio and Barndt. Junior Tim Cole was named to the second team.

In order to earn their trip to the national tournament, the Eagles had to battle through a tough EIVA Division III tournament on their home court April 8 and 9.



On the first night of competition, the Eagles took on the Brewers of Vassar College. The match was a blowout, with the men winning in three straight games, 30-19, 30-15, 30-19. For the Eagles, junior Nick Bernardo finished the match with a team-high 10 kills, with a .750 attack percentage. He added two service aces to his offensive effort as well.

Withum and Ocasio notched eight and seven kills, respectively. Ziegler directed the offense with 36 assists en route to a .526 team hitting percentage for the match. Cole led the defensive effort with 15 digs, while Barndt notched four blocks.

In the championship match, the Eagles played Tait Division foe New York University. In all of their previous meetings this season, the Eagles had taken the matches in three games. In the first game of the match, the Violets came out strong and stunned the Eagles, winning the game 30-25, but the Eagles bounced back to take the match, 3-1.

In the match, Ocasio led the offense with 20 kills. Bernardo was also in double figures with 13 kills. Ziegler passed out 52 assists while the team hit .479 for the match. Withum and Barndt led the defensive effort with five blocks apiece, while Cole brought up eight digs.

For the tournament, four Juniata players were named to the all-tournament team. Ocasio, Bernardo and Barndt were all honored, while Ziegler garnered the tournament MVP award.

Records shattered; many qualifications for MACs

Corinne Barabas

Juniata turned in many solid performances on April 9, when it traveled to the Messiah Invitational. The Eagles took advantage of the meet by scoping out the competition that they will see again in the MAC meet at the end of the season, while both the men and women were still able to hand in respectable times and measurements.

The men finished third out of 16 teams. Earning their team many points, Randy Anderson, Gary Ondecko and Dusty Sier placed first, third and fourth respectively in the 100-meter dash.

Sier, Anderson and Ondecko, along with senior Ben Beas, broke the school record for the 4x100 meter relay and captured a first place finish with the time of 42.73 seconds.

On the women's side, junior Nancy Hayes had a top performance, beating out her competitors to win the 5,000-meter run. Sophomore Meghan Fahy also added points in the 10,000, where she finished in seventh place.

Throwers had a big day for Juniata. Debbie Delaney placed third in discus and placed in two other field events. Senior Betsy Kusniez tossed the hammer to earn a sixth place finish and Jan Jennings took eighth in the javelin.

Meredith Troutman sprinted to a fourth place finish in the 400 meter dash and a sixth place finish in the 200 meter dash while Elena Amato earned sixth in the 400 meter dash.

Many women distance runners ran fast times and qualified for MACs, including Fahy, as well as sophomore Christina Jones and junior Sarah Bay, both in the 5,000.

The high finishes helped the team place eighth out of 18 teams.

On April 16, many of the athletes headed to the Bucknell Invitational. Competing against mostly Division I and II schools, Juniata put up a tough fight and had many exceptional performances.

For the women, Jan Jennings placed fifteenth in the javelin throw with senior Kira Troutman

Baseball peaking near end of season

Hannah Rauterkus / Juniatian

Pitcher Eric Bidenbaugh (2) helped Juniata take the lead against Lebanon Valley.

Tommy McConnell

The Juniata baseball team is peaking at the right time. The Eagles have won four of their last five conference games, moving them into a tie for third place in the conference. With six games to go in the conference – including three against Widener, the team Juniata is tied with – the Eagles have positioned themselves nicely for a stretch run.

The recent win streak improves Juniata's record to 10-5 in the Commonwealth Conference and 19-12 overall.

"Lately our pitching and defense have stepped up," junior Walk Goedkoop said. "Last week, we threw three shutouts and we got some timely hitting."

Goedkoop has been the key to Juniata's recent success at the plate. In the team's last five conference games – four of them wins – Goedkoop has 13 RBIs, moving him within one of the school record of 41. In a 7-0 win over Lebanon Valley, he went 2-4 with a pair of homeruns and five RBIs. He would go deep again against Albright, finishing the doubleheader with four RBIs.

The Eagles recently took two of three games from Albright. The first of the three game set was a barnburner, with Juniata jumping out to a 7-0 lead before almost losing the lead in the seventh by giving up five runs. The explosive Eagles offense answered, though, with seven runs of its own in the bottom half of the inning, scoring in a variety of ways to seal the win.

Freshman Dan Kaufman got the game started for the Eagles with a solo homerun, and then Goedkoop and junior Zack Sternberg each brought in a pair of runs to lead Juniata.

The Eagles then split a doubleheader with Albright the following day. Jayme Fye helped head coach George Zanic earn his 100th career win by throwing a complete game shutout.

In game two, three Juniata errors led to three Albright runs. It would be the difference in the game as Juniata lost the game and a chance at a series sweep, falling, 6-4.

To worsen matters, Fye, Juniata's number one pitcher, quit the team after a dispute with Zanic. If Juniata is to match last year's championship run, the keys will be defense and pitching. The pitching staff without Fye is considerably younger now.

Goedkoop, a team captain, acknowledges the team will miss Fye, but is confident they can succeed despite his departure.

"Jayme is a great pitcher with a lot of experience," he said. "But no one player can win or lose a ballgame. We have a lot of young pitchers that can and will step up and I don't think we'll miss a beat."

Team defense is also a cause for concern. Freshman pitcher and third baseman Jay Enoch will now shoulder a greater responsibility on the mound.

"I definitely think pitching and defense will be the most crucial thing the rest of the season," he said. "We face nothing but good opponents the rest of the way. Everyone on the pitching staff knows they need to step their game up now."

Pitching performances like the pair Juniata got from Enoch and Cody Zong in a doubleheader sweep of Lebanon Valley – victories that kicked off Juniata's run of wins – will be crucial for the Eagles down the stretch.

Enoch was able to work himself out of some tough spots – twice he had two runners on base – but was able to pitch his way out each time to pick up the shutout win, 4-0.

Zong responded to Enoch's game with a gem of his own. The junior threw a complete game shutout, giving up just two hits to get his fourth win of the season – and his third complete game.

Down the stretch, shutouts will be welcomed, but Juniata will more than likely live or die at the plate, something that the team is prepared to do.

"Offensive baseball isn't usually winning baseball," Goedkoop said. "But you have win the way your team is built to win. If we can keep our offense hitting the way it has been, and cut down on our errors, then we have a great shot at beating anybody."

Club sport support: tough balance with varsity

Hannah Rauterkus / Juniatian

The women's rugby team practices four miles down the road instead of the field behind Ellis.

Mary Gardiner

This semester, club sports on campus have gone missing on weekday afternoons. Rugby and frisbee teams used to be seen on Ellis, North and even occasionally on Oller Lawn. Lately, they have been exiled to fields up to seven miles away.

Women's rugby's last game—their only home game—was canceled, because they had no field to play on.

"It's just ridiculous that we can't play on a field that is a practice field for football, that won't be used until next fall" said Lindsay Clark, former women's rugby president.

And the rugby teams aren't the only ones suffering from the lack of space. Other affected clubs include the men's and women's lacrosse teams, the frisbee team and even the wrestling club.

"For some reason, I was told the old wrestling room, the old mat room, made for wrestlers, was no longer available for wrestling," said Jesse Shaw, a student who wants to start a wrestling club on campus. "Every time I thought of a place I was told no. So finally I gave up."

Muhammad Abdul-Jami, the frisbee club practice coordinator also experienced frustration.

"[Larry Bock, Stacie Weber and Scott McKenzie] told me that the fields were closed for the rest of the semester. But sure enough, that Friday, the football team was practicing on the lined and supposedly 're-opened' fields." said Jami.

Staci Weber, Director of the Office for Student Activities said, "It needs to be consistent. If it's closed to club sports, it has to be closed to varsity sports, too."

Scott McKenzie, head soccer coach, who is also in charge of the field space on campus, explained why teams were allowed to practice, but not play.

"You can stop a practice, but you can't stop a tournament if damage starts to show."

As clubs are left scrambling for places to play and practice, their new recruits are surprised and disappointed. Freshman players who had been told about Juniata's ninety-something clubs are astonished by the College's handling of available field space.

"Last year as a prospective all the great things about Juniata were displayed to me in big bold letters," said freshman rugger Kay Gouldey. "Perhaps one of the most appealing things the school supposedly offered was...the campus clubs. However, this year I have seen that while the school offers these clubs, they do little to support them."

"Space is at a premium," said McKenzie. "It's a balancing act. If a club had been told no, it wasn't out of spite, it was just that the fields weren't prepared for use."

continued page 15

Softball picking up speed

Katie Laucks

With a little more than half of its season in the books, the Juniata College softball team has an even record at 11-11-1. They are 3-5 in the Commonwealth Conference.

The team has been getting great performances from freshman Kim Wagner. She recently led Juniata offensively with five hits and five runs scored in Juniata's conference double-header sweep of Elizabethtown.

In game one, it was freshman Kim Stoia who held off the Blue Jays with a great pitching outing as she allowed just three batters on base. Juniata went on to win the game, 1-0. In the second game, Juniata bested Elizabethtown by taking control with its offense. The Eagles scored nine runs on 13 hits to pick up the win, 9-3.

"In previous years, we never really gelled," said junior Jess Darrow. "This year this team has been getting along really well."

With the new team bonding, the Eagles have been making this season a hit.

On April 9, the team came out and split with Albright College. Junior Lizzi Bartosik led the Eagles in game two from the pitching mound as she pitched a complete game shutout to give Juniata the win, 3-0. It was a solid way to bounce back from a 5-0 defeat in game one.

Wagner recently was named Commonwealth Conference player of the week for her strong play. For the week, she hit .476 and scored a team-high eight runs.

She continued her dominance in Juniata's next match up with Lycoming on April 12. Wagner went an impressive 5-7 at the plate in the two games.

The Eagles also came out pitching well against Lycoming. But the Eagles couldn't hold off the opposition as they dropped back-to-back games, 5-2 and 2-0.

This past Sunday the women traveled to Moravian to take on the Lady Greyhounds. "We played tough defense, but Moravian just got good hits that produced runs," said pitcher Bartosik.

The Eagles dropped the two games to Moravian, 3-0 and 8-1.

Despite the loss the young team is hopeful for the rest of the season.

"We are young but we have more connection with each other this year," Jess Darrow said. "When other teams will be rebuilding, we will just be getting stronger."

Hannah Rauterkus / Juniatian

Junior Jen Piston (2) makes the catch against Albright.

Cheerleading Squad Performs at Kings College

Robb Patty

The Juniata College cheerleading squad competed at Kings College on April 2 with roughly 25 other squads.

During the competition, the women were divided into two separate stunt groups that were comprised of five cheerleaders each, with an extra cheerleader that danced and cheered during the routines.

"We were really pleased with our performance at the competition. We all had such a busy schedule and not a lot of practice time. It was good to see we could pull the routine together," said senior Mary Heaton.

When one thinks of the Juniata College cheerleading squad, one might think of them as women who do their best to help and support the athletic teams here at Juniata. They also affect Huntingdon by doing community projects and are a positive influence on the entire Juniata community.

After the football season was over, the women began practicing for the men's basketball season and the competition at Kings. This was the first time this year that the cheerleading squad went to a competitive meet. In the past, the squad had only attended one competition and was pleased with the opportunity to perform outside of an athletic event.

"It was really exciting to compete. This was the first time in a few years we were able to do this," said Heaton.

In the future, the Eagles hope to compete in two competitions next year as well as continuing to support Juniata College athletics.

Athlete Off the Field

Katie Laucks

Athletes are often seen only as one dimensional. When most people get to see them, they are in uniform, preparing to defeat the opponent they are up against. It's not often that they find time to challenge themselves in other ways.

Jeremy Weber, a senior on the Juniata men's track and field team, knows how to challenge himself off the field, as well as on it. This senior is balancing a challenging POE, as well as training for a stellar spring season in track.

Here at Juniata, Jeremy's POE is self-designed. He combined economic studies, international studies and international politics and came up with a POE of International Political Economy studies. Jeremy has big plans for his intensive POE.

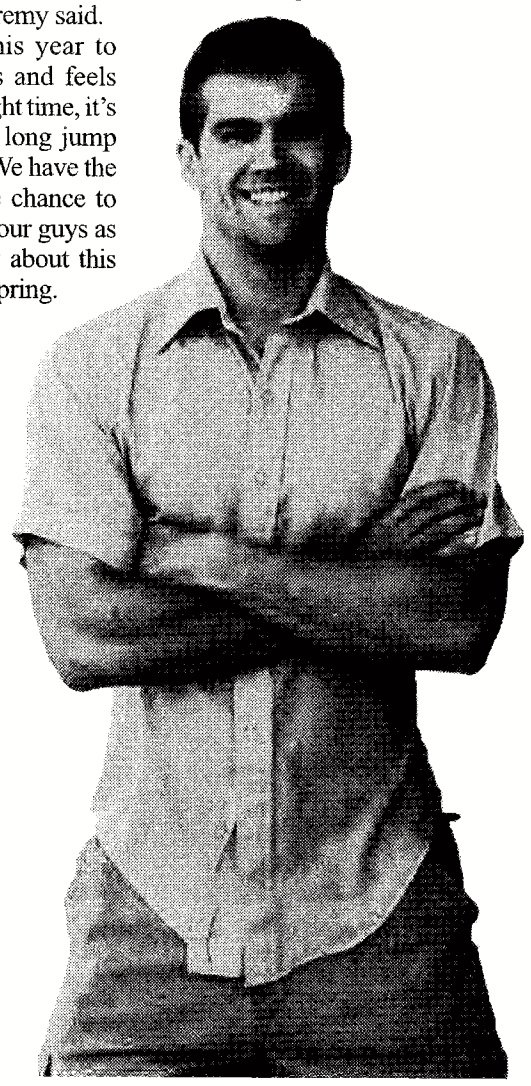
After graduation, he plans on returning to Peru. Jeremy was recently in Tarapoto, Peru, in an upper jungle region of the area over the summer studying abroad. While there he studied the small rice farms. During his studies, he applied for an internship under the Fulbright Grant.

Under this grant he will be able to do an independent research project. With this project he will continue his studies on rice farms and the economic and agricultural aspects of them. Any day now he will find out if his proposal was accepted. "I go to my mailbox with anticipation," he said.

Until graduation, Jeremy finds his days filled with practice and classes. He also finds the time to participate in many extracurricular activities on campus. "I like to take advantage of what Juniata has to offer," he said of his many involvements.

He is a member of the A.C.A Association of Christian Athletes). There he is a leader and helps lead the weekly discussions. He is also member of the Men's Bible Study. This year, Jeremy has also arranged three current affairs discussions for the Model U.N. The discussions talk about local and international policies.

When he isn't participating in one of his many extracurricular activities, Jeremy can be seen in the gym or on the track field training for his next race. He competes in the long jump and runs the 4x100 relay. "I have been training to get faster and stronger," Jeremy said.



He is committed this year to making it to nationals and feels that if he peaks at the right time, it's possible with both the long jump and the 4x100 relay. "We have the rare opportunity - the chance to qualify with the same four guys as last year," said Jeremy about this year's outlook for the spring.

His determination with training will obviously take him far. Just like it has this year, Jeremy has already been given a high honor. He was among the top athletes in the country honored by USA today. He was named a 2005 Academic All American, placing 13th out of 20 other students.

Taking what he learned in the classroom and applying it to the real world helped him garner the distinction. The panel of judges found his work with rice farms very interesting and included him on the 2005 team.

Jeremy has taken advantage of his time here at Juniata College. He not only has built a good basis for his future endeavors, but he has also made an incredible track reputation. Jeremy can be seen as one of the hardest workers on the track team and with this 2005 season underway, there is no doubt he will be in top condition. "I will never be in this condition again to do big things," said Jeremy.

There is not doubt that when the track season is over and he takes the final walk on campus ground, Jeremy's hard work will help him to do big things in his future.

Track & Field shatters records, aims for MACs

continued from page 12

close behind in eighteenth. Debbie Delaney and Betsy Kusniez placed twenty-seventh and twenty-ninth, respectively, in the shot put.

For the sprinters, Meredith Troutman took twelfth place in the 100-meter dash and fourteenth in the 200-meter dash. Elena Amato sprinted to capture a nineteenth place in the 800-meter dash.

Rebecca Shoaf and Cara Carpin scored twenty-fifth and twenty sixth in the 400-meter hurdles. Overall, it was a strong showing by the women against excellent competition.

On the men's side, freshman Matthew Booth took sixth place in the long jump and a tenth place finish in the triple jump.

The sprinting sensations Anderson, Sier and Ondecko all had excellent showings in the 100-meter dash, placing third, seventeenth and twenty-fourth respectively. Anderson led Juniata in the event with a time of 11.10 seconds. He also earned another third place finish in the 200-meter dash.

Adam Loser took tenth in the high jump and Ben Beas placed fourteenth in the 400-meter hurdles, followed by freshman Mark Modak who captured twenty-first place. Justin Fritzius placed twenty-fourth in the steeplechase.

Next up for Juniata is its only home meet of the season on April 30 at Knox Stadium.

RANDOM ELEVEN ANNEX II

Students we should expel, part III: The people who keep stealing headphones from the TLT. Even more, I'd **really** like to know who took the pair from the library – the pair that one student used for his screen reading software. How low can you get, seriously?

Club support: tough balance

continued from page 13

"There's just not enough land," said Weber. "Club sports deserve the fields and space…but we have to compromise."

McKenzie continued, explaining the increased lack of field space. On East Field last fall, "one of the teams had a sliding practice, and ruined the turf. [Facilities] deemed that East had incurred too much damage and shut it down….Overuse killed East, and we don't want to kill Ellis, too."

Both Weber and McKenzie assured that once the construction vehicles are out of North Lawn—the area in front of Sunderland Hall—that field will be seeded and used solely for club sports.

For the time being, however, clubs are left using the Lions' field or the lawn behind Brumbaugh. Weber asserted that while Brumbaugh is too sloped for games, "it was good enough to practice on."

The use of Lions' field isn't a suitable solution either according to some students. Sophomore rugby player Meghan Ruffner, in addition to many others, is often left out. She can't always make the trip to her team's practice at Lions' because it is four miles away from campus.

"I have lab that often runs until five or later on Tuesdays, so I have no way of getting there since I don't have a car," Ruffner said.

It's like they almost want us to give up," said Seraphin. "The school doesn't give us fields for our tournament, our big money maker. But they won't give us funding, either, so what are we supposed to do?"

Perhaps the most disturbing fact, however, for club athletes, is that this happens despite their service commitment to the community.

"We raised $1700 for Huntingdon House and the guys [rugby] helped with flood clean-ups. We raised a few hundred for a local sick boy during Storming, too," said Clark. "My point is that these clubs have given a lot back to the community."

The Ultimate Frisbee team holds benefit tournaments every year, as well.

"We should be able to have a field on campus. I mean there are plenty to practice on," continued Ruffner. "It's one thing if they are all being used by the varsity sports, but if they aren't, what's the harm in letting the club sports play on them, especially if the club has not caused trouble in the past, and continues to not cause trouble?"

The Juniatian congratulates staff member Robb Patty

and his teammates for winning their second-consecutive Molten Division III Men's Volleyball National Championship. Good luck in the upcoming Division I playoffs.

THE RANDOM ELEVEN

We got through Junk Week AND Pig Roast with no fatalities!

Matt Russell

Muddy Choices: Ever notice there are two sizes of soft pretzels in Muddy Run at two different prices, yet you will **never** see them both out at the same time? They also have separate bowl / cup prices for soup, but they hold almost precisely the same about of fluid. It's things like this that keep me up at night.

Professor quote of the week: "I love giving blood. It makes me feel great. If this were 1776, I'd own leeches." Well, I mean, gee, I could probably find some for you…

Sophomore quote of the week: "The freshmen are so **bad** this year!" How quickly we forget where we've been.

Good times: Last week a friend of mine woke up the morning after a party… on the other side of campus in a windowless study lounge with pink toenails and no memory. If you can beat that one, let me know.

Students we should expel, part I: Some people should just flunk out for the lame things they do. For example, there are a number of people in South who think that the shower floor is so horribly contaminated that anything that touches it is dead to them. Hence we see odd things like shampoo bottles, full bars of soap (folks, you're alone – it's safe to pick it up!), and washcloths randomly being left in there day to day. I wish I had enough money to replace everything **I** dropped.

Students we should expel, parts II and III have been placed on other pages in the newspaper. Happy hunting.

Students we should expel, part IV: The two jerks who stole my and another person's bikes last Saturday night. They rode them (presumably too drunk to feel guilty) down to Hess Apartments and ditched them in an alley. What the hell is wrong with you?

People I'd like to pat on the back, part I: Well, that particular story has a happy ending. A neighbor by Hess was kind enough to secure my bike and Security found it. Mr. Launtz tells me there was APB out across campus to keep an eye out for it. It's that kind of news that makes me really happy to be a part of our little community – both the college and town. Thanks to everyone who had a hand in that.

People I'd like to pat on the back, part II: While I'm at it, I'd like to say thanks to Donna in Baker for always having a friendly hello for every student who walks past her. The same to Cindy, up in Muddy, who's always quick to whip up a fresh soft pretzel for me when they're out (even if I can rarely choose the size, hehe). I appreciate little stuff like that even more than the usual topics of this column annoy me.

Hannah Rauterkus / Juniatian

Three Sodexho employees study the broken ice cream machine for several minutes, each loaning their own unique perplexed look to the effort. A fourth escaped while I ran to get our photographer who happened to be across the hall. This is Random Eleven investigative journalism at its finest.

Great Confluence of Events, part 1: I wish I was a fly on the wall in the enrollment office when they schedule Open Houses. "Let's see… 54 weeks in the year… how about we do it during the one where every person in the town has a pile of garbage in front of their house for Junk Week? Maybe they'll find something Uncommon to take home with them."

Great Confluence of Events, part 2: "Hmmm... oh I know! How about we ALSO do it on Pig Roast day so the maximum number of students is drunk? That's perfect! Nothing says **The Juniata Experience** like watching groups of students drag their drunken friends out of the back of cars and into the dorms mid-afternoon."

Is JC spreading into the town?

Collegiate Dementia

When toddlers attack!

Carolyn Keller

Lately, at least for the seniors among us, "The Future" has been on the brain. For some, that means starting a career. For others, families come to mind, and the cretin—*children* that often come with them. I want to be a screenwriter, so I thought I'd find a way to blend the two.

You see, lately, at least for me, the cute, cuddly, satanic dimension of children has been on the brain. People keep asking me about things having to do with these captivating creatures. This amazes me, because of my track record with them. Don't get me wrong, I love kids to death, but above all else, I like to give them *back*. So it surprises me when people run child-involving situations by me, questioning, and then expect me to answer seriously. Rationally. Like a normal person.

And with the debate on children-versus-canines wafting across campus, I'm sure most social work majors will agree: Get this girl a puppy.

An explanation? How about a script—or three:

1. "Death By Silverware"

The Backstory: Friend leaves clear sipper full of yellow-tinged alcoholic drink in fridge. Roomie Amara knows not what it is nor from whence it came, but happens across it. Asks about it, saying looks like lemonade, or perhaps Pedia-Lite. Actually is drink known as "kamikaze."

The Scene: Boxers. *The Subject Matter:* Evil Child of Corn, gnashing knife and fork a table away. *The Players:* Roommates.

Roomie Erin: [*Reacting to noise*] Aaah! Aaah! Make it stop! Make it stop!

Evil Child of Corn: [*Gnash gnash gnash*]

Evil Child of Corn's Father: Stoppit with the gnashing immediately!

Evil Child of Corn: [*Grins. Gnash gnash gnash*]

Roomie Erin: [*desperate.*] Oh, I am gonna kill that kid!

Me: [*Ponders silverware*]: Tell him to run around with it?

Roomie Erin: [*Looks horrified*]

Me: [*Thinks.* Really *hard*]: Give him the Pedia-Lite we have in the fridge?

2. "Give 'em the Dickens"* aka "*'It was the best of times, it was the worst of times'…now SIT DOWN!"

The Scene: Brit Lit. *The Subject Matter:* "David Copperfield" *The Players:* Fellow Dickens Despisers from my novel class last spring.

Scott K: Man, I haaaated that book. It was sooo long!

Me: [*Astonished!*] Me *too*!

Holly B: Ohh, man. That book was sooo bad!

Me: [*Astonished*] I *know*!

Scott K: I think that "David Copperfield" would be the *best* punishment, you know, if you had children. Whenever they were bad, you could just make them stand in the corner and read it for *hours*.

Me: [*Amazed at such a possibility*] Wow. You know…that kind of makes me want to have children now.

3. "Adopt a Great-Great Grandchild!"

The Scene: the apartment. *The Subject Matter:* Children of the Future. *The Players:* Roommates.

Roomie Erin: Yeah, so [boyfriend] Ben and I were at his aunt's house last weekend, and his great-grandparents were there, and they're healthy and in their 90s And they were so cute and in love! And I didn't really think I wanted to have children. But then I thought, how sad would it be to deny them great-great grandchildren? [*Ponders*] That doesn't really seem like a good enough reason to have kids, huh?

Me: [*Thinks*] Maybe *have* them…and then just keep them until his great-grandparents die?

Right. Quit rationalizing, quit the urge for a family, or, for me, an Oscar. Just get this girl a puppy. A cute, cuddly satanic Beagle or perhaps a Labrador Retriever ought to do the trick. Though if you need a babysitter, my extension is…

Founders Hall left behind

Flagship building losing out in Outcomes Campaign

NO "LEAD GIFT" IN SIGHT FOR ESCALATING RENOVATION COSTS

These scenes were found on the upper floors: snacks in limbo, dead animals, symbols of bygone eras, stairs in disrepair, and the famous bell. Nathan Thompson / Juniatian

Nathan Thompson

The unidentifiable remains of a small mammal lay untouched on a dusty floor. After a century of lively activity, such carcasses are the last residents of the upper floors of Founders Hall.

In 1999, Juniata initiated a fund-raising campaign to make the upper floors of Founders useable once more. Since then, costs, other priorities and a lack of larger contributions have kept major renovations of the building on hold.

Juniata's oldest and perhaps most beloved structure, Founders Hall, was constructed in 1879. Since then, it has remained virtually untouched by exterior renovation. Unfortunately, most of the building has also remained unusable for the past quarter of a century. When repairs were made to keep the building structurally sound in 1979, the upper floors were vacated and deemed "unfit for occupancy," explained Bob Shaffer, project manager at Facilities Services.

Shaffer explained that the building was structurally sound but showing age. Dry rot and water have caused considerable damage. There are holes in the ceilings, floors and walls. Stairs are breaking. The loft at the top of the bell tower can no longer support any weight. Water damage in the east stairwell has led to a rotting ceiling and walls.

The Uncommon Outcomes Campaign was in full swing at the turn of the century. The needed renovations for Founders were included in this campaign. By December 2002, The Juniata Lantern reported that the campaign had received $627,400. This was a promising start for the $3 million goal and $5.3 million projected cost of the renovation.

But today, with Uncommon Outcomes only 5% away from

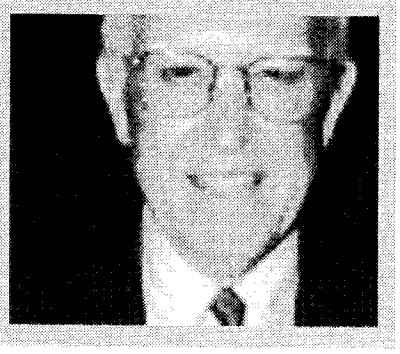
Move off campus creates tension, disturbance in the community



Genna R Welsh

Due to the recent increase in students living in town, tensions have arisen between off campus students and Huntingdon residents. Some members of the Huntingdon community are speaking out about the student migration to their community, hoping to foster cooperation between students and residents in place of current tensions.

"There is a student ghetto developing around campus."

Professor of History David Sowell

"Communication, cooperation, and coordination - we can work together."

Huntingdon Mayor Foster Ulrich

"There is a student ghetto developing around campus," said Professor of History David Sowell. "Almost every house that goes up for sale is being purchased for students."

Huntingdon Mayor Foster Ulrich confirmed that more individuals are buying property to rent to students, but he believes that the real tension falls elsewhere.

Ulrich, a former college administrator at two liberal arts colleges, one of which was Juniata, said that there are two tensions between the residents of Huntingdon and Juniata students living off campus: loud parties and parking.

"College kids like to party. They tend to get loud and this often spills over," Ulrich said. He attributes tension resulting from parties to the close proximity of homes in Huntingdon.

Recently, around Pigroast, such

Patrick rates rise to keep Lodge

Nate Drenner

Juniata College is keeping its secluded forest retreat.

President Kepple announced recently that the Patrick Lodge, a retreat destination for many College groups, will not be sold, as was considered last spring. Instead, a new plan aims to reduce the property's dependence on the College's general budget and bring the property to at least a break-even status.

Increased rental prices, improvements to the facility and marketing initiatives will help to ensure the future of the Patrick Lodge. The changes will go into effect on July 1.

A committee formed to assess the Lodge and make recommendations regarding its future. Rob Yelnosky, special assistant to the president for administrative services, facilitated the committee, which included faculty, staff and student representatives.

Rental fees will increase from $10 to $20 per day for academic and organization use. Individuals renting for personal use will be charged $25 per day.

Additionally, certain prime weeks

Student begins mobile ice cream venture with JCEL support

Nicholas Carney

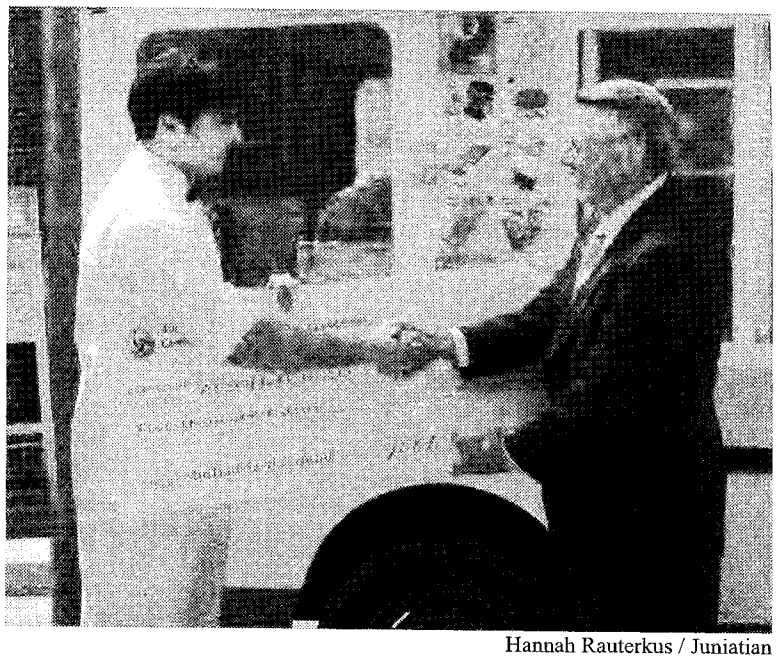
Complete with his white linen gloves, bow-tie and apron, Demetri Patitsas pulled up in his newly-decorated 1979 Good Humor ice cream truck. Students and faculty alike ran to the circle between South and Lesher where Patitsas parked the truck on April 21. They had one thing on their minds: free ice cream.

April 21 marked the opening ceremony for Patitsas' business, Absolute Creo LLC (*creo* is Greek for "cold"), and to celebrate he gave free treats to a crowd of well over 60 people.

"The response was very encouraging," grinned Patitsas. "People saw the truck and heard the music and just started running towards the truck!"

Patitsas purchased the truck over the Internet on a recent eBay auction.

"We've never really had [an ice cream truck] here in Huntingdon before," added Patitsas, "and I wanted to start a business that I could dedicate myself to in the summer. An ice cream truck was perfect."



Patitsas, a sophomore Entrepreneurship POE, is only the second Juniata student to take advantage of the Juniata Center for Entrepreneurial Leadership's (JCEL) Student Seed Capital Fund. The Fund can grant students up to $5,000 in seed capital in exchange for Juniata College's partial ownership in the company.

The College does not interfere with the student ventures, said Dr. Michael Lehman, Executive Director of JCEL. In fact, Juniata simply provides the initial financial support for new small businesses.

JCEL has, in fact, over $420,000 dollars remaining in its ever-growing fund for student businesses and encourages people to apply.

"After the first couple of years in business," added Lehman. "If the business begins to generate money, the [College's share] goes back into the fund. There is no deadline to apply, and it is not a competition."

JCEL also serves as a vast networking service, linking student entrepreneurs with Juniata alumni, staff, and community members who can help them with their businesses. JCEL even acts as a marketing firm for the student – Patitsas and his truck were featured on WJAC-TV news the evening of the opening ceremony.

Hannah Rauterkus / Juniatian

Sophomore Demetri Patitsas receives a $5,000 loan from JCEL presented by Advancement & Marketing Vice President John Hille.

"I couldn't have done it without [JCEL]," continued Patitsas. "They provide a lot more than just the money."

Patitsas plans on establishing a summer route following Memorial Day, and continuing until the start of school in August.

"I will run through campus," said Patitsas. He was granted special permission by Sodexho, holder of the campus food contract, to run the truck through Juniata at the beginning and end of his ice cream seasons.

Patitsas plans on selling mostly prepackaged frozen items he purchases from two local dairy suppliers.

He has also secured the talents of an unnamed Juniata artisan who promises to paint the truck – conditional on a lifetime supply of free ice cream.

The truck itself, currently sporting the title of its former owner, will be the subject of a local naming contest. Huntingdon High School students, community members and Juniata College students and staff are encouraged to send in their ideas for a unique moniker.

"I just want to convey my gratitude towards the school and the community," added Patitsas.

He also advised rising entrepreneurs to cultivate an interest in the business field, and take a variety of business courses, as it has applications over wide variety of disciplines.

Hannah Rauterkus / Juniatian

With the news of free ice cream spreading across campus, hungry students and community members lined up to try the first taste of Demetri Patitsas's entrepreneurship.

Move off campus creates tension, disturbance in the community

continued from page 1

parties reached a climax, yet Ulrich maintains that only one complaint has been expressed, and that overall, the borough of Huntingdon is very proud of Juniata College.

One small manifestation of the clash between students and residents occurred on the day of Pigroast near the residence of James and Belle Tuten, both Professors of History here at Juniata College.

"Students were using words that were inappropriate for my small children. I went across the street and expressed that," said Belle Tuten, who added that the students soon apologized for their actions.

"I don't think this is an unusual tension at all," said Tuten.

Like Tuten, Ulrich feels some incidents will continue to occur. However, residents must realize this is the exception to the rule.

Some residents find this no consellation, suggesting the College is at fault for dumping students on the community without consideration, thereby heightening the prevalence of such tension.

"Is the College shirking its responsibility for housing?" Sowell asked. "There are people off campus now who should not be off campus [for disciplinary reasons]."

Like others, Sowell suggested increased screening of students intending to move off campus, claiming that the off campus housing locations have become party houses. Currently, students must only submit their ages, POEs and have their GPAs verified to meet off campus housing requirements.

Regardless, Huntingdon is changing from a family-based atmosphere to an atmosphere with younger, single members of varying values and actions.

Assistant Dean Dan Cook-Huffman suggests mutual adaptation. "Borough residents also have to realize that, if students are paying rent, they have rights as residents as well, including parking, holding gatherings in their back yards, etc." At the same time, he emphasized that students are to hold strictly to the student code of conduct regardless of where they live.

Ulrich indicated that the borough expects order and decorum of all its citizens, including students.

Some residents point out that the tension is simply due to a clash in disposition, hoping to improve resident and student relations by encouraging deeper consideration for one another.

"They are not malicious. It is just lack of thought," Tuten pointed out.

According to a recent Juniatian article, students are moving away from campus housing due to a lack of parties, power-hungry resident assistants and unclean facilities, which only hints at further validation to residents' claims that off campus residences have become the new party scene.

One ramification of this migration for the Juniata community has been the diminishment of the interclass relationships.

"One long term effect of upper class students moving off campus could be a loss of community on campus, as students are no longer in residence halls where activities, such as pizza parties, occur to create community between all classes," said Lesher Resident Director Kerry Fagan, a Juniata College alumna.

Aside from the value clash of off campus students and Huntingdon residents, physical complications also create a dilemma.

The parking space in residential Huntingdon is small without students. Now, a house of up to eight students necessitates more parking than a family or couple's home, increasing the parking need further.

Ulrich is hopeful, despite the lack of an immediate solution.

The College and community are working together now to create parking by the Juniata athletic fields, though more densely populated areas, such as downtown or Washington, Mifflin and Moore Streets elude such a solution.

The solution to the tension at large, according to Ulrich, is hopeful. "Communication, cooperation and coordination – we can work together."

Facts and fiction of student-designed POEs

Liz Houts

Students looking to design off-the-wall Programs of Emphasis can look again. Rumors about students graduating with bizarre POEs, such as "Happiness" or "Mad Science," are nothing but urban legends, said Juniata College Registrar Athena Frederick.

The Registrar's Office will approve an Individualized or Interdisciplinary POE with a wacky title and idea, only if a student can provide ample rationale for the proposed POE. In addition, if faculty advisors do not approve an initial POE request, chances are the Registrar will not either.

However, Frederick said, the office does not receive many such requests. Granted, Juniata has had its share of unusual POE titles. The most outgoing POEs Juniata students have graduated with include "Modes of Expression," "Computerized Polity" and "Tourism Marketing." Yet even those are not considerably wild.

"Juniata does not experiment that much," said Frederick.

Frederick suggests students' reluctance to create unusual POEs has much to do with the costliness of education. With the cost of tuition at a private liberal arts institution like Juniata rising drastically, students only have one chance at it.

Many students do, however, take advantage of the POE system to reorganize Designated POEs to their liking. For example, rather than having a POE in Biology, students can call their major "Biological Studies" and have several different options for what classes they take.

This is often interpreted by others as an avoidance tactic, a way to get out of certain upper level courses.

"Even my advisor told me if I didn't want to take [Western Political Thought], I could just write my POE as 'Political Studies' instead of 'Politics,'" said freshman Phillip Copley.

Frederick argued that students who choose such a route are not avoiding classes, but are instead guided by their career goals.

Sophomore Alex Rinehart, who has an Individualized POE in "Social Issues and Health" and plans to go to chiropractic school, agreed with Frederick. Rinehart claimed the POE system allowed him to combine his interests in the life sciences and sociology, using Juniata's curriculum so it worked the best for him.

"For me, it wasn't necessarily trying to take the easy way out. I had too many interests, so I used the flexibility to structure [my POE] how I wanted it. I'm not doing less, I'm doing more," said Rinehart.

Sophomore Stephanie Stupic argued that she does in fact know people who have rearranged their POEs to avoid certain courses and work. Stupic, an English POE, claims she does not understand students' motivation to avoid this work.

"It's nice that you can take what interests you most, but I don't like it when people make their POEs so they don't have to do anything. You spend so much money to go here, then can't get a job because you're not qualified in anything," said Stupic.

Frederick admitted that some students are a bit more outgoing on their initial POEs, but once they get closer to their senior years, they begin to realize just how impractical their POEs may be and move toward earning a more standard degree that will help them when they make the transition into careers.

Another argument brought up by numerous students is that many Individualized POEs include too many disciplines for students to become fully proficient in any one of them.

Again, Frederick refuted this point. She feels that students can sell themselves in a number of different fields with such broad POEs because they leave themselves open to a number of different options.

Rinehart agreed, saying he thinks an unusual or expansive POE could make job or professional school interviews much more interesting.

While Juniatians are fairly set in their POE ways, Frederick foresees a little more creativity following the addition of new Designated POEs next year.

"Once you get the designated POE, interesting [Individualized] ones are bound to pop up," said Frederick.

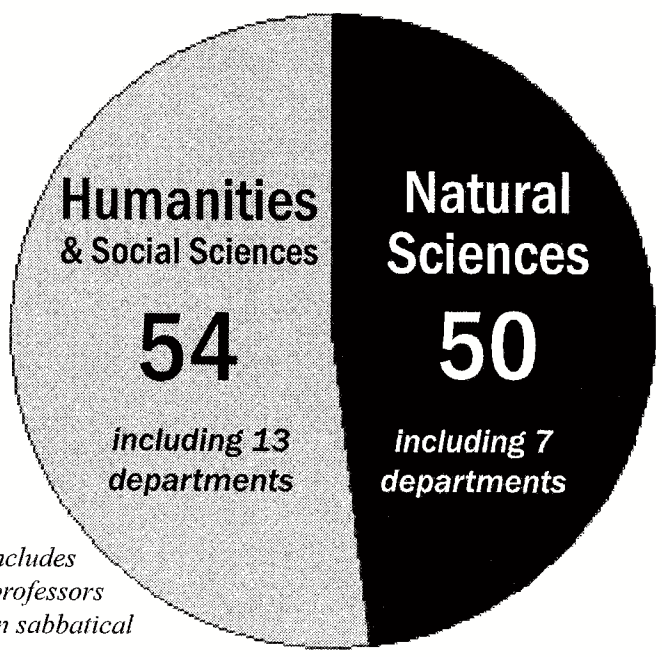
Roving Reporter

by Hannah Rauterkus

If you could create any POE you wanted, what would it be?

"Sexual Education of Science Profs, because no matter what science class I seem to have, I always learn about the prof's sex lives."
- Joe McDermont, sophomore

"Global Destruction of the World because I watched too much 'Pinky and the Brain' when I was little."
- Kari Dundore, junior



"Musical Technology because I'm a DJ for the radio station and I'm studying computer science...and the two work together for DJing."
- Chris Brookhart, senior

Balancing staffing needs

How are new faculty hires determined?

Maria Piazza

Juniata College is a liberal arts school, but its excellence in and emphasis on the natural sciences might confuse a prospective student who isn't interested in the sciences. However, the idea that a department is passed over, and that non-science departments are ignored is not true, according to College administration.

Confusion and sometimes a little anger over which departments are allocated new professors each year have arisen from students as well as the occasional comment from an Humanities or Social Sciences professor.

Every six years, each department goes through an internal review where the professors develop a plan for where they want their department to head in following years. The plans tend to incorporate everything from possible classes to the reason for hiring new faculty.

"Every department wants another professor but really the question is do we need a new professor, and the answer to that question is not always yes," said Professor Andrew Murray of the Peace and Conflict Studies program.

Planning for a new professor must include why a new professor would be beneficial as well as how the school could afford it.

Provost Jim Lakso and President Kepple are responsible for the final hiring of new professors to each department, though they do not decide when a department requires a new or additional professor. Lakso and Kepple do decide on whether or not the school can afford to add a new professor. Their decision factors in student interest and student growth due to the desire to retain an even balance of 13 students for every one professor.

Once the candidates for an open position are chosen, they are interviewed by a panel of current professors and tested on their presentations in class by different students and hired based on the results of these tests and interviews.

An anonymous student stated, "It seems like the different science departments have a lot more variety or at least more attention is paid to them."

Often times a professor cannot be hired due to the cost of salary as well as the lack of student interest. Lakso pays specific attention to each program's and department's progress and growth. If it appears to Lakso that a department could use an additional professor a temporary is hired until it is apparent that a full time tenured professor is necessary.

Professor Jackson Barlow, of the politics department, said, "The system that Lakso and President Kepple use to determine whether or not a professor is hired works well. Besides they are the people who are in charge of the budget."

Also involved in the monitoring of each department is the Academic Planning Association Committee (APAC). APAC is run by a group of professors headed by Professor Richard Hark, and the group pays specific attention to each of the different plans that were developed during an internal review.

On this board is also a student representative, sophomore Daysha Burkhart, who is always interested in questions on this topic or anything having to do with APAC. With the work of Lakso, President Kepple and the APAC it is rare that a program or a department fails to gain a new professor if it is really necessary.

Barlow said, "Overall APAC is a good system for our small college, and it really helps us handle the different questions and ideas that Juniata is faced with when choosing to hire a new professor."

In the end it appears that no one department in the College is really overlooked when it comes to hiring practices and faculty distribution.

End in sight: Students dealing with busiest time of semseter

Meredith Pink

The end is here. The scramble to get things turned in, written up and checked out is in full force. Nerves are amped up and the pile of work that is due in the next three days just reached the ceiling. People should be in the "I will not rest until I get all my work done" zone...right? Then why is the standard anecdotal phrase instead, "I just don't care anymore?"

Keeping motivation high during finals is a substantial task in its own right. The mounting stacks of work and high expectations that are placed on students are almost too much to handle.

College Counselor Beth Williams said, "Stress is the underlying factor of motivation. For some it can be a positive influence, while for others it can be negative."

She said that some people need to be stressed in order to have motivation. The stress-induced adrenaline rush catalyzes motivation. It enables students to focus and complete their work.

Junior Angela Davidson said, "Stress is my motivation. When I am really stressed out I don't think about all the work I have to do. I just do it."

For others, however, high stress completely shuts them down. They are unable to cope with the anxieties of stress, and as a result their motivation plummets. This coping mechanism can be very detrimental to students. Senior Greg Capriotti said, "When Sunday night roles around and I have too much homework to do, I put it all away and tell myself I will really stress about it tomorrow."

Reducing stress is key to lessening the angst of finals. Williams provided many helpful stressbuster hints. First, reduce caffeine intake. Most of the time caffeine plus high anxiety will lead to the jitters, which could deter productivity. Exercise is also very important, even if it is just a short walk. It clears the head, promoting both mental and physical health.

Using effective time management techniques is also a great tip. Organization is directly proportional to stress levels. The more organized students are the more in control and less stressed out they will feel.

The final tip, which is perhaps the most important, is **sleep**. Allnighters can take a serious toll on the body, mind and GPA. The best thing to do is to establish a constant sleep pattern. Helpful hint: People who have problems falling asleep should drink a glass of milk. Milk contains a sleep-inducing chemical.

Many students have their own ways of dealing with stress and maintaining motivation during finals. Junior Rachel Jones makes lists. During this time of year she writes down all of her projects, papers and tests that are left to do.

"I love getting things done and crossing them off my list. It actually motivates me and relieves a lot of stress to know I accomplished my work," said Jones.

Making lists is a very good organization tool. Once it is made, there is no need to remember what has to be done; it is already written down. However, making lists immediately before bed could cause worry and disrupt sleep.

When it comes down to it, reducing stress and heightening motivation is all about maintaining balance. This may seem like the hardest assignment yet, especially this time of year, but it is worth the effort. Students need to find what works best for them and stick with it.

Stressbusters from Health & Wellness

- Reduce caffeine intake
- SLEEP! Establish a constant sleep pattern.
- Exercise
- Use good time management techniques

Founders Hall left behind

continued from page 1

completion, the fund for Founders Hall has only received a quarter of its needed total. To date, this fund has acquired an additional $150,000 since December 2002. At this rate, it will take almost 50 years to reach the $3 million goal.

Director of Development Marsha Hartman and Director of Planned Giving Kim Kitchen cited several reasons for such slow progress. Uncommon Outcomes focused primarily on the student buildings first. The floor plans for the Founders renovations were originally for administration only. However, classrooms and faculty rooms were added to the plans based on appeals from donors.

Kitchen also explained that it was much harder to receive funding for renovation projects. Larger donors want to see their names on the building, she explained.

Without larger donors, Founders faces its biggest problem: it has no lead gift. A lead gift is a gift of half or more of the cost of the project. Without such a gift, other large donors are rare. President Kepple had said that he hoped such gifts would appear as focus turned away from other projects which were nearing completion.

According to the newest plans, the renovations will leave much of the original structure, including the century-old graffiti in the bell tower, intact. Only the north wing (the current location of the Registrar) will be torn down and expanded.

"This is not cut in stone," said Kitchen, who cited the lack of funding as the major issue. The estimated cost for the renovations is growing. Newest estimates are about $8 million. It would actually be cheaper to tear the whole building down and rebuild it, but no one wants this.

For many, the aptly-named Founders Hall has come to symbolize the tireless efforts by the men who created the first permanent Brethren college. Called "The Building" until a name change in 1897, the hall was constructed on land donated by local residents.

The building cost the fledgling College an estimated $11,000. During its first years, it stored every function of the College from the dining hall to the classroom to housing for the kitchen staff. It only lacked indoor bathrooms. Students – who lived on the third and fourth floors – used an outhouse next to the building.

Since its construction, the structure has seen only one notable exterior change. Its famous porch was added in 1905.

Nathan Thompson / Juniatian

Founders Hall's central stairwell on the upper floors shows signs of its age.

The building still holds remnants of the history that alumni want to preserve. Old copies of The New York Times Magazine lay scattered in the hallway. Graffiti in the bell tower dates back to the Class of 1905. A bar of soap and a used spoon still sit on shelves in the fourth floor.

Patrick rates rise to keep Lodge

continued from page 1

and weekends will now cost a much higher price: $500 for Juniata faculty, staff and student use and $600 for outside use. These times – such as Homecoming Weekend, graduation and weeks during the summer – are necessary to cover the property's yearly maintenance expenses.

Students, however, must be part of a club or organization to use the Lodge. Unlike faculty and staff, they cannot currently rent the Lodge individually for personal use.

"I don't know if we're going to change that practice," said Colleen McLaughlin, coordinator of conferences and events. "If [any] individual wants to rent it, they are required to provide a million dollar certificate of liability insurance, and most students can't provide that."

If individual use was permitted, some students may be covered by their parents' insurance.

Yelnosky stressed that use by classes and College organizations is considered the first priority for Patrick, and the committee kept that price low to encourage use of the Lodge.

"We're going to have a different rate for some number of weeks or weekends throughout the course of the year, primarily in the summer, [...] so we don't have to generate the bulk of the revenue from employee use, faculty and staff, academic and club use," said Yelnosky.

The property was only used roughly one-third of available days for the past two years. Low use and low rental fees combined with maintenance costs led to a $4,265 annual deficit.

However, almost 600 students, faculty and alumni signed a petition sponsored by Laughing Bush to keep the Lodge after a potential sale was announced last spring.

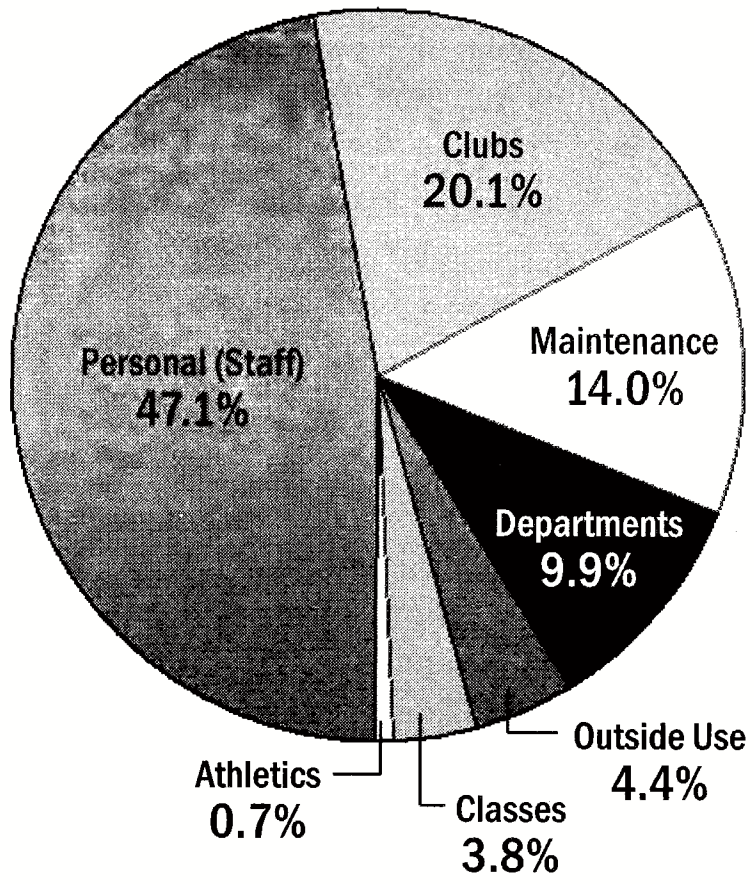
"We began to find people were really interested in the facility and had pretty good reasons to be interested in it," said President Tom Kepple.

And overall, the committee hopes to increase awareness of the facility.

"When I was a student here, I didn't know it existed until the last semester of my junior year. I do think it is a little hidden secret of Juniata. There's not a lot of people who know about it, and I hope it gets some exposure," said McLaughlin.

"We're going to emphasize it at orientation as part of the communications, both for students and for new hires. During campus tours, we're going to encourage that people mention this property as another part of the Juniata experience," said Yelnosky.

The committee will also establish a website that includes a virtual tour of the Lodge.



A gift from an anonymous alumnus will help renew the property. Minor upgrades include refurbishing the bathrooms, replacing kitchen appliances and refurnishing the main room and bedrooms.

Outside, new fire rings will be installed for the front and back of the Lodge. Badminton, volleyball and horseshoe sets will also be purchased.

Amenities like cable television may be added in the future. Other maintenance, such as treating exterior logs and painting the front porch, has been deferred for now.

The Patrick Lodge was donated to Juniata College in 1983 by Robert (an alumnus) and Mabel Patrick. And for now, it will continue to be part of the College.

"I think this is an institution that is willing to change direction if in fact there is reason to do that, and this is one great example," said Kepple.

Patrick Lodge Usage (past three years)

Habitat prepares for Zambia trip

continued from page 1

give participants a unique opportunity to become active partners with people of another culture."

Raising the requisite $3,000 per person was not an easy task. According to sophomore Todd Bokin, letter-writing was the primary form of fund raising.

The students were expected to raise the $3,000 individually with a little help from group fundraisers. The students wrote letters to family members, friends, co-workers, past employers and church sponsors to ask for donations. Group fundraisers such as clothing sales and a car wash raised roughly $400 for the group.

Although the students had been writing letters since November, a deadline in April had the group scrambling to find $1,100 each by April 5, to pay for the plane tickets. There was some leeway, but the if students did not have the money by the 5, then they generally could not go.

This was an unexpected shock to a lot of the students. "We realized that we should have put more effort into it sooner," said Bokin. The scramble for money and the high price of trip caused a couple of the members to drop out late.

According to Bokin, each student had different challenges to overcome when raising the money. Bokin, growing up in San Francisco, did not belong to a close community and has very small family that shared their finances.

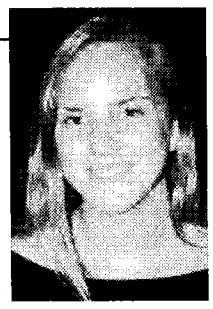
Bokin received some donations from family members but did not have many connections or a community to write letters to and draw money from. The rest of the cost had to be taken out of his pocket to cover the trip.

Other students, like Charlie Bowerman, had a larger pool of connections to draw from to help defray his costs.

According to Bokin, Michael Meadows also managed to raise a large amount of money, writing upwards of 80 letters. This was easier for Meadows due to his connections and large group of sponsors.

The trip cost is broken down to cover several needs. About $1,000 will cover the round trip ticket to Africa. $400 will cover the students' immunizations, to keep them safe from foreign diseases while volunteering abroad. Another $400 to $500 will pay for transportation while in Zambia and also cover food and shelter.

Habitat for Humanity requires a $500 donation, which is included in the original price. Roughly $500 dollars will be left for the student to use as leisure or emergency money.



The massive amount of work and sacrifice to bring the money together for each student is a perfect example of how dedicated these people are to helping the world around them. The students quickly overcame the $3,000 hurdle, and they will be on their way to Zambia only a few days after their last exams.

Apathy is Lethal

More able than we think

Mary Gardiner

Throughout this semester, I have tried to tackle issues that are present here on our little isolated campus. There are quite a few I didn't touch on, though. One issue slipped my brain until Dr. Barlow kindly brought it to the attention of the Juniatian staff.

Dr. Barlow has a very special advisee: Elisha Frye. Frye is a handicapped student who uses a wheelchair. Unfortunately, Dr. Barlow is on the third floor of Good Hall—an area inaccessible to handicapped students—which makes it quite difficult to arrange their advising meetings.

Instead, they meet in the lobby of von Liebig Science Center. She laughs as she tells me, "But, if we were in the office setting I think we would probably get more accomplished."

In order for Elisha to be able to go to class, the Registrar arranges that all of her classes in Good are on the first floor.

Elisha also has no access to Founder's Hall. When she needs to hand something into the Registrar, she calls from the Enrollment Center and they meet her outside.

"I don't want to start a fuss... They still provide all of the services they provide everyone else," she explained to me. "Everyone's so nice here."

Elisha explained that while the library is semi-accessible, she has no access to the upstairs and downstairs, as the elevator in the library is a freight elevator, and is intended to haul books, not people. She chuckled as she revealed that while she can use the library, if she has to go to the bathroom, she has to go to von Liebig.

But, she told me, "you get used to it."

While physical accessibility is important, it's more important that people understand where she's coming from. Elisha faces subtle difficulties all the time—like making sure there is a cut-out of the sidewalk where she is crossing the road—but most of all, she wants people to see her as Elisha.

The same afternoon, I got a call from Chris Westbrook, a student on campus known for his adorable seeing eye dog, Atlas, and for his amiability to fellow students on campus. Chris is blind, and enjoys the assistance that several students give him with everyday tasks. But if he hadn't introduced himself on the phone, I wouldn't have known he was handicapped.

He agreed with Elisha.

"I think accessibility isn't just physical accessibility, it's also the attitude that people have," he said.

Chris repeated how important it is for people to simply be friendly—even more important than elevators and physical assistance. "I just want people to see me as a normal person, and not the blind guy," he joked.

Chris is involved with the Campus Ministry on campus, and with Big Brothers/Big Sisters. He's studying Information Technology, as he wants to work in web development, especially with web accessibility.

"[Elisha and I] have some really good friends," he told me. "I think a lot of people are scared. They don't know what to say. They don't know that they can just say hello and start a conversation that way."

Both Chris and Elisha are remarkable people on campus whose daily experiences challenge more than most people ever even consider. Elisha, for instance, couldn't live in South because, though the first floor is accessible, the laundry is in the basement. She laughed as she thought of herself attempting to climb down the stairs with a bag of laundry.

Chris and Elisha, however, each enjoy their independence. "For somebody who likes to be independent, Juniata is a great place to be," said Chris. "Obviously, crossing Moore Street is something I like to be helped with, but otherwise, I like to be independent."

Whether or not accessibility is "readily achievable" as the Americans with Disabilities Act calls it, Chris and Elisha deserve something more important and valuable than physical and technological accessibility. They deserve the respect and friendship of all of us on campus. And our awareness. "So many people just don't think about it, you know?" said Chris.

On that note, I'll leave you, my fellow Juniatians, to a wonderfully conscious and active summer. Keep your eyes open, and your minds alert. Don't forget that *apathy is lethal.*

Note: In the April 7 issue, under "Moving moments at Juniata College," I neglected to thank Jen John in addition to all of the beautiful people who produced Paul Blore's play, "Shards of Porcelain & Skin." Jen, thank you as well, for all the work you had done on that show. You'll be missed.

Are the new sprinklers wasteful?

Is Halbritter contruction falling behind?

Presidential Perspective

"The new sprinkler system seems to water the sidewalks as much as it does the grounds. It was also operating during a rainstorm last week. Isn't this a waste of water? Are there any plans to change the sprinklers' aims so they hit mostly grass and to turn them off during rain?"

It was the first it was on this year and Facilities is adjusting the settings.

"Construction on Halbritter has been starting earlier in the day than last semester. Students in Cloister often wake up to the noise of construction as early as 6:30 a.m. now. Is construction falling behind schedule? Considering that a student residence hall is so close, couldn't the construction instead extend later into the afternoon, rather than waking up students so early in the morning?"

We apologize for the early work. We are working earlier to be sure the front is finished for graduation. I hope everyone understands the need to get the front of Halbritter as complete as possible.

President Kepple wants to hear from you! He uses his column to answer any college-related question from the campus community. Simply e-mail questions to juniatian@juniata.edu, and the editors will forward them anonymously to Dr. Kepple.

Letter to the Editor

Unsung heroes of theater

I want to thank The Juniatian for the attention it paid to my recent theatre productions, *Shards of Skin & Porcelain* and *Scatterbrain Sweetness.* The print publicity as well as the personal responses that I, along with the performers, have received has been very gratifying. I would like to point out, however, that while it is easy to congratulate the actors due to their high visibility, there are unsung heroes who worked behind the scenes.

As director, Brandi Martin took my script for *Shards* and gave it the presence and palpability to affect the audience as deeply as it did. Having never directed before, this is a marked accomplishment for Brandi, but she has pointed out to me that credit is also due to her stage manager, Gen John. To non-theatre types, stage manager is the most unnoticed position when it comes to producing theatre, but is really one of the most integral. As SM, Gen was alongside Brandi at every hour of every rehearsal, more than any actor, offering her insight into the material and keeping track of the nitty-gritty details that hold a piece together. Honestly, Gen played the role of an assistant director, and Brandi and I are both indebted to her for that.

Scatterbrain Sweetness was constructed nearly from scratch in about a month. While the ensemble cast helps to find material as well as act it out, it was my SM Haley Goodwin who helped me to unearth this piece the most. I also consider her an assistant director, being my sounding board for ideas and the eye for each run-through. Directing a piece in which you will also perform is extremely difficult, making Haley's outsider perspective invaluable.

Lastly, thanks to everybody who contributed in any way to the production of either piece.

Paul Blore
Class of 2005

The Juniatian congratulates its staff members who will graduate on May 14:

Carolyn Keller,
assistant editor in chief
&
staff writers Katie Charles,
Jasmine Frishkorn, Liz Houts,
Meredith Pink, Jeremy Simmons,
and Nathan Thompson

Students, faculty, staff, alumni: send your letters to juniatian@juniata.edu. We print all letters to the editor that are of interest to the campus community – in response to one of our articles or on a completely separate topic – so start typing! If you're lucky, we might even print a response. Please try to limit letters to about 300 words, and note that longer submissions may be edited due to available space. Opinions expressed on the commentary pages are not necessarily those of the Juniatian.

Letters to the Editor

Censorship: [expletive deleted]

I take pictures of naked women. I have for several years, and it's been lauded by some and at least liked by most. I've taken cast photographs for the Vagina Monologues for the past two years, and as a celebration of femininity, many of the photos are PG-rated artistic celebrations of their bodies. In the Student Art Exhibition that happened early in April, I submitted four of these photographs, two of which fit in the artistic nudes category of art, but alas, no one was able to see them. I was censored; those two were deemed "too provocative" by the coordinators of the exhibition. Wow, I'm glad I got that out there, but saying it shouldn't give me the feeling that I was a victim. So why does it? At Juniata College, students are expected to "Think, Act, Evolve," and students are told then to "Expect the Uncommon." Well I certainly didn't expect to see my thoughts and actions decried and censored. The campus is ruled on both sides, student and administration, by a small minority of personalities who present a charismatic, disciplined and adept grouping of people willing to champion many causes. Though liberally expressive, this minority is by-and-large conservative, and holds its vast sway over the campus in a very right-wing manner. What chance do the rest of us grunts have to mold the campus?

But this doesn't stop most students from talking. Student-run organizations hold diversity panels, speak out in chalk or via posters and generally try to make themselves heard; the dialogues continue. In a recent and well politicized debacle, All Class Night, the issue of censorship ran at the forefront of many people's minds. Hasn't ACN always been a scathing satire of the college and its personnel? I thought that was the point, to give students an opportunity to yell and stomp and scream. I'm not going to throw around such terms as "open social commentary" or "freedom of expression", but what the funk? From my freshman year I have seen more professors fellated and filleted on the stage of Oller Hall than I may have actually had in my undergraduate career. That's the point: Let people express even (and especially) if they cannot affect change.

Does the school need to 'Evolve' with the rest of the world in which we live and loosen its tie? Is the purpose of art to express or to conform? Does the administration need to grow up, or are we being told to give up?

Norman A. Krumenacker IV
Class of 2005

Response to JAB criticism

As the Chairwoman of the Juniata Activities Board (JAB), I feel that there are several things that I must address to the campus as a whole.

I would like to make it clear to everyone on this campus that JAB is a student organization, operated solely by students. I believe that there is a misconception that it is an organization managed by the administration. While our advisor is the director of student activities, students in JAB make and execute all of the decisions for our club. The Office of Student Activities is not JAB.

I also wish to address the criticism regarding the major concert. First of all, JAB did not blatantly ignore the student's choices for bands. It would be incredibly stupid and misogynistic to do so, considering the wringer of criticism that our club has been subject to as a result of the band choice. Professional performers are not available on a whim, and neither are the facilities here on campus. Juniata College is not a very conducive environment to events of this nature. The limited rooms and the limited dates place a difficult logistical situation in our hands, and we also have very limited funds. After we poll the campus we begin trying to schedule our number one choice. If that group is not available, we go to number two, and so on. This was the case this year, and it has always been the case in the past. JAB has reached the point where we must ask ourselves if this event is worth the cost. It seems that we are in a no win situation as we have received extensive criticism from the campus no matter what we do.

JAB does a lot for this campus. Many of you enjoyed the unique experience of Mountain Day, an event which necessitated our members to work 20 + hours a week in order to ensure a worry free day for the campus. Our club members spent the evening of Madrigal not able to fully enjoy the event themselves so that the campus could have a good time. It's the same for all of our other events; Friday Night Live, Coffeehouse, May Day, Springfest, Movies, Concerts, Travel and Special Event. All I ask is that the Juniata public thinks before whining and complaining, because it is our sweat that has given you the luxury to stand on your judgmental soapbox. Every time we put on an event it is for YOU and every time we preserve a tradition it is for YOU. Give the members of my club the respect and dignity they deserve.

Anyone interested in positive suggestions for JAB is welcome to attend our open meetings next semester on Tuesday nights at 8:00 PM in the Rockwell Seminar room.

Nicole Watson
JAB Chairwoman
Class of 2005

Springfest study break

Mud volleyball, picnic style lunch and club booths characterize Springfest, a favorite tradition. The event took place April 30 in the gym due to bad weather. Above right, Bobbi Wadud takes a moment to decide which color paint would look best on her picture frame; the activity was hosted by JIF. Bringing back memories of middle school sleepovers, the large-scale Twister competition (above left) started with many and ended with one.

Last show for seniors

Senior week sendoff for soon-to-be alums

Jasmine Frishkorn

As the academic year draws to a close, seniors face a packed schedule. The activities began on Tuesday May 3 with the Spring Awards Convocation. While students from all classes went to be recognized for academic achievements, seniors had another purpose.

"This was the first trial run for seniors to process in wearing caps and gowns," said Joanne Krugh, the Provost's secretary.

Seniors must now remember that patience is a virtue as they await the next opportunity to wear their caps and gowns. With finals concluding on Wednesday, May 11, the much-anticipated senior week is scheduled to begin.

"This is what it comes down to, years of balancing work with partying are out the window, at least for a week," said senior Jacob Warner.

Senior class officers, President Drew Waligora, Vice-president Kelsey Eichlin, Treasurer Ben Beas, and Secretary Betsy Kusniez planned the senior week events.

The activities will begin on Wednesday, May 11, at 7:00 p.m. with a picnic on the TnT patio featuring live entertainment and drinking for anyone over 21. The event will set a relaxing mood for seniors to enjoy each other's company.

Barwalk will begin at noon on the following day. Ellie May's, Boxers, the Brass Rail, Friendly's, Jay's, Johnny's and Matt's are the participating bars on the list. Sign-ups will begin on Monday, May 9 and anyone over 21 is welcome to join seniors in celebrating the end of their stay at Juniata.

"Our class is one of the closest and I can't wait to spend time with everyone during senior week activities," said Waligora.

Moving on to Friday, May 13, seniors will wake up for 10:00 a.m. commencement rehearsal in the Intramural Gym. Following rehearsal, President and Mrs. Kepple invite seniors and their families to a graduation luncheon in Baker Refectory.

Seniors will then have the afternoon to relax and re-coup from the previous day's activities before opting to head to Altoona for a baseball game. The Altoona Curve will play the New Hampshire Fisher Cats at 6:35 p.m. Students can order tickets in advance and transportation will be provided.

Senior class officers explained that the game was a way to keep the mood low-key the night before graduation. It provides seniors with one last opportunity to spend time with friends and simply have a good time.

Finally, Saturday, May 14 is the day seniors have been counting down to for four years: graduation. The day officially begins at 10:00 a.m. in Kennedy Memorial Gym with a Baccalaureate service.

"It's a nice ceremony and tickets are not required to attend this all-faith service," said Krugh.

Following the Baccalaureate service there will be a buffet luncheon offered in Baker Refectory. These luncheons are free for graduates, but families and friends must buy tickets.

The Commencement Ceremony will begin at 2:00 p.m. on Oller Lawn, weather permitting. Tickets are not required if the ceremony is outside. The rain location is Kennedy Memorial Gym where seating is limited to 3 tickets per graduate.

In the event of rain, those persons without tickets for the Commencement Ceremony can sit in A100, in Brumbaugh Academic Center, where the ceremony may be viewed by closed circuit television.

There has been some concern among seniors about the construction of Oller and how it will look for graduation.

"The façade of Oller is expected to be finished, and we are looking forward to a beautiful ceremony," said Krugh.

After the Commencement Ceremony, one last event is scheduled. The faculty is hosting a reception for graduates and their families on Founders Lawn at 4:00 p.m. Refreshments will be offered as graduates say their farewells to friends and faculty.

As the last event finishes, graduates will prepare to head their separate directions but not without the memories of senior week and graduation.

"We've all been waiting four years to do this together; it will be one last fabulous memory," said Eichlin.

Wednesday May 11

Picnic TnT Patio starts at 7:00 p.m.

Thursday May 12

Barwalk at Noon

Friday May 13

Commencement Rehearsal at 10:00 a.m.
President's Luncheon at 11:00 a.m.
Altoona Curve Game at 6:35 p.m.

Saturday May 14

Baccalaureate Service at 10:00 a.m.
Commencement at 2:00 p.m.

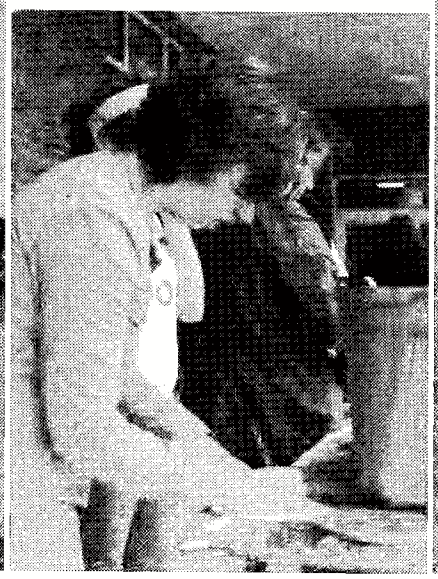
Earth and Folk Festival: Despite rain, a record t

Holly Brown

Despite the cold and rainy weather, the Conservation Club saw a huge turnout for its Earth and Folk Festival on Saturday, April 23. The club cites better advertising, word of mouth and the lure of baby animals as contributing to its success.

Conservation club holds the event to celebrate Earth Day, heighten awareness of pollution issues and provide a day of fun and entertainment for those on campus.

Club President Lauren Forster said the day serves many purposes.



"We're just trying to make the community aware. That's why we bring in environmental information and ways of living. It's also a fundraiser for environmentally friendly clubs, like the Geo club," she said.

Bad weather has been a staple of the Earth Day celebration for the past three years. This year's event was held in the TnT lounge, which was filled with people for the entire duration of the fest.

Attractions included local businesses, information tables from the PA Association for Sustainable Agriculture and the Sierra Club, a tie-dye station, a henna tattoo station and live musicians. Professor Larry Mutti, Assistant Dean Dan Cook-Huffman, and junior Brittany Barbera and sophomore Lisa Detweiler performed for the crowd.

Senior Beth Diesel, one organize of the event, said increased advertis ment and student buzz helped fuel th large attendance. The club alway

The Bookmarkables

Nathan Thompson

Here it is, my last column. The end of my rope and the hope that I might win the lottery and become Juniata's Van Wilder. If you've read my column regularly, thanks. However, I must give you some advice: now that The Bookmarkables will be leaving the Juniatian, feel free to get a life. I'm sure you can find better things to do next year. If not, the Random 11 will still be around [author's note: if my column is continued on another page, blame a vengeful layout editor].

These days I find myself thinking back to all those yesterdays that flew by. Like the time I stormed the Arch and got flung back through the air by some monster in a rugby shirt. And then there were those young, naïve days when I thought that Key Light was an acceptable beverage. As you can see, I've learned much. Freshmen: generic liquor is cheaper and healthier in the long run, and OJ comes on your meal plan.

With nostalgia on the brain, I would like to proudly announce that I have found a time machine. If you are a "Napolean Dynamite" fan (shame on you), no, you do not hook it up *there*. All you have to do is visit www.archive.org.

Archive.org houses the Internet Archive's Way-Back Machine. Using this program, you can access over 40 billion previous versions of web sites. Yes, I know. I'm living in denial.

While I may not be able to travel back to my freshman year, at least I can go back to the sites. Imagine once again trying to figure out the purpose of that circle thingy on Juniata's 2001 site. Even better, imagine going to students.juniata.edu without being shoved into the Arch. Heck, they even used to have links to the student pages. Good luck finding those anymore. See? This archive thing is pretty neat.

Of course, it does have useful features, as well. Say you need vital information, but run into a dead link. No fear, the archive will take you to the original webpage. You may be missing a picture or two, but the information will still be there.

Since 1996, Alexa Internet has been archiving sites on the Internet. It is currently posting sites with a six-month delay.

This may sound absurd, but I'm sure our nerdy great-great-grandchildren will appreciate it. The Internet Archive works with

Art Alliance colors the walls

"Corners: Art in Public Spaces"

Holly Brown

With the campus controversy surrounding the Native American statue and public art on campus, senior Sarah Kimmerle decided to investigate public art a step further. The result is Art Alliance's "Corners: Art in Public Spaces," an exhibit of student work placed throughout campus.

Nearly 25 pieces of student art – from prints to sculpture – were placed in buildings on campus. The works can be found in the Unity House, Kennedy Sports Center, BAC, von Liebig, Ellis and Good Hall. The show runs until May 5.

So far, the response from students and faculty has been nothing but positive.

"The whole time I was setting up in von Liebig many professors walked by and said 'We need more of this,'" said Kimmerle. "It's interesting to see how small, little things like hanging five photographs can improve a space. Large renovations aren't always needed."

A panel of faculty judges considered the works, eventually awarding junior Celina Isenberg's "Bamboo" first place in the show. Students can find Isenberg's sculpture in the lobby of von Liebig.

Runners-up were senior Norman Krumenacker and sophomore Mike Fisher.

For the exhibit, Kimmerle, a co-president of Art Alliance, worked with the club adviser and curator Dr. Nancy Siegel to collect and display the art.

Kimmerle also utilized an independent study to investigate the presence of public art on other campuses like Juniata. She then studied public art's practicality and looked for alternatives to the Native American statue. Finally, Kimmerle worked with Vice President of Advancement John Hille to form a plan to acquire and maintain art on campus.

"This project is one of my proposals to the administration of a temporary solution to encourage people to think about art and humanities on campus," said Kimmerle.

The "Corners" exhibit has been made part of Huntingdon County's Art Fest, which is hosted by the Chamber of Commerce. The exhibit will be on view until May 5.

rnout for Conservation Club celebration

ttempts to have events for students, he community and families. For the hildren, activities such as a storytell-ng circle and the farm animals were available.

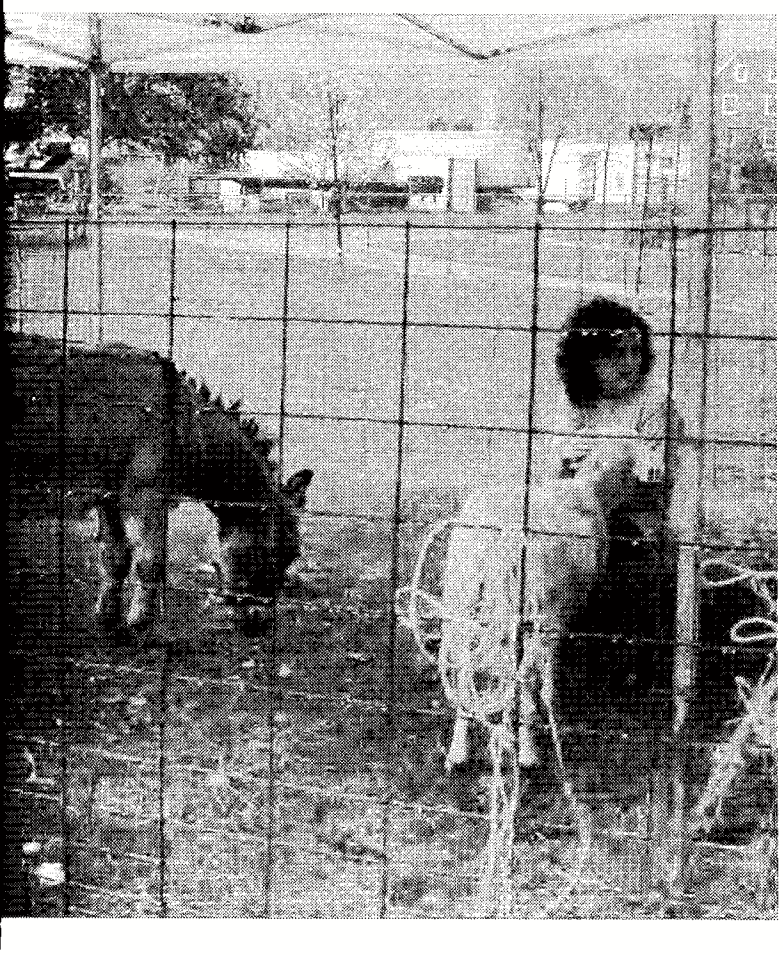
Farm animals drew students as well.

"I personally come for the baby animals," said junior Shannon Callahan.

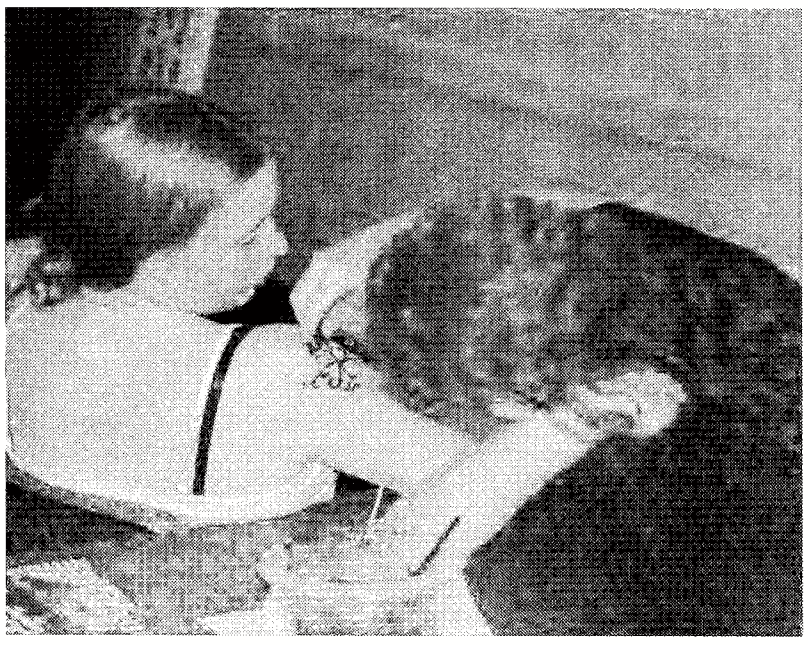
A new attraction this year was the presence of local businesses. Skip from downtown's Bric-a-Brac Cafe had a never-ending line extend from his table. He was joined by Iona Conner, the owner of an organic cotton clothes line based in Shadegap, PA.

"I love the activities," Conner said. "The people are very friendly and seem to be interested in what we're doing."

Conner's clothing line featured non-sweatshop clothes made almost exclusively in America.



Well over 100 people attended. The turnout was impressive for the work of just one club on campus.



"It was good to see that on a rainy day people still came out to have fun and support a good cause," said junior Joe Wills.

Forster hoped that people learned something while enjoying a good time.

"We started it in the hope to reach people and get them to recognize environmental issues. The official 'Earth Day' is April 22, but many environmentalists believe that having a set day defeats the purpose. You can celebrate the earth whenever you want," said Forster.

The Earth and Folk fest is the big event Conservation Club saves for every year, but they have many more projects in mind. For those interested in environmental issues, the club regularly cleans Petersburg Pike, and future plans include manufacturing biodiesel from Baker's fire grease, a weekend hiking trip on the Appalachian trail and renewing the battery recycling done on campus.

Even the animals braved the rain to celebrate the Earth Day at the Earth and Folk Festival held on Saturday April 23 (middle right). Keeping warm and dry inside Brittany Barbera and Lisa Detweiler entertain with their own creations and some old favorites (far left). Sarah Wicksnes bares a shoulder for a Henna tattoo (far right). Holly Brown fills out a comment sheet before attempting to make organic blue paper (middle left).

Eagles abroad: ¡Buen viaje, chavos!

Jay Trovato

Many of you brave Juniatian adventurers are now beginning serious preparations for a semester or year abroad. That's great! At the same time, leaving home and country for such a long time is a daunting proposition, one that I definitely could have handled better. Apart from the obvious passport, visa and plane ticket, here are some suggestions for making the transition between home and abroad.

First and foremost, don't leave any conflicts with people back home in mid-air. Trust me, you'll have plenty to think about while you're abroad, and you won't want to be worrying about problems or ambiguities brewing back home. The importance of resolving issues before you leave is especially important if you have a significant other. Discuss now how you're going to manage the time apart, or you'll go broke making international phone calls!

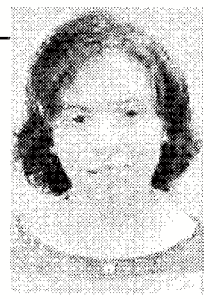
In regards to packing, there are two things I'd like to mention. First, please don't leave packing your suitcase until the day before you leave! That's one big mistake I made before coming to Mexico. Instead of spending my final hours in Pennsylvania relaxing with my family, I was frantically running around the house finding things I needed to throw in my luggage, and didn't get to bed until 2 a.m. – not good!

Second, don't bring anything you don't need – it will only weigh you down and clutter up your foreign living quarters. By the same token, don't neglect to bring anything you *do* need, the likes of which may be difficult or impossible to find in your host country.

Of course, the most important items can't be packed in your suitcase. One of them is knowledge about your host country. Learn as much about its history, economy and culture as you can before you get there. If the country speaks something other than English, preheat the language before you're totally immersed in it. Pack an open and active mind that is ready to absorb and process all that you are about to see, hear, smell, touch and taste. If you are a person of faith, spend time in prayer and soul-searching – your beliefs are sure to be challenged by your new experiences.

In the end though, don't overstress yourself in your preparations, because you really can't anticipate everything that study abroad will throw your way. In many cases, getting by comes down to improvisation and a healthy sense of humor.

No matter what country you go to, study abroad will be the crowning event of your Juniata liberal arts education. So *échale ganas ya* – GO!



Do something Mexican!: Stay informed on what's going on in the world. Mexicans are always reading newspapers and analytical magazines, which help them to be skeptical about their own less-than-honest government as well as happenings in other countries, especially the U.S. I always had trouble taking the time to read the newspaper at Juniata, but when I return I'm going to try to keep myself updated on world events, especially the ones that happen here in my beloved Mexico.

Movie Review: "The Interpreter"

Pollack is a mastermind

Holly Brown

Sydney Pollack's international thriller "The Interpreter" gets to be my last review. The movie was fabulous, and I am infinitely thankful to Pollack for his precise storytelling style.

Usually during political thrillers I'm always blissfully oblivious to the numerous names, companies and consortiums that come into play.

But for "The Interpreter," I cared enough to turn to my neighbor and ask, "Wait, is the guy in the suit the one from the beginning? Who was in that car with the other guy?"

My neighbor would then turn to me with that *look*, and whisper "YES! Now eat some Lemonheads and shut up."

Pollack comes out of a long hiatus to direct "The Interpreter," set inside the halls of the United Nations building in New York. With "The Interpreter," Pollack flexes his muscle and shows his ability to create an exciting, touching, wonderfully balanced film.

The story surrounds events unfolding at the UN when African-born UN interpreter Silvia Broome (Kidman) overhears a secret conversation in the Ku language—a language created for the film. It appears an assassination plot is underway, and the plot threatens to change Africa's political environment. FBI agent Tobin Keller (Penn) is assigned to the case and must question whether Broome can be trusted.

In many movies, the star power is there for just that: power. Big names bring in box office profits. However, in Pollack's film, we get to see stars Kidman and Penn show their formidable abilities for subtlety and depth.

At first glance, the characters of Broome and Keller are not extraordinary. They are relatively normal people who get caught up in a large situation.

But Penn and Kidman are stars for a reason. The changes they make in their expressions and their movements speak volumes.

It's easy to forget how charming Sean Penn can be—until you see him on screen. Here, he is tough, caring and grieving all at the same time, yet manages not to wear it on his sleeve.

Pollack was able to reach beneath the surface to call up otherwise hidden emotions. The relationship that develops between Broome and Keller is subtle and quiet. Sometimes a look or a hug can be the most romantic gesture in a movie.

The movie travels at a perfect pace. Pollack never goes over the edge to contrive a plot device or force an emotion from his characters. When a scare is needed, it serves its purpose, and then the story moves on. When the international politics start to get too heavy and confusing, the film switches back to character development.

When I left, I was greatly surprised to find we had been in the theater for two hours. I gladly would have sat through more.

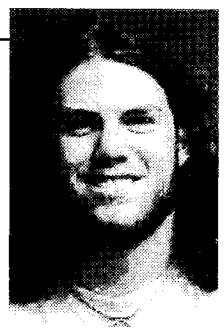
"The Interpreter" is the perfect smart thriller, and I would recommend it to anyone. But be sure to bring some Lemonheads, just in case.

The Bookmarkables

continued from page 9

the Library of Congress and the Smithsonian. *They* seem to find the preservation of pointless web sites an important cause, just like the starving masses who have never used the Internet. But hey, who am I to judge what the importance of the infamous Juniata.com will be hundreds of years from now?

The Internet Archive is also establishing book, audio and video archives. In a sense, it is trying to preserve the cultural heritage we don't care about. Is this also a great cause? Probably, but its true appreciation is decades away.



This isn't the most interesting Bookmarkable on the Internet, but it houses past versions of the most interesting sites. Indulge your memories, laugh at the Y2K scare, or pull up a recent alum's student page. You never know what you'll find in the cyberspace of yesterday.

And, many years from now, if you find a skeleton sitting in front of the Fall 2001 Juniata web page with his finger on the F5 key, you'll realize that the Real World isn't as scary as I say it is. It's far worse. May God save your sorry souls—er, um, good luck in the future.

Ode to music and Joyce

Jacob S. Warner

It's been one hell of a ride rounding corners at breakneck speeds plowing straight through cliché roadblocks no time to stop and hit the breaks like a runaway train keep running til I run out of track no looking back stop off at a bar down a pint and listen to the box juke its way out of the corner what's that the Woodbox Gang didn't I do a review of them maybe you read it maybe not important thing is that you're hear now and I'm sitting staring wondering how to fill up the blank screen just one more time sitting and then it's gone the chair the table I've got no laptop the room spins out of control I'm backstage with The Grateful Dead circa 1973 house lights down the crowd erupts like lava oh man they started with Fire on the Mountain and Dan Aykroyd is riding a flying burrito like it's his getaway horse took the money and ran Steve Miller would have been proud all the way to Mexico like Kesey you can only keep a great mind in a foreign country for so long and they're bound to come back at you full force drink some Kool-Aid and the world looks different open the synapses to the groove John Scofield elation twists and turns upsideoutinsidedown and all around spinning like a top in the fingers of a Big Head toddler and the Monsters power cords and jubilant jams is what it's all about spread toes open to mud and water clay creations like Genesis but only if you believe what you want don't take my word for it this was once a democracy but things have changed like Dylan said seem to think he had a different vision quest for knowledge the age of Aquarius might have grown up moved out temperamental teenager of the times it repeats itself historians say books up their nose better than a dollar Bill on the sax signs of the times they are a movin' new age hippies dance in skirts and tie dye comes back around in the strangest of places you get shown the light new wave or is it Particle full moon shining sittin' on the porch sippin' a mason jar Recipe for a good night stretch into a good morning like Arlo said riding on a train named after the jazziest city in the states haulin' mail bags and burning coal not Wood like Medeski and Martin late-night cosmic travel midnight rider flyin' like Jefferson said Allman are created Brothers sit and watch the globe spin with each push time travel world travel globe trekker trend setter you're not short you stand Jethro Tull reach the stars with the blink of an eye Miles don't seem like anything when you're riding a steam Coltrane with Thelonious wearing the orange robe like Monk clouds give way to sun and CCR stops singing change pace cause sometimes all you want is picante New York San Francisco London Prague city on the map follow a red winding road and dream of yellow bricks and mortar brothers and sisters sons and daughters over the hill you'll find your rainbow on the shelf between Cuckoo's Nest and Ulysses find your own bit of streaming madness sit back in front of a stream and let your mind flow

I am honored to have had the chance to bring music to you all over the past year. I thank everyone for reading, listening and most importantly, for indulging me. Happy trails.

The Icarus Line: This is a rock n' roll takeover

Jonathan Moody

Chaotic. Rebellious. Filthy. The Icarus Line's new album, "Penance Soiree," is the soundtrack for the unruly, for the disobedient, for those that do it their way. With every grumbled riff, with every angst-driven lyric, this album throws you back to the days when rock n' roll meant attitude, powerful live shows, debauchery and of course, the sex and the drugs. With influences from some of the most controversial and influential bands ever to take the stage, these rockers encompass everything that rock n' roll stood for in its heyday. Read carefully: Take one serving of Nirvana, one serving of Smashing Pumpkins, a small cup of Soundgarden and a dash of Guns N' Roses. Mix. Stir until ingredients blend completely and perfectly.

With such a history, it is no wonder that The Icarus Line plays such lewd and gritty garage rock. Lead singer Joe Cardamone and guitarist Alvin DeGuzman, who met while attending a local Catholic school in Los Angeles, decided to form the their first band, Blend, after listening to "Appetite for Destruction" by Guns N' Roses. The first song they played was a cover of "Lithium" by Nirvana. After countless self-released demos and roster changes, The Icarus Line officially formed in 1998 from the ashes of Cardamone's previous band, the Kankersores.

After only one full-length album, The Icarus Line released "Penance Soiree" in the summer of 2004. It met with a hail of critical and public acclaim, which is impressive for a band with such a venomous, take-no-prisoners sound. The praise can be credited to the band members' considerable talent in each respective area.

On the bass, Don Devore decides that he is going to keep you on the edge of your seat, and sanity, with his unorthodox time-signatures. "Up Against the Wall" is just the right song to introduce The Icarus Line, with Devore's bass-line carefully wrapping itself around your neck and pulling you in.

DeGuzman, the guitarist, punishes the six-stringer with a frantic frenzy and really steals the show on "Kiss Like Lizards" with his wild and untamed riffs. Epileptics beware!

Cardamone, a very capable lyricist, has written an abundance of memorable lines. Every phrase he spits out comes at you with a ferocious intensity straight from the heart. You can feel the anxiety in each word. With a vibrant enthusiasm he exclaims, "Devil got my brain/All narrow escapes/Don't want to feel her hands again," as the muffled guitar riff chugs up and down, augmenting his beautifully grainy vocals.

However, despite strong diversity throughout the album, several of the songs just do not click. The song "Spit On It" starts off with Cardamone uncharacteristically spouting incoherent gibberish, then turns to utter anarchy when DeGuzman lets off a devastating riff that slices right through your ears. A few other songs fail because they feel too experimental with no direction. Despite a solid effort, "Penance Soiree" could have been better.

In closing, The Icarus Line's mix of grimy grunge and alternative rock won't appeal to everyone. Fans of the previously mentioned bands and true rockers should definitely take a gander. These inspired bad-boys play an uncommon form of rock that hasn't seen much acclaim since Nirvana. So get out those leather jackets and wrist cuffs, and rock on!

Standout Tracks: "Caviar," "On the Lash," "Up Against the Wall"
Lyrics Excerpt: "And I feel like something's always been wrong/ Love of life is hitting way too strong/ Maybe we were born too late/ Maybe we weren't born at all"

"When I planned my MSW, I planned on Temple".

"That's right"–Temple. With the convenience of a central PA location, small classes, full library resources, internet access and individualized attention, Temple University Harrisburg offered everything I needed to complete my Master of Social Work degree".

Baseball team primed for playoffs

Finish season on high note, winning last four conference games

Tommy McConnell

The more things change, the more they stay the same.

A season ago, the Juniata baseball team entered the playoffs as the number two seed behind Messiah College. Despite winning that conference title – and beating Messiah along the way – Juniata was still tabbed to fall second to Messiah in the preseason rankings.

To repeat last season's championship, the Eagles will likely again have to go through Messiah. Juniata finished the season 15-6 in the conference (24-15 overall), good for second place behind Messiah.

"Having won last year, we know what it takes to win," Walt Goedkoop said. "It's nice having the same position because we know we can do it again."

Juniata ended the regular season in convincing fashion, knocking off conference opponent Susquehanna, 7-3 and 2-1, in a double header this past Saturday.

In the first game, Juniata used its trademark big inning to get the win. The offense erupted for five runs in the fourth inning, highlighted by Goedkoop's three-run triple. Troy Beaver and David Saintz also had RBIs in the inning.

"Baseball is a game of momentum swings," Goedkoop said. "You can see big things about to appear if leadoff guys get on, and the power in the lineup is coming up. Our team has capitalized all year when we've needed to, and we expect that big inning sometime in the game.

Beaver was also responsible for the first two runs of the game. His single in the third scored Darren Hake and Saintz.

Senior Paul Evans picked up his first win of the season by going the distance and allowing only two runs while striking out six.

We know what it takes to win again

- Walt Goedkoop, junior

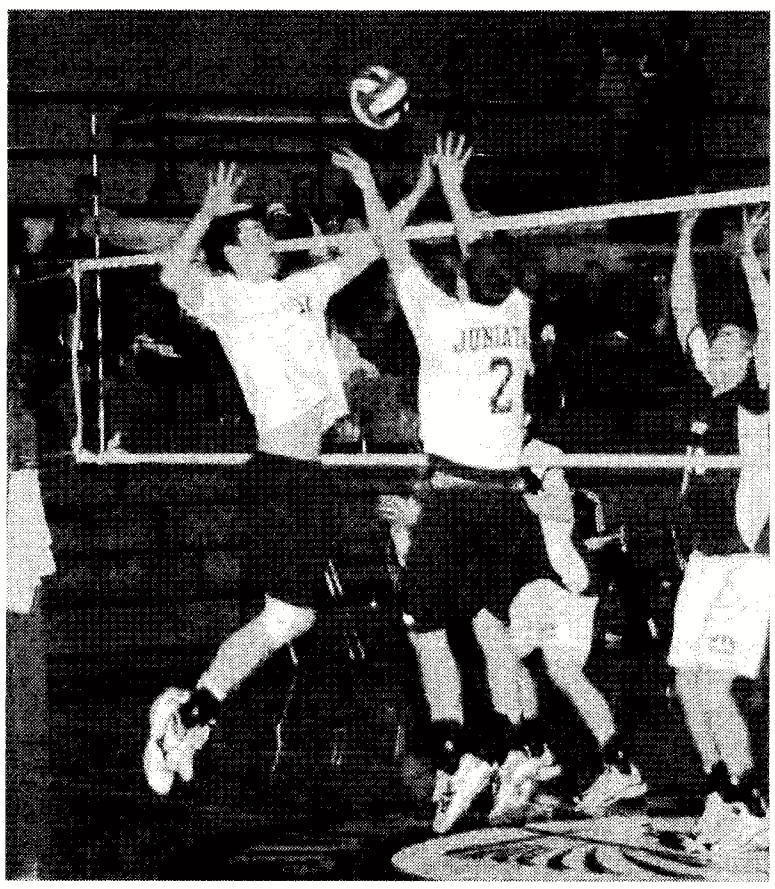
In game two, Beaver continued his hot hitting, delivering a bases-loaded single over a drawn-in infield in the final inning to score the go ahead run in Juniata's 3-2 win.

The win was the third in the row over Susquehanna. Juniata knocked the Crusaders off the day before in 11 innings on Will Russell's RBI triple, 3-2.

continued page 14

Goedkoop smashes school RBI record

Walk Goedkoop, Juniata's junior designated hitter, has made his mark on the Juniata record books.



In Juniata's 8-0 win over Widener on April 26, Goedkoop led off the fourth inning with a solo homerun, igniting a four-run inning for the Eagles. The homerun also gave him 43 RBIs for the season, a new school record. He would finish the game 3-for-3 with the homerun and a pair of doubles.

Goedkoop finished the regular season with 48 total RBI, the new benchmark for RBIs at Juniata College.

Last season's team MVP, Goedkoop may have had an even more impressive season this year. First, he gave up his first baseman duties to take over the DH role. Along with the position change, Goedkoop hit eight home runs, best in the Commonwealth Conference. He is slugging .610, good for third in the conference and is second in the conference in total bases with 75. All told, he is in the top ten in seven major offensive categories.

With the regular season over, Juniata is once again in the playoffs, with the path to the championship nearly identical to last season's. If Goedkoop keeps continues to hit the ball the way he has all season, it should make the road a little smoother to travel.

Men's volleyball season comes to close; Fourth 20-win season in school history

Hannah Rauterkus / Juniatian

Junior Cordt Withum unleashes his powerful spike after a good set up from freshman Zach Bock who found his stride early in the game.

Katie Charles

On April 23, the Juniata men's volleyball team qualified for the EIVA Division I semifinals for only the third time in program history with a 3-1 win over New York University. The Eagles moved on to play George Mason University on April 28, who ended Juniata's season in a hard-fought, five-game match.

Juniata finishes the season with a 20-8 record, only the fourth 20-win season in program history.

Cordt Withum

EIVA Division First Team All-Conference

Division III All-American

2005 Molten Invitational All-Tournament team

Kills (season): 231

Hitting % (season): .495

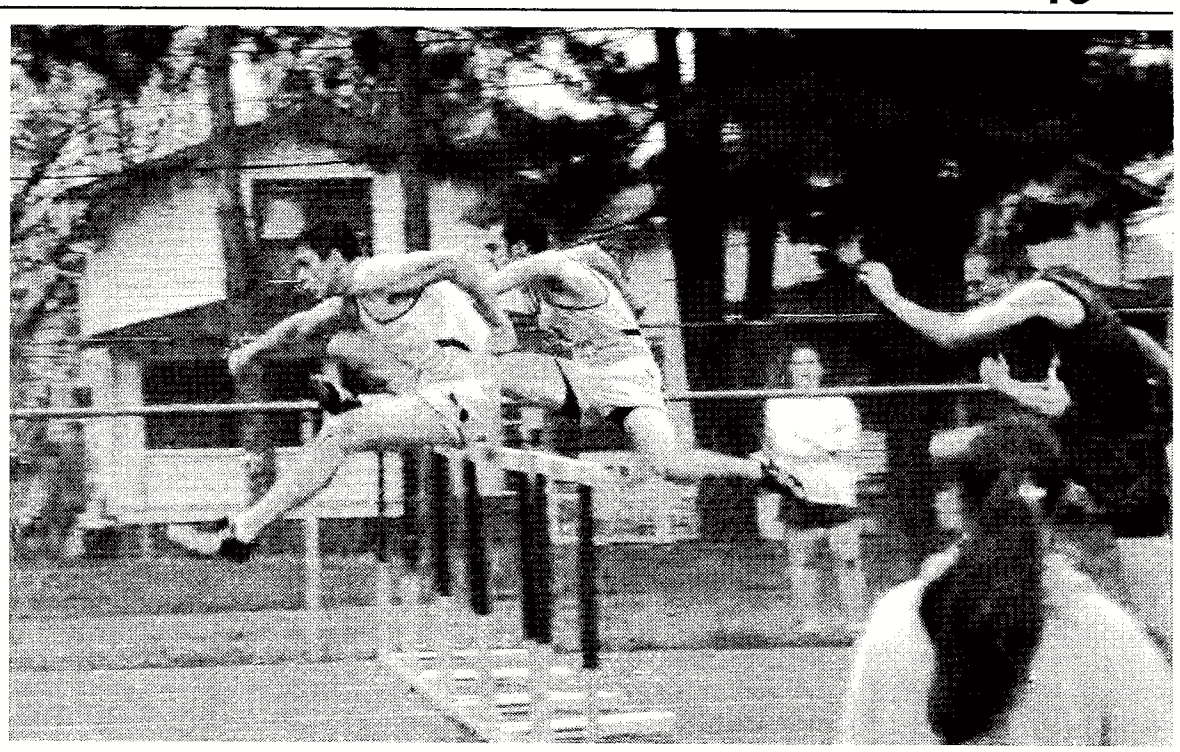
George Mason eliminated the Eagles, 30-28, 30-24, 27-30, 27-30 and 15-12 to advance to the finals. Head coach Ken Shibuya was proud of his team.

"They played their hearts out. We could have gone out in three, but after the break we just started to play better. They were fired up and ready to go," he said.

In the match, the outside hitters were once again the most prominent attackers. Ocasio led the Juniata attack with 18 kills while hitting .324. Bernardo chipped in 17 kills from the left antenna. Barndt led the middle-hitting attack with 12 kills. He also led the team in blocks with seven on the night. Senior Ricky Ziegler passed out 54 assists and brought up nine digs. Cole brought up nine digs as well for Juniata's defensive effort.

In the quarterfinals against NYU, the Eagles were led by freshman setter Zack Bock who, in only his third career start, dished out 58 assists and helped the team to a .452 hitting percentage on the match. Bock spread the NYU blockers by using his outside hitters, all of which reached double figures on kills. He added five blocks and six kills to his outstanding performance.

Defense was the key, as Juniata out blocked its opponents 10.5 to 5.0. Sophomore Jeremy Barndt led the blocking effort with six. Junior Tim Cole brought up 12 digs.



On the offensive end, the Eagles found stellar performances in junior Nick Bernardo and sophomore Nate Ocasio, who recorded 20 and 21 kills, respectively. Sophomore Glenn DeHaven was also in double figures with 13 kills, while attacking at a .619 percentage.

For the season, several Juniata players were honored as part of the EIVA Division I All-Conference teams. Senior setter Ricky Ziegler and junior middle hitter Cordt Withum were both honored as members of the first team, while sophomore Jeremy Barndt was named to the second team.

Ziegler was named to the first team for the second time in his career, only the third player in Juniata history to ever accomplish that feat. As well, Ziegler collected

continued page 14

Hannah Rauterkus / Juniatian

Freshman Kara George took on the pole vault in the afternoon event (top left). Senior Ben Beas and freshman Mark Modak make leaps and bounds over the hurdles (top right). Beas added two first place marks to his record. Junior Mike Vella and freshman Craig Pannone ran the 1500 with Vella taking the obvious lead throughout the race (bottom left). Freshman Tommy Beidman throws shot-put for Juniata during the April 30 Juniata Qualifier (bottom middle). Junior Maria Welch got a great running start for the long jump (bottom right).

Strong home showing for track and field

Corinne Barabas

On April 30, Juniata hosted a home meet against Gettysburg and Messiah College. Despite a rainy, gloomy day, the runners, jumpers and throwers turned in several tremendous performances and were cheered on by many loyal home fans.

Forty-one qualifiers in both track and field events from the Juniata track team will compete in the conference championship beginning this Thursday at Widener University.

As a last chance to qualify for the MAC meet, both the men and women dominated at Knox Stadium and put up exceptional showings in track and field events.

For the women, the throwers faired very well, with Debbie Delaney placing first in the discus and Jan Jennings close behind in second. Senior Kira Troutman sent the javelin 131 feet to claim first place in the event. For the sprinters, Meredith Troutman captured a first place finish in the 400 meter dash, and helped the 4 x 400 relay team cross the finish line first.

Elena Amato, freshman Kristen Felix and Nancy Hayes all earned second place finishes in the 400, 800 and 1500 meters, respectively. Freshman Cara Carpin also got a second place finish in the 100 meter hurdles.

For the men's side, there were many first place finishes. Randy Anderson won the 100 meter dash and Ben Beas was victorious in the 100 and 400 meter hurdles.

The home team provided many excellent finishes in the mid-distance and long distance events as well. Freshman Eric Hoover won the 800 meter dash, and Mike Vella and Justin Fritzius also captured the gold in the 1500 meter and 5000 meter races, respectively. Both the men's 4 x100 relay and 4 x 400 relay also won.

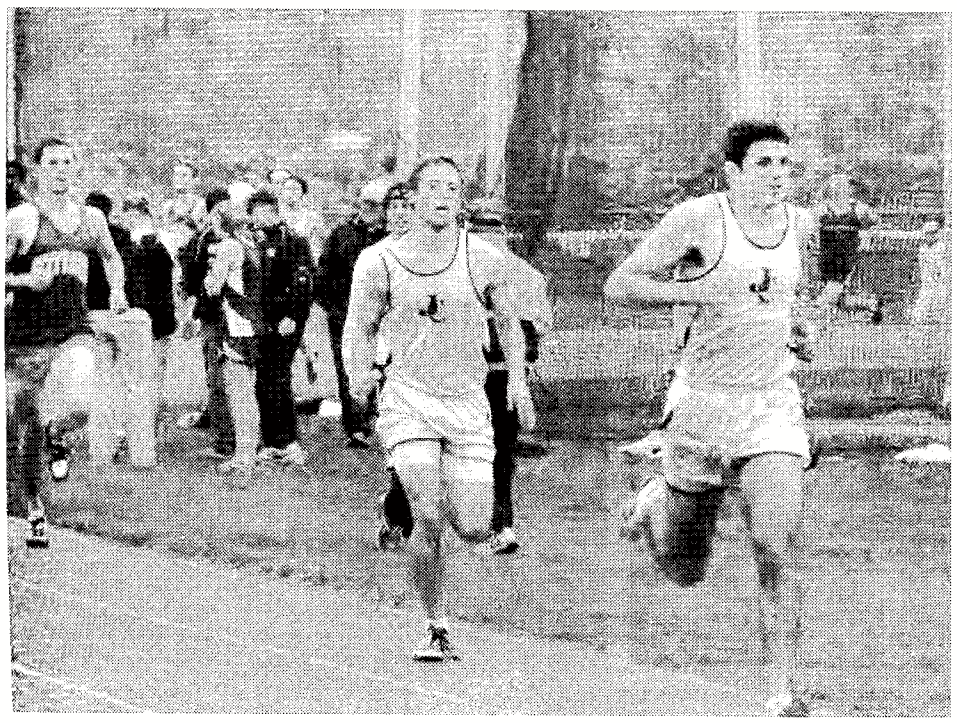
High jumper Adam Loser took first, clearing six feet and Gary Ondecko took a first in the triple jump. Shawn Miller captured a first in pole vault.

On April 23, the Eagles competed at Indiana University of Pennsylvania. There were many personal records set and respectable showings by Juniata athletes.

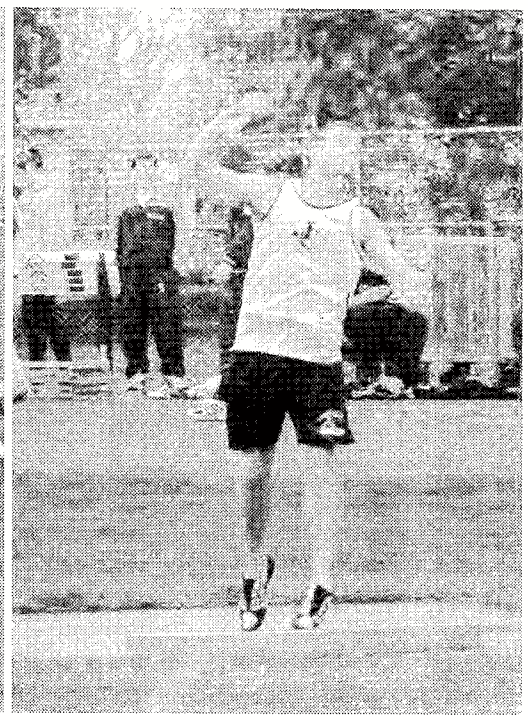
On the men's side, Randy Anderson snagged a first place finish in the 100 meter dash with Dusty Sier close behind. Sier also placed second in the 200 meter dash and assisted the 4 x 100 meter relay team in earning a second place. Mark Modak took sixth in the 110 meter hurdles and Eric Hoover captured eighth place in the 800 meter race.

Both Vella and Craig Pannone ran well in the 5000 meter event, placing third and fifth, respectively. Vella also had a good showing in the 1500, where he took third.

For the women, Sarah Bay cranked out a sixth place in the 3000 meter run and Cara Carpin took eleventh in the 100 meter hurdles. Nancy Hayes ran and jumped to a fifth place in the steeplechase.



On the field, in the shot put event, Debbie Delaney and Troutman captured eighth and ninth places. Delaney also took sixth in the discus. Kira Troutman won the javelin throw.



Meredith Troutman commented, "Overall the season has produced a great number of awesome individual efforts as well as strong team contributions. Coming off a strong outdoor season last year, injuries have plagued a great number of the athletes on both teams . . . that makes it tough to continually excel when the whole team cannot practice together as they should."

She also said, "This year the seniors are few, but definitely play major roles in the accomplishments of our team. Hopefully we will have a strong showing at the MAC meet this week at Widener, and will leave the season with more personal records, broken records and MAC champions."

Loser agreed. "There are a lot of strong competitors on the team," he said.

The Eagles are looking to stand on the podium at MACs in multiple events, with medals and a strong sense of accomplishment and pride.

Softball narrowly misses playoffs

Graduate just one senior; return strong core next season

Katie Laucks

The Juniata College softball team ended its season with a pair of losses to Commonwealth Conference opponent Susquehanna this past Saturday, 4-0 and 3-0. The Eagles finished 15-17-1 and 5-9 in the conference, one place out of the top four and a birth in the conference playoffs.

In the past several games, the Eagles had been riding strong pitching. But they couldn't find that spark Saturday. Junior Jess Darrow put out a good effort as she went 5 1/3 innings in game two and allowed just one run on two hits with a strikeout. Offensively, Allison D'Ambrosia and Jen Piston each had a hit apiece in the loss.

Prior to the season finale, Juniata played Moravian on the road, dropping the doubleheader, 3-0 and 8-1. The women hung in with the Greyhounds while freshman Kim Stoia went six innings, allowing just three runs on six hits and striking out one. Junior Abby Sener led Juniata's offensive attack, going 2-4, and freshman Kaleigh Driscoll went 2-2.

One of the team's goals was to break .500. That goal was reached as the team took down non-conference opponent Penn-State Altoona at home April 21. Strong play in the games came from Danielle Bruzin as she knocked out her first career home run in game one. In game two she added an RBI.

Once again strong pitching came from Kim Stoia, who earned her sixth victory in game one. She allowed just one run as the Eagles finished the game with six players notching at least one base hit. Renae Hobbs had an RBI double and Jen Piston added a double off her own in the win.

In game two, Juniata continued its strong hitting. Julie Hatfield had a RBI grounder, Allison D'Ambrosia had an RBI and Renae Hobbs went 2-3 at the plate.

In the women's second to last game, they had home field advantage as they stormed through Widener, 1-0 and 2-1. Pitching once again played a strong part in Juniata's wins. Stoia tossed in another great performance. She pitched all eight innings of the extra inning contest, striking out three and allowing just four hits.

While falling short of the playoffs, the young Eagles picked up valuable experience. "We had a brand new team this year, after five seniors graduated," head coach John Houck said.

The Eagles graduate just one senior, D'Ambrosia, and return the rest of their core players. As for the returning Eagles, they will begin to gear up for next year with the same positive attitude as they had this year.

"I'm looking forward to next year," said Coach Houck.

Hannah Rauterkus / Juniatian

Junior Marcie White makes the connection while teammates cheer for her in the background.

Primed for playoffs

continued from page 12

"It's always nice to go into the playoffs with confidence," Goedkoop said. "Winning some tight games at the end did nothing but help our team's mindset."

Prior to the Susquehanna series, the Eagles earned a home split with Widener. After dropping the first, Juniata bounced back to win the second game, 8-0. Goedkoop –who set a school record and led the conference this season with 48 RBIs (see insert on page 12) - again paced the offense, going 3-for-3 with three runs scored while Jason Enoch pitched a complete game shutout to earn the win.

Even though the Eagles dropped game one, they still allowed just three runs in the loss. In its last five conference games, Juniata has not allowed more than three runs, which bodes well heading into playoff baseball, where the scores are usually much lower and much closer.

"We're excited," Goedkoop said. "Winning last year was one of the greatest feelings. I think that most of the guys want to feel that again, so we just want to get out there and play."

Men's volleyball season comes to close

continued from page 12

the Division III Player of the Year honors this season.

For Withum, this is his first EIVA Division I recognition. He ranks first in Division III for attack percentage, hitting a smoldering .497 for the season. He was also named to the AVCA Division III All-America team and the Molten Division III All-Tournament team this season.

In his first season as a regular in the starting line-up, Barndt collected a few awards as well. In addition to his EIVA Division I All-Conference second team award, he was named as an AVCA Division III All-American this season.

The team will now begin preparations for next year. The prospects for the team look promising. Shibuya commented, "We will only get better. There are a lot of returning players."

For him, the key will be the development of this year's freshman class. With Ziegler graduating, Bock will be expected to step in and set for the team next season. The freshman class will be providing a great deal of depth, helping to make the program stronger.

Athlete off the Field

Katie Laucks

Young children often have the wildest aspirations for what they want to be when they grow up. It usually changes as they grow, but for this issue's athlete off the field, it never did.

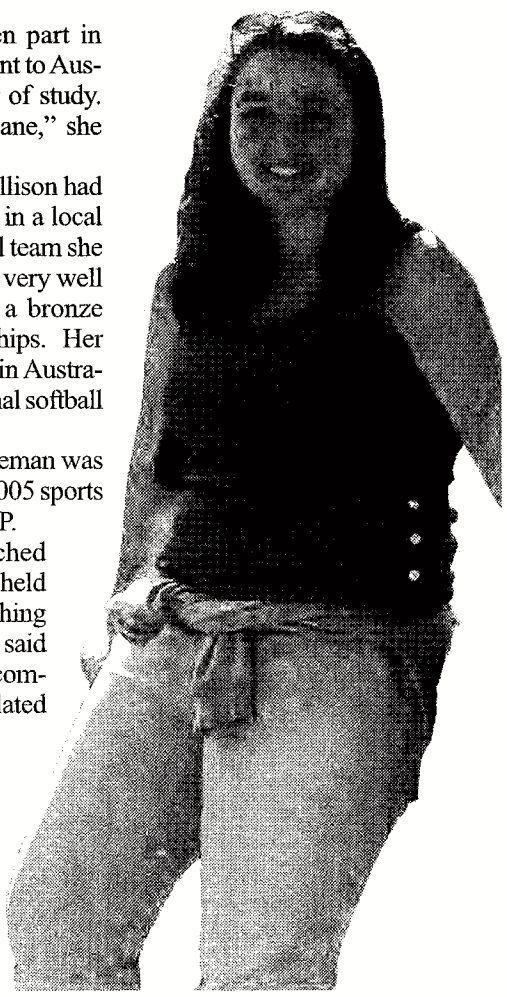
Senior softball standout Allison D'Ambrosia is making her childhood dreams come true. Allison's senior year is quickly wrapping up, and she will soon be doing something that she can hardly wait to do. After Allison graduates, she will put her Juniata education to work with animals, as she plans to work in a zoo.

Allison has been studying wildlife biology for the last four years. This summer she had an internship with the Philadelphia Zoo. This gave her the opportunity to work with primates, and she also became a reptile specialists while there. "It's like when you're little and you want to work at the zoo, that is what I want to do," she said.

Her experience in Philadelphia reaffirmed her longtime desire to work with animals. Once she graduates, she hopes she will continue to do that work in a zoo environment. Allison has applied for positions at the Denver Zoo and in the International Exotic Feline Sanctuary in Texas. She is currently waiting to hear from either one.

Until then, Allison is keeping busy with other student activities. Recently, she was inducted into Tri-Beta, the biology honor society. She is also a member ODK leadership honor society. Allison was also named to the All-Academic All-American team last year which is a nation-wide honor.

Allison has also taken part in studying abroad. She went to Australia for her junior year of study. "It was amazing, so insane," she said.



While she was there Allison had the chance to participate in a local softball league. The local team she played for went on to do very well in the league, winning a bronze medal in the championships. Her softball experience over in Australia spilled over into her final softball season here at Juniata.

The senior second baseman was recently honored at the 2005 sports banquet as the team MVP.

As her team approached season's end, the senior held to one final goal. "Finishing above .500 will be good," said Allison. The Eagles accomplished that feat (see related softball article).

As the lone senior, Allison will be missed once she graduates. "Allison is very intelligent. Her leadership will certainly be missed," head softball coach John Houck said.

With less than a week until graduation, Allison is anticipating a great future. But she will certainly look back and smile on her many wonderful experiences she has had here at Juniata College.

NFL Draft: Cards, Ravens Soar

Robb Patty

"With the first pick in the 2005 NFL Draft the 49ers select quarterback Alex Smith, Utah."

With these words from Commissioner Paul Tagliabu, the excitement of the 2005 draft was underway.

The next two picks addressed needs for new head coaches. With the second pick, Dolphin's head coach Nick Saban took Auburn running back Ronnie Brown. Brown is a big, strong, fast back that reminds Miami of another back they once had by the name of Ricky Williams. Though they do draw a lot of comparison, Brown's job will be to put the William's story to rest.

Cleveland's new coach Romeo Cornell needed a big playmaker on the offensive side of the football and he got that with the third pick, Michigan wide receiver Braylon Edwards.

As for the hometown teams, both the Steelers and the Eagles had late first round picks. The Steelers had pick number 30 while the Eagles followed at pick 31.

With its first pick Pittsburgh took the best tight end in the draft, Heath Miller out of Virginia. Miller is 6'5 and weights over 250 pounds. This gives Big Ben a nice target to throw the ball to over the middle of the field. Miller has outstanding hands for a big guy and the scouts rave about how crisply he runs routes.

The Eagles went for help on the defensive side of the football with their first pick and nabbed USC defensive tackle Mike Patterson. Patterson has great quickness and should fit in well in Philadelphia. This also gives the Eagles some much needed depth at the tackle position, as well as paving the way for the Eagles to trade an unhappy Corey Simon.

Staying in the NFC, the big winners in this years draft have to be the Arizona Cardinals, the Minnesota Vikings and the Dallas Cowboys.

The Cards improved their defense in the first round by taking Miami cornerback Antrel Rolle. Coach Dennis Green then came right back in the second round and drafted what many considered to be the fourth best back in this draft by taking J.J.Arrington from California. These two players are going to be instant starters for the Cardinals and are at positions that Arizona desperately needed to fill in this draft.

The Minnesota Vikings not only improved their team on draft day, but also during free agency as they signed free agent corner Fred Smoot as well as safety Darren Sharper to help a defense that was ranked 28th in the league in total defense. On draft day the Vikings had the 7th and 18th picks. Their first pick, wide receiver Troy Williamson from South Carolina, has speed and great hands and will be looked to as Daunte Culpepper's deep threat. Williamson is a receiver that can stretch the field and help the Vikings and their fans forget about Randy Moss. With their second choice in the second round Minnesota took defensive end Erasmus James. The Wisconsin standout is a great pass rusher and slipped due to injury concerns. Nonetheless, he provides speed on defense and that speed is accelerated since the Vikings play in a dome.

The Dallas Cowboys also had two first round picks and they went all defense. With the 11th and 20th picks Dallas took defensive end Demarcus Ware from Troy State and LSU pass rusher Marcus Spears. These two players will fit right in to Dallas' new 3-4 scheme and will provide size and speed on a defense that lacked both last season.

In the AFC both the Baltimore Ravens and the San Diego Chargers had impressive drafts, picking both for need as well as talent.

Having two first round picks, the Chargers decided to address needs on the defensive side of the football, taking Maryland defensive end Shawne Merriman with the 12th pick and defensive tackle Luis Castillo from Northwestern. Merriman brings speed and athleticism to Charger defenses that lacked a pass rusher last season. Castillo, who admitted to taking androstenedione, which is classified by the NFL as a steroid, was taken with the 28th pick. Apparently that didn't scare the Chargers away; Castillo should fit in nicely next to Merriman.

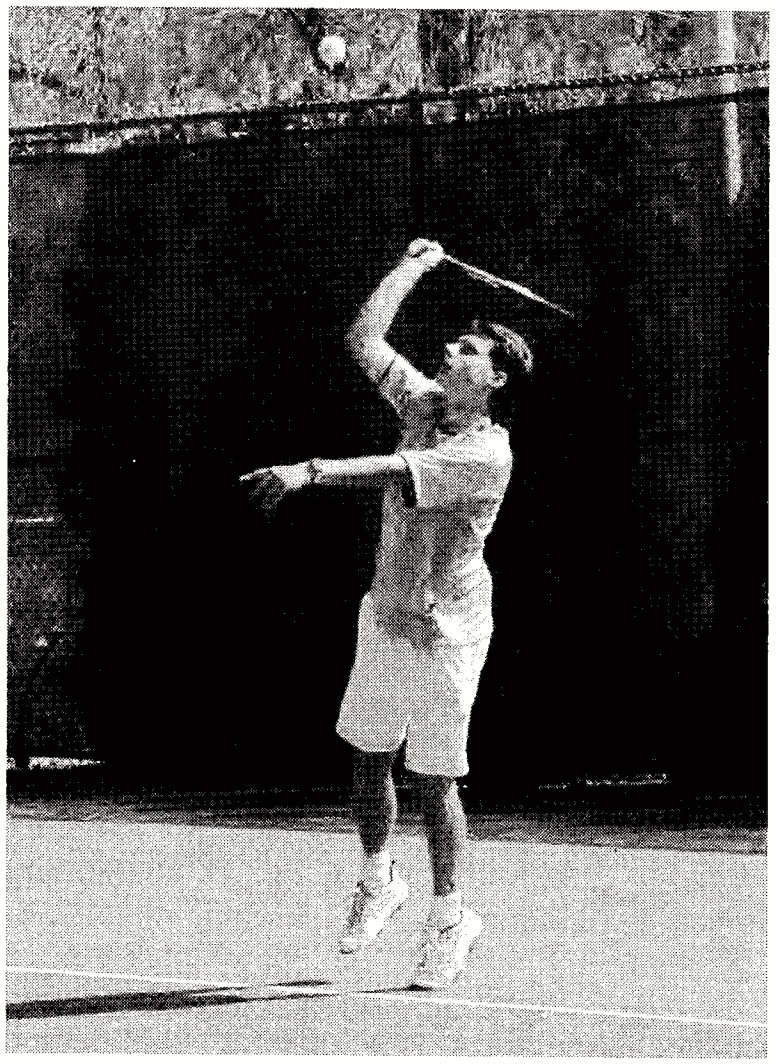
The Ravens had an obvious need on the offensive side of the football a wide receiver. They got a solid, polished one in Oklahoma's Mark Clayton. Clayton, though lacking elite size has everything else scouts look for in a first-round wide receiver prospect, including quickness, speed and reliable hands. This should help young Ravens quarterback Kyle Boller and will give him no more excuses for not being able to move the football.

The shocker of this year draft had to be the last pick of the first day at pick number 101, when the Denver Broncos selected running back from Ohio State Maurice Clarett. Clarett is best known for his battle with the Ohio State athletic department and trying to apply for early entry for the NFL draft. Clarett couldn't have went to a better system, however, as Denver head coach Mike Shanahan produces great running backs.

All in all, after so much pre-draft hype and speculation, this year's NFL draft was quite normal as there were very few trades made and no real shocking picks. Now most fans must wait until mini-camps, and preseason workouts to see if their teams' newest additions will equal success on the field.

The "Big Five" Awards

The following student-athletes were honored with one of the "Big Five" awards at the Ninth Annual Mailand McIlroy Athletic Awards Ceremony.



The Charles Bargenstock Award for Outstanding Woman Athlete – Carli Dale; senior; women's volleyball. The award recognizes an overall love of athletics and outstanding performance on the playing surface.

Stanford Mickle Award for Outstanding Male Athlete - Matt Garner; senior; football and baseball. The award recognizes overall athletic achievement and contribution.

The Carolyn Stambaugh Memorial Award – Rebecca Shoaf; senior; women's soccer. The award acknowledges strong leadership on the playing surface, solid academic credentials in the classroom and involvement within the campus community.

The William R. Smaltz Award - Paul Evans; senior; football and baseball. The award is given to a male athlete who displayed heart and perseverance in his endeavor.

The John E. Blood Memorial Award - Erin Wisor; senior; women's volleyball. The award is presented to a senior student-athlete with one of the highest grade point averages and at least four varsity letters who was a major contributor to the college community.

Hannah Rauterkus / Juniatian

Senior Romain Plessis joins the team against Lycoming for the last win of the season.

Men's tennis ends season at the MAC Championships

Looking to build on successful season

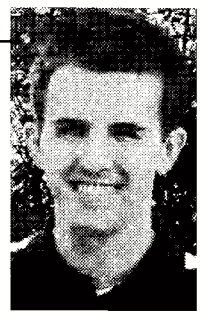
Jeremy Simmons

The Juniata men's tennis team finished its season at the MAC championship on May 1. The Eagles finished their season with an overall record of 6-5 and a 2-5 record in conference play.

The Eagles played well and several members of the team saw positive advancement in the tournament. Senior Dave Bullock made it to the semifinals for the third fleet of singles and junior Romain Plessis made it to the quarterfinals in the sixth fleet. In the doubles matches, sophomore Jon Cohen and junior Tom Nelson made it to the semifinals in the second fleet, while sophomore Brandon Long and freshman Brian Sykes suffered tough first round losses.

As a whole the team was pleased with its performance at the MAC championships. "Our gritty play and vocal support helped to get into the heads of the other teams, who just couldn't take our legendary ways," Bullock said.

Previously, on April 19, the team suffered a tough loss to Susquehanna at the regular season finale. The Eagles were bested by Susquehanna with a final score of 4-3.



Despite falling short of a Commonwealth Conference playoff bid, the team has shown great improvement this season. The 6-5 record doubles the program record for wins since men's tennis was reestablished as a varsity sport in 2002.

The team is now looking ahead to next year and plans to build upon this season's success. The Eagles will be losing both team captain Dave Bullock and Romain Plessis at the end of the year. However, the team has many younger players to step up and fill those spots. Neil Eicher will also be returning from Russia to further bolster the team's lineup next season.

After the best season in recent history, the Eagles have plenty to build on for next season.

THE RANDOM ELEVEN

Matt Russell, the Beagle

JC social services: I asked my underage, sophomore friend where he was going last week, and he said to an RAC (Responsible Alcohol Choices) meeting. "When did that incident happen?" I asked. "Fall of my freshman year," he replied. Now THAT'S some effective intervention.

Students we should expel, part 5: I noticed a notice from Hal outside Baker saying that *further incidents* of throwing food will be referred to the Dean of Students. What is this, Kindergarten?

Students we should expel, part 6: The desperate, starving student who stole ten dollars in change out of my car. Tuition costs more than a small house and someone needs a handful of quarters that badly? Maybe he had a lot of laundry to do…

Useful renovations: Anyone else notice they removed the two old telephone booths from the upper floor of Ellis and did a mini-renovation to make a special cove for the copy machine? Aw, how cute.

Down and really, really Dirty: Before the rain, the Springfest "Down and Dirty" picnic was slated for the "Sodexho parking lot." That's the little lot with the really huge dumpster and delivery trucks, right? That sounds nice. Too bad we don't have four acres of open grassy fields near there…

Hitchhiker's Guide to the Galaxy: It's like the randomness of this column set in space. I recommend a viewing.

Bookstore scandal: I was in a Barnes and Noble parking lot a month ago with some friends, trying to decide what to do next that evening. This shady looking guy drives into a space near us with a woman in the passenger seat. He leaves the motor running, she exits the vehicle and gets into a nearby car, and they both drive away in different directions. I see only two possibilities: they're having a lusty affair, or they're Soviet secret agents.

Sober quote of the week: A friend of mine randomly turned to me and said, "You know what I wish I'd done in high school? Skipped more." Don't we all?

Dean got talent: From the reports I hear, I'd like to extend some kudos to the Dean for his rad moves at the talent show two weeks ago. I'll skip a punch line to stay out of trouble, heh.

Traditions assaulted: If I were to suggest Pig Roast be cancelled, that Mountain Day be turned into day of service, that students not burn candles to a religious song like Silent Night at Madrigal, and that All Class Night should be "changed drastically" next year… well, I'd probably be a social pariah. For the OSA though, I guess that's a successful year.

Stealthy sprinklers: As I looked on, a female student cut across Oller Lawn just as the sprinklers activated and she was soon running through a shower of water. Likewise, one of our editors was crossing the lawn carrying article drafts when the sprinklers attacked, dampening both him and the drafts. Personally, I think that's their faults and the sprinklers are already too predictable. What we really need are for them to pop up at random intervals between classes for maximum effect. Hilarity would ensue.

I came to JC with IT (almost CS) as my POE, lived in TNT, and had class in BSC. Got a job in TLT (part of TSC, which is part of CTS, which includes CNS, and BTW we supported NSO). Got e-mail from HOSA, AWOL, SIM, FCA, FTP, and LIM (and JIF about the ECEC in the building next to VLCS). I was in the QRS, put ECTA classes in my SE, took QM and IA, figured out my FISHN, listened to WKVR, signed up for an INS and a CBE, couldn't pick up my portfolio from CWS because of FERPA, got inducted into PAT, and went abroad through BCA and CIE. This year I saw some PACS students in PAX-O try to play the JCPD and block us from our R&R in Baker and watched JAB and OSA make a SNAFU with Pat McGee. Last weekend I ate in the IM Gym in KS+R but now I need to watch my GPA or I'll be SOL and have to take a class from ABE to start a business with JCEL. LOL! TTYL.

See, there's this gap under my column now. Since I'm also the design editor, I guess it's doubly my fault that it's here... but it's that time of the semester and I'm really behind in my class work. So... uh... if you could just take some notes in this blanks space or something, I'd appreciate it. Thanks.

Collegiate Dementia

Embrace that inner pretty boy!

Carolyn Keller

So, this is it. Goodbye, senior year. We all go a little mad sometimes, and three years of "Dementia" ain't bad.

So, as my last hurrah, I'm slinging a little cinematic insanity your way. For my last column, this movie geek's got a movies-as-metaphor analogy for you.

We're all Orlando Bloom.

Stay with me; there's method to my madness, and some backstory is in order.

Last weekend I saw "The Interpreter." And it was good! Intelligent, solid not-quite-summer fare. I can't speak for the film's political accuracy, but when it comes to the Movie Caste System, this one's got "upper class" written all over it, thanks largely to its A-list cast and director Sidney Pollack.

Keep that in mind. Quality stars like Penn and Kidman will rarely fail you.

But the previews for upcoming films were another story. Most of the movies advertised look singularly awful. With names like "Must Love Dogs," "Red Eye" and "Flight Plan," you gotta wonder: what were the writers thinking?

The premises were terrible. A typical stupid girl in a typically stupid romantic comedy. A bad Wes Craven flick that promises to make you "Scream" for all the wrong reasons. And Jodie Foster going bonkers on an airplane.

But… *Jodie Foster*. And "Must Love Dogs" looks horrid…but stars schlumpy funnyman John Cusack as the romantic lead. Can you ever go wrong with Cusack as a romantic lead?

That's rhetorical. But if you need prove his worth, watch "High Fidelity."

Still here? Drumroll, please.

Then there was the trailer I'd been waiting for. The film? "Kingdom of Heaven." Why? They shot it in Sevilla, my third home, a month after I left. On May 6, I'm going to re-visit Spain vicariously through this Crusades epic…and I can't wait. Directed by Ridley Scott, it stars Liam Neeson, Jeremy Irons, Edward Norton, and as its lead…Orlando Bloom.

Riight. I know what you're thinking, and it's all right. I'm thinking it too. The pretty boy's mug is unsurpassable when it comes to metrosexual hotness—metrosexual being a polite word for "feminine," or: "girlier than three teenyboppers on a squee-fest."

But can he act? Ay, there's the rub. Because this time, it's going to matter.

To be fair, it looks like Orlando's gone and grown some facial hair for this one. And it might even be real!

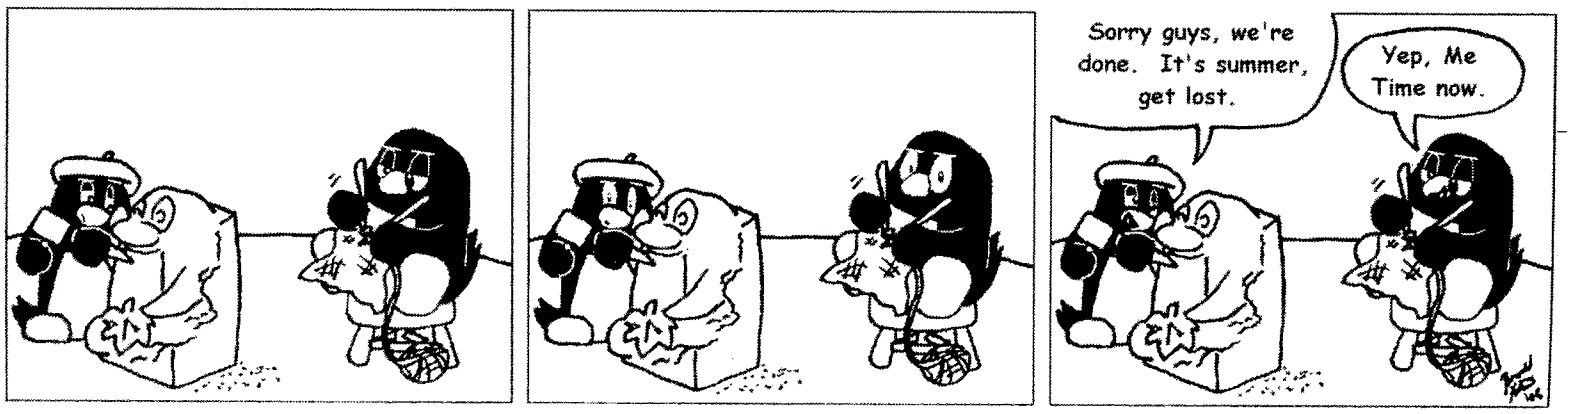
But…look at the names. Look at who he's surrounded himself with. They're top notch.

Which brings me to my point.

We're all Orlando Bloom. Right now, seniors, right this second, we're a bunch of kids about to head out to the wild blue yonder, with naught but a fistful of years to back us up. What to do, right?

My answer? If you're in over your head, if you want to learn, and if you want to prove yourself…wax Orlando—and not his face. Surround yourself with good people. Wrap the Irons, and the Neesons, and the Nortons in a big bear hug, or just see if they'll let you tread on their coattails for awhile.

Because then, someday, if and when the world's crap and not at all what you've cracked it up to be, you can lift it on your shoulders, and be the breath of fresh air that makes a jaded film geek sit up and take notice—or at least think twice. You'll carry your world, come hell or high water. Like Cusack and Foster…or perhaps more successfully, like Penn and Kidman.



And hopefully, one day, that world you're carrying will be not only "The Interpreter" but maybe even a "Casablanca."

Here's lookin' at you, kid.

May you all go a little mad sometimes too.

The Rookery

JUNIATIAN

HUNTINGDON, PENNSYLVANIA

SEPTEMBER 22, 2005 | JUNIATA COLLEGE | VOLUME 87, ISSUE 1

GOOD NEIGHBORS?

Initiative reaches out to the community

Sarah Anne Wharton

Many people come to Juniata for its close-knit community appeal. The small campus fosters a feeling of openness and sociability. People are nice, professors are called by their first names, everybody knows most everybody else and they smile when you see them.

But does this friendly attitude spill into Huntingdon and the community beyond?

This year began the Good Neighbor Initiative, a program made to promote better relationships between off-campus students and their neighbors.

Recently, instances of clashes between off-campus students and community members have escalated. "Last spring in particular there were a few ugly incidents in town that involved students," said Dean of Students Kris Clarkson.

The opinion line in the Huntingdon Daily News roared as angry community members fumed about missing signs, trashed furniture, noise pollution and rowdy Juniata students on the streets. One student, driving under the influence, crashed his car into a house. These high-press incidents made both the borough and Juniata administration take notice.

"The best defense is a good offense," said Clarkson. "We thought, 'how can we make it better?'"

Now Juniata is really trying to make the Huntingdon residents members of *its* community, especially because Juniata College is growing.

On the back of Clarkson's office door hangs a map of Huntingdon that is covered in little blue and red houses that mark where off-campus students live. That number is up to roughly 180 students, 20 more than last year.

"There are more students and more students living off-campus," said Clarkson. This means that more students are living in neigh-

Holly Brown / Juniatian

Students and neighbors alike enjoyed picnics at 17th and Mifflin and the Alfarata building in the new Good Neighbors Initiative held September 3. A crafting table was available for all the participants.

Juniata: helping Katrina victims

Jessica Ocampo

The Juniata community has responded to the urgent need of Hurricane Katrina victims. While many have given, things have only just begun.

Shuana Morin, Service Learning Coordinator, organized a committee of students to help the hurricane victims. Community Services collected $300 at Juniata's first football game. They are working closely with the Unity House and College Chaplain Dave Witkovsky.

"It is important to stay coordinated so we are not competing," said Witkovsky.

"Gifts of the Heart" kits are Morin's and Witkovsky's current project. The four types are health, school, kid and clean up kits. They are looking for help in assembling them. Full of essentials, the kits are an easy and effective way of helping families.

The Unity House has been involved with "Operation Rainbow," collecting items such as clothing, diapers and hygiene products.

Clubs such as men's and women's Rugby, PAX-O and Habitat for Humanity have started fundraising as well.

continued page 5

The storm hits home

With all this energy being flooded into the relief effort, it is important for the Juniata community to know it is making a difference. Lindsay Brunner, a sophomore, has a personal stake in the disaster.

Brunner's older brother Nicholas was evacuated from his new

J's Tavern just a "Memory"

J. Atkins

J's Tavern, a popular student bar for the last eight years, closed this past July. Concern over what the bar replacing J's will be like has been high around campus. Many students have heard that the new owners will not cater toward college students as past owners have, but college business will be welcome at the new establishment, which will open by the end of the semester.

Randy Lemin, a resident of the Huntingdon area, bought J's. Former owner J. Maierhoffer, feels that the new owner will be a fitting replacement for J's Tavern. But logically, the new bar will have its own look and feel.

Mike Powers, a Juniata junior and former bartender at J's, said that, "J. absolutely [targeted] college students…he wanted it to be a place where students felt welcome and safe."

Powers and other students indicated that the new bar will be called "Memories" and will open sometime in November.

Lemin is also said to have plans

Neverending march toward food

Holly Brown / Juniatian

Senior Sarah Wharton waits in the line for lunch in Baker, which extends across the street. Such scenes have been commonplace so far this year, prompting Security to repeatedly request the line wrap around the building instead of blocking traffic.

JAB concert: Live and learn

Students pleased with major concert choice

Jessica Ocampo

JAB has set out to regain the enthusiasm of Juniata students. With last year's concert controversy, JAB decided to do some things differently when planning this year's major event.

The biggest change was polling. "We wanted students to really have a choice this year," said JAB concert chair Ryan Conrad. The poll was conducted confidentially with 14 band choices. With the leading band hidden, there was no race to balance votes.

As a result, the #2 choice, Our Lady Peace, will play on November 15. JAB overlooked the #1 choice, Sum 41, because of its reputation.

"JAB heard from various sources (agents, other schools) that Sum 41 had a reputation of destroying the venues and the dressing rooms of the schools where they performed," said Conrad. "The second most popular band from the poll, Our Lady Peace, did not have this reputation and was nearly as popular among the students polled, so JAB made the decision to go with them."

Many students seem excited. "I've seen them in concert before, and they put on a really good show," said senior Shannon Callahan. Even the online forums, which usually host the harshest critics, are

continued page 10

Signs of Fall at Juniata

Holly Brown & Sarah Wharton / Juniatian

(Middle left and bottom): At this year's Storming of the Arch, Emergency Services and Saftety Club/Quick Response Service reported one concussion, two broken noses, two sets of stitches, one broken ankle and two broken wrists, in addition to various other less serious cuts and bruises. One person was transported to the hospital and at least five others went to JC Blair voluntarily. The injuries were all consistent with the event; however, in approximately the last three years, injuries had not surpassed bumps and bruises in severity.

At Lobsterfest numbers were also remarkably high, but in a much tamer affair. Over 80 student clubs and organizations manned tables at this year's event. (Top): Students represent the African American Student Alliance at a table along the brick walkway. (Middle right): A Sodexho employee serves up the main dish.

Computer registration leading to awareness

Security improved as problems decrease

Catherine DeCoursey

Network port upgrades have enabled new computer registration for all private computers on campus this fall. The registration requires that computers have updated anti-virus software and patches, and they must be virus free before accessing the network.

There were three major reasons that CTS looked into and installed this new registration program. The reasons were to increase campus awareness about the effects of viruses on computers, to create a safe environment for computers to run and to increase network up time.

Last year CTS would have to turn off network connections in whole buildings to prevent viruses from spreading onto the network.

According to Dave Fusco, Director of Technology Operations, "Many bystanders last year got hurt because CTS had no way to stop the spread of viruses." The new ports give CTS the ability to see each computer on the network and close individual ports before viruses can spread to other computers.

"The new registration had a very positive effect. There were few complaints and a lot of positive feedback," said Fusco. This year, the number of computers that needed help getting onto the network was approximately one tenth of what it was last year. IN 2004 it took six weeks to clean students' computers and put them on the network. This fall, it took less than two weeks.

Sophomore Tom Hartzell said, "This year's set up was harder, and definitely a bigger hassle. Even though I never got a virus last year, it's nice not to get kicked off the Internet anymore, so I guess the hassle is worth it in the long run."

CTS is hoping to run the registration process several times this year. Because the process requires that computers have updated anti-virus software and its patches, students may find that they will have to go through the process all over again after breaks. This will be done to ensure that viruses cannot enter the network after students who take their computers home and put them on a non-controlled network, return to campus.

"I think that having to re-register after breaks is a terrible idea," said sophomore Ken Tomlinson. "Once the computers are on the network for a little while, the anti-virus automatically updates itself as does Windows. I don't see why having everyone do it at once would be good idea."

CTS spent the weeks before students returned to campus working out the problems that occurred with the new registration. On move-in weekend, the whole CTS staff was on campus in anticipation of major problems; however, the problems never occurred.

The few major glitches the CTS staff did run into were mostly with older versions of Windows, such as Windows 95 and 98. According to Dave Fusco, CTS will soon be dropping support of those computers by the start of next year at the latest because there are no longer security patches for those models.

The number of students that needed help was one tenth of what it was last year

Registration was one of two major changes made by Campus Technology Services (CTS) this summer courtesy of President Kepple's Capital Equipment Fund for major projects. CTS added more network hubs to strengthen wireless signals in all dorms and academic buildings, along with adding wireless to the off campus apartments. The funding also allowed CTS to update all the ports for wired connections.

The new registration program came from the State University of New York (SUNY) which has used the program to help maintain its network.

Overall, the process was much cleaner than in the past. This program is one that students will most likely be seeing several more times this year and in the future.

Oregon Supreme Court justice visits Juniata

Constitution Week celebrates making of a miraculous document

John Narayan Parajuli

In the face of obstinance and frustration, a remarkable government developed and continues to endure. Former Oregon Supreme Court Justice Susan Leeson explained to the Juniata community that the United States' Constitution is a miraculous product of compromise that came out of the Philadelphia Constitutional convention – one that even the "godfather of the Constitution" James Madison thought was a wonder.

"The 55 [constitutional] delegates who met in Philadelphia in May 1787 had very little in common," said Leeson. Leeson spoke at Juniata's Constitution Week Celebration on September 12, telling the audience in Neff Lecture Hall that the line between America having and not having a constitution in the summer of 1787 was razor-thin.

"It was a close call," said Judge Leeson during her lecture, entitled, "Restoring Civic Debate: Compromises that Helped Make America."

. The delegates had radically opposing views divided between the proponents of nationalist government, like James Madison and Alexander Hamilton, and their opponents from smaller states.

The delegates from the smaller states were convinced that the bigger states had everything to win. As a result, Madison's 40 nationalist propositions were voted down repeatedly, including two of them which he believed were crucial to a strong nationalist government: a federal negative veto over the state legislature and proportional representation in the federal legislature.

Photo courtesy of Morgan Sample

Justice Susan Leeson, of Oregon, lectured Juniata community members on the compromises that created the U.S. Constitution during the Constitution Day activities.

The deliberation that lasted for over a month with deadlock after deadlock was not only frustrating but also equally demoralizing for Madison's dream of a strong nationalist government that would protect private rights while ensuring public good. But he stuck to his guns and found other ways of realizing his dream, said Leeson.

Though Madison's persistence was instrumental in hammering out the compromise document, there were other founding fathers who, despite being largely inactive in the whole deliberations, occasionally breathed life into the convention at crucial points.

"Benjamin Franklin, America's foremost diplomat, held his fire for when it was needed most," said Leeson. "He argued before the delegates that a government can either be based on reason or force; if we fail to do the former we will set a bad precedent."

George Washington played a unifying role through his neutral presence. "Washington's presence signified the integrity of the whole process," insisted Leeson.

"The unity was tenuously held," said Judge Leeson, "America [miraculously] pulls together in the time of crisis." she said.

Despite having radical differences on a gamut of issues ranging from moral to philosophical, the Constitutional convention was able to produce a remarkably enduring document that has remained intact for over two centuries.

The Juniatian interviews
Judge Leeson

Judge Susan Leeson is a former associate justice of the Oregon Supreme Court. She is among the only three female judges in the Oregon Supreme Court's history. Leeson also has several publications to her credit. Known for her nonpartisan stance and her interest in community mediation as an alternative to litigation, she spoke to Juniatian writer John Narayan Parajuli on different issues.

The public perception of law and lawyers isn't that positive. For some it's a bumbling circus where guilt and innocence is determined by the amount of cash one can spend.
If it's a public perception, then it's a public perception. There is nothing I can say to change it. But polls show that many people who have tryst with the law have faith in their lawyers. Much like the way we trust our physicians when we are sick. Half of the people who fight court-battles lose. Naturally they would have a dimmer view.

How did you get interested in law?
I have always cared about the law. I have grown as a citizen caring about the law. I was assigned to teach Constitutional law and political theory at my college and I thought I needed to know some practical aspects of the legal system. That's why I went to the law school.

You were the only woman judge in the Oregon Supreme Court during your tenure. Does that fact make any difference in your experience?
Intellectually gender makes no difference. Culturally it makes a huge difference. The culture of any group is affected by the make-up of its members. And being the only anything makes a difference.

How do you see the present make-up of the Federal Supreme Court?
The Supreme Court reflects to a great extent the president who has appointed the judges, or at least that's the president's hope. But people change when they are in office. A judge takes an oath to be neutral. That obligation plus the immensely difficult issues they confront means that we cannot predict in all instances how they are going to respond. And people change with experience. They learn so much as they go on.

What direction would the Supreme Court take if the appointment of John Roberts is confirmed by the Senate?
I don't think the addition of Roberts in the Supreme Court makes much difference. I don't know enough about him. The man is young. He doesn't have much judicial experience. He clearly comes with a perspective that is very consistent with Rehnquist's perspective. But whether he will maintain that perspective once he has the experience of the court, we can't just tell.

What is that one question that you would like to ask Chief Justice Nominee Roberts?
How he is going to go about addressing the questions that have never been asked before? I feel that in the next 30 years, which may be the time period he gets to serve, we will see revolutionary changes in American law—driven by technology, driven by culture, driven by world forces. And looking over the shoulder to the past is not going to provide answers.

What role does the Supreme Court play in shaping the direction of society?
It's one factor. But I know of no instance in American history where a Supreme Court decision has put an end to the controversy. For example: Brown v. Board Education; what did the Supreme Court decide? Schools must be desegregated. Fifty years later what does the research show? Are in schools in America desegregated?

Forming freshmen into leaders

Laura Sweltz

After recruiting freshmen during the summer, the new Leaders in Motion program, run by the Office of Student Activities, will strive to develop and apply leadership skills in new students.

Staci Weber, Director of the Office of Student Activities, oversees the program. She said that "creating strong student leaders through positive change, while understanding the value of a team and working together" are the program's goals.

Senior Paul Fleischer helped organize Leaders in Motion and will aid in administering it throughout the fall.

Leaders in Motion will meet two hours every week for two months. On September 10, the group met for the first time to participate in a teambuilding retreat at Shaver's Creek Environmental Center. The session's activities were focused on working together as a team and building trust in each other.

During the program this semester, Leaders in Motion will break into four smaller groups. These groups will work together to use the theories they have learned by working on a college enhancement project. These enhancements will not be major changes, simply ways to allow Leaders in Motion to apply the skills they have been taught throughout the program.

Freshman Bradlee Drew, a member of Leaders in Motion, said, "[Taking] the things that worked best in the places that we lived and [combining] all of our ideas and [applying] them… all of the very useful things that worked for all of us could also help out the campus."

Although these freshmen are new on campus, they will be capable of looking at Juniata and finding a small area to enhance.

Freshman Amin Khoshnevisan joined the program to "represent

continued page 4

Good Neighbor Initiative

continued from page 1

borhoods where there weren't students living before. Some townsfolk are downright nervous about this. Community members have asked the police to be more diligent, worrying that more students will equal out of control neighbors, loud parties, property damage, etc.

Some students fear that this supposed crack-down will limit traveling to and from campus. Rumors circulated during the first weekend of the semester that students should be paranoid while walking off-campus. If they weren't careful, Huntingdon police would bust them. Others even feared regular on-campus parties, thinking that JC security would also harass them for no good reason.

Of the rumors, junior Kacie Brunett, who lives on Mifflin Street, said, "I don't feel like anybody is out to get me, but I'm definitely going to watch myself."

"Students have a right to be concerned," said Clarkson. "There is clearly some kind of heightened awareness in the community."

Educating students became an important part of the Good Neighbor Initiative. Tim Launtz, director of residential life, sent out brochures and packets to students living in town. Rocco Panosetti, director of campus safety and security, sent e-mails about courteous parking habits. Off-campus students received refrigerator magnets with Mr. Rogers's picture, the words "Be a Good Neighbor" and room to write neighbors' information, names and numbers. They were also given t-shirts printed with the words "JC Off-Campus" on the front and "Good Neighbor" on the back so that community members would recognize them and be able to get to know them.

Other aspects of the initiative were the block parties thrown the first weekend that students returned to school. Off-campus residents received invitations to hand out to neighbors and community members for two barbeque block parties at two different locations in Huntingdon: 17th & Mifflin Streets and the Alfarata lot behind the JCEL building. Students and town residents commingled over food, games and music, getting to know one another.

"They went well," said Clarkson. "I've had people – neighbors – say, 'Thanks, what a wonderful thing.'"

Senior Danielle Pompili, who lives in Mission, agreed. "They were successful in that they brought

Holly Brown / Juniatian

the two communities together," she said. "I saw college students interacting with the people of the town, and it was nice to see."

Brunett believes that this new inter-community activity is great. "When you go from the dorm to town, you don't immediately consider having actual neighbors," she said. "It's necessary for students to be more responsible when they're not on campus." The initiative helps them to learn how to do that.

Despite all that it has already done, the Good Neighbor Initiative will do more. Administration will be contacting students' landlords, passing out more brochures and giving "Good Neighbor" passes to community members for sports games, performances, lectures and other campus events.

Even with slight ongoing problems, Clarkson isn't too concerned. "The reality is that the vast majority of our students – Juniata students – are incredibly considerate of others, not mean or malicious, and they don't steal. But, things happen." The Good Neighbor Initiative aims to prevent those negative.

"There's too much anger, tension, violence and nastiness in the world already," said Clarkson. "You start fixing it with the people nearest you – your neighbors."

Leaders in Motion targets freshmen

continued from page 3

and help make a difference" at Juniata.

Freshmen interested in Leaders in Motion were required to submit a resumé before being selected. Previous leadership experience was the most important aspect of the applications considered.

"Having experiences for the students to draw on will allow the program to be more interactive," said Weber.

Thirteen freshmen were selected from around 30 applicants. As a pilot program, a small group of students was desirable to see if the theories taught in the program are successful.

Participation in Leaders in Motion was limited to freshmen because "they are [all] in the same place of development," said Weber. Alongside other freshmen, the group members will be more comfortable developing their leadership qualities, working as a team and becoming friends.

Weber said that "these students were self-selected" by their personal initiative to pursue a position in the program and their extensive backgrounds with leadership.

However, Weber said the remaining applicants had "very positive" applications as well. For these incoming students, the Office of Student Activities has organized a separate group, Leaders Evolving and Developing (LEAD).

LEAD will provide a similar experience for leadership development. They will participate in the Office of Student Activities's Leadership Series in order to learn about the various leadership theories.

They will then work together as a group to apply those theories by organizing a social or educational fundraiser. Assistant Director of Student Activities Katie Sanborn will organize and oversee this group.

These series come from the Student Leadership Practices Inventory created by Kouzes and Posner, a program used by organizations and corporations around the world. Leadership theories such as trait leadership, servant leadership and working with diversity will be covered.

Upperclassmen who wish to enhance their leadership skills may also participate in the Leadership Series. By participating in these various presentations, they will learn many of the same theories taught at Leaders in Motion.

J's bar

continued from page 1

to openly welcome college students and looks forward to the business. However, he could not be reached for comment.

Students await the opening of the new bar and hope that they will indeed find the same hospitality that J. once provided.

Juniata students say they will be at a loss without J. and his tavern, a very popular place for 'wing night' and socializing. Many students worry about where they are going to go for celebrations of 21st birthdays and graduations. The convenience of J's Tavern, on Washington Street, and the bar's popularity with students made it a big part of many students' social lives.

J's Tavern stayed open a few months longer than originally expected, but closed for good in July. With the absence of J's, Juniata students in the area over the summer found themselves going to Johnny's Bar, a nearby alternative.

Johnny's Bar, also on Washington Street, across from where J's Tavern was, appealed to students due to location. But many said that they feel that Johnny's bar has more Huntingdon residents as patrons than college students.

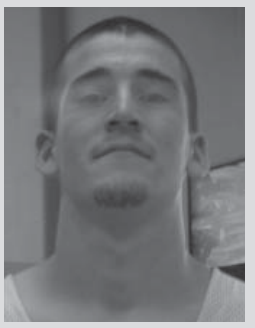
Senior Candi Hamilton also said, "Johnny's Bar doesn't seem to have as much of a selection of drinks and beers that were available at J's."

With the new semester underway, students have been going to other places in town such as the Brass Rail Sports Bar at the Days Inn, Johnny's Bar and Boxers. A number of students also go to Peggy's Place on Wednesday nights to sing karaoke. On the other hand, some students have warmed to the idea that a popular bar is closed because now there seem to be more house and campus parties. No students mentioned going to Mimi's Restaurant.

J. decided to sell his bar in the beginning of this year due to personal reasons. He has moved back to Altoona, close to where he grew up. He is now spending time with his family, enjoying his time and fixing up his house.

For more than 50 years, the building has housed bars or taverns that have been ideal places for Juniata's students. Before 1992 the bar was called Cora and Ed's. With new owners, the name changed to Coach's Corner. The name changed again to J's Tavern when J. Maierhofer bought it, and it will change again when doors reopen.

The Roving Reporter: Sarah Wharton



Where are you going now that J's bar is closed?

"I went to Johnny's the other night, and I work at Mimi's so sometimes I stay after work."
- Bobby Wadud, junior

"I was going to go to Penn State next weekend, or else buy lots of alcohol and have parties at my house." - Jil Seraphin, junior

"To tell you the truth, I haven't been out yet, but I'll probably go to the closest bar, which is Johnny's." - Nathan Pugh, senior

The storm hits home

continued from page 1

home when Hurricane Katrina hit. He and his wife lost everything. Lindsay received news that her brother was coming to Juniata.

"I didn't know what I could do, but I wanted to [help]," Brunner said.

She contacted Morin with the situation and asked for help. Calls were put in to Alumni House, Unity House and Founders which all contributed. Students also helped collect essentials for her brother and the people still stranded.

Boxes were put out from 8:00 a.m. to 4:00 p.m. on Sept. 2. Items appeared before the boxes were even available. Brunner took her Jeep Cherokee to gather everything at 4:00 p.m.

"The response was amazing," Brunner said. In less than 24 hours, Juniata had come together to help her brother's situation. Items such as bottled water, canned foods, toiletries, shirts, towels and pillows were given. Brunner's jeep was packed full.

When sorting what had been collected, Brunner's mother broke down in tears. Brunner said one could tell that people gave up personal belongings in order to help.

"It is amazing how everyone came together in that short amount of time. In this situation people have to think 'what I am going to have for myself,' and they just gave," Brunner said.

Nicholas Brunner is in the Navy and stationed at Etenus Base, Mississippi, about one hour from New Orleans. He was amazed at the response from Juniata. He drove the donations back and left the majority of them at his naval distribution center. People immediately picked up the food and bottled water that he had set out.

"You don't know the difference one can of food can make," said Lindsay Brunner. "Thanks to the whole Juniata community for all who gave and contributed. I am at a loss for words. It was absolutely incredible."

Nicholas Brunner explained the conditions. "Everything is completely demolished. There are bodies still floating. Disease is a major issue. There is no place to go when you are down there."

Nicholas Brunner is still in the area there helping the victims of the hurricane, and Juniatians are doing what they can to assist.

Juniata responds: Katrina

continued from page 1

President Tom Kepple extended his hospitality by housing a college student from New Orleans who will attend Juniata.

People are continually organizing new contribution efforts, including a potential spring break service trip to help with relief programs.

Morin said, "Members of the Juniata community have shown overwhelming concern for the hurricane victims and a willingness to contribute to the relief effort in whatever way they can."

Photo courtesy of Kathleen Biddle

After witnessing the devastation of Hurricane Katrina on the news, several local children decided to do something to aid the victims of the catastrophe. Molly Biddle, daughter of Professor Kathleen Biddle, came up with the idea of a lemonade stand, which they put in front of Good Hall with permission from President Kepple. She recruited her brother Harry and friends Brooke Shuck, Luca Smolcic-Larson, and Elias Smolcic-Larson. Between the stand's profits and a matching donation, they were able to raise over $600 for the American Red Cross.

Coming home

"Reverse culture shock" affects many study abroad returnees

Emily Eller

When I arrived back on campus this fall after eight months in Mexico, I could not help but notice a change in my classmates. Have things always been this way? Or, I wondered: Does this always happen when students return from abroad? ¿Qué pasó?

The problem with re-entry, or "reverse culture shock" is that it is often completely unexpected. After the trials of life in a foreign country one hardly expects to struggle in the backyard she has known all her life, but it can be the hardest part of going abroad.

"I think the re-entry is often times more difficult than the entry," said Dr. David Sowell, professor of history. Sowell offers a course exclusively for students returning from abroad. He explained that re-entry is almost always marked by anxiety, discomfort and alienation.

Jarmila Polte, Director of Study Abroad, agreed. "Students have always had re-entry issues. If they haven't [had trouble re-adjusting] then they weren't really there." She explained that the more profound the study abroad experience, the harsher the return can be. For example, students who were immersed in a foreign language or studied for a full year are likely to have more re-entry anxiety than those who have participated in a summer program.

So, how many students were abroad? 136, a full 40% of this year's senior class. And of those 136, 88 students were abroad for a semester or more.

Senior Neil Eicher, just returned from two semesters in Russia, remarked, "It was really strange; I came back a week early just to adjust, and I'm glad I did because you feel like you don't belong."

When students return from study abroad it is hard to see how they fit in anywhere. They tend to no longer feel connected to the clubs and organizations that they were once active in. Many of their friends in the junior class are abroad. They know no one in the freshman and sophomore classes, and they find it hard to relate to the seniors who have not been abroad.

"[It's] a year of not being somewhere and then you come back and it doesn't look the same and it doesn't feel the same," said senior Natalie Rizzuto. Rizzuto just returned from two semesters abroad, one in the Czech Republic and then in Lueven, Belgium. "I feel like I was pretty involved sophomore year and now those clubs and organizations are doing their own thing, and I can't really find my place."

Coming back is not all bad, argued Polte. "I look upon returning students as the walking wounded. That's how they see themselves, but that's not what they are."

Returning students do contribute back to the campus community. "They become diplomats," she said. "These students are bridges between international students and campus. They add a dimension in the classroom; they also help with recruitment."

Juniata College benefits in prestige when students study abroad and few question that in the long run students benefit as well. But, in the short run, students suffer upon their-not-so-glorious return.

Said Eicher, "There should have been a dinner or something like that; just a 'welcome back guys.' There really wasn't anything like that."

Instead, many students expressed feelings of complete abandonment.

Said Sowell, "There are two dimensions [to the concerns that Juniata should address in regard to returning students] an academic and a social. Socially, Juniata is a community that strives to include. So, if students are feeling outside of that, there's a responsibility there. Academically, there's a shift in what students want to do career-wise [when they've studied abroad] and that needs to be addressed as well."

So what can you do? Talk to your friends. As Sowell explained, "Ideally they [returning students] can also help their friends grow. But that depends on their friends."

OVERLOAD

Anyone have $2,520 I can borrow?

Matt Russell

You'd better believe I'm biased.

Students here are limited to 18 credits per semester. You'll find limits like this at most institutions, of course. Students taking more credits would cost the College more, and they also don't want you to overburden yourself.

But practicums and internships should be free of the credit limit.

Juniata students have the ability to overload their schedules at a cost of $840 per credit, but we are forbidden to have more than 21 credits in a semester. Want to take an extra 3-credit course? That'll be $2,520, please.

Admittedly, a seven-class schedule would be an adventure in time management that few would ever want. However, I think the blanket policy currently in place is too rigid, and it is unfair both to students and the College.

Let me elaborate, using myself as an example.

As an editor, I take the Juniatian as a three-credit course. Well, that's the idea anyway. In reality, I rarely ever get that many credits. Several times during my tenure, I've had 16-18 credit class schedules which I need to graduate on time. Therefore, I was only able to take the newspaper course for two or less credits. On at least one occasion, I received none and could only audit it.

I see you reaching for your violin. Bear with me.

I've also worked for a few semesters at the Solutions Center in management positions. These could, feasibly, have been turned into credit-bearing internships if my schedule wasn't already hopelessly full. I estimate that by the end of my senior year, between the Juniatian and my job, the credit limit will have cheated me out of up 12 credits. Folks, that's an entire semester of work with no credit.

But what if I paid for the extra credits? Well here's a cheery scenario. Say a student works for $5.15 an hour at a job which he wants to count as an internship for three overload credits. Assuming he works the absolute maximum number of hours during the semester (that's 17.5 hours times 16 weeks) he would end up with a net pay of $1,442 (before taxes). Less the credit fees, the student would actually owe the College $1,078 for a semester of work.

I suppose the insulting part, for me anyway, is that the potential credits I lose are the ones rendered in service of the College.

Let's eliminate the credit limit on practicums and internships. It's doing a disservice to both the students and the institution.

I told you I was biased.

Why such incorrect Halbritter estimates?

Why so much money spent on Founders' landscaping?

President Kepple wants to hear from you! He uses his column to answer any college-related question from the campus community. Simply e-mail questions to juniatian@juniata.edu, and the editors will forward them anonymously to Dr. Kepple.

Presidential Perspective

"Why has the College been so far off the mark when it comes to Halbritter Center estimates, both timewise and monetarily? The current price of the Center has risen to nearly twice the original cost (from $4.5 million to $8 million), and the completion date has been pushed back by four months. Why such poor estimates?"

Actually the price was not all that far off. The $4.5m was an estimate to get the fund raising started. Had we built it when we first started the campaign in 1998 the price probably would have been around $5m. There were also unanticipated needs in the Oller renovation that we didn't really know about until the architect began his work. We are just a couple months away from the original schedule – not a major problem. On the other hand we estimated that the von Liebig Center would cost $20m and it did within a $100,000 or so. That is why they are called estimates.

"This summer, the front steps and lawn of Founders were rebuilt yet again. Why put money into more landscaping when there is a shortage of space on campus and the top two floors of Founders are still unusable, despite the promises of the capital campaign?"

We didn't rebuild the steps "once again." We rebuilt the steps that were added to Founders around 1880. They held up pretty well. We did have gifts specifically for the entrance features including from the classes of 05 (benches) and 02 (Moore St. entrance to Founders). I hope you like the improvements. The landscaping came about because we damaged the area with all the work there. Unfortunately we did not get enough money in the campaign for Founders but we are still working on it. Again it is not unusual to not get every gift first imagined in a campaign.

Students, faculty, staff, alumni: send your letters to juniatian@juniata.edu. We print all letters to the editor that are of interest to the campus community – in response to one of our articles or on a completely separate topic – so start typing! If you're lucky, we might even print a response. Please try to limit letters to about 300 words, and note that longer submissions may be edited due to available space. Opinions expressed on the commentary pages are not necessarily those of the Juniatian.

From Oller to Halbritter

The story of the new performing arts center

Nicholas Carney

Amidst the clattering of hammers, buzzing of saws and general racket of a construction site, the new Halbritter Center for Performing Arts is being born. Halbritter, formerly Oller Hall, is currently slated to be completed in late December, two months later than anticipated. Originally, the price for the new center was set at 4.5 million dollars. That cost has now ballooned to nearly eight million dollars.

"The initial cost of $4.5 million was more of an estimate, rather than a specific price," said Chad Herzog, Director of the Juniata Artist Series. "The College just underestimated the amount of money it would cost to build the facility."

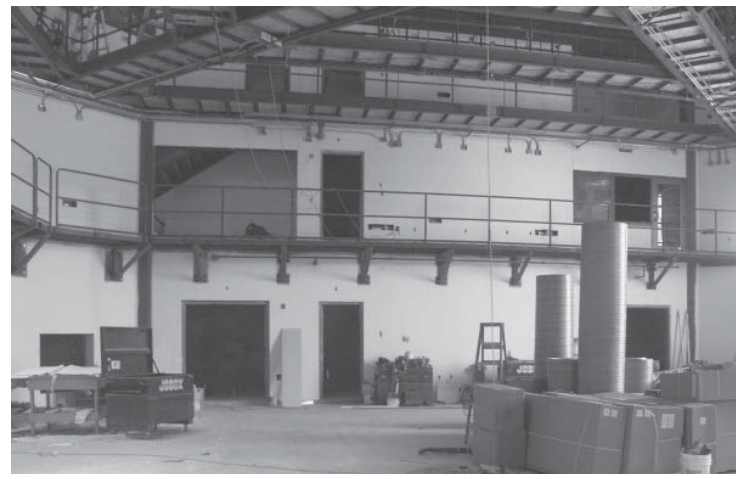
Barry and Marlene Halbritter, both Juniata class of 1965 graduates and the principal financiers for the Center, donated $2 million.

The difference was made up through fundraising, said Kimberly M. Kitchen, Director of Planned Giving at Juniata. According to Kitchen, the Campaign for the Arts committee set up a call center, in which volunteers called and visited Juniata alumni to ask for contributions for the center. "Even as the Halbritter Center costs rose, our fundraising process did not change. What changed was our dollar goal," explained Kitchen.

While the date of completion nears, the official date for the ribbon cutting ceremony will be April 22, 2006—not during this fall's homecoming festivities as rumored.

Project Manager Bob Shafer explained the delay in construction, "Halbritter is behind schedule primarily because there were unforeseen soil conditions that made it very difficult to get the foundation installed. That cost us the 6-8 weeks we're behind."

Even with the delay the current facilities are still being used actively to the present day, and classes will be held in the building next semester.



Despite the active use of the building at this time, there are problems for performances this semester.

"We have no ticket booth yet. We're going to have to set up tables or something," said Herzog.

Also a concern is the current lack of public restroom facilities in the building. Both the ticket booth and the restrooms will eventually reside in the shared lobby area.

Oller Hall, originally built in 1940, seated 900 people in the Rosenberger Auditorium but did not meet today's demands for the arts at the College.

"We have a new performing arts POE here at Juniata," said Herzog, adding that the new space will allow for further creativity and more devotion to the theater arts.

Nicholas Carney / Juniatian

The interior of Halbritter's blackbox theater and lobby under construction. The building is due to open sometime in December.

The Center will house three performance spaces, two of them completely new. One of these is the climate-controlled Suzanne von Liebig Theater. Originally designed solely as a black box theater, it was redesigned to include numerous windows for natural lighting. The space can still function as a black box theater, since the windows can be blacked-out during performances and rehearsals.

"Can you just imagine the view out this window in the fall," Herzog asked, referring to the new enormous picture window. "It's going to be beautiful."

The von Liebig Theater will also be equipped with advanced lighting controls and a complex series of catwalks above the stage.

The new dance and performance art studio downstairs will be used

Expect the Extraterrestrial

Artist Series presents 'A Universe of Dreams'

Christopher Burlingame

"Much in life is chaos and disorder," NPR radio personality, Neal Conan read, quoting a Navajo legend. Behind him, images from outer space appeared on a large movie screen, and the musical harmonies of the Ensemble Galilei set an overpowering mood.

In the recently revamped Rosenberger Auditorium on September 17, swirling impossibilities became startling realities in the performance of "A Universe of Dreams." A vignette of images from light-years away was set to music from centuries ago.

The first of this semester's Artist Series at Juniata, "A Universe of Dreams" brought in a nearly packed house and demonstrated beauty at the hands of three distinct art forms: poetry, music and vocalization.

Chad Herzog, Director of Juniata's Artist Series, seemed pleased with the turnout for the show. Herzog explained his excitement for the program stating, "It exposed the community, and especially students, to chamber music."

The Ensemble provided the live soundtrack, which included Celtic and early classical music. The images from the Hubble Space Telescope, and the work of notable poets, including William Shakespeare and Stanley Kunitz, perfectly intertwined with the music.

Both Carolyn Anderson Surrick, the Ensemble Galilei spokesperson, and Conan said, "You really can't prepare an audience for a show like this."

The surreal images from millions of light-years away were products of the high-powered lenses attached to what was formerly a spy satellite. Swirling reds, blues, purples and colors that one cannot even begin to describe were captured on film with such richness that it makes one ponder the scope of his or her own existence.

Ensemble Galilei utilized many traditional Celtic instruments to explore this theme, including small pipes, the fiddle and the harp. By uniting the music and the photography, the performance simultaneously provided participants with an airy sense of relaxation and breathtaking realization.

Conan and Ensemble Galilei made sure to insert humor into the program as well so as not to overwhelm the audience. One of the selections played was a comical piece written by former-Monty Python member Eric Idle entitled, "Galaxy Song."

The members of Ensemble Galiliei come from diverse backgrounds spanning several decades and an array of musical interests. The six women who compose the group found enough common ground in their passion for creation to form the Ensemble, which Surrick, also an Ensemble member, explained to be "a happy accident."

Conan came together with Ensemble Galilei when he agreed to narrate a Christmas pageant as a result of his friendship with Surrick. When Surrick came across the Hubble photographs, she immediately collaborate with Conan to create "A Universe of Dreams." Only poets and musicians could so succinctly articulate millions of light-years of beauty into a brief verse or short selection of notes.

Holly Brown / Juniatian

Ensemble Galilei played a variety of music that accompanied beautiful images from space taken by the Hubble Telescope during this year's first Artist Series performance, Universe of Dreams.

Movie review: Red Eye

If only flying really was this exciting

Holly Brown

Ah. . .it's good to be back in the movie business again. The summer was full of flops and disappointments, with only the fabulous "Batman Begins" rising above the rest. Here's hoping the before-Christmas rush gives us movie-lovers some better fare.

Opening my column this semester is the Wes Craven thriller "Red Eye." Despite initial trailer doubts and my severe lack of interest in anything Craven does, I decided to see it because, well, I'm in love with lead actor Cillian Murphy. Once you've gone "28 Days Later," there's no going back.

Of course, actress Rachel McAdams isn't bad either. While watching the horrid-yet-popular "The Notebook," I asked myself, "Why did I pay money to sit through this clearance-shelf romance paperback?" But after that, I said, "Couldn't Rachel McAdams really kick some butt if she wanted to?"

The answer to that question is a Napoleonic "heck yes!" "Red Eye" is a thriller of the first degree, full of suspense of all kinds. And Craven, thankfully, avoids clichés by taking the story to a mild-mannered red eye flight. He also finds new uses for the beset heroine's high heels besides tripping her up in the chase scenes. Ouch.

While the movie won't change lives or make it to my top ten list, it's sound, wonderfully suspenseful, well-acted and it moves at a quick pace. Craven has balanced the humor, horror and gore perfectly for a good popcorn flick.

The film follows the workaholic Lisa Reisert (McAdams) on a late night flight to Atlanta. Before boarding, she bumps into the good-natured and unbelievably handsome Jackson Rippner (Murphy) and enjoys some mild flirtation. But once the flight gets into the air, Lisa learns that her meeting Jackson isn't just a coincidence. He reveals that he's an operative sent to bully her into placing one of her hotel patrons at risk for an assassination. If she doesn't comply, Jackson will make a phone call to off her father.

Lisa's transformation from an emotional, helpless victim to a thriller heroine is the key pull of the film. In any sort of story, there's an exact moment where the characters and story have been presented and everything needs to go up a notch for the story to progress. That's the point where things go from "cool" to "awesome." It's the point where someone on the screen gets a pen shoved into her windpipe.

McAdams' spirit and willingness to fight back are the main draw of "Red Eye" (besides Murphy, of course). When watching a thriller, not only do we find ourselves shouting, "He's right behind the door!" but also, "Kick him! Kick him where it counts!" Finally we get a protagonist here who listens to our instructions!

Nobody's going to give "Red Eye" any Oscar nominations, but for an adrenaline-filled night at the movies, it's a great choice. I give Rachel McAdams ten points for creativity in the realm of weapons, and Cillian Murphy a ten just because.

One-man Coffeehouse fills Baker

Holly Brown / Juniatian

Michael Glabicki, lead singer of Rusted Root, was part of Juniata's first coffeehouse event of the year. Rusted Root came for the major concert several years ago, and fans filled Baker for the one-man performance. Glabicki played to a raucous audience, came out for an encore, and stayed late to sign autographs. Senior Brittany Barbera and Junior Lisa Detweiler opened for Glabicki.

Off the wire

Welcome – and some short tech essentials

Nate Drenner

Like it or not, we use technology every day. For the past three years, the Juniatian has published a technology column, and this year I'm bringing you the technology trends.

I am not assuming that you are an expert, a geek, a 1337 h4xx0r or whatever else you want to call those of us who build our own computers and break out in a cold sweat when the network is down. I am assuming, however, that you have some level of comfort with technology.

And, even though I work for Campus Technology Services, I have no particular viewpoint or agenda beyond giving you the best tech information I can.

In future issues, look for accessible tech news and features on anything from gaming to cell phones to digital music.

But for now, let's go over some essentials to start off the year. Even if you've heard them before, they're worth repeating.

- **Computer Viruses**

There was a time when you could avoid computer viruses simply by not opening e-mail attachments. Those days are long gone. Today you can't even use Juniata's network without antivirus software.

But the trick is to keep your software up to date. Symantec Antivirus releases updates at least once a week. Whatever flavor antivirus software you have, be sure to run its update function often. In most programs, you can set it to check for updates automatically.

What you don't need, though, is one of those all-inclusive packages like Symantec Internet Security or McAfee Internet Security Suite. A simple antivirus program will do nicely on Juniata's network. Some of the other features in these packages – like personal firewalls – can actually hinder access.

- **Spyware & Windows Update**

As much as some loathe Microsoft, its website is actually a decent resource for researching software problems. And everyone running Windows should visit windowsupdate.microsoft.com to download the latest critical updates. Note that they will soon stop support for anything earlier than Windows 2000.

Microsoft Antispyware is another program available at microsoft.com. It will help protect your computer from those invisible programs that come from seedy links and banner ads.

Yet Ad-Aware and Spybot

Fashion Column: Be Your Own You

Lucia

Growing up it never occurred to me that what I wore could take a large precedent over my life. Well, it doesn't really. Ok, I will stop lying to myself and to others. It does.

The fact of the matter is that for me wearing a stylish dress can cure the common cold, or at least make me feel sexy when I feel my nose is a faucet that I can't turn off. A new pair of shoes can take the sexual tension away from that man who is putting me in misery, and the simplest trip to the make-up counter is worth a 45 minute drive to make myself feel and look better.

These are just my own personal pick-me-up remedies, showing that what you wear can affect how you feel.

Throughout the semester in this column, I will attempt to make this campus more aware of what fashion is beyond our community. I hope to open our brilliant minds to the idea that what we wear does more than create our own personal style. It can give off a first impression, turn someone on, break the rules and, in the end, quite possibly define who we are.

Take Juniata College sophomore Amanda Harris—rarely does she pay full price for clothes. "I get a lot of my clothes from clearance racks, Goodwill and Salvation Army," said Harris.

This is good news for broke college students.

I can see her style from a mile away—It's not the mainstream "everyone is wearing it" fad. She makes her clothes her own.

"I customize my own clothes. I sometimes cut up my shirts to fit the way I want them to fit and I love adding a crazy necklace. Just make it you," said Harris.

You can see I'm not asking you to order the latest thing from Emporio Armani (Lord knows I would go broke with one swipe of my credit card). I'm just interested to see how fashionably aware this campus is and where we get our style from.

I love Hollister. Their jeans are fabulous, but lately I think the look has been over used. Walking into Baker this semester has been like strolling into Hollister's walk-in closet.

Or what about mini skirts. I shouldn't even say mini should I? The "fabric that barely covers a woman's behind" is more like it. We've all heard "shake what your mama gave you"… right ladies? But let's just be careful how we shake it.

Knowing what looks good and feels good on your body type is important. Don't embarrass yourself by letting the muffin tops flow free (just picture a muffin in a pair of low rise jeans and you've got it). This is something I'm sure we can get rid of; just understand that not all fads are for you and have respect for your body. Know that some things are just not that sexy even if they are in style.

I'm saying "be yourself." Knowing and respecting yourself is much cooler than trying to be the next Abercrombie and Fitch model.

Break away from the "cookie cutter image," as Amanda Harris would say. Start your own look. Come on, I think Hollister can afford to lose a few customers.

Sarah Anne Wharton / Juniatian

Amanda Harris sits pretty in an outfit that is all her own.

Oller to Halbritter

continued from page 7

as a rehearsal space, a classroom and as a center for performance.

"This room will be covered in mirrors," explained Herzog. "But we have space for chairs so things like single-act plays can be performed."

The Center's Rosenberger Auditorium has been renovated, with specific attention devoted to climate control, unique acoustical features and a new ceiling. It was designed for optimum storage of musical instruments.

Other features of the Halbritter Center will include an elaborate backstage greenroom, fire suppression systems and dressing and showering facilities for performers.

Many will notice the name change from the well-known Oller Hall to the new Halbritter Center.

"When you name a building, you name it either to honor someone or to recognize someone for their [monetary] contributions," said Herzog. "And that is the case with the Halbritter Center."

Barry Marlene Halbritter specifically requested that their contribution be put towards the Campaign for the Arts. The center was named in their honor in October 2000, when they presented Juniata with their monetary donation.

At its opening, the old building was named Oller Hall in honor of the Oller family and their relationship with the College, as opposed to a monetary contribution.

Barry Halbritter, who presides over Midstate Tool & Supply, Inc., is an active member in the Juniata community. The Halbritters are not new to the Juniata namescape. In 1994, Halbritter Plaza, near Cloister Hall, was named for the couple's generosity toward the College.

Search & Destroy are still the golden standards when searching for and removing spyware. Both programs are found at www.download.com. As with antivirus software, be sure to download the latest updates within the program regularly.

- **Academic Discounts**

As college students, we're entitled to hundreds of dollars in discounts on software and hardware. Microsoft Office? A mere $80 instead of the standard $400. Adobe Creative Suite? $400 instead of $1,000. Seniors especially would be wise to take advantage of these offers before graduation.

You can access the discounts on Dell PCs through Juniata's website (services.juniata.edu/cts). Apple's education store is at store.apple.com. And all that software is just a click away at www.journeyed.com.

Why do the tech companies do this? It's the same idea that cigarette manufacturers use in advertising: hook 'em when they're young, and you'll have a life-long user. Of course, software is a bit healthier.

- **Back up your files**

The network drives have two main advantages: 1) they're accessible anywhere on campus, and 2) they're backed up every night.

The 50 MB allotted per student U Drive is meager; you can carry twenty times as much data on a USB flash drive. If you lose that tiny drive, though, you've lost your data. So either back it up yourself or save the important files to your U Drive. You can retrieve yesterday's version by making a phone call to the Help Desk during business hours.

Of course, that's assuming you start your 10-page paper at least two nights before it's due.

On Campus This Weekend

Friday, Sept. 23

Art Exhibit: Antoin Sevruguin / Persian Image
5 p.m. reception, Carnegie

Shuttle Bus to State College
Leaves 5 p.m. & 7 p.m., Ellis

11:00 p.m.

JAB choice meets with student approval

continued from page 1

congratulating JAB on its work.

JAB has not yet decided the location of the concert or the opening acts. But they decided to start the year with a bang by having the concert in the fall. The board said that it also had more band choices if Juniata could sign a contract before the school year began.

Conrad continued, "We are lucky to have Our Lady Peace. They aren't playing at a lot of colleges, but they decided to take our offer." This was credited to the early contract and the Tuesday concert date.

And early contract was due to the early summertime poll. After Sum 41 and Our Lady Peace, My Chemical Romance and The Clarks took the #3 and #4 spots.

"We asked the students who they would pay $12 to see," said Staci Weber, Director of Student Activities. "This allowed students to vote for multiple choices."

But despite improvement over last year's polling system, it was not perfect. The poll was announced on July 27 in the Juniata Announcements e-mail. It ended on August 8. This only gave students 13 days to vote.

Students may be concerned with the short time limit. However, Matthew Newman, the Executive Chair of Technology for JAB, reports that about "1/3 of the campus voted and each grade level had input." It was a good turnout, and the majority of students are pleased.

Newman created the poll on his personal web page. "I couldn't access the VPN into JC from my job location," Newman explained. "So I couldn't create the poll on a Juniata site."

To vote, students had to log in with their Juniata e-mail addresses. Newman maintained legitimacy by checking and verifying each individual e-mail address and votes. This took him nine days.

Yet, not being tied into the Juniata system, there was no way of telling if a student logged into the poll as someone other than him or herself.

The decision to bring Our Lady Peace was made purely by student influence. No administration was involved.

With all these changes, Conrad said, "We hope people will support a well-known band after the negative view of last year."

Women's volleyball attempting to match last season's success

Brittany Crawford

After finally winning the 2004 National Championship, a goal the women's volleyball team had tried to achieve for years, many wondered what the Eagles would do for an encore.

Head Coach Larry Bock had the simple answer. "We have high but reasonable objectives," he said. "The team that we have put together wants to achieve the same goal."

With an early 7-1 record, the team is climbing toward that goal.

The Eagles' season opener, on September 2, was an intense match against Wittenberg. Juniata fell in the first game, 30-20. Wittenberg started taking control of the second, until Juniata took off with a 10-0 run. The Eagles rallied to take the game, 33-31, spurring them to a 3-2 win.

Team captains Stephanie Kines and Abby Leonard both agreed that this was a mental game. "The whole atmosphere got us pumped up. It was a real motivator," Kines said.

Several freshmen had terrific showings at the match. Amber Thomas led Juniata with 18 kills, and Beth Kozak and Jess Ritchey dished out 31 assists. Sophomore Tara McMinn anchored the defense with a team-high 24 digs

Several freshmen had terrific showings at the first match

The fact that so many freshmen have contributed has been a pleasant surprise. The ratio between freshmen and returning players is about one to one, and even though some of the dynamics have changed, Coach Bock isn't worried.

"The girls are extremely committed, and they won't let immaturity affect their goal," he said.

After starting 2-0, the Eagles would run their record to 5-0 after winning three straight at the Ashland Invitational.

In the first match of the tournament, the Eagles easily knocked off Division II Lake Superior State, 3-0. Kines paced Juniata with 14 kills and four blocks. Rachael Schatz helped the defense with four blocks, while McMinn had a team-high 17 digs.

The next two games of the Invitational ended in a 3-1 win over Ashland and a five-game win over the University of Wisconsin-Parkside.

There were many outstanding perfromances in what Leonard called a "physical" win over Ashland. Kines contributed 19 kills, while 17 more were added by Schatz. Ritchey handed out 51 assists and 18 digs. McMinn did her part with 15 digs.

The next match against UW-Parkside looked like an easy victory. The match started off with two wins for Juniata, 30-26 and 30-24. Then during the next two games the Eagles lost their momentum, but got it back to win the final game in convincing fashion, 15-5.

The next match was at the Third Annual Teri Clemens Invitational, and was against top-ranked Washington University. This game was a rematch of last season's National Championship, but this time Juniata fell in defeat. The Eagles put in a good effort, but came up short, 3-1.

New look for Kennedy

Summer brings main gym and locker room renovations

Jeff Byer

The Kennedy Sports and Recreation Center underwent several major renovations this summer, including a new gym floor, new bleachers, and a remodeled football locker room.

The main gym renovations, including the bleachers, cost around $150,000. The new football lockers totaled about $50,000, according to assistant director of athletics Greg Curley.

"The gym looks amazing," junior basketball player Nick Hager said. "Everything from the floor to the bleachers looks much better than it did before. It's going to be a pleasure to play here. I think that the fans get a real treat with the new bleachers because not only do we get to play on a new floor, they get some better seats as well."

According to director of athletics Larry Bock, these plans have been in the making for a long time. He said the upgrades were made a priority last winter, with the renovations officially beginning at the end of the spring semester. The improvements are basically finished, although some final touches have yet to be completed.

The floor in the main gym was the focal point of the renovations. Bock, who is also the women's volleyball coach, says that the new floor gives the gym a new feel. "The gym will be real professional looking; it is going to look more like a college gym. There is a little more of a 'wow' factor involved when you first see it," Bock said.

The new look in the gymnasium features bleachers that are an upgrade from the old brown metal ones. The new hard rubber bleachers have the letters "JC" outlined in yellow and black in the middle of each side. They were designed to be much more comfortable than the previous metal bleachers. Also, they will be much safer than the old seating because they include safety steps and railings.

Along with the bleachers there will be a new scorers' table at half-

continued page 13

Eagles start season with a 'racket'

Heather Lockwood

Many thought the women's tennis team would get off to a slow start, but apparently no one was aware about the 'racket' they really would be making. With a record of 4-2, the women's tennis team has made a strong season debut.

With only three returning upperclassmen - juniors Molly Coursey and Megan Carpenter and sophomore Anita Desai - the Eagles have had to take a whole new crew of rookies under their wings.

New recruits include senior Ran Tu and freshmen Ashley Andrews, Aggie Kwon, Sarah Roby and Caroline Weisser. The group is adding a positive attitude to the team, but the players are also competitive. Four of the freshmen have obtained spots among the top five of the team.

The Eagles' most recent match was against Albright College on Saturday, September 17. The Eagles came out on top with a 9-0 win.

In singles matches, Ashley Andrews posted a 6-0, 6-2 victory in the first singles position. At second singles, Caroline Weisser netted 6-0, 6-0 win. In third singles, Aggie Kwon won over a tie-breaker to earn her the win.

In doubles, Ashley Andrews and Caroline Weisser worked hard to achieve a score of 8-3 in first doubles. In second doubles it was Aggie Kwon and Molly Coursey who had a winning score of 8-5. Sarah Roby and Megan Carpenter picked up the final win in third doubles.

Previous matches against Frostburg State, Theil and Washington and Jefferson were all 9-0 wins for the Eagles.

The team has only suffered two losses the season, dropping a pair of conference match-ups with Messiah and Elizabethtown.

Leading the team again this year is Coach Bobby Pennington. The coach has noticed a big improvement since last season.

"With a 2-0 win total in the first three days the difference is obvious from last year," he said.

Though the team was ranked last going into this year's season, Pennington was able to add more talent in his first full off-season as a head coach. "We are going to pretend that last year never happened. This year we want to make the playoffs and surprise a lot of teams," he said.

The team arrived on campus a

Solid start for cross country

Relying on fusion of experience with freshman talent

Katie Laucks

As the gun went off for the 2005 Juniata College cross country season, both the women's and the men's teams sprinted out for another promising season of record setting performances. Both the men and the women return top runners from last season.

For the men, seniors Chris Sheaffer and Justin Fritzius, both hailing from York, plan on giving it their all in their final appearances in Juniata uniforms. The two have been running together since high school.

"We have been running together for six years and we have the same goals for this season," Fritzius said.

Sheaffer started off his 2005 schedule fast, as he claimed the top spot at Gettysburg with a time of 16:53. Junior Mike Chirdon finished fifth overall, with senior Mike Vella right behind him in sixth place. Despite strong performances, the men couldn't pull out the win, falling 29-26.

It was a different story for the women. "Our top returners have come into the season in much better shape," senior Nancy Hayes said.

The hard work ethic is paying off. Hayes pulled out a top finish at the meet, racing to a winning time of 21:12. Earning a second place finish was senior Katey Glunt and freshman Aubrey Cyphert earned a fifth place finish. The times helped the women earn a 32-23 win.

"We brought in a lot of good freshmen that are placing in the top five... and the intensity of practice is helping a lot" Hayes said.

The team took that intensity to the Connecticut College Invitational. Glunt ran to a 26th place finish overall with a time of 19:21 on the 5k course. Nancy Hayes was next, finishing 51st with a time of 20:06.

For the men, Chris Sheaffer rose to the occasion again and was the top finisher for the team. His 26:43 times captured a 67th place finish. Following Sheaffer were teammates Shawn Rumery, finishing 70th, and Mike Chirdon, who placed 71st.

In its first conference meet of the season, a tri-meet with Messiah and Gettysburg, the men knocked off Messiah, 43-19, but lost to regionally-ranked Gettysburg, 32-23. The women were able to defeat Gettysburg, 46-25, but fell to Messiah, 34-21.

Sheaffer once again paced Juniata, finishing second with a time of 28:28. On the women's side, Glunt led the Eagles with a time of 20:38, good for a third place finish.

Juniata will be back in action this Saturday, when the team travels to the Penn State Altoona Invitational.

Women's tennis

continued from page 11

week before classes began and got right to work. "We started this season off with a really intense preseason. I pushed them really hard, but in the process we try to have fun. After all we are here to win," the coach said.

Freshman Aggie Kwon agrees with her coach. "Preseason was very intense, but I have found that as we continue into the season the practices are becoming harder. Our competition is going to become more intense," she said.

The tough preseason has helped the Eagles to strengthen their relationships with each other and the coach. "We have awesome team chemistry," junior Molly Coursey said. "This year everyone is staying around the courts after they finish their matches and cheer on whomever is still playing, which is great."

With team unity no longer an issue, players can now focus on keeping scores and ranks up.

"This year the ladder is much more competitive all the way down. We are becoming a lot more serious toward improving our games and winning matches," said Coursey.

The Eagles are in a competitive conference but plan to do well no matter who the competition is. Though the Eagles suffered a loss against Elizabethtown, they were ready for an intense match.

"Playing against Messiah was a good warm-up to play E-town because it showed us what the girls in our conference are capable of. I think we'll just practice keeping our playing styles more consistent and controlled," she said.

Compared to last year, there is no question that the team is stronger and has a more intense outlook on the entire season. They hope to build on their early wins and fly ahead of all the other teams during a very competitve conference season.

New year, new attitude

Robb Patty

The Juniata College football team is getting a fresh start this season as head coach Darell Alt officially takes over the Eagles program. After spending the last two years as part of the Juniata coaching staff, including last season as the squad's interim head coach, Alt finally has the opportunity to be the head man of a college program.

"It's truly an honor," he said. "I feel like one of the luckiest guys in the world to be the head coach at a school such as this one."

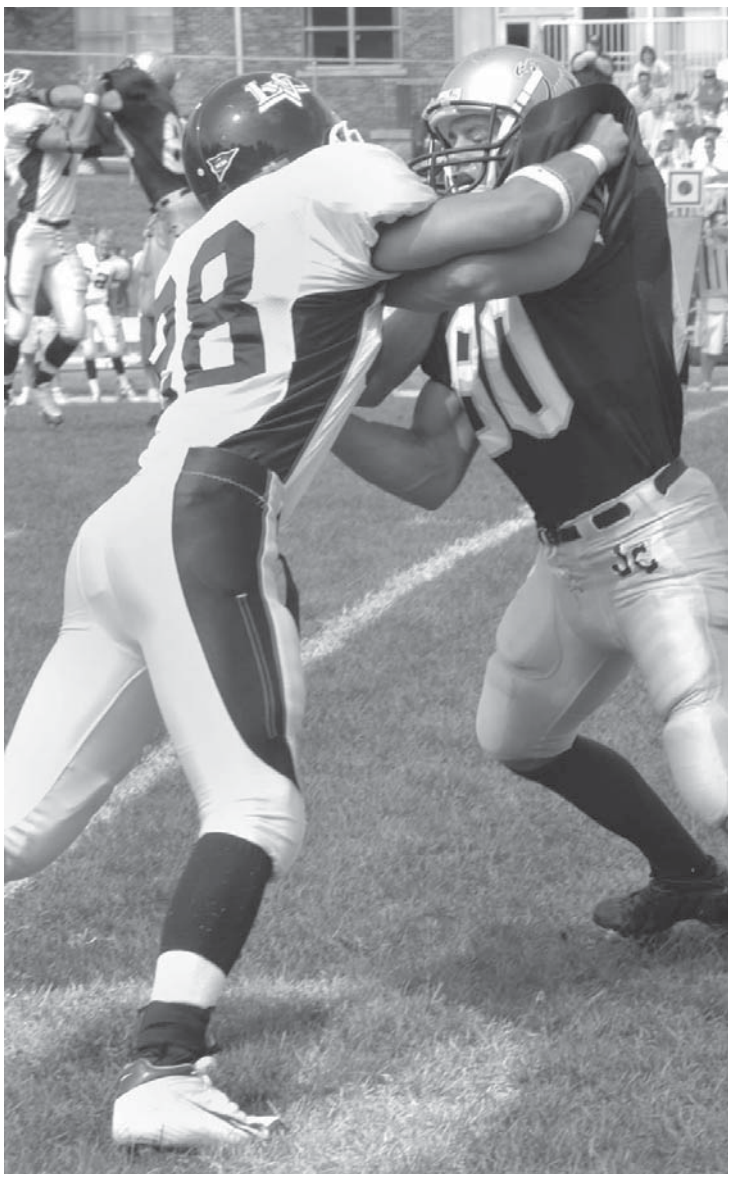
As Alt enters his first campaign as the full time head coach, he brings with him a young team. 32 freshman recruits where brought in this season and many are seeing significant playing time.

The inexperience has been evident though in the Eagles' first two games of the season, as they have turned the ball over eight times in two games.

In the team's home opener against Dickinson, the Eagles committed five turnovers and lost 30-13.

Juniata returned home in Week 3 to square off against conference opponent Lebanon Valley.

Juniata went into the locker room at the half within striking distance of Lebanon Valley, down by just a field goal at 10-7.



The Eagles stormed back in the second half to take its first lead of the day after senior Troy Beaver returned the Lebanon Valley kickoff 41 yards into Flying Dutchmen territory. Freshman quarterback Jay Leonard then threw a screen pass to Duane Ehredt Jr. on third down that went 39 yards for the touchdown and put the Eagles in front, 20-17.

The Flying Dutchmen would answer to retake the lead, 23-20. The two teams again traded scores and with just 8:31 remaining in the contest, Lebanon Valley had a slim 29-27 edge over the Eagles.

On Juniata's next possession the Eagles drove down into field goal range, but senior Dan Heinlein's 41 yard attempt missed wide left.

Juniata's defense then held as

continued page 15

Juniata's David Nicklaus (80) is listed on the team roster as a wide receiver. But in the Eagles' home opener against Lebanon Valley College, the wide out spent more time blocking than catching. His work on the corners helped the running game rack up 227 yards.

Sarah Anne Wharton / Juniatian

Gym renovations

continued from page 11

court. It is equipped with light-up signs featuring sponsors's names and will have more room for seating than the previous scorers' table.

Also in the new gym, a mezzanine level will be added to expand seating capacity, showing that Kennedy is now more than an athletic facility. The addition will also give Juniata an opportunity to host other events that could potentially generate revenue for the College.

"The bleachers on the mezzanine gives us a great deal more seating," Curley, also the head men's basketball coach, said, "which gives us more flexibility to host PIAA events, such as district championships and those kind of things."

In addition to the renovations in the main gym, the football locker rooms were also completely redone.

"The new locker rooms are a great improvement for the football program," senior football player Adam Black said. "The new lockers are much larger and you can actually enjoy sitting in your locker rather than struggling just to reach around the two other guys beside you just to get something that was in your narrow little locker. I feel that the new lockers actually bring much more organization to the team as a whole."

The first home sporting event in the new gym was held last evening on September 21, when the women's volleyball team hosted Susquehanna in a MAC contest.

Senior volleyball player Abby Leonard was excited to get the home season underway after weeks on the road.

"I think the gym looks great! I'm really looking forward to our first home match," she said. "Hopefully we'll get a lot of fans to help christen the new gym."

Experience key for men's soccer

Veterans learning new system

Robb Patty

Entering the 2005 season, the Juniata men's soccer team feels confident and optimistic. The Eagles top seven goal scores and two goal keepers return to a team that looks to improve on a 1-6 conference record from a year ago.

With that optimism comes a new style of play that should give the Eagles more opportunities to get shots on goal and hopefully add more scoring as the season progresses.

"We have high expectations this season," said senior co-captain Jeff Gehring. "Preseason was a lot tougher, but there's evidence that we have what it takes to win. With a more attack-oriented style of play we are getting more opportunities to score and it is evident in the box scores as were out shooting our opponents."

The team opened up play with back-to-back tournament appearances at the Penn State Behrend and Altoona campuses. The Eagles posted a 1-3 record at the tournaments, their only win coming against Marietta. The games provided a great warm-up as the team prepared for the regular season.

Juniata traveled to Carnegie Mellon this past Saturday to square off against the nationally-ranked Tartans. The Eagles played a solid game throughout, but late into the second half the Tartans put together a three-goal spurt in 11 minutes to put the game out of reach and defeat the Eagles 4-0. With the loss, Juniata falls to 1-5 on the season. Goalie Tim Penrod finished the contest with 10 saves.

The Eagles also played Lycoming last week, dropping the non-conference game by the score of 2-1.

Juniata fell behind 2-0 early in the second half and it wasn't until the 71st minute of the contest that the Eagles were able to get on the board. Sophomore Brandon Grimm recorded his first career goal off sophomore Chad Weller's pass. Juniata would register six more shots on goal but none would find the back of the net.

Juniata is back in action today-when the Eagles host Mount Aloysius at 4:00 p.m.

See Women's Soccer, *page 14*

Curley named assistant director of athletics

Head men's basketball coach Greg Curley was named assistant director of athletics on July 1. Curley's administrative duties for the position, which has been vacant since 2004, began immediately.

"I think that I can bring some positive energy and a positive approach to Juniata and the athletic program, so I just look at it as a really good opportunity and a good step professionally," Curley said.

Director of athletics Larry Bock saw several traits in Curley that made him an ideal candidate for the job. "First of all: professionalism. There is just no question that you feel that just being around coach Curley," he said. "On a professional basis, one feels the attention to detail, obvious intelligence, and a big one is a sense of true commitment to our students."

Curley's main responsibility in his new position is NCAA and Title IX Compliance Coordinator, which is an official position with the NCAA. Also, he will remain in charge of the indoor facilities in the Kennedy Sports and Recreation Center, something that he has done for many seasons. Curley has already played an integral role in the main gym and football locker room renovations that took place over the summer.

"My other big responsibility is the baseball team," he said, "which is a sport I'll work close with and work with Coach Zanic and help him as much as possible with their program....Since Coach Zanic cannot be on campus as much as other coaches, this is where I will be helping by always being on campus," Curley said.

Curley's new role will also involve assisting the baseball program in areas such as budgeting, scheduling and staffing issues.

JCWS: The Real Football

Kim Wagner

The Juniata College women's soccer team has evolved over time, creating what head coach Scott McKenzie likes to refer to as "a family; a group of women that would die for each other."

This team has become close throughout the past few years which helps them while on the field. Sophomore goalkeeper Lisa Russo said, "We know each other and what we are thinking. We're prepared for their next move."

The women started off their season with a trip to England and Scotland in the beginning of August, where they participated in three games against professional-level teams. The Eagles experienced what it described as the 'real game of football.' "It was an amazing, once in a lifetime experience, being in a foreign country with twelve of your best friends," Russo said.

The game in the UK was more physical than the Eagles are used to, but they put up a good fight, ending their trip with a record of 1-2.

"It was great to be Americans over there," McKenzie said. "England now has a great appreciation of what American athletes can do."

The trip proved to be not only beneficial on the field, but off it, too. The women used the trip as a bonding experience.

"You could hear us coming from a mile away. We were the loudest team in England," McKenzie said. "This trip prepared them for the rest of the season."

The team is led by senior co-captains Nikki McLellan and Lauren Welsh.

"No two others on campus bleed blue and gold soccer like these two," McKenzie said. "They both carry strong leadership skills and are pushing the team to do what they know it is capable of."

The Eagles will need that veteran leadership this season; competition this year within the MAC will be tough. Juniata was chosen to finish eighth in the preseason polls with eight points.

The team welcomes in five new freshmen and one sophomore to its program this year. These women will have a great impact on making the team stronger on the field. Freshman Christine Schott came into the season ready to perform, earning herself a starting position on the defensive line. Freshman Carly Endres will also be a significant asset to the team in the midfield. And freshman Kerri Lawrence has now stepped into the starting line-up due to the recent injury of starting goalkeeper Russo.

The women began their regular season with a 1-1 tie verses La Roche. Juniata's goal was scored by Alicia Walsh.

After three tough losses in a row, the Eagles bounced back in a big way with a 9-0 defeat of Penn State Altoona. McLellan netted four of the nine goals, Walsh scored twice and Kelly Howard, Lindsay Garvey and Shiloe Mokay each added a goal apiece in the lopsided victory.

In some stiffer competition last Thursday, the Eagles traveled to take on Division II Mansfield, where they lost 5-0. The game will be a valuable learning tool for MAC competition.

Despite the tough start, McKenzie likes his team's character.

"They are confident, athletic women, and proud of it," he said. "They are proud to wear their uniform and they are proud of their school."

Field hockey off to slow start

Aly Pompeani

The Juniata women's field hockey team returns 16 upperclassmen and adds five freshmen to last season's outstanding 14-5 team.

"Many are concerned with the number of seniors we lost last year but we can't dwell on what we lost," senior Elise Zimmerman said. "Seniors leave each year and we continue to get better despite that."

After a grueling week of preseason three-a-day practices, working through injuries and uniting a new team, the players stepped forward into the new season.

"This year, the team's small communication/possession game was one of the best," head coach Caroline Gillich said. "Now, we have to elaborate those skills into bigger games."

Senior captains Zimmerman and Andrea Way will provide leadership. All upperclassmen will be expected to be role models for the new players, bringing excitement, commitment and fun to each practice.

Each week, outside of practice, the team meets to discuss its goals for the season. This year, the long term goals include a return to the MAC playoffs and making another appearance in the NCAA Tournament.

The women also discuss their short term goals each week. Last week, they set out to concentrate on three specifics: working on their game speed, working in zone and to caring for the ball as a team.

Sarah Anne Wharton / Juniatian

Gillich makes sure her team is process-oriented. "We take small steps every day towards improvement. We use a day-by-day strategy," she said.

The conference this year is expected to have remained strong. More teams, however, are now playing on turf fields. This is one thing the Lady Eagles are not used to. Although they are excited to play on turf, "it is like playing a whole different game," Gillich said. "The ball spins differently and the game requires different skills."

"It is a much faster paced game when it is played on turf," Zimmerman added.

Practicing on a grass field and then playing on turf is going to be a challenge for the Eagles, but it is something they are working on overcoming.

Gillich and her squad started the season off strong at Wooster, defeating the Fighting Scotts in overtime, 2-1. Both goals were scored by junior Sarah Bender and assisted by Zimmerman.

Juniata dropped its next five games.

In the conference opener, a home contest against Widener, Juniata outshot its guest, but let in an early goal that would prove to be the difference in a 1-0 loss.

Besides the early score, Way played admirably in goal, stopping every other shot.

The loss dropped the Eagles to 1-5 overall and 0-1 in the conference.

"Although we got off to kind of a rough start this season, I am confidant in this team and in what it can do," sophomore back Ashleigh Ehnts said. "We are a very talented and skilled team and I know that together we can do great things."

The field hockey team's next home contest is for September 24 at 1:00 versus conference foe, Moravian.

Rice's legacy impossible to tarnish

Tommy McConnell

You know the little ticker that runs across the bottom of the screen on every sports channel? Gives you scores, updates and other breaking information as quickly as possible? I hate it. Can't stand it, never will.

I mainly despise the little thing because ESPN will run it during SportsCenter. Clearly, if I have taken the time to sit down and watch the show, I don't need the little ticker telling me what I am about to watch. And ESPN has a habit of running the score on the ticker of the exact highlight I'm watching. I mean, really, what's the point? Do me a favor and show it during commercials or something, but get it as far away from SportsCenter as possible.

Well, a couple weeks ago, SportsCenter is on, so of course I'm watching the ticker. Then, quickly, "Broncos WR Jerry Rice retires" flashes across the bottom of my screen. And that was it! Like a third string running back pulled a hamstring or Ricky Williams failed another drug test.

Reason Number 371 Why I Hate the Ticker: the retirement of the greatest wide receiver – maybe the greatest football player, period – of all time gets a five word blurb.

Now, I'm a little biased here. As a kid, Rice was my idol. I had the jersey, the cards, the posters – if there was a red and white number 80 on it, I had it. When the 49ers (my favorite team solely because of Rice) let him go, I contemplated ending my fanship with them. Sure, it wasn't the same following him with the Raiders or the Seahawks, but my favorite player of all time was still catching touchdowns. Not as many, but he still was. No complaints here.

Well, now I have a complaint.

Since Rice has decided to retire rather than be a third or fourth option in Denver, talking heads should be devoting entire segments to praise him. Sports columnists should be writing thousand-word articles lauding his talent and longevity (one of the rarest combinations in sports, by the way).

And while that discussion has taken place, the main theme when dealing with Rice's retirement has been, Why did he hang on so long? Why would he hang around, changing teams like Ohio State changes quarterbacks? Why would he taint one of the greatest legacies in pro football history? Why wouldn't he just retire and spend the next five years working on his speech for Canton?

When I heard people were actually debating this on national television, I looked like Mike Myers during Kanye West's rant about George Bush. Just stunned.

First of all – huh? This is even an issue? What does it matter how long he played? As long as a team was paying him to catch passes, he was still very, very good at his job, right? It isn't like he was forcing teams to play him, was he? Teams paid him because they believed he could help them win football games.

The main argument for an earlier retirement is that Rice was tarnishing his legacy. Really? After dominating defenses for years, he was still able to compete at the highest possible level years and years after his peers had retired. 20 years in the NFL? Maybe for a punter, but not for someone at a skill position based largely on speed.

Shouldn't the fact that Rice was able to compete when he was 42 years old enhance his legacy? Just compare his stats to other wide receivers after they turned 40 (don't waste your time; Rice is the only receiver to have done so).

And this wasn't like Rice was lingering Bruce Smith-style, barely hanging on to break some record. Rice retires years after rewriting every meaningful receiving record in the NFL.

Admittedly, the last few seasons haven't been the glory days. Seeing Rice in that hideous Seahawks jersey was painful, and highlights of Rice in a number 19 Broncos jersey just wasn't right. What if Jenny changed her number from 867-5309? Some numbers just need to stay the same.

So when was the right time to go?

The answer to the question is that there is no right answer. When Michael Jordan retired the first time, everyone felt it was too soon. When Jordan retired the third time, everyone felt it was too late. Whenever a player retires, especially a great player, the timing will always be wrong.

So let's just stop the debate. Rice's retirement was a reflection of his career. Had he retired earlier, it wouldn't have fit his body of work. Rice was all about dedication, going the extra mile, getting the most out of his god-given ability. If anything would have tarnished his legacy, it would have been retiring earlier. Of all his records, playing 20 seasons may be the most impressive.

He was never the fastest or the most athletic receiver, but he was the hardest working. Every day, for twenty years, Rice squeezed every drop of talent out of himself, and the result was an unparalleled career.

So while critics and columnists will say he hung on too long or that he tarnished his legacy, I couldn't disagree more.

In my book, Rice retired at the perfect time.

Volleyball: match success?

continued from page 11

The next day of the Invitational, the Eagles came back with victories over both Trinity University and eighth-ranked University of La Verne.

In the Trinity match up, Kines led the team with 20 kills and three blocks. McMinn added 19 digs and three aces, while freshman Mariel Little and Thomas added 32 digs total. Senior Katie Laucks posted a team high in blocks with a total of four in the match.

The second match was well fought against Trinity, with Juniata again pulling out a 3-1 victory.

Kines again led the offense in kills, this time with 22. Thomas also added 16 kills for the Eagles. McMinn contributed 20 digs and Leonard added 13 of her own. Laucks played an excellent all-around game, finishing with 13 kills, four blocks and five aces.

After a grueling non-conference schedule in which the Eagles played all their games on the road, they return to both their home court and their conference schedule.

The Eagles play three home games this week, including weekend match-ups against Rutgers-Newark and York.

New attitude for football program

continued from page 12

Lebanon Valley could not generate anything offensively and punted the ball back to the Eagles with 2:21 on the clock. The Eagles managed to pick up just one first down on the drive. After Leonard's fourth down pass fell incomplete, Lebanon Valley took possession and held on for the 35-27 win.

Leonard went 12-31 in the game, throwing for 172 and two touchdowns.

Junior running back Duane Ehredt Jr. rushed for a career high 221 yards.

Defensively, junior Zach Shatto led Juniata with 13 tackles, and sophomore Dominick Wytovich added 13 stops to go along with an interception.

In its MAC opener, Juniata traveled to Lycoming. The Eagles had a difficult time both offensively and defensively in the first half as the team allowed 371 total yards, allowing Lycoming to jump out to a 28-0 lead at the half.

The defense stepped its game up in the second half as the Eagles limited the Warriors to just 86 yards of total offense while forcing three turnovers. The offense, however, could not generate any momentum and had trouble converting on third downs.

The lack of success on third down is something Juniata sees as crucial to its success.

"We want to judge ourselves on offense by how well we convert on third downs," Alt said. "Get Jay in a position to manage the game."

Week by week, the team is improving and building chemistry. With the hard work being put in not only by the players, but the coaching staff as well, the team is hoping to find success in the not too distance future.

"For the group of players we have I like to use the term 'finishers,' Alt said. "They practice hard and work hard and are slowly starting to bond as a team."

THE RANDOM ELEVEN

Matt Russell

Scrable champeon: After bragging about his second consecutive Scrabble victory over myself and an English major, my roommate proclaimed his intention to post the info in his AIM profile. As he went to type it he, turned to me and asked, "Wait, does Scrabble have 2 'b's?"

Seasonal credits: Has anyone else noticed that overload credits (any exceeding 18 during a semester) are $250 per credit more expensive than summer credits? I guess it's harder for the college to produce credits when it gets chilly.

The bounty of PA, given for you: Have you seen the newest line in Baker? It's composed of local-grown food and it's quite delicious. But with the elaborate vase of olive oil, the breads, and the basket of fruit… let's face it. It looks like the Last Supper. Who wants a second helping of Jesus bread?

Founders Hall makeover: Perhaps an unintended consequence of work done in front of Founders Hall is that classes in Good Hall who need to disperse into groups for a while now have a nice place to sit outside. The benches were a nice addition to the campus landscape.

Oh sure, add it to the list: I recently witnessed a chorus of "oohh" in Baker when someone dropped a glass. Nothing unusual there. However, I soon realized the football team was out on the field practicing. The virus has spread. Heck, let's just call it a tradition and put it in the brochure next to mud volleyball.

What Baker really needs: Instead of re-serving yesterday's leftovers in creative disguises, I think they should just stop pretending and throw it in one big pot. Call it the Cauldron Line. Mm-mm good.

Alright, fine, I'll say it: *Baker food has been pretty good this year.* What? I said nothing.

Grab a bucket: A friend, out of the blue, turned to me and said, "Did you know toe-sucking is a fetish? I learned that from VH1's Popup Video." Coincidentally, something popped up out of my stomach just then.

Evasive maneuvers, part 1: If someone is walking towards you on the sidewalk, which side should you pass them on? Ponder that a moment.

Best drunken away message ever: Auto response from [username]: happy bie4thdayadspaoiosijdfpasoiudf;lkjasdklfmn;lakxcvhjvlokasdweeee

JUNIATIAN

HUNTINGDON, PENNSYLVANIA

OCTOBER 6, 2005 | JUNIATA COLLEGE | VOLUME 87, ISSUE 2

New sexual revolution?

Transgendered students, stereotypes, and Sex Talk

Nick Carney

There are two students at Juniata who can be recognized by their first names alone. No description is necessary. No adjectives are assigned to them. To most people, simply uttering the names "Ellie" or "Devin" is sufficient for reference.

Senior Ellie Long and sophomore Devin Couillard are leading the way in a new kind of sexual revolution at Juniata, one that puts them at its forefront. Long and Couillard are transgendered persons – the only two currently enrolled at Juniata.

The terms transgender and transsexual usually refer to people who reassign their identity to the opposite sex from which they were born.

"Well, I'm androgynous," said Couillard, "which means that I consider myself neither male nor female."

Many androgynous people, including Couillard, prefer the usage of non-gender specific pronouns such as "xe" or "xim." This article will honor xir request to use them.

The other transsexual on campus, Ellie Long, has taken a more definitive approach to her gender identity. Long, formerly a male named Barry, reassigned her gender identity over the summer after a lengthy internal conflict to make her exterior appearance match her inner feelings.

"People always think it was a choice I made. I had to do this," remarked Long. "I didn't just wake up one day and say, 'I think today I'll be a girl and see how this feels.' This is who I've always been. I feel like, now, I can be myself on more levels than I could before I was female. Personally, I feel better about myself now—no matter what other people think."

Long contacted the Dean of Students office this summer to officially change her gender in student records.

With rare exceptions, both Couillard and Long agreed that the campus community has accepted their gender reassignment.

"Everyone has been really great. But sometimes it makes me sad, really," said Couillard, recalling a difficult episode earlier in the year. "Someone tore down the name tag on my door. I don't really know why."

Long recalled a similar, more

continued page 2

Holly Brown / Juniatian

Sophomore Devin Couillard hosted a "Sex Talk" on STIs, barriers and safe sex. The talk was held in Good 202 and the audience spilled out in to the hallway. Couillard's talk filled the room, and any questions were encouraged.

MOUNTAIN DAY ESCAPES TRADITION

For once, the rumors were right

Rebecca DeHass

Around 5:15 a.m. on Wednesday September 21, RA Claire Dempsey thought it was a big joke when she woke up to the sound of banging pots and residents running down the hall screaming, "It's Mountain Day!"

"I wasn't very happy about it," said Dempsey. "I was the one who was supposed to get the call and do the waking up, not be woken up."

Traditionally, Mountain Day is a spontaneous event and one of the biggest secrets of the fall semester. Students will often guess many times before Mountain Day actually occurs, but this year there was little surprise. On the first day most students rumored to be Mountain Day – they were right.

Six JAB members and three departments – facilities, catering, and the student activities office – knew which day was Mountain Day prior to that morning. The secret was revealed to other JAB members on Tuesday evening.

"I told my committee the night before to make sure things went smoothly on Mountain Day," said Heather Kelly, the JAB member in charge.

Rumors began that evening, and in an online poll conducted by the Juniatian more students claimed to hear about the event from a "friend with a reliable source" than anyone else. Whether those "reliable sources" were JAB members could not be determined by the poll.

Only eleven percent of the sur-

Veteran archivist irreplacable

Donald Durnbaugh, Juniata's volunteer Archivist of 20 years, passes away unexpectedly

Jessica Ocampo

One of Juniata's treasures is its special collection of books. Donald F. Durnbaugh, Archivist, presided as Juniata's authority on the collection for 20 years. August 27 he passed away.

It was an unexpected death. Durnbaugh was traveling home from a trip to Europe. During the plane ride home, he became sick.

Library Director, John Mumford said, "From there, it just went downhill." He died due to "complications" of his illness. No further specific details were released.

Durnbaugh's funeral was the weekend of September 24, 25.

He left behind a legacy in the book collection. Durnbaugh was the resident "guru" and left things in good repair. Additionally Durnbaugh instructed the library staff on how to care for the books. Mumford is optimistic about the collection's future.

"We will be missing the expert, but he taught our staff well. The library staff will do our best to maintain the collection," said Mumford. "I don't see that there will be any changes in Special Collections."

There are no plans to hire a new archivist.

"He really can't be replaced," Mumford said. "It is easy to find another manager to keep things in line, but it will be hard to find another scholar."

Fluent in German, Durnbaugh often traveled to Europe to refresh

1 Is one credit worth it?

Laura Sweltz

From Information Access to Organic Chemistry labs, the range of one-credit courses offered every semester at Juniata College makes many students question if the one credit justifies the courses' workloads.

For many one-credit courses, the Registrar, Athena Frederick, assumes that there will be one hour of class time accompanied by three hours outside of the class spent on independent work by the student. In order to receive one credit, a course must acquire 15 hours of class time over a semester. Many one-credit courses like Information Access and CWS Lab follow this format.

However, there are several courses that meet for up to four hours a week but still only receive one credit. Almost all of the science labs take up to four hours per week in the lab. Concert Choir also rehearses four hours a week.

The Registrar said that students only receive one credit for these courses even though they put in four hours of class time because "the makeup of the work calls for the work to be done inside a classroom instead of on their own because students need to work in the laboratory or practice their mu-

Diversity Workshops

How diverse is Juniata really?

Brittany Crawford

When you hear the phrase "diversity workshops," a dull lecture about the how you should define diversity might come to mind. That is not the goal of the workshops coordinated by Rosalie Rodriguez, Special Assistant to the President for Diversity and Inclusion.

The diversity workshops, which are held once a month and feature different speakers and topics, aim to do much more.

Rodriguez's main hope this year is to bring racial conflict out in the open. "I want to talk about what they don't want to." She said, "Not everyone will take what is said as happy. This is meant to cause controversy. It's hard to swallow when you realize you are a little bit racist, and I think everyone is a little bit."

And it seems that is true even for people affiliated with Juniata. It was mentioned at the workshop that last year there was a concern that we were lowering the standards of the College by becoming more diverse. But even with such reactions, people still believe that Juniata is not diverse enough.

Monteze Freeland, a freshman, participated in last summer's Plexus orientation designed for students concerned with multicultural issues. She believes that diversity is an even mixture of cultures and races. Freeland said, "Juniata needs to reach out to more students outside of Pennsylvania."

The first workshop was help on September 22, and was led by Rodriguez herself.

Next on, Wednesday October 22, the workshop will feature Juniata's Catholic campus minister Lisa Baer, who will be speaking on interfaith contemplative practices.

The first workshop focused on what is meant by 'diversity.' Rodriguez began by telling everyone that this was not a lecture, but a fun discussion. The first question that Rodriguez asked was, "Why is diversity so important?"

One student answered, "Diversity is everywhere, and this makes sure that you are prepared."

Freeland also thought that the importance was to get to know as many different people as you can. "You need to get firsthand experiences."

Rodriguez provided her perspective on the subject by saying, "Everyone has been in the minority at sometime. It gives you the power to help and sympathize with people."

Twenty-three people attended the first discussion, but Rodriguez said that last year's lecture brought in thirty-five to fifty people. She attributed the low attendance to the power outages that occurred just hours before the workshop started.

Nonetheless, Rodriguez is very excited about this year's program. She said, "Last year the workshops did one main thing. It got diversity on people's minds." This year the workshops focus on narrower issues.

On November 16, Reverend Dr. Jamie Washington, a renowned national speaker, will lead a discussion about examining Christian privilege.

In the spring, on February 15, Brian Johnson, from Manna Unlimited Motivations, will speak on the psychology of color.

And on March 22, Jennifer DeCoste, who is affiliated with Penn State, will lecture on Jane Elliot's

Nate Drenner / Juniatian

Disaster relief for Hurricane Katrina victims is far from over, and the Juniata community is still making an effort. Sarah Worley and Kevin Ott (pictured), instructors in the ECTA department, and department chair Donna Weimer collected backpacks filled with books, toiletries and toys for children affected by the hurricane.

Cy deVries, professor of sociology, Paula Martin, professor of environmental science and Ott also held roundtable discussions in the weeks following the disaster. Topics included the factor of race and class in relief efforts, the impact on New Orleans's environmental systems and media coverage of the disaster and its aftermath.

New sexual revolution

continued from page 1

public event during which a group of students made a deliberate effort to humiliate her—snubbing her by hiding their faces from her in Baker Refectory as she walked past them.

"They just covered their faces up with their shirt collars like this [she demonstrates]," remembered Long. "I just kept walking."

Couillard said, "I've had problems with a few people. [Especially] some guys on my floor who claimed I was shaving my legs in their bathroom. So now I have to go to a big meeting with the RD of my building and everybody to decide what to do, which bathroom I should use."

Couillard, as of the time of publication, is only permitted to use the women's facilities in xir dormitory unless performing an overtly masculine activity, such as shaving xir face. Xe lives with a female roommate.

Long lives in an off-campus apartment. "It's really helpful not living in the dorms," she said. "I almost never use the bathrooms here unless I'm near one of the few gender neutral bathrooms, like in Good or Ellis."

Dean of Students Kris Clarkson, the chief decision maker on Juniata's handling of these issues, said that while Juniata has no formal policy on which bathrooms transsexual students can and cannot use, he also made it clear that "the men's rooms are for men, and the women's rooms are for women."

"We've been fortunate that these individuals have not been particularly demanding or forceful. They've been really understanding of other people's comfort levels," added Clarkson. "But this situation also helps us to realize that there is a need for more gender neutral facilities campus-wide, which we are working towards right now."

Aside from restroom issues, all the individuals close to the issue agreed that asking questions was the key to a greater understanding.

Sarah Kotora, co-president of All Ways of Loving (AWOL) commented, "[Juniata is] not a very sexually diverse place.... That's not to say there's a lot of anger towards homosexuals and transsexuals, but there's not a lot of understanding or acceptance, either. We get kind of put on the sidelines. Just ask us questions [if you're confused], most of us would be happy to answer them."

Holly Brown / Juniatian

Sophomore Devin Couillard hosted a "Sex Talk" on STIs, barriers and safe sex. Here, Couillard demonstrates a female barrier with Freshman Wylie Earnhart as an assistant.

This promotion of understanding is one of the reasons Couillard, a human sexuality POE, hosted a "Sex Talk" on Sept. 20, which was heavily attended. Topics covered included everything from proper condom usage to the details of sexually transmitted infections.

AWOL also plans to promote a greater understanding of transsexuality and its associated issues. This includes holding a transsexuality forum in November.

"I'm not sure a public forum is the best place for this kind of discussion," said Clarkson. "We're a very small campus, and most of the time that's a good thing. But in this case, putting your heart out on your sleeve and saying 'this is who I am' may not be the best thing. But I do think an open dialogue is necessary for understanding [each other]. We talk a lot about diversity, but the bottom line is that 70% of our students are from western and central Pennsylvania – I'll let you infer from that what you will."

Aside from their associations with transsexuality and AWOL, both Long and Couillard are highly productive and active members of the community. Long, a physics honor student, looks towards graduate school and ultimately research in her field. Couillard is one of only two human sexuality POEs on campus and aspires to become a sex therapist.

Enrollment getting 'Back to Basics'

Jessica Ocampo

Spring cleaning has come to the Enrollment Office early this year. Its new motto is to "get back to basics." To do so, the staff plans to move excess duties out of the department while preparing a new online portal for potential students.

Michelle Bartol, Dean of Enrollment, and Michelle Corby, Assistant Vice President for Marketing, are a close-knit team. They have been working on redirecting Enrollment's priorities.

But is Enrollment looking for more prospectives and incoming students? Not at all. Currently, the target number of students to be enrolled is 400 to 407.

"I would feel terrible if it was less than 400, and I would feel terrible if it was over 430," Bartol said. She realizes that there are only so many dorm rooms and recognizes Juniata's position as a small school. This year, the total student population is a little over 1400.

"We are a big word of mouth school"

- Michelle Corby, Asst. VP for Marketing

"We are a big word of mouth school," Corby explained. "And every four to five years the communication is redesigned." It is not unusual for Enrollment to make new efforts.

A new step Enrollment is taking in student connectivity is "My JC." The name may not stick, but the concept is proving to be a keeper. It is like the Arch for prospective students. High school and transfer students can log onto My JC with a user name and password to connect to the campus and their admissions counselors. They can choose favorite activities and receive related announcements. Their account keeps track of their visits and sends thank you notes. They can also speak with their counselors and look up classes.

Both Bartol and Corby noted that Juniata's biggest draw in the annual college search market is its personal attention to prospective students and their families. But Enrollment had duties conflicting with their main object of fostering strong communications with students. To remedy this, indirect jobs, such as the scholarship nominations held every year, were moved to other departments.

The extra jobs were taking time away from counselors to call prospective students and make important connections.

Bartol and Corby explained it is tricky to figure out how to communicate effectively with everybody. With this technology savvy generation, My JC should hit home with the incoming classes. It is all about staying connected with the students.

This program is expected to be up and running by November 1. Currently it is in the trial stage where administration, faculty and students will be given a chance to try it out and see if anything is missing.

My JC was a do-it-yourself project. The nice part about this was that it fit Enrollment's given budget. "Many schools have programs like these, but they range in the six digits," Bartol said.

"The great part about ours is that it is personalized to fit us. We have a great team who has put this together," Corby said. She and Bartol, along with Joel Pheasant, Director of Academic & Business Systems Technologies, Rick Stutz, Coordinator of E-Communications, and Rick Brown, Database Systems Analyst, worked together to develop the system.

Mountain Day: No secret?

continued from page 1

vey respondents did not know the date of Mountain Day.

Freshman Taylor Brown said, "In my opinion, the event wasn't really hidden to many people beforehand, but then when I got there it was a lot of fun just throwing the Frisbee around."

Many people point the finger at JAB for not keeping Mountain Day's date a secret. According to Kelly and Staci Weber, the director of student activities, JAB had planned to begin creating rumors at the semester's start to attract attention to the event. Kelly said that when questioned about the date she tried to convince students that Mountain Day would be in early October.

However, September 21 was one of the dates leaked. In the Juniatian's poll, seven percent said the surprise was leaked to them by a JAB member.

A handful of faculty members and a few PAR students say they were skipped over during the morning phone calls to notify people about Mountain Day. According to Weber, over 170 people requested phone calls on Mountain Day. Of those requests, Weber said only four were missed when the phone calls began at 5:00 a.m. on Wednesday morning. Furthermore, Weber said that the four mistakes occurred because JAB members were given incorrect phone numbers or no number at all in the requests received.

However, 12 faculty members told the Juniatian that they were not called on Mountain Day morning as they requested and came to campus expecting classes to be held.

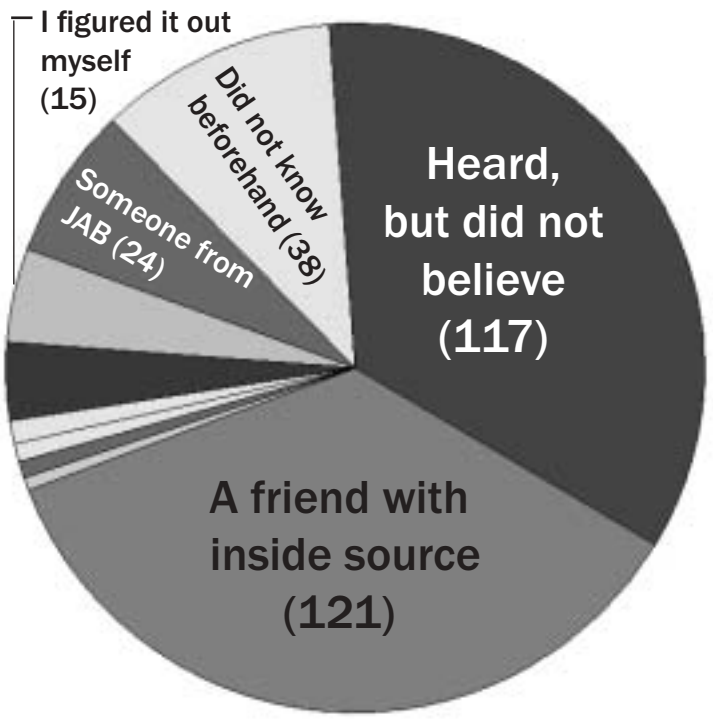
One faculty member in the CS/IT department drove over one hour to campus only to find classes cancelled.

Professor Donna Weimer, who resides in State College said, "I did not receive a phone call for the first time in ten years. I was more concerned about two PAR students who drove in quite a distance."

Monday of that week, there was an announcement in the daily e-mails that asked off-campus community members to request a phone call on Mountain Day morning. For some, the announcement went by unnoticed or ignored. PAR student Linda Guy was not aware of the announcement and drove 54 miles from Clearville, PA only to turn around upon arriving at campus.

"Most PAR students only glance at the announcements because most of them are for the younger students that live on campus. I went back and looked closely. The announcement was small and only three days before Mountain Day, which was not much time for word to get around the PAR lounge or even for us to answer it with our busy schedules of traveling, school, home and family" said Guy.

Despite the communication problems, Mountain Day itself turned out quite well, with beautiful weather and new activities designed to keep students at the event – not just eat and run. JAB wanted the day to be inclusive for everyone by adding non-athletic events such as t-shirt designing.



Kelly admits that there is always room for improvement, such as the one bus breaking down during a trip to the lake, as well as finding new ways to get students interested in Mountain Day as a campus event and not just a day to sleep in and forget about classes.

Kelly added that the mystery of Mountain Day's date is something every Juniata student wants to uncover. "I think at any Mountain Day it (the secret) always sort of gets out. I think because it's such a big deal to know, it's such a hard secret to keep at such a small school."

Holly Brown / Juniatian

Juniatian Poll: *Who told you when Mountain Day would be?*

There were 339 responses to the poll. Unindicated responses included an RA, a professor, an administrator or staff member, a Sodexho employee or "other."

Is one credit enough?

continued from page 1

sic together. Instead of one hour of class and three hours of work on their own, it is all done in the classroom."

Juniata College receives its accreditation from the Middle States Association of Colleges and Schools and abides by that organization's guidelines for giving credit.

But many students disagree and believe that they put in four hours of work in the classroom and continue to do work on their own as well.

Labs require outside work because students must prepare themselves for lab and write lab reports. Freshman Lindsey Mellott said, "With all of the work that goes into lab reports and preparations outside of lab should make the lab worth more than one credit."

Vincent Buonaccorsi, assistant professor of biology, stated that "there is work outside of lab, but the amount depends on the specific lab. Also, labs are not as intense as being in class."

First semester freshmen with science POEs who take both Organic Chemistry and Biology, and the accompanying labs might disagree. Freshman Kelly McLin said that "being thrown into eight hours of lab a week has been stressful and requires work outside of the lab as well."

Frederick recognizes that freshmen enrolled in both Organic Chemistry and Biology during their first semester are challenged but that "it is only for one term and it is an orientation experience that pulls them through so they can be successful later on."

Concert Choir also meets for four hours a week and students must spend time on their own learning the material, but they only receive one credit. Women's Chamber Choir and Choral Union are the other choral programs offered – which also receive one credit – but each group only meets for one hour a week.

Although Concert Choir receives the same credit as Women's Chamber Choir and Choral Union but take less time, Concert Choir members value their experiences with the Choir.

"I don't do it for credit. It's more about the experience," said choir member Dan Long, a junior.

Frederick agreed, saying, "Character building and the experience" are important aspects of these classes."

She also mentioned that many learning experiences happen during college that students are not given credit for. Certain internships, sports and clubs all require a great deal of student involvement and time. Such things do not provide credits but do provide excellent opportunities.

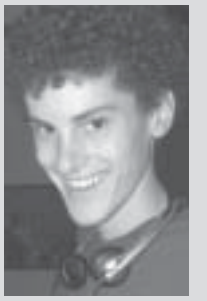
Although students do not receive college credit for their efforts, these activities help shape them into more diverse, successful individuals.

"We don't give credit for sports, but students put many hours into those programs because they are still learning, even though it's outside of the classroom," said Frederick.

Faculty are also affected by one credit courses. They are required to obtain a certain number of contact hours every semester. Contact hours are similar to student credit hours; they are the number of hours a faculty member must teach per week.

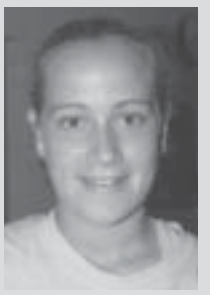
For preparing and administering a four hour lab, faculty only receive two contact hours with students. Buonaccorsi said, "I spend between half an hour to three hours just preparing for my labs."

The format, objectives, and workloads of one credit courses offered at Juniata differ depending on the particular course, but each still receives one credit.

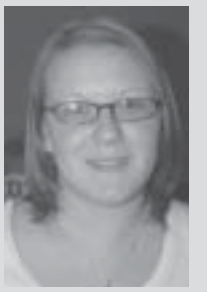


Note: The Juniatian is produced through the Writing Practicum, a one- or two-credit course.

Roving Reporter



Is it fair that lab and practicum credits are often disproportional to the amount of work done?



"I think it's horribly unfair. Sometimes people put so much work in and only get one credit… it's a load of hooey."
- Kevin Fasick, senior

"If you do an extra hour of work you should get an extra credit." - Pete McLean, freshman

"No. Because we [science POEs] are in class for so long, others can have more credits and can be in class less hours."
- Lisa Russo, sophmore

"No, it's not fair. The idea that we can't take more credits is unfair because it's all about balance – you're balancing a [practicum or internship] with credits. I think I should be able to take more because I'm used to balancing a job and school work every day."
- Rachelle Luther, senior

Photos by Sarah Anne Wharton

Diversity Workshops

continued from page 2

"Brown Eyed/Blue Eyed."

The diversity workshops are an hour to an hour and a half long. They give students and faculty alike a chance to become involved and to learn more about issues important to our campus and our world.

Freeland stated, "These workshops make you think, but they are fun. It's easy to meet new people at the workshops."

Rodriguez also wants students and faulty to come and give the diversity workshops a chance. She wants to get everyone on the same ground, and hopes these workshops will help. She said, "Juniata has come a long way in a short time, but we can always do more."

So just how diverse is Juniata? Rodriguez said, "Juniata is one hundred percent diverse."

Archivist

continued from page 1

his historical knowledge.

A member of the Brethren Church, he specialized in Anabaptism and pietism. Broadly, Anabaptism is the practice of baptizing of infants. Pietism is the idea of leading a pure, Christian life. The Juniata book collection has a large section of material concerning the Brethren Church. A specific example is Biblia, a German Bible from 1743.

One of Durnbaugh's favorite stories of the collection was of Abraham Cassel, one of the main benefactors to the special collections. Cassel had a father who vehemently opposed education. He was a farmer and felt that learning would lead to cleverness and the path of the devil. However his son, Abraham, collected over 50,000 books and was a great supporter of learning. Like Cassel, Durnbaugh supported higher learning and the book collection.

Mumford said, "It is no coincidence he was here. The collection fit him. He loved it."

On Tuesdays Durnbaugh volunteered his time and expertise to help maintain the book collection. He worked with other scholars in-depth and brought his specialized knowledge to the collection. He also contributed to the library with his own books and editing. Among his projects, he was the head editor of the Brethren Encyclopedia and authored Fruit of the Vine.

Durnbaugh's wife, Hedda, is an archivist as well. She has worked along side her husband helping patrons and maintaining Juniata's book collection. She will continue to volunteer at the library.

The staff remembers Durnbaugh as a very kind and helpful member. Mumford speculates that there will be a tribute to Durnbaugh in the next library renovation.

Integrating Internationals: Who is responsible?

Both sides' reluctance to reach out first makes integration difficult from the start

John Narayan Parajuli

What I fantasized wasn't entirely true.

My arrival to Juniata wasn't exactly great, as I had hoped. The first few weeks were depressing – partly due to Juniata's middle-of-nowhere location and partly because I was a lonely stranger in a strange place. And the Baker food made me, if not home-sick, at least "food-sick."

The only comfort came from being huddled with other internationals who were foreigners like me and whose English fluency wasn't intimidating. I could relate to them: They were new to this environment like me and were facing the same ordeal.

This is a common experience shared by most of the international population. There are 80 other students on campus (about 5.6 percent of Juniata's total population) from about 31 countries undergoing similar experiences. So what's Juniata doing to integrate these internationals?

"There is a lot of programmatic effort in place," said Kati Csoman, Juniata's Director of International Student Services. Effort is made to match internationals with an American roommates. There are different programs: the friendship family, conversation partner program and orientation to help students adjust to this new environment, Csoman said. Only this year the College introduced a mentor program. International students have many opportunities to make connections, she insists.

But how well are students exploiting those opportunities?

Internationals admit that they haven't really been able to mingle with the Americans. Some of them, on the condition of anonymity, said that they don't find Americans very welcoming. Others think that a communication barrier exists between them and the American students, which is compounded by the cultural differences. A sense of insecurity plus impressions of each other seems to further create this divide.

Some internationals think that only the Americans who have been abroad show interest in them.

"Americans who have been abroad are really interested in knowing us," said Zineb Gormat, a senior from Morocco. "They come to you and start the conversation."

The American perspective also sheds some light on what sustains this divide. They think the internationals bond together too much.

"I really want to talk to the internationals, but it is hard to break the ice when they are in this huge group," said Marion Wohlers, a sophomore who has lived in Russia. It could be little intimidating too.

Both sides' reluctance to reach out first makes the integration difficult from the start. But what further brings about this difficulty is early bonding between the internationals.

"They find in themselves the support system that they can fall back on," said Mark Holbert, International Students coordinator.

Playing each other's support system also effectively labels them as internationals. This reinforces the feeling of being different from Americans and thus dampens any prospect of meaningful integration.

What is the measure of integration?

"If a measure of integration is involvement and engagement, in-

continued back page

Holly Brown / Juniatian

Several international students share a table at Baker. Internationals often seek a support system with other students experiencing the same adjustment issues they are, but some Juniata students admit to being too intimidated by a large group to introduce themselves.

President Kepple wants to hear from you! He uses his column to answer any college-related question from the campus community. Simply e-mail questions to juniatian@juniata.edu, and the editors will forward them anonymously to Dr. Kepple.

Presidential Perspective

"When does the new strategic planning process begin? How can students get involved?"

The new strategic planning process has begun and will continue for the next year and a half. There will be numerous opportunities for student input and several students will be on the strategic planning committee which will begin work later this academic year. We definitely want student input!

"This year's Mountain Day was enjoyable and entertaining. However, unlike past years, many people seemed to have reliable sources for the calendar day on which it took place. Which part of Mountain Day is most important: the picnic itself or its spontaneity? If students know ahead of time which day is Mountain Day, does it take something away from their experience? What really makes Mountain Day a Juniata College tradition?"

The tradition is spontaneity which means even the president can't make them all. I really missed being there this year.

Students, faculty, staff, alumni: send your letters to juniatian@juniata.edu. We print all letters to the editor that are of interest to the campus community – in response to one of our articles or on a completely separate topic – so start typing! If you're lucky, we might even print a response. Please try to limit letters to about 300 words, and note that longer submissions may be edited due to available space. Opinions expressed on the commentary pages are not necessarily those of the Juniatian.

Seniors on the Job Hunt

Emily Eller

How do you get a Juniata graduate off of your lawn? Pay him for the pizza.

Ok. That's not entirely fair. In fact, in the class of 2004 (the most recent statistics available) all but 9% were employed or in graduate school within six months of graduation. Although this does not mean that alumni are doing the work that they would ideally choose, it does make it seem unlikely that "the real world" will mean moving back in with mom and dad, or waiting in the welfare line.

Said Dean of Students Kris Clarkson; "I think it's really stressful [for students when they start thinking about jobs and careers]. Many students are increasingly vocational." He went on to say; "Sometimes people will come in really upset; [saying] 'I just spent 3-plus years studying something and now I don't know what I'm doing.' So I just hope they were studying something they liked and not studying hoping to get a job."

A job is exactly what most seniors will have on their minds either now or when the spring semester comes. The Career Services office is expanding to fit student's growing employment needs. The new "Juniata Career Team" is meant to connect students with Juniata graduates, while workshops and job fairs are intended to prepare students better for the more formal job market.

Some areas of study are clearly more vocational than others. Students in accounting tend to be employed before graduation. Education majors know what their work will be, and particularly picky students protect themselves from post-graduation anxiety by putting the word "pre" in front of their studies; pre-law, pre-dental and the ever-present "pre-med."

But, what about "the humanities?"

"I think my life would be easier if I hadn't gone to college," joked senior Angela Davidson. "I don't know what I would have been doing, but I wouldn't have so many options."

It can be overwhelming to have so many options and so much pressure to decide where one wants to go simultaneously. Add to those pressures the fact that graduation can leave thousands of dollars in debt and no health insurance. It begins to become clear why seniors are anxious to know what they will be doing next year.

"I'm ready for something different," said senior Lauren Smith. "My high school was bigger than Juniata, so I'm ready to get out of high school; do something bigger and different."

When asked whether she chose her study path with a career in mind she explained; "When I chose my POE I chose pre-dental… when I re-chose my POE, physiology, I didn't have anything in mind."

Even with all the options that are out there, students should still be looking.

"The reality is that students are pretty bright here," said Darwin Kysor of Career Services. "If students are looking, they'll find good employment. If they are just sitting waiting for offers to come, they'll be waiting a while."

What happens at Mr. Juniata...

J. Atkins

Circle K presented the Mr. Juniata show, a parody of beauty pageants like Miss America, for the ninth time on Friday, September 30, in the Rosenberger Auditorium of the Halbritter Center. This year the theme for the show was "Las Vegas: What happens in Vegas, Stays in Vegas!"

"Let's leave what happens in Halbritter Center tonight in the Halbritter Center," commented Bub Parker, Mr. Juniata's master of ceremonies.

This year's Mr. Juniata winner was senior Max Stem, now also known as Spiderman, which he portrayed for his talent. Teamed with fellow contestant and classmate Jim Serfass, who dressed as Batman, the superhero pair pretended to avenge a band of bank robbers, after Stem swiftly climbed a rope in his Spiderman suit. Amazingly, Stem, an obvious crowd pleaser, was a first year participant in the show.

The final five contestants were Stem, Serfass, fellow seniors Jon Hoey and Brenton Mitchell, and junior Brandon Long. The Mr. Juniata first and second runner up positions were awarded to Long and Hoey, respectively. Mitchell was chosen to be Mr. Congeniality.

Other contestants in the pagaent included junior Justin Walstrom, sophomores Tommy Beideman, Adam Stanley and Marty Balaban, and freshmen Peter McLean, Fred McNeal and Wylie Earnhart.

The night opened with a stellar vocal performance by Those Guys, followed by a dance routine by the Mr. Juniata contestants to Michael Jackson's "Beat It."

Then the show moved to the contestants' talent segment. First up, Stanley sang "Pretty Fly for a White Guy." Next, McNeal's tricycle race occurred, never to be forgotten. Later, accused of being a suck up by Parker, Balaban sang, "It's Not Unusual" to Mrs. Pat Kepple, while President Kepple watched and jokingly feigned jealousy, intervening at one point to dance with his wife.

Next, freshman McLean performed his energized ribbon-dance routine with enthusiasm and umph. "I owe it all to my mom," claimed McLean about the routine.

Some contestants chose musical performances for their talent segments. Long and Walstrom both played the piano. Beideman sang, "Collide" to his girlfriend while playing the guitar. Earnhart displayed his vocal abilities and Mitchell sang with his full student band, Circle High 5.

Hoey, a repeat competitor, used the beat to bring back swing--performing an intricate swing dance routine with his girlfriend.

As the men showed off their evening wear, Parker remarked "delicious" at the sight of McNeal in an evening gown. Mitchell was then escorted on the stage by his mom on his, according to many audience members, "sexy" tractor.

All contestants noted their enjoyment in participating in the show and in the rehearsals they were asked to attend prior to the pageant. At these meetings, contestants practiced their opening dance number with the help of the Dance Ensemble Team. Some of the guys also took this time to practice their talents.

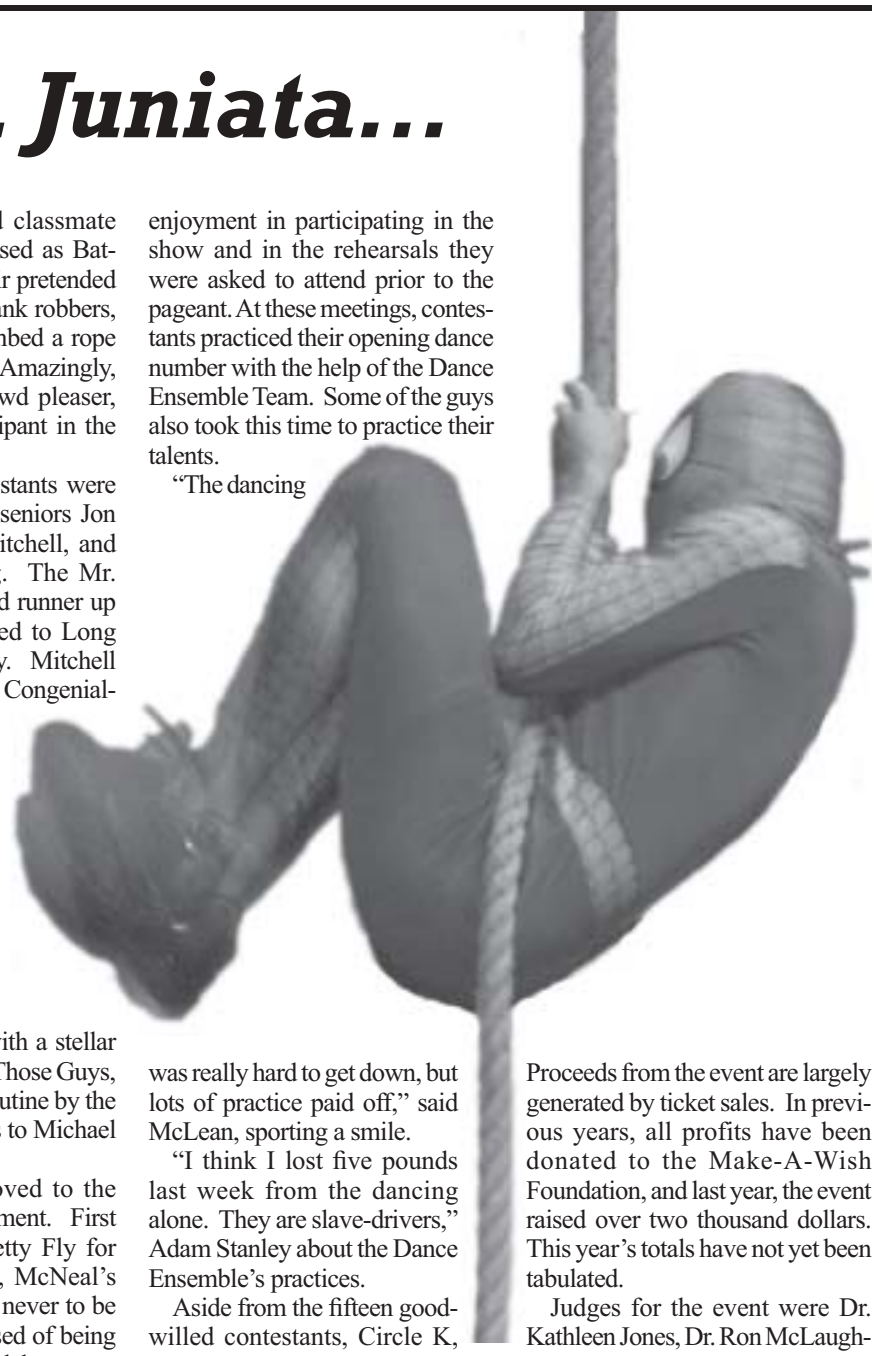
"The dancing was really hard to get down, but lots of practice paid off," said McLean, sporting a smile.

"I think I lost five pounds last week from the dancing alone. They are slave-drivers," Adam Stanley about the Dance Ensemble's practices.

Aside from the fifteen good-willed contestants, Circle K, a student-based group that focuses on service to the community, sponsored the night's enjoyment to the audience.

Due to the recent tragedy of Hurricane Katrina, Circle K decided to donate the money raised by the event to the American Red Cross in support of the Hurricane Relief Funds.

Proceeds from the event are largely generated by ticket sales. In previous years, all profits have been donated to the Make-A-Wish Foundation, and last year, the event raised over two thousand dollars. This year's totals have not yet been tabulated.

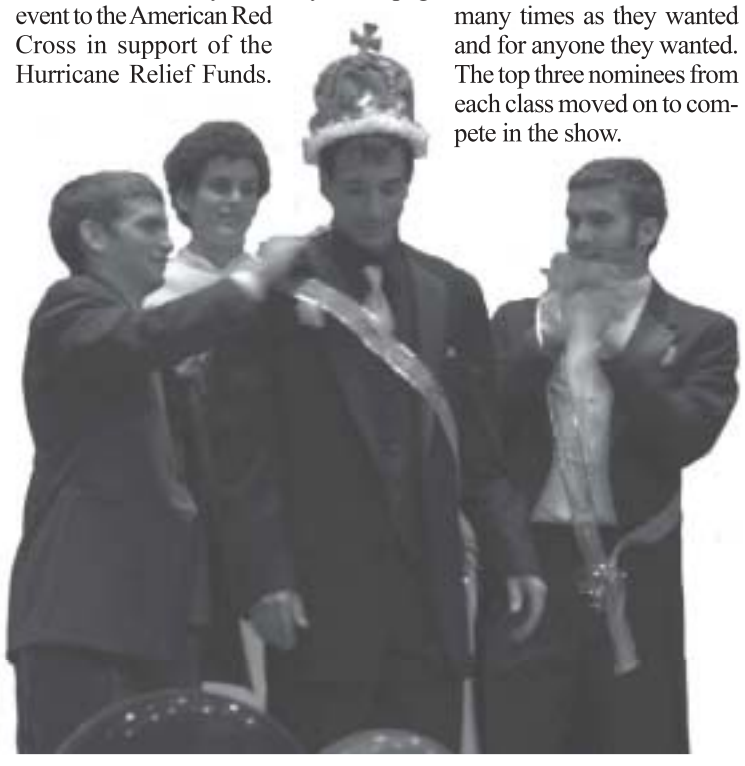


Judges for the event were Dr. Kathleen Jones, Dr. Ron McLaughlin, Liz Widman, Beth Williams, Dr. Eliza Ferguson, Dr. Mike Boyle and guest judge Maria Welch.

To enter the competition, students are nominated by their fellow classmates a few weeks before the pageant. Students could vote as many times as they wanted and for anyone they wanted. The top three nominees from each class moved on to compete in the show.

...never stays there

Below, *junior contestant Adam Stanley rocked out singing the Offspring's song "Pretty Fly for a White Guy" accompanied by student musicians on guitar, bass and drums.*



Bottom left, Mr. Juniata contestants Brenton Mitchell, Adam Stanley, Fred McNeal, Peter McLean and MartyBalaban pumped their whole bodies into dance-packed action. Bottom right, Senior Max Stem, surrounded by other contestants, sported the winner's crown after the judges made him 2005's "Mr. Juniata." He was crowned king by JC first lady Pat Kepple after winning the Mr. Juniata beauty pageant.

Antoin Sevruguin & The Persian Image

Christopher Burlingame

Sometimes it is a simple issue of black and white. Simple, however, is hardly the word to describe the light and dark images of Antoin Sevruguin's work currently on display since September 23 in the Juniata College Museum of Art.

The exhibit called, "Antoin Sevruguin and the Persian Image" features photography in reproduced form of both the Iranian royalty and the common people during the late nineteenth and early twentieth centuries.

Owned by the Smithsonian Institution, the display of Sevruguin's work is a symbol of survival. Only about 700 negatives endured the violence that occurred during the transitions of dynasties in Iran at that time.

Both the survival of Sevruguin's work and its prestigious ownership fascinated Juniata students, a matter evidenced by their enthusiasm in attending the exhibition.

"The exhibit had a larger turnout than usual, and I was surprised to see the number of students," student curator Aimee Boore said of the more than 100 people who attended the opening.

Not only did attendance impress the curators, but they were also impressed by the audience's enthusiasm.

"It was exciting to see people who didn't even know each other gathered in groups discussing the pictures," student curator Katie Lengel said.

The student curators of the Museum of Art sought to present photographs that they thought would be most intriguing to the community by displaying images that are uncommon to this region.

"Without them [the photographs], we couldn't have such a clear understanding of Persian life during the late nineteenth century," Boore explained.

Director of the Museum of Art and assistant professor of art Nancy Siegel explained that exploring this and other diversities helps students to know their own culture.

"Depicting diversity enables us to find out just how similar we are to different cultures. This allows us

continued page 9

Holly Brown / Juniatian

On Sunday, October 2, Art Alliance sponsored a Body Art exhibit in the lobby of Ellis. Six models were painted in cultural tattoos and body art designs. Juniors Bobby Wadud and Dana Nelson stand on a raised platform, greeting brunch visitors.

Art alliance bares all

Sarah Anne Wharton

Students walking into brunch on Sunday, October 2 feasted on a visual treat – fellow Juniatians nearly naked and painted from head to toe.

Art Alliance club sponsored a body art exhibit in Ellis lobby that included six figures covered in colorful tattoos and designs from different cultures including: Samoan, South American, Maori, Assyrian, Native American and African. This year, the club is trying to spread arts and crafts of all kinds on campus, and the exhibit was the first one of these events.

A flyer given out to students explaining the exhibit said it was meant to "value the body itself as a work of art, and celebrate the different cultures that art originated from." Juniata has recently made efforts to increase diversity on campus, so the cultural theme related to that aspect of the College.

Plus, it's a good way to grab some attention for JC's sometimes forgotten arts, said Stephanie Fryling, a member of Art Alliance and the creator of the project.

"Juniata is a big science school, and sometimes ignores its liberal arts," she said. "We made it so people *couldn't* ignore them."

The idea was for people coming into brunch to look at and go around the live decorated statues, she said. The three male and three female models were J.P. Melle, Brenton Mitchell, Ryan Goodman, Dana Nelson, Bobby Wadud and Amanda Harris. They stood inside, outside and all around Ellis' lobby while students went into Baker for food.

Reactions to the exhibit varied.

Freshman Troy Carl said simply, "I wasn't expecting it."

Junior Ben Waxman said, "It's a wonderful way to start my brunch hour....I hope it happens every weekend."

Sophomore Lindsay Miller liked the exhibit. "I thought it was really neat," she said. "Not everybody gets to see all the different kinds of native art, and this brings it to Juniata."

Some people slowed down to look at the intricacy of the different designs, and some sped up to leave Ellis and the bodies as quickly as possible.

"I was so surprised at how many

CoffeeHouse Series rolling with changes

An overflow of people creates a need for more space

Catherine DeCoursey

Juniata Activities Board continued the CoffeeHouse series this semester, with a few new twists. While performances continue to be held Thursday nights at 9:00 p.m., the location and choices of artists have been changed for this semester's series. While traditionally the CoffeeHouse events allowed students to enjoy a variety of musical talent by professional artists, student acts are now taking over, much to the enjoyment of the Juniata community.

If you wish to perform, contact Leslie Christman. Student bands are welcome.

Clubs interested in catering during the Coffee Houses should contact Jessica Mann.

Senior Tim Cole, is the acoustic guitar player for Circle High Five, one of the first student bands that performed at this semester's series. He voiced his excitement over the change. "It is great performing with your friends in the crowd enjoying your music and singing along. There is also not enough music on campus, and it is great that this series allows students to showcase their musical talents to their peers," said Cole.

Student involvement on stage began to rise last spring when professional artists shared their stages with some Juniata performers to enthusiastic audience receptions. That format occurred again already this fall. On September 1, junior Lisa Detweiler and senior Brittney Barbera opened for artist Michael Glablicki's Coffee House performance. Glabicki formerly sang with the once popular group, Rusted Root.

Next, the tables turned, when professionals began opening for Juniata students.

On September 15, professional artist Syd opened up for Juniata's own Circle High Five. This group, who defines its style as "classic rock meets bongos," started playing together regularly after several of the members played together informally at one of the CoffeeHouse series.

Steve Yeager, bass player and singer for Circle High Five, said, "It's pretty cool when a talented touring artist like Syd doesn't let his 'fame' hold him back from having some fun with a group of college kids like us, putting some music together for their friends. We had a great time with him."

This year, students have gradually taken the stage independent of the professionals.

On September 29, sophomore Nicholia Best, freshman Patrick Donley and senior Muhammad Jami opened the first student-only CoffeeHouse.

The series has made a few more changes this year to accommodate the performing artists and the growing student audience.

Glablicki chose to play in Baker while Circle High Five and Syd

Catherine DeCoursey / Juniatian

Freshman Patrick Donley helped JAB start off the year with the first coffeehouse featuring all-student performers. The night of student talent was on display on the new stage set up outside of Muddy Run in Ellis Hall.

Movie review: 'Flightplan'

You don't mess with Jodie Foster

Holly B. Brown

Apparently there's a new market for the thriller-airplane-heroine genre... or else I should've been more varied in my movie choices.

This week it was "Flightplan," starring Jodie Foster and Peter Sarsgaard. Foster is a mother and grieving widow, flying home with her daughter while escorting her husband's coffin on a massive, double-decker plane she helped to design.

The scenes are cold and surreal, and the setting of the futuristic plane seems otherworldly. Between the unexplained death of Kyle Pratt's (Foster's) husband, the strange men watching her through her hotel window, her daughter's traumatic fears and the anxiety pills Kyle's taking, the tension is set on edge from the very beginning. And midway through the flight, Kyle's daughter Julia disappears.

The catch is no one claims to have ever seen her. Soon the captain (Sean Bean) receives a report from their departure city that Julia was never on the flight and is, in fact, dead.

I can't really go any farther than that without giving major plot points away. And while the idea of a trapped setting and a mother defending her daughter does harken back to Foster's 2002 "Panic Room," "Flightplan" attempts to take the story to a more surreal level. Is Kyle insane? Did Julia ever exist? And if she did, how does a six-year-old child disappear from a plane in flight?

Unfortunately for "Flightplan," the mystery has to be revealed sometime. And when it is, the movie loses the psychological-thriller feel that reminds me of other movies like "Vanilla Sky." Watching the movie was enjoyable, but when I walked out of the theater the immense plot holes made me question the movie's solidity.

While there are flaws and the great reveal leaves something to be desired, the movie *is* very well-acted and has some fantastic scenery. Jodie Foster does what she does best... puts all of her heart into a performance and kicks some butt. It's her character's knowledge of the plane's structure and her MacGyver-like ingenuity that adds believability and thrill to the screen.

Sarsgaard walks a thin line as the Air Marshall Gene Carson. Whether he believes Kyle's story or not, or whether he's part of a potential conspiracy, is kept in doubt for most of the movie.

And of course. . .Sean Bean! He plays the take-charge plane captain, but he could have been a coach passenger for all I'm concerned. It's my very strong belief that when a movie adds Sean Bean, it instantly becomes 99.9% bacteria-free. If only "Troy" had starred Bean instead of Orlando Bloom. . .

Overall I suppose it was a decent movie, although the first half is much more engaging than the second. I can't tell you how many crazy theories I had come up with to explain everything. When all is revealed, the mystery dries up, although the suspense continues to a lesser degree. If you're a thriller or Jodie Foster fan, "Flightplan" will definitely entertain you.

Off the wire: Video games a growing trend for socialization

Nate Drenner

Gaming is a huge topic for a single column.

Not only are there many, many different types of video games, but a plethora of titles exist in each genre. New versions of the top three gaming consoles – Xbox, PlayStation, and Nintendo – have all been announced and are widely anticipated. People use video games not just as entertainment but also for socialization; gaming is becoming its own type of online culture.

Nevertheless, it is a topic important to most Juniatians. Out of 145 students who responded to an online poll, only 37% said they did not play any video games regularly.

"We like to play games where we can't do the activities in real life," said senior Anne Baynes in a group interview with three gamers. "You can't slay a dragon in real life."

But there is a wide variety of video games played at Juniata, from fantasy games like "Warcraft" to sports games like "Madden." The online poll gave options for 13 popular games, but 23% chose "other" – the third most popular choice after "I don't play video games" and the most-played game, "Halo."

Many of these games, including "Halo," have online components where you can compete with other players from around the world.

"I've never met [in person] anyone I play with online, but I've definitely developed friendships," said Baynes.

Juniata's gamers arrange nights where they play against other students on campus. But they will often play people online for simplicity's sake. Rather than arrange a time among everyone's busy schedules here, there are always people online ready to play.

And, in the online community, participants are not all young college students. It's not uncommon for a Juniata student to play against someone who has a child older than 18.

"World of Warcraft" (WOW) is a particularly intricate and addictive online role-playing game popular on campus. The gamers interviewed all play WOW any time they have a chance.

continued page 10

Art Alliance bares all

continued from page 7

people used the side door, or didn't acknowledge us," said Harris, who was decorated in Native American designs. Some students even dodged the display. "They went opposite directions and actually changed their daily routine to avoid us," she said.

Wadud, decorated in African designs, was also interested in the students' often strange feedback. "I was really fascinated by the reactions that we, the exhibit, received," she said. "It was as if some people were actually embarrassed by their own curiosity."

Some people looked down at the ground as they walked by. Others gave exclamations of "Oh, wow!" and "Holy Lord!" as they came upon the models.

Though Art Alliance members knew that the exhibit would cause some controversy, they were prepared to fight the fallout. They did not know whether or not students and administration would think the presentation too risqué, but they decided to continue with it anyway, for art's sake.

"When we first started, the models were going to be wearing even less," said Fryling. "But I wanted people to notice the paint and the artistry that went into it, and not just the people in their underwear."

And the art did get many deserved "oohs" and "ahs" throughout the afternoon. The student painters, Jill Seraphin, Kendra Dacey, Emily LaBreque, Muhammad Jami, Jared Beerman and Jeff Glaid, spent all morning surrounded by bottles of poster paint in Ellis' ballroom. It took from 9 a.m. until noon to finish each of the model's vibrant and dramatic tattoos. Their entire bodies were painted, making it necessary for them to shave any unsightly hair – even the guys.

"It was entertaining," said Melle, who, before the display, sported a beard, chest hair, back hair, and heavy leg hair. "I've never had to shave my entire body before," he added.

But everyone seemed to think it was really worth it.

"I feel as though we were able to contribute something to campus that was a little different," said Wadud. "Maybe even riveting," she added.

Fryling said, "Anybody who is serious about art can appreciate this....The focus was on the art and making people more aware of it on campus."

Keep a watch out for other eye-popping art events around Juniata this year.

Fashion Column

A Big Fashion No No & Big Fashion Keepers

Lucia

I was sitting one night enjoying an adult beverage, watching television, doing absolutely nothing (I should have been studying) when a random thought arose in my mind. Summer is over, obviously. Goodbye bangles, good-bye.

Well now what? Do we know when it's time to put a style to rest? Or is it just something we keep wearing over and over, thinking that we look good? Well of course you look good, you have been wearing that stunning summer blowout for more than three months! I mean there are things I just don't want to let go, but summer is over. It's time to rev up our closet for fall.

Let's lay the gaudy pearls to rest

Your best friend tells you when it's time to drop the boy toy. After failing an exam, your smart friend tells you it's time to drop a class. I'm your friend who will tell you what styles to drop, while also giving you some advice on classic comebacks that can give you an ultra classic look.

What to drop: the thick pearls that choke the necks of half our campus. They were cute for a while, but their time in the spotlight is over. Prolonging their life would be a sin against fashion religion. Let's lay the gaudy pearls to rest and start something new.

What to pick up: long necklaces that you can wrap around your neck a few times. They add sophistication and a classy appeal to a woman's style. They are a definite keeper. I personally find it very fetch. Fetch, by the way, is a slang term for cute, sexy or hot.

Another hot fall fashion "do" is lace. Without question, lace used to be perceived as the style that you would only put on under your clothes, for example, lace thongs, panties, or anything of that caliber that only, say, your boy toy or significant other would see. That has all changed.

Lace is now being worn on tops, skirts; any article of clothing you can name is adding lace. The ladies who are wearing it love it. I know; I have asked around. It's now the fabric you can dress up, dress down, wear to party or even wear to class all while being fashionably irresistible.

"It's a head turner," senior Tim Cole said.

So ladies, if you are looking to turn some wandering eyes, slip in to some marvelous lace. This fashionable fabric can be found at any of our local department stores, even Peebles.

Also,Wal-Mart will soon open in Huntingdon and there are some sexy items in there, as Gretchen Wilson confirms. "I can buy the same damn thing on a Wal-Mart shelf half price and still look sexy," she said.

But don't chuck all of your chunky, comfy sweaters yet. Just once in a while, let your body rock and put some lace on underneath to add a little spiciness.

One more look to keep in your closet is anything metallic, especially shoes and bags. They are still hot, and I still want another a bag myself (one is not enough for me). What makes this style wonderful is the nature of being in college–we carry our lives with us in our bags. A metallic hip, huge, hobo bag would go fabulous with our college lifestyle. Made popular last year, this trendy "made for everyday use" bag has not faded.

So go right now; take my advice. Hit up the local department stores for the shimmering shoes, hobos and some ultra fetch lace. If you make room for these new items by tossing the chunky pearls in your drawers, you'll be set for yet another amazing fall fashion season.

Holly Brown / Juniatian

Sophomore Suzanne Ostyn and senior Scott Stephan observe a photograph from "Antoin Sevruguin and the Persian Image," an exhibition of photographs, that opened at Juniata on September 23 to a crowd of over 100 people. The show consists of black and white photographs of Iraqi people in the late nineteenth and early twentieth centuries. The exhibit remains on display in Juniata's Museum of Art until November 5.

Persian Image

continued from page 7

to relate, empathize and understand a different time and geographical location," Siegel said.

Students also emphasized this appreciation for exposure to diversity.

"The culture of Iran during the time period could definitely be seen through his photographs, especially with the traditional clothing," sophomore attendee Tessa Han said.

Siegel also believes that Sevruguin's masterful technique added to the audience's enjoyment. According to Siegel, in the age of computer technology, a great deal of the effects employed by Sevruguin can be replicated by the simple click of a mouse, whereas Sevruguin had to manipulate the amount of chemicals he used during the developing process.

However Siegel believes Sevruguin's art is more than a few fancy effects, explaining that he created a form of documentary photography that was, at the same time, aesthetically driven. He developed this aesthetic by combining different variations of shape and light.

"He was greatly influenced by Rembrandt and tried to recreate a diffused sense of light and use soft contrasts just as Rembrandt did in his paintings," Siegel said.

When working with black and white film, light allows the artist to create a very distinct tone with his work, Siegel explained. Sevruguin employed this technique to make a statement that is not commonly accessible through today's flood of commercial photography and ad campaigns.

The photographs will be on display in the museum until November 5, but the impression left by Sevruguin's work will endure in the hearts of its viewers much longer.

Off the Wire: Video game socialization

continued from page 8

"WOW was created so you can pick it up and go with it at any time. You can literally sit down for 20 minutes and get something done," said sophomore Eli Robbins. "It's built to take up any down time you possibly have."

According to the New York Times, WOW is by far the most popular multiplayer online game nationwide, with 564,000 subscriptions sold in the first half of this year.

"It's like reading a book, except a very interactive book," said Baynes. "As opposed to reading about someone slaying dragons, you get to control a person slaying dragons yourself."

But online gaming takes a toll on Internet speed, especially when playing against people outside of Juniata's campus. This past spring and summer, Campus Technology Services (CTS) worked with several student gamers to improve network performance specifically for online games.

"We felt that we could fairly simply make some changes that would help support the gaming atmosphere at Juniata," said Anne Wood, network manager.

Wood said that a few students came to her last spring with concerns about the speed of online games and many more discussed the issue on the Juniata forums.

"We really are trying as a technology group to understand the personal needs of students. Students come here not only to learn but to live," said Wood, adding that gaming "may not be academic and it's definitely not our primary concern."

Five hundred kilobits out of Juniata's nine megabit Internet pipe are now reserved for gaming at any given time. If that 500k isn't being used by gamers, though, it is available for other Internet traffic.

"We felt that we could give that much, and if it was a problem [for web traffic] then we could back down if we had to," said Wood.

CTS is even considering purchasing a DSL (or some other type of broadband) connection to be used only for gaming.

The current 500k is still finite, though. The more people gaming at any one time, the less speed available for everyone to use.

To become part of the gaming network, students must register their gaming device – Xbox, PlayStation, etc. – with the help desk. You'll need to know your MAC address, which is usually found somewhere in the device's network settings.

Twenty-four gaming devices have been registered as of press time. PC gamers do not have to register this way. PC game traffic is detected by the network and also routed into the reserved 500k.

The full 500k is rarely used, but gaming registrations are still coming into the help desk, and it is clearly a growing trend – one that, when you think about it, most anyone can identify with.

"Everyone has gamed since they were in elementary school," said Baynes. "We all remember playing 'Oregon Trail.'"

Coffeehouse

continued from page 7

chose to play in the Ballroom, instead of the new, but smaller, stage in the Cyber Café. Best, Donley and Jami opted for the new stage in the Café.

Students, who enjoyed the shows in the past, are finding the new modifications to be beneficial.

One other modification beyond format and location is the opportunity for clubs to fundraise through bake sales at performances.

JAB, which has discontinued its use of SodexHo's catering services for the series, is also conserving its money after the budget was reduced. JAB has not indicated why its budget has been lowered, but is petitioning for more funds at this time. JAB's main focus at this point has been the success of the series and its modifications.

Field hockey regaining momentum after 2-1 victory

Aly Pompeani

After getting off to a rough start, the women's field hockey team is now in the win column in the conference. With a 2-1 victory over Moravian on September 24, the Eagles are now 1-1 in the MAC.

"We knew what we needed to do and we did it," sophomore Kim Wagner said. "It was a big win for us because it proved to the conference that we will be tough competition this year."

Sophomores Michelle Campbell and Wagner were the team's point scorers. The goals were assisted by senior Elise Zimmerman and sophomore Meredith Low.

Prior to knocking off Moravian, the Eagles defeated Neumann College, 5-1 on September 20. The last three goals were scored in a brief nine-minute span only ten minutes into the second half. Goals were scored by Wagner twice, Low, senior Sara Roux, junior Sierra Dickman and freshman Elizabeth French.

"I think we just needed the big win against Neumann to get our fire back," Low said. "We lost it those [last] few games. We lost and we needed a big win like that to get back into gear."

Forward Lizzie French is one of the few freshmen to see significant playing time. Known as the "tension breaker" on the team, she tries not to take things too seriously and makes jokes to keep the team's spirit up. The adjustment to collegiate play hasn't phased her.

"Playing with the upperclassmen is amazing," she said. "They have taught me so much. They really don't feel like upperclassmen to me."

French has contributed three goals and one assist in the past three games.

The team continued its winning streak with a victory over Villa

continued page 13

Volleyball streak lives on at home

Jeffrey Byer

The Eagles volleyball team finally got to take the court in the newly renovated Kennedy Sports and Recreation Center at the end of September. The Eagles made the most of the opportunity as they did not lose a set at home in three matches. The Eagles are now 15-1 overall and 2-0 in the Commonwealth Conference.

"At this point in the season, we are way ahead of schedule," head coach Larry Bock said. "We have work to do but they are proving that they can do the work."

In their home opener on September 21, the Eagles beat Commonwealth Conference foe Susquehanna 3-0. The win snapped an eight game winning streak for Susquehanna.

Juniata got off to a slow start, but held on to win the first game with some strong serving, 30-22.

The Eagles won games two and three convincingly by scores of 30-16 and 30-19, respectively.

Freshman Amber Thomas led Juniata with 12 kills and 15 digs, while freshman Brittany Carr contributed 6 kills for the Eagles. Freshman Jess Ritchey handed out 15 assists in game one and freshman Beth Kozak dished out 20 assists in final two games.

The Eagles have received some major contributions from their freshman class this year, something that was expected according to head coach Larry Bock.

"Generally, we knew that at a couple different positions we would be counting on some new people," Bock said.

The upperclassmen have played an integral part in helping to bring the freshman along. "The entire group of returners has been diligent and very good with passing along the right things with the right delivery [to the freshman]," Bock said.

Freshman Amber Thomas had

continued page 15

Sarah Anne Wharton / Juniatian

When Juniata's first team easily dismantled York College in game one (30-17), Coach Bock recognized an opportunity to give freshmen, like middle hitter Lindsey Fox, valuable playing time.

Women's Tennis: The underdogs of Juniata

Heather Lockwood

In the beginning of the season, they were picked to be weakest team in the conference. But the Juniata women's tennis team is denying the underdog role. With a conference record of 3-4 and an overall record of 7-4, the Eagles are gearing toward the playoffs and a final season match.

Recently, the Eagles were defeated by Moravian College on Saturday, October 2. Ashley Andrews was the only player to defeat her opponent in the singles competition with scores of 6-2, 6-4. Also earning another point for Juniata was Andrews and her doubles partner, Caroline Weissser, who defeated Moravian, 8-5.

"In our match against Moravian, I feel that I played very well physically," Weisser said. "My doubles partner Ashley and I were able to break their serves and win the match because we kept playing 'clean tennis' as our coach likes to say. We simply had more energy and wanted it more."

Andrews agreed with her partner. "I just left everything out on the court and gave it my all because I had nothing to lose. Being underestimated can swing a match either way, but it's all about who wants it more."

The team as a whole was not feeling as spirited as normal during the Moravian match. "It was difficult keeping up the team morale," Weisser said. "A lot of us have been recovering from illnesses and we are all worn out, being the end of the season."

Some of the women on the team believe the environment where they played had an effect on their performance. At home matches, the men's tennis team, students, faculty, parents and friends of the players always support the team.

"It really does help to have people encouraging you when a match is tight," said Meagan Carpenter. "A lot of tennis is mental, so if you're pumped up and keep your head up, you have a much better chance of winning than if you're getting down. Having awesome fans helps ensure a positive attitude."

Despite the team's loss to Moravian, it was able to defeat Susquehanna, 5-4, on Tuesday, September 27.

In the second singles position,

continued page 15

Strides to Success

Katie Laucks

On September 24, the cross country team made the short drive to Altoona for the Penn State Altoona Invitational. Both the women and the men have been known to do extremely well at this meet. This year was no different.

The men ran to a first place finish. Chris Sheaffer posted a time 25:20.8 on the 7.5k course. Fellow senior Mike Vella finished second for Juniata and fourth overall with a time of 25:48.9.

"We are constantly improving," Sheaffer said. "So our last race will be our best."

The women are doing the same as they posted a second place finish at the Invitational. Senior Katey Glunt recorded a second-place finish overall and the top finish for the women as she handed in a time of 19:29.4. Following Glunt was Nancy Hayes, the women's second place finisher and fifth overall. Hayes finished with a time of 20:14.6. Following Hayes for Juniata were Meghan Jones, Sarah Bay and Aubrey Cyphert who all finished in the top ten.

Hoping to use the Penn State Altoona Invitational success as a springboard, Juniata traveled to Carlisle for the Dickinson Invitational this past weekend. Facing top teams out of their region, both the men and women made strides as the team had another solid outing on Saturday.

The women ran to a fifth place finish. Leading them was Nancy Hayes who finished 10th overall with a time of 15:43 on the 4k course. Second for the Eagles was Meghan Jones, who ran to a 26th place finish and an overall time of 16:12.

The men did well on the course as well. Senior Justin Fritzius led the men with a time of 13:17 and a 44th place finish on the 4k course. Following him were teammates Shawn Rumery, 57th, and Tripp Rudolph, 59th.

Chris Sheaffer ran the 8k at the Dickinson College course, finishing with a time of 20:20 and a 21st place finish. Behind him was Mike Chirdon, finishing 68th overall with a time of 28:37.

The recent success has the Eagles feeling that they are on pace for a great finish to the season.

"The team is doing great so far. It's the best team I think I have ever

continued page 15

Juniata still looking for first win

16-0 lead dissolves in face of Albright rushing attack

Robb Patty

The Juniata College football team had a 16-7 halftime lead over MAC foe Albright, but a second half offensive eruption by the visiting Lions resulted in a 42-23 loss for the Eagles this past Saturday at Knox Field.

With the loss, the Eagles fell to 0-5 overall and 0-4 in the conference, while Albright remains unbeaten on the season at a perfect 4-0 overall and 3-0 in the conference.

Leading the Albright comeback was senior quarterback John Port. Port went 32-40 for 385 passing yards and a score.

"Port is a premier quarterback not only in Division III, but in the country. Our game plan was to contain their rushing attack," said head coach Darell Alt.

Early on the Eagles did contain the entire Albright team as the potent Lions offense was held to just 29 yards in the first quarter. The Eagles dominated the line of scrimmage and confused Port.

The Albright quarterback fumbled deep in his own territory forcing the Lions to punt out of their own end zone. Senior Troy Beaver blocked the punt, and the ball rolled out of the end zone for a safety, giving Juniata an early 2-0 lead.

After the free kick, junior running back Duane Ehredt Jr. broke a 33-yard run, which set the Eagles up with first and goal from the two yard line. Freshman quarterback Jay Leonard would then find senior wide receiver Tom Kimmel in the corner of the end zone to extend the Eagles lead to 9-0.

Juniata, encouraged by a rowdy home crowd, was able to keep the momentum on its side when it drove 90 yards on the Albright defense to take a 16-0 advantage on Ehredt's one-yard plunge.

Then Albright woke up.

The Eagles were no longer able to contain the Albright rushing attack and Port seemed to grow more comfortable as the game went on. He led the Alright offense to 28 unanswered points and the Lions took a 28-16 lead over the Eagles.

Leonard then responded as he drove the Eagles down the field to cut into the Albright lead to make it 28-23 when he hit David Nicklaus for his second touchdown toss of the game.

That is as close as the Eagles would get as Albright would find the end zone two more times to ensure a 42-23 victory.

It really was a tale of two halves for the Eagles as they started the game energized, playing very physical football that stalled the Lions' attack. In the second half, however, Albright racked up 427 yards of offense and put together 35 points.

The team is playing better football and this is evident to their head coach

"I really believe we are getting better," Alt said. "Division III college football is a fast game and it's a big step up from high school. We're improving and our young guys are getting more comfortable."

The previous week Ehredt Jr. rushed 45 times against Moravian at Rocco Calvo Field for 200 yards and two scores. This was just the fifth time in school history that a running back has reached the 200 yard mark. It was not enough to get the Eagles a win, however, as they dropped another conference game by the score of 49-14.

The story of this game was big plays for Moravian as the home team had five plays of over 40 yards, four of which were touchdowns. A 42-yard interception return for a touchdown and a 69 yard touchdown run with just 23 seconds remaining in the second quarter would propel Moravian to 28-0 halftime lead.

Moravian built its lead to 35-0 as another big play was made on the Eagles' defense. This time Moravian quarterback Jerry Venturino connected with wide receiver Ben Hawkins on a 66-yard touchdown pass. Moravian would add another score before Ehredt Jr. registered his first score of the day on a five yard run to put the Eagles on the board 42-7.

The two teams traded touchdowns, as Ehredt Jr. scored his second touchdown of the day to set the final score at 49-14.

The Eagles return to action this Saturday, October 8, when they travel to face another MAC opponent Susquehanna University in Selingsgrove, PA.

Ehredt sets high standards

Tommy McConnell

After leading Juniata College in rushing last season, junior running back Duane Ehredt Jr. entered this season expecting to pick up where he left off. An injury right before the season opener put a damper on those plans almost immediately.

"I worked hard to get better and earn a starting spot," he said. "So to see people take your position, that's tough."

Once he returned to the lineup, however, Ehredt left little doubt that the starting job should be his. After posting 53 yards in limited action his first game back, Ehredt exploded in Juniata's last three games, rushing for 221 yards against Lebanon Valley, 200 yards against Moravian, and 164 yards this past Saturday against Albright.

"I was surprised by that," head coach Darrell Alt said. "I expected him to be good, but [his numbers] have been a pleasant surprise."

The performances marked the first time in Juniata's history that a back rushed for at least 200 yards in back-to-back games. The totals were also the third and fifth highest in school history.

"It's pretty special," he said. "But I think anyone could have done it. It's just the situation we were in. I just came prepared. While you're doing it, you don't even know."

Ehredt is leading the conference in rushing, averaging over 159 yards per game. He has also found the end zone four times, tops on Juniata's stat sheet.

Ehredt has had to shoulder a tremendous amount of Juniata's offensive load. Against Lebanon Valley, he rushed the ball 36 times. He topped that a week later, rushing 45 times against Moravian and then 41 times against Albright. It's a brutal pace, but one Ehredt is confident he can maintain.

"I think I can," he said. "I work hard, and that's pretty much what my strength is. I'm not the fastest, I'm not the strongest, but I'm durable. I'm not going to get a hundred yards on every run, but I am going to get four and five. As the defense starts to wear down, I don't."

Touching the ball 35-plus times a game is a huge responsibility, but Ehredt has the full trust of the coaching staff.

"He earned that trust with his work ethic," Alt said. "He has prepared so well that he seems to be holding up well. After the [Lebanon Valley] game, he was the first one in the weight room."

Coming into the season, Ehredt knew he would be a focal point of Juniata's offense, and he welcomed the challenge.

"Before the season, the coaches asked me, 'Are you ready to carry the ball 30 times a game?' I told them I was," he said. "I don't know if I was expecting [these kind of numbers], I just hoped to help the team."

Despite Ehredt's production, Juniata is 0-5 so far this season season. If the Eagles are to crack the win column, it will likely be because Ehredt had another huge day.

"You wouldn't expect us to have a great attitude," Ehredt said. "But we have a positive attitude. We had a good week of practice, everyone was hitting. We know we can win, we just have to go out there and do it."

- TM

Women's soccer trying to bounce back from key injury

Kim Wagner

With a record of 2-7-1, the Juniata women's soccer team is working its way back on track despite the injury of the former starting goalkeeper, sophomore Lisa Russo.

Russo is currently recovering from a broken tibia which occurred during a match against Mansfield on September 15. With nine minutes left in the game, already after the fifth goal, Russo went out for a cross ball as a Mansfield attacker came in cleats up. What seemed to be an unintentional play will now keep Russo on the sideline for the remainder of the season.

The women brought home a 5-0 win against Lincoln University on September 24. The first goal was scored eight minutes into the first half by senior midfielder Nikki McLellan for her fifth this season. The following two goals of the first half were scored by juniors Alicia Walsh and Kelly Howard, putting the Eagles up three heading into halftime.

Barely into the second half, senior Linsday Garvey notched the fourth goal of the season on a break away for the Eagles. Once again, Walsh also found the net for the fifth time this season to end the game.

On September 18, the women took on the Warriors of Lycoming College, losing the game 1-0. Freshmen keeper Kerri Lawrence got her first collegiate start and allowed only one goal, registering five saves during the game.

"She stepped up very well," said co-captain McLellan. The Eagles stayed with Lycoming in shots on goal, 13-13, and showed them up, 5-1, on corner kicks, but were not able to put it past the keeper.

"It was a heck of a recovery; we spent a lot of time fixing the defensive gaps" said head coach Scott McKenzie, "the one goal was scored on our one defensive mistake."

"We fixed what we needed to get fixed," said McLellan.

The next step for Juniata is to put the finishing touches on the attack. After several film, chalk and field sessions with the defense, they are now ready to begin working on the attack and getting the ball in the goal.

"If we pull it together like we did in Lycoming, we'll be in every game," said McKenzie.

"We'll go into the conference matches ready to win," said McLellan.

The Eagles had their first conference game versus Susquehanna at home September 28. Juniata was defeated, 3-0, even though it put up a tough fight. The women were able to pick it up in the second half, putting eight shots on goal, but were not able to find the back of the net. Lawrence recorded a career-best ten saves during the match.

On October 1, the Eagles took on conference rival Moravian in their second conference game of the season. Unfortunately, the women were again not able to strengthen their attack. Their only challenge now is for the midfields and the forwards to finish.

Sarah Anne Wharton / Juniatian

Moravian defenders look up to Juniata's Kelly Howard (16) as she takes a header in last Saturday's match-up.

"We need to step up to condense the field more so we can take advantage of attacking opportunities," said Russo.

Juniata next travels to Albright on October 8.

Eagles lose conference opener

Robb Patty

The Juniata College men's soccer team started conference play this past week but were unable to come away with a win. The Eagles dropped a pair of conference matchups against Moravian and Susquehanna. Their record now stands at 2-8 overall and 0-2 in the MAC.

On Saturday, Juniata fell to Moravian, 3-1 in a physical conference game.

The Eagles were able to jump out to an early lead as freshman Fred McNeal scored 20 minutes into the game. The goal was McNeal's fifth of the season, good for the team lead.

Moravian then went on the attack, scoring two goals in a three-minute stretch before the half.

The game was physical throughout as Juniata and Moravian accounted for 25 fouls in the game. Also, Moravian was issued three yellow cards in the match, while Juniata was hit with two of its own.

Juniata was unable to answer on the scoreboard, but the physical play didn't seem to bother them.

"My favorite game is this kind where both teams are being physical. Its gets your adrenaline going and gets the crowd going," said McNeal. "If you can get the fans into the game it really helps the team."

Despite allowing three goals, Tim Penrod played well in net for the Eagles. He made a series of impressive saves in the second half to keep the Eagles close, but Moravian's Ryan Hintenach's second goal of the game would prove to be too much.

Sarah Anne Wharton / Juniatian

With fancy footwork, Juniata backer, Michael Ndlovu trumps the trip attempt from a Mount Aloysius defender.

The young Eagles will look to learn from the loss as they put it behind them.

"The first thing we have to do is forget about those games," McNeal said. "In practice, we break down into groups and work individually on what we have to do to get better and win."

Juniata fields an extremely young team this season. Eight freshmen have started at least one match. McNeal has made the most immediate impact, starting all 11 matches and leading the team in points, with 17. Mark Turkewitz and Stephen Alexander have started 9 and 8 games, respectively, and have made their presence felt for Juniata as well.

The Eagles dropped their conference opener On September 27 as they were defeated on the road by Susquehanna, 4-0.

Juniata allowed a goal early in the game and then once again gave up back-to-back goals in a four-minute span. The three goal lead was just too much to overcome, despite several shots on goal from the Blue and Gold.

The Eagles are back in action on Saturday when they travel to Albright for a MAC match-up.

Field Hockey

continued from page 11

Julie, 3-1, last Tuesday. Goals were scored by Zimmerman, Low and Wagner.

The Eagles scored first, shortly into the first half and controlled the game from that point on.

"Scoring goals has made all the difference," head coach Caroline Gillich said. "Now we are making the most of our opportunities and doing everything with more intensity."

This past weekend, the women took on Washington and Jefferson, defeating the Presidents, 9-0, to improve to 5-5 overall. Campbell, Wagner, French, Low, Roux, Zimmerman, and freshman Breanne Loso all scored goals.

"Our game against W&J was a result of great team play. This team proved how lethal we can be when we just go for it," Gillich said. "We surged and made the most of our opportunities for the win."

Wagner said, "As long as we keep putting the ball in the cage we will be ready to take on anyone,"

The Eagles have two MAC games over break. They travel to Albright on 10/8 and return home to play Frostburg on 10/11.

What is a sport?

I don't know, but I think I have a good idea

Tommy McConnell

A little while ago, I was sitting around with a group of buddies, watching ESPN. After watching some football highlights, some poker came on. No surprise, really – as Mugatu would say, poker is *so* hot right now.

But it got a little debate started. Should ESPN be showing poker? I mean, aren't they supposed to be showing sports? ESPN shows billiards and ping pong and even Scrabble. Are these things sports?

Now, ESPN can show whatever they want. Technically, they are a sports channel, but they are going to show whatever brings in the most viewers. I mean, this is the network that brought us Playmakers (which was tragically cancelled after one season; what I wouldn't give to find out if Omar Gooding ever decided to use a Whizzinator).

The debate here is, What is a sport? How do you define it? Is there even a definitive answer?

Well, to be honest…probably not. But it'll be fun to try to make one up. After thinking about it for probably way too long, here's how you can tell if what you are watching on TV is really a sport, or just something ESPN is trying to pass off as one.

Rule Number 1: You have to break a sweat. The most basic rule. Obviously, if you can do something without sweating, it isn't a sport. So goodbye poker, billiards, Scrabble, and horse shoes.

Rule Number 2: No judges allowed. If the outcome of something is decided by judges, and not the actual athletes on the field, it isn't a sport. If anything, they are competitions.

And there is a huge difference between a sport and a competition. I can compete in anything – as I write this, I am "competing" in a fantasy football league. (By the way, I just picked up and started Eli Manning. That's how competitive I am). Just because you are competing doesn't mean you are playing a sport.

A sport has to be decided by athletes on the field, whether it's an individual sport or a team sport.

When one athlete takes his turn, some person decides how good it is, and then another person goes, that isn't a sport. It's too arbitrary. One judge could like a certain performance, and another couldn't. Who's right? Who knows?

So competitions like diving, figure skating, skateboarding, cheerleading, snowboarding, synchronized swimming and even gymnastics are out.

I understand completely how difficult these events are. I certainly couldn't do any of them, and neither could most people. But just because something is hard doesn't make it a sport. The math test I took last week was pretty hard (I was even sweating a little) but that still didn't make it a sport.

The other reason events decided by judges aren't sports is because those are the competitions where an athlete or a team will practice a "routine" they will then try to execute in the competition. It is completely scripted; they do the same thing over and over again. It is almost like you are an actor. There's no spontaneity. If you know exactly – and I mean *exactly* - what you are going to do before your competition, it's not a sport. It's a routine.

The obvious exception here is boxing. Boxing matches are regularly, although not always, decided by judges. But boxing is definitely, unarguably a sport. So why does it get a pass? Well, there's no "routine" to be heard of. Also, since a judge isn't the exclusive decider, and used only a last resort, it retains sport status. Imagine if there were no judges in boxing. Fights would go on forever and someone would probably die. Not good.

Rule Number 3: If a man has a clear athletic advantage over a woman at the highest level, it's a sport. If a woman is just as good as a man at the highest level, it isn't.

Now, before every single woman on the face of the earth decides it's about time I should be castrated, let me explain myself.

The key to this is to remember the catchphrase: At the highest level. Say it with me: At the highest level.

Take the Olympics, for example. Compare men's times with women's in the 100-yard dash. Or in weightlifting. The high jump. Not even close, right? So clearly, men are just naturally more physically gifted as athletes than women.

This isn't a knock on women athletes or women's athletics in general. It's just a fact. So if there is a clear line between men and women athletically – at the highest level – why not use that to define sport?

Football, for example – no woman could play in the NFL. So football is in. Basketball, baseball, hockey – check, check, check.

The two biggest question marks are golf and car racing.

Up until the Danica Patrick era, I would have called car racing a sport. You are definitely sweating and judges aren't deciding anything. But then Danica came along and showed that women can be just as good. So, sorry car racing fans – you aren't watching a sport anymore.

Golf, with Michelle Wie and Anika Sorenstam making PGA appearances, is inching dangerously close to losing its sport status. But Wie and Sorenstam haven't earned their ways into those events, they've been given exemptions. And they haven't really done that well in those events, regardless of how they got in. Golf is still a sport, but it had better be careful.

The reason women can compete in things like car racing and golf are because those sports have equipment as a great equalizer. Patrick has probably one of the best cars on the track. Wie and Sorenstam can use clubs that let them hit drives almost as far – not quite as far, but close – as a man. This almost led me to create Rule Number 4: "If an athlete can gain an advantage by using a better piece if equipment, it is not a sport," but when I considered Lance Armstrong, I changed my mind. Cycling is a sport and Lance is an athlete, no matter what bike he's using.

So, no matter what Gatorade says, sport is not sport. Some sports are, but others are just competitions. Let's not confuse the two anymore.

Advantage in shots on goal (22-4) the women's soccer team had over Pitt-Bradford in a 4-0 win

6

Improvement in the number of wins for the women's tennis this season compared to last season, with one match yet to be played

Knox Inducted Into Seattle's 'Ring of Honor'

Tommy McConnell

Former Juniata football player and coach Chuck Knox was inducted into the Seattle Seahawks Ring of Honor at halftime of the Seahawks game against the Arizona Cardinals on September 25.

Knox coached Seattle from 1983 through 1991, accumulating an 80-63 record and was named coach of the year four times. His 186 career victories rank him seventh all time in NFL history. He made the playoffs in four of his first six seasons with the Seahawks, making him the first NFL coach to take three different teams to the playoffs (the Bills and the Rams being the others). His tenure in Seattle is still seen as the heyday of the franchise.

He joins just seven other players - all of whom he coached - in the Ring of Honor.

Before coaching in the NFL, Knox was an offensive and defensive lineman for the Juniata football team. He captained the first undefeated team in school history in 1953 before graduating with honors with a BA in history in 1954. That same year, Knox served as an assistant coach on the Eagles' football squad before leaving to coach various Pennsylvania high schools, and then ultimately in the NFL.

He was inducted into Juniata's inaugural Hall of Fame class of 1995.

Juniata's football field, Knox Stadium, is named after the legendary coach.

Despite living in California, Knox remained close to the College. He served on the Juniata's board of trustees from 1978 until 1999, and remains a trustee emeritus to this day.

Most recently, Knox donated $1 million to help endow the Dr. Charles R. and Shirley A. Knox Chair in History this past January.

Women's Volleyball

continued from page 11

equal praise for the upperclassmen. "They let me know that it's alright to make mistakes on the court," Thomas said. "Just knowing that they have the experience and that they are out there with me has been great. They have my back."

On September 24, Juniata won its two home matches convincingly against Rutgers-Newark and York (Pa.), both by scores of 3-0.

Against Rutgers-Newark, the Eagles used a dominant defensive performance throughout the match to win 30-7, 30-18 and 30-21. Juniors Stephanie Kines and Rachael Schatz each had four of the Eagles 13 total blocks. Freshman setter Beth Kozak kept the Eagles offense in sync as she dished out 23 assists to an array of teammates.

Juniata used a balance offensive attack to down York (Pa.) by scores of 30-17, 30-23 and 30-25. The freshman tandem of Jess Ritchey and Beth Kozak combined to hand out 38 assists during the match. Four Eagles had more than five kills, showing the depth that this team possesses.

Although the home crowd enjoyed the dominant performances, it won't see the Eagles play at home until October 21 and 22 during the Wid Guisler Invitational.

"We always talk about doing good versus feeling good," Bock said. "By having to play on the road and having to perform constantly, our team will be ready for the conference and NCAA tournaments when they get here. It doesn't always feel real good (to play on the road), but it shapes us as a team and a tough group that is becoming comfortable being uncomfortable."

As for the rest of the season, Thomas has her goal in mind.

"We are going to win the national championship," she said. "We have a lot of talent and a lot of heart. We just need to put it together and play as a team."

Women's tennis: Underdogs

continued from page 11

Weisser defeated her opponent 6-1, 6-3.

Also defeating their opponents were Molly Coursey in the fourth position, 6-4, 6-2, and Carpenter with scores of 4-6, 7-5 and 6-2.

In doubles, Andrews and Weisser crushed Susquehanna, 8-5, while Carpenter and Molly won, 8-3.

This Commonwealth Conference match was crucial for the team. In order for the Eagles to have a chance at playoffs, they needed to defeat Susquehanna, and they did so with flying colors.

"We really needed to win the match against Moravian to get into the playoffs," Andrews said. "We played a great match against Susquehanna, so that helped our chances, but we really needed Moravian to get in. However, there are still the individual championships."

Because the Eagles fell to Moravian, they will only go onto playoffs if one of the top three teams in the conference loses to Albright.

Even though the team may not advance to the team championships, individual players have qualified for the singles playoffs. Individual players are placed into a bracket and compete in single-elimination matches.

Juniata will definitely send Andrews, Weisser, Coursey, Carpenter, Aggie Kwon and Sarah Roby to compete in both singles and doubles. Anita Desai may also be joining the top six players on their three-day competition on October 22 at Drew University in New Jersey.

Regardless of the outcome, the women's tennis team has made a complete turnaround from last season. With one match left, the team continues to practice and play hard. The players have been able to come back from difficult matches this season and show what perseverance can do.

They are the Juniata's underdogs and they are still going strong.

Cross Country

continued from page 11

been a member of," Sheaffer said.

Prior to the PSU-Altoona and Dickinson Invitationals, the men and women took on Messiah and Gettysburg on September 17 at the Messiah College Tri-Meet.

The men were able to knock off host Messiah, 19-43, but fell to Gettysburg, 23-32.

For the men, the top finisher was Sheaffer as he placed second with a time of 28:28. Following close behind was Fritzius with a sixth place finish and a time of 29:21. Chirdon placed seventh, Vella tenth and Ryan Conrad eleventh.

"Everybody on the team this year has had at least one great race. We are just working to coordinate them into one day, to have our best day be on the MAC championships," said Sheaffer of the men's teams plans for the year.

"I can't wait till we are all performing at our best. That will be an amazing sight. Hopefully that will be at MACs and our home meet when everyone can come out and cheer," Sheaffer said.

The women dropped the meet to the Falcons, 21-34, but were able to beat Gettysburg, 25-46, and place two runners in the top five.

Finishing the meet first overall was Glunt with a time of 20:11. Following her was Hayes with a solid time of 20:38 for a fourth place finish. Juniata's top five runners finished in the top ten: Meghan Jones, 21:21; Audra Cyphert, 21:27; and Lia Bella, 21:28.

The men's and women's home meet is scheduled for October 21, a week before MACs.

Before that race, however, this weekend the men and women travel to Carnegie Mellon University where they will both look to continue gearing upfor the end of the season.

NEVER DONE HAMLET

Matt Russell

I've had this on my list all summer, part 1: I really need to say this. Jeremy Weber saying the wave on the front of the May Day program last spring was "insensitive" to the tsunami victims during his speech was possibly the most ludicrous example of political correctness gone awry I've ever heard. The theme was "make waves." It was a wave. Get a grip.

I've had this on my list all summer, part 2: Did anyone actually "gather on the tennis court" for synchronized screaming last spring as a part of OSA's "finals stress-relieving" activities? In the future, I'd request that the OSA schedule silly functions like this before the last issue of the newspaper so I can ridicule them in a more timely fashion.

Brownout, part 1: The brownout we had recently pretty well crippled everything electronic on campus. When you're sitting in the quiet darkness of a computer lab with no electricity, it really makes you feel powerless.

Brownout, part 2: I learned during this episode that there are "three stages of power at Juniata," whatever that means, and we only actually lost the first stage. I think the stages are called "pretty dark, really dark, and completely dark."

When it rains, it pours: Nothing makes me feel like I'm in Bizarro world quite like when I'm walking through the rain at night and the sprinklers come on.

The Bookstore doesn't sell bookends.

That's a wrapp: There's a "Wrapp" line in Muddy this year. I really hate to say this, but… there's no such word as "wrapp." It's not even a "cool" or alternative spelling. It's just… wrong. I really think someone else needs to be put in charge of sign making up there. Another keeper: "May we suggest a small salad instead of fries!" It's like a question, but enthusiastically not.

Bike bandits: Townies stole my bike late in summer and sold it out on Route 22. Luckily for me, a Juniata student bought it and I was able to reclaim it when I saw it on campus again. It doesn't say much for the education process here though. "Let's see, that's an aluminum frame, front shocks, 21-speed Trek bike for $25 on the side of the road in Huntingdon, PA. I wonder how they can sell it that cheaply? Hmmm…."

Adjust the dosage: A friend of mine, doped up after getting her wisdom teeth out, was convinced for several hours there was a horse in her closet. I guess that pales in comparison to the friend whose eyes widen in fear at the mere mention of the word "Amish," though. The next time you're bored, try and figure out what you'd name that phobia.

Your mailbox is over the size limit: EVERY WEEK I get this forsaken e-mail, and EVERY WEEK I clear out half my e-mail. Google gives me 250 times more storage space for free; I will have paid Juniata enough for two small houses by the time I'm done here. E-mail is no longer a toy; it's a critical form of communication that requires more than 10 megabytes to function. Please, let's get CNS the funds it needs to make this upgrade so I don't have to spend hours deciding which messages I still really, *really* need online.

Poop is the synonym for fatigue, information, facts, "do in," data, and communication. I'm not pooping you; look it up.

International integration

continued from page 5

ternationals are quite integrated," said Csoman.

The fact that the president of the student body is an international is a pretty good sign that integration can take place at that level. But reaching that point takes more time than most internationals spend at Juniata.

If the seating arrangement in Baker during meals or the international folks hanging out at the Muddy Run are commonly dubbed "mini United Nations," much needs to be done. But whose responsibility is it?

Obviously the school can only do so much. The responsibility squarely falls on the shoulder of both the internationals and American students as to how they become and remain acquaintances, if not friends. But who makes the first move?

Listening to the students on both sides is like listening to the occasional barb between two neighbors whose relations have turned sour. It's both implausible to have a hundred percent integration and undesirable for internationals to integrate so much into American culture that they lose their own culture. But the hope and logic is that it should take place to a degree where it is beneficial for both parties.

That is ideally true. But as an international I feel the share of responsibility lies more on us – the internationals need to reach out first. How do we adjust here should concern us more than the Americans. That is true for Americans going abroad, isn't it?

Trivial Revolutions

All these things that I have learned

Genna R. Welsh

As a Juniata student, I have gained over my years here a great sense of responsibility to carry on Juniata's legacies. And so, I will pass on what I have learned up until this moment, the beginning of my senior year.

I have learned…

Juniata needs hippies. Hippies serve two functions: They expose non-hippie students to their culture of "special smells" and barefoot ventures (oh how I miss Jake Warner walking across campus on calluses, totally devoid of even his worn through clogs, jar of herbal tea in hand). Hippies—Jake specifically—serve as an introduction to a procedure at Juniata that is now all but gone with the poopfinger—nicknaming.

To me, Jake was "Hippie Guy." That's how my friends and I identified him, and in a most useful way. Many of you who knew Jake know that he introduced fascinating discussions in class, so there was an important need to name him. And Jake wasn't alone. There was also "Duct Tape Guy," "Guy With Girl Hair" (but alas, he got his mane significantly trimmed of late) and of course, who can forget "Snowboots?"

If you're a freshman, you probably don't have a clue as to what I'm talking about. It's sad really, that many of our communal conversation pieces at Juniata are gone, only because the conversation itself is gone. But RIP poopfinger, you are gone and that is done. And we, as Juniatians, will have to learn other ways of preserving our oddities—I mean, traditions.

Common sense is in short supply on an "uncommon" campus. I have learned that for all our analytical ability with the abstract, we have many moments of common sense loss. For instance, one of my fellow students who obviously grasped the grand psychological idea of the self concept wrote on his self-concept box (a project we completed where we listed our outer characteristics on the exterior of a cardboard box): "LAYED back" as the description of his disposition. Apparently his sense of *spell* is laid back..

Unfortunately, I myself have had far too much of my fair share of lacking common sense. Just a few nights ago, I traversed into Huntingdon on an excursion to Wendy's and Giant. Luckily, this exploration occurred at ten o'clock in the evening because I was wearing a size 6 tan flip-flop and a size 7 blue flip-flop as a pair of shoes on this journey. I realized this after I returned home and after remembering that I once reminded myself—after a previous, similar close call—that I should turn on the light while choosing footwear.

Eccentricity is entertaining. Aside from mismatched flip-flops, Snowboots's snowboots, and Jake's bare feet, shoes also remind me of another facet of Juniata that is essential and is missing this semester—Peter Goldstein. Dear Peter Goldstein. I remember when he broke his toe last fall and insisted on wearing either a two-strap sandal with one strap carved off or a pair of oversized fishing boots. Without Goldstein, has anyone been biting at the invisible apple on his shoulder, much to the entertainment of his students? And who is calling for obscene poetry and social commentary on Family Guy in class? (Goldstein once said, "I identify most with Brian, the dog.")

But above all, we know these things about each other and we like knowing these things. Acting *uncommon* is the Juniata way. But so is gossiping about the *uncommon*. We don't have poopfinger to use for this purpose anymore—so we will just have to make progress on our own.

When you see me wearing mismatched flip flops, don't just say, "Duh, Genna, your flip-flops don't match." Don't neglect to mention it. Instead, give 'er the ole Juniata College try with some sarcastic nickname for me like "Diverse Footwear Girl." At least this *uncommon* campus would know who I am.

The grass is always greener

(with the help of toxic chemicals)

Sarah Anne Wharton

They say that the grass is always greener on the other side, but at JC, that's not entirely true.

Here, the grass varies from the regular bright green to a sopping stew of dirt and shoots or eerie turquoise pebbles like those on Cloister's 19th Street lawn. Students trek through patches of bogs on the way to the library, navigate the random mazes of caution tape on campus yards and wander through the mud-hill desert that lies between Kennedy's parking lot and East. Sprinklers water round-the-clock and off the grass. More than once, you may have heard someone say, "The bricks sure are coming in nicely this year."

But the landscaping hassles are not the real problem.

Recently, information has surfaced that some of the lawn products that Juniata uses contain ingredients that are possibly dangerous to humans and the environment. Making and keeping the green grass green means getting it drunk on cocktails of seed, fertilizer and herbicide products, one of them being the weed-exterminator Trimec Plus. This herbicide contains the component MSMA (monosodium methylarsonate), a complex arsenic compound.

Arsenic, even in small amounts, can be tremendously poisonous.

Dr. John Matter, associate professor of biology, described arsenic as being "at the top of the Environmental Protection Agency's watch list." Though the element occurs naturally in trace amounts in the environment and our bodies, it can be very toxic. Matter's environmental toxicology class learns that it can cause many problems such as cancer and brain damage. It does not easily break down and can be translocated into surface and groundwater.

And it is on our lawns.

Matter began inquiring into the

More money means surplus for Student Government

JAB main beneficiary; WKVR still lacking needed funds

John Narayan Parajuli

The flow of cash through Student Government has suddenly increased after it received an additional $43,750 from the Dean's Office. The Juniata Activities Board (JAB) has become the biggest beneficiary. But make no mistake; it was not charity from the school.

The new funding was available after the school increased the mandatory student activities fee from $100 to $130.

The Allocation Board doles out club budgets from the revenue generated by the activities fee.

The remaining surplus, Student Government officials say, is available for clubs and organizations that need funding for their activities.

"There is no limit to the amount they can ask for and the number of times they can ask for [money]," said Mike Best, Student Government treasurer.

With more money available, the logic of increasing the activities fee could be questioned if the surplus starts to pile up year by year. The student activities fee was increased to support more clubs, but spending seems to have decreased despite growth in the number of clubs – now totaling 83.

Best pointed out that the spending patterns of organizations have decreased, albeit by a slight margin. The reason: most organizations have rollover money from previous years.

Senior Emily Eller of the PAX-O club said, "We have leftovers from last year."

PAX-O had received only $200 last year and usually engages in fund raising to support its activities.

But there are a few organizations that receive thousands from Student Government. International Club

FLEECING OF CLUBS?

A look at Sodexho's relationship with Student Organizations

Nick Carney

It operates seven days of the week, all but two months of the year and feeds nearly 2000 students during that time. It is present at over 900 on and off campus events every year, including between eight and ten weddings. It is the nutritive force of Juniata College: it is Sodexho.

While the Sodexho Alliance, a $13.8 billion a year corporation

See Roving Reporter on page 3

based in France, promises in its official company philosophy to "improve the quality of daily life," few people operating a Juniata student club or organization would agree.

According to Sarah Worley, communications instructor and the advisor for SPEAK, Sodexho may not be living up to its own standard of ethics.

Last year, during the Bailey Oratoricals, an event sponsored by SPEAK, the organization spent $647.57 of their approximately $1,000 budget on catering services provided by the multinational company.

"As an advisor to a club on campus, I'm frustrated by the lack of a clear policy that clubs can follow regarding the purchasing of food for events, and even more frustrated by the high cost of using Sodexho's services," said Worley. "In an environment that eliminates competition, they can charge ridiculously high prices."

SPEAK spent over half of its annual budget last year not on elaborate hors d'oeuvres or complicated main courses, but on mere beverages and cookies.

When asked if this was price gouging, Hal McLaughlin, Director of Food Service, responded "not really."

According to McLaughlin, catering prices for student organizations

The well-known Sodexho logo adorns a van that catered events on Homecoming weekend. Under contract, student organizations must use their service unless given permission to seek outside refreshments.

Health and Wellness under the weather

Jessica Ocampo

At the start of each year, students return to campus and are exposed to new viruses and bacteria. Students practice bad habits by staying up late, becoming stressed and not getting the proper nourishment. This leads to illness and an influx of students going to the Health and Wellness Center. With about 1400 students and only one nurse, it gets hectic.

Connie Peters, Registered Nurse, has had few quiet weeks since school started. The Health and Wellness Center saw a record number of 503 students in September.

Peters, being the only nurse, was over-worked with all she had to do. She saw students, did paperwork, helped the physicians, talked to new worried parents, and was sick herself. Sometimes she would stay an hour or two late to get everything done. "It was an overwhelming month," she said.

September was an example of why Health and Wellness services need to be expanded.

Peters is joined part time by Dr. Laura Siems and Thomas Sullivan, Physician Assistant (PA). But both Siems and Sullivan work full time in Mt. Union, and have Juniata office hours only on Wednesday.

Expanded language programs

Are language requirements on the horizon?

Brittany Crawford

Many changes have been made to the language curriculum this year. Chinese is being offered for the first time since 1989. The Russian courses have also drawn an immense interest this year.

But even with this new course and renewed interest in languages, it is hard to get the resources needed to attract new language students, too few faculty members to add new languages.

The lack of faculty and other resources also plays a role in the decision to make foreign language a mandatory requirement. Thurston-Griswold said that the Curriculum Committee is currently reviewing the FISHN requirements; however, he also went on to say that there have been no specific proposals made for a foreign language requirement.

Students with a POE in World Language suffer most from the lack of resources

said Henry Thurston-Griswold, Spanish professor and coordinator of Juniata's language programs.

Students with a POE in world languages suffer most from the lack of resources. Currently there are roughly only twenty students that designate a such POE.

Thurston-Griswold believes that administrative support is lacking due the low enrollment in the world languages POE. As a result, Thurston-Griswold said that there are no current plans for increasing the number of languages offered. "If we get the resources we need, we will use it to strengthen existing programs."

He also mentioned that there are

"If a language requirement is approved, and that's a big if, I don't see it happening for at least another two years. The requirement would only apply to incoming freshmen."

Many people, including international advocates, would like to see a language requirement. Thurston-Griswold said, "I am in favor of it, because I believe that developing proficiency in other languages and cultures is one of the best ways to become an informed and engaged global citizen."

Still, Thurston-Griswold believes that students are becoming more engaged in their international education. He said that students are doing their part to help diversify the languages offered.

In previous years Arabic has been taught by students as an informal course. He does not believe though that Arabic will be offered as a course anytime soon. "We would need a full-time professor, and we just don't have that money."

On the other hand, the interest in languages has brought Chinese back to Juniata. Jingxia Yang is Juniata's new Chinese professor, and she said that there was a big demand for the language. "Interest has been building from year to year. There are students from every year taking Chinese." Some reasons for the building interest include the choir going to China in 2007, the culture and the study abroad program in Dalian.

There are currently twenty-one students enrolled in Chinese, and Professor Yang is very impressed with the class. "The Chinese language has a sound system and a writing system. It's difficult, but once you learn that, grammar is very easy."

Yang is happy with the current class size, but she hopes the demand will continue. "The more demand we have for the language, the better we can expand the program."

Photo courtesy of Pat Kepple

Sharon Flaherty Vernet, Ellis Hall assistant, (far right) was given a check for $4,520 on Monday, October 10 to help with medical expenses for her husband, Skip. Skip was involved in a serious motorcycle accident in August, and Sharon left work for several weeks at the beginning of the semester to help care for him. Skip is now in much better condition, and Sharon has returned to work.

Students, faculty, staff and community members purchased raffle tickets to raise the funds. Coordinators of the raffle are pictured with her above. Left to right, are Pat Kepple, Belinda Zauzig, Anna Harris, Barb Reck and Betty McKim.

Sharon has worked at Juniata College for 23 years, first in the Dean of Students Office then in Ellis Hall.

Holly B. Brown / Juniatian

On October 12, freshman Nicole Manteris signed a banner in Ellis to support Juniata's celebration of "Coming Out Day." AWOL set up the banner and encouraged everyone to sign and reveal a part of themselves.

AWOL Celebrates National Coming Out Day

J. Atkins

National Coming Out Day was held on Wednesday, October 12. AWOL (All Ways Of Loving), sponsored the event from 11:30 a.m. to 1:30 p.m. in the Ellis Lobby. AWOL encouraged everyone to support the holiday. The group emphasized that 'coming out' does not only deal with what your sexual preference is or what gender you are, but the simple fact that you are letting people know about yourself.

"I think that every day is a 'coming out day' for those who are openly gay, lesbian, bisexual, transgenders, etc.," said Michelle Schoonmaker. "Having this day gives these individuals a day to collectively announce who they are to the world."

Anyone who wanted an opportunity to let everyone know their interests or about their 'secret' lives had the chance to join other people who were 'coming out' and let the community know together. A poster paper was set up in Ellis Lobby, and anyone who wished could sign it to show what they were coming out as. Afterwards, the poster was displayed for all of Juniata's community to see.

When asked if they were going to participate in the holiday, some students remarked with comments like, "Coming out of where?" Other students seemed to be completely unaware that the holiday is for all different people.

Normally, National Coming Out Day is held on October 11, but due to fall break, AWOL chose to celebrate one day later. The holiday is held in honor of the march for lesbian and gay rights that occurred back in 1987 in Washington DC.

AWOL hopes that this event will help to encourage those who have not yet come out to do so. The holiday also serves as a tribute to all those who have come out before, and is a reminder of the struggle that gays and lesbians go through for their rights. The group has sponsored this event on campus since the club was established in 1992.

AWOL is a student social and activist group for bisexuals, lesbians, gays, queer and transgender people, heterosexual allies and anyone who might be questioning his or her sexuality.

The club works to make Juniata's campus more open to, and aware of, the types of people around us. The club also sponsors programs that let people of the LGBTA community and others to meet.

Schoonmaker said, "Occasionally, we have people, members and nonmembers, who believe that AWOL is a dating service, which we are not."

Any student who attends Juniata is eligible to join AWOL. Things such as sexual orientation, religion, gender or race cannot keep a student from joining the club. A common misconception is that you cannot join AWOL unless you are homosexual or bisexual when in fact AWOL openly welcomes straight allies in their club and at their events.

AWOL also participates in other national holidays such as World Day of AIDS and National Day of Silence. On Saint Valentine's Day, the group celebrates by sponsoring Open Hearts, Open House.

Is "helping out" worth academic credit?

Emily Eller

As a general rule, liberal arts educators acknowledge that learning happens in a variety of environments and across a broad range of subjects. In fact, many would argue that participating in a large range of environments, subjects and activities is necessary to learn anything at all (hence FISHN requirements). But, is everything learning? What should be institutionally credited?

Service learning is one such example. What is "service learning?" Juniata does not provide a concrete definition. Shauna Morin, community service and service learning coordinator, vaguely explained that, "Service learning incorporates hands-on student learning and curriculum." She then went on to say that service learning is a "concept" and not a "program," meaning that students can get credit for learning that happens outside the classroom.

Receiving credits would certainly help some students. Junior Dana Nelson, an active member of both Habitat for Humanity and the Special Olympics, spends almost as much of her time doing community service as doing her school work. Said Nelson, "my community service can make me a little crazy sometimes, but it also keeps me sane."

As a Social Work POE, Nelson acknowledges that not every POE lends itself as easily to community service. But she wishes that more people would get involved.

No one knows how many courses at Juniata have mandatory service

"A lot of certain types of service are always being done by the same people. People who haven't done service maybe just haven't been encouraged or don't know what's out there," said Nelson.

Service activities are typically unpaid (volunteer) activities, but Juniata's work/study program allows students who qualify financially to be paid for their community service. Students who do service for their work/study do not typically receive credit for their work, unless it is also associated with a service learning course.

Confused yet?

No one knows how many courses at Juniata have an unofficial mandatory service component to them. Morin says that one of her goals is to find out what courses use service learning so that she can better coordinate with them.

Carrie Rhodes, the scheduling assistant in the Registrar's office estimated that there are only four courses that use service learning. Each of these courses was listed under the "non-departmental" heading. This list includes a course that

continued page 4

The fleecing of clubs?

continued from page 1

are dependent upon a number of factors: cost of the raw materials, labor and even the current cost of fuel.

"[Students] really get a break on prices," said McLaughlin. "What we charge is barely above cost, and I'm going to cover my costs."

McLaughlin, breaking down the costs of the Bailey Oratoricals per person, estimated a large discount on Sodexho's behalf.

"What's stopping [SPEAK] from going to McDonald's and buying a bunch of hamburgers for a dollar?" asked Worley.

According to Staci Weber, Director of Student Activities, the "right of first refusal" stops Worley from seeking food from an off-campus source. Sodexho holds a contract with Juniata that guarantees the company the right of "first dibs" on all activities on campus that require food service.

Technically, according to the contract held by Sodexho, even the most mundane dining experiences, such as one faculty member bringing in food for another (an example cited by McLaughlin), first requires the authorization of Sodexho.

While Weber did not go into details about the consequences for an organization that violates the Juniata-Sodexho agreement, in e-mail correspondence, Weber admitted that no written policy exists that is made available to students and organizations. There is one, however, in the works.

Cost wise, Juniatians are not paying much for catering service when compared to other colleges and universities around the state. The *Juniatian* compiled the catering costs for over 30 institutes of higher education.

Of those Pennsylvania colleges with enrollment under 5,000, Juniata ranks as the 15th most expensive, out of 31 colleges surveyed, in the state for the cost of catering an event for 30 people with orange juice and cookies. Juniata's catering charges, $47.50, are slightly below the state average of $52.86.

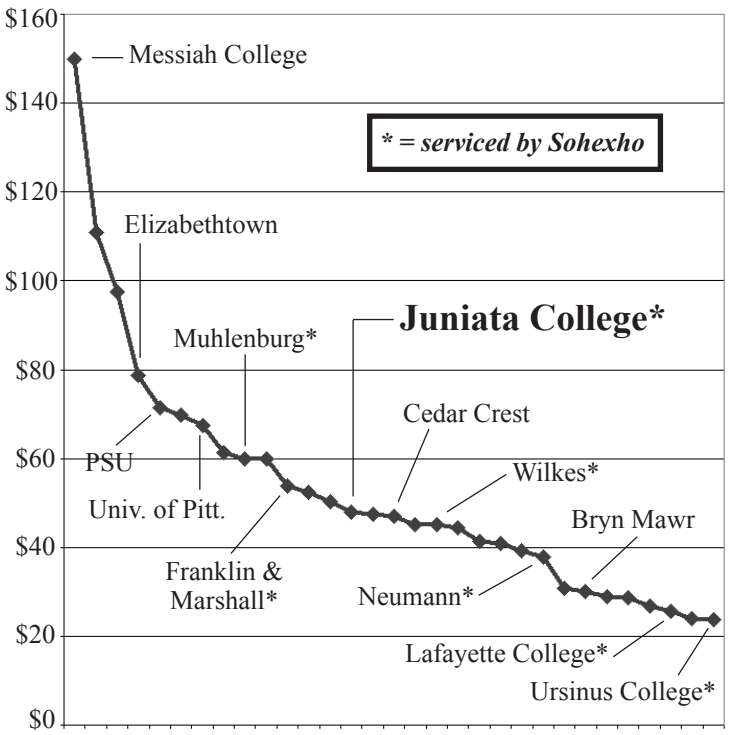
Across the state, the most expensive campus to hold an event for was Messiah College, costing $150 for orange juice and cookies for 30 people. The least expensive was Ursinus College, who also contracts Sodexho, costing $23.75 for the same event.

This data provides little comfort to advisors and officers of student clubs, who have been searching outside of Juniata for other sources of food, a violation of Juniata's contract with Sodexho.

"We don't always take the event," said McLaughlin. "Sometimes we allow them to get food from somewhere else. I wouldn't want to eat at the same place everyday, and I don't want [students] to."

McLaughlin noted that Sodexho is flexible regarding their contract with the school, and often caters events for free.

McLaughlin added that he is "not an ogre" and is at Juniata to help students and organizations. Both he and Weber agreed that, largely, the relationship between the Student Activities Office and Sodexho has been "good."



Other campus organizations, such as the Muslim Students Association, did not feel cheated by the prices charged by Sodexho, or their contractual obligations.

"Whenever we've required Sodexho to provide food for MSA events, I do not think they overcharged us," said Fouad Touzani, an officer of MSA. "They provide us with Halal meat, which is a meat slaughtered in an Islamic way."

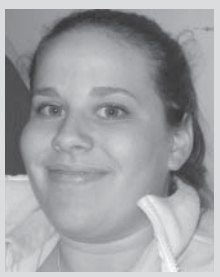
Fouad elaborated that Sodexho even goes as far to extend its service hours to accommodate the religious dining requirements for Muslims during certain times of the year.

What does it cost?

Cookies and orange juice for 30 people

All data points, except PSU and Pitt, represent colleges and universities in Pennsylvania with enrollment of 5,000 students or less.

Roving Reporter



What has your experience been using Sodexho for catering club functions?

"We used them for a coffeehouse event last year. The bill was almost $100, and all we got for the function was different types of coffee." - *Senior Lori Martin, President of the Students of Business (SOB) Club*

"Sodexho catering is good stuff, but expensive. I would use it more if it cost less." - *Senior Michelle Schoonmaker, co-Pres. of AWOL, Sec. of Women's Group and Treasurer of Psi Chi*

"My clubs have always gone with Subway or an outside caterer: something a little more appetizing than Sodexho. We eat Sodexho all the time in Baker. Everyone needs a little variety." - *Senior Melissa Wilkinson, Sec. of Psi Chi*

Reporting and photos by Holly B. Brown and Sarah Anne Wharton

The Juniatian regrets the following errors in the Oct. 6 issue:

CoffeeHouse Series (p. 7): Michael Glabicki is currently part of the band Rusted Root, even though the Juniatian claimed that he "formerly sang" with the group.

Photo Attribution Errors (pp. 3 & 6): The Mt. Day photo and Mr. Juniata photos mistakenly attributed to photo editor Holly Brown were actually taken by assistant editor Sarah Anne Wharton.

Persian Image photo caption (p. 9): The students pictured were not Susan Ostyn and Scott Stephan as noted.

Surplus funds

continued from page X

received $2,500 to run its activities this year. Student Government officials say there are some organizations that spend within the range of $6,000-$7,000.

The Allocations Board has decided to provide an additional $20,000 on top of JAB's regular budget of $70,000. JAB had asked for more.

"JAB had petitioned for $25,000, but the Board decided that they needed [only] $20,000," said Best. JAB says the additional allocation will be spent on Friday Night Live, concerts and the Coffeehouse series.

The Board's decision has already been endorsed by Student Government's executive board and the Senate. Any funding exceeding $500 has to be endorsed by the Senate.

The student activities fee is shared evenly by JAB and Student Government. Though the Dean's Office had initially considered splitting the surplus between them evenly, it later decided to leave the decision of sharing the money up to the students. Consequently, JAB petitioned for money. It seems likely that the organization will still ask for more than its additional $20,000.

"Depending on the response of the series and events this semester," said senior Megan Allison, chairperson of JAB, "we may petition to the Student Government for additional funding later in the year."

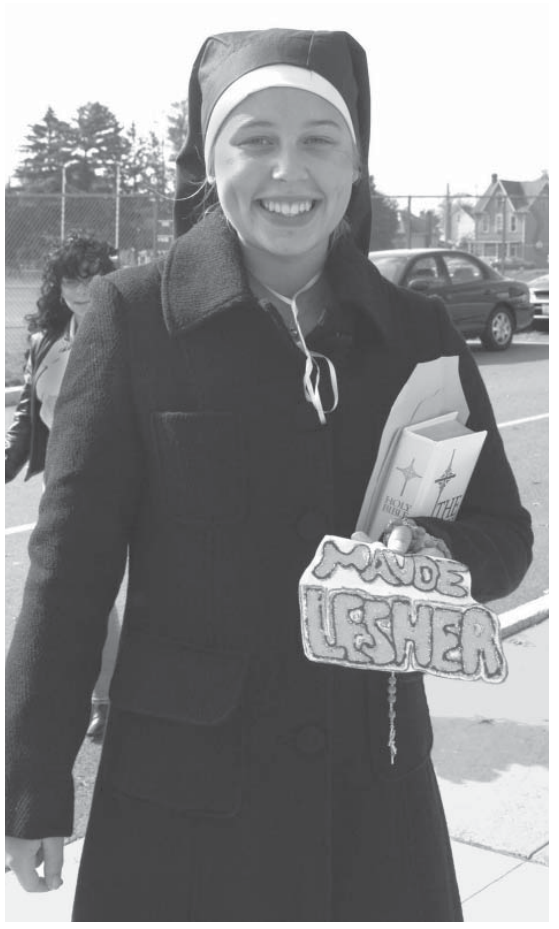
Besides JAB, beneficiaries of this year's funding surplus include the African-American Student Alliance and WKVR, among others. It is unclear how much more money was allocated to the Alliance.

WKVR's funding was increased by $1,855 from last year. However, it is less than half of WKVR's 2002 funding. In 2003 WKVR's share was cut down from $13,000 to $4,000.

Allocation Board officials are not sure as to why these drastic cuts were made in 2003, but they insisted that more funds would be made available if WKVR petitions.

WKVR officers indicated that they certainly do need more money and intend to petition soon.

"Whatever we get is barely enough to sustain," said senior Joseph Cardinale, general manger of WKVR.



The station's insurance was terminated by NAB, the company that handles its insurance. The issue was resolved only a month ago. But the problem doesn't end there; the station's seven-year FCC license is due to expire in January. Cardinale says that the station would require a thousand dollars or more to renew it.

An additional $2,500 fund for WKVR has been allocated for a concert. However the fund is pending in the absence of a concrete proposal.

Student Government will continue to have a budget surplus unless it, or the clubs for that matter, go on a spending spree. So for now more money would seem to mean more saving rather than spending.

Homecoming Parade: sinners and saints

Sarah Anne Wharton / Juniatian

Above left, senior Amber Ziegler was decked out in sequins and fishnets to celebrate Juniata in the parade during Homecoming weekend. Her costume was a tribute to one of JC's biggest bashes – the "Pimps and Hos" party held every spring semester. Her off-campus float, celebrating all Juniata Traditions, won first place in the parade.

Above right, freshman Kelly Crosset donned a holy habit to become Maude Lesher, the female Juniatian that Lesher dormitory was named for. She took her garb and her Bible through the parade Homecoming weekend.

Helping out

continued from page 3

Morin teaches called "Community Engagement," which consists of 25 hours of community service, reading and journaling. The other courses included a summer service learning trip to Guatemala and some education courses which incorporate an adult literacy component.

More community service is being done than is happening in those four courses. In fact, internships done during the semester or over the summer are often essentially service learning and students can pay to receive academic credit for internships.

Receiving credit is always a point of contention, and not all service does receive it. There are service learning trips that take place over vacation periods, and of course there are a large number student-run and other organizations that do direct service but are not associated with a class and receive no academic credit.

The decision of whether or not service attached to courses receives credit is made by the faculty curriculum committee.

Said Morin, "I think when credit is attached to something it's good for the student because it's reflected on their transcript and I think [attaching credit] gives it more weight."

She further explained that Juniata, as part of its mission, wants students to be engaged and active in their communities once they graduate. So, said Morin, "it makes sense to start now."

Juniata has always put a strong emphasis on service. "I think there's a culture on campus of service to others" said Morin. She went on to say that surely the Brethren history of service and action plays into that culture.

Nelson feels that her admission to Juniata had a lot to do with her active participation in community service in high school. "I think that people who are community service oriented go to JC."

So, if service is an important part of our academic experience, will more service receive credit? "It's been discussed," said Morin. "It's in such an early stage that I wouldn't want to say one way or the other."

Lawn concerns

continued from page 1

herbicide use last August, when he walked near a spreader spraying the lawns in front of the von Liebig Center for Science. He sent an e-mail to Jeff Meadows, facilities grounds and central boilers supervisor, asking what product was used and what was in it.

Meadows replied, "The application on August 11th was Trimec, for weed control, a commonly used herbicide containing, MSMA, 2,4-D and Dicamba."

When Matter learned that the herbicide contained MSMA, and also the ingredient 2,4-D (2-4-dicholorophenoxyacetic acid) – half of the 50-50 mix of two chemicals in making Agent Orange during the Vietnam War – he was a little worried. He found that no one seemed to know the dangers of the toxins being spread around campus. This prompted another e-mail to Meadows.

"Juniata College has claimed to be interested in promoting environmental responsibility," Matter wrote. "Using arsenate and chlorophenolic herbicides strikes me as a direct contradiction to 'environmental responsibility.'"

The next responses from Meadows were a little problematic. Matter said he "backpedaled and shifted gears."

Meadows wrote, "Having reread my original response, I mistakenly said that Trimec contained MSMA. It does not." He then said that the weed-killer used that specific day (August 11), was apparently *not* Trimec Plus, which does contain arsenic, but a different product, Trimec 992, which does not.

Regardless, Juniata does occasionally use the more powerful, more toxic Plus, and people do not realize it. They do not even have to be told of its use. The facilities department keeps records of labels and material safety data sheets (MSDS) on file if people are interested, but under Pennsylvania law, does not legally have to post or pre-notify when dangerous products are used.

Matter learned the herbicide contained one of the two chemicals in Agent Orange

Even though it is legal, questions have arisen as to whether or not Juniata should be spreading the potentially hazardous substance on campus greens. Most people are not aware of its use and use these greens often. JC is known for its pretty campus lawns where students lie in the sun or play sports, faculty members' children run and play, and picnic events like Lobsterfest and Homecoming are held. Would they continue these activities if they knew arsenic could be present?

"It would not be something I would choose to come in contact with knowingly," said Matter.

Alternatives to the herbicides and other environmentally suspect lawn products do exist, but Meadows said that there are not many effective organic-based herbicides to date.

"I have no problem with a lawn full of weeds if that is what everyone wants, but I have been asked to take care of the weeds in center campus," he added.

And the fact of the matter is that Trimec products do get the job done, arsenic or not.

Now, more people are becoming aware of the herbicide issue and their local Huntingdon-JC environmental surroundings. An opinion line call to the Huntingdon Daily News asked questions about run-off from campus-used pesticides and nutrient treatments. Students in the environmental toxicology class will be answering those questions by doing a variety of tests on Muddy Run throughout the semester. The knowledge is coming out, and word is spreading across the lawns.

Matter thinks this is a good thing.

"I don't want to be Chicken Little, but I think people have a right to know," he said.

Language programs

continued from page 2

As of right now, the students taking Chinese this semester can sign up for level two next semester. Professor Yang is hoping that the interest will continue, and that there will be enough students to offer levels three and four next year.

Thurston-Griswold also has hopes for this program. He mentioned that Juniata was very lucky to find such a qualified professor to teach the language. He said that it is hard with the limited resources to bring these kinds of languages to Juniata, but that the College also wanted to expand beyond Western languages.

But even with the qualified professors and the slow and steady changes in language programs, Thurston-Griswold is not completely satisfied. He quoted a line from the movie *A Field of Dreams*, "If you build it, they will come." If Juniata builds and expands their language programs, more students will come.

Health & Wellness overload

continued from page 1

The staff has had their hands full. With the Health and Wellness Center's open door policy, the staff saw about 26 students per day last month, and the wait was often long. "I feel bad when people have to wait, but I can't go any faster," Peters said.

The staff saw a wide variety of illnesses this year, aside from the usual cold and flu. Peters described it as a "mutation" of all the bugs students have brought to campus.

The staff also had to juggle routine treatments, such as allergy shots, with the illnesses. Peters said it was "mind-boggling."

Things are apt to settle down, but flu season is just around the corner, Peters said. It seems unfair for one person to have a whole college's health to manage. With one nurse and so much to do, what can be done? There are several possibilities.

Peters said, "I would like to increase their (Dr. Siems and PA Sullivan's) hours."

Alone, Peters can only do standard orders and has to call Siems or Sullivan if she cannot complete treatment. Having more physician hours would move the process along.

Peters is also contemplating adding a secretary or receptionist position for the office. At present she does most of the paperwork, e-mail, and phone calls. With addition of such a position, she will be free to attend to students instead of logistics.

Sarah Anne Wharton / Juniatian

College nurse Connie Peters (RN) poses with a sick friend in Juniata's Health and Wellness Center exam room. Record numbers of students have visited Peters this academic year, a problem aggravated by the fact that she is JC's only nurse on full-time duty.

A new position could also shorten the waiting time for students. An extra hand would be able to schedule appointments and better attend the emails. Peters wants to hear student feedback before making any changes.

Students can also limit Health and Wellness traffic by taking better care of themselves. Peters said, "It's been a busy year, and hopefully, people are taking care of themselves." Eating right, exercising, washing hands, and getting to bed at a decent hour will keep the campus healthier. Such changes might be unrealistic, but it is worth a shot.

Students also help around the office. Maria Welch works at the Health and Wellness Office for Peters. She is currently inputting all the freshman charts into the computer. Peters said this is a great help. She will also have student interns who will help with filing.

Peters has the College on her side. Juniata administrators have recognized the problem and are working with her to find a solution.

Peters is grateful for how kind the students are and how little they complain.

Sara Lombardi said, "It must be stressful for her, but I have never waited over 20 minutes to see her." This is a compliment to Peters' dedication and management skills.

Let college students be college students

Does being a college student mean you can't be a good neighbor?

Holly B. Brown

The other Saturday, one of my roommates walked into our apartment in a huff.

"The party got broken up again," she said.

It was her fourth one this year. My experiences have been similar: one get together reported by our neighbors, a bust by the Huntingdon Police narrowly avoided and other parties thrown by friends reportedly being broken up early.

Maybe it's because I'm 21 now and just noticing it, but does it seem to anyone else that parties are getting busted a lot more than usual?

Of course they are. In the past two or three years, the seniors have made a mass migration from the apartments at East into town. Not only does this mean that East parties are lamer, but it also fuels the feud between Huntingdon residents and Juniatians.

Let me list my grievances. I'm woken up every morning by elementary school students and their parents talking loudly outside my window, waiting for the school bus. My neighbors are constantly having construction done to their sidewalks, houses or lawns. Dogs are barking, kids are outside yelling at all hours, but I'm all right with it, because there should be give and take. It's part of being a neighbor.

Ways to throw Security-free parties

- Give your neighbors your phone number to call if things get too loud for them
- Keep windows and doors closed
- Keep people inside
- Have someone sober "monitor" the party and keep the noise down
- Remember, borough quiet hours start at 10 p.m. weekdays and 12 p.m. weeknights

Sometimes I wonder if the "Good Neighbor Initiative" wasn't an invitation to our neighbors to call security or the Huntingdon PD for any small annoyance. We flashed them a bit of an apology, and they took it for weakness. If being a "good neighbor" involves compromise, who's holding out in Huntingdon?

Sophomore Amanda Harris doesn't see why the heightened sensitivity is happening. "It never occurred to me that Juniata students were being ridiculous," she said. "It always surprised me how responsible people were no matter how drunk they got. I don't really understand why the JCPD or Huntingdon cops are suddenly concerned with our

continued page 7

Ballroom should become student lounge

Nate Drenner

Homecoming weekend saw the celebration of one completed capital campaign for the Kepple administration – a record $103 million campaign for Juniata College. The next campaign is already on many minds, and potential goals include renovations to Ellis Hall or some other student-centered space.

But we don't need to wait for years to make space for a student lounge. There is an immediate need for a real student lounge, and a ready location is on the second floor of Ellis: the ballroom.

Even assuming that the new capital campaign will include a student center, it doesn't take $103 million to buy some furniture.

The ballroom is already connected to Muddy Run and the Cyber Café. It's even wired for sound. Set up some tables, chairs, sofas and the stage currently in Cyber, and the first steps to a student center are underway.

With the current Student Government surplus (see page 1), surely an organization like JAB, the Office of Student Activities, or the government itself could find money to start this process. Hopefully this is what Leaders in Motion meant in their recent survey by the possibility of "a student hang-out room."

There is an immediate need for a real student lounge

It could be a permanent place for the JAB coffeehouse series, for an expansion of the crowded Muddy Run, and most importantly for students to commingle and socialize.

Some coffeehouses this year have had to be moved from the Cyber Café to Baker or the ballroom because so many people attended.

Meetings, fairs and rehearsals have traditionally needed the ballroom space, and for particularly large events, the ballroom is perhaps the largest space on campus.

There are some others, though, that come awfully close.

The lobby of von Liebig is reservable and can hold a maximum of 148 people, twenty less than the ballroom, according to the online event scheduler. This lobby *is* used for big events like enrollment open houses, freshman orientation, Homecoming weekend and others. What better location for events and fairs? Jitters would help draw a crowd, and the Pheasant Lounge is just upstairs.

The lobby of Kennedy is available for up to 100 people, and the Tussey/Terrace Lounge can hold up to 125 people.

Music groups have already moved rehearsals to Halbritter.

The list of alternatives goes on. Besides, a student lounge setup would not mean that the ballroom could *never* be reserved. Baker fills up three times a day and is still occasionally reserved for events.

Some steps have been taken to improve Ellis. Baker was repainted and redecorated two years ago, student activity offices were moved one year ago, and somehow Sodexho managed to squeeze another food line into Muddy Run this summer. As much as the Juniatian appreciates its release from the dungeon for an office on the first floor, these measures have been merely reshuffling of existing areas, not the rededication of space that is needed for a real student center.

Letter to the Editor

And out come the wolves!

Everyone is entitled to their own opinions even if we perceive them as outrageous or lewd. Before we go lighting our torches, assimilating into a mob and storming the castle about Tommy McConnell's article *["What is a sport?" Oct. 6 Juniatian, p. 14]*, I would like to add my *opinions* on the matter. The purpose of this brief rebuttal is not to suture his arguments, but rather to discuss validity as I see fit. My perception. Nothing I write do I deem as factual, just lyrical propaganda from a simple-minded poet. End disclaimer.

Sport. Such a popular word with such an ambiguous meaning. Where do we even begin to decide on what is and what isn't? I believe at times, Tommy manifests some ideas worth investigating, but undeveloped ideas at that. I think the biggest deciding factor is absent – the main difference between sport and competition is the concept of a league. Competitions are single events, usually not related, whereas sports are comprised of a scheduled league.

Let me paint the picture. Skateboarding is not a sport. This is because skateboarders compete in single events, the X-Games for example, but they do not compete in a scheduled league. This is why we consider basketball, football, soccer and other comparable activities as sports. Much like a skateboarding event, each basketball game is a competition, except these competitions are strewn together in an interconnected, league structure with a final contest to decide the undisputed champion.

Where does cheerleading come in then? Well this is a tougher question and I don't think it is a sport, but I have a minimal understanding and that is nothing more than a mere educated guess.

Poker? Despite being a novice poker player, I do not think it's a sport. This brings me to my second criterion. The activity in question must challenge the mental aptitude *along with* the physical ability of its participants. Yes, poker is competitive, and yes, there is strategy involved, but it does not require any physical skill, unless you consider pinching your cards, and tossing them in the middle a test of dexterity.

McConnell's three rules of thumb do not hold any water. I break a sweat when I am walking six or so blocks to the lovely Juniata campus. There are no judges making the final decision as to who wins between me, sometimes resorting to running for my life, or the

Presidential Perspective

"Are there any plans to expand the hours or services at the Health and Wellness Center? How will increased demand for health services on campus be addressed?"

Actually, we have expanded the services. We added a full-time counselor position (Pat Hunter) this fall and a supervised intern working 20 hours/week (a Temple University MSW candidate). Counseling services are now available Monday through Friday 8:00 a.m. to 5:00 p.m., Monday evening until 8:00 p.m. and Thursday evening until 9:00 p.m. We also provide a variety of support group meetings and continue contract the services of a visiting psychiatrist.

As you may know, college health centers tend to be relatively limited in the services that can be provided – a large extent involves assessment and referral. Health services at Juniata are provided by a full-time RN (Connie Peters), a visiting physician (Wednesday mornings) and a visiting physician assistant (Wednesday evenings). The PA is also available for consultations via telephone.

Health services may have seemed especially crowded recently. A record number of students have been seen in health services this fall. Due to a rash of colds, stomach virus and strep throat, 503 students were treated during the month of September. (Perhaps a few too many students swam in Lake Raystown during Mountain Day!) Although we hope the traffic flow in health services will begin to subside, we have had preliminary discussions with Dr. Laura Siems (our visiting physician) regarding ways we can extend the coverage and services provided.

"On average, how many copies of the New York Times are picked up from Juniata College newsstands each day? Why was the Times chosen for our campus rather than the Washington Post, USA Today, or another newspaper?"

We have 200 papers delivered each day, and about 166 papers are "picked-up" each day (an 83% average daily pick-up rate).

The Times was chosen for a couple of reasons. One, it is widely

viewed as the "national paper of record," which means it consistently covers a majority of the significant national developments in the arts, sciences, technology, education, politics, international affairs, business, etc. No other paper has the over-all breadth and depth of news coverage.

Secondly, the Times has a special program for higher education that gives Juniata a special discount, as well as other benefits such as a website that is dedicated to college readers, a guest speaker program that Juniata has benefited from, and opportunities for Juniata students (primarily students who write for the Juniatian) to visit the Times offices in New York to participate in workshops and programs designed to help student writers and paper editors get a clearer understanding of how a major national newspaper operates.

We investigated other options. However, the Washington Post only offered its higher education discount to schools near DC. USA Today has a national discount program, but it is more of a 'pop culture' paper, with much less in-depth coverage and analysis than is typical of the New York Times. Furthermore, it did not offer the secondary programs of speakers and visits to their offices.

The New York Times also makes a significant annual contribution to Juniata's Habitat for Humanity Club, in recognition of their great service in delivering the papers around campus each day.

President Kepple wants to hear from you! He uses his column to answer any college-related question from the campus community. Simply e-mail questions to juniatian@juniata.edu, and the editors will forward them anonymously to Dr. Kepple.

Out come wolves

continued from page 6

seemingly omnipotent woman who follows me to school and spouts random, incoherent gibberish (God bless her heart). No names please.

All kidding aside, my point is that these are too hazy to be deciding factors. I'm confident poker players break sweats during their marathon sessions.

In Tommy's defense I believe he was more or less trying to portray what I explained in the previous paragraph. No judges? What would you call the referees in the a football game? I am pretty sure that the football players don't determine when they score a touchdown (Wouldn't matter for the Philadelphia Eagles, they would most certainly lose anyway…I kid I kid!).

I am not going to dwell into the realm of woman athletics; I will let that to the experts chomping at the bit. Tommy is one of my personal friends and I know he is a good-natured fellow, and I'm sure he was well-intentioned. At least he provided a good, temporary buzz for campus.

Jonathan Moody
Class of 2006

Let students be students

continued from page 6

parties."

I don't either.

While there were some incidents last year that were certainly cause for alarm off-campus, on the whole I don't feel that Juniata students are being overly obnoxious or attempting to ruin anyone's life. We're not Penn State, and we don't throw massive parties with burning cars and people jumping out of windows.

People probably come to Huntingdon for the quieter, small-town atmosphere, but they also need to realize that this *is* a college town. Juniata helps the community by stimulating local businesses, providing jobs and cultural events, among other things. But the flip side to that is that students will be students. This is one of the few times in our lives that we can get away with late nights and partying.

Or at least, it used to be.

We can complain and party until our files in the Dean's Office are overflowing, but the real question is: is there anything we can do about it?

The Good Neighbor Initiative attempts to bridge the gap between students and neighbors, and provides some key information to living in town. And there are always things we as students should do to throw courteous parties.

One student suggested, "Keep someone sober to keep a watch on things. A sober person will know if the music may be too loud or if things are getting out of control. Get to know your neighbors: Are they elderly? Do they have little kids? In general a little respect for your neighbors and some forward thinking can solve a lot of your problems."

Senior Scott Stephan gave his neighbors a communication link if things got out of hand. "I let all my neighbors know that if we ever got too loud to just give us a ring or stop by and we'd wrap up," he said.

Keeping communication open might absolve some of that Huntingdon-Juniata rivalry.

Until the police force and our neighbors lighten up, it's important to know the limits. Borough quiet hours are 10 p.m. on weeknights and 12 p.m. weekends. If a neighbor or someone outside of the College reports a noise violation, security is required to take names and write up the event. Check out the Good Neighbor packets or talk to your RA about other ways to avoid security's ominous flashlight at your door.

Until a major bridge can be made over the gap between students and neighbors, it seems to me like we're stuck tiptoeing around our doors and on the sidewalks. Let's hope the Class of 2006 can continue to have fun without filling our incident report files to the brim.

LETTERS TO THE EDITOR
Students, faculty, staff, alumni: send letters to juniatian@juniata.edu. We print all letters to the editor that are of interest to the campus community – in response to one of our articles or on a completely separate topic. Please limit letters to about 300 words, and note that longer submissions may be printed partially due to available space. Opinions expressed in the newspaper are not necessarily those of the Juniatian staff.

Juniata ghost stories

Aly Pompeani

With every old campus comes urban legends, myths and ghost stories, and they are never more prevalent than around Halloween. Throughout the years, various ghost stories have been passed down through generations of students at Juniata. There are rumored encounters and appearances in many different places on campus. Whether or not these tales are true, they continue to instill curiosity and fear in students, faculty and community members.

Cloister

Imagine sitting in your dorm when your hairbrushes and other personal items begin to throw themselves across the room. Or your books, which were neatly stacked on your desk, slide onto the floor.

Those are the same feelings one former Cloister resident had a few years ago.

Kim Campenaro, a 2004 graduate, had a similar experience living in Cloister. One night, Kim was awakened by someone violently shaking her back and forth. She opened her eyes to see a boy leaning over her with a smirk on his face. Her first reaction was to push him off, and when she did, he disappeared. "He wore plain clothes... they were worn, but nothing like something someone would wear today," she said.

From that night on, the fire alarm began to randomly set itself off. Finally, the entire alarm system had to be shut off. Still, the night the system was shut down, the alarm continued to go off – each time originating in Kim's room.

In the early 1900's, a seminary student at Juniata discovered a book on atheism from Europe. The book led him to question his faith, leaving him in a state of depression until he committed suicide. Today, he supposedly roams the halls of Cloister trying to make up his mind about his beliefs. Could his spirit be the one Kim and others saw in Cloister?

Sarah Anne Wharton / Juniatian

Above this landing in Founders Hall, empty rooms and dim hallways fill two stories. They are dilapidated and closed to the public, but ghosts may still wander vacant corridors.

Maybe it was the ghost of the young woman residing in the former lounge, now a dorm room, at the top of the Arch. This spirit is said to be less frightening…for women at least. She does not seem to like men. Some say she is looking for her boyfriend who failed to meet her one night.

"Supposedly when men were brought to the lounge, there would be an eerie and creepy atmosphere," said 2004 alum Amy Isenberg. "Lights would flicker and it would be very unwelcoming."

Perhaps this ghost was the one who aided the Registrar's scheduling assistant, Carrie Rhodes, in the basement bathroom of Cloister three summers ago. Rhodes was working on tours and inventories and stopped to use the bathroom next to the kitchen in Cloister. She was extremely impressed with the new technology of motion sensors. "I walked in and the lights turned on, I went to the bathroom and the toilet flushed, I walked over to the sink and the water came on," she said. Later, Rhodes returned to the bathroom only to find a light switch, a flusher, and faucet handles. The motion sensors had not yet been installed in this particular bathroom.

"I wasn't scared," said Rhodes. "It was more interesting than anything else."

Good Hall

Religion professor Donald Braxton claimed there was supposed witchcraft in Good Hall. Evidently, sometime during the late 1970s, a pentagram showed up on the floor of the attic in Good. Along with it came candle wax and animal bones. Today this attic is used simply for storage. Then, it

"In The Stacks" at campus bookstore

Freshman publishes first novel

Rebecca DeHass

Many students are familiar with Pennsylvania Senior Projects, which are required by law in order to graduate high school in the state. The exact requirements vary at different schools. At Altoona High School, Advanced Placement students are required to complete a ten- to twelve-page research paper on any topic. Instead, current Juniata freshman, Chris Burlingame, decided to write a book.

After months of dedication, Burlingame's "In The Stacks" is now on sale for $6.00 at Juniata's bookstore. His project turned into a 209 page literary fiction about a librarian who finds himself caught between reality and the fictional world. The book begs the question, "When all the lines of reality are blurred, what do we live? Who do we believe?"

The story begins inside the Public Library, as the main character Ronald Way stumbles around, groggy and confused about why he is laying in an aisle of trashy romance novels. As the book unfolds, the reader learns that Ron is more than just physically unbalanced; rather he is also emotionally unstable due to a harsh home life. He finds his escape in a graduate student's novel and from the moment he turns the page, Ron becomes lost between two worlds.

Because Burlingame wanted to pursue a different route for his project, he had to receive special permission. "I actually had to petition the lady in charge of curriculum," said Burlingame. "Of course, she got a free copy for letting me do it."

Burlingame managed to finish the project in five months, despite his intense involvement with baseball and the school's musical.

"It's all about time management," said Burlingame.

While working, Burlingame's goal was to complete three pages—approximately a thousand words—a day. He noted that anyone, even those involved in activities, can find the time to write a book as he did. "Make sure you give yourself a time schedule and don't miss a day," he added.

Sarah Anne Wharton / Juniatian

Freshman Chris Burlingame wrote his book, "In the Stacks," for his high school senior project.

After school, he would immediately work on his book and then his homework, or vice versa. On weekends, he wrote between ten and fifteen pages a day. Burlingame wrote the first draft of "In The Stacks" in under two months. "As I was writing the story I could feel my style progressing. Even in that month and a half my writing became so much more sophisticated and developed." He continued to shape his book and his technique during the two months of revision following the first draft.

The book was independently printed by Keystone Digital Press.

continued page 11

'Music of the World' airs Sundays on WKVR

Laura Sweltz

Bringing a sense of culture to Juniata College, "Music of the World" is a WKVR radio program featuring international music.

Airing on Sunday evenings from 10:00 p.m. until 12:00 a.m., "Music of the World" is the first international music radio program at Juniata. The two-hour show, hosted by seniors Javaid Zeerak and Muhammad Jami, aims to reach out to the student body and the Huntingdon community to share diversity and international experiences.

DJ Zeerek said, "My firm belief is that art, music and literature from around the world are an intimate perspective into the cultures of the world. It is a unique way of reaching the world."

Each week, the show focuses on a different culture or region. In addition to playing music of the week's designated region, the DJs also provide supporting information to enhance the listeners' experience and knowledge of the particular featured culture. They discuss the language of a piece and what the lyrics are saying. The background information enables listeners with and without international backgrounds to understand other cultures.

The DJs hope that their program reaches beyond Juniata's community and into Huntingdon. Zeerak would like the show to air in the prison. According to Zeerak, inmates of many varying ethnicities could use the show to experience entertainment of their own cultures or simply to provide exposure to other cultural experiences. This is one service Zeerak and Jami feel Juniata can provide to a part of the communitythat is often forgotten or neglected.

According to Zeerak, the idea for the radio show came after he and Jami listened to National Public Radio's "All Songs Considered." This show emphasized the importance of world music, and they saw a need for Juniata College to experience the music of cultures from around the world as well.

The music selection was at first limited to Zeerak's own music collection, which included mainly Iraqi, Pakistani and Arabic music. However, other sources, such as international students, the International Office and various professors, are now supplying music for the program to use.

Students and professors who have their own international music are welcome to loan their music to the program. If interested in loaning music, they should contact Zeerak or Jami.

"Music of the World" will also appear in the announcements and use other publicity tools in order to increase the number of listeners.

Sarah Anne Wharton / Juniatian

WKVR's radio program "Music of the World" airs songs from many different countries in many different languages every Sunday from 10 p.m. to midnight. (From left to right) DJs Muhammad Jami, Javaid Zeerak and John Narayan Parajuli give listeners insights into other cultures, with each show focusing on a different region or theme.

SPEAK again promoting free speech on campus

Catherine DeCoursey

SPEAK, the communication club, is once again hosting the Soapbox speeches for the entire Juniata community. This semester's topic, "How do we heal?" will be explored on October 25 at 3 p.m. in Detwiler Plaza outside of the Kennedy Sports and Recreation Center.

The topic was inspired by the recent effects of hurricane Katrina in New Orleans and the Tsunami that devastated South East Asia, but is not limited to those two specific events alone.

Other topics included are AIDS, war, corruption and fear. The Soapbox speeches were created so that the community would have a place to express their feelings to others while giving the community a diversified view of different topics. All can be addressed at the local, national and international levels.

Of the past year's event, sophomore Amanda Albanese said, "It was great to see all different age groups get up on the soapbox and speak. Everyone had something else to say, whether it was something they wrote, a poem they found, or a story they had to tell. At first it was just something that my professor told the class we had to be at, but I'm glad that I went, because now it will be something that I will choose to go to."

Soapbox speeches were started in fall of 1992. The idea behind the speeches was simple, give the Juniata community a place to voice their opinions openly without censorship and an audience to hear their point of view.

The election of 1992 between the Governor of Arkansas, Bill Clinton and President George H. W. Bush sparked the idea for the Soapbox speeches and, in years with presidential elections, students have been able to voice their opinions about candidates and their respective platforms. In non-election years, topics have included everything from "isms" to war.

The event is open to students, faculty and staff and does not limit presenters to speeches. In addition to sharing poetry and their own writing, presenters have used songs, music and other original works to present their points and are encouraged to use alternative methods to make their messages more individualized.

The event itself has minimal restrictions. Event rules state that everyone who wishes to present should have a chance to do so, that no person may present a second time unless everyone else has finished and that all presentations be made in five minutes. SPEAK concludes the event with closing remarks after everyone has shared.

Movie review

In Her Shoes: redefining "chick flick"

Holly Brown

So, why aren't you at the movies? I mean, right now? If you haven't noticed, some of the best movies of the year are coming out this fall and they demand to be seen. The competition for the Oscars this year will be rough.

Some movies to check out are definitely "Domino," George Clooney's McCarthy pic entitled "Good Night and Good Luck," Steve Martin's "Shopgirl" and the Oscar contender "North Country" starring Charlize Theron.

Personally, my little heart is hoping and praying that "Capote" (starring two under-appreciated actors, Philip Seymour Hoffman and Catherine Keener) and "Everything is Illuminated" come within a 60 mile radius of our little school.

Until then, "In Her Shoes" directed by Curtis Hanson ("8 Mile," "LA Confidential"), starts off the fall season of good movies. The film stars Cameron Diaz and Toni Colette as loving sisters who are as opposite as can be. Diaz is the irresponsible and childish party girl, while Colette is the world-bearing, serious lawyer sister who has trouble getting a date. The only thing the sisters share is the same shoe size.

This is a feel-good flick, but don't write it off as being brainless. It could be labeled as a "chick flick" and passed over. But what Hanson has created isn't a piece of fluff meant to be enjoyed idly on a dateless night. Instead, he's pieced together a character-driven, human movie that happens to be about women.

Hanson's gift is his ability to stand back and let the characters develop, discuss life and charm their way into the audience's hearts. If you've ever seen his 2000 flick "Wonder Boys," you know what I'm talking about. Amid the drama and the events that carry the film along are the conversations and small realizations that guide the characters away from a stereotype into actual people.

It's amazing to eavesdrop on a conversation, to sense that exact moment when Rose (Colette) and her colleague Simon (Mark Feuerstein) stop talking about their dinner and start discussing their relationship, and see the subtle ways their characters change.

Colette is fantastic. Even though Diaz gets top billing, all the posters, and runs around in her underwear a lot, the character of Rose (Colette) ends up subtly carrying the movie on her shoulders, just as she carries her sister Maggie (Diaz) throughout the plot.

In the second half of the film, a large fight drives Rose to kick Maggie out of her house. Maggie retreats to Florida, where she begins mooching off of her long-lost grandmother (Shirley MacLaine), who she recently discovered through birthday cards her father hid.

When the sisters separate, they

continued page 11

Cantus

Christopher Burlingame

"Oh, they're so very good!" "Awesome!" "If it wasn't so good, I would be at home!"

From the house of the Rosenberger Auditorium erupted comments of praise for Cantus, a male vocal ensemble, each barely able to capture the overwhelmingly positive performance on Oct. 15.

Twenty minutes prior to show time, the auditorium bustled with anticipation of the vocal performance and already tested the limits of Rosenberger's seating capacity.

Not only was the show completely sold out, but several patrons had to take advantage of impromptu seating added by a rushed event staff or sit on the steps of the balcony.

Students, faculty, administration, families and Huntingdon community members were interspersed throughout the auditorium, excitedly discussing the impending performance. By the time the lights dimmed, the audience was so worked up that the show had to be delayed until the family weekend audience could be calmed.

To a resounding thunder of applause, Cantus finally came on stage and immediately began their performance. Roaring applause was frequently heard throughout the evening as the audience displayed both their awe and appreciation of Cantus' art form after every song. The audience continued its support after the show with two standing ovations, one at the close of the scheduled performance and one after the encore.

"That was such a treasure!" a woman said to her husband as she stood in line to buy a CD.

Cantus signed CDs and mingled with attendees at the end of the show, sharing experiences and laughs. The group was open to any and all inquiries, while humbly accepting praise from nearly every audience member with whom they spoke.

A common praise was of the diverse arrangements chosen by Cantus. The pieces performed ranged from Medieval chants to Billy Joel's "Lullaby" and everything in between.

Cantus tenor Shahzore Shah explained that the variety of music is necessary in "elevating the sensibilities and scope of the audience."

"Music is so important because it is the communication tool of the soul," Shah said. The audience returned Shah's communication with laughter after his pantomimes of a kitten, which were a part of Cantus's performance of the Edvard Grieg piece.

Holly Brown / Juniatian

The audience was receptive to the group's humor as well as its inventiveness. Cantus returned from intermission with a colorful array of different length plastic tubing. The audience watched in both amazement and confusion as Cantus proceeded to hit the tubes off their legs in a complex musical percussion display.

Catnus tenor Aaron Humble said, "The greatest part of performing is taking different types of music to people."

Cantus performed all of its music a cappella. The group is in it's tenth year and was formed as a weekend release for Cantus tenor Albert Jordan while at St. Olaf College. Since then the group has evolved from three members to nine and is in its fifth year as a professional group.

Jordan explained that Cantus was musically influenced by standard pieces such as "Shenandoah" and "Ave Maria," both of which were performed at Juniata. The selection of music has changed with the musical growth of the group, which is "committed to developing vocally," Humble said.

"The audience is able to take their own interpretation from the standard pieces at our performances because there isn't a director in the way." Jordan said.

Off The Wire: *Looking for a JC podcast*

Nate Drenner

The tell-tale white earbuds of Apple's iPod are an increasingly common sight on campus. The music player has helped to introduce a developing medium for information and entertainment: podcasts.

Podcasts are, essentially, radio shows recorded as MP3 files that you can download to your computer from the Internet. They are continually updated, so a particular show might produce a new episode every week or even every day. The most popular podcasts are available for download through Apple's iTunes software – and they're free.

It's also yet another form of independence available thanks to the Internet. With a simple voice recorder, anyone could make their own show, and that's what the folks at the TLT hope that you will do. An iPod will soon be available to sign out, just as digital video cameras are now. This iPod has a voice recorder (called an iTalk), and the resulting audio file can be downloaded from the iPod onto a computer.

It's actually the same setup I use to record interviews I conduct for Juniatian articles.

Uses on campus could include recording class lectures for later review or recording live events for anyone who couldn't make it.

Podcasting started gaining popularity in late 2004. By now, several other colleges have some form of podcast available for download. Nearby Allegheny College is doing it (www.allegheny.edu). Theirs are mostly boring marketing shows. I bet we could do better.

WKVR, I hope you're reading. If you started podcasting your shows, I might actually listen.

What makes podcasts so great? Why would I want news and content that may be a day or two old by the time I get to it? For me, it's mostly about convenience. Rather than devote a specific time each week to a show, I can turn on my iPod while doing mundane tasks like laundry or answering e-mails. Or I can listen to podcasts in my car if I'm driving somewhere for the weekend.

Podcasts tend to be 30 to 90 minutes long, so some may be more inclined toward shorter shows.

But beyond our own campus, there are literally thousands of podcasts. NPR listeners: miss your favorite programming? Many NPR shows are now available as podcasts from the iTunes Music Store or from www.npr.org/podcast.

Despite the name, you do not need an iPod to listen to podcasts. Any MP3 player or audio software will do.

Like many other tech geeks, I regularly listen to podcasts produced by former TechTV personalities like Leo Laporte and Kevin Rose: "This Week in Tech" (TWiT) and "Diggnation." (Check them out: www.revision3.com).

It only took TWiT until its 21st episode until they offered video as well as audio shows. "Systm," another tech show available at www.revision3.com, is purely video based. Episode four, in fact, offered a tutorial on how to create a podcast, which you can check out for a more in-depth look at producing a podcast.

And – watch out – it's happening to television too. On October 12, Apple revealed a video-capable iPod and pay-as-you-go video downloads. Popular ABC TV shows like "Lost" and "Desperate Housewives" are among those downloads.

Fashion Column

BOOTYLICIOUS

Lucia

I have taken into consideration that what is read here may not be accepted by all. I have also taken into consideration that I am trying to help our fashion future. So spare me a few minutes out of your busy lives and listen up here, women.

Panty lines! What are we thinking? Lines are just a NO. A big one.

We were born with one nose, one mouth, one head (ok, I know two sets of eyes and ears but that's not the point. And we were born with one rear-end (this is the point). We do not need tight panty lines dividing what God meant for us to have as just one.

Let me explain to you some simple rules. When wearing anything tight (lycra spandex pants, sheer dress pants, or even your latest bun-hugging jeans), do not—at any cost—wear regular underwear. I repeat: Your mother's granny panties should not be worn with these items. We have one bootylicious booty; we do not need to divide it into four parts.

Here are some helpful hints that have allowed me to achieve a smooth rear when wearing dress pants or some tight-fitting jeans.

When rocking a short but loose skirt, you might feel more comfortable wearing those granny panties your aunt bought on your birthday, so go ahead. But, if the skirt covers your bun like a suction cup, please refrain from the panties and put on a thong. I know these can be quite annoying (an ultimate wedge for an entire day). However, I find a wedge is much better than cutting off your butt's circulation. Trust me.

Since different situations call for different styles, you should consider what types of underwear are right for you.

The two most popular types are the thong (this has the next to least coverage, a 1-1½ coverage on the back side) or the G-string. This string provides the wearer with a small piece of fabric to cover the front and just a string for the back. Ladies, the glory of this little wonder is that there will be absolutely no lines! Perfect. But if you are like me, you most likely prefer comfort.

Turn to the boy short, a comfortable alternative to the thong. This type of panty covers most of your rear end and seams are never an issue since it covers both cheeks very nicely and fully.

Victoria Secret's "Body by Victoria" collection is great. It feels wonderful and the lines are no more. The seamless panties feel so good that you can have comfort and no lines all in one. Let me add they come in many different styles, too—low-rise, string bikini, hip-hugger and many more. (in this plug for Victoria's Secret so let me just add that they are also 3/$30). They also have thongs too, if you think your pants or a skirt really needs one.

I mean, I'm not asking too much, am I? I just want you ladies to be all that you can be with the two sweet cheeks you were born with. So let's flaunt our bootylicious bootys while keeping our jelly to only two. Now, I can't help singing, "I don't think you're ready for this jelly."

Ghost stories

continued from page 8

was thought to be used for witchcraft, devil worship, and animal sacrifices.

No one knew who was doing this or how they were gaining entry into the padlocked room, but every morning there was evidence showing that someone had been in there the previous night. One suspect was a religion professor at the time who was believed to be the leader of the cult. To this day, no one is quite sure who belonged to this cult. There were neither sightings nor damage to the lock, yet plenty of evidence was left behind.

Founders

From 1982-1989, Larry Bock, current athletic director, was in charge of financial aid. Being the only one in this field, he was forced into many all-nighters in Founders Hall to meet billing deadlines. Bock claimed to hear footsteps and other noises that would, normally, lead him to
believe someone was in the building. However, he was always alone.

Dean Kris Clarkson shared the same experience. "There is a very distinct sound of somebody walking," he said. "It is more than just old building sounds."

Jacob Zuck, one of the first Juniata students to reside in Founders, died of pneumonia while living in the basement. Unfortunately, the only restrooms in the building are located in that same spot.

"Something is especially eerie about the basement. It's hard to explain," said Clarkson. "I am not a terribly superstitious person, but there is something down there."

North Lawn

On foggy nights, students claim to see a woman walking around on the North lawn. Some have no explanation while others suppose it to be the late Gertrude Butler. In the mid-1900's, Ms. Butler was a home economics professor. She would sneak around campus making sure the female students were in their rooms by the time the bell tower struck ten. Known to the campus community as "the gray ghost," she would allegedly appear out of thin air and slip around the grounds without anyone seeing her.

Is she the ghost that wanders campus on foggy nights? Are any of these ghost stories valid explanations for the unusual occurrences on campus?

Some say seeing is believing, but for me, I have heard enough to conclude that I will no longer be walking alone at night.

Will you?

First novel

continued from page 8

Burlingame was responsible for formatting the entire book, as well as the book's cover, and then sending the finished file to the publishing company.

Like many writers, Burlingame does not consider his book perfect. He said, "Finishing the book was both extremely liberating and frustrating. I was so happy to just have finished such a great undertaking, but at the same time, I really wanted to make it better. The book doesn't really display my full potential and growth as a writer, and if I get the opportunity to publish this novel on a professional level, I have a list of changes locked away that will make it more sound."

Currently, six of Burlingame's short stories are being circulated through magazines, and he is hoping to have several more published in the future.

Movie review

continued from page 9

both begin a process of growing up and branching out that is amazing to watch. Maggie begins to care for the people in the retirement home around her, learns to read and begins to discover what she's good at. Rose leaves her job, starts living healthier and meets someone perfect for her. And Ella (MacLaine) gets to make up for all the years apart from her granddaughters.

Yes, it's typical and uplifting and wholesome, but Hanson and the actors let us see the real work and hardship behind self-improvement. In the end, as they move toward a realm that could be described as happily ever after, they've all earned it.

"In Her Shoes" provides a realistic and warming tale centered on character development that you usually have to go to an indie film to see.

This movie is definitely worth seeing, even for the most hardened romantic out there.

Off the Wire

continued from page 10

(Why only ABC shows right now? Connect the dots: Steve Jobs is the CEO of Apple and a co-founder of Pixar, the computer animation studio behind "Finding Nemo" and "The Incredibles." Pixar has a relationship with Disney to distribute movies. Disney owns ABC. It's a conspiracy, I swear.)

Back in the world of plain audio, FOX offers a podcast of each new episode of "Family Guy" after the show airs each week.

The term podcasting is a reflection of the market. Even though Apple only has about five percent market share of personal computers, the company sold 75% of all the MP3 players so far this year.

The advantage to iTunes or iPodderX (www.ipodderx.com) is that they will automatically check for updates of your favorite shows and download them for you. iTunes contains a directory of podcasts, so you don't need to search for individual shows on the web yourself.

It's just another example of a technology that is continuing to develop.

Women's volleyball keeps rolling

Wid Guisler Invitational approaches

Jeff Byer

The Juniata women's volleyball team has continued its winning ways of late and improved its record to 23-1. With a 3-1 win at home against Moravian, the Eagles improved to 5-0 in the Commonwealth Conference with two conference games remaining.

The Eagles are currently in the midst of an 18 match winning streak. Although the playoffs are right around the corner, the Juniata players are determined to not look too far ahead.

"We have been thinking about playoffs, but our focus is still on the regular season," junior middle hitter Stephanie Kines said. "I know that we will be ready when November comes around."

The Eagles beat Moravian by scores of 30-19, 30-14, 12-30, and 30-16. This was the first time this year that the Eagles lost a game at home. The Eagles led early in game one and seemed to be ready to pull away. Moravian then scored six straight points to make the score 18-14 and forced the Eagles to use a timeout. After the break, the Eagles came back out firing on all cylinders and went on a 12-5 run to take the game.

Game two was competitive early as Moravian kept it close at 14-10. The Eagles then went on a 16-4 run to win game two, 30-14. Solid serving from Kines and freshman Amber Thomas helped the Eagles pull away from Moravian and secure the game two victory.

Game three was a total opposite from the other two games of this match. Down 8-7, this is as close as the Eagles would get. Moravian claimed 16 of the final 21 points to secure the win.

The Eagles then turned it around to take game four and the match by a score of 30-16. Three aces from senior Abby Leonard and one from Kines helped the Eagles get back on track after the game three setback. The Eagles went ahead early and did not look back as they were determined to not let Moravian back into the game.

Senior Katie Laucks led the Eagles with 13 kills and six blocks. Also in double-figures, junior Rachael Schatz contributed 12 kills. Kines and Leonard each finished with three aces, while freshman Jessica Ritchey dished out 36 assists to Juniata hitters.

"We are so close to being completely ready," Laucks said after the Moravian match. "There are small things that we are working out everyday, [but] we are a good team right now and we are so close to being a great team."

The Eagles then traveled to Western Maryland College to compete in the 24th-Annual Green Terror Invitational on Oct. 14-15. The Eagles took home the championship as they defeated Seton Hill in the final match. The Eagles beat Seton Hill by scores of 30-15, 30-20, and 30-22 and claimed their second tournament title of the season.

Laucks was named to the All-Tournament Team for her contributions throughout the weekend.

The Eagles will be in action at home on October 21 and 22, as they play host to the Wid Guisler Invitational. NYU, Franklin & Marshall, Carnegie Mellon, and Eastern will also participate in the weekend event.

"We are real excited to play NYU because they are a good team and we love the challenge," Laucks said. "They also have one of the

continued page 14

Playoff push

Field hockey team coming together as regular season winds down

Katie Laucks

The women's field hockey team was enjoying its seven-game winning streak up until it met Lebanon Valley last Thursday.

Lebanon Valley scored two early goals in the second half, but Juniata fought back with a goal from sophomore Kim Wagner to tie the game.

Wagner's goal ended the scoring during regulation, sending the game into sudden death overtime. Juniata unfortunately couldn't get the ball past the Flying Dutchmen's defenders in time as Juniata's winning streak came to and end with a final score of 3-2.

"We played a great game today, and no one can take that away from us," Zimmerman said. "I'm very proud."

Wagner and senior Sarah Bender both scored for Juniata.

Juniata is now 8-6 overall and 3-2 in the conference.

In an earlier game on October 11, the Eagles took their sticks to Frostburg State University. This game went into overtime as well. But, the women battled to secure a win. Kim Wagner again came up big with a goal in the 11th minute of overtime.

Although the women had a rough start to the season, everything is beginning to move along. "We are beginning to come together, one big team," freshman Lizzie French said.

Juniata came out together against Albright on October 9 and proved that players are putting the hard work from practice to use. The team defeated Albright, 1-0, matching last year's longest winning streak of six games.

Wagner scored the only goal for the team early in the first half. Senior Andrea Way made five saves to keep Albright scoreless.

On October 5, Juniata defeated Susquehanna University, 4-2. Both teams were scoreless until Juniata's Michelle Campbell scored five minutes into the second half. The next goal came from Wagner as Zimmerman fed her the ball from across the circle. Zimmerman then scored just two minutes later and Campbell would go on to score again in the second half, securing the win for the Eagles.

The team still has high hopes for the postseason. "We want to go to MACs and NCAAs," French said.

The team is on the right track to head back to conference playoffs. Juniata's conference record places the team in the playoff hunt.

The next few games will be tough, but the team is ready. "I'm very excited about the next few games, they will be intense," said French.

"The teams are so evenly matched in the conference, if we win the next few games we will be in a good position for MACs and NCAAs," Zimmerman said.

Juniata will look to improve its playoff chances in its game this afternoon when Messiah College travels to Huntingdon for a 4:00 match.

Holly B. Brown / Juniatian

Juniata's senior back/midfielder, Elise Zimmerman (7) makes her way to the center of the action in a recent home contest. Zimmerman ranks third on the Eagles' squad in total points with 10 on the year.

Tennis freshmen soar

Duo captures all-conference honors

Kim Wagner

The Eagles tennis team has had the most wins this season since 1999. With an overall record of 7-4, Juniata finished the season with 2-4 record in conference matches and 5-0 record in non-conference matches.

This was a shocking season after having a record of 1-9 in 2004.

Head coach Bobby Pennington said, "My goal is to put tennis on the map for this school." He seems to be moving closer to that aim as the Eagles had two players, freshmen Ashley Andrews and Caroline Weisser, named to the all-conference team.

Andrews, who has been in the number one spot for Juniata, received first team honors and was named MAC Conference Rookie of the Year.

Andrews said, "I feel honored. I worked hard all season and it's something I really wanted, along with first team All-Conference."

Right by Andrews' side is freshman Caroline Weisser who, in the number two spot, received second team honors.

Both women ended the season with records of 8-3. As doubles partners, this talented pair went 9-2, posting the most wins by a Juniata doubles team since 1999.

According to Andrews, she and Weisser have one of the best records and have a good chance of finishing high at MACs.

Andrews said, "That [record] is due to our ability to make each other play better on the court."

Since the team did not make the MAC playoffs, the top six players from the team will compete in singles and double matches at the Individual Championships at Lehigh on October 22. The competition consists of the same seeds playing each other.

Juniata's top six include: Andrews, Weisser, freshmen Aggie Kwon and Sarah Roby and juniors Molly Coursey and Megan Carpenter.

Women's soccer prepping for No. 1 team in the nation

Heather Lockwood

With the stands packed and excited fans along the side lines, the Eagles took on Lebanon Valley for their 'Senior Day' game on Saturday, October 15.

The women's soccer team stood side-by-side in a tight circle, hands joined together at the center. Suddenly, captain Lauren Welsh said, "On three - team." Welsh then said, "One, two, three" and together the Eagles answer, "Team!" The whistle sounds and the Eagles sprinted onto the field together.

"This game was different because it was Senior Day, but the team approached it like any other game," sophomore Stephanie Mury said.

The seniors of the team - Lindsay Garvey, Nikki McClellan, Maria Welch and Lauren Welsh - were recognized before the game for their four-year contribution to the women's soccer team.

During the first half, both Juniata and LVC struggled to score. The second half led to disappointment as Lebanon Valley broke the tie with a penalty kick and then two more late goals for the final score of 3-0.

"We can always improve our speed," Coach McKenzie said. "When we face opponents that give us time, we look good. We have been training to play quicker, meaning as few touches on the ball as possible."

The team has taken a different approach this season compared to previous years.

"We have a new system this year," Mury said. "The big thing is touch control of the ball. We struggle when the ball is taken away from us. We have definitely im-

continued page 14

Home not so sweet home for Eagles

Robb Patty

It was homecoming weekend on the campus of Juniata College and excitement was in the air, but it was not enough to carry the Eagles to a victory. Juniata fell to King's College, 25-20.

Freshman quarterback Jay Leonard had his best outing of the season as he completed 22-44 for 217 yards and two touchdowns.

Head coach Darell Alt made a concerted effort to run more play action and roll his young quarterback out of the pocket this week. The Eagles also added a new sprint package for this game trying to get Leonard more comfortable under center.

With the loss Juniata falls to 0-7 on the season and 0-6 in the Middle Atlantic Conference. Kings improves its record to 3-3 overall and 3-2 in conference play.

Coming into the game, the plan for the defense was to be able to stop the run and contain running back John Ortiz. Kings, however, was able to use a balanced offensive attack, combining for 454 total yards of offense with 235 of those yards coming on the ground. Ortiz was not contained by the Juniata defense and had a big day, doing most of the damage on the ground as he ran for 158 yards.

In the third quarter, the Eagles came out strong. They took the opening kickoff and marched 51-yards in five plays to take a 14-13 lead when Leonard found sophomore David Nicklaus in the corner of the endzone.

The Monarchs would answer as on their next two possessions, scoring a touchdown and field goal to regain a comfortable lead.

Juniata had opportunities against the Monarchs to earn its first win of the season, but Kings' defense came up with big plays late in the game to hold on for the 25-20 win.

The week before, Juniata traveled to take on conference opponent Susquehanna. The Eagles set the tone early, but the home team would have none of it as the Crusaders came back to score 35 unanswered points and defeat Juniata, 35-7.

Susquehanna used a dominating run game that accumulated 361 yards on the ground to hand Juniata another conference loss.

Juniata's junior running back, Duane Ehredt Jr., opened up the scoring as he rumbled 31-yards just 2:53 into the game to put the Eagles in front early, 7-0. Ehredt finished the game with another 100-yard performance as he racked up 152 yards on 37 carries. That, however, was most of the offensive production for the Eagles as the rest of the offense managed a mere 88 yards.

This is starting to become a trend for the Eagles as they are starting fast, but wearing down as the game progresses.

"We need to keep our enthusiasm high and not try and always play off emotion," Alt said. "If a team hits a big play, we have to be able to respond on offense."

With just four games left in the regular season and no shot at making the postseason, Alt is still looking for and demanding improvement and dedication from his players.

"I always want to see improvement," he said. "I demand that they go to class, go to the weight room and show up and work hard. I just want us to continue doing things the right way."

Juniata will be back in action this Saturday, traveling to Widener for another MAC game.

Juniata quarterback Jay Leonard (2) used his pass protection (Dustin Sier) to complete 22 attempts for 217 yards against Kings.

Men's soccer season coming to close

Out of playoff contention, but still looking to play well

Robb Patty

Juniata had some great scoring opportunities but had trouble finding the back of the net in its 0-0 double overtime tie Saturday at home against Lebanon Valley.

With the tie Juniata moved to 4-10-1 overall and 0-3-1 in the conference. Lebanon Valley now sits at 5-6-1 overall and 0-2-1 in conference play.

It was a great game for senior goalkeeper Nathan Pugh as he pitched a shutout in just his second start of the season. Lebanon Valley could manage just four shots all game, only one of which was on goal. This was due in large part to a great defensive showing by the Eagles.

The best scoring chance for Lebanon Valley came in the second overtime period. Pugh made an excellent sprawling save to preserve the shutout and keep the Eagles from losing another conference match-up.

Juniata controlled the pace of the contest throughout, but was unable to capitalize. Freshmen Fred McNeal and Steve Crow registered the only shots for Eagles for the entire game.

"Our offense is there. We're getting some pretty good looks. We're just getting real unlucky," said sophomore John VanBlarcom. "We're playing well, playing some good teams. We just need to find a way to score."

It was also Senior Day for the four seniors as Pugh, Robert Bowser, Kyle Dunn and Jeff Gehring were all recognized for their efforts and contributions to Juniata soccer.

Prior to the Senior Day game, Juniata out shot host Albright, 20-6, in Reading, but were unable to beat Albright keeper Joe Hartmann. Hartmann had 14 saves for the home team, while junior goalie Tim Penrod recorded a pair of stops for Juniata.

The Lions would get their first goal just eight minutes before halftime as Matt Yoder registered a goal off an assist from Dan Martin. The Lions scored again in the second half to put the game out of reach.

As the season winds down for the men's soccer team, players are looking to finish the season off with a few conference wins that will benefit the team going into next season.

"I think that if we can start finishing on the opportunities we have we are going to start winning some games," said junior Mark Guthridge. "We still have some games left to go this season and were getting better and better each game."

Holly B. Brown / Juniatian

Freshman forward, Fred McNeal, leads the offensive attack here, and for the season. He has a team-high 21 points on the year.

Women's soccer prepping for No. 1 team

continued from page 13

proved working under the system; it requires us to move as a unit."

Working as a unit has been accomplished with strong support of the seniors.

"They have a lot of years under their belts. They know what to say and when to say it. They never have any negative energy," Mury said.

Most teams need to set teamwork as a goal, but not the Eagles. They are always there for each other on and off the field. They see each other as a family.

"This team is an extension of 20 children to my family. Not only do I admire them, but I respect them. My favorite time of year is when we are together," McKenzie said.

Recently, this family took on Albright College on October 9 and Southern Vermont on October 11. While most of the school was away on fall break, the team was on the road playing two away games in three days.

The women suffered a 3-1 loss against Albright College. Scoring Juniata's only goal of the game was Lauren Welsh with a penalty kick in the second half. Leading the Juniata defense was goalkeeper Kerri Lawrence with three saves.

Although the Eagles experienced a loss against Albright, the team was able to come back and defeat Southern Vermont, 10-0. Within nine minutes, the team had scored four goals. McKenzie added some flare to the women's line-up by placing some of them in positions they do not normally play.

"It was good to get the girls out of their comfort zones," said McKenzie.

What was even more unique about this game was that before coming to Juniata McKenzie had coached Southern Vermont from 1992-2000. "It was really weird to go back there since I haven't been involved since 2000," he said.

Not only did the women go to New England to play, but they also visited the Soccer Hall of Fame in Oneonta, New York, as well as run a two-hour clinic for about 60 children in Troy, New York. "The team really enjoyed spending time with the kids. It was a great experience for them," McKenzie said.

Night games are new for the team, and they will be playing under the lights against the number-one Division III team in the nation, Messiah on October 26.

"Lights are not a friendly place," McKenzie said. "Messiah is the best women's soccer team in the nation. Playing a night game adds a new dynamic for the team. We will be having a night practice before the game but it will be like any other practice."

Despite not being able to make the playoffs, it will not change how Juniata plays in its final games of the season.

"The team will play for pride, each other and the College," head coach Scott McKenzie said.

Women's Volleyball

King for a day

I'm officially in charge of sports...look out.

Tommy McConnell

Hey, I don't know if you heard, but I was recently named King and Dictator of the Sports World. I narrowly edged out David Stern (the Sports World wasn't too keen on having a dress code) and the Sklar Brothers (couldn't tell 'em apart). Bud Selig finished last because he's an idiot.

It's quite an honor, and I intend to take the responsibility seriously. The following changes will take place immediately:

If a game is being shown in prime time, then Al Michaels and Gus Johnson are making the call. Does it get any better than those two?

Along those same lines, Paul McGuire will never be allowed near a broadcast booth for the rest of his life under any circumstances. If the only two people available to call a game are him and my mom, Mom's getting the nod every time.

The BCS is toast. Take the coach's poll and the AP poll, average the rankings and the top eight teams have a three-week playoff. How hard is that? You can even keep the Big Four Bowls in place. Also, no bowls named after lawn care or feminine hygiene products will be played under my watch.

College hoops isn't exempt, either. First, that "play-in" game to get into the Field of 64? Gone. And the regular season champ from each conference gets the automatic bid to The Dance, not the conference tourney champ. Some mid-major can go 15-1 in the conference, get upset in the first round, and now the Mid-Continent is sending 12-18 Oakland to the Dance. Please.

And while we're at it, the first two rounds of The Dance are declared a national holiday. Are there a better four days in sports? (Shake your head no.)

If someone is going to make a sports movie, the actors *have to be able to play that sport*. No more Nuke LaLoosh's. I can't stress this enough.

The National League and the American League are going to get together, put on a pot of coffee and decide whether to have a designated hitter or not. Honestly, I don't even care what they decide, just pick one. Can you imagine the NBA playing half its games without a three-point line? Or the NFL only using punters in the NFC? Pick one and let's move on.

The Angels franchise gets a complete overhaul. First, pick a name - enough of this Anahiem of L.A. of California garbage. Second, lose the Rally Monkey and the Thunderstix. Third, make all your fans flap their arms up and down like the kids in "Angels in the Outfield."

The Chargers must wear the old-school powder blue uniforms for every game. Same goes with the Brewers old uni's (Honestly, the Brewers have arguably the greatest logo of all-time and they aren't using it. This doesn't bother anyone else?)

The 12 best players in the NBA are on the Olympic basketball team. Screw this bronze medal crap. LeBron, Wade, Shaq, Kobe, Garnett, Duncan, T-Mac, Amare, Iverson,

THE RANDOM ELEVEN

Matt Russell

Last issue's title: "Never Done Hamlet" is an anagram for "The Random Eleven." Not one person I talked to got that one. Not even Mr. Headle.

Mr Headle: If you're sitting there going, "Who's Mr. Headle?" you clearly have failed and need to stop reading my column before you hurt yourself thinking too hard.

Bugs of Juniata: South Hall is guarded by the spiders. Sunderland's protectors are those crazy jumping bugs, and Brumbaugh is the stronghold of the centipedes. It's like every building has a patron insect.

Talk about rhetorical: A current Intel Centrino commercial features Lucy Liu sitting on a woman's lap in a library. The slogan was "Want to have incredible experiences in your lap?" I can think of a few.

If it weren't for checks and balances: As you may know, doing the layout is actually my primary job on the newspaper staff. If you look on page 4, there are pictures of two students dressed up for the Homecoming Parade, one as a "ho" and the other as a nun. I really wanted to title that bit "Homecoming Parade displays diversity" but I was told other people might not appreciate it or something crazy like that. Heh.

Fireworks should now be mandatory for Homecoming. Out of the four times I've experienced Homecoming, this was the first one that really felt like an event that I would've been sorry to miss.

Hairpop: Ever watched someone with long hair try to eat a lollipop in the wind? Oh it's a trip.

Fluck Plaza: Hahahaha

Military spam: Eric Albright recently sent many of us tidings of joy via the Juniata mail system. It was a recruiter's advertisement, which closed with a notice saying that we could only be "scrubbed" (someone's had one too many KP assignments) from his list by visiting a military website. My reply? "No, I'm not going to a military site to 'scrub' my name. If you send me more unsolicited bull[excrement], I'll reprise in kind. Have a nice day."

THE MISSION: This issue we're running an editorial about turning the Ballroom into a student union. I think it's time to take action. Between now and the next issue, I will be working to press this issue. If you're interested, e-mail me (russeml2) or check out my thread on the forums. I'll report back.

In the next issue of the Juniatian:

Juniata's sports facilities: are they adequate?

Disaster response: do we have a plan?

A Juniata-produced documentary: Hell Houses

Trivial Revolutions

Open dialogue will let us grow

Genna R. Welsh

Madness and mayhem have it for the semester—or do they? While the voices on campus begin to shout out at what they hear and read, they are just beginning to clear their throats.

Juniatian sports editor Tommy McConnell's column has Juniatians up in arms. Unlike the usual, expected reaction of, "You sexiest jerk," Juniata is showing its true style in the Arch's forums, where students are posting messages attempting to evaluate the validity and amount of support of Tommy's theory.

What can we say? As Juniatians, we're dorks, whether we try to hide it or not.

And speaking of what's hidden, now-controversial fashion columnist "Lucia" has taken an immense beating for the fashion thrashing she's giving out. In her last column, she told our supposedly fashion-malnourished students that they have muffin tops for backends and wear grossly inappropriate clothing for their respective body types.

Students quickly responded asking, "Who the heck are you to say so?"

The problem is, since Lucia is a penname, we *don't know* who she is. My roommate wonders what she's hiding, arguing that Lucia should be confident enough in her opinion to slap her name to it. Lucia likely thinks disgusted readers should kiss (and cover up with more than a mini) what her *boy toy* would love to slap. Boy toy, by the way, is out of date since 1982, according to one of several students posting on the forums saying that the fashion column is outdated.

All of these people have a great point. This campus is finally heating up for the semester, but it's not hot enough yet.

Once upon a time in a land far away and long ago I attended a large, conservative university. In this dark, dank castle, any professor's chief concern was wearing the correct tie with his two-hundred dollar suits, so he could drive his BMWs after class to the photo shoot for his third book on "Yet Another Senseless Fact That Requires a New Edition of Text. Edition 9." A professor's secondary concern was to discourage open dialogue.

Then I came to Juniata, which was much like an Alice in Wonderland experience for me.

I was amazed not only at the quality of education, but at the self-respect Juniata students had, which enabled them to stand up and voice their own opinions.

In this, our college—that's just what it is—*ours*. What we say, as Juniatians, does matter. So I was overjoyed to see all the crazy dialogue, to see how affected people are about the anonymity of a columnist ordering the students to listen to her fashion advice—just as I was excited to see students refusing to follow it.

But, I'm not the only one who loves these *fetch* conversations—(*fetch*, yet another of Lucia's quips, which one forum-poster cites as the reason she will no longer read the column). I am the only one as of yet to make a plea to encourage this dialogue further.

Here it is Juniata: Our college has roped off grass, Sodexho is baking cookies with a silver spoon and Juniata is rumored to be recruiting rich kids. Does this mean the Olsen twins will transfer here?

If they do, they will have to learn to speak up…just like the rest of us.

King for a day

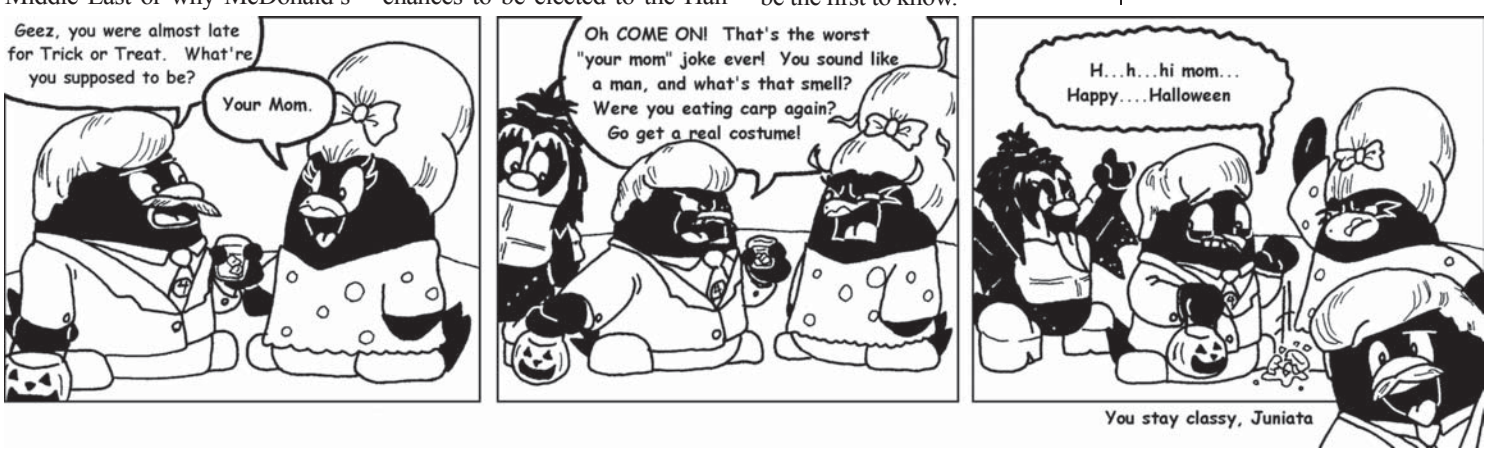
continued from page 15

Kidd, Jermiane O'Neal and…either Rip or Ray Allen. I mean, c'mon! You don't need to know how to play the "international game" when that's your squad. Let's get back to the good ol' days of beating Angola 173-4.

Speaking of the Olympics, we are bringing back that old SNL skit and having an All-Drug Olympics. I'm sick of the "who's doped up?" guessing game; let's just get it out in the open. Now when Magnus van Magnum is about to dead-lift a small house, CBS can run a little graphic underneath him reading, "Age: 29. Weight: 325. Drugs: Steroids, HGH, horse tranquilizers."

Chad Johnson gets his own talk show. No guests though, just whatever Chad wants to talk about for a half hour every Monday through Friday, whether its his policy in the Middle East or why McDonald's is fine dining. And all touchdown celebrations have to be run by him first. And group TD celebrations are not only being brought back, they are being heartily encouraged.

If baseball managers have to wear the full uniforms, so do all the other coaches. Phil Jackson wears a jersey, Bill Cowher has to wear shoulder pads, and whoever is coaching a hockey team has to wear skates.



Players in every sport get two chances to be elected to the Hall of Fame. I can see the difference between a first-ballot Hall of Famer (the truly elite) and a second-ballot guy, but that's it. How can someone get elected on, like, their 32nd chance? What changed?

Other changes: No more jumping out of bounds and calling a time out. No more ties in the NFL – OT gets settled how the college kids do it. Baseball gets instant replay.

I think that's it for now. If I lay down any more decrees, you will be the first to know.

The Rookery

by Brock Eastman

JUNIATIAN

HUNTINGDON, PENNSYLVANIA

NOVEMBER 3, 2005 | JUNIATA COLLEGE | VOLUME 87, ISSUE 4

TUITION INCREASED, AID DILUTED

Sarah Anne Wharton

Another year, another dollar.

But when next fall semester rolls around, Juniata students will be rolling up their sleeves and reaching into their pockets to cough up an extra few thousand dollars for another year. During the recent Board of Trustees meeting on October 15, members voted to raise the total cost of education (tuition, room and board) to more than $35,000, an increase of 6.3% from last year.

At the same time, Juniata officials hope to attract prospective students who will not require as much need-based scholarship help from the school as current students. The discount rate, or the percentage of money that JC gives back to the students in aid, is currently a high 48.9%, more than most schools its size.

President Tom Kepple said that the extra money will be put towards all areas of campus life.

"The issues for us are higher energy and health care costs, as well as keeping up with salaries and renovations," he said. Renovations could include anything from refurbishing Good and Ellis Halls, building a new $375,000 track, or keeping up with technology.

Unfortunately for students, important issues that were not mentioned on the A-list of Juniata's future money-grabbing projects were scholarships and endowments. The increases in tuition are coming at a time when JC's academic aid is changing, so the two factors together deal the double blow of higher costs and fewer scholarship opportunities to incoming students.

John Hille, vice president for advancement and marketing, elaborated on the problem. He said that the issue is not that Juniata is cutting back on scholarships like is widely believed but that scholarship and grant funds are not increasing fast enough.

How safe is Juniata College?

Reported crime statistics lower here than at several similar schools

Jessica Ocampo

Every day students leave their dorm rooms with doors unlocked. Backpacks are left on chairs as they find a book in the library. People walk the campus late at night with little or no fear of danger. The overall feeling of the students is that this campus is a safe place. It is nice how everything is accessible and how trusting people are. But how safe is Juniata?

The Clery Act, a federal law, requires every college to make crime statistics available to the public. The crime statistics for Juniata can be found on the Police & Security Department's web page under "Clery Stats." The reports cover the years 2002 to 2004. Juniata also does Uniform Crime Reports (UCR). Rocco Panosetti, Jr. is the Director of Security and a police officer. He said, "I can assure you we provide more information than we are required to give out to the public." Everything that is reported gets recorded.

The one big caveat, however, is that not all violations are reported to Police & Security. Some are only dealt with in the Dean's Office, and others may go completely unreported. The violations handled outside of Police & Security will

continued page 5

When professors skip class

Sabbaticals leave their mark on students and departments

Emily Eller

Around ten percent of the faculty are on sabbatical at any given time according to Provost James Lakso. This, of course, also means that there is a one in ten chance that your advisor will be gone next year, and they probably won't even tell you.

Professors are allowed one paid sabbatical every seven years. They can take a semester or a year off although they can only receive one semester's worth of pay. Nine faculty members are currently on sabbatical.

Although your professors might be MIA for other reasons (faculty can take unpaid leave for up to a year for medical, academic or personal reasons) generally sabbaticals are used to develop courses and write books.

The absence of so many professors who are on sabbaticals can be hard on students and departments. Some departments bring in outside help to teach their classes and absorb their advisees, but others are not so lucky.

Lakso explained that the school often brings in outside help to fill in for absentee faculty. The decision to bring in an outsider depends on the availability of one year replacements and the ability of a

Juniata: Sustain Thyself

Holly B. Brown / Juniatian

Nick Carney

It is roughly three stories tall, the size of a football field in length and costs the College about $50,000 annually. No, it isn't Good Hall, but the amount of garbage that Juniata College sends to the landfill every year.

Around a dozen students and a few faculty members sorted one day's worth of this landfill waste on Oct. 26, as part of Juniata's first Campus Sustainability Day, to see how much actually belonged in the landfill. Many people walked by, turning their heads at the spectacle, while others grabbed a pair of gloves and joined in.

"I'm not really sure what to expect," said Rob Yelnosky, assistant to the president and a leader in Juniata's new Sustainability Leadership Core, before the sorting began. "I just hope that the weather is with us, and that we get enough help."

The sorting began at around 3 p.m, as the rain was pouring down, and continued until around five. Volunteers braved opening waste bags from virtually every building on campus, dorm bathrooms included. The group found that nearly half of the waste, which would have been sent to the landfill, was recyclable, reusable or compostable.

While a recycling program does exist at Juniata, it is completely voluntary. In various places across campus, students and faculty can elect to take their pre-sorted recyclables and have them later picked up by Facilities. Recyclables, however, are not sorted out of the general trash as is done at many colleges nationwide.

However, many recyclables never make their way back to store shelves from Juniata. Facilities has claimed that many recycling and trash bins are being vomited or

Inside: *Disaster response planning*

Emergency Operations Plan readies College for disaster

Brittany Crawford

In the midst of hurricane season and the threat of bird flu, concerned residents may want to know if Juniata has a plan for dealing with a large-scale disaster on or near campus. The answer is yes. Roy Nagle, who is part of the school's emergency operations team at Juniata, developed Juniata College's Emergency Operations Plan. It includes specific ways to handle crisis situations and disasters.

The plan is a large document that clearly describes the different emergencies and strategies. Nagle said, "The emergency team is broken down into different components. Each component would be contacted accordingly to the plan if a disaster occurred."

The plan also includes different levels of emergencies:

- Level one is a small emergency that the campus could effectively deal with.
- Levels two and three would require additional resources from outside the college.
- Level four would mean that the college is impaired, and is in need of immediate assistance.

Rocco Panosetti Jr., director of campus safety and security, and Nagle both agreed that the emergency operations team has a wide range of expertise. Nagle also commented that the team holds meetings to discuss new strategies, plans, and possible disasters.

However, the group has not met so far this year. Nagle said that they have felt no reason to meet at this point.

Panosetti feels that this emergency plan could effectively handle any situation. He said, "Juniata has the resources it needs, but we also have outside resources."

Nagle agreed, "The best mechanisms are the relationships established with local authorities." Juniata is currently in contact with the Huntingdon Police, Emergency Medical Services, JC Blair Hospital, and Huntingdon Area School District.

In case an evacuation was necessary from either Juniata or Huntingdon Area High School, students could be placed at either location. Panosetti also remarked that every municipality has its own plan.

Still, if a disaster was wide spread enough to affect both the campus and community, Nagle believes that it would be Juniata that would provide assistance to others. "It would depend on circumstances. We would work with local and state officials to decide where the best place to relocate people would be."

Nagle added that if such a disaster happened, that it was possible that Juniata would cancel classes and, if necessary, an entire semester.

"A big part of planning is being flexible. A lot of people would be involved to make that decision, but it is always possible."

Panosetti was quick to note that Juniata security were granted police authority. He believes that this will help if an emergency would occur. Panosetti said, "We can now provide better service. We have access to additional resources; we receive daily briefings about terrorism too."

Even with all these additional tools, Panosetti and Nagle agreed that the two most important things to do in the face of a disaster, is something that each individual must do. "'Do not panic' is the best advice, and you need to be prepared. Stop and think what you need to do."

continued page 6

Sustainability at Juniata

continued from page 1

urinated in – a problem that was encountered during the Campus Sustainability Day trash-sorting event.

Bags that are contaminated with vomit, urine or tobacco-chewers' spit must be discarded and sent to the landfill.

As summarized by the Sustainability Core's report on Juniata's recycling program, "Without culture change and commitment from the campus, additional infrastructure and dollars will not significantly improve the success of the program. We must educate and then gain commitment in dollars, time and behavior to make the program successful."

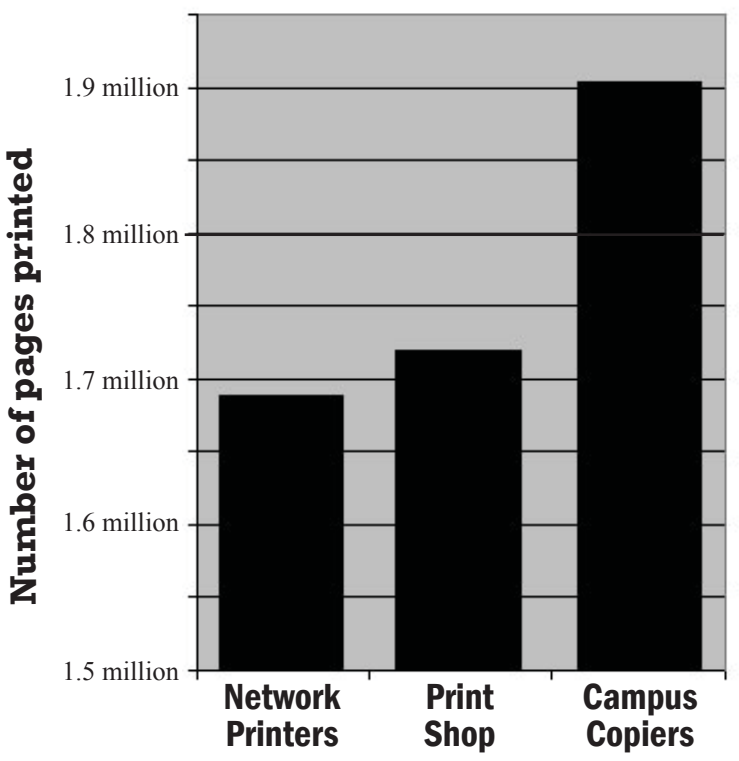
The Sustainability Core found in an earlier investigation that Juniata produces over 5.5 million printed pages internally each year. In addition to that, the College sends out nearly five million pages annually. This printing represents around one percent of the annual budget and costs the environment about 800 trees.

As a result of the College's use of ten million kilowatts of electricity last year, Juniata is also directly responsible for producing over eleven million pounds of carbon dioxide yearly.

At most colleges in the United States, residence halls use around two-thirds of all electricity and produce around 40 percent of all solid waste for their college. Juniata's residential students are no exception.

For Juniatians, this means using less energy, recycling more, and buying more intelligently.

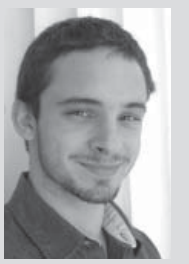
To encourage students to buy smart, Sustainability Day also featured a variety of informational booths and kiosks, including a demonstration that encouraged the change from incandescent light bulbs to compact florescent (CFL) ones. The demonstration pitted a 100-watt CFL against a traditional 60-watt light bulb and showed the differences in energy consumption. The traditional light bulb drew a consistent 502 milliamps compared to the CFL which drew only about 100 milliamps.



"Central to all of this is education," said Yelnosky. "It's not about throwing money at the issue, and I'm glad that we have an administration that understands that. It's about changing the culture here [at Juniata]. We need people, when they see a bottle on the ground, to take it the extra ten feet to the recycling bin, not the garbage can. We need people to, before they reach for the thermostat, to say 'I think I'll put on a sweater first.' That's what Sustainability Day is about."

Yelnosky and his team also issued surveys to around 300 students on the morning of the 26th. The purpose of the survey was to establish Juniata's "baseline sustainability," as Yelnosky phrased it. The survey was designed completely by psychology professor Dr. David Drews and a group of students, as no such instrument for measuring sustainability had yet existed.

"Sustainability to me, means living in a way to preserve the Earth for future generations" said Yelnosky. "I take an approach [to sustainability] very much like the Native Americans did, in that we should only take what we need."



The Sustainability Leadership Core's event on Oct. 26 was sponsored by a grant from the Society for University and College Planning and the Environmental Protection Agency. It is the third year for Campus Sustainability Day nationwide.

Paper Used at Juniata

Roving Reporter

How can we improve sustainability on campus?

"We could try to process recycling here on campus." – Brent Calaway, junior

"We need to advertise the recycling rules better. I don't think a lot of people know what they can and can't recycle, and many people leave their caps on bottles. We should also put lids on the recycling cans to prevent people from puking in them."
– Emily LaBrecque, freshman

"My project for senior capstone is researching sustainability on campus. I think we really need to educate people around campus on how to conserve energy and water more."
– Melissa Wilson, senior

"I think all the printers should print double-sided. We also need glass recycling. Just this morning I had to throw my glass bottle in the trash."
– Josh Beckel, freshman

Judgement House: Get saved or get scared

First Juniata-produced documentary is about Christian alternative to haunted houses

Aly Pompeani

Two years ago, Dr. Donald Braxton saw an advertisement for a Hell House on the back of a post card. He had always been interested in filming a documentary and put two and two together. He sent out a bulletin looking for students showing interest in this topic, and several responded.

Braxton decided to take on the task of directing this documentary right away. Last February he and five Juniata students, began the process of creating this piece. After a year and a half of camera and lighting lessons, interviewing members Leidy's Church in Souderton, Pennsylvania and learning about evangelistic technique, the first undergraduate documentary at Juniata was created: "Judgement House."

The documentary debuted last weekend at the Religion Department's "Sinners and Saints" Halloween bash.

For senior Jude Harter, working on the documentary was more than just extra academic credits. Although he received three credits last fall for the project, and picked up more in the spring as an independent study, Harter claimed to be passionately involved. "It is so significant because it is documenting a culture that's gaining social momentum in our society," he said.

Harter and fellow filmmaker Valerie Bukowski, a junior, agreed on the reactions this documentary will stimulate, saying that many will be impressed by this cultural exposé. Particularly on this campus, they believe that some people are going to be really shocked by how this cultural group believes that simply staging a judgement will convert others to their religion.

Sarah Anne Wharton / Juniatian

The film "Judgement House" aired for the first time on October 29 in Neff. Its creators, (in back from left) *Dr. Don Braxton, his son Ted Braxton, senior Jude Harter,* (in front from left) *senior Laurie Gravel, and juniors Valerie Bukowski and Allison Bohac stood for a group shot at the premiere.*

Senior Laurie Gravell and juniors Allison Bohac and Terasa Prentiss rounded out the documentary team.

Braxton's documentary is an attempt to tell the story of an evangelical church and why they stage a judgement. Judgement houses and hell houses are a new technique used by the Christian church to advise people to accept Jesus Christ into their heart. Braxton and his crew focused only on Leidy's Judgement House. For the members of this church, Halloween is not a heavily celebrated holiday. Instead of the typical haunted house, church members put on a short drama depicting teens' struggle with accepting Jesus Christ into their lives.

The message is intended to bring members into the church. Leidy's stages these judgements in order to persuade the "unsaved public" to repent their sins and accept Jesus Christ as their savior. When the judgement is over, they have the chance to do just that. Their objective is to "save the unsaved," but are they really just bringing people to conversion by fear?

Harter agreed that these judgements can definitely be perceived as a scare tactic. He had a hard time keeping his own opinions out of the documentary. But since he was behind the camera, it was easier for him to stay neutral. Editing the video, however, was not as simple. Still, everyone strived to remain impartial. "I think it will be somewhat refreshing to see a documentary without the presence of the filmmakers' bias," said Harter.

Braxton also worried about offending the members of Leidy's Church. Evangelicals can become very defensive and Braxton was convinced he and his crew would cross the line. As long as they stayed even-handed and respectful, Leidy's had no problem with the documentary. "We tell it just how they want it to be told," said Braxton, "…and they really liked us."

"Braxton reminded us constantly to be respectful to their religion and that we needed to stay very objective," added Bukowski, Bukowski worked on the introduction of the documentary and did most of the video logging. She, along with Harter, found it extremely difficult to keep her own views out of the documentary.

Not only does "Judgement House" tell an unbiased story of evangelical worship, it also stands out at Juniata as being the first completed undergraduate documentary. "There are only five of us who put this together…we are college students, not a professional camera crew," said Bukowski. "It just shows how Juniata forces people to do what they think they cannot do, and still succeed."

Braxton plans to continue his work with documentaries. Next summer, he would like to focus on the Creation Festival. This festival, held near Mount Union, Pennsylvania, is also known as "Christian Woodstock." Anyone who is interested in working on this new documentary should contact Braxton.

Palestinian professor visits Juniata

Presents analysis of U.S. policy in the Middle East

John Narayan Parajuli

The Bush administration's controversial mission to democratize the Middle East, namely Iraq, is drawing widespread criticism. A visiting Palestinian professor went a step further and warned that the American foreign policy as whole is becoming counter-productive, not just for the United States, but also for the indigenous democratic movement within the region.

"Israeli and American governments are playing into the hands of the fundamentalists," said Abdullah Abu Eid, a professor of international law in Palestine (now at Bucknell University) and a Fulbright Scholar in Residence. He spoke before an audience in the Neff Lecture Hall on "democracy and secularism" in the Middle East.

He insisted that the home-grown democratic movement should be allowed to flourish in the Middle East. America's call for democratization is ironically helping to stifle the indigenous democratic movement.

The corrupt and undemocratic regimes in the region can accuse proponents of democracy of being in cahoots with the Westerners in undermining the Islamic culture, said Eid, and suppressing the dissenting voice after labeling them un-Islamic becomes easy.

A supposed collaborator of the West becomes a scapegoat for the regimes to deviate public attention from their own bungling.

Furthermore, the image of democracy as something imposed by the Westerners would be resisted, more so because the regimes would readily exploit that un-Islamic label to continue their own reign. He speculates that it will take time for the democracy to take roots in the region.

"It will take many decades [for us] to have some kind of democracy," Eid said.

The reason, he insists that the concept of democracy is slow to take hold in the Middle East is that it has been only recently introduced in the Arab world.

Referring to the recent multiparty elections in the Egypt, the first of its kind in many decades, he said that there has been some progress, but his optimism is tempered with caution: The fact that America forced President Mubarak of Egypt for electoral reform is somewhat seen in a different light.

That is because people question America's sincerity. In the past United States has attacked only unfriendly regimes, and turned a blind eye on the bad governance of the friendly regimes, like the one in Egypt.

The Egyptian elections were a laughing stock throughout the region. The manner in which multiparty elections were conducted in a top-down manner without existence of any real grassroots institutions of democracy, made a mockery of the democratic process, Eid noted.

Commenting on the emergence of fundamentalists groups, he said that the failure of the Nationalist Arab regime to free even an inch of Palestinians' land, is making the fundamentalist rhetoric more appealing. And America is seen as aiding and abetting "Israeli atrocities" against Palestinians and itself engaged in Iraq and Afghanistan in "such atrocities," is contributing to the increase of anti-American sentiments, he said.

"I find his analysis very interesting," said senior Muhammed Shamaa, a student from Syria, "He was very neutral."

Eid's neutral comments are bitter truths about the failure of U.S. foreign policy in the Middle East. Winning the hearts and minds of people in the region would require more than just policy statements. It seems to be dawning on the policymakers in Washington: slowly but surely.

Snapshot Stories: Special Olympics, Chinese Club, and Hillel

Holly B. Brown / Juniatian

Above, students gathered in Lesher kitchen on October 22 with the Chinese club to cook spring rolls. The group gets together regularly to cook a variety of dishes. Near left, the Hillel club worked outside of Ellis to build a Sukkah for Sukkot. Sukkot is a Jewish Holiday celebrating the Festival of Harvest. Far left, Mr. Juniata Max Stem gives out awards for Saturday's Special Olympics. The event was held on the 23 and attracted participants from several different counties and all over campus.

Follow up: campus crimes

How safe is Juniata College? An in-depth look

continued from page 1

be the subject of another article in a future issue of the Juniatian.

So let's look at how Juniata is doing in reported violations compared to other like colleges like Elizabethtown, Dickinson, and Franklin & Marshall. These are similar colleges in size and are located in Pennsylvania. Juniata has the smallest population at close to 1400 students. Elizabethtown has 1600 full time students, and Franklin & Marshall has 1850. Dickinson has 2292 full time students.

Liquor Law Violations

For all the colleges, the biggest offense was alcohol related, but Juniata ranked the lowest in numbers for this among the four colleges. Violations can result in either arrest or disciplinary action/judicial referral (DA/JR). Arrests at Juniata on campus and non-campus property for liquor law violations (LLV) have only happened in 2002, with seven such arrests. There were five arrests in 2002, however, on public property, and three more in 2004. That makes a total of 15 LLV arrests in the three year span.

The disciplinary actions and judicial referrals are more substantial. For all three years 2002-04, there were 127 total DA/JR on campus but none anywhere else.

So Juniata had a total of 142 liquor law violations from 2002-04 – including both arrests and DA/JR. In comparison, Elizabethtown had a total of 396 LLVs for the three years. (They did not specify between on campus and off campus or between arrests and DA/JR.) Franklin & Marshall came out with a total of 670 LLVs: three arrests on campus, 102 arrests on non-campus property and 565 on campus LLV DA/JRs.

Dickinson, though, had the highest liquor law violations by far: 1316. Of those, 145 were on campus arrests and 74 were public property LLV arrests. They also had 1,011 on campus and 86 public property LLV DA/JRs.

Burglaries and Robberies

Next, Juniata's theft and burglary statistics – or the lack thereof – were also noticeable. Burglary is defined as the forcible entry into a property with the intent to commit a crime, while robbery is the act of theft or stealing. There is a distinction between the two in the Clery Act statistics.

Juniata's statistics for this were the same as Elizabethtown's and lower than those of Dickinson and Frankiln & Marshall. Juniata had 14 total burglaries: 13 on campus, 1 non-campus, and no public property burglaries. No robberies were committed. Elizabethtown also reported 14 burglaries and no robberies, and again they did not specify location.

Dickinson had 36 burglaries: 22 on campus and 14 on public property. There were also 10 robberies at Dickinson, five on campus and five on public property. Franklin & Marshall had 34 on campus, three non-campus property, and one public property burglaries for a total of 38. They had fourteen robberies: six on campus and eight on public property.

Juniata Police and Security

Overall, Juniata is a relatively safe college. No hate crimes were reported from 2002-04 and all other numbers from the Clery Stats in those years are eye-catching, such as only eleven drug law violations (which resulted in disciplinary actions), one aggravated assault on public property, and one forcible sex offense on campus.

Rocco Panosetti is in charge of the JC Department of Police and Security. There are seven full time officers and two part time officers. The officers are present and patrolling the campus 24/7. Panosetti said that Juniata is fortunate to not have a very high crime rate and the department staff should receive credit.

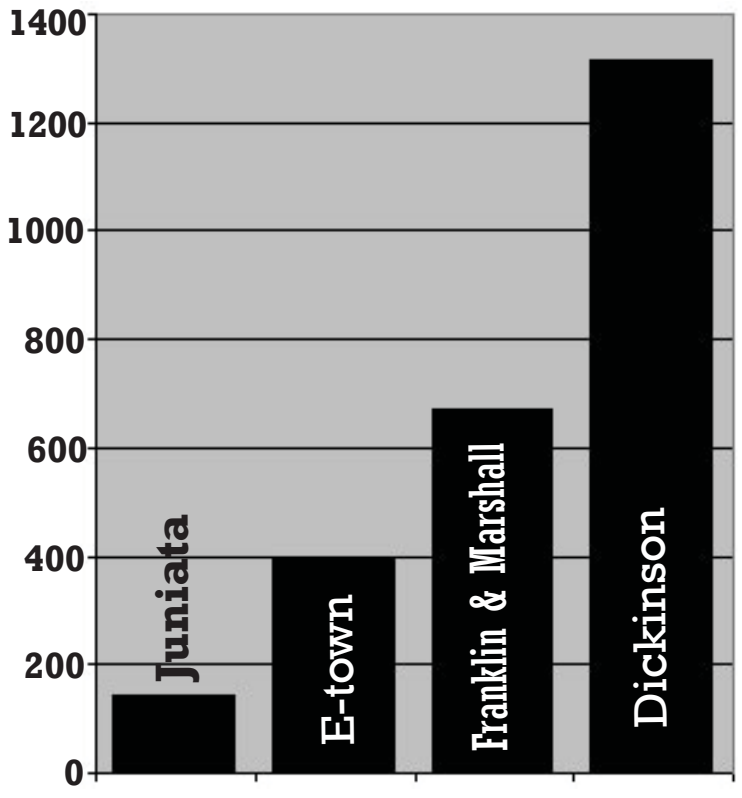
Blue light call boxes are one action security took to make the campus safer. They were placed "in distant dark areas" around campus, said Carla Panosetti, C.P.O., a full time officer, Office Manager and First Responder. Originally three, there was a new one installed behind the tennis courts near Baker. There is also an emergency call box on the patio of Ellis. They are there to serve everyone.

Only one legitimate emergency has ever been recorded from them, and it was a faculty member who broke a hip behind Good Hall, Carla Panosetti said. The rest have been pranks.

The call boxes are linked with the radios of the security team and the main phone line. Wherever they are, they will hear you. The blue light spins until the call is finished. Response time depends on how many officers are on duty and how close they are to you.

One thing the security office does not have control over is the locking of external or internal residence hall doors. Juniata is one of the only colleges that has unlocked dorms (other than Lesher). Students are free to come and go as they please. Most of the time dorm doors are left unlocked. Yet there are risks to this practice. Most of the stolen items at JC are reported to be unsecured and vulnerable to wanders. While this campus has the relationship of being a "trusting community," Panosetti said that students commit crimes such as stealing as well. He encourages all to keep doors locked to lower the risk of missing items.

Juniata Security recently made the switch to become a police department. This means that the officers have gone through Police Academy training so they can provide better service and more authority to deal with more serious incidents, Panosetti said. They can make arrests and can handle firearms, even though they do not carry any regularly. There is also the added benefit of having grants available to them. However, they still keep non-officer security personnel on staff because they are still "a valuable resource," said Panosetti.



With the switch to a police force, Panosetti said, "It has impacted the College's relationship in a positive way with community." The neighborhoods are grateful as the switch has resulted in fewer problems with the students.

The JC police are also on close terms with the Huntingdon police. They have a close relationship where they call each other for help. The JC Security Office covers off campus housing up to 100 feet from contingent college owned property. If the Huntingdon Borough police have issues with students off campus, the JC police are often called to be involved.

But remember – this may not be the total number of statistics. Incidents can either be reported to the police or the Dean. While they all should be reported back the JC Department of Police and Security, Panosetti said that not everything always gets reported. Whether the Dean has a separate set of statistics – and whether or not students report some violations at all – will be the subject of a future Juniatian article.

Reported Liquor Law Violations 2002-04

Arrests, Disciplinary Actions, & Judiciary Referrals

Juniata has approximately 1,400 students. Elizabethtown has approximately 1,600 students. Franklin & Marshall (Lancaster, PA) has approximately 1,850 students. Dickinson (Carlisle, PA) has approximately 2,300 students.

Tuition increased, aid diluted

continued from page 1

"The increase in student body sucked up dollars," he said. "They're diluted with more students, and that's been the problem."

Enrollment is at an all-time high, but the amount of money for both merit and need-based aid has not increased proportionally to the extra students. More people vying for the same amount of money make it harder to get financial aid.

It will be especially hard to get more need-based financial aid (aid based on finances) because Juniata is lowering the number of high-need, modest-ability scholarships and increasing the number of low-need, high-ability ones. This is to capitalize on those who can pay more towards costs, thereby helping the college.

"We want to have the best student body we possibly can," said Hille.

But, because there will not be as many need-based grants given to modest-ability students, fewer prospective students from poorer areas – like, for example, central Pennsylvania – will be able to come to college here.

"As we grow, we want to grow by attracting more people with more ability to pay," said Hille.

"It's a crummy sort of thing," said junior Seth Robertson, from Rockhill, PA. "It's a phenomenon – shifting financial need-based aid to merit . . . and it's not just JC," he added.

Freshman Chris Burlingame said he would not have come to Juniata if scholarships had changed before his entrance here. "If I hadn't gotten a scholarship, I'd be somewhere else right now," he said.

Few students now pay full tuition at Juniata, with more than 90% having some sort of financial assistance. The College is losing money paying for educations, so Juniatians with bigger pockets would be a definite welcome to the campus.

"It would be nice to have more students to foot the full bill of tuition," said Kepple.

More expensive schooling plus fewer opportunities for need-based scholarships equals wealthier, smarter incoming students, a sum that gives fuel to rumors that Juniata is pining for Ivy League status.

Senior Becky Zajdel, one of two students who sit in on the Committee for Advancement and Marketing, said that the Ivy League rumor is just that – a rumor.

"True, we often compare ourselves to liberal arts schools that rank highly in the U.S. News college rankings," she said, "but they do this to help make Juniata more competitive." And not to rub elbows with Princeton kids.

Kepple also does not light any fire to the rumor. "We're a billion dollars away in endowments from any Ivy League," he said. "We're always looking to better our institution over time, but we're not going to catch up to Harvard or Swarthmore."

But could the campus culture change to become like one of those schools? Superior academia and high costs could say yes, but who knows?

For now, money and costs present problems to JC students, present and future. But ideas are being discussed for campaigning specifically for grants and scholarships to ease the burden of tuition, and Kepple is not too worried about the changing campus.

"We've always educated bright, motivated students," he said, "and that's *not* going to change."

When profs skip class

continued from page 1

department to rearrange its teaching schedule to cover a professor's courses. Although he always gets lots on input, the final say is his.

In all cases, when a faculty member leaves, fewer of their courses are offered. Also, their advisees (especially seniors) and other students are left without the advice, support, and letters of recommendation that they may have been hoping to get from their professor. "It's tough on the students, but that's just the nature of the game," said Paula Martin. Martin is an environmental science professor who just retuned from a year-long sabbatical.

Advisees are never re-assigned to visiting faculty but are instead shuffled among existing faculty in the department. Seniors who have an advisor on full-year sabbatical are required to seek out and ask someone to be a replacement advisor. But students should have plenty of time to find a new advisor, right?

Well, not if they don't know that their advisor is leaving. Most students find out that their advisor is leaving through a cold form letter from the Registrar. But, since a large percentage of students are abroad their senior year it means they don't discover they have a truant advisor until the semester starts. "I didn't find out that my advisor was going on sabbatical. When I got back [from Mexico] I found out that he already was on sabbatical," said senior Lauren Smith.

Lakso felt that "what should happen is that a faculty member says, 'I'm going to be on sabbatical next year.'" The truth is, that very rarely happens. In fact there is no official notification other than a letter in your campus box, not even an e-mail.

Despite the hardships sabbaticals can cause students and departments, faculty who have taken sabbaticals were adamant that sabbaticals are vital to the survival of professors as we know them.

Faculty are not "sitting on the couch in their underwear … all day" as one professor's students accused. In fact, all faculty who take sabbaticals need to prove that their sabbatical will directly benefit the school, and many professors take sabbaticals to design new courses.

Politics professor Jack Barlow is currently on sabbatical writing and editing a new edition of a high school text book. He came to his interview in a hooded sweatshirt and jeans instead of his pre-sabbatical bowtie.

"It's critical to emphasize that a sabbatical is not a vacation," said Barlow. "It's working in a different way.

"The reason you need a sabbatical at Juniata especially, is that compared to comparable colleges the teaching load is very heavy," Barlow continued. "You're lucky to have 15 minutes a day to sit down and look at the journals in your field, correspond with colleagues or do anything to deepen your knowledge and involvement in your field."

Students do not mind the idea of sabbaticals but they do often come as a cold surprise. Smith said it's not a big deal, just "a thorn in my side, a pain in the butt." And no one likes to mount another pile of paperwork, especially senior year. But the long term institutional pay-offs are worth it. "I think that every professor should take a sabbatical as frequently as they are available," said Martin. "I think sabbaticals keep faculty alive in the classroom."

Emergency Preparedness

continued from page 2

Panosetti believes the wake of Katrina was a large disaster in part because people just weren't prepared. "There was a lot of blame going around. If individuals were more prepared it would not be so bad. Municipalities cannot guarantee safety."

Still, Juniata does not offer any basic training on what to do in case of a disaster and how to become better prepared. Panosetti was quick to reply that anyone could just get online and take a basic course.

Nagle also said that he was currently in contact with the Red Cross. "I am hoping to have them come and give advice on what can be done on campus, and to help with training. My hope is that this will happen next fall."

Students can also contact the Red Cross to take a basic course on emergency safety and response. Students involved in the Quick Response Service, QRS, are also able to provide an extremely mobile medical response capability. Panosetti is very impressed with these students, and he expressed how well trained they are. Juniata's Resident Directors and Resident Assistants are also trained in fire safety.

Panosetti still wants more resources from the administration. He said, "We were provided with safety committee backing, and this was more than I ever thought we would get. But my belief is there are never enough resources." Still he wanted to assure, "If we need it, we'll get it."

Don't e-mail me about the military

Emily Eller

Okay, we all got the e-mail from the army recruiter, former Juniata student, who thought he'd use his "ins" at JC to send out Marine recruitment propaganda. (I saved it. If anyone wants a copy, just let me know.)

I scanned over the forums and a lot of people seem to be asking: What's the big deal?

It is a big deal. Here are two reasons why:

First. It is a big deal because personal information such as our e-mail address is our personal business. We're probably the last school in the country which doesn't padlock and protect every shred of our information under policies, passwords and keys. I went to see a friend of mine at Columbia University and couldn't remember what dorm she was in. They couldn't tell me. I don't mean they couldn't tell me in the sense of "I sure couldn't tell you where that there dorm is," I mean they couldn't; they weren't allowed.

Someday Juniata will be that way too; it's only a matter of time. And every time some jerk misuses our personal information we take a giant leap toward having to check in and out of our dorms and writing release forms to the registrar before our parents can get our grades. I don't want that, and e-mail abuse is just one thing that brings it closer.

Second. We're a pacifist school. Some people may not like our Brethren heritage, but I do. It's not an accident that I'm here. I study peace, and I support the mission of an educational institution founded on the principles of peace.

The Brethren Annual Conference passed a resolution decades ago stating that it was "inappropriate for Brethren colleges to allow military recruiting on their campuses."

But don't you lose your federal funding if you don't allow military recruiters on campus? Yes, you do. And you get to keep your integrity. Three for one: you don't have military recruiters on campus, you get your hands out of what is increasingly dirty federal

CWS: All over the map

Rebecca DeHass

Case in point: I asked a friend if I could borrow his CWS syllabus yesterday. He said "Maybe, but we don't have the same class do we?" My best friend is reading "Fight Club" and "Girl Interrupted," while I'm stuck reading "Oedipus Rex" (which I have already read twice in high school) and my roommate doesn't even have books – of course we don't have the same class!

There are twenty-four different CWS sections taught by thirteen professors and all the classes have in common is a title. There isn't even a consistent feeling toward CWS among the students. There are the few that cherish the class, but the majority believes the class is a joke. In retrospect, sophomore Evan Gross said, "Overall, it was a waste of time."

CWS has the potential to be a fountain of knowledge for freshmen, but the class is not living up to its general description: "Drawing from a variety of literary, scholarly, and popular sources, this section examines issues important to students and their culture."

My class's theme centers on mystery novels, stories and movies. Let me be the first to say that I have not reached cultural satiety by reading the adventures of Sherlock Holmes. I think my real problem is that I picture Sherlock Holmes as Basil from Disney's "The Great Mouse Detective." Does sitting in class imagining the Holmes's stories played out by talking rodents, while other students are talking about real world issues still count as cultural examination?

When I was at orientation, I was told that CWS was CWS any way you looked at it

Rebecca Krauss is one of the few freshmen who enjoys CWS. She said that her class is based on the discussion of peace, war and terrorism. She mentioned that the instructor, William Dickey, is pretty involved, but that he is there simply to guide the classes' thoughts. "I have never had a class where my input was valued," said Krauss. "It keeps me thinking because the class is discussing. A whole different look at the topic comes with each comment."

Then again, I favor tearing apart Sherlock Holmes over a central theme like consumerism. I drink green tea by the gallon, and I'm addicted to AOL instant messenger; yes, I consume but no, I do not want to analyze it and neither do my kidneys. I bet ten bucks that unless business and economics are part of your POE that you aren't going to delve head first into the enticing subject of consumerism.

I asked a student stuck in consumerism CWS to explain the class to me. He started by saying that every time the class gets an assignment, the students generally groan about how boring consumerism is. The first time this happened, the instructor told the class that they shouldn't have picked his class if they were bored by the central theme.

Wait a minute, were we supposed to be looking at the specific course descriptions when scheduling classes? When I was at orientation, I was told that CWS was CWS any way you looked at it, so pick the class that best fit my schedule time-wise. Apparently the freshmen missed the memo because I went back and checked out my section's description: this section will look at how cultures from the Classical to the Postmodern have defined crime and the search for truth. I just wanted to have CWS at 8 a.m. to get it over with for the day, not reread Oedipus Rex (again). Memo to freshmen: when picking classes for the spring semester, pay serious attention to the instructor you pick and read the fine print.

Letter to the Editor

Politics: US vs. Europe

There are many things Europeans and Americans do differently, especially when it comes to politics. Although both parties take pride in being the largest democracies in the world, they differ on how to make democracy work. Thanks to Juniata's wonderful networking and the study abroad program, I had a chance to work in "the real world of politics" while interning with the U.S. House of Representatives during the summer, and with the European Parliament this fall.

The House and the EP can be though of as parallel institutions, they are both legislative bodies members of which are directly elected. However, while there are 435 Congressmen, there are 732 MEPs (members of the EU Parliament). Moreover, these 732 politicians speak in 21 different languages, making the European Parliament a sort of a Babel tower. It is understandable that decision-making in such institution is quite complicated. It should be mentioned that these 732 MEPs travel from Brussels to Strasbourg for their plenary sessions for a week every month. The taxpayers pay for it, the airlines definitely benefit from it, and the French are proud to host a sit of the European Parliament when the Germans do not.

Another issue is the one of identity. In the House of Representatives a politician can be one of the three: a Democrat, a Republican, or an Independent. In addition, regardless of the party affiliation, the representatives think of themselves as being American. Au contraire, the European politicians do not consider themselves European. Even though the 14 parties in the European Parliament are transnational in nature, the Parliamentary Committee meetings become a battle ground for defending national interests regardless of party affiliation.

The constant tension between nationalism and federalism, which is absent in the American politics, is one of the major decision-making obstacle in the European politics. Certainly, the conflict will not be resolved through a Civil War. Instead it will take decades of political changes which are fascinating to observe. Will the European Union ever become the United States of Europe? Can adoption of a constitution lead to shift in mentality of the Europeans?

Magda Sarnowska
Class of 2007

Presidential Perspective

"Is it possible to have more hours of access to Kennedy's gym? Will students be able to use the gym twenty-four hours a day, seven days a week, in the near future? Has the College ever considered video monitoring or other ways of opening the gym for extended hours?"

Right now the gyms and handball courts are open until 11:30 each night. After students return for spring semester, hours are extended until 1:00 a.m. through spring break. Consideration could certainly be given to further expansion of gym/court hours should there ever be a pressing demand. The Natatorium and Fitness Center have different circumstances and hours that may not be quite as flexible. We do use qualified supervision (CPR for the Fitness Center and Lifesaving Certification for the Natatorium) and this has implications for the hours of operation in those two areas. The Residential Life and Athletics offices have explored placing cardio equipment in the residence halls when that idea might become financially justifiable. This would certainly have the effect of extending hours to 24/7.

"What is the College's position regarding military recruitment on campus? If recruiters can send mass e-mails when virtually no one else can, isn't that a violation of the new mass e-mail policy?"

Military recruiters are permitted on campus in accordance with recruitment policies and procedures established by the Career Services Office. The e-mail which was sent on October 18, 2005, with the subject line "Marine Corps Officer Program" was sent from Eric Albright's EagleNet account. Eric Albright is a 2005 graduate now working as a Marine Recruiter. This e-mail constitutes a violation of our network policies. CNS immediately disabled Eric's network account, and we sent notification to Eric and Captain Kozel that such use is not permitted.

Join us in welcoming a new Juniatian!

Nathan Leo Mathur was born to Amy and Ryan Mathur on Wed., Oct. 26 at 6:36 p.m. Nathan is their first child.

Amy is this newspaper's faculty advisor, and Ryan teaches in the geology department. Both are alumni of Juniata College.

The Juniatian extends its congratulations and best wishes to the family.

President Kepple wants to hear from you! He uses his column to answer any college-related question from the campus community. Simply e-mail questions to juniatian@juniata.edu, and the editors will forward them anonymously to Dr. Kepple.

LETTERS TO THE EDITOR

Students, faculty, staff, alumni: send letters to juniatian@juniata.edu. We print all letters to the editor that are of interest to the campus community – in response to one of our articles or on a completely separate topic. Please limit letters to about 300 words, and note that longer submissions may be printed partially due to available space. Opinions expressed in the newspaper are not necessarily those of the Juniatian staff.

College Writing Seminar

continued from page 7

More importantly, grading is a huge CWS inconsistency. The instructors not only look for different things in students' writing – whether they are sticklers for grammar or push you to have more analytical content – the grading scale differs dramatically. For example, according to Carol Peters's "Specific-to-You-Syllaboo" there are four essays which are worth, fifteen, fifteen, twenty and twenty percent respectively. Mark Hochberg's four essays in order are worth fifteen, twenty-five, twenty-five and twenty-five percent. An anonymous sophomore admitted that he received one of the only two A's given out on a paper by Hochberg in CWS last year.

One student felt that although his professor, David Lehmann grades grammar harder and doesn't focus so much on content that his grading system is fair. The syllabus lists that the worst paper is worth ten percent, the best is worth twenty, and the other two essays are fifteen percent each.

I'm sorry if you think CWS should be a wild card, but I like knowing what I am being dealt and where to go with what I have. My CWS education and some one else's are taking different subjective paths to the same objective destination. I think some of our CWS mobiles are going to overheat on the way there while some are on cruise control. It's just the luck of the draw.

Military

continued from page 7

money and you can run another big fund raising drive targeting Brethren alumni and telling them how pious we are.

Okay, so the e-mail was unauthorized and Dean Clarkson says, "Eric Albright's network account has been disabled and letters will be sent to Eric and to Captain Kozel, the Marine Recruiter. This is a clear violation of our network policies, and further infractions will result in legal action." But it just serves as a reminder (a slap in the face, if you will) that Juniata still doesn't have enough self-esteem to listen to student's concerns when it comes to ethics… especially if money's involved.

So, chin up Juniata. Eric Albright and Captain Kozel may be selling war, but not everyone's buying.

Review: Oval Opus births circular disappointment

Christopher Burlingame

The hum of acoustic guitars and electric bass drifted out over campus from the ballroom of Ellis Hall. Oval Opus, a Cincinnati-based rock group, took the stage at 9 p.m. Oct 22 in front of a crowd of about 40 people. A good decision by the rest of the campus to stay home. A+ on the collective thinking assignment; too bad I never got the syllabus.

The majority of the crowd spent the show stone-faced, occasionally tapping their feet. Honestly, their disappointment was warranted. The band lacked stage presence and originality. By the start of the third song, the crowd had begun to sit down in disappointment. Audience dissatisfaction reached such a level of boredom with the performance that one girl even got up during the show to get a scarf that she was knitting.

Whatever happened to rock shows being a place of raucous audience involvement? Where are the days of entertainment being entertaining? The worst part was that the band had no shame, acknowledging and playing along with the audience's withdrawn attitude toward the performance. Oval Opus seemed to revel in the boredom they inspired.

The band's website explains the root of their name as being "a never-ending musical work." The only continuous part of their act was the incessant droning of the singer who sounded like he was trying to emulate a poorly made Sister Hazel album. Even worse than his singing was the lack of imagination in the lyrics that consisted of overly repetitive choruses that seemed to be a continuation of an already sung song.

"It was decent, I guess, but the lyrics weren't creative at all," Freshman Matt Melvin said.

In the absence of the drummer, Oval Opus's performance was self-declared, "Stripped down and naked." I personally was left wishing that Oval Opus would have been fully-dressed and heading for the door after playing the first song.

The performance itself consisted of predictable songs with lyrics relying mostly on end rhyme and similar guitar riffs. Oval Opus is in the process of putting out its third studio album, but after previewing their music online, I expected a little bit more. Often, the songs focused on the overdone topics of love, failed relationships and parties. I don't write music, but I guess it must be difficult to be original and to evolve as a group if you can't see past those three topics.

continued back page

Holly Brown / Juniatian

JAB and Habitat for Humanity sponsored the Cincinnati band Oval Opus to come on October 22. The band entertained students and donated all proceeds to Habitat.

PAX-O film series is a hit

Students enjoy cinematic learning

Laura Sweltz

Juniata students sharing boredom at the seemingly never-ending cycle of classes were recently given an opportunity to learn about war, international perspectives and even a cross-country motorcycle trip in an entertainment bi-weekly manner.

PAX-O, Juniata's student peace organization created a film series this semester to attract students who would not normally attend lectures, to inspire them through films, which can evoke emotions that a lecturer cannot.

"A movie is a wonderful way to demonstrate the importance of world issues," said Sarah Svigals, a co-facilitator for PAX-O.

Co-facilitator of PAX-O J.P. Melle said that despite the fact that PAX-O expected between ten and fifteen students to attend each film, they were delighted that over double that amount of students attended the three films shown thus far. Melle explained that there was no specific target audience for the series, but that he was surprised at the diverse group of students who have attended.

According to Melle, PAX-O wanted to sponsor this series in order to stimulate thoughtful debates and discussions.

Shows also offer PAX-O students an opportunity. A student from the Peace and Conflict Studies department leads the viewers in a discussion about topics that the films cover after each film concludes. These discussions usually last around half an hour and provide an opportunity for students to voice their opinions and ask questions about the films.

"(Errol Morris's "The Fog of War") was very thought-provoking and the discussion afterward was interesting and everyone was able to talk about what they thought about the film and the points that it presented," freshman attendee Erin Smith said.

PAX-O shows a movie about once every two weeks. "Motorcycle Diaries" is the next film to be shown in the series, which will be playing on November 6.

continued page 10

Kvasir submissions need inspiration

J. Atkins

When asked, "Do you know what Kvasir is," a couple of students responded with, "It's a college," and "Isn't it like an assistant to a king or something?"

No wonder Juniata's literary magazine, Kvasir, is having trouble collecting submissions for its first issue of the semester.

Kvasir is a student run group that publishes a student literary magazine composed of poetry, prose, drawings, photography, lyrics, music and other works of art. Kvasir not only publishes the magazine but also promotes independent artists through poetry readings, coffee houses and other events.

On campus, however, it seems that students just don't know what Kvasir (pronounced Va-sur) is and what the club does. Some thought that Kvasir is a newspaper, while others know a bit more about it. But the students who do know about it say they don't know how to submit their works.

Currently, the club has a small audience on campus, and it tends to see the same people submitting to and looking at the magazine. There are a few more students that are interested in reading, but not enough to help promote the magazine. The club president, Laura Rodgers, mentioned that students included in Ju-

continued page 11

Unlock Your Voice: Coffee House celebrates thirteenth birthday

Holly B. Brown

Thirteen is the lucky number for Juniata College's annual "Unlock Your Voice" coffee house. The performance, which is being held on Friday, November 11 in the Ballroom at 8 p.m., is marking its 13th birthday.

The event is organized by Professor Judy Katz and run by the students in her Women and Literature class. It will feature over 15 students reading poetry and short prose written by women.

In the past, the coffee house has featured works full of controversy, spirit and humor. Students chose the works that mean the most to them. This year will be just as heartfelt.

"What matters to me about this," said Katz, "is my students are involved in many creative activities and are using their creativity and the knowledge they're gaining in this course to share something with the community."

Sophomore Dan Popernack is the only male student reading at "Unlock Your Voice" this year. He's reading a "neutral" piece written by poet Nikki Giovanni.

"People approach the literature as women writing, not as writers who happen to be female," said Popernack.

Junior Lisa Detweiler will be returning again this year to perform a self-written song. Last year she played "Perfect World," a song about how women each try to make themselves perfect.

"I will be playing another song this year more directly related to women emphasizing everything that women share and the power of the pen," she said.

While the event is not appropriate for children, all are invited to attend. In the past the show has entertained and moved audiences powerfully. Everyone from the community is encouraged to open their minds and hear the presentations.

Fashion: I Finally Got the Men Figured Out, I Think

Lucia

I have done something horrible, something so bad I should be locked up (and I am sure some of you want to lock me up already for having this little column). I have been neglecting the fact that this campus isn't entirely made up of women; we have men as well. I have been running my mouth about women's fashion and do's and don'ts this entire month or so, completely forgetting that Juniata men could use some tips as well. So let's get to the men and their glory. Oh men, boys, males, the opposite sex in general. Where do I begin?

In the latest "Esquire" that I picked up (I needed research material, and men you should read page 110, it's true). The magazine says that black is back and that the tailored jackets and even a daring longer jacket are welcome on the runway. I saw a lot of moto jackets as well (basically a jacket with out a collar). However, here on our campus, I really don't think our 18-20 something's are worried about what they wear (although I do see some nicely dressed males around here). But for the men who do care about what are they putting on…

The best thing I have seen on the male physique this year would have to be layers. When I say layers, I mean those t-shirts and hoodies rocked under a vintage sport jacket. But boys, I know it's rough waking up in the morning and even spending five minutes thinking of what to wear. I mean those five minutes could be spent doing something else, like brushing your teeth, which I hear is a rarity for some (no names, don't worry).

The boys who do dress to impress seem to be going for the preppy look, but not all. At Juniata, you have the collared-shirt guys, you have the make-my-shirt-a-XXXL boys and then you have I-wear-what-I-want boys.

For the guys who take time in the morning to get ready, it's about popping that pink polo on with a stylish pair of jeans. "I think a pair of Diesels and a nice shirt goes a long way in college," said junior Mike Gwiazdowski.

If you like that style, it's real easy to get. I think I have seen every color of polo, and I heard it's a popular item to wear out on the weekend too. You can not go wrong with a polo shirt and some nice smelling cologne when heading out the door.

Then we run into the biggie size guys. Everything they wear seems as if it was bought two sizes too large. These guys don't go for the tiny T's that fabulous Coach Smith is known for wearing. But that's okay. For these homeboys, comfort is key. Sweat pants and an XXL large T-shirt and they are out the door. "The bigger the T-shirt the better," said Senior Tommy McConnell. "If I'm feeling special, maybe a nice shirt."

But I think we can assume this nice shirt will fit the criteria of being XXL. You can't break your style.

As for the men who express a side of themselves through what they wear, my stilettos off to you; you make my day. The vintage look is a definite keepers, so if you are one of those fine males sporting this look through campus, well done.

Maybe I am off in my classifications about what men wear around here, but I think I have a pretty good handle on it. If I missed a group, my apologies — a shout will be on the way. In the end, I think the guys here have it good, since they can make sweatpants look good. Now only if they brushed their teeth every day…

Movie: The Weather Man

Mediocrity doesn't work on screen

Holly Brown

In my favorite movie and the how-to guide on good movie making, "Adaptation," film guru Robert McGee gives some good advice.

"You cannot have a protagonist without desire, it doesn't make any sense."

If only Nicholas Cage had remembered this and carried it over to "The Weather Man." The Gore Verbinski ("The Ring") directed film flounders about, looking for the poignancy and humor that "American Beauty" captured so well, but never gets even close. Verbinski must learn that mediocrity + lots of swearing + a black color scheme does not equal Oscar material.

Finding the main fault in the movie is difficult. Whether it's the choppy dialogue, the confusing characters or just the total lack of any real plot is hard to say. What I do know is that "Weatherman" tries hard to be darkly ironic and modern, but it only seems to be awkward and crass.

Nicholas Cage is a local weatherman David Spritz, living an unfulfilled life divorced from his wife and separated emotionally from his kids. David's father is Robert Spritz, a Pulitzer Prize winning author who always seems to be disappointed in his son. David tries to heal the rift between himself and his immediate family, but can't seem to get over his own disappointment with himself.

But it's that dissatisfied mediocrity in the character of David that confuses me. Is he depressed? Disappointed in himself? Confused, dissatisfied, angry?
I couldn't figure it out, and I'm not sure if Cage knows either. He wanders stoically from emotion to emotion and we never get a clear idea what David is supposed to be experiencing. It's not that his character is complex, it's that we're unable to determine what he's going through.

In "American Beauty," the moment of beauty comes when Lester Burnham finally snaps out of his mediocrity and takes matters in to his own hands. This moment never happens in "The Weather Man." And that creates a movie that consists of nothing but one uneventful scene after another never reaching much of a conclusion.

I went to see the movie with a few of my friends, some of whom liked the movie. They claimed, and I agree, that the character of David Spritz is more realistic than most movie characters. Granted, all of our lives aren't full of explosions, heists and excitement, but when you reach the state of desperation that Spritz is at, something needs to happen.

And, as Robert McKee goes on to say, "Why the [expletive] are you wasting my two precious hours with your movie? I don't have any use for it. I don't have any bloody use for it."

So, "Holly calling all movie producers:" have a point next time, and don't try so hard to be hiply dark. It comes off as being a bit pretentious. Skip this one and go see something much better. There's a lot to choose from this week.

PAX-O films

continued from page 9

According to Melle, "If students come to any of our films this semester, it should be this one."

Adapted from the diary of Ernesto "Che" Guevaro, a leader of the Cuban revolution, "Motorcycle Diaries" presents the story of the adventures Guevaro had with his best friend Alberto Granado when they traveled across South America during the 1950s.

This fall, the club has already shown three films, including "Control Room," "Fog of War" and "Unconstitutional."

"Control Room" dealt with the international perspectives of the Iraq War and showed coverage from the Arab news network, Al Jazeera.

Students gained the perspective of U.S. Secretary of Defense Robert McNamera in "Fog of War." McNamera presented his thoughts and views on the state of modern war and the lessons he learned from his personal experience dealing with war.

The latest film in the series, "Unconstitutional," showed how civil liberties have been limited with the Patriot Act since 9-11.

After "Motorcycle Diaries," two other films will also be shown this semester, including the November 17 presentation of "Apocalypse Now," which is based on events from the Vietnam War.

PAX-O will also present "Store Wars," a film which followed the struggle of a small town that attempted to prevent Wal Mart from opening in their community, on December 8, shortly after Wal Mart opens in Huntingdon.

Information about when and where films will be shown will be provided in the daily announcements closer to the date of the viewings.

PAX-O will continue the film series during the spring semester, which will feature around eight films.

Off the wire: *Technology can aid or hinder paper reduction – depending on how we use it*

Nate Drenner

The Sustainability Day statistics (see page one) tell us that about 1,688,000 pages of paper were used in Juniata's network printers in the last year. I felt the trees on campus cringe.

Even though technology that can replace paper is at our fingertips, technology can at the same time encourage paper consumption. It is incredibly easy to *click* File > Print *click* and have a hard copy within seconds. At Juniata, costs of printing are invisible to most students and staff – the College picks up the tab on networked printers.

The use of print-reducing technology, though, is up to us. Ultimately, any change in our printing habits will have to result from a change in our own habits and efforts. Not that we haven't made any steps toward a paperless campus. Online course registration is one example, as is the online course catalog.

Because of technology, paper use is increasing not only on our campus but across the U.S., according to the Solid Waste Policy Group at Rutgers University. They point to printers' and copiers' ease of use as a main cause of the increase.

I found a technical document, also known as a "white paper," on www.cisco.com called "Pining for a Paperless Office?" and resisted my instinct to print it out. (Cisco is a company that makes network devices like switches, firewalls and modems.) The article says, "Hard copies continue to have many advantages over electronic documents." Paper is easier to read and more portable than even Microsoft Word on a laptop screen.

By the way – isn't it interesting how an electronic article is still called a white paper? We just can't seem to let go of our print mindset.

The article offered suggestions on portable, accessible technology to cut down on paper waste and aid the transition from print to screen:

- Laptop & handheld computers
- Scanners
- E-mail
- Network file storage (like the U Drive)
- Fax over IP
- Wireless network access
- VPN (off campus access to the network)
- Electronic books and course materials (think Blackboard)
- Duplex printers

Wait a minute… don't we have all of those? (We even, if you think about it, have "Fax over IP," which basically means scanning and e-mailing a document rather than using a traditional fax machine.)

Some classes do take advantage of electronic resources. At least two IT professors I know of (Bill Thomas and Marlene Burkhardt) rely on electronic submission of student papers through Blackboard. Professors' comments and grades are written electronically on tablet PCs and sent back to the student.

Even for those without tablet PCs, Microsoft Word has a commenting feature, which lets the user add electronic notes in the margin.

Those classes, though, are the minority, and I'm not sure I could see an immediate electronic move for classes that rely more heavily on writing, like CWS. Even for Juniatian articles, which are typed in Microsoft Word before editorial review, I find that I'm a more effective editor when I print out and make edits with a pen before I make changes electronically. It's a paper-based mindset, though, that may change with time.

And that's what seems to be the key to reducing printouts: a changing mindset. If the campus makes a conscious effort to change its habits, we can reduce that 1,688,000 figure by next year's Sustainability Day.

SPEAK: "How do we Heal?"

Sarah Anne Wharton / Juniatian

Josh Scacco read excerpts from poetry and letters written by soldiers from the War in Iraq during the soapbox speeches sponsored by SPEAK. The theme of the speeches was "How do we Heal?"

Kvasir submissions

continued from page 9

niata's English Communication and Theatre Arts (ECTA) program seem to be more interested.

Kvasir, because of these problems with receiving submissions, is extending their deadline for their first issue of this semester until November 14, changed from the original deadline on October 24. To help fix its problem, Kvasir has increased advertising to encourage students to submit their work.

Kvasir publishes a mini-issue two or three times a year along with their two main issues of KVASIR. This fall, the magazine's theme is "Blindness and Ignorance." The spring issue does not have a common theme. The club questions whether or not the theme for the magazine tends to be limiting.

Amory Koch, a senior who considered submitting, said, "The themes throw me off...[it is] too much effort to write something specific."

For those students that have trouble finding inspiration within the theme, the club will offer ideas and starting points for all those that ask.

"[The theme] can be limiting," said Rodgers, "but you shouldn't feel [that] you have to write within that theme."

The club's advisor, Peter Goldstein, is on sabbatical, but is still around campus periodically offering help. Donna Weimer, a part of ECTA, also helps to answer questions that may arise.

"We are very student-run, so it doesn't make a big difference [that Goldstein is on sabbatical]," said Laura Rodgers.

Fittingly, the title of the magazine comes from the legend of the Norse God of Inspiration. The legend is based on gods that made a mixture of spit and then created a new God of Knowledge, Kvasir. Thus, the name Kvasir was chosen to show that the magazine serves as an inspiration to JC students.

Submissions can be made by emailing Kvasir@juniata.edu or by dropping submissions in campus mail to box number 916. Submissions can be made by any student, regardless of his or her membership to the club. The club also accepts writings in foreign languages, with translations provided.

Live music on WKVR

Holly B. Brown / Juniatian

Senior Brenton Mitchell and Junior Brandon Long played a live show on Han Nguyen's radio show, "Just a Gigolo." The pair have been performing at coffee houses and Juniata shows for several years now.

Men's, women's cross country place third at MAC Championships

Robb Patty

The Juniata men's and women's cross country teams stayed close to home this weekend as they hosted the Middle Atlantic Conference Cross Country Championships at the Huntingdon Country Club. Teams and spectators scattered the grounds all morning, some preparing for their race, others just trying to cheer their teams to victory.

In the women's race, junior Tara Barlow of DeSales University crossed the tape first with a time of 23:08.13.

Juniata held its own as the Eagles placed five runners in the top 30. Senior Katey Glunt was the first Eagle to finish as she took fourth with a time of 23:33.14. The other top finishers included senior Nancy Hayes (12th), freshman Aubrey Cyphert (24th), junior Lia Bella (26th) and freshman Meghan Jones (28th).

In the team competition on the women's side, the Messiah College women earned its second title in three seasons. They were able to edge out Elizabethtown College by five points. The Eagles placed third as they totaled 93 points as a team.

Not to be outdone, the men's team also claimed a third-place team finish as the Eagles placed four runners in the top 31 of the 8k run.

Senior Chris Sheaffer placed tenth to lead the Eagles with a time of 26:57.45. Senior Justin Fritzius (16th), senior Mike Vella (26th) and junior Mike Chirdon (31) rounded out the rest of the top finishers on the men's side.

The team competition, however, was won by Elizabethtown as the men captured its seventh consecutive title, narrowly defeating Widener University, 40 to 41. Juniata, with 117 points was able to hold on for third and Susquehanna University placed fourth with 119 points.

Hosting the meet was very beneficial for the Eagles. Running on its own course, the team was able to gear many of its workouts towards a course it was familiar with.

"Hosting this year I think contributed to our team morale and camaraderie. Knowing that the MAC was coming to us helped us to better prepare for them," said Hayes.

With two third place finishes both the women and the men showed the ability to run with anyone in the MAC and have seen the Juniata cross country improve drastcially.

"Both programs have come a long way since my first year on the team," said Hayes. "We have trained confidently all year preparing to be among the top teams in the conference. Our placement in the top three was a success for both teams and is reflective of how much Juniata's cross country program is improving every year."

Next up is the NCAA Regional meet at Dickinson in two weeks. At that meet, the top seven runners on the team will compete for a chance to run at the Division III Championships.

Sarah Anne Wharton / Juniatian

Nancy Hayes sped down the cross country course set up at the Huntingdon Country Club during the MAC Championships on October 29th. Many Juniatians came to see the teams run at their last home meet.

Eagles rule the "Wid"

Lose only two games in Guisler Invitational

Jeff Byer

The Juniata women's volleyball team won all four of its matches to claim the championship of the "Wid" Guisler Invitational at the Kennedy Sports and Recreation Center on October 21. The Eagles only lost two games all weekend and their overall record is now 31-1. The Eagles have won 26 consecutive matches this season.

The most competitive match of the weekend was the nightcap when the Eagles defeated the fourth-ranked team in the nation, New York University, in five games. The Eagles seemed to be on their way to a victory as they took games one and two, 30-21 and 30-25, respectively.

The Eagles had impacting kills from freshman Amber Thomas and senior Katie Laucks. A game-ending ace from Laucks closed out game one. Thomas also helped Juniata close out game two by scoring four of the last eight points for the Eagles.

"Before the match, some of the NYU players were laughing at our National Championship picture (hanging in the main gym) and ridiculing it," said Laucks. "This gave us added motivation to destroy NYU. Something like this fires everyone up for the match."

Games three and four saw a change in direction as NYU won both games, 30-27 and 30-26, respectively.

Game five brought more drama as the Eagles trailed throughout most of the game. Down 12-9 and three points away from a rare loss at home, the Eagles roared back to score 6 of the final 7 points to take game five, 15-13.

Junior Rachael Schatz and Laucks each contributed a kill and Laucks tossed in an ace to help the comeback. Two NYU attack errors clinched the match for the Eagles.

"I think that this match got both teams ready for the playoffs," head coach Larry Bock said. "Each team had to pick themselves up off the mat at least once. In the end, this match is better than 20 prac-

continued page 14

Juniata's facilities underrated when compared to the MAC

Catherine DeCoursey

Juniata College offers a variety of facilities for its sports teams, but overall, there are several facilities that do not match up to others in its conference. The athletic department is gradually receiving the funds they need to better the sporting facilities, but changes have not been as quick as some had hoped.

Certain facilities continue to age without any renovations underway.

Kennedy Sports and Recreation Center was completed in 1983 with a pool, two gyms, a weight room, a mat room and a variety of offices. This summer, the building underwent a series of renovations that included renovated locker rooms, new bleachers, and a floor resurfacing in the main gym. The resurfacing helped rid the court of dead spots, and the new seats for the fans have been met with approval.

However, certain aspects still need renovations to be on par with facilities throughout the campus.

According to Assistant Athletic Director Greg Curley, the renovations done this summer made Kennedy more athlete- and fan-friendly, but with the growing number of athletes, Curley confessed that "we may be outgrowing Kennedy."

Curley said that one of the major differences between Juniata and other colleges in the conference is locker room space. Juniata is still in need of locker space even after the renovations this summer. Kennedy holds all of the locker space for all sports including those teams that practice at Winton Fields and Knox Stadium.

Knox Stadium, which is home to both the football and track and field teams, was erected for the 1988 season and has been ranked as one of the finest natural grass turfs in the conference. A six-lane, all-weather track encircles the football field.

Slowly, the Mid-Atlantic Conference (MAC) is moving toward turf fields to reduce the need for field maintenance and increase competitiveness. Of the 16 schools in the conference, Susquehanna University, Moravian College and Fairleigh Dickenson – College at Florham all have turf fields.

Juniata's all-weather track is six lanes and offers clean running conditions. While the track itself is still in good condition, the MAC requires that a college must have an eight lane track and a steeplechase pit in order to host a MAC competition.

Senior Justin Fritzius said, "It is very difficult for me, as a steeplechaser, to train for my event when I do not have any steeple barriers and especially no water pit. It would be like asking a baseball team to practice with no gloves. I am not trying

continued page 15

Eagles to join Centennial Conference in 2007

Robb Patty

Before the Juniata College football team traveled to Chester to take on Widener, the team learned that it would be joining a new football conference in 2007. In a press conference on Wednesday, Juniata President Dr. Thomas Kepple announced that the Eagles would be joining the Centennial Conference.

"I'm excited about the direction our school is headed," said head coach Darell Alt. "Our campus is growing and it's exciting to be a part of that."

Alt emphasized the benefits of playing against institutions similar to Juniata. Playing against student athletes in the Centennial Conference should help Juniata become more successful.

Coming off a bye week gave the team a chance heal, but also have a physical and productive week of practice in preparation for Widener. This also gave the coaching staff a chance to add to the playbook as well as make some personnel changes.

"We created a lot more competition in practice by moving some personal around," Alt said. "Defensively, we put in a nickel style of defense to try and neutralize the speed of Widener."

This was ineffective, however, as Widener registered 627 total yards of offense en route to a 52-7 victory. With the win Widener raised its record to 6-2 overall, while Juniata dropped to 0-8 overall and 0-7 in conference play.

Widener was able to control the Juniata running game as junior running back Duane Ehredt Jr. was able to tally just 56 yards on 27 carries. On the other side of the ball Widener running back Khalee Prothro ran 14 times for 191 yards and a score. Widener quarterback Mike Lomas also had a big day as the fifth year senior completed 23 of 33 passes for 342 yards and three touchdowns.

Widener was able to go into halftime with a comfortable 24-0 advantage. The home team scored 45 unanswered points before the Eagles were able to get on the scoreboard. The lone Eagle touchdown came in the fourth quarter as freshman quarterback Jay Leonard eluded pressure and was able to find sophomore wide receiver David Nicklaus for a 44 yard touchdown pass. Nicklaus enjoyed his finest game of the season as he hauled in five passes for 100 yards. Senior John Boyer also had a nice day for the Eagles as he caught six passes for 48 yards

Juniata returns to action next Saturday when the Eagles host Delaware Valley in the final home game of the season.

Field hockey season comes to a close

Eagles miss playoffs after string of overtime losses

Katie Laucks

Before heading into a weekend of non-conference games, the women's field hockey team hosted conference rival Messiah on October 20.

Messiah, the third-ranked team in the nation, and Juniata always play each other tough. Messiah is a constant post season threat and lately Juniata has given them a run for their money. This game was no different. "We had them scared," sophomore Meredith Low said.

The Eagles took Messiah into two 15-minute overtime periods. "That was their first time ever being in overtime at all this season," Low said.

Juniata fell to Messiah after regulation and both overtimes when Messiah scored on a penalty shot. Kim Wagner had five of Juniata's 12 shots and senior keeper Andrea Way had eight saves for the game.

Last Tuesday, the team battled a tough Elizabethtown team. The game had a lot on the line as Juniata needed to win to clinch a fourth spot in the conference playoffs. The Eagles battled, but were unable to pull of the win. Juniata fell to the Blue Jays, 3-1. The only goal came from Erin Smith right before half time.

Prior to the Elizabethtown game, the team traveled to Virginia on the weekend of October 22. The women took on the Generals of Washington and Lee and fought hard against tough competition and controversial calls. Unfortunately, they came up short handed.

The team fought hard to secure a lead as they again went into double overtime. Both teams remained tied and the game came down to penalty strokes, which come after two overtimes. The team to score the best out of five wins. The Generals came up big and scored three out of the five to earn the win. "It was a rough game, and there were some controversial calls," Low said.

"There was a lot of body checking, and the refs did not control the game very well," sophomore Kim Wagner said.

Elise Zimmerman had Juniata's lone goal, while keeper Andrea Way had a career-best 13 saves.

The Eagles were back in action the following day as they took on Bridgewater. The saga continued as Juniata couldn't break through Bridgewater's defenders and for the fifth consecutive time the team went into overtime. The women fought hard but could not come up with the "W".

"It's frustrating because we are playing amazing, and our record is not showing that," Wagner said.

Way had another strong showing with 14 saves for the game.

Juniata ended its season with a loss to Christopher Newport, 1-0. Once again, Juniata battled and kept the game close, but was unable to pull out a win.

The Eagles end their season with an overall record of 8-11.

Sarah Anne Wharton / Juniatian

Leslie Stern fended off her Messiah opponent with her whole body to get to the ball during the October 20th game.

Women's soccer finishes season

Heather Lockwood

With 19 games completed - six wins, twelve losses, and one tie - the women's soccer team ended its season. This was the fifth consecutive season the team had six or more wins. In the seven years prior to that stretch, the women were unable to accomplish as many wins.

Finishing their season at Widener on Saturday, October 29, the Eagles were unable to secure a win. With one goal by Lindsey Garvey in the first half, the Eagles were defeated, 3-1.

Prior to the Widener game the team took on the number one team in the nation, Messiah College. Last year the women were defeated by Messiah, 10-0. This year, the women were only defeated by three goals, with the final score of 3-0.

"I knew going into it that we were not matched up well," said head coach Scott McKenzie.

Playing under the lights for the first time this season, the team was prepared to play hard.

"We developed a new game plan that forced Messiah to be perfect," said McKenzie. Giving up all offensive strategies, the team played straight defense the entire game. Allowing Messiah to use only the wings of the field, Juniata took over the middle and caused some frustration from the other team.

"It was really the hallmark of the team and of the season. This game was like David vs. Goliath. They did not quit," said McKenzie. Compared to last year, the team was more disciplined and used its defensive strengths to its advantage.

Knowing the Messiah game was going to be a challenge, the team never thought negatively. Senior Lauren Welsh said "to us, it was just another conference game. We had goals for this game just like every other game, so we set out to meet our goals."

On October 20, the team took on Elizabethtown for its last home game of the season. In defeat, the Eagles lost to E-town 3-0. Playing tough defense and offense, the Eagles managed to hold their rivals until they neared the 66 minute of the game.

Despite the loss, goalkeeper Kerri Lawrence was unyielding to the competition as she finished the game with 13 saves.

After this loss, the Eagles were able to come back with a 2-0 victory over Villa Julie on October 22. Arriving to a field underwater, the team persevered and played to their best capabilities despite the undesirable conditions.

Scores from Nikki McLellan and Lindsey Garvey in the first half set the tone of the game for the Eagles. Playing a stiff defense in the second half, the Eagles maintained their 2-0 lead.

"I hoped our attack this season would have been more lethal and more coordinated against difficult teams. That is the biggest disappointment of the season," said McKenzie. "Our strongest aspect this year was definitely defense."

Led by Lauren Welsh and Kelly Howard, defense was the backbone of the team. Between them both, they had seven years of college soccer experience, bringing leadership and skill to a high level of play.

Even though the team is losing seniors Lauren Welsh, Maria Welch, Lindsay Garvey and Nikki McLellan, McKenzie is positive the team will be able to fill their shoes.

Next year the team plans on working on its depth. This season they only had 18 women, two of whom were injured, leaving only five substitutes. With more players, the team will be able to strengthen all aspects of play.

They will also continue to work on their system. Major components of this system are speed and ball control. After this season, the team knows what works for them. It is only a matter of practice and hard-work.

During the off-season the women plan to be in the weight room. During the season the women worked with strength coach Doug Smith two days a week for 45-minutes, and will continue a workout program with him during the winter and spring months.

One last victory

Men's soccer improves as season ends

Kim Wagner

The Juniata men's 2005 soccer season has come to an end. The Eagles ended their season with a record of 6-12-1 overall and 1-5-1 in the conference.

On October 29 the men finished the season with a win against Widener. This win kept Widener from entering the conference playoffs.

Kenny Wiles scored the only goal in the match.

The Eagles had a combined shutout with Tim Penrod, Mark Guthridge, and Nathan Pugh.

Junior goalkeeper Tim Penrod said, "We knew it was the last time for the four [seniors] of us to play together and we couldn't imagine going out any other way."

Tough competition occurred on October 26 for the Eagles in a match against Messiah, who is currently the number one ranked team in the nation. The men were defeated 2-0, an improvement from last year's 10-0 loss. Both goals were scored in the first half, resulting in a shutout by Guthridge in the second half.

"We showed up not caring what their rank was," said Penrod. "We treated them like they were another group of 11 guys playing soccer and we didn't back down."

The Eagles took on Elizabethtown who is tied for first in the conference on October 19. They put up a tough fight, losing 2-1., after losing 11-0 the year before. The lone goal for the Eagles was scored by Josh Cady, his fourth goal of the season.

Head coach Scott McKenzie said, "We outplayed them. Everybody knew who played the better game that day."

The men still carried the game even with a man down for 25 minutes as the result of a card to freshmen midfielder Bryan Hess. Hess was penalized after retaliating over a call he believed should have been made.

According to McKenzie, Elizabethtown did not consider the men a rival before the game. He said that since their performance that day Elizabethtown will no longer dismiss them.

This match prepared them to take on non-conference Villa Julie in Maryland. The Eagles avenged last years' loss by winning 3-0. All three goals were again scored by Josh Cady. McKenzie said, "The men enjoyed watching another team struggle against them."

Always trying to improve, the team made big strides in all of its recent games. The team will try to use its improvements as momentum for next year's season.

Volleyball

continued from page 12

tices because you go between and playing your B and D games and have to adjust."

Senior Abby Leonard said, "Anytime you can go five games, it's a valuable experience, especially with a team like New York. As we go on, the level of competition is only going to increase so the matches will be longer and more intense. That match definitely helped us prepare for the playoffs."

Four Eagles finished with double-figure kills to lead the balanced Juniata offensive attack. Laucks led the way with 15 kills, while Schatz and junior Stephanie Kines each had 14. Thomas also contributed 13 kills. Freshman setter Jess Ritchey dished out a season-high 55 assists, while sophomore Tara McMinn led all players with 21 digs.

After knocking off NYU, Juniata played another ranked opponent at Emory University.

"The Emory match will be a wonderful test. They are ranked third nationally, which is well deserved, and we get them on their court," Bock said. "They are still pretty mad about having to travel here for last season's NCAA quarterfinal match."

The Eagles passed this test as they defeated Emory in three games, 30-27, 30-27, and 30-26. Schatz and Thomas each finished with 15 kills, while Ritchey served four aces. Defensively, McMinn added 20 digs and Kines led the Eagles with 4 blocks.

As the Eagles head into the Commonwealth Conference playoffs, Bock said that there are some things that they will continue to improve on. "Technically and tactically, we have some blocking and defensive issues to work on," Bock said. "Although, the entire success of the team rests on passing and digging, and we will work on those as well."

The Commonwealth championship is scheduled for November 5.

Blow up the BCS

Once and for all, let's do away with the dumbest thing in sports

Tommy McConnell

Last week, USC lost the number one ranking in the nation to Texas.

Now, anyone who even casually follows football had to have done a double take. How is USC not number one? Texas is a nice team, but this is the defending back-to-back national champions we're talking about, riding a 30-game winning streak and probably capable of winning the NFC North right now.

So why isn't USC atop the standings? The reason is simple: the Bowl Championship Series – the formula NCAA football uses to decide the best teams in the nation – is stupid. Pretty well though out argument, huh?

Listen, nothing is more important in sports than the champion. Nothing. Not money, stats, awards – not even cheerleaders. If you aren't going to crown a champion, and do it right, what is the point of even playing?

The system is so screwed up that fans have basically given up on changing it. They have become resigned to the fact that there is going to be a national championship game, it is probably going to be entertaining, and how the two teams got to that game is basically irrelevant.

Well, that's ridiculous. And since I know how much pull a sports writer for a bi-weekly newspaper at a small college in the middle of rural Pennsylvania has, I decided to do something about it.

To me, this is one of the biggest issues in sports, but the only time a fan base ever gets upset about it is when its team is left out (which, under the BCS, is pretty much every year). Well, instead of crying only when the NCAA jobs your team, why not change the system now? It wouldn't even be that hard, really.

Here's how it can be done.

First things first: blow up the BCS.

There are countless reasons why, but this latest debacle sums up the BCS beautifully. Clearly, any system that has Texas ahead of USC is wrong. It's not even up for debate. No one can rationally argue that Texas is a better team that USC right now. I'm not saying that if the two played on a neutral field, Texas couldn't pull off some kind of miracle upset. But USC hasn't lost in 30 games. They toy with teams. They have the two leading candidates for the Heisman Trophy. It's so easy to see they are better, its an embarrassment the BCS has it any other way.

Once the BCS is kaput (I don't know if I'm more stunned that Texas is ranked ahead of USC or that "kaput" is actually a word), institute a playoff. Four teams. That's all you need.

A playoff system brings with it some obvious questions. And since I like making little bold headlines, here they are, in no particular order.

How do you pick the top four teams? Average the Associated Press Poll with the Coach's Poll. That's it. No more computers, no more Harris Interactive Poll, just ask the people watching the games.

The AP is paid to cover the college games. This is their profession. If they can't decide who is worthy, then a computer certainly can't. And as long as the votes in the Coach's Poll are made public, coaches can't openly screw over a team they dislike.

Why only four teams? First, so only a week is added to the season. Second, eight is way too many.

With eight teams, a team with two, maybe three losses will get the eighth seed. With that eighth seed comes the chance to play the best team in the nation. They don't deserve that chance. If a team can't even win its own conference, it doesn't deserve the opportunity to play an undefeated team on a neutral field.

What happens to the four major bowls? With a playoff, there is a fear that the major bowls will become irrelevant. Well, I got news for you: they already are. With the exception of the national championship game, all the others are meaningless. Sure, they're fun to watch, but they ultimately mean nothing. Do you think anyone outside of Pittsburgh or Provo cared about the 2005 Fiesta Bowl?

Why not restore some importance to the bowl games? Use them as the sites for the playoffs games. The national championship game is currently rotated among the four major bowls – the Fiesta, Sugar, Rose and Orange. Each bowl gets to host the national championship once every four years, while the other three years it hosts meaningless games.

Under this system, a bowl would host a meaningless game only once every four years. So, for example, the Fiesta and the Sugar host the semifinals this year – the No. 1 team vs. the No. 4 team in the Fiesta, the No. 2 vs. the No. 3 in the Sugar. The winners meet up to decide the national champion in the Rose. The Orange can invite whomever they want to play in their game.

The next season, the Orange gets the national championship since they were left out the year before, and the other games are rotated accordingly.

Deep down, does anyone really care about the bowls? Um…no. Have you ever heard anyone say, "No! They can't get rid of the bowls! What if I can't see the Orange Bowl this year?!?! And if I can't see that Rose Bowl parade, I don't even see the point of living!" Of course not. No one really cares. I don't see why we keep pretending we do.

Since the bowls exist to make money, won't this cost them profits? Honestly, I'm not an economics major, but I don't see how they couldn't make more money this way. Instead of one great game and three meaningless ones, there are now three very meaningful games. Wouldn't more people watch a game that mattered than basically a glorified exhibition game? I think they would.

Did I just read a thousand words on something that probably won't change in my lifetime, anyways? Yes, you did.

Sports facilities

continued from page 12

to say that because of our situation we have a major disadvantage, because we still have a lot of the conference's top competitors here at Juniata."

Juniata offers its athletes a program no other school in the conference does. It is run by strength coach Doug Smith in Juniata's weight room. Smith helps keep teams in shape year-round to maintain competitiveness season to season. No other school in the conference has a position comparable to Smith's.

And according to Curley, the Men's baseball field is currently on par with the rest of the conference. Over the past year, the field received improvements on its grass, fence, the dugouts and the bullpens, as well as the addition of a warning track.

According to senior Eric Bridenbaugh, "The baseball field needed the renovations that were made over the past year just to make the field safe to play on."

While the baseball field has had the improvements it has needed, the softball fields are still in need of some renovations. When the softball field was moved from East Fields to its current location four years ago, the hope was the new field would not wear out as fast with fewer people using it. But currently the field has a lot of problems including flooding and poor draining. This often postpones games in the spring, cramming the end of the year with more games than anticipated.

The Winton Fields also have problems with water and game safety. Winton Fields were built approximately five years ago and is still experiencing problems. Like the football field, they are constantly used and need continual maintenance.

Natural grass fields, when they get wet, become extremely dangerous and non-playable. Often, this means that games will be canceled even if the rain ends by game time.

Men and women's soccer also feels the effects of lack of space since there is only one field between the two teams. With no lights for night practices, the teams are limited to an daylight-only practice schedule. On several occasions the two teams have had to split the field in order to practice before dark. A second field would open more space for practice.

The Juniata tennis teams have two courts for its practice, but only one is repetitively used. The lower courts, which are located by Ellis and are equipped with lights, are considered to be one of the best sets of courts in the conference. The upper courts are used by fifth and sixth single players and are cracked and dipped in places that make competition unequal.

According to David Bullock, a 2005 graduate and former captain of the men's tennis team, "The school should really look into renovating the upper courts, especially with the recent success of both the men's and women's teams, because at the moment the courts are not equal with other courts in the conference."

Juniata has several facilities that match up favorably with those throughout the conference. However, renovations may be needed to others before they can be compared in the same light.

THE RANDOM ELEVEN

Matt Russell

R11 vs. Fashion: During a newspaper meeting, one of the staff members said the buzz is that the Fashion column had become the "new Random Eleven." I guess I'll do what companies do with something new and popular: co-opt it to improve your own ratings. I've noticed my own fashion trend on campus lately: crutches. Wooden, metal, decorated, or padded, they are increasing in frequency on campus and all make their own little statement. I could be off base, but I think that statement has something to do with Juniata's athletic programs…

Stalkertease: I recently stalkernet-ed a female freshman (it was work-related, hush) and got a bit of surprise. Apparently, she chose a strapless shirt that day… either that, or she was giving the JCPD a show. I guess it's a fifty-fifty bet.

Sustainable survey: In one of my classes, we took a 60-question survey on campus sustainability. One of the questions asked if you frequently printed off readings, and several others referenced paper usage. There are 45 people in that class, and the survey was 5 pages. Question 61: How many reams of paper do you think we used on this survey?

Fiscal policy: As I listened to the details of the Student Government's budget at the last Senate meeting, something occurred to me. Why doesn't the government try some deficit spending? We could get more done and stimulate the local economy at the same time. We could finance it by selling assets to other schools like Elizabethtown and Allegheny. Yeah, this could work!

Silly mascot: The organizers of the Special Olympics decided that the Juniata Eagle mascot was "too childish" for the event. Our mascot is **childish**? Instead, they had *plastic bowling pins and cookie decorations*! I must have missed those at the Athens Games.

9:33pm: RA e-mails my floor asking for a Halloween decoration theme idea by the following day.
9:37pm: RA e-mails us that the decision was made for a Dr. Seuss theme. I wonder if she counted the seconds between sending them, "one fish, two fish…"

Overheard in Baker: "If I ever had to get my stomach pumped, I'd stop drinking. Well, at least for a week." Yeah, you should pace yourself. Two pumpings a week would be inconvenient.

Indiscriminate ticketing: I parked in the staff-only lot next to BAC the other night; I do this fairly frequently in the evenings. This time, I got a ticket. I manage a larger staff than Security and probably put it more hours than some of their part-time staff, **but get fined 2 hours of pay for parking next to my office?** That's just damn ridiculous.

Our Lady Peace: I've been foiled! They invited a band that my girlfriend likes, so I've been compelled to buy tickets. I smell a conspiracy. I can say no more.

OSA mined: There were mine field warnings posted around campus to raise awareness for the global threat they pose. The signs noted that white stones strewn about campus represented safe areas, while the red ones were for active mine fields. The OSA's director went to cut across the lawn by one of these signs. As she stepped over a red stone, a car alarm went off nearby. I would've paid admission.

Blue Army decorates: Did you notice Facilities dressed up South Hall for Halloween? Yeah, they put fake cobwebs around all the exterior lights to make it look really creepy, complete with plastic spiders. Some of them must've been battery powered, because I saw them moving around. Oh, wait…

Student union update

I told you I'd report back.

Last Thursday, a proposal was presented to the Senate calling for Cyber Café, OSA's lobby area, and the Cream Room in Ellis Hall to be turned into a combined student union (details on the forums).

The Senate voted to support the proposal, and a special project funding proposal has been submitted to the Budget Team, co-sponsored by OSA and Student Government. Ten other departments and clubs also officially support the proposal.

I'm chairing a Senate Committee to finalize details, get additional funding, and rally student support. A student union by spring semester is the goal, and we're well on our way.

Trivial Revolutions

Rats, Juniata's humanty's caught hold

Genna R. Welsh

Ah, yes, autumn has arrived at Juniata, with its falling leaves, trick-or-treaters and crisp, cool air. But for all the wonder that autumn fills us with, it brings along an alarming element as well. With autumn comes the near-rabid craziness in Juniata's animals.

"Two acorns nearly hit kids in an outdoor class yesterday," one JC student remarked.

Using acorns as their ammunition, our pesky little squirrels have attacked me more than once. The first time, one was desperately racing toward a tree and up the trunk as I passed under it. Just as I had gotten out from under the tree, a large acorn dropped behind me. That time, the squirrel bomber narrowly missed its target, but apparently I was lucky to escape unscathed. Many Juniata students claim to have been thumped on the skull by a falling acorn, courtesy of our furry little campus friends.

But I must admit, these adorable little squirrels entertain us. They hide their nuts as if they are paranoid that a human's purpose on earth is to steal a squirrel's winter sustenance. To this day, I have yet to see a student steal a squirrel's nut, no matter how sick students are of Baker's dining choices. So we, as Juniatians, in our academic style, would conclude that the squirrel's behavior is NOT learned.

Lately, the squirrel's food pantry is being saved by the promotions Muddy Run has recently held to try and improve JC food morale. Students seem unconvinced, and this seems to be increasing squirrel paranoia.

But of late, my chief concerns are regarding the other creatures invading my world, creatures simply in search of a warmer abode.

Judging against "warm," the Pink Palace must be red hot because, well, we've got rats. That's right, furry little potentially plague-spreading rats. Many of you may now be horrified at this prospect. The time of year combined with the ready supply of crumbs on any college-owned apartment floor easily explains why they arrived, but now that over a week has passed sharing our apartment with these garbage-investigating and then garbage-ingesting guests, I've become a tad bit annoyed.

Last week, I arrived home to find the contents of our under-sink area moved into our living room so that campus facilities could patch potential "rat holes."

Friday night, 11:45 p.m.: Rat-hole patching deemed unsuccessful. A strange scratching noise and the collision of cables emanates from our room. Upon investigation, we were able to conclude that the rats were, in fact, inside the wall. Disappointed, we gave up our hunt and resolved there was nothing to do.

Sunday morning, 8:05 a.m.: Scampering feet sound from somewhere in the bathroom. When I move to get up, the sounds are gone. Perhaps the rats should become like so many Juniatians. "Go abroad, little rats. It's the cool new thing to do."

Later Sunday morning, approximately 11:00 a.m.: I hear the sound of feet scampering just above my head, which seems to stop just at the pillow of my top bunk bed. Now, I know Dean Clarkson advocates for the college and community to share Huntingdon, but these little neighbors are too close for comfort.

I surmise that by the time you are reading this, they will have come through the wall. It doesn't take uncommon sense to see that these animals are simply seeking food and shelter, but they still pose a real hazard. After all, their potential to spread disease is nearly as powerful as a Good Hall women's restroom almost always without of soap.

Fear not, ye Juniatians, many of you would likely consider yourselves advocates of animals, even such small, potentially viral animals. I won't kill them, despite the shoe I would've turned upon them these past weeks. I'll give you a recent example as proof.

Walking through the library parking lot a few days ago, I noticed a squirrel drinking out of the rain puddle. I couldn't hold myself back from saying, "Don't drink that! It's toxic runoff." I would do the same for our little rats. Oh, the humanity that Juniata has imparted in me.

Oval Opus

continued from page 9

Each of the songs sounded like a cheap imitation of bands with whom Oval Opus had previously shared the stage (Sister Hazel, O.A.R. and Jason Mraz). The guitar riffs seemed to be stolen from John Mayer and Josh Kelley. No part of the show seemed to be original or heartfelt; it makes me wonder why they are really making music. Then again, I guess the world needs opening acts too, but it begs the question, "How did they ever get their own tour?"

The highlight of the performance, for many, seemed to be the end, as the crowd quickly disbanded after JAB announced the winners of the Our Lady Peace tickets. Very few people stayed behind to get autographs and talk to the band. I don't blame them: I left ASAP too!

There were definitely better ways to spend a Saturday night. Maybe I should learn to knit or line dance … anything has to be better than the mediocrity of an Oval Opus concert!

JUNIATIAN

HUNTINGDON, PENNSYLVANIA

NOVEMBER 17, 2005 | JUNIATA COLLEGE | VOLUME 87, ISSUE 5

Student union plan gathers wide support

Jessica Ocampo

Juniata has few welcoming places for students and clubs to meet and socialize. There is often a long pause when students ask each other, "Where should we meet?" But lately there has been a growing movement to change all this. A proposal has been made to create a new student union. The top floor of Ellis may be in for a makeover.

Matt Russell, a senior, asked for special project money from the administration's budget team to help fund the union. The budget team's decision was still pending as of press time.

A formal presentation will also be made to the Student Senate on Nov. 17 to ask for partial funding of the union project, specifically to remodel the Cream Room. The new student union would take up the entire top floor and would cost a grand total of $47,000. It is competitive for funding, yet lots of support is being thrown behind this effort.

Sophomore Ryan Conrad said, "This will be a great coming together for all of us."

What would the money be going toward? Staci Weber, Director of Student Activities, said, "The proposal calls for an increase of 'student space' which is extremely important in building community

continued page 3

Student research focus of one-day spring recess

Professor hopes for "nerdy Mountain Day," others question if it's worth the time

J. Atkins

Faculty recently approved the creation of a Research Day to promote campus-wide involvement with the student work that goes on at Juniata. One day of the spring semester, classes will be canceled, and students involved in research will present their work. With no classes in the way, more people can go to support and give helping hands. More members of the faculty will be able to help judge and more students will be able to support technical aspects.

The idea of Research Day was proposed by Jack Barlow, professor of politics, and David Sowell, professor of history. Research Day will be a development off of the Tri-Beta Research Symposium that is held every semester, but this time, no classes should interfere with both students and faculty attending the presentations. Because there will be no classes, it is up to each professor to either require or suggest that their classes to go to the presentations; but of course every professor will choose differently.

The first problem that may arise is if students aren't told to go, are they really going to go? It sure sounds like a planned Mountain Day even if students have to go and just listen. No work usually equals social activities the night before.

Sowell acknowledged that many students will certainly approach this like another Mountain Day, but he also said that, "If students can respond responsibly, it will be

continued page 3

Holly B. Brown / Juniatian

Students like Heather Hassel and Katey Glunt, who research with Dr. Buonaccorsi, will be able to present their work at Research Day.

Sex assault meetings postponed

Jessica Ocampo

Members of Juniata's Health & Wellness team and Residential Life planned to hold meetings for Juniata residents on sexual assault. But few students showed up.

Patricia Hunter, College Counselor, Denise Showalter, Sexual Assault Counselor for the Huntingdon House battered women's shetler, and Kerry Fagan, Resident Director, are three of the eight people who have helped plan the sexual assault meetings for the Juniata community. The whole group consists of faculty, administration, and students, and Hunter was credited with being the main organizer. According to the original

INSIDE:

Rethinking IA

The JC Bubble

Serious crimes may go unreported

Sarah Anne Wharton

At Juniata, students exist – for the most part – in a safe and peaceful community. In the Nov. 3 Juniatian, readers learned that the reported crime statistics here are lower than at other similar schools. There is not much violence, and people usually get along.

Lately, however, members of the JC community – from the assistant dean to students, resident assistants and security officers – have been wondering about the *un*reported crimes on campus and whether or not they affect how safe Juniata actually is. Is silence hiding crime?

"Anywhere, there's always an issue of unreported crime," said Dan Cook-Huffman, assistant dean of students. "It doesn't get reported, but it exists."

Among other things, unreported crimes include petty theft or underage drinking. Administrators worry, though, about the more serious offenses that do not get talked about: fights, drugs, and most of all, sexual assaults. Sexual offenses, in the form of rape, date rape, unwanted sexual aggression, etc., especially concern Cook-Huffman. A fair number of sexual assaults probably take place, he said, but crimes stats don't reflect that because it is underreported.

continued page 4

'Helicopter parents' hover too close

Brittany Crawford

The delicate balance between parents being involved versus being too involved in a student's life can be a tricky line to walk. "Helicopter parents," as they are sometimes called, hover around their children. Dan Cook-Huffman, assistant dean of students, defined them as parents who are over-involved in students' lives.

Senior Rebecca Jankowski and junior Claire Dempsey, both RAs at Juniata, agreed that helicopter parents worry too much about their kids and can't let go. This trend of helicopter parents and their need to be involved in their students' lives has grown, especially with freshman students – and despite what may be parents' best wishes, they can do more harm than good.

Juniata is not the only college seeing this trend. Other schools have noticed an increase in over-involved parents.

Recent studies find that helicopter parents could be causing major problems. The Seattle Post-Intelligencer's report on how "echo-boomers" (children of baby boomers) are too pressured and managed was quoted on "60 Minutes."

In the Post-Intelligencer, Mel Levine, a professor of pediatrics at the University of North Carolina Medical School located in Chapel Hill, said "Today's children may well shatter."

He explained, "Children are being coddled and protected to a

continued page 5

Visiting artist illustrates digital media, connects art and new technology

Nate Drenner

Recently passersby may have noticed artwork hanging on a second story window of the von Liebig Center for Science.

Except that it was not really hanging.

Visiting artist Kenneth A. Huff projected images from his computer into the window of his temporary office in the science building. Huff works exclusively in computer-generated digital art and spent the past two weeks at Juniata, giving lectures and participating in classes. He helped show the growing connection between art and technology, and he encouraged discussion of issues in the digital media field.

Huff's two-week tenure on campus came during the same year that the College added a digital media POE to its repertoire. The new program combines courses from the art, communications and information technology departments.

Communication professor Donna Weimer initiated the idea of bringing Huff to campus. Arranging the visit was part of her work while on sabbatical last year. "In an effort to highlight an area of IT studies that students are very interested in, I proposed that we celebrate the new POE with a guest speaker/artist who combines IT with art," wrote Weimer in her sabbatical report.

In terms of this interdisciplinary approach, at least, it may be no coincidence that Huff's office at Juniata was in a science center. Many of his works are inspired by patterns in nature and in mathematics. Huff's schedule included speaking at a mathematics colloquium and participating in information technology and art management courses.

And part of Huff's role was to introduce technology and digital media art to the campus. He gave two public lectures: "Currents in New Media Art" on Nov. 8 and "Organic Constructions: The Art of Kenneth A. Huff" on Nov. 16.

"I tremendously enjoyed the [new media] lecture by Mr. Huff," said freshman digital media student Wylie Earnhart. "This is definitely a new form of art. It is living art."

At the new media lecture, Huff showed examples of other artists' works in the new field. They ranged from a machine that used magnets to create zen-like patterns in sand to computer software that generates interlacing designs to a machine that pulled text from the Internet and spoke it aloud.

These pieces are very different from a traditional painting or sculpture. During discussion afterward, one student said, "I understand that we're coming into a digital age, but it's very hard for me to look at this as art."

Huff responded, "To me, everything that I've shown is very much art."

He continued, "As a practitioner, there certainly are things that I see that I sometimes question 'Is this art or is it more of a technical exercise?' and I think that's something that the medium struggles with. But I think it's a very short leap from technical exercise to artistic creation. … To me, a work of art is a work of art by definition when the person creating it has the intent to create a piece of art."

The dialogue continued with issues in the emerging digital art field, many of which are issues with technology in general. For one, the rapid pace of development could render some artwork obsolete in coming years when the technology it was created on is no longer widely available.

And the cost of technology can be prohibitive. Huff continued, "For what you spend on a laptop, you can buy a heck of a lot of canvas and paintbrushes."

Yet at the same time, he claimed that technology can be inclusive since anyone who owns a computer could potentially participate in the art.

Inclusiveness is central to some new media artists who practice open source art. Like open source software, the creator makes the code that runs his or her creation available for download from the Internet. The artist intends for others to change and share the artwork.

Huff does not practice open source art. Instead, he typically prints and signs limited editions.

He works primarily in Maya, a 3D animation computer program, though he also wrote some custom software to aid in the creation of his works. The still images that make up a large part of his work are single frames of his 3D constructs. Recently, though, Huff has begun to concentrate on animated works, which he calls time-based pieces.

His website, www.itgoesboing.com, features many of his digital works.

Huff's visit was supported primarily by the Edwin A. & Susan R. Malloy Lectureship fund. This fund is not for a specific lecture each year like the Will Judy Lectureship. Rather it is a pool of money that is flexible to arrange special events, according to Assistant Provost Jim Tuten.

And this year the focus was on new art.

"Throughout the ages, artists have taken whatever is available to them," said Huff, "and they've made art with it, be it a piece of charcoal … or a painting, photography, all of these things up to the current technologies now. I think it's incumbent upon artists to react to their environment."

Holly B. Brown / Juniatian

Visiting artist Ken Huff made an appearance in Chad Herzog's art management class. Huff specializes in computer-generated digital art.

A conversation with Ken Huff

Do you see a connection between science and art?

"Absolutely. I draw most of my inspiration from patterns and forms in nature. There are huge blocks of work that have been directly inspired by ideas in mathematics and sciences. One of the other things I'm excited to be able to do while I'm here is to have some time scheduled on one of the electron microscopes. I never really want to incorporate acquired imagery directly in the work, but it's reference material for me and a source of inspiration for me."

What is new media art?

"Artwork that directly incorporates technology not just in the creation of the work but in the display; in the presentation of the work there's technology involved.

"On a technical level, the print work that I create, even though I create the images entirely on the computer, is not technically new media. It could be called digital media, which is a broader term. But the animated pieces, if I'm playing them back directly from a computer, then it's starting to cross into new media. If I add an interactive element, then it's definitely new media."

What are some benefits to using a computer to create art?

"I don't think it's better or worse [than traditional art]. … For me, I'm comfortable with the technology, and so it was a natural thing for me to incorporate into my work. I think that one of the advantages is that because in the digital world everything is represented as numbers, you can use source material that didn't necessarily originate as visual information. So for instance, you can create visual imagery from sound waves or from GPS data or from information from the human genome project. That is very exciting, to be able to show patterns or explore those things in ways they couldn't be explored before."

Do you have advice for students looking to work in digital art?

"If it's going to have a visual component to it, I would definitely recommend taking art classes. The concepts you use with traditional mediums … all of those things come into play with this new medium; it's just a different set of tools.

"I would definitely emphasize focusing on the intent behind the work, having a strong idea and a strong intent behind what you're doing and not just relying on the glamour and the sexiness of the new technology. I think for something to be lasting, it has to still have a very strong intent behind it because it's just a new set of tools. If you use the latest tools, and you don't do something that has intent, it's going to be interesting for a moment, but it won't have a lasting impact, and I think it's very important to focus on ideas and intent and have the technology be subservient to those ideas and not the other way around."

Research Day planned

continued from page 1

successful. … We have to acknowledge the importance of the work you as students are doing."

Promoting the no classes idea, Heather Hassel, a senior, said "Usually, I don't have time to see my peers' work. So, it would be good to have a day free to catch a quick review of what the other research students have been doing this year."

A second question is: Does an uninterested person at such an event really count as someone being there?

Many students feel that their research is a bit pointless and that presenting their findings to campus would be a waste of time. Some other students who have conducted long-term research seem to enjoy what they are doing, but feel that presenting to an audience that is ignorant of their topics and are disinterested is even a bigger waste of their time and effort.

Professor Cynthia Merriwether-DeVries, committee chair of the Institutional Review Board, hopes that Research Day will turn into "a nerdy Mountain Day" that will help students and especially faculty members get involved in the research conducted on campus. DeVries is optimistic that faculty will encourage attendance to the event and not just cancel classes altogether.

Yet another problem arises: will anyone who isn't required to actually want to present? Students who present at the National Conference on Undergraduate Research (NCUR) must present with Tri-Beta, and a number of other students present as well. However, the challenge is being left out there for other students to present, especially those in the arts. The challenge is to propose a way to present your dedication and hard work to others in a 15 minute or less session. Some have suggested one-act plays or possibly short skits for those in theatre.

"I would voluntarily present… it's really just a good practice for the real world or graduate school," said Levi Blazer, a recent graduate of Juniata.

Blazer helped to organize the Tri-Beta Research Symposium last year. He supports the idea of Research Day and feels that it will advance research from all disciplines. He also feels that it could be a useful way for the music and theatre departments to show off their hard work.

Blazer said, "By having a Research Day, Juniata is stepping leaps and bounds ahead in uniting the research fronts of all departments and encouraging inter-departmental collaboration in research, something that the Tri-Beta Research Symposium has tried to do for years."

During the interview with Sowell, the question "will there be any 'big shots' around for students to show their work to?" was brought up.

Sowell replied that, "We will be able to think that creatively now," and went on to discuss briefly the benefits of possibly inviting admissions officers from graduate schools of students' choices to watch presentations.

Research Day is not completely planned yet, but a committee will form to set everything up. Hopes are high that students will take an interest in what their fellow classmates are doing and that faculty will help to acknowledge the importance of their work as well. A successful Research Day would be a statement of the value of research at Juniata.

Student union gathers support

continued from page 1

within the student body, increasing student morale and providing students with socializing space outside their residence halls."

The proposal has not yet been approved, but it would see the following changes in Ellis:

The new student union would be accessible 24-7, which means the Cyber Café would be remodeled. Of the $47,000, it is estimated that $16,500 would be allotted for the Cyber Café remodeling. There would still be a study space with new computers complete with LCD monitors and work tables. The furniture would be reorganized and couches and lounge chairs would be added. The pool table would also be left there. Most work tables would be moved to one side to make room for a permanent stage to support coffee houses and bands.

Games would mainly be kept in the Cream Room, which would be re-named the Game Parlor. This room would cost $16,300. The Game Parlor would get new carpets, curtains, paint and couches. Another pool table, foosball and maybe air hockey would be added. Two widescreen, flat TVs would be used for movies and gaming, and would be complete with a gaming network.

The Office of Student Activities would also be carpeted and be dubbed the Screening Room. The cost is drafted at $14,600. It would have a permanent large screen, digital projector, speakers and sofas. It would be reserved by anyone to satisfy movie-viewing needs.

The Ballroom would be left alone and open to reserved student usage. It would not be redone because it contributes to campus events like the blood drive, Russell said. It is a versatile space.

More than a dozen clubs and offices support the proposal

Russell said this project should take a short amount of time to complete. Students hope that the project is approved by next semester with some of the smaller improvements begun with funds provided by Student Government, Campus Technology Services and other offices on campus. Major renovations would have to be done over the summer when any special funding from the budget team would become available. But Russell would like "the seniors to see what they have supported and be able to enjoy it."

The senior class is one of the large number of supporters for this project. Administrative support is being drawn from Campus Technology Services, Office of Student Activities, Conferences & Events and Residential Life. Student organizations who share support are Student Government, Leaders in Motion, Art Alliance, Gaming Club, JCrew, Future Technology Professionals and JAB.

Holly Brown, President of the Art Alliance, said in the plan proposal, "We as students have no place to call our own and to have unlimited access to. A student union would provide us with a comfortable hang out place, a good work environment, a place to hold student meetings, and an area on campus to promote socialization of students and their concerns."

With all this support, Russell thinks this project will go to the top of the agenda. Weber said, "Leaders in Motion, Matt Russell, and Student Senate are working very hard and doing an amazing job on this proposal. Their energy is contagious and will produce wondrous outcomes."

Snapshot Stories:

Model UN & Madrigal line

Holly B. Brown / Juniatian

On November 17, Juniata College hosted its 7th annual Model UN conference. Around 200 high school students came to discuss and debate world issues and hypothetical solutions to specific global problems. Students in Professor Nagengast's Model UN class act as chairmen, technology assistants and administrators for the event.

Holly B. Brown / Juniatian

Camping for Madrigal tickets began at 4:03 a.m. Sunday morning. Dedicated students will live, eat and sleep in these tents until Saturday, when tickets for the dance and dinner go on sale. The makeshift community is a common sight outside of Ellis every year at this time.

Sex assault meetings postponed

continued from page 1

plans, everyone in the group would lead one or two meetings and hold a discussion with students.

The first meeting was in Lesher, where there was a turnout of about 20 people. The next meeting in Sherwood had three people attend. No one came to the Sunderland meeting. The group decided to postpone the rest of the meetings to figure out a different strategy.

Fagan said that the lack of participation did not mean they were canceling the meetings.

The group attributed the low attendance rate to two main factors.

The first was that the meetings were optional. The group agreed there was not a big enough incentive for students to participate. With students in "crunch time," as Daniel Cook-Huffman, assistant dean of students, said, students were not looking for extra meetings to attend. Showalter, not far removed from the college scene, said that she understands a student's perspective. If a student has a choice of a study break or a meeting, they will choose the break.

The next factor in low turnout was the subject matter. Fagan said, "It is never an easy topic to discuss."

Nevertheless, Showalter and Fagan emphasized the importance of this addressing sexual assault. For females, Showalter said "It is important because college females are four times more likely to be sexually assaulted or raped than at any other point in their lives."

Cook-Huffman also stressed the importance for males by showing a September 1990 issue of "Glamour." He was pictured in an article about Syracuse University called "Campus Rape." He was carrying a sign saying "Rape is a man's issue." He has talked with many fraternities about a male's involvement in sexual assault and rape. Cook-Huffman was one of the presenters in Juniata's group this year.

Some ideas that have been proposed to raise attendance are to give bigger incentives for attending and make the meetings at less stressful times in the year. There is also talk of making it mandatory by coordinating it with Residential Life. Additionally these talks might be required by CWS labs next year, Cook-Huffman said.

Ryan Richards, senior and part of the team, would like to see an edgy speaker like Joseph Weinberg come to Juniata again. Richards said, "He came here four years ago and was well received. I would like to transform Juniata culture and the way we do relationships."

The group had originally advertised using flyers and RAs to "strongly encourage" attendance, said Fagan. Trying to keep the groups small and personal, they only advertised to specific dorms and classes for certain nights. The freshmen were talked to first. The upper classes would be next. Fagan said, "This was to keep a comfortable environment where students would feel willing to share."

The group also has a foundation on which to build. For the future, they will be ready to give presentations earlier and will have an idea of what works and what does not.

Despite the low turnout, Cook-Huffman said that it was not a failure. A long time activist, he said, "If you judge success by how many people come, you will always be disappointed. Rather be interested in the quality of the presentation and what happens in it."

Serious crimes may go unreported

continued from page 1

Students may choose not to speak out about incidents for many reasons. They may be afraid of getting in trouble or of getting someone else in trouble. They may not think a crime is serious enough to be reported. Or, they may be embarrassed about being the victim of a crime, and so do not follow through on a report.

Senior Kari Dundore believes that students don't report crimes on many different grounds. "Victims don't report the crimes because they don't want to have to deal with the hassle, be known, or because of the fact that they themselves were either intoxicated or doing something they weren't supposed to be doing," she said. Also, maybe they don't know what they should do.

Senior Joe Wills, an RA in Tussey, adds another reason. "People are afraid to call the RA or security so they don't get a friend in trouble," he said.

Rocco Panosetti, Jr., Director of Campus Safety and Security, thinks this unreported crime phenomenon is problematic for many reasons. Unreported crimes are unknown crimes, and therefore not much can be done about them.

"The only way we can protect students is if they tell us," he said.

But a number of students do not tell, and crimes remain unspoken.

Junior Claire Dempsey, the RA of South's second floor, said that she has had experiences with students not wanting to follow through on crimes perpetrated against them and wanting to remain anonymous. "It's happened a couple of times that they don't want their names disclosed," she said. They do not tell because they do not want to be victimized, and do not want to deal with their aggressors.

"They have to see these people on campus," Dempsey said.

While keeping the identities of victims and perpetrators secret creates difficulty in reporting crimes, nothing can be done due to confidentiality issues and guaranteed rights of the victim, said Panosetti. If the injured party does not want to follow through, the incident is reported anonymously, but nothing is resolved.

"It doesn't happen a lot, but every now and again, someone will say, 'I don't want anything done about it,'" Panosetti said. And RAs, security officers and the dean must respect the student's decision.

Cook-Huffman empathizes with students who may not want to report crimes, but he thinks it is important to do so nonetheless. "On the one hand, I understand not wanting to rock the boat," he said. "But on the other hand, it may be something serious enough that it's a threat to other people." In that case, reporting is always the better option.

The dean and security offices always encourage students to report any incidents, they say. A sheet outside the security office even says that "those institutions which choose to embrace a culture of non-disclosure" deny communities a true account of the dangers that face them.

"Students have a sense that Juniata is a pretty great place, and it is," said Cook-Huffman. The security is strong and the crime rate is low. But administrators maintain that reporting all crime is vital to keep campus "a pretty great place."

Roving Reporter

"If you saw a crime on campus, would you report it to security? Do you feel safe here at Juniata?"

"A crime actually did happen to me and I reported it right away. I think all crimes should be reported even though we're a small school."
- Muhammad Jami, senior

"First of all, I'm not too concerned about serious crimes on campus. I think occasionally security takes its job too seriously, but if a serious crime did happen I'd say report it immediately."
- Quinn Daly, junior

"I think I might be a little reluctant because it is a small campus – my intention would not be to rat anyone out. But I do feel safe with security on campus."
- Nancy Hayes, senior

"I think I would feel obliged to report it. I feel safe, mostly because I can run."
- Chris Sheaffer, senior

‘Helicopter parents’ hover too close

continued from page 1

degree that threatens their ability later in life to strike off on their own from healthy relationships and proper skills.”

A recent article in USA Today addressed helicopter parents and how they can actually be damaging to the student. The article was based on Colgate University. Titled “Colleges try to deal with hovering parents,” it went into detail about new procedures put in place. This year at Colgate, instead of handing parents a list of important campus telephone numbers, the parents were given a memo on self-reliance, letting their children depend on themselves and be on their own. Next year the College might suggest summer reading for parents.

Colgate is not the only university taking a stand. In St. Louis, at Washington University, parents watch skits that are performed by upperclassmen about letting go and healthy transitions. At the University of Vermont, students are paid to be “parent bouncers” to keep parents from interfering at advisor meetings.

Juniata administrators have not found the need to go that far, but still they have noticed an increasing number of over-concerned parents. Kris Clarkson, dean of students, said that he cannot get through one day without talking to parents.

Cook-Huffman said, “Juniata has a long standing policy to notify parents of dependent students.” Such notifications could be on drug and alcohol abuse. He believes that it is still best for parents to be involved in their children’s lives because they were role models growing up.

Still, Cook-Huffman does not feel that the school releases too much information. He was quick to point out that Juniata does not just dump information on anyone that calls. He also said that online directory information is public to the campus community because it is such a small campus and interaction is key. In this way he believes that Juniata is more generous with information than some schools.

But Clarkson believes that students need to find independence and that baby boomer parents are preventing that. He warns parents, “Be careful of the message you are sending.” Clarkson believes that parents should stay informed, but they should also trust that their kids can handle situations.

Jankowski doesn’t have a problem with Juniata’s policy, and she believes that parents have a right to know information about their students, especially if it is medical.

Dempsey said that she didn’t know. “Some cases they should, but some cases they shouldn’t,” she said. “Students need to remember that parents want the best.”

Cook-Huffman agreed that parents need to let go and let their students fly, but he was also empathetic to these parents. He believes that these parents who hover just really miss their kids. Still some can hover to the point of annoyance.

He said that some parents will call in and ask, “I don’t want my student to know I’m doing this, but find out information on them for me.” He said that typically Juniata does not get involved. “We want to be helpful, but we’re not spies.”

Clarkson also told a story about a parent’s recent call to Tim Launtz, director of residential life. This parent called Launtz and told him that her student lost his ID. She then went on to question how he could get a new ID and where the security office was located. At this point, Launtz asked if her student lived on campus. She said yes, and then he kindly told her that her student just needed to ask around.

Jankowski has also heard that more calls are coming from parents to the residential life department. Dempsey got the chance to experience these parents first hand. She told a story of how South Hall had become infested with spiders. Residential life aware of the problem, and was handling it. “But parents were not happy,” said Dempsey. “They constantly called in about the problem, and some even came took pictures and sent them to the president.”

The University of New Hampshire has published a statement to parents on its website, written by director of residential life Scott Chesney. He said that helpful involvement in students’ lives is encouraged.

But he then went on to say that unproductive involvement in certain aspects like a student’s grade or roommate needs to stop. He said that he understands what the parents are feeling, but usually they are struggling with these problems more than the student is.

And that is where the student needs to come in. Cook-Huffman believes that students need to communicate with their parents. He said, “Be firm, but be compassionate and loving. Set lines about what you need, but don’t be mean-spirited because your parents will always be there for you, no matter what.”

Jankowski would give this advice to parents: “Trust your kids. They are going to make mistakes, and it is important to be involved; just don’t over do it. Trust that when they make mistakes they will learn from them.”

Dempsey believes that independence is key for college students. “People need to grow up, make mistakes and learn,” she said. “They need to be more self reliant. That’s the most important thing I have learned.”

Eichelberger visits Juniata

Holly B. Brown / Juniatian

Blair County Commissioner John Eichelberger visited Juniata on Nov. 10. It was the first official meeting for the Juniata Republicans club. Eichelberger is a State Senate Candidate for the 2006 Republican primary.

Rethink IA: Is this worth it?

Rebecca DeHass

"A waste of my time" and "completely pointless" are only a few of the reactions I received about the Information Access classes on campus from the Class of 2009. Conversely, the faculty see valuable benefits from IA.

Would it not be easier and less time consuming to brief the freshmen during summer orientation on the basics of Juniata campus technology; or, why not let students test out of IA?

IT department chair Loren Rhodes said "It's simply survival skills for resumes and graduate school."

"Information Access is a moving target," said Rhodes. He stated that in the past ten years, IA has made some drastic changes and is re-sculpted every spring. The class has gone from being a three credit to a one credit course.

Although the credit amount has decreased, the information is still important enough to have as a class. Rhodes believes that the "silent majority" of freshmen appreciate IA.

Sophomore Jacob Blue said that he did not like IA class because he was well acquainted with the information, except for Microsoft FrontPage. "To be completely honest, after IA, I never used FrontPage," said Blue.

Whether or not freshmen enter the class with experience, IA assistant Jennifer Gouldey said, "By the end of [the class] they've picked up a couple of new tricks."

Psychologically, I think I make the class harder on myself. I sit there feeling incompetent because I have so many competency tests to take. Here's my logic: I am wasting time by practicing minimizing and maximizing screens (a vital mouse-clicking technique). I think I've proven competency by logging on to the computer, opening Internet Explorer, logging into the Arch and/or Blackboard and THEN clicking through the various sections to get to the tutorial designed to teach me how to use the mouse effectively. Why must I further prove my competency with a multiple choice test?

I've scribbled notes on the IA manual's cover more times than I've opened it

Furthermore, I know it can be difficult to understand computer lingo, but I really hate Windows hieroglyphics. It's a very difficult language to understand: the box with an X in the top right hand corner means *close*. All sarcasm aside, the variation in the computer literacy of students is a good reason to review the basics, even if it frustrates the students better-acquainted with computers.

How do the instructors deal with the students who are bored by IA? "Most students do have a previous knowledge of most of the material. I tell them to prove their knowledge and boost their GPA," said Dwight Bard, one of the sixteen IA assistants.

Freshman Adam Bell does use his prior knowledge of computers to his GPA's advantage. "Not many people know what control-click or triple-click do. More importantly, a lot of kids don't know how to use Outlook," said Bell, in defense of IA.

There are some tasks that are not easy to prove unless actually completed, such as the FrontPage

Dear sciences

An observer's humble suggestions

Emily Eller

Dear students with POEs in the sciences,

I truly believe that your studies may one day lead to a better world if you apply them appropriately, but there is something I would like to say.

Stop being so dramatic. Now before everyone gets all bent out of shape (famous last words), let me explain what I mean by "dramatic" with an example:

"Chemistry is the hardest course on campus."

This statement may or may not be true. There is no objective measure of how "hard" a course is. But, I can say that of the students who say this (over and over again), most of them have never taken upper level politics courses or foreign language courses, studio art courses or studied abroad… so their perspective of what "hard" is exists in a very narrow universe. There are many students here at Juniata College doing things that would be very "hard" for you.

But what I think is more important here is the implication that something needs to give you an ulcer in order for it to be a valid academic endeavor. Yes, course work should be challenging, but it should also be stimulating. If you are spending most of your time thinking about (and talking about) how "hard" your work is, then maybe you are in the wrong area of study. Maybe science isn't for you.

Now, this advice is probably applicable to students outside the sciences too. But it does seem especially prevalent among students subjected to "the dreaded O-Chem." This I blame on faculty, not on students.

Dear professors teaching in the sciences,

The humanities departments are quite grateful for the influx of talented and intelligent students that you send their way each year. However, I am somewhat concerned by a certain mean-spiritedness from your faculty which seems to influence some students' decisions to depart from your labs.

You do not win if students change their POE. You lose.

I vividly remember a several week period my freshman year when my unfortunate hallmates were receiving phone calls and e-mails after their first O-Chem tests telling them to switch areas of study. That is rude. Learning is a process; scaring freshmen does not get any of us closer to the cure for cancer.

I know that most students here study science and want to be doctors. And I know that studying in the sciences is not the best choice for everyone. Perhaps there is a way to push students toward their talents and away from the sciences, but all people (and yes, that includes students) deserve respect and support.

Many professors in the sciences are wonderful and caring to their students. (And I don't need you all to send me angry letters telling me so. I know you're out there. Cheers to you.) To these professors; please demand that your colleagues do the same.

But you are all guilty of perpetuating a not-so-liberal-arts rigidity when it comes to students' schedules. Over and over again I hear students tell me that they cannot study abroad because they are in

continued page 7

Presidential Perspective

"Are there any plans for renovating Good Hall? If so, when is the projected start date?"

Plans for the continued refurbishing of Good of course depend on funds to do the work. Once the Budget Team reviews and prioritizes all the capital requests we will then be in a better place to know when and how much work we can accomplish. This is among the College's higher priorities and thus I do expect some work to be done next summer.

"Why are non-Juniata students, mainly Huntingdon school children, constantly allowed to cross the campus as they please and loiter at will? This socialization not only puts the College at risk for lawsuits but is also a hassle to those who really belong on campus. Their inhospitable actions and remarks, along with their blatant refusal to respect our institution is a slap in the face to those of us paying tuition."

This is news to me. I would like to hear more about this from the student body – is it a major problem?

President Kepple wants to hear from you! He uses his column to answer any college-related question from the campus community. Simply e-mail questions to juniatian@juniata.edu, and the editors will forward them anonymously to Dr. Kepple.

The JC Bubble

Preparing for intellectual genocide

Christopher Burlingame

Those waiting for the resounding pop of the Juniata bubble to burst may have to wait for the apathy to drain off first. Ignorance is supposed to be bliss, and maybe that is why so many Juniata students are exercising their right to be oblivious to the world outside of Huntingdon, Pennsylvania. I have noticed an increasing trend: many students (including myself) are unaware of local, national and world news.

CWS teacher Kevin Ott said, "I thought college was supposed to be about finding how you as an individual fit into the larger world around you." However, this does not seem to be the case around campus.

It is somewhat disgraceful to not be up-to-date on such events. CWS instructor Sarah May Clarkson announced to her class that Harriet Miers had withdrawn her name from the Supreme Court nominations. Clarkson then spent the next five minutes of class explaining who Miers is. These are the types of events that could really shape lives, and most students are so uninformed that they are just letting things happen.

Recently, a fire chief from my hometown of Altoona died as a result of his participation in a training activity. The event made national news, yet even with the numerous Juniata students from Altoona and the surrounding area, few knew about his death until after the funeral. I had to find out from my parents, which just proved to me how uninformed I was; and I recognized that I'm not the only student on campus being smothered by our Juniata bubble.

A number of freshmen, in particular, seem caught up in the transition to college. Several freshmen are relying on the Juniatian as their only source of news, claiming not to have even heard about Hurricane Katrina until finding out about relief efforts covered in an article in the first issue of the Juniatian this semester.

What it comes down to is: why? Why are we not taking a greater interest in finding our place in the world? Most of us seem content only knowing that we have a place in the close-knit community of the 1,400 students around us.

Freshman Matt Werrbach reads

continued back page

Letters to the Editor

Military recruitment e-mail

I am writing in response to Emily Eller's column in this issue of the Juniatian *[Nov. 3]*. First of all, I am not going to disagree with her view about this mass e-mail violating campus policy. I agree that we do enjoy a great deal of personal freedom on this campus. However, I will disagree with her view of military recruitment on campus. She feels that the integrity of our campus is undermined by the presence of military recruiters on campus. I'll make this pretty blunt: That is a load of crap. If our campus didn't have military recruiters on it, I would be very disappointed and would question our integrity. And another thing…Eric Albright and Captain Kozel are not selling war. You must be either very shallow or very uneducated about our military if you think that recruiters are here to "sell war." War is the last thing that any of them want. The fact of the matter is that we are engaged in a conflict and our country needs more soldiers. This is not selling war. This is YOUR country asking for help. Whether you agree or disagree with the war in Iraq is irrelevant. Maybe, if one person agreed to sign up as a result of the recruiters that came to our campus, someone in Iraq will get to go home to his or her family and not have to go through a second tour because that student will be taking his place. There is a lot more to this situation than integrity and "selling war." At first, I was furious when I read this article, but now my anger has turned to shame. I am ashamed to know that Juniata students think this way about our military and the recruiters that come to campus.

As for the funding issue, Ms. Eller needs to get a grip on the economics of the situation. This campus is all about fundraising drives. Brethren alumni are not going to replace whatever governmental money is lost if we refuse to allow recruiters on campus. Those alumni probably get asked every year for donations for something. I could be wrong, but I doubt that refusing recruiters would entice them to donate more money.

Make no mistake, we owe our freedoms to the men and women who serve our country. Try to show a little more respect next time.

Eric Bridenbaugh
Class of 2006

Students sent to national conference

JCEL recently sent five Juniata students and JCEL Executive Director Dr. Michael Lehman to the 2005 National Collegiate Entrepreneurs' Organization Conference in Orlando, Florida. The conference is a meeting place for over 2,000 student entrepreneurs from all over the world, who come to network, share ideas and obtain valuable business knowledge.

The five students chosen to attend represent a diverse and interesting mix. Fouad Touzani is a senior international student from Morocco whose goal is to create a lasting relationship between his home country and the United States, specifically Juniata College, in hopes that entrepreneurs from both parties will mutually benefit.

Bradlee Drawbaugh is a freshman who as a sophomore in high school started her own dance studio, *Bradlee's Dance Studio*, which currently has 85 students enrolled.

Christi Spackman, a senior majoring in Marketing and Communication, intends to start an advertising firm in the future.

Travis Paul is a sophomore who is pursuing a venture idea, titled *Rock to Roll*, in the construction industry.

And I, as a JCEL Intern and a writer for two Juniata publications, desire to be a renowned free-lance writer and author.

An excitement filled atmosphere welcomed us upon our arrival at the Sheraton World Resort in Orlando, Florida. After registration we were transported to the nearby Rollins College for a pleasant dinner outside in the middle of the beautiful campus. Chairs were noticeably absent to encourage student interaction.

And the interaction with people is precisely what made the conference so enjoyable. It was very comforting knowing that every entrepreneur in attendance was sincerely willing to share and discuss ideas; the reassuring friendliness was contagious. Not only did I make new business contacts, I made new friends.

One highlight of the conference was the elevator pitch competition where students had a ninety second opportunity to "pitch" their business ideas in front of an audience. Twelve finalists were chosen, and the top finishers were awarded checks for varying amounts, up to $2,500.

The guest speaker list consisted of several entrepreneurs of legendary status including Steve Wozniak, the creator for the first Apple computer.

"There are very few events in my life which I can look back on and feel totally motivated by, but the CEO Conference is one of them. Not only from being around other entrepreneurs, but also from listening to accomplished speakers such as Troy Dunn and Steve Wosniak," said Paul.

Troy Dunn was a self-made millionaire by the age of 23. He concluded the conference with a rousing speech that was so moving that no eyes were left dry.

Drawbaugh commented, "The conference was truly an inspiration, not to only expand my business, but to find my passions and use them to better the life of people around me. Troy Dunn made a lasting impression on me when he said, 'You don't have to change the world, but know that you CAN.'"

Special Olympics comment

I just wanted to make a quick clarification regarding the use of the Eagle mascot at the Opening Ceremonies of the Special Olympics.

Special Olympics as an organization is often thought of as an organization for children. However, most of the athletes who compete at the Special Olympics are adults. They are making a conscious effort to change this common misconception by using more grown up looking symbols in their ceremonies. The Olympic Village, on the other hand, is intended mostly for children. That is why there was cookie decorating and a plastic bowling at the village. I see nothing childish about cookie decorating, however. I decorated and ate about 5 myself.

Mike Chirdon

SOPA-Central Fall Sectional
Class of 2007

Survey credit

In Nick Carney's piece on sustainability *[Nov. 3 Juniatian]*, I was given sole credit for designing the sustainability questionnaires. In the spirit of truth in advertising and because psychologists are compulsive about referencing, I should point out that the questionnaire was a team effort and that the team included Angela Davidson, Emily Eller, Jon Zunkel and Rob Yelnosky.

Dave Drews
Professor of Psychology, Emeritus

Editor's Note: The article in question said, "The survey was designed completely by psychology professor Dr. David Drews and a group of students."

LETTERS TO THE EDITOR

Students, faculty, staff, alumni: send letters to juniatian@juniata.edu. We print all letters to the editor that are of interest to the campus community – in response to one of our articles or on a completely separate topic. Please limit letters to about 300 words, and note that longer submissions may be printed partially due to available space. Opinions expressed in the newspaper are not necessarily those of the Juniatian staff.

Rethink IA

continued from page 6

competency. I felt pretty dumb following the directions: telling tidbits about me that I knew my IA instructor would have to look over. So I made it interesting by adding a "yoga position of the month" to my web page – the directions said to add "some other content of your choice," so I did; but more importantly, I am now capable of creating a web page in the future if necessary.

Rhodes mentioned that condensing the three Microsoft Word modules into one module is something he wants to work toward. Also, there is a possibility of nixing the two required elective modules. However, there are other areas IA will expand on to make up for the shortened information. "We've been asked by others to add more material, for instance sustainability," said Rhodes.

I admit that I needed to brush up on page setup at the beginning of the semester, such as margins and headers/footers; however, I could have easily asked another student to run through it with me. Or I could have looked in my handy dandy IA manual that I purchased for $19.95 and have scribbled notes on the cover more times than I have opened the book itself. If students make use of the IA manual, it is a very effective tool. "Most of the questions I get in class could be answered if the student would refer to their manual," said IA assistant Bret Naugle.

Would it be possible that the IA manual is mandatory for all freshmen to purchase, but the class is not required? If the book explains everything that the class teaches, why go to class? Whether or not the freshman class (myself included) thinks IA should apply to them, we are still going to have to go because there is yet to be a better way to make sure all the freshmen have the same basic knowledge. IA barely gets more than an hour of attention during summer orientation, and there are at least 100 students who don't attend orientation at all. The first weekend sounds like a good time to brief freshmen on Juniata technology; however, that time span is already so packed that adding more might make the freshmen overwhelmed before they even experience their first college classes.

Even though I know this, I still question why I need to go to class. But I only have one more IA elective to complete: Intermediate Microsoft Word. Still, let's be honest with ourselves. If someone (with the exception of international students) has made it this far in his educational career without ever using Microsoft Word, I would like to shake his hand. Maybe he and I could open our IA manuals together.

Dear Sciences

continued from page 6

the sciences. Who is telling them that? They say it's you.

A student who has learned another language or studied abroad will always be a better candidate (and probably a more interesting person) than one who has not. Why would you discourage students from taking what may be a once in a lifetime opportunity? (After all, life post-med school is often about weird rashes and kids who put beans up their noses… shouldn't they get a chance to see some beauty now?)

Give students a breather; encourage them to broaden their horizons. And, while we are at it, students should be encouraged to take courses in musical instruments, theater, history, studio art, sports and choir, too (and now I am not just talking to science professors).

So, students and faculty, please take this advice to heart. We are all trying to make the world better in our own ways. Stop the drama. Stop the bullying. And remember that we are all here to learn.

Sincerely,
Emily Eller

New art professor unveils exhibit

Holly B. Brown / Juniatian

Professor Bruce Erikson, new to the art department at Juniata, works with a student in organizing a portfolio. Erikson hopes his new thematically-based classes will attract more students to take studio classes, whether they are art majors or not.

Laura Sweltz

The Halbritter Performing Arts Center isn't the only new addition to supplement Juniata's arts this year. This fall, Juniata College welcomed a new assistant professor of art, Bruce Erikson.

On Friday, November 18, students, faculty and the community will be able to see Erikson's personal works in his exhibit "Unravel" in the Juniata College Museum of Art.

Erikson said that the collection consists of personal narratives that deal with subjects such as death, dying and longing.

"These are scenes from my own experience, and the format of the exhibit compresses seemingly unrelated themes together. But when juxtaposed, they bring about a broader connotation," said Erikson.

The exhibit will be featured at the museum until February 25. Museum hours on Mondays through Fridays are from 10 a.m. until 4 p.m. and on Saturdays from 12 p.m. until 4 p.m.

In the classroom, Erikson currently teaches drawing, painting and design classes. As a new professor to Juniata, he said that is still settling in but hopes to make some positive course additions to the art program when he has better determined where student interest lies.

He said that he hopes to create new courses that will be thematic. These courses will have central themes that all students will work around through various mediums.

"A thematically based class will help students focus on what they are making art about rather than just focusing on the tools they are using," Erikson said.

Although working with various mediums may be difficult to administer in the classroom, Erikson hopes to find a way to make thematic classes work effectively at Juniata.

Erikson said the he is excited to work with a range of students. He hopes to attract students without an art emphasis in their POEs to take art classes. Even though he will only be able to work with these students for a short amount of time, he hopes to offer them positive experiences with the fine arts.

Lisa Detweiler, one of Erikson's current students, said that she enjoys the way he teaches. "He walks around the class and asks the students if they have any questions and then gives his input about what areas he thinks we should work on. I like this method of teaching because it lets me dive right into what I want to see on my canvas as opposed to watching hours and hours of demonstrations."

Many students have noticed that several classes that are normally offered by the art department, such as photography, are not currently available. In response to this, Erikson said that he wants to teach classes that he has the most experience with.

In 1996 Erikson graduated with a BFA degree from Edinboro University of Pennsylvania. He later earned an MFA at Indiana University at Bloomington. After completing his MFA, he taught at Kendall College of Art and Design, the University of Illinois and Washington University. For the past two years, he has taught at Carnegie Mellon University as a visiting professor.

Masters of the Caribbean causes dancing in the aisles

Sarah Anne Wharton / Juniatian

Ecos de Borinquen, masters of Puerto Rican Jíbaro music, played upbeat tunes that had the whole JC audience clapping at last week's Artist Series event. On November 3, Juniata welcomed the "Masters of Caribbean Music" show to spice up JC's music scene with melodies from Puerto Rico, Jamaica and Haiti. The nationally acclaimed tour explored the musical traditions of the Caribbean through the tunes of Ecos de Borinquen as well as the Mighty Sparrow and Ti Coca et Wanga Négés.

Nick Carney

The Masters of Caribbean Music concert was a welcome departure from the "standard" Artist Series brand of entertainment. During the Nov. 3 concert, instead of the audience politely sitting in their seats, waiting for the "applause moment" while whispering to their neighbors "Is that a Gregorian or Medieval chant?" the audience eventually clapped in their seats, danced in the aisles and begged for more.

While Juniatians did manage to muster up the courage to dance, the initial reaction to the Master of Ceremonies' request to "feel the music" caused an uncomfortable rustling in audience. One could almost hear the communal and eternal question being formulated: "You're asking white people to dance?"

As the show progressed, dancing Juniata "groupies" paraded around Rosenberger auditorium during the show. The three performers, Ecos de Borinquen, Ti Coca et Wanga Nègès and the Mighty Sparrow, the master of Caribbean Music, thrilled the audience with their unique musical talents.

The Sparrow, whose real name is Slinger Francisco, has been crowned the Calypso King of Trinidad 11 times, and rightly so. This 70-year-old, self-described troubadour proves that recording over one hundred Caribbean albums is not only good for the ears, but is also good for the soul.

The Mighty Sparrow, singing his songs in English, commanded more than one string of laughter. Calypso music, he said, often "steps on other people's toes." Among the Sparrow's satirical targets: the British Crown, slavery and American sexual taboos.

A less controversial, though no less enjoyable, performer was Ti-Coca (which literally translates as "Little Bottle of Coca-Cola"), whose brand of voodoo-inspired, Haitian Creole music sent a toe-tapping signal into the shoes of all those present.

Have no fear, fall gear...is affordable

Lucia

It has to be that time of year because I just went through my closet, and everything I found, I hated. I had nothing that I wanted to wear. It's the time of year when you feel you wear the same thing over and over again and when nothing looks good on you anymore. You are basically faced with wearing your fifth grade overalls around campus (but, unless you are going to a country hoe-down, please do refrain from overalls, ladies). It's also about that time of the semester when money is running out, and your last few quarters have finally been spent on taking your monthly load of wash to the laundromat.

Now where does that leave you and me to spice up this year's fall staples in your closet? Do not fret over the tight money situation, because the latest fall jacket in the window can be yours. I have picked up a smart way to shop for the retro fall fashion.

You are craving that hip box jacket or the hot trench coat being brought back from the 50's, a refined version being seen on the streets of New York. Yet what you are craving is way out of your price range. I can sympathize. The jacket I am dying for is a Stella McCartney military coat. To give you an idea of the price—basically, it could buy a nice trip to Cancun for spring break. So obviously it's not going to work, ladies. However, I am not going to be denied making this jacket mine.

The latest fall jacket can be yours

There is a three-step, adorable process to finding a fall jacket. It goes like this: I came, I saw, I conquered. Let's ignore the "I came" part. Moving along to "I saw" part: The jacket I'm in love with I recently saw in the "Us Weekly" tabloid magazine, worn by the super sexy and talented Hilary Swank. But, let's face it, my check would bounce if I bought the same jacket she was wearing.

I took a mental note of it and then combed through a few web-

Movie Review: **Elizabethtown**

Your mom would like it

Holly B. Brown

A Cameron Crowe film is like a favorite album – when immersed in it, you feel both relaxed and restless at the same time.

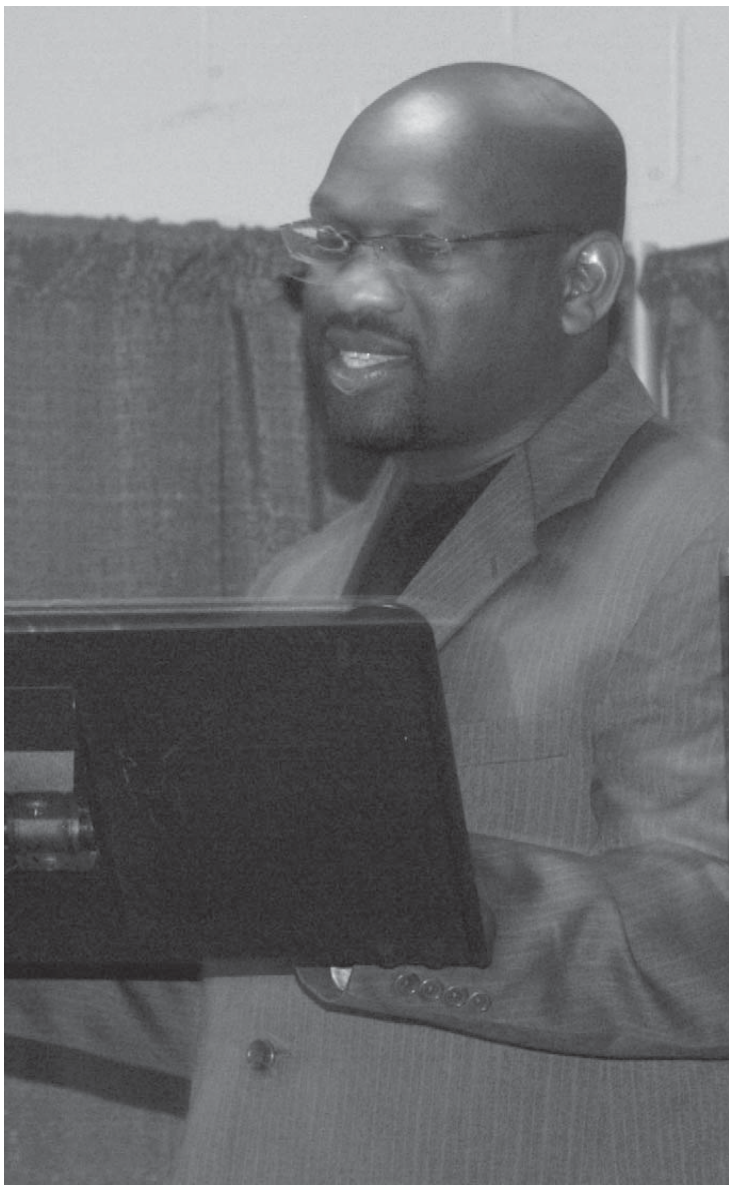
Of course, that was what he wanted. Crowe's films are always chock-full of good music, and some of them, like "Almost Famous," are literally about his love of the music world.

Crowe's latest flick, "Elizabethtown," couldn't be more characteristic of his style. It's a slow-moving, visually appealing, heartfelt movie with a good message. It's wholesome, but real and quirky. And ultimately, it's inspiring.

The film revolves around Drew Baylor (Orlando Bloom), a young designer facing his first failure. Baylor's nine years of work on a new shoe design have bombed miserably, and he has been fired after causing his company a loss of almost 1 billion dollars. Adding to this, Drew receives a call soon afterward letting him know that his father has passed away.

It's then up to him, as the remaining patriarch of the family, to fly to his father's hometown of Elizabethtown and collect the body. His manic mother and panicked sister warn him that the southern family members have never been friendly to their west coast relatives.

Drew departs for Kentucky, meeting quirky flight attendant Claire Colburn (Kirsten Dunst) who is too persistent to be ignored.



From this point, the movie moves on at a leisurely pace, developing the relationship between Drew and Claire, musing on the father-son relationship Drew will never have again and culminating in a two day road trip Drew takes to come to terms with his life.

There is nothing exactly monumental about "Elizabethtown." There are no car chases, no dramatic deaths, no hidden plot twists. It's the subtle, life-changing decisions and fun, but true, realistic moments that drive the movie. Nothing will explode, but you'll leave the theater wanting to drive across the country or to create the next artistic masterpiece.

The flaws in the film are ones I found easy to ignore. Orlando Bloom has yet to prove his true acting skills to me, but in "Elizabethtown" he gets to be more natural and normal than in his other films, like ones where he plays an elf, for example. This low-key and fun role covers over the multitude of sins he can commit in a movie. But the whole "furrowing my eye-

Why do white kids love Hip-hop?

Sarah Anne Wharton / Juniatian

Why do white kids love hip hop? - Speaker Bakari Kitwana addressed this issue during his Nov. 6 lecture sponsored by the African American Student Alliance. His new book – The Hip Hop Generation: Young Blacks and the Crisis in America – talks about why hip hop has made the crossover from black culture to white and become such a phenomenon. After his comical and thought-provoking talk, he had JC members ask about these issues throughout a long question and answer session.

Off the Wire: Intel anticipation

Nate Drenner

There is a topic that I have wanted to write about all semester. I restrained myself because I thought it may not be most important for a general technology audience.

But it's time for some self-indulgence.

I'm in the midst of a dilemma. My computer needs to be replaced, pronto, and I want to buy a Macintosh. But signs say that a major upgrade is due in the next few months. New Macs running an Intel processor will replace the current G5s.

Either the G5 or the Intel would probably be a fine computer. But this is more than the usual application of Moore's Law, the acknowledgement that a newer, better machine is always available a few months down the road. Moving to Intel is a major change that affects computer users and quite possibly the entire computer industry. It is entirely possible that Intel Macs will eventually be able to run Windows software. The ease and beauty of Mac combined with the compatibility of Windows – if I were Michael Dell, I'd be scared.

I have no exact idea of how many of you are Mac users. I do know that, in general, I have noticed an increase in the number of incoming students with Macs through my job at the Solutions Center. So maybe this does have some relevance for you after all.

Part of the problem of when to buy, for me, is that there is no definite information on what will be available when. Rumor blogs – some which have proven reliable in the past – have been abuzz with reports since June, when the transition was announced. As of press time, AppleInsider.com had just announced that iMacs will receive the upgrade in early January, quoting the usual anonymous "sources familiar with Apple's plans."

A week ago, though, PowerBooks were slated for the January upgrade. A week before that, it was supposed to be the Mac Minis. The only consistent thing is the date. It seems like something will happen in January; we just don't know what.

And that's probably just the way Apple wants it. If everyone knew for sure that Intel Macs would be here in January, they would be less inclined to purchase Macs right now.

Further complicating the transition, all software for the Mac will have to be rewritten (not unlike the transition a few years ago from version nine of the operating system to version ten). For Apple, that's not a huge problem since the company can be sure its software is ready at the same time the computer ships. But when will Photoshop be ready for Intel Macs? Microsoft Office? Several software companies have said they will produce Intel Mac versions, but it could be a while before that promise comes true.

In the meantime, the applications will run on Intel Macs, but slower. A translator (or in tech lingo, an emulator) called Rosetta will ship with Intel Macs that allows older software to run on the new system. But that added step of emulation means that the system takes a performance hit.

In the end, though, software will likely be more compatible, and the Mac will become more powerful. Intel is the same type of processor that Windows runs on, which means that it may become possible to install Windows on a Macintosh system or to even emulate Windows programs directly under MacOS.

So in the long run, it will be a good move for the company. I bought my current PowerBook back in 2001, right at another major transition from OS9 to OSX. I didn't regret being an early adopter then, and I probably won't now.

The wait is the only painful part.

Juniata women: "Unlock Your Voice"

Holly B. Brown / Juniatian

Seniors Charlotte Catton (left) and Saskia Haase (right) recited two poems by Marie Luise Kaschnitz, with Haase reading in her native German and Catton translating. The participants in the event were all members of professor Judy Katz's "Women and Literature" course. Over 20 participants read poems and prose written by women at the 13th annual "Unlock Your Voice" performance. Junior Lisa Detweiler performed two original songs entitled "Perfect World" and "Break Down the Walls" written specially for the event.

Elizabethtown

continued from page 9

brows and smiling a bit expresses all of my emotions" routine can still be a tad annoying.

Kirsten Dunst, on the flip side, proved herself capable of taking on more interesting roles. She really broke through as an amazing actress at twelve in "Interview with the Vampire" and has been stuck playing blond girlfriend roles ever since. But just like Natalie Portman in "Garden State," Dunst shows that she can be annoying, motherly, interesting and eccentric all at the same time. Bloom may be the neutral backbone that the film follows, but Dunst added the spice the film needed.

Some have called the movie slow and others uneventful, but I saw those things as positives. "Elizabethtown" snuck up quietly beside me and wrenched my heart. As long as you're in the mood for something slow and heartfelt, "Elizabethtown" is an A+.

Scratch Track performs live to small crowd

Holly B. Brown / Juniatian

The band Scratch Track played to an almost empty Ballroom on Saturday evening. JAB and SPEAK co-sponsored the event, which was attended mainly by the sponsors themselves. The band is one of six musical events sponsored by JAB in the month of November, including the major concert. Such events have met with mixed response on campus.

Masters of the Carribean

continued from page 8

Ti-Coca's music, accompanied by the drums, a banjo, an accordion, a bass and a Caribbean instrument called the tanbou, has a kick to it, which makes the listener wish that Haitian music was more common in the American music tradition.

The third of these performers, Ecos de Borinquen, explore\d the breath-taking musical lexicon of traditional Puerto Rican folk music. This music, which could fit the stereotype American's have of Caribbean music, was every bit as enjoyable as the other performers. To paraphrase, Ecos de Borinquen was muy picante.

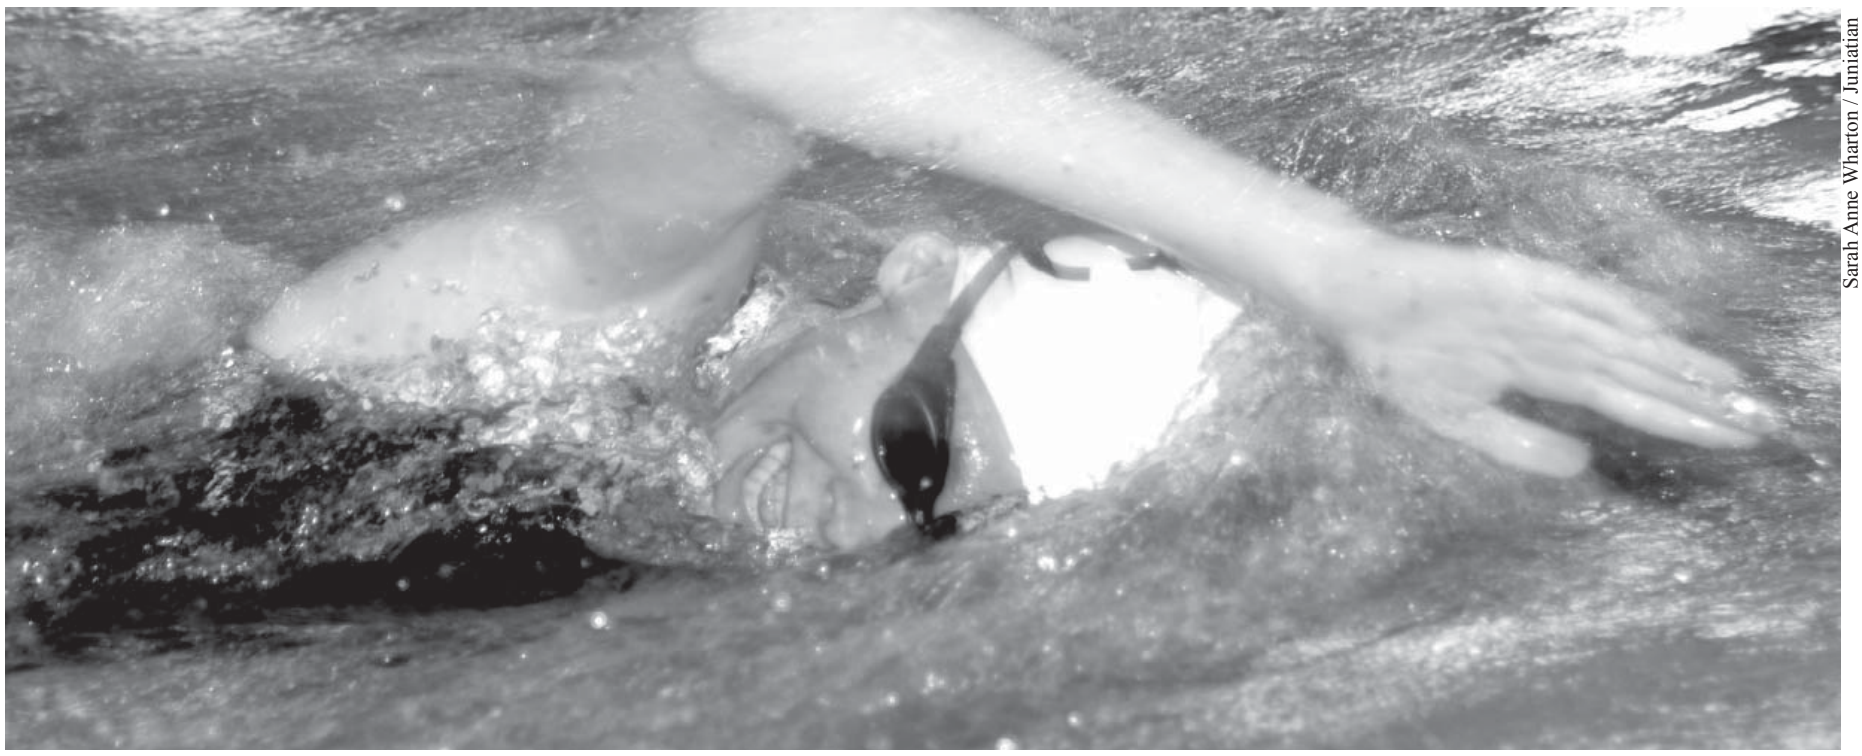
All of the music was spicy, like an auditory jalapeño—a welcome change from the bland, form-cut music of the American corporate machine.

For this very reason, Caribbean Music has proven to Juniatians that art is less about the static painting in a museum or the observation of a centuries-old classical dance, but rather more about the emotional experience of the observer—and Juniatians young and old were doubtlessly soaked with emotion.

This show made me feel like I was alive. For the first and hopefully not last time, an Artist Series brought a kind of welcome moisture to my eyes when it ended. I simply could not bear to watch the musicians leave the stage. I wanted more, and so did Juniata.

So well received was this concert that the Masters went into two encores—the audience clapping and dancing in the aisles as the performers sang en masse.

The curtains may have closed on the Masters of Caribbean Music, but the stage is still filled with its memory, longing for its return.



Fashion column

continued from page 9

sites and magazines. What I found was a jacket just like the one she had on. It wasn't the same one, but it was close enough. I had conquered.

The jacket was on a website for H & M, the amazing Scandinavian-based clothing store. It was also reasonably priced at below two hundred dollars.

Showing you that my process does work (well at least for me, so hopefully for you too, ladies), will help you to see that an item you love is within your reach, perhaps in an alternate form—and with an alternate price tag. You just have to find it.

Sarah Anne Wharton / Juniatian

Junior Rachel Almy swam November 11 in JC's second home meet against Albright. The women's team had a strong performance, though the girls suffered a 120-78 setback.

Women swimmers off to solid start for the 2005 season

Katie Laucks

The 2005 women's swim team is coming off of a third place finish at the 2004 MAC championships. So what is the team's plan for this year?

"We want to improve," said senior captain Amy Hanson.

That didn't seem possible right away. Even before the season started, a few returning swimmers decided to not participate because they wanted to concentrate on their studies. This left the team to a mere 12 swimmers left to compete, compared to a full roster of 17.

The team was concerned. This was a different outlook for head coach Brian McGrath. Coming up on his third year, McGrath knew better.

"I was not concerned," he said. "I knew the talent we still had and the make-up of the team was still good."

Despite the depleted roster, Juniata is off to a 3-2 start this season.

For the Eagles' first meet, they traveled to Widener where some of the swimmers already bettered their times from last year. Sophomore Amy Sutherland placed first in the 200 freestyle. Other first place finishes included Kristen Musselmen in the 50 freestyle and sophomore Jenny Bair in the 100 breaststroke.

Unfortunately, the team was out scored by Widener by just two points. McGrath was still happy about the outcome. "I had Widener beating us by 23 points before the meet," he said. "We only lost by two. I'm convinced that we will be able to beat them at the end."

On Saturday November 5, the women jumped in the pool again to compete against Randolph Macon College. The Eagles claimed their first victory of the season as they swam to a 107-95 win. "Everyone swam so well and had pretty good times," said Bair.

Juniata swept the podium in the 200 breast stroke, as Bair claimed first and teammates Carlie Zoubek finished second with Sam Monty claiming third.

The ladies were back in the pool on November 11. The women traveled to Albright where they took on the defending MAC champions. Despite strong performances, the women dropped the meet, 120-78.

Amy Sutherland swam to two first place finishes in the 200 freestyle, where she just missed setting a new school record. Her time was 2:16.11. She also was first to

Eagles look for repeat national championship

Jeffrey R. Byer

The Juniata women's volleyball team expected to play three matches during the NCAA Mid-Atlantic Regional, but there turned out to be a change of plans.

Washington University, the number one ranked team throughout the season and Juniata's only loss, lost in their conference playoffs. This loss moved the Eagles into the number one ranking in the country and gave them a bye during the first round of Mid-Atlantic Regional.

"We are improving and everyone else isn't," senior Katie Laucks said in response to Washington's loss.

Juniata's record is now 34-1 and it has won 29 consecutive matches. The Eagles play Colby College in the NCAA Quarterfinal today in Salem, Va.

"Oh, we will bring back another National Championship," said junior Stephanie Kines. "We won't let ourselves lose. We need everyone to play their best."

"A winning streak is nice, but at the same time it can cloud your vision," Kines continued. "We haven't lost in a while, so it becomes even more important to keep that edge. Our coaches are doing a great job of making sure we maintain a competitive spark."

The Eagles won the Mid-Atlantic Regional Championship with a victory over Eastern University. The Eagles led throughout game one as Eastern closed the gap to one point on two occasions, but that was as close as they would come. Juniata scored seven of the final ten points and took the game, 30-25.

In game two, Juniata was led by freshman Amber Thomas, who notched two double blocks and two kills to highlight a seven point scoring run that moved the score to 23-13. She added two more late kills to seal the 30-21 victory.

Game three was tightly contested throughout, as Eastern pulled as close as 22-21. After two points from each squad, the Eagles put

continued page 13

Cross country runs to best finish in 10 years

Women 9th, men 10th in Regional Meet

Robb Patty

The Juniata College women and men's cross country teams placed ninth and 10th, respectively, at the NCAA Mid-East Regional Championships Saturday in Carlisle.

Both teams' top ten finishes were the highest for either team in the past ten seasons. The Juniata women's previous-best was a 10th-place finish in 1997, while the men's best effort was 16th last season.

"I was very happy with the way we all ran at regionals, for the women as well as the men, said junior Lia Bella. "Considering that our region is one of the top in the nation, it was exciting to place well."

On the men's side, senior Chris Sheaffer finished a career best 23rd with a time of 26:42.9, placing him just two spots shy of going to the NCAA Division III Championships.

Fellow senior Justin Fritzius earned a 58th-place finish and posted a time of 27:32.8, while senior Mike Vella ran third for Juniata, running a time of 27:35.8, good for a 63rd-place finish.

The men finished the day with 345 points, which was more than 100 points better than last year's performance.

The women's race saw senior Katey Glunt cross the tape first for Juniata as she placed 23rd with a time of 23:38.4. Glunt improved on last year's run by 11 places.

Juniata senior Nancy Hayes placed second for the Eagles, running a time of 24:14.0 for a 42nd-place finish, while Bella enjoyed a 64th place finish for the Eagles with a time of 24:42.3.

The women finished the regional meet with 297 points, ten points better than last year's effort.

"It's always good to end a season on a good note and it gave us a chance to show our conference and region that we're here and we're only going to get better," said Bella. "This season I feel like the team really came together. We were all really hyped up about the season and it carried us through."

By The Numbers

4

Number of players the Juniata women's volleyball team placed on one of the Division III All-American teams.

284

Yards receiving for David Nicklaus against FDU. He also caught nine balls and scored twice.

2

Duane Ehredt. Jr.'s rank on the Juniata single season rushing list. He ran for 1.204 yards this season.

8

Number of first place finishers for Juniata swimmers in a tri-meet win over Lebanon Valley and Drew.

6

Rank in school history in the 400 freestyle for Amy Hanson. Hanson turned in the sixth fastest time in Juniata history the first time she swam the event.

3

All-conference selections for the field hockey team. Elise Zimmerman, Cory Hamblet and Kim Wagner were all recognized.

1

Days until the men's basketball season tips off with the start of the Doc Greene Tournament, Friday night at 8 p.m. (sorry, I'm a little biased). -TM

Football drops season finale in a shootout

Robb Patty

Freshman quarterback Jay Leonard threw for a career best 456 yards and three touchdowns, but it was not enough to lead the Eagles to victory as Juniata fell to FDU-Florham, 51-41, in its season finale.

With the win, FDU-Florham wraps up its season with a record of 4-6 overall and 4-5 in the MAC, while Juniata finishes the season 0-10 and 0-9 in the MAC.

Leonard's 456 yards marked the third highest in school history for a single game. On the other end of most of those throws was sophomore wide receiver David Nicklaus, who caught nine balls for a career high 284 yards and two touchdowns.

Junior running back Duane Ehredt Jr. had another 100 yard game as he rushed for 176 yards and two scores. Ehredt Jr. finished the season with 1,204 rushing yards, which is the second highest single-season total in Juniata history.

Head coach Darrell Alt said before the game that he felt offensively that the Eagles would be able to run and throw the football against FDU-Florham and he was right as his offense compiled 664 total yards and put up 41 points.

Unfortunately, Juniata was unable to contain the home team as FDU had 613 total yards of offense. FDU finished the day with two 100 yard receivers and a 100 yard rusher.

The two teams accounted for 92 points on the afternoon, the highest single total in FDU history.

In previous action, Juniata welcomed the eighth-ranked team in the country to Knox Stadium last weekend and were defeated, 58-27.

In the game, Delaware Valley quarterback Adam Knoblauch became just the fifth quarterback in NCAA history to pass for 10,000 yards and rush for 1,000 yards in his career.

With the win the Aggies clinched a share of the MAC Championship and gained an automatic berth in the NCAA Division III Championships.

"Delaware Valley is a talented football team," Alt said. "They have lots of playmakers on their team and they play with confidence."

One of those playmakers is wide receiver Don Marshall. Marshall established a new Aggie record with 251 yards receiving on the day. Marshall hauled in 10 balls and found the end zone on a 57-yard bomb to start the second quarter and a 10-yard score right before halftime.

The Eagles would also have a personal record set on this day as Ehredt Jr. rushed 33 times for 161 yards, moving him past the 1,000-yard mark for the season.

Going into halftime, the Eagles managed to score as Ehredt Jr. plunged in from five yards out. The Aggies still had a commanding 49-7 lead at intermission. Despite the huge deficit, the Eagles came out and scored on their next two possessions of the second half to cut the lead to 20-49.

"In the game of football you have to work regardless of the circumstances. I'm very proud that they decided to work despite the odds," said Alt.

Women's volleyball

continued from page 12

together a five-point run that was capped off by a kill from junior Rachael Schatz. Juniata won 30-26.

Four players led Juniata's balanced offensive attack with double figure kills. Junior Rachael Schatz led the team with 14 kills, while Thomas and Laucks each contributed 12 finishes. Kines rounded out the offensive attack with 11 kills of her own and was also big on the defensive end with six blocks. Freshman Jessica Ritchey dished out 48 assists and McMinn led the team with 22 digs.

The Eagles defeated Gallaudet University in the Regional semifinal to advance to the championship. The Eagles controlled game one and went on to win, 30-21.

Gallaudet came out firing on all cylinders during game two as it led throughout the game. Down 26-23, the Eagles got back into the contest with consecutive kills from Katie Laucks, an Amber Thomas ace and two more Laucks kills. A Gallaudet service error ended the game and the Eagles scored a 30-27 win.

Juniata held off a Gallaudet rally to win game three, 30-22.

Laucks had a game-high 15 kills, while Thomas contributed 14 and also had three aces for Juniata. Ritchey played a solid overall match, dishing out 40 assists had 12 digs, and also three aces.

"I think that our level of play as a team is definitely peaking at the right time," said sophomore Tara McMinn.

The Eagles advanced to the NCAA Tournament by winning the Commonwealth Conference for the 25th consecutive time. The Eagles defeated Lebanon Valley at home in three games, by scores of 30-15, 30-14, and 30-24. In games one and two the Eagles jumped out early on the Flying Dutchmen and did not look back.

Game three was a different story as the Eagles battled back from a five-point deficit early on in the game to eventually pull away for the win.

Senior Abby Leonard keyed a Juniata run with some excellent serving, while Kines led the offense during this run. Kines was named the Tournament Most Valuable Player as she contributed 12 kills, 4 blocks and 5 digs in the championship match.

Laucks and Thomas each had a game-high 14 kills, while Thomas also led with 12 digs. Ritchey and freshman Beth Kozak each netted over 20 assists.

The Eagles defeated Moravian handedly in the Commonwealth Conference semifinals to advance to the championship. The Eagles won by scores of 30-13, 30-15, and 30-19.

Five Eagles were named the Commonwealth Conference All-Conference team. Kines was named Commonwealth Player of the Year, while also being tabbed with first-team honors. Joining her on the first team for the third consecutive season was Laucks. McMinn, Thomas and Schatz were all named to the second-team, the first All-Conference selection for each.

Same players, new goals, fresh start

Aly Pompeani

The Juniata men's basketball team returns every player from last year's 9-16 season and adds five freshmen. Seniors Tommy McConnell, Jeff Byer and Travis Boyd will be the first graduating class for head coach Greg Curley.

"This has been the longest off-season for me," Curley said. "I am as excited as I have ever been."

For now, the men practice once a day for two to three hours. They are concentrating on achieving their long term goals of winning the MAC and making the NCAA playoffs. In order to be successful, the team will break down the season into short-term goals.

"We need to focus on having good, consistent practices throughout the season, having good leadership, and playing as a team," said sophomore Garrett Bull.

"This is the most talented group I have had since I've been here," said Curley. "Mentally we are so much further than we were last year, and so much more mature."

The men started the season by traveling to Division I St. Francis University for an exhibition game. Even though the scoreboard read 68-50 favoring St. Francis, the Eagles kept their heads up high. "Although still a loss, the scrimmage was a positive start to our season as well as a great building block for us for the rest of the year," said Bull.

The Eagles then took on Division II rivals Slippery Rock at home. The men started off strong, tied 25-25 at the end of the first half of the scrimmage. By the end of the game, every player had a chance to participate. Although the game is not significant to the Eagles' record, it does help them focus on improvement.

"It shows us how much we need to improve everyday to achieve the goals that we set for ourselves," said Byer. "We need to become more consistent at things that we do while eliminating the things that we did that were incorrect."

This year, Juniata brings something new to the court - a junior varsity team. With 18 players this season, it was possible to break the team down into two groups. The JV squad will play about 8 to 10 games this season in addition to the varsity schedule.

"I believe having a JV team will help our team in the long run and will give the players who are not playing in the varsity games an excellent opportunity to compete and play against someone besides our teammates," said Bull.

Sophomore Brian Cannon says that the teams' expectations this year are much higher than last year. "We have a lot more experience and leadership than we did and this will be a big reason for our success," said Cannon.

Juniata will open up its season by playing host to the four-team Doc Greene Tournament on November 18 and 19. The Eagles are slated to tip-off against Lancaster Bible on at 8 p.m. tomorrow night.

Women's basketball team all about respect

Heather Lockwood

Merriam-Webster's dictionary says, "Respect means to give a particular attention, or to have high regard." To Juniata's women's basketball team respect is more than a simple word that can be found in a dictionary. Respect is a mission.

After finishing last season with an overall record of 5-19, the team is ready to make leaps and bounds to achieve the respect they feel they deserve.

Freshman Gina Piccolini said, "We are out to make ourselves known to the other teams in our conference. We have been working harder than ever, and they should be prepared!"

Aiming high this season, the women have impressive goals. Sophomore Jess Winemiller said, "We have one huge goal of achieving a record of 20-5 and we are determined to get it."

Helping the women achieve their goal is head coach Danny Young. With two seasons under her belt she is excited to start her third season coaching at Juniata.

"This year I am kind of changing my whole philosophy," she said. "I have always been defense-centered, but I have learned that there are two sides of the game. This year we are trying to focus offensively."

Young's new philosophy emphasizes creative freedom and more focus toward offensive strategies. With the Eagle's new strategies, they hope to be unstoppable.

Completing scrimmages against Seton Hill on November 5 and Franklin and Marshall on November 11, the team is enthusiastic to begin its season.

The women will start their season at the Wilmington Tip-Off Tournament on November 18.

Though the team is more experienced than last year, they are still young. "It is amazing what a year can do. I expect a lot from the underclassmen and I expect them to hold responsibility like juniors and seniors," said Young.

Because of its experience, the entire team will step up and become leaders for each other. "I have decided not to name captains this year because with a whole team of leadership, we will benefit in the long run," said Young. "Of course, leadership naturally forms especially from the seniors."

To prepare for its scrimmages and first games, the team has been practicing hard during the pre-season. Beginning on October 17, the team was ready to play after team workouts during the off season.

"Pre-season was really hard," said Piccolini. "We had conditioning three days a week, lifting twice a week, and played pickup three days a week. Our workouts were challenging. I know I've never been in better shape in my life, and a lot of my teammates feel the same way."

Once the women laced up their shoes and put their practice uniforms on, the team was more than ready to play. "We are definitely excited for this season. We have everyone from last year back as well as some fresh faces," said Winemiller.

Like Winemiller, Young was thrilled about the women's eagerness. Young said, "The team's attitude was unbelievable. After their first scrimmage they were so excited. They have gained confidence after last year. It is almost borderline cockiness."

Ranked seventh out of eight in the conference, the women believe they are going to surprise a lot of teams. Last year the team lost many games by three or less points. To be successful, the women will have to reverse this trend.

With a good balance of post and guard players, the team will have great depth to work from. Young expects to shift her starting lineup frequently throughout the season. Unlike last season, she wants the women to fight for their positions instead of playing the same players all the time.

Like Young's new system of play, a new coach has been added to the team. Assistant coach Shauna Little is bringing optimism, encouragement and an outgoing attitude for the women.

"Shauna is the complete opposite of me. She is very loud and outgoing. We complement each other very well," said Young.

With a new system of play, new players, and a new assistant coach, Juniata's women's basketball team is aiming high. This season is about respect, on and off the court. According to them, they are "proud to be…JC."

Solid start for swimming

continued from page 12

finish in the 100 backstroke. Juniata also had strong showings in the 800 freestyle as senior Kim Dierolf took second and sophomore Kasey Brough finished third.

The ladies came out the very next day and claimed two victories in a tri-meet at Lebanon Valley. "The girls swam so well today," said McGrath.

The women swam to victories over Lebanon Valley College, 65-56, and Drew University, 91-30. On the day, Juniata took first in eight different events. Collin Thompson had a lifetime-best in the 200 backstroke; she also added a first place finish in the 100 backstroke.

Hanson took first in the 400 freestyle in the sixth-fastest time in school history. Other first places came from Zoubek in the 200 butterfly, Brough in the 200 freestyle and Bair in the 200 breaststroke.

The women will be back in the pool this Saturday when they take on powerhouse Scranton.

River Rats claim title for first time in history

Kim Wagner

The Juniata River Rats rugby club team has claimed the Allegheny Rugby Union (ARU) Division III title. This is the first time for the Rats in their 30 year history at Juniata.

The regular season consisted of six games, resulting with a 4-2 record. The ARU is made up of four other schools that include Geneva, Pitt-Johnstown, Carnegie Mellon and Grove City.

The team entered the playoffs in third place.

Juniata first went up against the number two seed, Grove City, to whom they lost earlier in the season. The rats won 22-10. Those who scored for this match were sophomore Andrew Loveitt, senior Matt Sheeley and sophomore Luke Ferster.

This win set the Rats up to compete against UPJ for the league championship. After losing to UPJ earlier in the season, the Rats won, 24-14. Sheeley, Ferster and junior JP Melle all scored in the win.

According to senior rugby club president Brenton Mitchell, the program has been building upon the teams from the past. He said, "It's a win for every single member that has ever played."

Juniata club rugby is a student run organization.

"Very few people understand the type of dedication and hard-work that goes into running a club sport," said 2004 graduate and former Rat Dan Healy. "With college run sports teams, things such as uniforms, practice schedules, game research, game schedules, transportation, finances, equipment, and skills training are all taken care of by a staff of coaches and instructors."

Mitchell describes rugby as a competition with the tempo of soccer and basketball and the hitting of hockey and football, only without the pads. A rugby match is made up of 15 players on each side playing two 40-minute halves. A team will receive five points for a try, which is like a touchdown and two points for a conversion kick following the try, which is like the extra point in football. The game of rugby is played all around the world.

"Rugby is more than a game, it is a bond, an appreciation and respect for your teammates and your opponents," Healy said. "And in the end, we are all friends."

The 10 Sweetest Lives in Sports

Tommy McConnell

Look at my little picture that runs with this article. How miserable do I look? I might as well be Michael Scofield getting my mug shot at the Fox River State Pen.

But, do you know why I look like I'm about two seconds from going on a three state killing spree? Well, besides the fact that North Carolina might be defending its national title in the NIT this year? It's because I don't have one of the 10 Most Envious Lives in Sports, that's why (and because I think I woke up a minute before that picture was snapped).

Now, don't get me wrong. I like my life just fine. All I'm saying is that being a high profile member of the Sports World has its perks. Money, for example. Women, for another example. Plus about a billion other reasons we won't get into here.

So who owns the Sports World? These guys do, in order from most obvious to most surprising (and by the way, I arranged it this way so I could make more bold headlines. Never gets old for me. Moving on…):

Tom Brady. Three out of the last four Super Bowls is a nice start, not to mention two MVPs to go along with them. But it's the way he goes about winning that really separates him. If there are two minutes on the clock and your team is down by four, would you be even remotely nervous if Brady was under center? I certainly wouldn't be. It has gotten to the point that you expect him to deliver – and then he does. Every time. Plus, he's dating Bridget Moynahan. 'Nuff said.

Tiger Woods. Arguably the most dominant athlete of his generation (if, that is, you count golf as a sport). I know he works his tail off (what a great pun. I'm actually patting myself on the back right now), but he basically only has to gear up for four events every year. As long as he wins them, he's a legend. Which he usually does, and usually in mind-blowing fashion to boot. Plus, he has a Swedish nanny for a wife. 'Nuff said.

Matt Leinart. Good God, where do you start? He went back to college for his senior year (screwing over the 49ers in the process, by the way. Deep breaths. Remember your pressure points. Woo-sah, woo-sah…) just so he could be The Man on a huge college campus in sunny California. If you believe half the stuff written about him, he's doing a hell of a job at it, too. He is taking exactly one class - ballroom dancing, veeeery strenuous, I'm sure - so he is basically just playing on a loaded team for a third national title and chilling the rest of the time. Plus, he has every, ah…co-ed on campus lining up at his door. 'Nuff said.

Phil Jackson. How cushy is this situation? He is in an absolute win-win. If the Lakers make the playoffs, Phil is the man again. If they don't, well, who could win with just Kobe and those no-names, anyways? (Although I am Fan No. 1 of the Smush Parker era. As far as I'm concerned, the more Smush, the better.) If Kobe loses his mind? Well, Phil's still getting his $10 million. His legacy is intact regardless. Plus, he's dating his boss's daughter. 'Nuff said.

LeBron James. What a freak. Honestly, he could jump over the backboard in his next game and I don't even think I'd bat an eyelash. He has in-game dunk contests. When he gets a steal on the wing, no one in the stadium is breathing. He throws passes to people who don't even know they are open. He will average a triple-double sometime in the near future. He's called the Chosen One for a reason. Not to mention his endorsement paycheck is roughly the GNP of Angola. Plus, he has the best flavor of Bubblicious on the market. 'Nuff said (see, I'm not a sexist. Really, I'm not.)

Michael Vick. Is he a better athlete than LeBron? Honestly, I don't know and I don't even care. The Michael Vick Experience is the best thing the NFL has going for it right now, and with good reason. Just like LeBron, whenever he takes off from the pocket, no one is the stadium is breathing. I mean, he made two guys run into each other! Think about that. He is so fast, he made one human smash into another human. Ridiculous. Plus, he created the alias Ron Mexico for reasons that are too funny to print. Has anyone ever had a funnier alias than Ron Mexico? I'm just kicking myself I didn't come up with it first.

David Stern. What an appropriate last name. This man gets whatever he wants. He absolutely owns the NBA and its players. I would love to see an arbitrator walking into Stern's office for the first time. He would have absolutely no shot; he'd walk out of there babbling. The man instituted a dress code and got away with it! This isn't a Catholic grade school he's running, this is the NBA! And every time anyone questions his authority, he responds with a little smile that basically says, "I can't believe this idiot is even talking," and then needles them with a terrific one-liner. There is a movement going around that he should be the next President. I wholeheartedly agree.

Mark Cuban. He is the only guy who can consistently get under Stern's skin. Quite a feat. Plus, he's worth more money than God. Nice gig.

Chad Johnson. Johnson is approaching rare territory. There are only a few people who can truly speak their minds and get away with it. If he isn't already there, he's pretty close. Plus, he's in the midst of one of the greatest trash talking runs of all time. And he has gold teeth. What a resume.

Tony Kornheiser and Michael Wilbon. They count as one because I said so and it's dumb to have a Top 11 list. They have basically become the de facto opinion on all sport topics. I can't think of two people's opinions that are more influential to the average fan than theirs. Throw in the entertainment value, Stat Boy and the cheesey costumes and it's not even a contest.

Quick side note: When I was making this list, I asked my boy JP who he would put on it. He voted for Jim Nantz, saying he does football games year round, then works March Madness and then right to the Masters. Impressive run. But you know what?

It's my list. 'Nuff said.

THE RANDOM ELEVEN

Matt Russell

Sustain me to the bathroom: Last issue, we ran an article which noted many bins of recycling had to be thrown away because of students urinating and vomiting in them. I guess we've all had times when we've been plastered out of our minds and just felt the need to relieve ourselves in the hallway. I mean, it's understandable.

Watch for nods: If you saw someone start reading this column and begin nodding in agreement, they're the sick ones! Get them!

Organized jumping party: I've decided how to fix the furniture in South lounge. Sure they just replaced it, so at least you're not always sitting in three overlapping stains now. But have you ever tried to sink into one? You think "oh, this looks comfortable" which soon turns into "ow!" when you hit the rock hard cushions. Please join us in the lounge every Wednesday from 2-3am for sofa jumping. The cushions must be broken in.
